**Item 8.01. Other Events**

Magellan Health Services, Inc. (the Company) clarified that the preliminary 2006 outlook range of \$1.40 to \$1.70 of earnings per diluted share that it announced in its third quarter 2005 earnings press release on October 27, 2005 includes the preliminary estimated impact of SFAS 123R. Such impact, both before and net of taxes, is estimated to be \$.18 per diluted share. There is no difference between the estimated pre-tax and post-tax amounts since a substantial portion of the Company's stock compensation expense is not tax deductible on its income statement under its current tax structure. Approximately 38.2 million diluted shares were used in calculating the preliminary 2006 outlook. The 2006 outlook range would be \$1.58 to \$1.88 of earnings per diluted share if the estimated impact of SFAS 123R were not included.

This outlook is preliminary in nature and the Company anticipates providing full guidance for 2006 in December of 2005.

Any forward-looking statements made in this document are qualified in their entirety by the more complete discussion of risks set forth in the section entitled "Cautionary Statements" in Magellan's Annual Report on Form 10-K for the year ended December 31, 2004 and in the section entitled "Forward-Looking Statements" in Magellan's Form 10-Q for the quarter ended September 30, 2005 filed on October 27, 2005 with the Securities and Exchange Commission, each of which is currently or will be posted on the Company's Web site, and the section entitled "Risk Factors" in the prospectus and prospectus supplement filed with the Securities and Exchange Commission in connection with the May 2005 secondary offering of Magellan common stock by certain shareholders, also posted on the Company's Web site.
