PART IV - ITEM (3) ATTACHMENT

Based on preliminary information available to management at this point in time, management believes that revenue for the three-month period ended September 30, 2005 will be approximately 20.1% higher than for the comparable period in 2004, and that revenue for the nine-month period ended September 30, 2005 will be approximately 18.8% higher than for the comparable period in 2004. This increase is due to better pricing in our grain business and growing volumes in our protein businesses.

While management cannot at this time estimate gross margin, operating income or net income for the three- and nine-month periods ended September 30, 2005, based on preliminary information available to management at this point in time, management anticipates that results for these line items, when adjusted for non-recurring and extraordinary items, will also increase materially from comparable periods in 2004.

The foregoing information, which is unaudited, is preliminary and is subject to completion of management's review of the unaudited financial statements for the three- and nine-month periods ended September 30, 2005. Readers are cautioned that the preliminary information set forth above could change as part of the completion of these financial statements. The final version of this information will be included in the Company's Quarterly Report on Form 10-Q for such period, which will be filed with the Securities and Exchange Commission on or before November 21, 2005.
