Notes to Investment Portfolio:

* Security Valuation:

Debt securities generally are valued by pricing services approved by the Fund's Board of Trustees, based upon market transactions for normal, institutional-size trading units of similar securities. The services may use various pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data, as well as broker quotes. Debt securities for which quotations are readily available are valued at an over-the-counter or exchange bid quotation. Certain debt securities, which tend to be more thinly traded and of lesser quality, are priced based on fundamental analysis of the financial condition of the issuer and the estimated value of any collateral. Valuations developed through pricing techniques may vary from the actual amounts realized upon sale of the securities, and the potential variation may be greater for those securities valued using fundamental analysis.

Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Investments in other investment companies are valued at net asset value.

Futures contracts are valued at the settlement price established each day by the board of trade or exchange on which they are traded.

Investments for which market quotations are not readily available, or have quotations which management believes are not appropriate, are valued at fair value as determined in good faith under consistently applied procedures established by and under the general supervision of the Board of Trustees. If a security is valued at a fair value, such value is likely to be different from the last quoted market price for the security.

Swap transactions such as interest rate, total return, index or currency swaps, consistent with their investment objective and policies to obtain a desired return at a lower cost than if the Funds had invested directly in the asset that yielded the desired return. Swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest or total return throughout the lives of the agreements. The interest to be paid or received on interest rate swaps is included in net realized gain/(loss) on investments. Unrealized gains are reported as an asset and unrealized losses are reported as a liability on the Statement of net assets. A realized gain or loss is recorded upon termination of swap agreements and is equal to the difference between the Fund's basis in the swap and the proceeds from (or cost of) the closing transaction. Swap agreements are stated at fair value. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller.
