COGNIZANT TECHNOLOGY SOLUTIONS CORPORATION
(Exact Name of Registrant as Specified in Its Charter)

Delaware (State or Other Jurisdiction of Incorporation or Organization)	13-3728359 (I.R.S. Employer Identification No.)
---	---

Glenpointe Centre West 500 Frank W. Burr Blvd.	07666
---	-------

Edgar Filing: COGNIZANT TECHNOLOGY SOLUTIONS CORP - Form 10-Q

Teaneck, New Jersey

(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: (201) 801-0233

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No:
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No:

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's class of common stock, as of July 28, 2017:

Class	Number of Shares
Class A Common Stock, par value \$.01 per share	590,622,691

COGNIZANT TECHNOLOGY SOLUTIONS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 — Interim Condensed Consolidated Financial Statements

The terms “Cognizant,” “we,” “our,” “us” and “the Company” refer to Cognizant Technology Solutions Corporation unless the context indicates otherwise. We have prepared the accompanying unaudited condensed consolidated financial statements included herein in accordance with generally accepted accounting principles in the United States of America, or U.S. GAAP, and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended, or the Exchange Act. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements (and notes thereto) included in our Annual Report on Form 10-K for the year ended December 31, 2016. In our opinion, all adjustments considered necessary for a fair statement of the accompanying unaudited condensed consolidated financial statements have been included, and all adjustments are of a normal and recurring nature. Operating results for the interim periods are not necessarily indicative of results that may be expected to occur for the entire year.

Recently Adopted Accounting Pronouncements.

In March 2016, the Financial Accounting Standards Board, or FASB, issued an update to the standard on derivatives and hedging, which clarifies the effect of derivative contract novations on existing hedge accounting relationships. As it relates to derivative instruments, novation refers to replacing one of the parties to a derivative instrument with a new party, which may occur for a variety of reasons such as: financial institution mergers, intercompany transactions, an entity exiting a particular derivatives business or relationship, or because of laws or regulatory requirements. The update clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require dedesignation of that hedge accounting relationship provided that all other hedge accounting criteria continue to be met. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on or after January 1, 2017. We adopted this update beginning January 1, 2017. The adoption of this update did not have any effect on our financial condition or results of operations.

In March 2016, the FASB issued an update to the standard on stock compensation, which simplifies several aspects of the accounting for employee share-based payment transactions including the accounting for excess tax benefits and deficiencies, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on or after January 1, 2017. We adopted this update prospectively beginning January 1, 2017. For the three and six months ended June 30, 2017, we recognized net excess tax benefits on stock-based compensation awards in our income tax provision in the amount of \$5 million and \$11 million or approximately \$0.01 and \$0.02 per share, respectively. Additionally, the excess tax benefits and deficiencies have been presented in operating activities in the statement of cash flows in our consolidated financial statements and the prior period presentation has been adjusted to conform to the current period.

In January 2017, the FASB issued an update to the standard on business combinations, which clarifies the definition of a business. The update requires a business to include at least an input and a substantive process that together significantly contribute to the ability to create outputs. The update also states that the definition of a business is not met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets. The update is effective for fiscal years, and interim periods within those fiscal years, beginning after January 1, 2018 with early adoption permitted. We early adopted this update prospectively beginning January 1, 2017. The adoption of this update did not have a material effect on our financial condition or results of operations.

In January 2017, the FASB issued an update to the standard on goodwill, which eliminates the need to calculate the implied fair value of goodwill when an impairment is indicated. The update states that goodwill impairment is measured as the excess of a reporting unit's carrying value over its fair value, not to exceed the carrying amount of goodwill. The update is effective for fiscal years, and interim periods within those fiscal years, beginning after January 1, 2020 with early adoption permitted. We early adopted this update prospectively beginning January 1, 2017. The adoption of this update did not have any effect on our financial condition or results of operations.

Table of Contents

New Accounting Pronouncements.

In May 2014, the FASB issued a standard on revenue from contracts with customers. In 2016, the FASB issued five amendments to the new standard. The new standard, as amended, sets forth a single comprehensive model for recognizing and reporting revenues. The standard also requires additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenues and cash flows relating to customer contracts. The standard is effective for fiscal years, and interim periods within those years, beginning on or after January 1, 2018. The standard allows for two methods of adoption: the full retrospective adoption, which requires the standard to be applied to each prior period presented, or the modified retrospective adoption, which requires the cumulative effect of adoption to be recognized as an adjustment to opening retained earnings in the period of adoption. We intend to adopt the standard using the modified retrospective method effective January 1, 2018. While we are currently evaluating the effect the new standard will have on our consolidated financial statements and related disclosures, we believe the most significant impacts primarily relate to changes in the method used to measure progress on our application maintenance and business process services fixed-price contracts, capitalization and amortization of costs to acquire and fulfill a contract, as well as the timing of revenue recognition on our software license contracts. Due to the complexity of certain of our contracts, the actual revenue recognition treatment required under the standard will be dependent on each contract's specific terms. The final impact of adoption of the new standard will be based on active contracts as of December 31, 2017. Many of our contracts are short-term in nature and may be renewed, terminated or otherwise modified after June 30, 2017. Additionally, new contracts will be signed during the second half of 2017. Thus, we are unable to provide a quantification of the impact of adoption of the new standard at this time.

In January 2016, the FASB issued an update to the standard on financial instruments. The update significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. It also amends certain disclosure requirements. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on or after January 1, 2018. Upon adoption, entities will be required to make a cumulative-effect adjustment to the statement of financial position as of the beginning of the first reporting period in which the guidance is effective. However, the specific guidance on equity securities without readily determinable fair value will apply prospectively to all equity investments that exist as of the date of adoption. Early adoption of certain sections of this update is permitted. We are currently evaluating the effect the update will have on our consolidated financial statements and related disclosures.

In February 2016, the FASB issued a standard on lease accounting. The new standard replaces the existing guidance on leases and requires the lessee to recognize a right-of-use asset and a lease liability for all leases with lease terms equal to or greater than twelve months. For finance leases, the lessee would recognize interest expense and amortization of the right-of-use asset, and for operating leases, the lessee would recognize total lease expense on a straight-line basis. This standard is effective for fiscal years, and interim periods within those fiscal years, beginning on or after January 1, 2019. Upon adoption, entities will be required to use a modified retrospective transition which provides for certain practical expedients. Entities are required to apply the new standard at the beginning of the earliest comparative period presented. Early adoption of this new standard is permitted. We are currently evaluating the effect the new standard will have on our consolidated financial statements and related disclosures. We expect the requirement to recognize a right-of-use asset and a lease liability for operating leases to have a material impact on the presentation of our consolidated statements of financial position.

In August 2016, the FASB issued an update to the standard on the statement of cash flows, which clarifies the presentation and classification of certain cash receipts and cash payments. The update addresses specific cash flow issues, including debt prepayment or debt extinguishment costs, contingent consideration payments made after a business combination, proceeds from the settlement of insurance claims, and distributions received from equity

method investees. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on or after January 1, 2018. Early adoption is permitted, including adoption in an interim period, provided that all of the updates are adopted in the same period. Upon adoption, entities will be required to use a retrospective transition approach. We are currently evaluating the impact of the new guidance on our consolidated financial statements. The adoption of this guidance will affect financial statement presentation only and will have no effect on our financial position or results of operations.

In March 2017, the FASB issued an update to shorten the amortization period for certain callable debt securities held at a premium to the earliest call date. The amendments do not require an accounting change for securities held at a discount. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on after January 1, 2019 with early adoption permitted. Upon adoption, entities will be required to use a modified retrospective transition with the cumulative effect adjustment recognized to retained earnings as of the beginning of the period of adoption. We are currently evaluating the effect the amendments will have on our consolidated financial statements and related disclosures.

Table of Contents

In May 2017, the FASB issued an update to amend the scope of modification accounting for share-based payment arrangements. The amendment requires that an entity will not apply modification accounting to a share-based payment award if the award's fair value, vesting conditions and classification are the same immediately before and after the modification. The update is effective for fiscal years, and interim periods within those fiscal years, beginning on after January 1, 2018 with early adoption permitted. Upon adoption, entities will be required to apply this guidance prospectively to an award modified on or after the adoption date. We are currently evaluating the effect the amendments will have on our consolidated financial statements and related disclosures.

Note 2 — Internal Investigation and Related Matters

We are conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the U.S. Foreign Corrupt Practices Act, or FCPA, and other applicable laws. In September 2016, we voluntarily notified the U.S. Department of Justice, or DOJ, and Securities and Exchange Commission, or SEC, and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel. To date, the investigation has identified a total of approximately \$6 million in payments made between 2010 and 2015 that may have been improper. During the year ended December 31, 2016, we recorded out-of-period corrections related to \$4 million of such payments that had been previously capitalized that should have been expensed. These out-of-period corrections and the other \$2 million in potentially improper payments were not material to any previously issued financial statements. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. There were no adjustments recorded during the six months ended June 30, 2017.

Note 3 — Realignment Charges

In 2017, we began a realignment of our business to accelerate the shift to digital services and solutions while improving the overall efficiency of our operations. As part of this realignment, for the three and six months ended June 30, 2017, we incurred \$39 million and \$50 million, respectively, in pre-tax realignment charges, reported in "Selling, general and administrative expenses" in our consolidated statements of operations. The realignment charges are comprised of severance costs primarily related to a voluntary separation program, or VSP, announced in May 2017, advisory fees related to non-routine shareholder matters and to the development of our realignment and return of capital programs, and lease termination costs.

Realignment charges for the three and six months ended June 30, 2017 were as follows:

	Three Months (in millions)	Six Months (in millions)
Employee separations	\$ 37	\$ 39
Advisory fees	1	10
Lease termination costs	1	1
Total realignment costs	\$ 39	\$ 50

There were no realignment charges incurred in 2016.

Note 4 — Investments

Our investments were as follows:

Table of Contents

Long-term investments:

Equity and cost method investments	\$69	\$62
Held-to-maturity investment securities	129	—
Total long-term investments	\$198	\$62

Trading Investment Securities

Our trading investment securities consist of a U.S. dollar denominated investment in a fixed income mutual fund. Unrealized losses for the three and six months ended June 30, 2017 were immaterial. There were no realized gains or losses on trading securities during the three and six months ended June 30, 2017. During the six months ended June 30, 2016, there were no investment securities in our portfolio classified as trading.

Available-for-Sale Investment Securities

Our available-for-sale investment securities consist of U.S. dollar denominated investments primarily in U.S. Treasury notes, U.S. government agency debt securities, municipal debt securities, non-U.S. government debt securities, U.S. and international corporate bonds, certificates of deposit, commercial paper, debt securities issued by supranational institutions, and asset-backed securities, including securities backed by auto loans, credit card receivables, and other receivables. Our investment guidelines are to purchase securities which are investment grade at the time of acquisition. We monitor the credit ratings of the securities in our portfolio on an ongoing basis.

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale investment securities at June 30, 2017 were as follows:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
	(in millions)			
U.S. Treasury and agency debt securities	\$644	\$ —	\$ (2)	\$642
Corporate and other debt securities	442	—	(1)	441
Certificates of deposit and commercial paper	452	—	—	452
Asset-backed securities	294	1	(1)	294
Municipal debt securities	124	—	—	124
Total available-for-sale investment securities	\$1,956	\$ 1	\$ (4)	\$1,953

The amortized cost, gross unrealized gains and losses and fair value of available-for-sale investment securities at December 31, 2016 were as follows:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
	(in millions)			
U.S. Treasury and agency debt securities	\$605	\$ —	\$ (3)	\$602
Corporate and other debt securities	407	—	(2)	405
Certificates of deposit and commercial paper	910	1	—	911
Asset-backed securities	232	—	(1)	231
Municipal debt securities	116	—	(1)	115
Total available-for-sale investment securities	\$2,270	\$ 1	\$ (7)	\$2,264

Table of Contents

The fair value and related unrealized losses of available-for-sale investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of June 30, 2017:

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in millions)					
U.S. Treasury and agency debt securities	\$551	\$ (2)	\$ —	\$ —	—\$551	\$ (2)
Corporate and other debt securities	298	(1)	—	—	298	(1)
Certificates of deposit and commercial paper	105	—	—	—	105	—
Asset-backed securities	222	(1)	3	—	225	(1)
Municipal debt securities	59	—	1	—	60	—
Total	\$1,235	\$ (4)	\$ 4	\$ —	—\$1,239	\$ (4)

The fair value and related unrealized losses of available-for-sale investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of December 31, 2016:

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in millions)					
U.S. Treasury and agency debt securities	\$526	\$ (3)	\$ —	\$ —	—\$526	\$ (3)
Corporate and other debt securities	342	(2)	1	—	343	(2)
Certificates of deposit and commercial paper	185	—	—	—	185	—
Asset-backed securities	206	(1)	1	—	207	(1)
Municipal debt securities	88	(1)	1	—	89	(1)
Total	\$1,347	\$ (7)	\$ 3	\$ —	—\$1,350	\$ (7)

The unrealized losses for the above securities as of June 30, 2017 and December 31, 2016 were primarily attributable to changes in interest rates. At each reporting date, the Company performs an evaluation of impaired available-for-sale securities to determine if the unrealized losses are other-than-temporary. We do not consider any of the investments to be other-than-temporarily impaired as of June 30, 2017. The gross unrealized gains and losses in the above tables were recorded, net of tax, in "Accumulated other comprehensive income (loss)" in our consolidated statements of financial position.

The contractual maturities of our fixed income available-for-sale investment securities as of June 30, 2017 are set forth in the following table:

	Amortized Cost	
	Cost	Value
	(in millions)	
Due within one year	\$646	\$646
Due after one year up to two years	462	461
Due after two years up to three years	478	476
Due after three years	76	76
Asset-backed securities	294	294
Total available-for-sale investment securities	\$1,956	\$1,953

Asset-backed securities were excluded from the maturity categories because the actual maturities may differ from the contractual maturities since the underlying receivables may be prepaid without penalties. Further, actual maturities of

debt securities may differ from those presented above since certain obligations provide the issuer the right to call or prepay the obligation prior to scheduled maturity without penalty.

9

Table of Contents

Proceeds from sales of available-for-sale investment securities and the gross gains and losses that have been included in earnings as a result of those sales were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
	(in millions)			
Proceeds from sales of available-for-sale investment securities	\$397	\$1,816	\$1,645	\$2,378
Gross gains	\$—	\$4	\$1	\$4
Gross losses	—	—	(1)	—
Net realized gains (losses) on sales of available-for-sale investment securities	\$—	\$4	\$—	\$4

Held-to-Maturity Investment Securities

Our held-to-maturity investment securities consist of Indian rupee denominated investments primarily in commercial paper, international corporate bonds and government debt securities. Our investment guidelines are to purchase securities that are investment grade at the time of acquisition. We monitor the credit ratings of the securities in our portfolio on an ongoing basis. We classify these securities with maturities beyond 90 days but less than one year at the reporting date as short-term investments and beyond one year as long-term investments.

The amortized cost, gross unrealized gains and losses and fair value of held-to-maturity investment securities at June 30, 2017 were as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)			
Short-term investments:				
Corporate and other debt securities	\$186	\$—	—\$	—\$186
Commercial paper	357	—	—	357
Total short-term held-to-maturity investments	543	—	—	543
Long-term investments:				
Corporate and other debt securities	129	—	—	129
Total held-to-maturity investment securities	\$672	\$—	—\$	—\$672

The amortized cost, gross unrealized gains and losses and fair value of held-to-maturity investment securities at December 31, 2016 were as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(in millions)			
Short-term investments:				
Certificates of deposit and commercial paper	\$40	\$—	—\$	—\$40

There were no long-term held-to-maturity investment securities at December 31, 2016.

Table of Contents

The fair value and related unrealized losses of held-to-maturity investment securities in a continuous unrealized loss position for less than 12 months and for 12 months or longer were as follows as of June 30, 2017:

	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in millions)					
Corporate and other debt securities	\$154	\$ —	—\$	—\$	—\$154	\$ —
Commercial paper	63	—	—	—	63	—
Total	\$217	\$ —	—\$	—\$	—\$217	\$ —

As of December 31, 2016, held-to-maturity investment securities in an unrealized loss position were immaterial. At each reporting date, the Company performs an evaluation of held-to-maturity securities to determine if the unrealized losses are other-than-temporary. We do not consider any of the investments to be other-than-temporarily impaired as of June 30, 2017.

The contractual maturities of our fixed income held-to-maturity investment securities as of June 30, 2017 are set forth in the following table:

	Amortized Cost	Fair Value
	(in millions)	
Due within one year	\$543	\$543
Due after one year up to two years	123	123
Due after two years	6	6
Total held-to-maturity investment securities	\$672	\$672

As of June 30, 2016, there were no investment securities in our portfolio classified as held-to-maturity.

During the six months ended June 30, 2017 and the year ended December 31, 2016, there were no transfers of investments between our trading, available-for-sale and held-to-maturity investment portfolios.

Note 5 — Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities were as follows:

	June 30, 2017	December 31, 2016
	(in millions)	
Compensation and benefits	\$1,026	\$1,134
Income taxes	15	10
Professional fees	85	99
Travel and entertainment	38	36
Customer volume and other incentives	223	258
Derivative financial instruments	6	4
Other	262	315
Total accrued expenses and other current liabilities	\$1,655	\$1,856

Table of Contents

Note 6 — Debt

In 2014, we entered into a credit agreement with a commercial bank syndicate, or, as amended, the Credit Agreement, providing for a \$1,000 million unsecured term loan and a \$750 million unsecured revolving credit facility. The term loan and the revolving credit facility both mature in November 2019. All notes drawn to date under the revolving credit facility have been less than 90 days in duration. We are required under the Credit Agreement to make scheduled quarterly principal payments on the term loan. We were in compliance with all debt covenants and representations as of June 30, 2017.

Short-term Debt

The following summarizes our short-term debt balances as of:

	June 30, 2017	December 31, 2016
	(in millions)	
Notes outstanding under revolving credit facility	\$ 150	\$ —
Term loan - current maturities	94	81
Total short-term debt	\$244	\$ 81

Long-term Debt

The following summarizes our long-term debt balances as of:

	June 30, 2017	December 31, 2016
	(in millions)	
Term loan, due 2019	\$844	\$ 881
Less:		
Current maturities	(94)	(81)
Deferred financing costs	(3)	(3)
Long-term debt, net of current maturities	\$747	\$ 797

Note 7 — Income Taxes

Our Indian subsidiaries, collectively referred to as Cognizant India, are primarily export-oriented and are eligible for certain income tax holiday benefits granted by the government of India for export activities conducted within Special Economic Zones, or SEZs, for periods of up to 15 years. Our Indian profits ineligible for SEZ benefits are subject to corporate income tax at the rate of 34.6%. In addition, all Indian profits, including those generated within SEZs, are subject to the Minimum Alternative Tax, or MAT, at the rate of 21.3%. Any MAT paid is creditable against future Indian corporate income tax, subject to limitations.

Our effective income tax rates were as follows:

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
Effective income tax rate	26.0%	57.6%	20.0%	41.4%

In the first quarter of 2017, we recognized income tax benefits previously unrecognized in our consolidated financial statements related to several uncertain tax positions totaling \$72 million. The recognition of these benefits in the first quarter of 2017 was based on management's reassessment regarding whether certain unrecognized tax benefits met the more-likely-than-not threshold in light of the lapse in the statute of limitations as to a portion of such benefits. In May 2016, our principal operating subsidiary in India repurchased shares from its shareholders, which are non-Indian Cognizant entities, valued at \$2.8 billion ("India Cash Remittance"). This transaction was undertaken pursuant to a plan approved by the High Court of Madras and simplified the shareholding structure of our principal operating subsidiary in India. Pursuant to the transaction, our principal Indian operating subsidiary repurchased approximately \$1.2 billion of the total \$2.8 billion of shares from its U.S. shareholders, resulting in tax expense in the United States and India, while the remaining \$1.6 billion was repurchased from its shareholder outside the United States. Net of taxes, the transaction resulted in a remittance of

Table of Contents

cash to the United States in the amount of \$1.0 billion. As a result of this transaction, we incurred an incremental 2016 income tax expense of \$238 million, including a discrete item recognized in the second quarter of 2016 of \$143 million relating to the distribution of historic undistributed accumulated foreign earnings. Total incremental tax expense of \$190 million was recognized in the quarter ended June 30, 2016. This transaction is primarily responsible for the decrease in our effective income tax rate in 2017 compared to 2016.

The decrease in our effective income tax rate for the six months ended 2017 as compared to the same period in 2016 is primarily due to the India Tax Remittance and the recognition of previously unrecognized income tax benefits, as described above. For the 2017 periods, the principal reason for the difference between our effective income tax rates and the U.S. federal statutory rate is the effect of the Indian tax holiday, earnings taxed in countries that have lower rates than the United States, and, for the six months ended June 30, 2017, the recognition in the first quarter of 2017 of previously unrecognized income tax benefits. For the 2016 periods, the principal reason for the difference between our effective income tax rates and the U.S. federal statutory rate is the effect of the India Cash Remittance transaction, partially offset by the effect of the Indian tax holiday and earnings taxed in countries that have lower rates than the United States.

Note 8 — Derivative Financial Instruments

In the normal course of business, we use foreign exchange forward contracts to manage foreign currency exchange rate risk. The estimated fair value of the foreign exchange forward contracts considers the following items: discount rate, timing and amount of cash flow and counterparty credit risk. Derivatives may give rise to credit risks from the possible non-performance by counterparties. Credit risk is generally limited to the fair value of those contracts that are favorable to us. We have limited our credit risk by entering into derivative transactions only with highly-rated financial institutions, limiting the amount of credit exposure with any one financial institution and conducting an ongoing evaluation of the creditworthiness of the financial institutions with which we do business. In addition, all the assets and liabilities related to our foreign exchange forward contracts set forth in the below table are subject to International Swaps and Derivatives Association, or ISDA, master netting arrangements or other similar agreements with each individual counterparty. These master netting arrangements generally provide for net settlement of all outstanding contracts with the counterparty in the case of an event of default or a termination event. We have presented all the assets and liabilities related to our foreign exchange forward contracts on a gross basis, with no offsets, in our accompanying unaudited consolidated statements of financial position. There is no financial collateral (including cash collateral) posted or received by us related to our foreign exchange forward contracts.

The following table provides information on the location and fair values of derivative financial instruments included in our unaudited consolidated statements of financial position as of:

Designation of Derivatives	Location on Statement of Financial Position	June 30, 2017		December 31, 2016	
		Assets	Liabilities	Assets	Liabilities
(in millions)					
Foreign exchange forward contracts – Designated as cash flow hedging instruments	Other current assets	\$ 112	\$ —	\$ 34	\$ —
	Other noncurrent assets	43	—	17	—
	Total	155	—	51	—
Foreign exchange forward contracts – Not designated as hedging instruments	Accrued expenses and other current liabilities	—	6	—	4
	Total	—	6	—	4
Total		\$ 155	\$ 6	\$ 51	\$ 4

Total \$ 35 \$ 3

Table of Contents

The following table provides information on the location and amounts of pre-tax gains (losses) on our cash flow hedges for the six months ended June 30:

	Change in Derivative Gains/Losses Recognized in Accumulated Other Comprehensive (effective portion) 2017 2016 (in millions)		Location of Net Derivative Gains Reclassified from Accumulated Other Comprehensive Income (Loss) into Income (effective portion) (in millions)	Net Gains Reclassified from Accumulated Other Comprehensive Income (Loss) into Income (effective portion)	
	2017	2016		2017	2016
Foreign exchange forward contracts – Designated as cash flow hedging instruments	\$ 159	\$ 15	Cost of revenues	\$ 46	\$ 1
			Selling, general and administrative expenses	9	—
			Total	\$ 55	\$ 1

The activity related to the change in net unrealized gains (losses) on our cash flow hedges included in accumulated other comprehensive income (loss) is presented in Note 10.

Other Derivatives

We use foreign exchange forward contracts, which have not been designated as hedges, to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies, primarily the Indian rupee and the Euro, other than the functional currency of our foreign subsidiaries. These foreign exchange forward contracts are scheduled to mature in 2017 and 2018. Realized gains or losses and changes in the estimated fair value of these derivative financial instruments are recorded in the caption "Foreign currency exchange gains (losses), net" in our consolidated statements of operations.

Additional information related to our outstanding foreign exchange forward contracts not designated as hedging instruments is as follows:

	June 30, 2017	December 31, 2016
	Fair Notional Value (in millions)	Fair Notional Value (in millions)
Contracts outstanding	\$269 \$ (6)	\$213 \$ (4)

The following table provides information on the location and amounts of realized and unrealized pre-tax gains and losses on our other derivative financial instruments for the three and six months ended June 30:

Location of Net Gains (Losses) on Derivative Instruments	Amount of Net Gains (Losses) on Derivative Instruments	
	Three Months Ended	Six Months Ended June 30,

	June 30,			
	2017	2016	2017	2016
	(in millions)			
Foreign exchange forward contracts – Not designated as hedging instruments			Foreign currency exchange gains (losses), net	
	\$ (3)	\$ 3	\$ (13)	\$ —

The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

Table of Contents

Note 9 — Fair Value Measurements

We measure our cash equivalents, investments and foreign exchange forward contracts at fair value. The authoritative guidance defines fair value as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The authoritative guidance also establishes a fair value hierarchy that is intended to increase consistency and comparability in fair value measurements and related disclosures. The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon their own market assumptions.

The fair value hierarchy consists of the following three levels:

• Level 1 – Inputs are quoted prices in active markets for identical assets or liabilities.

• Level 2 – Inputs are quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and market-corroborated inputs which are derived principally from or corroborated by observable market data.

• Level 3 – Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

The following table summarizes our financial assets and (liabilities) measured at fair value on a recurring basis as of June 30, 2017:

	Level 1	Level 2	Level 3	Total
	(in millions)			
Cash equivalents:				
Money market funds	\$217	\$—	\$	—\$217
Total cash equivalents	217	—	—	217
Short-term investments:

Total short-term investments ⁽¹⁾	558	2,552	—	3,110
Derivative financial instruments - foreign exchange forward contracts:				
Other current assets	—	34	—	34
Accrued expenses and other current liabilities	—	(4)	— (4)
Other noncurrent assets	—	17	—	17
Total	\$1,182	\$2,730	\$	—\$3,912

⁽¹⁾ Excludes trading securities in mutual funds valued at \$25 million based on the net asset value, of the fund at December 31, 2016.

We measure the fair value of money market funds and U.S. Treasury securities based on quoted prices in active markets for identical assets and therefore classify these assets as Level 1. The fair value of commercial paper, certificates of deposit, U.S. government agency securities, municipal debt securities, debt securities issued by supranational institutions, U.S. and international corporate bonds and foreign government debt securities is measured based on relevant trade data, dealer quotes, or model-driven valuations using significant inputs derived from or corroborated by observable market data, such as yield curves and credit spreads. We measure the fair value of our asset-backed securities using model-driven valuations based on significant inputs derived from or corroborated by observable market data such as dealer quotes, available trade information, spread data, current market assumptions on prepayment speeds and defaults and historical data on deal collateral performance. The carrying value of the time deposits approximated fair value as of June 30, 2017 and December 31, 2016.

We estimate the fair value of each foreign exchange forward contract by using a present value of expected cash flows model. This model calculates the difference between the current market forward price and the contracted forward price for each foreign exchange contract and applies the difference in the rates to each outstanding contract. The market forward rates include a discount and credit risk factor. The amounts are aggregated by type of contract and maturity.

During the six months ended June 30, 2017 and the year ended December 31, 2016, there were no transfers among Level 1, Level 2, or Level 3 financial assets and liabilities.

Table of Contents

Note 10 — Stockholder's Equity

Stock Repurchase Program

Under the Board of Directors' authorized stock repurchase program, the Company is authorized to repurchase its Class A common stock through open market purchases, including under a trading plan adopted pursuant to Rule 10b5-1 of the Exchange Act, or in private transactions, in accordance with applicable federal securities laws. The timing of repurchases and the exact number of shares to be purchased are determined by the Company's management, in its discretion, or pursuant to a Rule 10b5-1 trading plan, and will depend upon market conditions and other factors. In March 2017, we entered into accelerated share repurchase agreements, referred to collectively as the ASR, with certain financial institutions under our stock repurchase program. Under the terms of the ASR and in exchange for up-front payments of \$1,500 million, the financial institutions have delivered 21.5 million shares, a portion of the Company's total expected shares to be repurchased under the ASR. The total number of shares ultimately delivered is determined at the end of the applicable purchase periods under the ASR based on the volume-weighted average price of the Company's common stock during such periods. The ASR purchase periods are scheduled to end during the third quarter of 2017.

Under the ASR, the shares received are constructively retired and returned to the status of authorized and unissued shares in the periods they are delivered, and the up-front payments are accounted for as a reduction to stockholders' equity in our consolidated statement of financial position in the period the payments are made. The \$1,500 million up-front payments were accounted for as a \$400 million reduction in common stock and additional paid-in capital and a \$1,100 million reduction in retained earnings in our consolidated statements of financial position in March 2017. We reflected the ASR as a repurchase of common stock in the period delivered for purposes of calculating earnings per share and as forward contracts indexed to our common stock. The forward contracts met all of the applicable criteria for equity classification, and therefore were not accounted for as derivative instruments.

As of June 30, 2017, the remaining available balance under our stock repurchase program was \$2,000 million.

Stock repurchases were made in connection with our stock-based compensation plans, whereby Company shares were tendered by employees for payment of applicable statutory tax withholdings. We also repurchased a limited number of shares from employees at the repurchase date market price. Combined, for the six months ended June 30, 2017, such repurchases totaled 0.7 million shares at an aggregate cost of \$44 million.

Dividends

During the second quarter of 2017, we declared and paid cash dividends of \$0.15 per share, totaling \$89 million.

On August 3, 2017, our Board of Directors approved the Company's declaration of a \$0.15 per share dividend with a record date of August 22, 2017 and a payment date of August 31, 2017.

Note 11 — Commitments and Contingencies

We are involved in various claims and legal actions arising in the ordinary course of business. We accrue a liability when a loss is considered probable and the amount can be reasonably estimated. When a material loss contingency is reasonably possible but not probable, we do not record a liability, but instead disclose the nature and the amount of the claim, and an estimate of the loss or range of loss, if such an estimate can be made. Legal fees are expensed as incurred. In the opinion of management, the outcome of any existing claims and legal or regulatory proceedings, other than the specific matters described below, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the FCPA and other applicable laws. In September 2016, we voluntarily notified the DOJ and SEC and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel.

To date, the investigation has identified a total of approximately \$6 million in payments made between 2010 and 2015 that may have been improper. During the year ended December 31, 2016, we recorded out-of-period corrections related to \$4 million of such payments that were previously capitalized that should have been expensed. These out-of-period corrections and the other \$2 million in potentially improper payments were not material to any previously issued financial statements. The investigation is also examining various other

Table of Contents

payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. There were no adjustments recorded during the six months ended June 30, 2017.

On October 5, 2016, October 27, 2016, and November 18, 2016, three putative securities class action complaints were filed in the United States District Court for the District of New Jersey, naming us and certain of our current and former officers as defendants. In an order dated February 3, 2017, the United States District Court for the District of New Jersey consolidated the three putative securities class actions into a single action and appointed lead plaintiffs and lead counsel. On April 7, 2017, the lead plaintiffs filed a consolidated amended complaint on behalf of a putative class of stockholders who purchased our common stock during the period between February 27, 2015 and September 29, 2016, naming us and certain of our current and former officers as defendants and alleging violations of the Exchange Act, based on allegedly false or misleading statements related to potential violations of the FCPA, our business, prospects and operations, and the effectiveness of our internal controls over financial reporting and our disclosure controls and procedures. The lead plaintiffs seek an award of compensatory damages, among other relief, and their reasonable costs and expenses, including attorneys' fees. Under a stipulation filed by the parties on February 23, 2017, defendants filed motions to dismiss the consolidated amended complaint on June 6, 2017, plaintiffs filed an opposition brief on July 21, 2017 responding to defendants' motions to dismiss, and defendants have until September 5, 2017 to file reply briefs in further support of their motions to dismiss.

On October 31, 2016, November 15, 2016, and November 18, 2016, three putative shareholder derivative complaints were filed in New Jersey Superior Court, Bergen County, naming us, all of our then current directors and certain of our current and former officers as defendants. On January 24, 2017, the New Jersey Superior Court, Bergen County, consolidated the three putative shareholder derivative actions filed in that court into a single action and appointed lead plaintiff and lead counsel. The complaints assert claims for breach of fiduciary duty, corporate waste, unjust enrichment, abuse of control, mismanagement, and/or insider selling by defendants. On March 16, 2017, the parties filed a stipulation deferring all further proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 26, 2017, in lieu of ordering the stipulation filed by the parties, the New Jersey Superior Court deferred further proceedings by dismissing the consolidated putative shareholder derivative litigation without prejudice but permitting the parties to file a motion to vacate the dismissal in the future. On February 22, 2017, a fourth putative shareholder derivative complaint asserting similar claims was filed in the United States District Court for the District of New Jersey, naming us and certain of our directors as defendants. On April 5, 2017, the United States District Court for the District of New Jersey entered an order staying all proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 7, 2017, a fifth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 10(b) of the Exchange Act against the individual defendants. On May 10, 2017, a sixth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 14(a) of the Exchange Act against the individual defendants. In an order dated June 20, 2017, the United States District Court for the District of New Jersey consolidated the three putative shareholder derivative actions filed in that court into a single action, appointed lead plaintiff and lead counsel, and stayed all further proceedings pending a final, non-appealable ruling on the motion to dismiss the consolidated putative securities class action. All of the putative shareholder derivative complaints allege among other things that certain of our public disclosures were false and misleading by failing to disclose that payments allegedly in violation of the FCPA had been made and by asserting that management had determined that our internal controls were effective. The plaintiffs seek awards of compensatory damages and restitution to us as a result of the alleged violations and their costs and attorneys' fees, experts' fees, and other litigation expenses, among other relief.

We are presently unable to predict the duration, scope or result of the internal investigation, the related consolidated putative securities class action, the putative shareholder derivative actions or any other related lawsuit, and any investigations by the DOJ or the SEC, including whether either agency will commence any legal action. As such, we are presently unable to develop a reasonable estimate of a possible loss or range of losses, if any, and thus have not recorded an accrual related to these matters. The DOJ and the SEC have a broad range of civil and criminal sanctions under the FCPA and other laws and regulations including injunctive relief, disgorgement, fines, penalties, modifications to business practices including the termination or modification of existing business relationships and the imposition of compliance programs and the retention of a monitor to oversee compliance with the FCPA. In addition, the DOJ and the SEC could bring enforcement actions against the Company or individuals, including former members of senior management. Such actions, if brought, could result in dispositions, judgments, settlements, fines, injunctions, cease and desist orders, debarment or other civil or criminal penalties against the Company or such individuals.

Table of Contents

We expect to incur additional expenses related to remedial measures, and may incur additional expenses related to fines. The imposition of any sanctions or the implementation of remedial measures could have a material adverse effect on our business, annual and interim results of operations, cash flows and financial condition. Furthermore, while the Company intends to defend the lawsuits vigorously, these lawsuits and any other related lawsuits are subject to inherent uncertainties, the actual cost of such litigation will depend upon many unknown factors and the outcome of the litigation is necessarily uncertain.

Many of our engagements involve projects that are critical to the operations of our customers' business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our customers, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

In the normal course of business and in conjunction with certain customer engagements, we have entered into contractual arrangements through which we may be obligated to indemnify customers or other parties with whom we conduct business with respect to certain matters. These arrangements can include provisions whereby we agree to hold the indemnified party and certain of their affiliated entities harmless with respect to third-party claims related to such matters as our breach of certain representations or covenants, our intellectual property infringement, our gross negligence or willful misconduct or certain other claims made against certain parties. Payments by us under any of these arrangements are generally conditioned on the customer making a claim and providing us with full control over the defense and settlement of such claim. It is not possible to determine the maximum potential liability under these indemnification agreements due to the unique facts and circumstances involved in each particular agreement. Historically, we have not made payments under these indemnification agreements and therefore they have not had any impact on our operating results, financial position, or cash flows. However, if events arise requiring us to make payment for indemnification claims under our indemnification obligations in contracts we have entered, such payments could have material impact on our business, results of operations, financial condition and cash flows.

The Company has indemnification and expense advancement obligations pursuant to its Bylaws and indemnification agreements with respect to certain current and former members of senior management and the Company's directors. In connection with the ongoing internal investigation, the Company has received requests under such indemnification agreements and its Bylaws to provide advances of funds for legal fees and other expenses, and expects additional requests in connection with the investigation and related litigation. The Company has not recorded any liability for these matters as of June 30, 2017 as it cannot estimate the ultimate outcome at this time but has expensed advances made through June 30, 2017. The Company has maintained directors and officers insurance, from which a portion of these expenses may be recoverable, though we have not recorded an insurance receivable as of June 30, 2017.

Note 12— Related Party Transactions

Brackett B. Denniston, III, was Interim General Counsel and an executive officer of the Company from December 2016 until May 15, 2017. Mr. Denniston is, and was during such period, also a Senior Counsel at the law firm of Goodwin Procter LLP, or Goodwin. During the three and six months ended June 30, 2017, Goodwin performed legal services for the Company for which it earned approximately \$1 million and \$3 million, respectively. Goodwin has

continued to perform such legal services since June 30, 2017 through the date of this filing. Goodwin did not perform any services for the Company during the three and six months ended June 30, 2016. The provision of legal services by Goodwin was reviewed and approved by our Audit Committee.

Table of Contents

Note 13 — Segment Information

Our reportable segments are:

• Financial Services, which consists of our banking and insurance operating segments;

• Healthcare, which consists of our healthcare and life sciences operating segments;

• Products and Resources (previously referred to as Manufacturing/Retail/Logistics), which consists of our retail and consumer goods, manufacturing and logistics, travel and hospitality, and energy and utilities operating segments; and

• Communications, Media and Technology (previously referred to as Other), which includes our communications and media operating segment and our technology operating segment.

Our sales managers, account executives, account managers and project teams are aligned in accordance with the specific industries they serve. Our chief operating decision maker evaluates the Company's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each operating segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating groups may affect revenues and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the global delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, a portion of depreciation and amortization, costs related to our realignment program and the impact of the settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit and are separately disclosed as "unallocated costs" and adjusted only against our total income from operations. Additionally, management has determined that it is not practical to allocate identifiable assets by segment, since such assets are used interchangeably among the segments.

Revenues from external customers and segment operating profit, before unallocated expenses, by reportable segment were as follows:

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
	2017	2016	2017	2016

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

We are one of the world's leading professional services companies, transforming customers' business, operating and technology models for the digital era. Our unique industry-based, consultative approach helps customers envision, build and run more innovative and efficient businesses. Our core competencies include: business, process, operations and technology consulting, application development and systems integration, enterprise information management, application testing, application maintenance, information technology, or IT, infrastructure services, and business process services. We tailor our services to specific industries and utilize an integrated global delivery model with customer service teams typically based on-site at customer locations and delivery teams located at dedicated global delivery centers.

Our objective is to create value for both our customers and stockholders by enhancing our position as a leading professional services company in the digital era. Digital services is work we do to help our customers win in the digital economy by applying technology and analytics to change consumer experiences to drive sustainable growth, deploying systems of intelligence to automate and improve core business processes, and improving technology systems by deploying cloud and cyber security solutions and as-a-service models to make them simpler, more modern and secure. To accelerate our shift to digital services and solutions, we are deploying the following strategies: Aligning our digital services into three digital practice areas - Digital Business, Digital Operations and Digital Systems and Technology - to address the needs of our customers as they transform their business and technology models.

Investing to scale these digital practice areas across our business segments and geographies, including through extensive training and re-skilling of our existing technical teams and expansion of our local workforces in the United States and other local markets around the world where we operate and pursuing select strategic acquisitions, joint ventures, investments and alliances that can expand our intellectual property, industry expertise, geographic reach, and platform and technology capabilities.

Continuing development of our core business, which includes application services, IT infrastructure and business process services. Our customers often look for efficiencies in the running of their core operations to help them fund investments in new digital capabilities. We work with them to analyze and identify opportunities for advanced automation and delivery efficiencies. Additionally, we seek to expand the geographic reach of our core portfolio of services.

Selectively targeting higher margin work within our core business and unifying our delivery capabilities to allow for more cost-conscious delivery, leveraging automation and scale, improving our utilization and optimizing our pyramid. In 2017, we began a realignment of our business by executing on the above strategies and improving the overall efficiency of our operations, with the goal of achieving 22% non-GAAP operating margin¹ in 2019 while continuing to drive revenue growth. As part of this realignment, for the three and six months ended June 30, 2017, we incurred \$39 million and \$50 million, respectively, in pre-tax realignment charges, reported in "Selling, general and administrative expenses" in our consolidated statements of operations, which are comprised of severance costs, primarily related to a voluntary separation program, or VSP, announced in May 2017, advisory fees related to non-routine shareholder matters and to the development of our realignment and return of capital programs and lease termination costs. The VSP was offered to ensure that our workforce is appropriately aligned to deliver sustained, high-quality growth. We expect the decrease in our workforce resulting from the VSP to reduce our compensation expense, including incentive-based compensation, by approximately \$60 million on an annualized basis. We continue to recruit and hire across all of our practices and are expanding facilities globally, ensuring that we have the right expertise to help our customers.

The costs related to the realignment are excluded from non-GAAP operating margin¹ and non-GAAP diluted earnings per share¹. The total costs related to the realignment, which will consist primarily of severance costs under the VSP, advisory fees and lease termination costs, are expected to be incurred primarily in 2017 and will continue to be excluded from non-GAAP operating margin¹ and non-GAAP diluted earnings per share¹.

Non-GAAP income from operations and Non-GAAP diluted earnings per share are not measurements of financial performance prepared in accordance with GAAP. See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

25

Table of Contents

We have a capital return plan that includes a combination of stock repurchases and cash dividends. As part of this plan, we entered into accelerated stock repurchase agreements, referred to collectively as the ASR, of \$1.5 billion in March 2017 and paid a cash dividend of \$0.15 per share in May 2017. Additionally, we have declared another cash dividend of \$0.15 per share with a record date of August 22, 2017 and a payment date of August 31, 2017.

There can be no assurances that we will be successful in achieving the objectives of these plans or that other factors beyond our control, including the various risks set forth in "Part I, Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016, will not cause us to fail to achieve the targeted improvements.

The following table sets forth summarized operating results for the three months ended June 30, 2017 and 2016:

	2017		2016		Increase	
					\$	%
	(Dollars in millions, except per share data)					
Revenues	\$3,670		\$3,370		\$300	8.9
Income from operations and operating margin	606	16.5%	591	17.5%	15	2.5
Net income	470		252		218	86.5
Diluted earnings per share	0.80		0.41		0.39	
Other Financial Information ²						
Non-GAAP income from operations and Non-GAAP operating margin	735	20.0%	683	20.3%	52	7.6
Non-GAAP diluted earnings per share	0.93		0.87		0.06	

The key drivers of our revenue growth during the three months ended June 30, 2017 as compared to June 30, 2016 were as follows:

Solid performance in our Communications, Media and Technology (previously referred to as Other), Products and Resources (previously referred to as Manufacturing/Retail/Logistics) and Healthcare business segments with revenue growth of 16.8%, 13.2% and 9.5%, respectively;

Revenues in our Financial Services business segment grew 4.1% as our banking customers continue to focus on optimizing their cost structure and managing their discretionary spending;

Sustained strength in the North American market where revenues grew 8.7%;

Continued penetration of the European and Rest of World (primarily the Asia Pacific) markets:

In Europe, we experienced revenue growth of 5.7%, after a negative currency impact of 6.1%. Our revenues from customers in the United Kingdom declined 7.4%, after a negative currency impact of 8.7%. Revenues from our Rest of Europe customers, which included revenues from new strategic customers acquired in the fourth quarter of 2016, increased 22.8%, after a negative currency impact of 2.7%;

Revenues from our Rest of World customers increased 21.2%, after an immaterial currency impact;

Increased customer spending on discretionary projects;

Expansion of our service offerings, including consulting and digital services, next-generation IT solutions and platform-based solutions;

Continued expansion of the market for global delivery of technology and business process services; and

Increased penetration at existing customers, including strategic customers.

² Non-GAAP income from operations and Non-GAAP diluted earnings per share are not measurements of financial performance prepared in accordance with GAAP. See "Non-GAAP Financial Measures" for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Our customers seek to meet a dual mandate of achieving more efficient and effective operations, while investing in digital technologies that are reshaping their business models. Increasingly, the relative emphasis among our customers is shifting towards investment and innovation, as reflected in accelerated demand for our digital services. We continue to see demand for larger, more complex projects that are transformational for our customers, including managed services contracts. Such contracts may have longer sales cycles and ramp-up periods and could lead to greater period-to-period variability in our operating results. We increased the number of strategic customers by 7 during the quarter, bringing the total number of our strategic customers to 343. We define a strategic customer as one offering the potential to generate at least \$5 million to \$50 million or more in annual revenues at maturity.

Our operating margin decreased to 16.5% for the quarter ended June 30, 2017 from 17.5% for the quarter ended June 30, 2016, while our non-GAAP operating margin for the same period decreased to 20.0%³ from 20.3%³. The decreases in both our GAAP and non-GAAP operating margins were due to an increase in compensation and benefits costs, the negative impact of the appreciation of the Indian rupee against the U.S. dollar and increases in certain operating and professional costs, partially offset by greater realized gains on settlements of cash flow hedges. Our GAAP operating margin was further negatively affected by the realignment charges incurred in 2017. Additionally, the GAAP and non-GAAP operating margins for the three months ended June 30, 2016 reflected the loss recognized on a fixed-price customer contract of \$27 million.

As previously disclosed, the Company is conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the U.S. Foreign Corrupt Practices Act, or FCPA, and other applicable laws. In September 2016, we voluntarily notified the Department of Justice, or DOJ, and the Securities and Exchange Commission, or SEC, and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel. To date, the investigation has identified a total of approximately \$6 million in payments made between 2010 and 2015 that may have been improper. In the second half of 2016, we recorded an out-of-period correction related to \$4 million of such payments that had been previously capitalized that should have been expensed. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. There were no adjustments recorded during the six months ended June 30, 2017 related to the amounts under investigation.

In 2016, there were putative securities class action complaints filed, naming us and certain of our current and former officers as defendants and alleging violations of the Securities Exchange Act of 1934, as amended, or the Exchange Act, based on allegedly false or misleading statements related to potential violations of the FCPA, our business, prospects and operations, and the effectiveness of our internal control over financial reporting and our disclosure controls and procedures. Additionally, in 2016 and 2017, putative shareholder derivative complaints were filed, naming us, certain of our directors and certain of our current and former officers as defendants. See the section titled "Part II, Item 1. Legal Proceedings."

During the quarter ended June 30, 2017, we incurred \$8 million in costs related to the FCPA investigation and related lawsuits. We expect to continue to incur expenses related to these matters for the remainder of 2017 and future periods, including with respect to remediating the material weakness in our internal control over financial reporting.

We finished the second quarter of 2017 with approximately 256,800 employees, which is an increase of approximately 12,500 as compared to June 30, 2016. The increase in the number of our service delivery staff and the related infrastructure costs to meet the demand for our services are the primary drivers of the increase in our operating expenses in 2017. Annualized turnover, including both voluntary and involuntary, was approximately 23.6% for the three months ended June 30, 2017. The annualized turnover rate was impacted by the reduction in headcount as a result of performance evaluations and the VSP. The majority of our turnover occurs in India. As a result, annualized attrition rates on-site at customers are below our global attrition rate. In addition, attrition is weighted towards the more junior members of our staff.

During the remainder of 2017, barring any unforeseen events, we expect the following factors to affect our business and our operating results:

• Demand from our customers for digital services;

• Our customers' dual mandate of simultaneously achieving cost savings while investing in transformation and innovation;

• Continued focus by customers on directing technology spending towards cost containment projects, such as application maintenance, infrastructure services and business process services;

Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP. See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Secular changes driven by evolving digital technologies and regulatory changes, including potential regulatory changes with respect to immigration and taxes;

Demand from our healthcare customers could be affected by the uncertainty in the regulatory environment;

Demand from our banking customers may continue to be negatively affected by their continued focus on optimizing their cost structure and managing their discretionary spending;

Discretionary spending by our retail customers may continue to be negatively affected by weakness in the retail sector;

Legal fees and other expenses related to the internal investigation and related matters as described above;

Volatility in foreign currency rates; and

Continued uncertainty in the U.S. and world economies, including as a result of recent changes in the government administrations in the United States and elsewhere.

In response to this environment, we plan to:

Continue to invest in our digital practice areas of focus across industries and geographies;

Continue to invest in our talent base, including through local hiring and re-skilling, and new service offerings, including digital technologies and new delivery models;

Partner with our existing customers to garner an increased portion of our customers' overall technology spend by providing innovative solutions;

Focus on growing our business in Europe, the Middle East, the Asia Pacific region and Latin America, where we believe there are opportunities to gain market share;

Increase our strategic customer base across all of our business segments;

Pursue strategic acquisition opportunities that we believe add new technologies, including digital technologies, or platforms that complement our existing services, improve our overall service delivery capabilities, and/or expand our geographic presence;

Focus on operating discipline in order to appropriately manage our cost structure; and

Locate most of our new development center facilities in tax incentivized areas.

Business Segments

Our reportable segments are:

Financial Services, which consists of our banking and insurance operating segments;

Healthcare, which consists of our healthcare and life sciences operating segments;

Products and Resources (previously referred to as Manufacturing/Retail/Logistics), which consists of our retail and consumer goods, manufacturing and logistics, travel and hospitality, and energy and utilities operating segments; and

Communications, Media and Technology (previously referred to as Other), which includes our communications and media operating segment and our technology operating segment.

Our chief operating decision maker evaluates Cognizant's performance and allocates resources based on segment revenues and operating profit. Segment operating profit is defined as income from operations before unallocated costs. Generally, operating expenses for each business segment have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on industries served by our operating groups may affect revenues and operating expenses to differing degrees. Expenses included in segment operating profit consist principally of direct selling and delivery costs as well as a per seat charge for use of the global delivery centers. Certain selling, general and administrative expenses, excess or shortfall of incentive compensation for delivery personnel as compared to target, stock-based compensation expense, costs related to our realignment program, a portion of depreciation and amortization and the impact of the settlements of our cash flow hedges are not allocated to individual segments in internal management reports used by the chief operating decision maker. Accordingly, such expenses are excluded from segment operating profit.

We provide a significant volume of services to many customers in each of our business segments. Therefore, a loss of a significant customer or a few significant customers in a particular segment could materially reduce revenues for that segment. However, no individual customer accounted for sales in excess of 10% of our consolidated revenues for the

periods ended June 30, 2017 and 2016. In addition, the services we provide to our larger customers are often critical to the operations of such customers. As such, we believe that a termination of our services would in many instances require an extended transition period with gradually declining revenues.

Non-GAAP income from operations and non-GAAP operating margin	\$735	20.0	\$683	20.3	\$52	7.6
Non-GAAP diluted earnings per share	\$0.93		\$0.87		\$0.06	

(1) Exclusive of depreciation and amortization expense.

Non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share are

(2) not measurements of financial performance prepared in accordance with GAAP. See "Non-GAAP Financial

Measures" for more information and a reconciliation to the most directly comparable GAAP financial measure.

Revenues - Overall. The increase in revenues was primarily attributed to services related to integration of digital technologies that are reshaping our customers' business, operating and technology models, increased customer spending on discretionary projects, continued interest in using our global delivery model as a means to reduce overall technology and operations costs and continued penetration in all our geographic markets. Revenues from customers added since June 30, 2016 were \$132 million and represented 44.0% of the period-over-period revenue increase. Foreign currency exchange movements negatively impacted year-over-year revenue growth by \$35 million, or 1.0%, primarily due to the weakening of the British pound.

Our consulting and technology services revenues for the three months ended June 30, 2017 increased by 11.4% compared to the three months ended June 30, 2016 and represented 58.7% of total revenues for the three months ended June 30, 2017. Our outsourcing services revenues for the three months ended June 30, 2017 increased by 5.6% and constituted 41.3% of total revenues for the three months ended June 30, 2017.

Revenues from our top customers were as follows:

	Three Months Ended June 30,	
	2017	2016
Revenues from top five customers as a percentage of total revenues	9.0 %	10.5 %
Revenues from top ten customers as a percentage of total revenues	15.1 %	17.5 %

As we continue to add new customers and increase our penetration at existing customers, we expect the percentage of revenues from our top five and top ten customers to continue to decline over time.

Table of Contents

Revenues - Reportable Segments. Revenues by reportable business segment were as follows for the three months ended June 30:

	2017	2016	Increase	
			\$	%
	(Dollars in millions)			
Financial Services	\$1,406	\$1,351	\$55	4.1
Healthcare	1,050	959	91	9.5
Products and Resources	747	660	87	13.2
Communications, Media and Technology	467	400	67	16.8
Total revenues	\$3,670	\$3,370	\$300	8.9

Revenues from our Financial Services segment grew 4.1% for the three months ended June 30, 2017, as compared to the three months ended June 30, 2016. Growth was stronger among our insurance customers where revenues increased by \$40 million as compared to an increase of \$15 million for our banking customers. In this segment, revenues from customers added since June 30, 2016 were \$23 million and represented 41.8% of the period-over-period revenue increase in this segment. Key areas of focus for our Financial Services customers included the adoption and integration of digital technologies that are reshaping our customers' business and operating models, cost optimization, robotic process automation, cyber security and vendor consolidation. Demand from our banking customers may continue to be negatively affected by their continued focus on optimizing their cost structure and managing their discretionary spending.

Revenues from our Healthcare segment grew 9.5% for the three months ended June 30, 2017, as compared to the three months ended June 30, 2016. Revenues from our healthcare customers increased by \$58 million while revenue growth among our life sciences customers was \$33 million. Revenues from customers added since June 30, 2016 were \$22 million and represented 24.2% of the period-over-period revenue increase in this segment. The increase in revenues from our life sciences customers was driven by a growing demand for a broader range of services, including business process services, advanced data analytics and solutions that span multiple service lines while leveraging cloud technologies and platforms. The demand for our services among healthcare customers could be affected by uncertainty in the regulatory environment. We believe that in the long term the healthcare industry continues to present a significant growth opportunity due to factors that are transforming the industry, including the changing regulatory environment, increasing focus on medical costs, and the consumerization of healthcare.

Revenues from our Products and Resources segment (previously referred to as Manufacturing/Retail/Logistics) grew 13.2% for the three months ended June 30, 2017, as compared to the three months ended June 30, 2016. Revenue growth in this segment was strongest among our energy and utilities customers and manufacturing and logistics customers, where revenues increased by a combined \$79 million, including revenues from new strategic customers acquired in the second half of 2016. Revenues from our retail and consumer goods customers and travel and hospitality customers increased by a combined \$8 million. Revenues from customers added since June 30, 2016 were \$68 million, representing 78.2% of the period-over-period revenue increase in this segment. Demand within this segment continues to be driven by increased adoption of digital technologies that are reshaping our customers' business and operating models, as well as growing demand for analytics, supply chain consulting, implementation initiatives, product transformation, internet of things and omni channel commerce implementation and integration services. Discretionary spending by our retail customers has been and may continue to be affected by weakness in the retail sector.

Revenues from our Communications, Media and Technology segment (previously referred to as Other) grew 16.8% for the three months ended June 30, 2017, as compared to the three months ended June 30, 2016. In the second quarter of 2017, growth within this segment was driven by the increased adoption of digital technologies, digital content operations and an expanded range of services, such as business process services. Revenue growth was \$43 million

among our communications and media customers and \$24 million among our technology customers. Revenues from customers added since June 30, 2016 were \$19 million and represented 28.4% of the period-over-period revenue increase in this segment.

Table of Contents

Revenues - Geographic Markets. Revenues by geographic market were as follows for the three months ended June 30:

	2017	2016	Increase (Decrease)	
			\$	%
	(Dollars in millions)			
North America	\$2,851	\$2,624	\$227	8.7
United Kingdom	288	311	(23)	(7.4)
Rest of Europe	291	237	54	22.8
Europe - Total	579	548	31	5.7
Rest of World	240	198	42	21.2
Total revenues	\$3,670	\$3,370	\$300	8.9

North America continues to be our largest market, representing 77.7% of total revenues for the second quarter of 2017, and accounting for \$227 million of the \$300 million total revenue increase from the second quarter of 2016. Revenue growth in Europe and Rest of World markets was driven by an increase in demand for an expanded range of services, such as business process services, customer adoption and integration of digital technologies that are reshaping our customers' business and operating models. Revenues from our customers in Europe grew 5.7%, after a negative currency impact of 6.1%. Specifically, within the United Kingdom we experienced a decrease in revenues of 7.4%, after a negative currency impact of 8.7% while revenues from our Rest of Europe customers, including revenues from new strategic customers acquired in the fourth quarter of 2016, increased 22.8% after a negative currency impact of 2.7%. Revenue growth from our United Kingdom customers has been negatively affected by the current macroeconomic conditions, including the weakening of the British pound and uncertainty in the markets due to the result of the June 2016 United Kingdom referendum to exit the European Union, or Brexit Referendum. Revenues from our Rest of World customers grew 21.2%, after an immaterial currency impact in the second quarter of 2017, primarily driven by the Australia and India markets. We believe that Europe, the Middle East, the Asia Pacific and Latin America regions will continue to be areas of significant investment for us as we see these regions as long term growth opportunities.

Cost of Revenues (Exclusive of Depreciation and Amortization Expense). Our cost of revenues consists primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration and project-related travel for technical personnel and subcontracting expense. Our cost of revenues increased by 10.9% during the second quarter of 2017 as compared to the second quarter of 2016. The increase was due primarily to higher compensation and benefits costs and the negative impact of the appreciation of the Indian rupee against the U.S. dollar, partially offset by greater realized gains on settlements of cash flow hedges. Additionally, cost of revenues for the three months ended June 30, 2016 reflected the loss recognized on a fixed-price customer contract. For the three months ended June 30, 2017, compensation and benefit costs, including incentive-based compensation, increased primarily as a result of the increase in the number of our service delivery personnel.

Selling, General and Administrative Expenses. Selling, general and administrative expenses consist primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration, travel, marketing, communications, management, finance, administrative and occupancy costs. Selling, general and administrative expenses, including depreciation and amortization, increased by 8.4% during the second quarter of 2017 as compared to the second quarter of 2016, decreasing as a percentage of revenues to 21.9% in the second quarter of 2017 as compared to 22.0% in the second quarter of 2016. The decrease as a percentage of revenues was due primarily to a decrease in certain operating and professional service costs, partially offset by higher compensation and benefits costs, realignment charges incurred in the second quarter of 2017 and the negative impact of the appreciation of the Indian rupee against the U.S. dollar.

Income from Operations and Operating Margin - Overall. Income from operations increased 2.5% in the second quarter of 2017 as compared to the second quarter of 2016. Our operating margin decreased to 16.5% for the quarter ended June 30, 2017 from 17.5% for the quarter ended June 30, 2016, primarily due to an increase in compensation and benefits costs, increases in certain operating and professional costs, realignment charges in 2017 and the negative impact of the appreciation of the Indian rupee against the U.S. dollar, partially offset by greater realized gains on settlements of cash flow hedges. Additionally, the operating margin for the three months ended June 30, 2016 reflected the loss recognized on a fixed-price customer contract of \$27 million. Excluding the impact of applicable designated cash flow hedges, the appreciation of the Indian rupee against the U.S. dollar negatively impacted our operating margin by approximately 69 basis points or 0.69 percentage points in the three months ended June 30, 2017. Each additional 1.0% change in the exchange rate between the Indian rupee and the U.S. dollar will have the effect of moving our operating margin by approximately 19 basis points or 0.19 percentage points.

Table of Contents

We entered into foreign exchange forward contracts to hedge certain Indian rupee denominated payments in India. These hedges are intended to mitigate the volatility of the changes in the exchange rate between the U.S. dollar and the Indian rupee. During the three months ended June 30, 2017, the settlement of our cash flow hedges positively impacted our operating margin by approximately 95 basis points or 0.95 percentage points as compared to a positive impact of approximately 9 basis points or 0.09 percentage points during the three months ended June 30, 2016. For the three months ended June 30, 2017 and 2016, our non-GAAP operating margins were 20.0%⁴ and 20.3%⁴, respectively. As set forth in the “Non-GAAP Financial Measures” section below, our non-GAAP operating margin excludes stock based compensation expense, acquisition-related charges and, for 2017, realignment charges.

Segment Operating Profit. Segment operating profits were as follows for the three months ended June 30:

	2017	2016	Increase (Decrease)	
			\$	%
	(Dollars in millions)			
Financial Services	\$411	\$459	\$(48)	(10.5)
Healthcare	343	270	73	27.0
Products and Resources	214	226	(12)	(5.3)
Communications, Media and Technology	146	134	12	9.0
Total segment operating profit	1,114	1,089	25	2.3
Less: unallocated costs	508	498	10	2.0
Income from operations	\$606	\$591	\$15	2.5

In our Financial Services, Products and Resources, and Communications, Media and Technology business segments, operating profits decreased as a percentage of revenues due to increases in compensation and benefit costs, investments to accelerate our shift to digital, including re-skilling of service delivery personnel, and the negative impact of the appreciation of various currencies, including the Indian rupee, against the U.S. dollar. In our Healthcare segment, operating profits increased as a percentage of revenues due to revenue growth outpacing headcount growth and the \$27 million loss on a fixed-price customer contract recognized in the second quarter of 2016, partially offset by the negative impact of the appreciation of the Indian rupee against the U.S. dollar and investments to grow our business.

Other Income (Expense), Net. Total other income (expense), net consists primarily of foreign currency exchange gains and (losses), interest income and interest expense. The following table sets forth total other income (expense), net for the three months ended June 30:

	2017	2016	Increase/ Decrease
	(in millions)		
Foreign currency exchange gains (losses)	\$8	\$(23)	\$ 31
(Losses) gains on foreign exchange forward contracts not designated as hedging instruments	(3)	3	(6)
Net foreign currency exchange gains (losses)	5	(20)	25
Interest income	31	28	3
Interest expense	(6)	(5)	(1)
Other, net	(1)	1	(2)
Total other income (expense), net	\$29	\$4	\$ 25

The foreign currency exchange gains were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets in our U.S. dollar functional currency India subsidiaries as well as the remeasurement of other net monetary assets denominated in currencies other than the functional currencies of our subsidiaries. The losses on our foreign exchange forward contracts not designated as hedging instruments relate to the realized and unrealized gains and losses on foreign exchange forward contracts entered into primarily to offset foreign currency exposure to the

Indian rupee and other non-U.S. dollar denominated net monetary assets and liabilities. As of June 30, 2017, the notional value of our undesignated hedges was \$269 million.

Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP. See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Provision for Income Taxes. The provision for income taxes decreased to \$165 million during the three months ended June 30, 2017 from \$343 million during the three months ended June 30, 2016. The effective income tax rate decreased to 26.0% for the three months ended June 30, 2017 from 57.6% for the three months ended June 30, 2016. In May 2016, our principal operating subsidiary in India repurchased shares from its shareholders, which are non-Indian Cognizant entities, valued at \$2.8 billion ("India Cash Remittance"). This transaction was undertaken pursuant to a plan approved by the High Court of Madras and simplified the shareholding structure of our principal operating subsidiary in India. Pursuant to the transaction, our principal Indian operating subsidiary repurchased approximately \$1.2 billion of the total \$2.8 billion of shares from its U.S. shareholders, resulting in tax expense in the United States and India, while the remaining \$1.6 billion was repurchased from its shareholder outside the United States. Net of taxes, the transaction resulted in a remittance of cash to the United States in the amount of \$1.0 billion. As a result of this transaction, we incurred an incremental 2016 income tax expense of \$238 million, including a discrete item recognized in the second quarter of 2016 of \$143 million relating to the distribution of historic undistributed accumulated foreign earnings. Total incremental tax expense of \$190 million was recognized in the quarter ended June 30, 2016. This transaction is primarily responsible for the decrease in our effective income tax rate in 2017 as compared to 2016.

Net Income. Net income increased to \$470 million for the three months ended June 30, 2017 from \$252 million for the three months ended June 30, 2016, representing 12.8% and 7.5% of revenues, respectively. The increase in net income as a percentage of revenues is primarily due to the decrease in the income tax provision, partially offset by a decrease in operating margin.

Non-GAAP Financial Measures

Portions of our disclosure, including the following table, include non-GAAP income from operations, non-GAAP operating margin, and non-GAAP diluted earnings per share. These non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles and should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures should be read in conjunction with our financial statements prepared in accordance with GAAP. The reconciliations of Cognizant's non-GAAP financial measures to the corresponding GAAP measures should be carefully evaluated.

Our non-GAAP income from operations and non-GAAP operating margin exclude stock-based compensation expense, acquisition-related charges and, in 2017, realignment charges. Our definition of non-GAAP diluted earnings per share excludes net non-operating foreign currency exchange gains or losses, the effect of recognition in the first quarter of 2017 of an income tax benefit previously unrecognized in our consolidated financial statements related to a specific uncertain tax position, and the impact of a one-time incremental income tax expense related to the India Cash Remittance in the second quarter of 2016, in addition to excluding stock-based compensation expense, acquisition-related charges and, in 2017, realignment charges. Our non-GAAP diluted earnings per share is additionally adjusted for the income tax impact of the above items, as applicable. The income tax impact of each item is calculated by applying the statutory rate and local tax regulations in the jurisdiction in which the item was incurred.

We believe providing investors with an operating view consistent with how we manage the Company provides enhanced transparency into the operating results of the Company. For our internal management reporting and budgeting purposes, we use non-GAAP financial measures for financial and operational decision making, to evaluate period-to-period comparisons, to determine portions of the compensation for our executive officers and for making comparisons of our operating results to those of our competitors. Therefore, it is our belief that the use of non-GAAP financial measures excluding these costs provides a meaningful supplemental measure for investors to evaluate our financial performance. Accordingly, we believe that the presentation of non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share, when read in conjunction with our reported

GAAP results, can provide useful supplemental information to our management and investors regarding financial and business trends relating to our financial condition and results of operations.

A limitation of using non-GAAP financial measures versus financial measures calculated in accordance with GAAP is that non-GAAP measures do not reflect all of the amounts associated with our operating results as determined in accordance with GAAP and exclude costs that are recurring, namely stock-based compensation expense, certain acquisition-related charges, and net non-operating foreign currency exchange gains or losses. In addition, other companies may calculate non-GAAP financial measures differently than us, thereby limiting the usefulness of these non-GAAP financial measures as a comparative tool. We compensate for these limitations by providing specific information regarding the GAAP amounts excluded from non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share to allow investors to evaluate such non-GAAP financial measures.

Table of Contents

The following table presents a reconciliation of each non-GAAP financial measure to the most comparable GAAP measure for the three months ended June 30:

	2017	% of Revenues	2016	% of Revenues
	(Dollars in millions, except per share amounts)			
GAAP income from operations and operating margin	\$606	16.5	\$591	17.5
Add: Stock-based compensation expense ⁽¹⁾	55	1.5	62	1.9
Add: Acquisition-related charges ⁽²⁾	35	1.0	30	0.9
Add: Realignment charges ⁽³⁾	39	1.0	—	—
Non-GAAP income from operations and non-GAAP operating margin	\$735	20.0	\$683	20.3
GAAP diluted earnings per share	\$0.80		\$0.41	
Effect of above operating adjustments, pre-tax	0.22		0.15	
Effect of non-operating foreign currency exchange (losses) gains, pre-tax ⁽⁴⁾	(0.01)		0.04	
Tax effect of non-GAAP adjustments to pre-tax income ⁽⁵⁾	(0.08)		(0.04)	
Effect of incremental income tax expense related to the India Cash Remittance ⁽⁶⁾	—		0.31	
Non-GAAP diluted earnings per share	\$0.93		\$0.87	

(1) Stock-based compensation expense reported in:

	Three Months Ended June 30, 2017	2016
Cost of revenues	\$13	\$13
Selling, general and administrative expenses	42	49

(2) Acquisition-related charges include, when applicable, amortization of purchased intangible assets included in the depreciation and amortization expense line on our consolidated statements of operations, external deal costs, acquisition-related retention bonuses, integration costs, changes in the fair value of contingent consideration liabilities, charges for impairment of acquired intangible assets and other acquisition-related costs.

(3) Realignment charges include severance costs, primarily associated with the VSP, lease termination costs, and advisory fees related to non-routine shareholder matters and to the development of our realignment and return of capital programs, as applicable. The total costs related to the realignment are reported in "Selling, general and administrative expenses" in our consolidated statements of operations and are expected to be incurred primarily in 2017.

(4) Non-operating foreign currency exchange gains are inclusive of gains and losses on related foreign exchange forward contracts not designated as hedging instruments for accounting purposes, reported in "Foreign currency exchange gains (losses), net" in our consolidated statements of operations.

(5) Presented below are the tax impacts of each of our non-GAAP adjustments to pre-tax income:

	Three Months Ended June 30, 2017	2016
Non-GAAP income tax benefit (expense) related to:		
Stock-based compensation expense	\$20	\$15
Acquisition-related charges	12	11

Realignment charges	14	—
Foreign currency exchange gains (losses)	—	—

The effective tax rate related to each of our non-GAAP adjustments varies depending on the jurisdictions in which such income and expenses are generated and the statutory rates applicable in those jurisdictions.

In May 2016, our principal operating subsidiary in India repurchased shares from its shareholders, which are (6) non-Indian Cognizant entities, valued at \$2.8 billion. As a result of this transaction, we incurred an incremental income tax expense of \$190 million in the three months ended June 30, 2016.

Table of Contents

Six Months Ended June 30, 2017 Compared to Six Months Ended June 30, 2016

The following table sets forth, for the periods indicated, certain financial data for the six months ended June 30:

	2017	% of Revenues	2016	% of Revenues	Increase / Decrease \$	%
(Dollars in millions, except per share data)						
Revenues	\$7,216	100.0	\$6,572	100.0	\$644	9.8

Other Financial Information ⁽²⁾						
Non-GAAP income from operations and non-GAAP operating margin	\$1,404	19.5	\$1,320	20.1	\$84	6.4
Non-GAAP diluted earnings per share	\$1.76		\$1.67		\$0.09	

(1) Exclusive of depreciation and amortization expense.

Non-GAAP income from operations, non-GAAP operating margin and non-GAAP diluted earnings per share are

(2) not measurements of financial performance prepared in accordance with GAAP. See "Non-GAAP Financial

Measures" for more information and a reconciliation to the most directly comparable GAAP financial measure.

Revenues - Overall. The increase in revenues was primarily attributed to services related to integration of digital technologies to align with shifts in consumer preferences, increased customer spending on discretionary projects, continued interest in using our global delivery model as a means to reduce overall IT and operations costs and continued penetration in all our geographic markets. Revenues from customers added since June 30, 2016 were \$239 million and represented 37.1% of the period-over-period revenue increase. Foreign currency exchange movements negatively impacted year-over-year revenue growth by \$70 million, or 1.1%, primarily due to the weakening of the British pound.

Our consulting and technology services revenues for the six months ended June 30, 2017 increased by 11.0% compared to the six months ended June 30, 2016 and represented 58.3% of total revenues for the six months ended June 30, 2017. Our outsourcing services revenues for the six months ended June 30, 2017 increased by 8.2% and constituted 41.7% of total revenues for the six months ended June 30, 2017.

Revenues from our top customers were as follows:

	Six Months Ended June 30,	
	2017	2016
Revenues from top five customers as a percentage of total revenues	8.9 %	10.4 %
Revenues from top ten customers as a percentage of total revenues	15.0 %	17.5 %

As we continue to add new customers and increase our penetration at existing customers, we expect the percentage of revenues from our top five and top ten customers to continue to decline over time.

Table of Contents

Revenues - Reportable Segments. Revenues by reportable business segment were as follows for the six months ended June 30:

	2017	2016	Increase	
			\$	%
	(Dollars in millions)			
Financial Services	\$2,782	\$2,637	\$145	5.5
Healthcare	2,053	1,873	180	9.6
Products and Resources	1,484	1,293	191	14.8
Communication, Media and Technology	897	769	128	16.6
Total revenues	\$7,216	\$6,572	\$644	9.8

Revenues from our Financial Services segment grew 5.5% for the six months ended June 30, 2017, as compared to the six months ended June 30, 2016. Growth was stronger among our insurance customers where revenues increased by \$92 million as compared to an increase of \$53 for our banking customers. In this segment, revenues from customers added since June 30, 2016 were \$37 million and represented 25.5% of the period-over-period revenue increase in this segment. Key areas of focus for our Financial Services customers included the adoption and integration of digital technologies that are reshaping our customers' business and operating models, cost optimization, robotic process automation, cyber security and vendor consolidation. Demand from our banking customers may continue to be negatively affected by their continued focus on optimizing their cost structure and managing their discretionary spending.

Revenues from our Healthcare segment grew 9.6% for the six months ended June 30, 2017, as compared to the six months ended June 30, 2016. Revenues from our healthcare customers increased by \$106 million while revenue growth among our life sciences customers was \$74 million. Revenues from customers added since June 30, 2016 were \$38 million and represented 21.1% of the period-over-period revenue increase in this segment. The increase in revenues from our life sciences customers was driven by a growing demand for a broader range of services, including business process services, advanced data analytics and solutions that span multiple service lines while leveraging cloud technologies and platforms. The demand for our services among healthcare customers could be affected by uncertainty in the regulatory environment. We believe that in the long term the healthcare industry continues to present a significant growth opportunity due to factors that are transforming the industry, including the changing regulatory environment, increasing focus on medical costs, and the consumerization of healthcare.

Revenues from our Products and Resources segment (previously referred to as Manufacturing/Retail/Logistics) grew 14.8% for the six months ended June 30, 2017, as compared to the six months ended June 30, 2016. Revenue growth in this segment was strongest among our energy and utilities customers and manufacturing and logistics customers, where revenues increased by a combined \$171 million, including revenues from new strategic customers acquired in the fourth quarter of 2016. Revenues from our retail and consumer goods customers and travel and hospitality customers increased by a combined \$20 million. Revenues from customers added since June 30, 2016 were \$138 million, representing 72.3% of the period-over-period revenue increase in this segment. Demand within this segment continues to be driven by increased adoption of digital technologies that are reshaping our customers' business and operating models, as well as growing demand for analytics, supply chain consulting, implementation initiatives, product transformation, internet of things and omni channel commerce implementation and integration services. Discretionary spending by our retail customers has been and may continue to be affected by weakness in the retail sector.

Revenues from our Communications, Media and Technology segment (previously referred to as Other) grew 16.6% for the six months ended June 30, 2017, as compared to the six months ended June 30, 2016. Growth within this segment was driven by the increased adoption of digital technologies, digital content operations and an expanded range of services, such as business process services. Revenue growth was \$81 million among our communications and

media customers and \$47 million among our technology customers. Revenues from customers added since June 30, 2016 were \$26 million and represented 20.3% of the period-over-period revenue increase in this segment.

Table of Contents

Revenues - Geographic Markets. Revenues by geographic market were as follows for the six months ended June 30:

	2017	2016	Increase	
			\$	%
	(Dollars in millions)			
North America	\$5,612	\$5,121	\$491	9.6
United Kingdom	562	610	(48)	(7.9)
Rest of Europe	576	463	113	24.4
Europe - Total	1,138	1,073	65	6.1
Rest of World	466	378	88	23.3
Total revenues	\$7,216	\$6,572	\$644	9.8

North America continues to be our largest market representing 77.8% of total revenues for the six months ended June 30, 2017 and accounted for \$491 million of the \$644 million total revenue increase over the six months ended June 30, 2016. Revenue growth in Europe and Rest of World markets was driven by an increase in demand for an expanded range of services, such as business process services, customer adoption and integration of digital technologies that are reshaping our customers' business and operating models. Revenues from our customers in Europe grew 6.1%, after a negative currency impact of 6.8%. Specifically, within the United Kingdom we experienced a decrease in revenues of 7.9%, after a negative currency impact of 9.9% while revenues from our Rest of Europe customers, including revenues from new strategic customers acquired in the fourth quarter of 2016, increased 24.4% after a negative currency impact of 2.6%. Revenue growth from our United Kingdom customers has been negatively affected by the current macroeconomic conditions, including the weakening of the British pound and uncertainty in the markets due to the results of the Brexit Referendum. Revenues from our Rest of World customers grew 23.3%, after an immaterial currency impact in the first half of 2017, primarily driven by the Australia and India markets. We believe that Europe, the Middle East, the Asia Pacific and Latin America regions will continue to be areas of significant investment for us as we see these regions as long term growth opportunities.

Cost of Revenues (Exclusive of Depreciation and Amortization Expense). Our cost of revenues consists primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration and project-related travel for technical personnel and subcontracting related to revenues. Our cost of revenues increased by 12.7% during the six months ended June 30, 2017 as compared to the six months ended June 30, 2016. The increase was due primarily to an increase in compensation and benefits costs (partially offset by the impact of lower incentive-based compensation accrual rates), the increase in certain operating and professional service costs and the negative impact of the appreciation of the Indian rupee against the U.S. dollar, partially offset by greater realized gains on settlements of cash flow hedges. Additionally, cost of revenues for the six months ended June 30, 2016 reflected the loss recognized on a fixed-price customer contract. For the six months ended June 30, 2017, compensation and benefit costs increased primarily as a result of the increase in the number of our service delivery personnel as compared to 2016.

Selling, General and Administrative Expenses. Selling, general and administrative expenses consist primarily of salaries, incentive-based compensation, stock-based compensation expense, payroll taxes, employee benefits, immigration, travel, marketing, communications, management, finance, administrative and occupancy costs. Selling, general and administrative expenses, including depreciation and amortization, increased by 7.5% during the six months ended June 30, 2017 as compared to the six months ended June 30, 2016, decreasing as a percentage of revenues to 22.0% for the six months ended June 30, 2017 as compared to 22.4% for the six months ended June 30, 2016. The decrease as a percentage of revenues was due primarily to a decrease in immigration expense and gains on settlements of cash flow hedges, partially offset by an increase in professional service costs, primarily related to the FCPA investigation and related lawsuits, and the negative impact of the appreciation of the Indian rupee against the U.S. dollar.

Income from Operations and Operating Margin - Overall. Income from operations increased 2.7% for the six months ended June 30, 2017 as compared to the same period in 2016. Our operating margin decreased to 16.3% for the six months ended June 30, 2017 from 17.4% for the six months ended June 30, 2016, due to an increase in compensation and benefits costs (partially offset by the impact of lower incentive-based compensation accrual rates), increases in professional service and other operating costs and the negative impact of the appreciation of the Indian rupee against the U.S. dollar, partially offset by greater gains on settlements of cash flow hedges and a decrease in immigration expenses. Additionally, the operating margin for the six months ended June 30, 2016 reflected the loss recognized on a fixed-price customer contract. Excluding the impact of applicable designated cash flow hedges, the appreciation of the Indian rupee against the U.S. dollar negatively impacted our operating margin by approximately 41 basis points or 0.41% percentage points during the six months ended June 30, 2017.

Table of Contents

Each additional 1.0% change in exchange rate between the Indian rupee and the U.S. dollar will have the effect of moving our operating margin by approximately 19 basis points or 0.19 percentage points.

We entered into foreign exchange forward contracts to hedge certain Indian rupee denominated payments in India. These hedges are intended to mitigate the volatility of the changes in the exchange rate between the U.S. dollar and the Indian rupee. During the six months ended June 30, 2017, the settlement of cash flow hedges positively impacted our operating margin by approximately 76 basis points or 0.76 percentage points, as compared to a minimal effect in 2016.

For the six months ended June 30, 2017 and 2016, our non-GAAP operating margins were 19.5%⁵ and 20.1%⁵, respectively. As set forth in the “Non-GAAP Financial Measures” section below, our non-GAAP operating margin excludes stock based compensation expense, acquisition-related charges and, for 2017, realignment charges.

Segment Operating Profit. Segment operating profits were as follows for the six months ended June 30:

	2017	2016	Increase (Decrease)	
			\$	%
	(Dollars in millions)			
Financial Services	\$802	\$882	\$(80)	(9.1)
Healthcare	616	565	51	9.0
Products and Resources	417	445	(28)	(6.3)
Communications, Media and Technology	267	256	11	4.3
Total segment operating profit	2,102	2,148	(46)	(2.1)
Less: unallocated costs	926	1,003	(77)	(7.7)
Income from operations	\$1,176	\$1,145	\$31	2.7

In all our business segments, operating profits decreased as a percentage of revenues due to increases in compensation and benefit costs, investments to accelerate our shift to digital, including re-skilling of service delivery personnel, and the negative impact of the appreciation of various currencies, including the Indian rupee, against the U.S. dollar. Other Income (Expense), Net. Total other income (expense), net consists primarily of foreign currency exchange gains and (losses) and interest income. The following table sets forth total other income (expense), net for the six months ended June 30:

	2017	2016	Increase/ Decrease
	(in millions)		
Foreign currency exchange gains (losses)	\$70	\$(11)	\$ 81
(Losses) on foreign exchange forward contracts not designated as hedging instruments	(13)	—	(13)
Foreign currency exchange gains (losses), net	57	(11)	68
Interest income	63	59	4
Interest expense	(12)	(10)	(2)
Other, net	—	1	(1)
Total other income (expense), net	\$108	\$39	\$ 69

The foreign currency exchange gains were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets in our U.S. dollar functional currency India subsidiaries as well as the remeasurement of other net monetary assets denominated in currencies other than the functional currencies of our subsidiaries. The losses on our foreign exchange forward contracts not designated as hedging instruments relate to the realized and unrealized gains and losses on foreign exchange forward contracts entered into primarily to offset foreign currency exposure to the Indian rupee and other non-U.S. dollar denominated net monetary assets. As of June 30, 2017, the notional value of

our undesignated hedges was \$269 million. The increase in interest income of \$4 million was primarily attributable to an increase in average invested balances in 2017.

Non-GAAP operating margin is not a measurement of financial performance prepared in accordance with GAAP. See “Non-GAAP Financial Measures” for more information and a reconciliation to the most directly comparable GAAP financial measure.

Table of Contents

Provision for Income Taxes. The provision for income taxes decreased to \$257 million during the six months ended June 30, 2017 from \$491 million during the six months ended June 30, 2016. The effective income tax rate decreased to 20.0% for the six months ended June 30, 2017 from 41.4% for the six months ended June 30, 2016. The decrease in our effective income tax rate was primarily attributed to the effect of the incremental income tax expense of \$190 million related to the India Cash Remittance in 2016 and the recognition in the first quarter of 2017 of income tax benefits previously unrecognized in our consolidated financial statements related to several uncertain tax positions totaling \$72 million.

Net Income. Net income increased to \$1,027 million for the six months ended June 30, 2017 from \$693 million for the six months ended June 30, 2016, representing 14.2% and 10.6% of revenues, respectively. The increase in net income as a percentage of revenues is primarily due to the 2017 foreign currency exchange gains and a decrease in the provision for income taxes, partially offset by the decrease in operating margin during the six months ended June 30, 2017 as compared to the six months ended June 30, 2016.

Non-GAAP Financial Measures

The following table presents a reconciliation of each non-GAAP financial measure to the most comparable GAAP measure for the six months ended June 30:

	2017	% of Revenues	2016	% of Revenues
	(Dollars in millions, except per share amounts)			
GAAP income from operations and operating margin	\$1,176	16.3	\$1,145	17.4
Add: Stock-based compensation expense ⁽¹⁾	109	1.5	116	1.8
Add: Acquisition-related charges ⁽²⁾	69	1.0	59	0.9
Add: Realignment charges ⁽³⁾	50	0.7	—	—
Non-GAAP income from operations and non-GAAP operating margin	\$1,404	19.5	\$1,320	20.1
GAAP diluted earnings per share	\$1.71		\$1.14	
Effect of above operating adjustments, pre-tax	0.38		0.29	
Effect of non-operating foreign currency exchange (losses) gains, pre-tax ⁽⁴⁾	(0.10)		0.01	
Tax effect of non-GAAP adjustments to pre-tax income ⁽⁵⁾	(0.14)		(0.08)	
Effect of recognition of income tax benefit related to an uncertain tax position ⁽⁶⁾	(0.09)		—	
Effect of incremental income tax expense related to the India Cash Remittance ⁽⁷⁾	—		0.31	
Non-GAAP diluted earnings per share	\$1.76		\$1.67	

(1) Stock-based compensation expense reported in:

Six
Months
Ended
June 30,
2017 2016

Cost of revenues \$28 \$26

Selling, general and administrative expenses 81 90

(2) Acquisition-related charges include, when applicable, amortization of purchased intangible assets included in the depreciation and amortization expense line on our consolidated statements of operations, external deal costs, acquisition-related retention bonuses, integration costs, changes in the fair value of contingent consideration

liabilities, charges for impairment of acquired intangible assets and other acquisition-related costs.

Realignment charges include severance costs, primarily associated with the VSP, lease termination costs, and advisory fees related to non-routine shareholder matters and to the development of our realignment and return of (3) capital programs, as applicable. The total costs related to the realignment are reported in "Selling, general and administrative expenses" in our consolidated statements of operations and are expected to be incurred primarily in 2017.

Non-operating foreign currency exchange gains are inclusive of gains and losses on related foreign exchange (4) forward contracts not designated as hedging instruments for accounting purposes, reported in "Foreign currency exchange gains (losses), net" in our consolidated statements of operations.

Table of Contents

(5) Presented below are the tax impacts of each of our non-GAAP adjustments to pre-tax income:

	Six Months Ended June 30, 2017	2016
Non-GAAP income tax benefit (expense) related to:		
Stock-based compensation expense	\$41	\$ 27
Acquisition-related charges	24	22
Realignment charges	18	—
Foreign currency exchange gains (losses)	5	1

The effective tax rate related to each of our non-GAAP adjustments varies depending on the jurisdictions in which such income and expenses are generated and the statutory rates applicable in those jurisdictions.

During the three months ended March 31, 2017, we recognized an income tax benefit previously unrecognized in our consolidated financial statements related to a specific uncertain tax position of \$55 million. The recognition of (6) the benefit in the first quarter of 2017 was based on management's reassessment regarding whether this unrecognized tax benefit met the more-likely-than-not threshold in light of the lapse in the statute of limitations as to a portion of such benefit.

In May 2016, our principal operating subsidiary in India repurchased shares from its shareholders, which are (7) non-Indian Cognizant entities, valued at \$2.8 billion. As a result of this transaction, we incurred an incremental income tax expense of \$190 million in the six months ended June 30, 2016.

Liquidity and Capital Resources

Cash generated from operations has historically been our primary source of liquidity to fund operations and investments to grow our business. In addition, as of June 30, 2017, we had cash, cash equivalents and short-term investments of \$4,378 million and additional available capacity under our revolving credit facility of approximately \$600 million. The following table provides a summary of our cash flows for the six months ended June 30:

	2017	2016	Increase / Decrease
	(in millions)		
Net cash from operating activities	\$ 798	\$ 438	\$ 360
Net cash (used in) investing activities	(298)	(260)	(38)
Net cash (used in) financing activities	(1,421)	(621)	(800)

Operating activities. The increase in cash generated from operating activities was primarily attributable to higher net income in the first half of 2017 as compared to the same period in 2016. Trade accounts receivable increased to \$2,680 million at June 30, 2017 from \$2,556 million at December 31, 2016. Unbilled accounts receivable increased to \$409 million at June 30, 2017 from \$349 million at December 31, 2016. The increase in trade accounts receivable and unbilled receivables as of June 30, 2017 as compared to December 31, 2016 was primarily due to increased revenues.

We monitor turnover, aging and the collection of accounts receivable by customer. Our days sales outstanding calculation includes billed and unbilled accounts receivable, net of allowance for doubtful accounts, reduced by the uncollected portion of our deferred revenue. Our days sales outstanding as of June 30, 2017 was 73 days, higher as compared to 72 days as of December 31, 2016, and lower as compared to 74 days as of June 30, 2016.

Investing activities. The increase in cash used in investing activities in the 2017 period is primarily related to net investment purchases in the 2017 period as compared to net investment sales in the same period in 2016, partially offset by lower payments for acquisitions in the 2017 period.

Financing activities. The increase in cash used in financing activities in the 2017 period is primarily attributable to repurchases of common stock under the ASR and payment of dividends, partially offset by net borrowings under the revolving credit facility in 2017 as compared to net repayments of notes under our revolving credit facility in the same period in 2016.

In 2014, we entered into a credit agreement with a commercial bank syndicate, or, as amended, the Credit Agreement, providing for a \$1,000 million unsecured term loan and a \$750 million revolving credit facility. The term loan was used to pay a portion of the cash consideration in connection with our acquisition of TZ US Parent, Inc., or TriZetto. The revolving credit

Table of Contents

facility is available for general corporate purposes. The term loan and the revolving credit facility both mature in November 2019. As of June 30, 2017, we had \$844 million outstanding under the term loan and \$150 million outstanding notes under the revolving credit facility.

The Credit Agreement contains certain negative covenants, including limitations on liens, mergers, consolidations and acquisitions, subsidiary indebtedness and affiliate transactions, as well as certain affirmative covenants. In addition, the Credit Agreement requires us to maintain a debt to total stockholders' equity ratio not in excess of 0.40 to 1.00. As of June 30, 2017, we were in compliance with our debt covenants and have provided a quarterly certification to our lenders to that effect. We believe that we currently meet all conditions set forth in the Credit Agreement to borrow thereunder, and we are not aware of any conditions that would prevent us from borrowing part or all of the remaining available capacity under the revolving credit facility as of June 30, 2017 and through the date of this filing.

We have initiated a plan to return \$3.4 billion to stockholders over the next two years through a combination of stock repurchases and cash dividends. As part of this plan, we entered into a \$1.5 billion ASR in March 2017 and paid a cash dividend of \$0.15 per share, totaling \$89 million in May 2017. We subsequently declared another cash dividend of \$0.15 per share with a record date of August 22, 2017 and a payment date of August 31, 2017. The up-front payments related to the ASR were funded with cash on hand in the U.S. and borrowings under the revolving credit facility. We intend to repurchase an additional \$1.2 billion of shares during the second half of 2017 and 2018. Stock repurchases may be made from time to time through open-market purchases and through the use of Rule 10b5-1 plans and/or by other means.

Our Board of Directors intends to continue to review the capital return plan, considering our financial performance, economic outlook, regulatory changes and any other relevant factors. The Board of Directors' determinations regarding dividends and share repurchases will depend on a variety of factors, including our net income, cash flow generated from operations or other sources, liquidity position and potential alternative uses of cash, such as acquisitions, as well as economic conditions and expected future financial results. As these factors may change over the course of the year, the amount of stock repurchase activity and actual amount of dividends declared by our Board of Directors, if any, during any particular period cannot be predicted and may fluctuate from time to time. There can be no guarantee that we will achieve the objective of our announced capital return plan in the amounts or on the expected time frame that we have indicated, or at all.

We believe the combination of our U.S. cash on hand, U.S. cash flows and ability to borrow under both existing and future debt arrangements continues to be sufficient to fund our current domestic operations and obligations, including debt service, future share repurchases and quarterly cash dividends. The amount of funds held in U.S. tax jurisdictions can fluctuate due to the timing of receipts and payments in the ordinary course of business, including debt repayments, and due to other reasons, such as acquisition-related activities. The Company's U.S. operations historically have generated and are expected to continue to generate substantial cash flows. In circumstances where the Company has additional cash requirements in the United States, we have several additional liquidity options available to meet those requirements. These options may include borrowing additional funds, including borrowings under our committed revolving credit facility or a new syndicated lending facility should we seek one, temporarily utilizing intercompany loans with certain foreign subsidiaries on a limited basis and repatriating certain of our foreign earnings. Additionally, we believe we have access to the credit and equity markets and could borrow additional funds under acceptable terms and conditions or raise additional capital through an equity transaction.

Many of our operations are conducted outside the United States and significant portions of our cash, cash equivalents and short-term investments are held internationally. As of June 30, 2017, \$3,987 million of our cash, cash equivalents and short-term investments were held outside the United States. As part of our ongoing liquidity assessments, we regularly monitor the mix of domestic and international cash flows and cash balances. We utilize certain strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed. Most of the amounts held outside of the United States could be repatriated to the United States but, under current law, would be subject to income taxes in the United States, less applicable foreign tax credits. We intend to indefinitely reinvest these funds outside the United States and our current plans do not demonstrate a need to repatriate these amounts to fund our

liquidity needs in the United States. In reaching this conclusion, we considered our capital needs in the United States, the available sources of liquidity in the United States and our growth plans outside the United States. However, future events may occur, such as material changes in cash estimates, discretionary transactions, including corporate restructurings, and changes in applicable laws, which may lead us to repatriate foreign earnings. This may result in an additional provision for income taxes, which could materially affect our future effective income tax rate. Due to the various methods by which such earnings could be repatriated in the future, it is not currently practicable to determine the amount of applicable taxes that would result from such repatriation.

We expect our operating cash flow, cash and investment balances, and available capacity under our revolving credit facility to be sufficient to meet our operating requirements, including costs related to realignment, for the next twelve months. Our ability to expand and grow our business in accordance with current plans, to make acquisitions and form joint ventures, to meet our long term capital requirements and to execute our announced capital return plan beyond a twelve month period will

Table of Contents

depend on many factors, including the rate, if any, at which our cash flow increases, our ability and willingness to accomplish acquisitions and joint ventures with capital stock, our continued intent not to repatriate foreign earnings, and the availability of public and private debt and equity financing. We cannot be certain that additional financing, if required, will be available on terms and conditions acceptable to us, if at all.

Commitments and Contingencies

We are involved in various claims and legal actions arising in the ordinary course of business. We accrue a liability when a loss is considered probable and the amount can be reasonably estimated. When a material loss contingency is reasonably possible but not probable, we do not record a liability, but instead disclose the nature and the amount of the claim, and an estimate of the loss or range of loss, if such an estimate can be made. Legal fees are expensed as incurred. In the opinion of management, the outcome of any existing claims and legal or regulatory proceedings, other than the specific matters described below, if decided adversely, is not expected to have a material adverse effect on our business, financial condition, results of operations and cash flows.

We are conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the FCPA and other applicable laws. In September 2016, we voluntarily notified the DOJ and SEC and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel. To date, the investigation has identified a total of approximately \$6 million in payments made between 2010 and 2015 that may have been improper. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. There were no adjustments recorded during the six months ended June 30, 2017. See Note 11 to our unaudited condensed consolidated financial statements.

On October 5, 2016, October 27, 2016, and November 18, 2016, three putative securities class action complaints were filed in the United States District Court for the District of New Jersey, naming us and certain of our current and former officers as defendants. In an order dated February 3, 2017, the United States District Court for the District of New Jersey consolidated the three putative securities class actions into a single action and appointed lead plaintiffs and lead counsel. On April 7, 2017, the lead plaintiffs filed a consolidated amended complaint on behalf of a putative class of stockholders who purchased our common stock during the period between February 27, 2015 and September 29, 2016, naming us and certain of our current and former officers as defendants and alleging violations of the Exchange Act, based on allegedly false or misleading statements related to potential violations of the FCPA, our business, prospects and operations, and the effectiveness of our internal controls over financial reporting and our disclosure controls and procedures. The lead plaintiffs seek an award of compensatory damages, among other relief, and their reasonable costs and expenses, including attorneys' fees. Under a stipulation filed by the parties on February 23, 2017, defendants filed motions to dismiss the consolidated amended complaint on June 6, 2017, plaintiffs filed an opposition brief on July 21, 2017 responding to defendants' motions to dismiss, and defendants have until September 5, 2017 to file reply briefs in further support of their motions to dismiss.

On October 31, 2016, November 15, 2016, and November 18, 2016, three putative shareholder derivative complaints were filed in New Jersey Superior Court, Bergen County, naming us, all of our then current directors and certain of our current and former officers as defendants. On January 24, 2017, the New Jersey Superior Court, Bergen County, consolidated the three putative shareholder derivative actions filed in that court into a single action and appointed lead plaintiff and lead counsel. The complaints assert claims for breach of fiduciary duty, corporate waste, unjust enrichment, abuse of control, mismanagement, and/or insider selling by defendants. On March 16, 2017, the parties filed a stipulation deferring all further proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 26, 2017, in lieu of ordering the stipulation filed by the parties, the New Jersey Superior Court deferred further proceedings by dismissing the consolidated putative shareholder derivative litigation without prejudice but permitting the parties to file a motion to

vacate the dismissal in the future. On February 22, 2017, a fourth putative shareholder derivative complaint asserting similar claims was filed in the United States District Court for the District of New Jersey, naming us and certain of our directors as defendants. On April 5, 2017, the United States District Court for the District of New Jersey entered an order staying all proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 7, 2017, a fifth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 10(b) of the Exchange Act against the individual defendants. On May 10, 2017, a sixth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 14(a) of the Exchange Act against the individual defendants. In an order dated June 20,

Table of Contents

2017, the United States District Court for the District of New Jersey consolidated the three putative shareholder derivative actions filed in that court into a single action, appointed lead plaintiff and lead counsel, and stayed all further proceedings pending a final, non-appealable ruling on the motion to dismiss the consolidated putative securities class action. All of the putative shareholder derivative complaints allege among other things that certain of our public disclosures were false and misleading by failing to disclose that payments allegedly in violation of the FCPA had been made and by asserting that management had determined that our internal controls were effective. The plaintiffs seek awards of compensatory damages and restitution to us as a result of the alleged violations and their costs and attorneys' fees, experts' fees, and other litigation expenses, among other relief.

We are presently unable to predict the duration, scope or result of the internal investigation, any investigations by the DOJ or the SEC, the consolidated putative securities class action, the putative shareholder derivative actions or any other lawsuits. As such, we are presently unable to develop a reasonable estimate of a possible loss or range of losses, if any, and thus have not recorded any accruals related to these matters. The DOJ and the SEC have a broad range of civil and criminal sanctions under the FCPA and other laws and regulations including injunctive relief, disgorgement, fines, penalties, modifications to business practices, including the termination or modification of existing business relationships, the imposition of compliance programs and the retention of a monitor to oversee compliance with the FCPA. In addition, the DOJ and the SEC could bring enforcement actions against the Company or individuals, including former members of senior management. Such actions, if brought, could result in dispositions, judgments, settlements, fines, injunctions, cease and desist orders, debarment or other civil or criminal penalties against the Company or such individuals.

We expect to incur additional expenses related to remedial measures, and may incur additional expenses related to fines. The imposition of any sanctions or the implementation of remedial measures could have a material adverse effect on our business, annual and interim results of operations, cash flows and financial condition. Furthermore, while the Company intends to defend the lawsuits vigorously, these lawsuits and any other related lawsuits are subject to inherent uncertainties, the actual cost of such litigation will depend upon many unknown factors and the outcome of the litigation is necessarily uncertain.

Many of our engagements involve projects that are critical to the operations of our customers' business and provide benefits that are difficult to quantify. Any failure in a customer's systems or our failure to meet our contractual obligations to our customers, including any breach involving a customer's confidential information or sensitive data, or our obligations under applicable laws or regulations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Although we attempt to contractually limit our liability for damages arising from negligent acts, errors, mistakes, or omissions in rendering our services, there can be no assurance that the limitations of liability set forth in our contracts will be enforceable in all instances or will otherwise protect us from liability for damages. Although we have general liability insurance coverage, including coverage for errors or omissions, there can be no assurance that such coverage will cover all types of claims, continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that exceed or are not covered by our insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

In the normal course of business and in conjunction with certain customer engagements, we have entered into contractual arrangements through which we may be obligated to indemnify customers or other parties with whom we conduct business with respect to certain matters. These arrangements can include provisions whereby we agree to hold the indemnified party and certain of their affiliated entities harmless with respect to third-party claims related to such matters as our breach of certain representations or covenants, our intellectual property infringement, our gross negligence or willful misconduct or certain other claims made against certain parties. Payments by us under any of these arrangements are generally conditioned on the customer making a claim and providing us with full control over the defense and settlement of such claim. It is not possible to determine the maximum potential liability under these

indemnification agreements due to the unique facts and circumstances involved in each particular agreement. Historically, we have not made payments under these indemnification agreements and therefore they have not had any impact on our operating results, financial position, or cash flows. However, if events arise requiring us to make payment for indemnification claims under our indemnification obligations in contracts we have entered, such payments could have material impact on our business, results of operations, financial condition and cash flows.

The Company has indemnification and expense advancement obligations pursuant to its Bylaws and indemnification agreements with respect to certain current and former members of senior management and the Company's directors. In connection with the ongoing internal investigation, the Company has received requests under such indemnification agreements and its Bylaws to provide advances of funds for legal fees and other expenses, and expects additional requests in connection with the investigation and related litigation. The Company has not recorded any liability for these matters as of June 30, 2017 as it cannot estimate the ultimate outcome at this time but has expensed advances made through June 30, 2017. The Company

Table of Contents

has maintained directors and officers insurance, from which a portion of these expenses may be recoverable, though we have not recorded an insurance receivable as of June 30, 2017. We are unable to make a reliable estimate of the eventual cash flows by period related to the indemnification agreements described here.

Foreign Currency Risk

Overall, we believe that we have limited revenue risk resulting from movement in foreign currency exchange rates as 77.8% of our revenues for the six months ended June 30, 2017 were generated from customers located in North America. Revenues from our customers in the United Kingdom, Rest of Europe and Rest of World represented 7.8%, 8.0% and 6.5%, respectively, of our 2017 revenues. Accordingly, our operating results outside the United States may be affected by fluctuations in the exchange rates, primarily the British pound and the Euro, as compared to the U.S. dollar. In particular, the results of the Brexit Referendum and its effect on the British pound may subject us to increased volatility in foreign currency exchange rate movements.

A portion of our costs in India, representing approximately 22.7% of our global operating costs for the six months ended June 30, 2017, are denominated in the Indian rupee and are subject to foreign exchange rate fluctuations. These foreign currency exchange rate fluctuations have an impact on our results of operations. In addition, a portion of our balance sheet is exposed to foreign currency exchange rate fluctuations, which may result in non-operating foreign currency exchange gains or losses upon remeasurement. For the six months ended June 30, 2017, we reported foreign currency exchange gains, exclusive of hedging gains or losses, of \$70 million, which were primarily attributed to the remeasurement of the Indian rupee denominated net monetary assets in our U.S. dollar functional currency India subsidiaries as well as the remeasurement of other net monetary assets denominated in currencies other than the functional currencies of our subsidiaries. On an ongoing basis, we manage a portion of this risk by limiting our net monetary asset exposure to certain currencies, primarily the Indian rupee and the Euro, in our foreign subsidiaries. We entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Our Indian subsidiaries, collectively referred to as Cognizant India, convert U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These foreign exchange forward contracts to buy Indian rupees and sell U.S. dollars are intended to partially offset the impact of movement of exchange rates on future operating costs. For the six months ended June 30, 2017, we reported gains of \$55 million on contracts that settled during this period. As of June 30, 2017, the notional value and weighted average contract rates of these contracts were as follows:

	Notional Value (in millions)	Weighted Average Contract Rate (Indian rupee to U.S. dollar)
2017	\$ 630	72.0
2018	1,050	73.6
2019	330	69.7
Total	\$ 2,010	72.4

Our foreign subsidiaries are exposed to foreign currency exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets and liabilities. We

entered into a series of foreign exchange forward contracts scheduled to mature in 2017 and 2018 which are used to hedge our foreign currency denominated net monetary assets and liabilities. At June 30, 2017, the notional value of the outstanding contracts was \$269 million and the related fair value was a liability of \$6 million. During the six months ended June 30, 2017, inclusive of \$13 million of losses on these undesignated balance sheet hedges, we reported net foreign currency exchange gains of \$57 million.

Off-Balance Sheet Arrangements

Other than our foreign exchange forward contracts, there were no off-balance sheet transactions, arrangements or other relationships with unconsolidated entities or other persons in the six months ended June 30, 2017 that have, or are reasonably likely to have, a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents

Critical Accounting Estimates

Management's discussion and analysis of our financial condition and results of operations is based on our unaudited condensed consolidated financial statements that have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported for assets and liabilities, including the recoverability of tangible and intangible assets, disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. On an on-going basis, we evaluate our estimates. The most significant estimates relate to the recognition of revenue and profits based on the percentage of completion method of accounting for certain fixed price contracts, the allowance for doubtful accounts, income taxes, valuation of goodwill and other long-lived assets, valuation of investments and derivative financial instruments, assumptions used in valuing stock-based compensation arrangements, business combinations and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. The actual amounts may differ from the estimates used in the preparation of the accompanying unaudited condensed consolidated financial statements. For a discussion of our critical accounting estimates, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in our 2016 Annual Report on Form 10-K. Our significant accounting policies are described in Note 1 to the audited consolidated financial statements included in our 2016 Annual Report on Form 10-K. There have been no material changes to the aforementioned critical accounting estimates and policies during the quarter.

Recently Adopted and New Accounting Pronouncements

See Note 1 to our unaudited condensed consolidated financial statements for additional information.

Effects of Inflation

Our most significant costs are the salaries and related benefits for our programming staff and other professionals. In certain regions, competition for professionals with advanced technical skills necessary to perform our services has caused wages to increase at a rate greater than the general rate of inflation. As with other service providers in our industry, we must adequately anticipate wage increases, particularly on our fixed-price contracts. Historically, we have experienced increases in compensation and benefit costs in India; however, this has not had a material impact on our results of operations as we have been able to absorb such cost increases through cost management strategies such as managing discretionary costs, mix of professional staff and utilization levels and achieving other operating efficiencies. There can be no assurance that we will be able to offset such cost increases in the future.

Forward Looking Statements

The statements contained in this Quarterly Report on Form 10-Q that are not historical facts are forward-looking statements (within the meaning of Section 21E of the Exchange Act) that involve risks and uncertainties. Such forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as "believe," "expect," "may," "could," "would," "plan," "intend," "estimate," "predict," "potential," "continue," "should" or "an" negative thereof or other variations thereon or comparable terminology, or by discussions of strategy that involve risks and uncertainties. From time to time, we or our representatives have made or may make forward-looking statements, orally or in writing.

Table of Contents

Such forward-looking statements may be included in various filings made by us with the Securities and Exchange Commission, or press releases or oral statements made by or with the approval of one of our authorized executive officers. These forward-looking statements, such as statements regarding anticipated future revenues or operating margins, contract percentage completions, earnings, capital expenditures, liquidity, access to capital, capital return plan, investment strategies, cost management, realignment program, plans and objectives, including those related to our digital practice areas, investment in our business and potential acquisitions, industry trends, customer behaviors and trends, and the ongoing internal investigation and other statements regarding matters that are not historical facts, are based on our current expectations, estimates and projections, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Actual results, performance, achievements and outcomes could differ materially from the results expressed in, or implied by, these forward-looking statements. There are a number of important factors that could cause our results to differ materially from those indicated by such forward-looking statements, including:

Competition from other service providers;

- The risk that we may not be able to achieve targeted improvements in our operating margin and level of profitability, or that our operating margin and profitability may decline;

- The risk of liability or damage to our reputation resulting from security breaches;

- Any possible failure to comply with or adapt to changes in data protection and privacy laws;

- The loss of customers, especially as a few customers account for a large portion of our revenues;

- The risk that we may not be able to keep pace with the rapidly evolving technological environment;

- The rate of growth in the use of technology in business and the type and level of technology spending by our customers;

- Mispricing of our services, especially on our fixed-price contracts;

- Risks associated with our ongoing internal investigation into possible violations of the FCPA and similar laws, including the cost of such investigation and any sanctions, fines or remedial measures that may be imposed by the DOJ or SEC, additional expenses related to remedial measures, the costs of defending and/or settling and possible judgments against us that may result from associated lawsuits against us and any possible impact on our ability to timely file the required reports with the SEC;

- Risks associated with our identified material weakness in internal control over financial reporting and any other failure to maintain effective internal controls, including any potential future findings of control deficiencies through the internal investigation, in connection with any company we acquire, or otherwise;

- Our inability to successfully acquire or integrate target companies;

- System failure or disruptions in our communications or information technology;

- The risk that we may lose key executives and not be able to enforce non-competition agreements with them;

- Competition for hiring highly-skilled technical personnel;

- Possible failure to provide business solutions and deliver complex and large projects for our customers;

- The risk of reputational harm to us;

- Our revenues being highly dependent on customers concentrated in certain industries, including financial services and healthcare, and located primarily in the United States and Europe;

- The risk that we may not be able to pay dividends or repurchase shares in accordance with our announced capital return plan, or at all;

- The risks associated with the incurrence of indebtedness as we anticipate incurring additional indebtedness to help fund our announced capital return plan;

- Risks relating to our global operations, including our operations in India;

- The effects of fluctuations in the Indian rupee and other currency exchange rates;

- The effect of our use of derivative instruments;

- The possibility that we may be required, as a result of our indebtedness, or otherwise choose to repatriate foreign earnings or that our foreign earnings or profits may become subject to U.S. taxes;

- The possibility that we may lose certain tax benefits provided to companies in our industry by the Indian government;

The risk that we may not be able to enforce or protect our intellectual property rights, or that we may infringe upon the intellectual property rights of others;

Changes in domestic and international regulations and legislation relating to immigration and anti-outsourcing;

Table of Contents

Increased regulation of the financial services and healthcare industries, as well as other industries in which our customers operate;

• The Brexit Referendum and any negative effects on global economic conditions, financial markets and our business;

• The recent U.S. presidential election and related regulatory uncertainties, including in the areas of outsourcing, immigration and taxes;

• The risk of war, terrorist activities, pandemics and natural disasters; and

• The factors set forth in "Part I, Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016.

You are advised to consult any further disclosures we make on related subjects in the reports we file with the Securities and Exchange Commission, including this report in the section titled "Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Part I, Item 1. Business" in our Annual Report on Form 10-K for the year ended December 31, 2016. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are exposed to foreign currency exchange rate risk in the ordinary course of doing business as we transact or hold a portion of our funds in foreign currencies, particularly the Indian rupee. Additionally, the Brexit Referendum and its effect on the British pound may subject us to increased volatility in foreign currency exchange rate movements.

Accordingly, we periodically evaluate the need for hedging strategies, including the use of derivative financial instruments, to mitigate the effect of foreign currency exchange rate fluctuations and expect to continue to use such instruments in the future to reduce foreign currency exposure to appreciation or depreciation in the value of certain foreign currencies. All hedging transactions are authorized and executed pursuant to regularly reviewed policies and procedures.

We have entered into a series of foreign exchange forward contracts that are designated as cash flow hedges of certain Indian rupee denominated payments in India. Cognizant India converts U.S. dollar receipts from intercompany billings to Indian rupees to fund local expenses. These U.S. dollar / Indian rupee hedges are intended to partially offset the impact of movement of exchange rates on future operating costs. As of June 30, 2017, the notional value and weighted average contract rates of these contracts were as follows:

	Notional Value (in millions)	Weighted Average Contract Rate (Indian rupee to U.S. dollar)
2017	\$ 630	72.0
2018	1,050	73.6
2019	330	69.7
Total	\$ 2,010	72.4

As of June 30, 2017, the net unrealized gain on our outstanding foreign exchange forward contracts designated as cash flow hedges was \$155 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at June 30, 2017, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in

a change in the fair value of approximately \$208 million.

Our foreign subsidiaries are exposed to foreign currency exchange rate risk for transactions denominated in currencies other than the functional currency of the respective subsidiary. We also use foreign exchange forward contracts to hedge balance sheet exposure to certain monetary assets and liabilities denominated in currencies other than the functional currency of the subsidiary. These contracts are not designated as hedges and are intended to offset the foreign currency exchange gains or losses upon remeasurement of these net monetary assets and liabilities. We entered into a series of foreign exchange forward contracts scheduled to mature in 2017 and 2018 which are used to hedge our foreign currency denominated net monetary assets and liabilities. At June 30, 2017, the notional value of the outstanding contracts was \$269 million and the related fair value was a liability of \$6 million. Based upon a sensitivity analysis of our foreign exchange forward contracts at June 30, 2017, which estimates the fair value of the contracts based upon market exchange rate fluctuations, a 10.0% change in the foreign currency exchange rate against the U.S. dollar with all other variables held constant would have resulted in a change in the fair value of approximately \$25 million.

Table of Contents

Our Credit Agreement provides for a \$1,000 million unsecured term loan and a \$750 million unsecured revolving credit facility. The term loan and the revolving credit facility both mature on November 20, 2019. As of June 30, 2017, we had \$844 million outstanding under the term loan and \$150 million outstanding loans under the revolving credit facility. The Credit Agreement requires interest to be paid at either the base rate or the Eurocurrency rate, plus a margin. The margin over the base rate is 0.00%, and the margin over the Eurocurrency rate ranges from 0.75% to 1.125%, depending on our debt ratings (or, if we have not received debt ratings, from 0.875% to 1.00%, depending on our debt to total stockholders' equity ratio). Thus, our debt exposes us to market risk from changes in interest rates. We performed a sensitivity analysis to determine the effect of interest rate fluctuations on our interest expense. A 10% change in interest rates, with all other variables held constant, would have resulted in a 4.4% change to our reported interest expense for the six months ended June 30, 2017.

We typically invest in highly-rated securities and our policy generally limits the amount of credit exposure to any one issuer. Our investment policy requires investments to be investment grade with the objective of minimizing the potential risk of principal loss. We may sell our trading and available-for-sale investments prior to their stated maturities for strategic purposes, in anticipation of credit deterioration, or for duration management. As of June 30, 2017, our short-term and long-term investments were \$3,221 million and \$198 million, respectively. Our investment portfolio is comprised primarily of time deposits, mutual funds invested in fixed income securities, Indian rupee denominated commercial paper, Indian rupee denominated international corporate bonds and government debt securities, U.S. dollar denominated corporate bonds, municipal bonds, certificates of deposit, commercial paper, debt issuances by the U.S. government, U.S. government agencies, foreign governments and supranational entities and asset-backed securities. The asset-backed securities included securities backed by auto loans, credit card receivables, and other receivables. Our long-term investments are comprised of held-to-maturity corporate and other debt securities as well as equity and cost method investments.

In addition, our cash, cash equivalents and short-term investments are subject to market risk from changes in interest rates. As of June 30, 2017, a 10% change in interest rates, with all other variables held constant, would result in a change in the fair value of our available-for-sale investment securities of approximately \$4 million.

Information provided by the sensitivity analysis does not necessarily represent the actual changes that would occur under normal market conditions.

Item 4. Controls and Procedures.

Internal Investigation

Background

As previously disclosed, the Company is conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the FCPA and other applicable laws. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. In 2016, through the internal investigation, we discovered that certain members of senior management may have participated in or been aware of the making of potentially improper payments and failed to take action to prevent the making of potentially improper payments by either overriding or failing to enforce the controls established by the Company relating to real estate and procurement principally in connection with permits for certain facilities in India. Such actions would be inconsistent with the standards and tone at the top to which our Board of Directors and senior management are committed and would be in violation of the Company's written code of conduct and procedures established in part to detect and prevent improper payments.

Material Weakness

Based on the results of the internal investigation to date and remedial actions taken through June 30, 2017, we concluded a material weakness that existed at December 31, 2016 continued to exist as of June 30, 2017 as we did not maintain an effective internal control environment. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. Specifically, we did not maintain an effective tone at the top as certain members of senior management may have participated in or failed to take action to prevent the making of potentially improper payments by either overriding or failing to enforce the controls established by the Company relating to real estate and procurement principally in connection with permits for certain facilities in India.

Table of Contents

This control deficiency did not result in a material misstatement of our current or prior period consolidated annual or interim financial statements. However, this control deficiency could have resulted in material misstatements to the annual or interim consolidated financial statements that would not have been prevented or detected. Accordingly, management has concluded that this control deficiency constitutes a material weakness.

Remediation

We have undertaken a number of measures designed to directly address, or that may contribute to, the remediation of our material weakness or the enhancement of our internal controls over financial reporting. While the internal investigation is ongoing, based on the results of the investigation to date, the members of senior management who may have participated in or been aware of the making of the identified potentially improper payments and failed to take action to prevent the making of the identified potentially improper payments are no longer with the Company or in a senior management position. Additional personnel actions have been taken with respect to other employees and further actions may be required.

Further, among other things, we have made certain new management appointments, including a new President and a new General Counsel, added resources and personnel to our compliance function and programs, enhanced our oversight controls in the areas of procurement and accounts payable as they relate to real estate transactions in India, and enhanced our compliance program and control environment through a number of actions, including additional and improved anti-corruption and ethical conduct training programs and a distribution of a revised code of ethics to all employees.

Changes to internal controls over financial reporting need to operate for a period of time in order for management to evaluate and test whether the internal control changes are effective. We have commenced our evaluation of the effectiveness of certain changes to our internal controls over financial reporting implemented to directly address the material weakness.

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our chief executive officer and our chief financial officer, evaluated the design and operating effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of June 30, 2017.

Based on the evaluation of the design and effectiveness of our disclosure controls and procedures, and as a result of the material weakness described above, our chief executive officer and chief financial officer have concluded that, as of June 30, 2017, the Company's disclosure controls and procedures were not effective.

Changes in Internal Control over Financial Reporting

Other than described in "Remediation" above, there were no changes in the Company's internal control over financial reporting that occurred during the second quarter of 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the FCPA and other applicable laws. In September 2016, we voluntarily notified the DOJ and SEC, and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel. To date, the investigation has identified a total of approximately \$6 million in payments made between 2010 and 2015 that may have been improper. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. Based on the results of the investigation to date, no material adjustments, restatements or other revisions to our previously issued financial statements are required.

On October 5, 2016, October 27, 2016, and November 18, 2016, three putative securities class action complaints were filed in the United States District Court for the District of New Jersey, naming us and certain of our current and former officers as defendants. In an order dated February 3, 2017, the United States District Court for the District of New Jersey consolidated the three putative securities class actions into a single action and appointed lead plaintiffs and lead counsel. On April 7, 2017, the lead plaintiffs filed a consolidated amended complaint on behalf of a putative class of stockholders who purchased our common stock during the period between February 27, 2015 and September 29, 2016, naming us and certain of our current and former officers as defendants and alleging violations of the Exchange Act, based on allegedly false or misleading statements related to potential violations of the FCPA, our business, prospects and operations, and the effectiveness of our internal controls over financial reporting and our disclosure controls and procedures. The lead plaintiffs seek an award of compensatory damages, among other relief, and their reasonable costs and expenses, including attorneys' fees. Under a stipulation filed by the parties on February 23, 2017, defendants filed motions to dismiss the consolidated amended complaint on June 6, 2017, plaintiffs filed an opposition brief on July 21, 2017 responding to defendants' motions to dismiss, and defendants have until September 5, 2017 to file reply briefs in further support of their motions to dismiss.

On October 31, 2016, November 15, 2016, and November 18, 2016, three putative shareholder derivative complaints were filed in New Jersey Superior Court, Bergen County, naming us, all of our then current directors and certain of our current and former officers as defendants. On January 24, 2017, the New Jersey Superior Court, Bergen County, consolidated the three putative shareholder derivative actions filed in that court into a single action and appointed lead plaintiff and lead counsel. The complaints assert claims for breach of fiduciary duty, corporate waste, unjust enrichment, abuse of control, mismanagement, and/or insider selling by defendants. On March 16, 2017, the parties filed a stipulation deferring all further proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 26, 2017, in lieu of ordering the stipulation filed by the parties, the New Jersey Superior Court deferred further proceedings by dismissing the consolidated putative shareholder derivative litigation without prejudice but permitting the parties to file a motion to vacate the dismissal in the future. On February 22, 2017, a fourth putative shareholder derivative complaint asserting similar claims was filed in the United States District Court for the District of New Jersey, naming us and certain of our directors as defendants. On April 5, 2017, the United States District Court for the District of New Jersey entered an order staying all proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 7, 2017, a fifth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 10(b) of the Exchange Act against the individual defendants. On May 10, 2017, a sixth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in

the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 14(a) of the Exchange Act against the individual defendants. In an order dated June 20, 2017, the United States District Court for the District of New Jersey consolidated the three putative shareholder derivative actions filed in that court into a single action, appointed lead plaintiff and lead counsel, and stayed all further proceedings pending a final, non-appealable ruling on the motion to dismiss the consolidated putative securities class action. All of the putative shareholder derivative complaints allege among other things that certain of our public disclosures were false and misleading by failing to disclose that payments allegedly in violation of the FCPA had been made and by asserting that management had determined that our internal controls were effective. The plaintiffs seek awards of compensatory damages and restitution to us as a result of the alleged violations and their costs and attorneys' fees, experts' fees, and other litigation expenses, among other relief.

We are presently unable to predict the duration, scope or result of the Audit Committee's investigation, any investigations by the DOJ or the SEC, the consolidated putative securities class action, the putative shareholder derivative actions or any other lawsuits. The DOJ and the SEC have a broad range of civil and criminal sanctions under the FCPA and other laws and

Table of Contents

regulations including injunctive relief, disgorgement, fines, penalties, modifications to business practices, including the termination or modification of existing business relationships, the imposition of compliance programs and the retention of a monitor to oversee compliance with the FCPA. In addition, the DOJ and the SEC could bring enforcement actions against the Company or individuals, including former members of senior management. Such actions, if brought, could result in dispositions, judgments, settlements, fines, injunctions, cease and desist orders, debarment or other civil or criminal penalties against the Company or such individuals.

We expect to incur additional expenses related to remedial measures, and may incur additional expenses related to fines. The imposition of any sanctions or the implementation of remedial measures could have a material adverse effect on our business, annual and interim results of operations, cash flows and financial condition. Furthermore, while the Company intends to defend the lawsuits vigorously, these lawsuits and any other related lawsuits are subject to inherent uncertainties, the actual cost of such litigation will depend upon many unknown factors and the outcome of the litigation is necessarily uncertain.

We are also involved in various claims and legal actions arising in the ordinary course of business. In the opinion of our management, the outcome of such claims and legal actions, if decided adversely, is not expected to have a material adverse effect on our quarterly or annual operating results, cash flows or consolidated financial position.

Item 1A. Risk Factors

The risk factors disclosed in Part I, Item 1A, Risk Factors, in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 filed with the Securities and Exchange Commission on March 1, 2017 continue to apply to our business.

The information presented below amends the risk factor of the same heading in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 and should be read in conjunction with the other risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

The outcome of the internal investigation being conducted under the oversight of our Audit Committee of possible violations of the Foreign Corrupt Practices Act, or FCPA, and similar laws and related litigation could have a material adverse effect on our business, annual and interim results of operations, cash flows and financial condition.

We are conducting an internal investigation focused on whether certain payments relating to Company-owned facilities in India were made improperly and in possible violation of the FCPA and other applicable laws. In September 2016, we voluntarily notified the DOJ and the SEC, and are cooperating fully with both agencies. The investigation is being conducted under the oversight of the Audit Committee, with the assistance of outside counsel. The investigation is also examining various other payments made in small amounts in India and elsewhere that may not have complied with Company policy or applicable law. We expect to incur additional expenses in connection with conducting the internal investigation.

On October 5, 2016, October 27, 2016, and November 18, 2016, three putative securities class action complaints were filed in the United States District Court for the District of New Jersey, naming us and certain of our current and former officers as defendants. In an order dated February 3, 2017, the United States District Court for the District of New Jersey consolidated the three putative securities class actions into a single action and appointed lead plaintiffs and lead counsel. On April 7, 2017, the lead plaintiffs filed a consolidated amended complaint on behalf of a putative class of stockholders who purchased our common stock during the period between February 27, 2015 and September 29, 2016, naming us and certain of our current and former officers as defendants and alleging violations of the Exchange Act, based on allegedly false or misleading statements related to potential violations of the FCPA, our business, prospects and operations, and the effectiveness of our internal controls over financial reporting and our

disclosure controls and procedures. The lead plaintiffs seek an award of compensatory damages, among other relief, and their reasonable costs and expenses, including attorneys' fees. Under a stipulation filed by the parties on February 23, 2017, defendants filed motions to dismiss the consolidated amended complaint on June 6, 2017, plaintiffs filed an opposition brief on July 21, 2017 responding to defendants' motions to dismiss, and defendants have until September 5, 2017 to file reply briefs in further support of their motions to dismiss.

On October 31, 2016, November 15, 2016, and November 18, 2016, three putative shareholder derivative complaints were filed in New Jersey Superior Court, Bergen County, naming us, all of our then current directors and certain of our current and former officers as defendants. On January 24, 2017, the New Jersey Superior Court, Bergen County, consolidated the three putative shareholder derivative actions filed in that court into a single action and appointed lead plaintiff and lead counsel. The complaints assert claims for breach of fiduciary duty, corporate waste, unjust enrichment, abuse of control, mismanagement, and/or insider selling by defendants. On March 16, 2017, the parties filed a stipulation deferring all further proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 26, 2017, in lieu of ordering the stipulation filed by the parties, the New Jersey Superior Court deferred further

proceedings by dismissing the consolidated putative shareholder derivative litigation without prejudice but permitting the parties to file a motion to vacate the dismissal in the future. On February 22, 2017, a fourth putative shareholder derivative complaint asserting similar claims was filed in the United States District Court for the District of New Jersey, naming us and certain of our directors as defendants. On April 5, 2017, the United States District Court for the District of New Jersey entered an order staying all proceedings pending a final, non-appealable ruling on the then anticipated motion to dismiss the consolidated putative securities class action. On April 7, 2017, a fifth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 10(b) of the Exchange Act against the individual defendants. On May 10, 2017, a sixth putative shareholder derivative complaint was filed in the United States District Court for the District of New Jersey, naming us, certain of our directors, and certain of our current and former officers as defendants. The complaint in that action asserts claims similar to those in the previously-filed putative shareholder derivative actions, but also adds a claim for violations of Section 14(a) of the Exchange Act against the individual defendants. In an order dated June 20, 2017, the United States District Court for the District of New Jersey consolidated the three putative shareholder derivative actions filed in that court into a single action, appointed lead plaintiff and lead counsel, and stayed all further proceedings pending a final, non-appealable ruling on the motion to dismiss the consolidated putative securities class action. All of the putative shareholder derivative complaints allege among other things that certain of our public disclosures were false and misleading by failing to disclose that payments allegedly in violation of the FCPA had been made and by asserting that management had determined that our internal controls were effective. The plaintiffs seek awards of compensatory damages and restitution to us as a result of the alleged violations and their costs and attorneys' fees, experts' fees, and other litigation expenses, among other relief.

We are presently unable to predict the duration, scope or result of the internal investigation, the related consolidated putative securities class action, the consolidated putative shareholder derivative action or any other related lawsuit, and any investigations by the DOJ or the SEC, including whether either agency will commence any legal action.

The DOJ and the SEC have a broad range of civil and criminal sanctions under the FCPA and other laws and regulations including injunctive relief, disgorgement, fines, penalties, the imposition of revised compliance programs and the retention of a monitor to oversee compliance with the FCPA. In addition, the DOJ and the SEC could bring enforcement actions against the Company or individuals, including former members of senior management. Such actions, if brought, could result in dispositions, judgments, settlements, fines, injunctions, cease and desist orders, debarment or other civil or criminal penalties against the Company or such individuals. The imposition of any sanctions, fines or the implementation of remedial measures could have a material adverse effect on our business, annual and interim results of operations, cash flows and financial condition. We could also incur additional expenses related to remedial measures, including those that we are implementing in response to our conclusion that our internal control over financial reporting and our disclosure controls and procedures are not effective.

The outcome of the putative class action litigation, derivative lawsuit, or any other litigation is necessarily uncertain. We could be forced to expend significant resources in the defense of these lawsuits or future ones, and we may not prevail. The imposition of any sanctions, remedial measures or judgments against us could have a material adverse effect on our business, results of operations and financial condition.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
Issuer Repurchases of Equity Securities

Effective March 1, 2017, the Board of Directors approved the termination of the stock repurchase program then in effect and approved a new stock repurchase program. The stock repurchase program allows for the repurchase of \$3.5 billion of our outstanding shares of Class A common stock, excluding fees and expenses, through December 31, 2019.

Under the stock repurchase program, the Company is authorized to repurchase its Class A common stock through open market purchases, including under a trading plan adopted pursuant to Rule 10b5-1 of the Exchange Act, or in private transactions, in accordance with applicable federal securities laws. The timing of repurchases and the exact number of shares to be purchased are determined by the Company's management, in its discretion, or pursuant to a Rule 10b5-1 trading plan, and will depend upon market conditions and other factors.

We did not repurchase any shares of our Class A common stock under our stock repurchase program during the three months ended June 30, 2017. As of June 30, 2017, the remaining available balance under the Board of Directors' authorized stock repurchase program was \$2.0 billion.

Table of Contents

During the three months ended June 30, 2017, we purchased shares in connection with our stock-based compensation plans, whereby shares of our common stock were tendered by employees for payment of applicable statutory tax withholdings. We also repurchased a limited number of shares from employees at the repurchase date market price. Combined, for the three months ended June 30, 2017, such repurchases totaled 446,346 shares at an aggregate cost of \$30 million.
