Cumberland Resources Ltd. (the Company) is a Canadian issuer that is permitted, under the multijurisdictional disclosure system adopted in the United States, to prepare its Annual Report pursuant to Section 13 of the Securities Exchange Act of 1934 (the Exchange Act) in accordance with disclosure requirements in effect in Canada which differ from those of the United States. ## **FORWARD-LOOKING STATEMENTS**

This Annual Report and the Exhibits included herein include certain forward looking information within the meaning of the Ontario Securities Act or forward looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 of the United States, including statements concerning our plans at the Meadowbank Gold Project and other mineral properties, which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward looking statements, including, without limitation, risks and uncertainties relating to the interpretation of drill results and the estimation of mineral resources and reserves, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company's expectations, metal recoveries, accidents, equipment breakdowns, title matters and surface access, labour disputes or other unanticipated difficulties with or interruptions in production, the potential for delays in exploration or development activities or the completion of new or updated feasibility studies, the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations (including gold, fuel, steel and construction items), currency fluctuations, failure to obtain adequate financing on a timely basis and other risks and uncertainties, including those described under the heading Risk Factors in the Company's Annual Information Form filed as Exhibit 1 to this Annual Report on Form 40-F. Forward-looking information and forward-looking statements are in addition based on various assumptions including, without limitation, the expectations and beliefs of management, the assumed long term price of gold, that the Company will receive required permits and access to surface rights, that the Company can access financing, appropriate equipment and sufficient labour and that the political environment within Nunavut and Canada will continue to support the development of environmentally safe mining projects so that the Company will be able to commence the development of the Meadowbank Project within the established timetable. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Accordingly, readers are advised not to place undue reliance on forward-looking statements. The words anticipate, believe, estimate and expect and similar expressions as they relate to the Company or its management, are intended to identify forward looking statements relating to the business and affairs of the Company. Except as required under applicable securities legislation, we undertake no obligation to publicly update or revise forward-looking statements, whether as a result of new information, future events or otherwise.

## **RESERVE AND RESOURCE ESTIMATES**

All estimates of mineral reserves and resources incorporated by reference in this Annual Report have been prepared in accordance with Canadian National Instrument 43-101 ( NI 43-101 ) and the Canadian Institute of Mining and Metallurgy Classification System. These standards differ significantly from the requirements of the United States Securities and Exchange Commission ( SEC ). Accordingly, information concerning descriptions of mineralization, reserves and resources contained in this Annual Report may not be comparable to information from U.S. companies subject to the SEC's reporting and disclosure requirements. In particular, the term resource does not equate to the term reserves. The definitions of proven and probable reserves used in NI 43-101 differ from the definitions in SEC Industry Guide 7. Under U.S. standards, mineralization may not be classified as a reserve unless the determination

has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. The SEC's disclosure standards normally do not permit the inclusion of information concerning measured, indicated, or inferred mineral resources in documents filed with the SEC, unless such information is required to be disclosed by the laws of the Company's principal jurisdiction or of a jurisdiction in which its securities are traded. U.S. Investors should also understand that inferred mineral resources have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimated inferred mineral resources may not form the basis of feasibility or pre-feasibility studies except in rare cases. Readers are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of contained ounces is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report resources as in-place tonnage and grade

### **CURRENCY**

Unless otherwise indicated, all dollar amounts in the Annual Report on Form 40-F are Canadian dollars. On December 29, 2006, the noon buying rate in the City of New York for cable transfers in Canadian dollars as certified for customs purposes by the Federal Reserve Bank of New York was Canadian \$1.00 = U.S. \$0.8582, and on December 30, 2005, the rate was Canadian \$1.00 = U.S. \$0.8579.

Internal control over financial reporting is defined in Rule 13a-15(f) and Rule 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorization of management and directors of the

Company; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006.
