FRANKLIN - TEMPLETON- MUTUAL SERIES

FRANKLIN TEMPLETON INVESTMENTS

GAIN FROM OUR PERSPECTIVE

Franklin Templeton's distinct multi-manager structure combines the specialized expertise of three world-class investment management groups--Franklin, Templeton and Mutual Series.

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a leader in tax-free investing and a driving force in fixed income investing around the globe. They also bring expertise in growth- and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with research offices in over 25 countries, they offer investors the broadest global reach in the industry.

MUTUAL SERIES. Established in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among undervalued stocks, arbitrage situations and distressed companies.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to distinctly different investment approaches, Franklin, Templeton and Mutual Series funds typically have a low overlap of securities. That's why our funds can be used to build truly diversified portfolios covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable account services that have helped us become one of the most trusted names in financial services.

ANNUAL REPORT

FRANKLIN FLOATING RATE TRUST

YOUR FUND'S GOAL AND PRIMARY INVESTMENTS: Franklin Floating Rate Trust seeks to provide as high a level of current income and preservation of capital as is consistent with investment primarily in senior secured corporate loans and corporate debt securities with floating interest rates.

PERFORMANCE OVERVIEW

Franklin Floating Rate Trust posted a +6.36% cumulative total return for the fiscal year ended July 31, 2003, as shown in the Performance Summary on page 7. The share price, as measured by net asset value, rose from \$8.31 per share on July 31, 2002, to \$8.43 at year-end. The Fund made dividend distributions totaling \$0.388467 per share. 1

ECONOMIC OVERVIEW

The U.S. economy entered its third year of lackluster growth during the period under review. Corporate accounting scandals and war with Iraq contributed to suppressed consumer confidence and tempered economic growth. The economy, as measured by gross domestic product (GDP) growth, expanded at a 3.1% annualized pace in the second quarter of 2003, following 1.4% annualized growth rates for each of the previous two quarters.

The Federal Reserve Board, in an attempt to bolster the sluggish economy, continued to cut interest rates during the period under review, reducing the federal funds target rate from 1.75% to 1.00% over the course of the reporting period. Short-term interest rates, as measured by the three-month London InterBank Offered Rate (LIBOR), the benchmark underlying many of the Fund's floating rate loans, also fell, dropping from 1.82% at the beginning of the period under review to 1.11% on July 31, 2003. For the same period, long-term rates also dipped, with the yield on the 10-year Treasury note falling from 4.51% to 4.49% after reaching a low of 3.10% in early June.

Seeking to inject fiscal stimulus into the economy, the government approved another round of tax cuts, including dividend tax reductions. Even with monetary

WHAT ARE SYNDICATED BANK LOANS?

Syndicated bank loans are typically insured, floating rate loans to corporate borrowers made by a group, or syndicate, of banks and other lenders. A group of lenders provides capital to companies for varied purposes, such as merger and acquisition activity, leveraged buyouts or refinancings. Borrowing rates are generally pegged to an index, such as LIBOR, the London InterBank Offered Rate.

AND fiscal stimulus, by period-end economic recovery was not assured. On a brighter note, U.S. equity markets, which often serve as a leading indicator of economic recovery, rallied through 2003's second quarter and into July, ending the fiscal year higher, with the Dow Jones Industrial Average increasing from 8736.59 on July 31, 2002, to 9233.80 at period-end, for a gain of 8.27%. 2

SYNDICATED BANK LOAN MARKET

The first few months of the year under review were challenging in the loan market, due to weakening institutional demand and a decline in new-issue volume. With the economy languishing and the threat of a war looming, Treasury yields declined and the LIBOR rate remained low, affecting our loan yields.

After a difficult late summer and early fall of 2002, the loan market recovered and performed well over the last nine months of the reporting period. Recovering equity and high yield bond markets contributed to improved performance, as did the entrance of new, non-traditional loan investors. Many of the new entrants into the loan market included hedge funds and other institutional vehicles seeking high risk-adjusted returns, which increased demand for loans.

Fundamental factors also contributed to the loan market's improved performance, resulting in lower default rates and fewer distressed and lower-rated loans than we have seen since 2000. In June 2003, the lagging 12-month Standard & Poor's default rate by principal amount declined to its lowest level since December 1999.

INVESTMENT STRATEGY

We use credit analysis to select corporate loan and corporate debt securities that meet our criteria. We seek to invest in companies with the ability to generate substantial free cash flow, that are in industries with strong barriers to entry, and that possess significant asset coverage and collateral for our debt. We also prefer companies with dominant market shares, strong management teams and stable growth prospects, according to our analysis.

MANAGER'S DISCUSSION

During the 12 months ended July 31, 2003, the syndicated bank loan market was active, offering the Fund many investment opportunities in the primary and secondary markets. Our investments in TRW Automotive (TRW), Peabody Energy, International Steel Group (ISG) and DirecTV aided Fund performance. All four traded at premiums to our initial purchase price at period-end, while offering attractive yields. Their individual stories follow, below:

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

We bought the bank debt of TRW, a diversified supplier of automotive systems, modules and components. TRW serves all major vehicle manufacturers and their suppliers worldwide, and the company is widely recognized for its superior safety systems. TRW operates primarily in North America and Europe, but also has facilities in China, South Korea, India, South Africa and other parts of the world. The company holds the top market position in several of its product lines and is among the leaders in several others.

We also purchased Peabody Energy's bank debt. In 2002 Peabody, the world's largest private-sector coal producer, fueled the generation of more than 9% of all U.S. electric consumption. Peabody owns majority interests in 33 coal operations in the U.S. and holds the largest market share in three of the four primary U.S. coal-producing regions. Peabody is the largest producer in the Powder River Basin, the Midwest and the Southwest, and has added more capacity from surface mines rather than underground mines in recent years.

ISG was formed in 2002 by Wilbur Ross, a well-known investor in distressed securities. ISG is the combination of two bankrupt integrated steel companies -- LTV Steel and Acme. Although steel can be a difficult industry, we found ISG attractive because it lacks the substantial pension and medical liabilities that strained its predecessor companies.

Finally, we invested in the bank debt of DirecTV, the largest provider of digital broadcast satellite television services with approximately 11.6 million U.S. subscribers at period-end. DirecTV exhibited strong financial performance, cash flow growth and net subscriber additions over the past several calendar quarters. The company's large subscriber base also helps it reduce expenses and improve profitability by negotiating for programming on favorable terms and to secure unique and exclusive programming.

THE FUND'S REPURCHASE OFFERS

The Fund will make quarterly repurchase offers for a portion of its shares. With any repurchase offer, shareholders may elect to tender (have the Fund repurchase) all, a portion or none of their shares. With each repurchase offer, shareholders will be notified in writing about the offer, how to request that the Fund repurchase their shares and the deadline for submitting repurchase requests.

Each quarter the Board of Trustees will set the amount of the repurchase offer, as a percentage of outstanding shares. This amount is known as the repurchase offer amount and will generally be between 5% and 25% of the Fund's outstanding shares. If repurchase requests exceed the repurchase offer amount, the Fund will prorate requests. The Fund may, however, first accept any requests to repurchase all of a shareholder's shares if the shareholder owns less than 100 shares. The Board will also determine the date by which the Fund must receive shareholders' repurchase requests, which is known as the repurchase request deadline. The Board will base these decisions on investment management considerations, market conditions, liquidity of the Fund's assets, shareholder servicing and administrative considerations and other factors it deems appropriate. Each repurchase request deadline will occur within the period that begins 21 days before, and ends 21 days after, the end of the quarterly interval. The repurchase price of the shares will be the net asset value as of the close of the NYSE on the date the Board sets as the repurchase pricing date. The maximum number of days between the repurchase request deadline and the repurchase pricing date is 14 days.

SUMMARY OF REPURCHASE OFFERS - 8/1/02 THROUGH 7/31/03

REPURCHASE REQUEST DEADLINE	REPURCHASE OFFER AMOUNT	% OF SHARES TENDERED*	NUMBER OF SHARES TENDERED*
1. 10/2/02	25%	18.364%	39,752,700.668
2. 1/3/03	25%	12.052%	21,572,736.857
3. 4/1/03	25%	9.216%	14,701,188.799
4. 7/1/03	25%	7.691%	11,326,020.293

*In connection with the repurchase offers, due to the limited number of shares tendered, the Fund did not have to consider whether to repurchase an additional amount of shares, not in excess of 2% of the shares outstanding, and did not need to repurchase any shares on a pro rata basis as described in the Prospectus and Repurchase Offer/Request Form.

FRANKLIN FLOATING RATE TRUST

NOTES TO FINANCIAL STATEMENTS

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The Franklin Floating Rate Trust (the Fund) is registered under the Investment Company Act of 1940 as a non-diversified, closed-end, continuously offered investment company. The Fund seeks current income and preservation of capital. The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

The Fund invests primarily in senior secured corporate loans and senior secured debt that meet credit standards established by Franklin Advisers Inc. The Fund values its securities based on quotations provided by banks, broker/dealers or pricing services experienced in such matters. Restricted securities and securities for which market quotations are not readily available are valued at fair value as determined by management in accordance with procedures established by the Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

securities and income items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. SECURITIES PURCHASED ON A WHEN-ISSUED OR DELAYED DELIVERY BASIS

The Fund may purchase securities on a when-issued or delayed delivery basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date.

D. SENIOR FLOATING RATE INTERESTS

Senior secured corporate loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. These base lending rates are generally the prime rate offered by a designated U.S. bank or the London InterBank Offered Rate (LIBOR).

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. INCOME TAXES

No provision has been made for income taxes because the Fund's policy is to qualify as a regulated investment company under the Internal Revenue Code and to distribute substantially all of its taxable income.

F. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Discounts and premiums on securities purchased are amortized over the lives of the respective securities. Facility fees are recognized as income over the expected term of the loan. Dividend income and distributions to shareholders are recorded on the ex-dividend date.

G. ORGANIZATION COSTS

Organization costs are amortized on a straight line basis over five years.

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

H. ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

I. GUARANTEES AND INDEMNIFICATIONS

Under the Fund's organizational documents, its officers and trustees are indemnified against certain liability arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

J. UNFUNDED LOAN COMMITMENTS

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. These commitments are disclosed in the accompanying Statement of Investments and Statement of Assets and Liabilities.

3. TENDER OF SHARES

On a quarterly basis, the Fund may make tender offers, the amount of which is determined by the Board of Trustees, for the repurchase of at least 5% but not more than 25% of the shares outstanding. The repurchase price is the net asset value on the tender offer expiration date.

4. REVOLVING CREDIT FACILITY

The Fund participates in a \$200 million senior unsecured revolving credit facility to fund shareholder redemptions or meet unfunded loan commitments. The facility agreement ends on December 19, 2003. Interest is charged at the Federal Funds Rate plus .50%. Facility fees paid are amortized on a straight line basis over the term of the commitment. Annual commitment fees of .09% are charged on the unused portion of the facility and allocated among the participating funds based on net assets.

During the year ended July 31, 2003, the Fund did not utilize the facility.

5. TRANSACTIONS WITH AFFILIATES

Certain officers and trustees of the Fund are also officers and/or directors of the following entities:

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, and bond premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatment of wash sales, defaulted securities, foreign currency transactions, and bond premiums.

The Fund earned \$2,328,874 of dividend income from investment in the Sweep Money Fund for the year ended July 31, 2003.

9. CREDIT RISK AND DEFAULTED SECURITIES

The Fund discontinues accruing income on these securities and provides an estimate for losses on interest receivable. At July 31, 2003, the value of these securities was \$35,449,665 representing 3.05% of the Fund's net assets. 10. RESTRICTED SECURITIES

At July 31, 2003, investments in securities included issues that are restricted or illiquid. Restricted securities are often purchased in private placement transactions, are not registered under the Securities Act of 1933, may have contractual restrictions on resale, and are valued under methods approved by the Board of Trustees as reflecting fair value. A security may also be considered illiquid if it lacks a readily available market or if its valuation has not changed for a certain period of time. At July 31, 2003, the Fund held investments in restricted and illiquid securities that were valued under approved methods by the Trustees, as follows:

Advisers, as the Fund's Manager, may serve as a member of various bondholders' steering committees, on credit committees, or may represent the Fund in certain corporate restructuring negotiations. Currently the Manager serves in one or more of these capacities for Adelphia Communications Corp. As a result of this involvement, the Advisers may be in possession of certain material non-public information. If the Fund's Manager, while in possession of such information, seeks to sell any of its holdings in these securities it will comply with all applicable federal securities laws.

13. RECENT LITIGATION

On July 6, 2003, Adelphia Communications Corp. ("Adelphia") and related parties, along with its Official Committee of Unsecured Creditors, filed an adversary proceeding in the Adelphia bankruptcy case in the U.S. Bankruptcy Court (SDNY)

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

against more than 360 banks, financial services companies, insurance companies, investment banks, mutual funds and other parties that had arranged for the sale of, or purchased the bank debt of, Adelphia or its related parties. Named Defendants included Franklin Advisers Inc., Franklin CLOs I-III, Franklin Floating Rate Daily Access Fund, Franklin Floating Rate Master Series, and Franklin Floating Rate Trust.

The Complaint alleges that the purchasers of this bank debt knew, or should have known, that the loan proceeds would not benefit Adelphia, but instead would be used to enrich Adelphia insiders. It seeks avoidance of the loans and recovery of intentionally fraudulent transfers.

Although it is not possible to predict the outcome of these matters at this early stage of the proceedings, the Fund's management does not expect that the result will have a material adverse effect on the financial condition of the Fund.

(A) (1) THE REGISTRANT HAS AN AUDIT COMMITTEE FINANCIAL EXPERT SERVING ON ITS AUDIT COMMITTEE.

(2) THE AUDIT COMMITTEE FINANCIAL EXPERT IS FRANK W.T. LAHAYE AND HE IS "INDEPENDENT" AS DEFINED UNDER THE RELEVANT SECURITIES AND EXCHANGE COMMISSION RULES AND RELEASES.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The board of trustees of the Trust has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's manager, Franklin Advisers, Inc., in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the manager.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to Institutional Shareholder Services (ISS), an unaffiliated third party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. Although ISS' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from ISS or any other third party to be determinative of the manager's ultimate decision. The manager votes proxies solely in the interests of the Fund and its shareholders. As a matter of policy, the officers, directors and employees of the Fund, the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. All conflicts are resolved in the interests of the manager's clients. In situations where the manager perceives a material conflict of interest, the manager may: disclose the conflict to the Fund's Board of Directors; defer to the voting recommendation of

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

the Fund's Board of Directors, ISS or those of another independent third party provider of proxy services; or take such other action in good faith (in consultation with counsel) which would protect the interests of the Fund and its shareholders.

The recommendation of management on any issue is a factor which the manager considers in determining how proxies should be voted, but is not determinative of the manager's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

ADVISER'S PROXY VOTING POLICIES AND PRINCIPLES

The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

MANAGEMENT & DIRECTOR COMPENSATION A company's equity-based compensation plan should be in alignment with its shareholders' long-term interests. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the ISS quantitative model utilized to assess such plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders. The manager will review on a case-by-case basis any shareholder proposals to adopt policies on expensing stock option plans.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. The manager will generally vote against any proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-CSR

payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase and proposals seeking preemptive rights. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING Mergers and acquisitions will be subject to careful review by the research analyst to determine whether each will be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring and reincorporation proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE Many of the tenets discussed above are applied to proxy voting decisions for international companies. However, the manager must be more flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every vote it receives for all domestic and foreign proxies. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. The manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

Shareholders may view the complete Policies on-line at www.franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at 1-954-847-2268 or by sending a written request to: Franklin Templeton Companies, LLC, 500 East Broward Boulevard, Suite 1500, Fort Lauderdale, FL 33394, Attention: Proxy Group. Copies of the Fund's proxy voting records will also be made available on-line at www.franklintempleton.com and posted on the SEC website at www.sec.gov no later than August 31, 2004 and will reflect the twelve-month period beginning July 1, 2003, and ending June 30, 2004
