**PROSPECTUS SUPPLEMENT**  
**(To Prospectus dated October 29, 2012)**

## **Up to 45,000,000 Shares**

### **Common Stock**

Prospect Capital Corporation is a financial services company that lends to and invests in middle market, privately-held companies. We are organized as an externally-managed, non-diversified closed-end management investment company that has elected to be treated as a business development company under the Investment Company Act of 1940. Prospect Capital Management LLC manages our investments and Prospect Administration LLC provides the administrative services necessary for us to operate.

We have entered into an equity distribution agreement, dated February 11, 2013, with KeyBanc Capital Markets Inc., relating to shares of common stock offered by this prospectus supplement and the accompanying prospectus. We sometimes refer to KeyBanc Capital Markets Inc. as the "Sales Manager."

The equity distribution agreement provides that we may offer and sell up to 45,000,000 shares of our common stock from time to time through the Sales Manager, as our agent for the offer and sale of such common stock. Sales of our common stock, if any, under this prospectus supplement and the accompanying prospectus may be made in negotiated transactions or transactions that are deemed to be "at the market" as defined in Rule 415 under the Securities Act of 1933, as amended, or the "1933 Act," including sales made directly on the NASDAQ Global Select Market or sales made to or through a market maker other than on an exchange.

The Sales Manager will receive from us a commission to be negotiated from time to time but in no event in excess of 2.0% of the gross sales price of all shares of common stock sold through it as Sales Manager under the equity distribution agreement. The Sales Manager is not required to sell any specific number or dollar amount of common stock, but it will use its commercially reasonable efforts to sell the common stock offered by this prospectus supplement and the accompanying prospectus. See "Plan of Distribution" on page S-67 of this prospectus supplement.

These shares of common stock may be offered at a discount from our most recently determined net asset value per share pursuant to authority granted by our stockholders at the 2012 annual meeting of stockholders held on December 7, 2012. Sales of common stock at prices below net asset value per share dilute the interests of existing stockholders, have the effect of reducing our net asset value per share and may reduce our market price per share. See "Risk Factors" beginning on page S-9 and "Recent Sales of Common Stock Below Net Asset Value" beginning on page S-55 of this prospectus supplement and on page 121 of the accompanying prospectus.

Our common stock is listed on The Nasdaq Global Select Market under the symbol "PSEC." The last reported sale price of our common stock on February 8, 2013 was \$11.49 per share. Our most recently estimated NAV per share is \$10.83 on an as adjusted basis solely to give effect to our issuance of common stock since December 31, 2012 in connection with our dividend reinvestment plan and our issuance of 10,248,051 shares of common stock during the period from January 1, 2013 to February 5, 2013 under our at-the-market offering program, versus \$10.81 determined by us as of December 31, 2012.

**PROSPECTUS SUMMARY**

*This summary highlights some of the information contained elsewhere in this prospectus supplement and the accompanying prospectus. It is not complete and may not contain all of the information that you may want to consider. You should read carefully the more detailed information set forth under "Risk Factors" in this prospectus supplement and in the accompanying prospectus and the other information included in this prospectus supplement and the accompanying prospectus.*

*The terms "we," "us," "our" and "Company" refer to Prospect Capital Corporation; "Prospect Capital Management," "Investment Advisor" and "PCM" refer to Prospect Capital Management LLC; and "Prospect Administration" and the "Administrator" refer to Prospect Administration LLC.*

**The Company**

Prospect Capital Corporation is a financial services company that primarily lends to and invests in middle market privately-held companies. In this prospectus supplement and the accompanying prospectus, we use the term "middle-market" to refer to companies with annual revenues between \$50 million and \$2 billion. We are a closed-end investment company that has filed an election to be treated as a business development company under the Investment Company Act of 1940, or the "1940 Act." We invest primarily in senior and subordinated debt and equity of companies in need of capital for acquisitions, divestitures, growth, development and recapitalization. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component. First and second lien senior loans generally are senior debt instruments that rank ahead of subordinated debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Mezzanine debt is subordinated to senior loans and is generally unsecured. Our investments have generally ranged between \$5 million and \$75 million each, although the investment size may be more or less than this range. Our investment sizes are expected to grow as our capital base expands.

We also acquire controlling interests in companies in conjunction with making secured debt investments in such companies. In most cases, companies in which we invest are privately held at the time we invest in them. We refer to these companies as "target" or "middle market" companies and these investments as "middle market investments."

We seek to maximize total returns to our investors, including both current yield and equity upside, by applying rigorous credit analysis and asset-based and cash-flow based lending techniques to make and monitor our investments. Many of our investments to date have been in energy-related industries, which consist of companies in the discovery, production, transportation, storage and use of energy resources as well as companies that sell products and services to, or acquire products and services from, these companies.

We are currently pursuing multiple investment opportunities, including purchases of portfolios from private and public companies, as well as originations and secondary purchases of particular securities. There can be no assurance that we will successfully consummate any investment opportunity we are currently pursuing. Motivated sellers, including commercial finance companies, hedge funds, other business development companies, total return swap counterparties, banks, collateralized loan obligation funds, and other entities, are suffering from excess leverage, and we believe we are well positioned to capitalize as potential buyers of such assets at attractive prices. If any of these opportunities are consummated, there can be no assurance that investors will share our view of

Table of Contents

valuation or that any assets acquired will not be subject to future write downs, each of which could have an adverse effect on our stock price.

As of December 31, 2012, we held investments in 106 portfolio companies. The aggregate fair value as of December 31, 2012 of investments in these portfolio companies held on that date is approximately \$3.0 billion. Our portfolio across all our interest-bearing investments had an annualized current yield of 14.7% as of December 31, 2012.

Table of Contents**Fees and Expenses**

The following tables are intended to assist you in understanding the costs and expenses that an investor in this offering will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. In these tables, we assume that we have borrowed \$552.5 million under our credit facility, which is the maximum amount available under the credit facility, in addition to our other indebtedness of \$1.13 billion and a maximum sales load of 2.0% pursuant to the equity distribution agreement. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by "you" or "us" or that "we" will pay fees or expenses, the Company will pay such fees and expenses out of our net assets and, consequently, you will indirectly bear such fees or expenses as an investor in the Company. However, you will not be required to deliver any money or otherwise bear personal liability or responsibility for such fees or expenses.

**Stockholder transaction expenses:**

Sales load (as a percentage of offering price)(1)	2.00%
Offering expenses borne by us (as a percentage of offering price)(2)	0.04%
Dividend reinvestment plan expenses(3)	None
Total stockholder transaction expenses (as a percentage of offering price)	2.04%

**Annual expenses (as a percentage of net assets attributable to common stock)(4):**

Management Fees(5)	3.53%
Incentive fees payable under Investment Advisory Agreement (20% of realized capital gains and 20% of pre-incentive fee net investment income)(6)	3.72%
Total advisory fees	7.25%
Total interest expense(7)	3.57%
Acquired Fund Fees and Expenses(8)	0.02%
Other expenses(9)	1.49%
Total annual expenses(6)(9)	12.33%

**Example**

The following table demonstrates the projected dollar amount of cumulative expenses we would pay out of net assets and that you would indirectly bear over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we have borrowed all \$552.5 million available under our line of credit, in addition to our other indebtedness of \$1.13 billion and that our annual operating expenses would remain at the levels set forth in the table above and that we would pay the costs shown in the table above.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 84.46	\$ 209.65	\$ 331.02	\$ 618.46

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The income incentive fee under our Investment Advisory Agreement with Prospect Capital Management is unlikely to be material assuming a 5% annual return and is not included in the example. If we achieve sufficient returns on our investments, including through the realization of capital gains, to trigger an incentive fee of a material amount, our distributions to our common stockholders and our expenses would likely be higher. In addition, while the example assumes reinvestment of all dividends and other distributions at net asset value, or NAV, participants in our dividend reinvestment plan will receive a number of shares of our common stock determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation

Table of Contents

date for the distribution. See "Dividend Reinvestment Plan" for additional information regarding our dividend reinvestment plan.

**This example and the expenses in the table above should not be considered a representation of our future expenses. Actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.**

---

- (1) Represents the estimated commission with respect to the shares of common stock being sold in this offering. The Sales Manager will be entitled to compensation up to 2.00% of the gross proceeds of the sale of any shares of our common stock under the equity distribution agreement, with the exact amount of such compensation to be mutually agreed upon by the Company and the Sales Manager from time to time. There is no guarantee that there will be any sales of our common stock pursuant to this prospectus supplement and the accompanying prospectus.
- (2) The offering expenses of this offering are estimated to be approximately \$200,000.
- (3) The expenses of the dividend reinvestment plan are included in "other expenses."
- (4) Net assets attributable to our common stock equal net assets (i.e., total assets less liabilities other than liabilities for money borrowed for investment purposes) at June 30, 2012. See "Capitalization" in this prospectus supplement.
- (5) Our base management fee is 2% of our gross assets (which include any amount borrowed, i.e., total assets without deduction for any liabilities, including any borrowed amounts for non-investment purposes, for which purpose we have not and have no intention of borrowing). Although no plans are in place to borrow the full amount under our line of credit, assuming that we borrowed \$1.68 billion, the 2% management fee of gross assets equals approximately 3.53% of net assets. Based on our borrowings as of February 8, 2013 of \$1.11 billion, the 2% management fee of gross assets equals approximately 3.06% of net assets. See "Business Management Services Investment Advisory Agreement" in the accompanying prospectus and footnote 6 below.
- (6) Based on the incentive fee paid during our most recently completed fiscal quarter ended December 31, 2012, all of which consisted of an income incentive fee. The capital gain incentive fee is paid without regard to pre-incentive fee income. For a more detailed discussion of the calculation of the two-part incentive fee, see "Management Services Investment Advisory Agreement" in the accompanying prospectus.
- (7) On December 21, 2010, the Company issued \$150.0 million in aggregate principal amount of 6.25% Convertible Senior Notes due 2015, which we refer to as the 2015 Notes. See "Business General" and "Risk Factors Risks Related to our Business" in the accompanying prospectus for more detail on the 2015 Notes. On February 18, 2011, the Company issued \$172.5 million in aggregate principal amount of 5.5% Convertible Senior Notes due 2016, which we refer to as the 2016 Notes. Between January 30, 2012 and February 2, 2012, we repurchased \$5.0 million of our 2016 Notes at a price of 97.5% of par, including commissions. The transactions resulted in us recognizing \$10,000 of loss in the quarter ended March 31, 2012. See "Business General" and "Risk Factors Risks Related to our Business" in the accompanying prospectus for more detail on the 2016 Notes. On April 16, 2012, the Company issued \$130.0 million in aggregate principal amount of 5.375% Convertible Senior Notes due 2017, which we refer to as the 2017 Notes. On August 14, 2012, the Company issued \$200.0 million aggregate principal amount of 5.75% Convertible Senior Notes due 2018, which we refer to as the 2018 Notes. On December 21, 2012, the Company issued \$200.0 million aggregate principal amount of 5.875% Convertible Senior Notes due 2019, which we refer to as the 2019 Notes. The 2015 Notes, 2016 Notes, 2017 Notes, 2018 Notes and 2019 Notes are referred to collectively as the Senior Convertible Notes. On May 1, 2012 the Company issued \$100.0 million in aggregate principal amount of 6.95% Senior Notes due

Table of Contents

2022, which we refer to as the 2022 Notes. As of February 7, 2013, the Company has issued \$183.0 million in aggregate principal amount of our Prospect Capital InterNotes®. The Senior Convertible Notes, the 2022 Notes and the Prospect Capital InterNotes® are referred to collectively as the Notes.

- (8) The Company's stockholders indirectly bear the expenses of underlying investment companies in which the Company invests. This amount includes the fees and expenses of investment companies in which the Company is invested in as of December 31, 2012. When applicable, fees and expenses are based on historic fees and expenses for the investment companies and for those investment companies with little or no operating history, fees and expenses are based on expected fees and expenses stated in the investment companies' prospectus or other similar communication without giving effect to any performance. Future fees and expenses for certain investment companies may be substantially higher or lower because certain fees and expenses are based on the performance of the investment companies, which may fluctuate over time. The amount of the Company's average net assets used in calculating this percentage was based on net assets of approximately \$2.33 billion as of December 31, 2012.
- (9) "Other expenses" are based on estimated amounts for the current fiscal year. The amount shown above represents annualized expenses during our three months ended December 31, 2012 representing all of our estimated recurring operating expenses (except fees and expenses reported in other items of this table) that are deducted from our operating income and reflected as expenses in our Statement of Operations. The estimate of our overhead expenses, including payments under an administration agreement with Prospect Administration, or the Administration Agreement, based on our projected allocable portion of overhead and other expenses incurred by Prospect Administration in performing its obligations under the Administration Agreement. "Other expenses" does not include non-recurring expenses. See "Business Management Services Administration Agreement" in the accompanying prospectus.
