UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2008

or

o Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-24649

REPUBLIC BANCORP, INC.

(Exact name of registrant as specified in its charter)

Kentucky

61-0862051

Washington, D.C. 20549

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

(State of other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

601 West Market Street, Louisville, Kentucky
(Address of principal executive offices)

40202

(Zip Code)

(502) 584-3600

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

The number of shares outstanding of the registrant's Class A Common Stock and Class B Common Stock, as of July 31, 2008, was 18,234,064 and 2,338,725, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS JUNE 30, 2008 AND 2007 (UNAUDITED) AND DECEMBER 31, 2007

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation The consolidated financial statements include the accounts of Republic Bancorp, Inc. (the Parent Company) and its wholly-owned subsidiaries: Republic Bank & Trust Company (RB&T) and Republic Bank (collectively referred together with RB&T as the Bank), Republic Funding Company and Republic Invest Co. Republic Invest Co. includes its subsidiary, Republic Capital LLC. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust (RBCT) is a Delaware statutory business trust that is a wholly-owned, unconsolidated finance subsidiary of Republic Bancorp, Inc. All companies are collectively referred to as Republic or the Company. All significant intercompany balances and transactions are eliminated in consolidation.

Republic currently operates 44 banking centers, primarily in the retail banking industry, and conducts its operations predominately in metropolitan Louisville, Kentucky, central Kentucky, northern Kentucky, southern Indiana, metropolitan Tampa, Florida and through an Internet banking delivery channel. Republic s consolidated results of operations are dependent upon net interest income, which represents the difference between the interest income and fees on interest-earning assets and the interest expense on interest-bearing liabilities. Principal interest-earning assets represent securities and real estate mortgage, commercial and consumer loans. Interest-bearing liabilities primarily consist of interest-bearing deposit accounts, as well as short-term and long-term borrowing sources.

Other sources of banking income include service charges on deposit accounts, debit card interchange income, title insurance commissions, fees charged to customers for trust services and revenue generated from Mortgage Banking activities, which represents both the origination and sale of loans in the secondary market and the servicing of loans for others.

Republic s operating expenses consist primarily of salaries and employee benefits, occupancy and equipment expenses, communication and transportation costs, marketing and development expenses, bank franchise tax expense, data processing, debit card interchange expense and other general and administrative costs. Republic s results of operations are significantly impacted by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory agencies.

RB&T, though its Tax Refund Solutions (TRS) business segment, is one of a limited number of financial institutions which facilitate the payment of federal and state tax refunds through tax-preparers located throughout the U.S. Substantially all of the business generated by TRS occurs in the first quarter of the year. The Company facilitates the payment of these tax refunds through three primary products: Refund Anticipation Loans (RALs), Electronic Refund Checks (ERCs) and Electronic Refund Deposits (ERDs).

RALs are short-term consumer loans offered to taxpayers, secured by their anticipated tax refund, which represents the source of repayment. At the request of the taxpayer, the refund claim is paid by the Internal Revenue Service (IRS) to the Company once the tax return has been processed. Funds received from the IRS above the sum of the RAL less associated fees are remitted to the taxpayer by the Company. The funds advanced by the Company are generally repaid by the IRS within two weeks. The fees earned on RALs are reported in interest income under the

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

line item Loans, including fees.

ERCs/ERDs are products whereby a tax refund is issued to the taxpayer after RB&T has received the refund from the federal or state government. Fees earned on ERCs/ERDs are reported in non interest income under the line item Electronic Refund Check fees.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Operating results for three and six months ended June 30, 2008 are not necessarily indicative of the results that may be expected for the year

Table of Contents

ending December 31, 2008. For further information, refer to the consolidated financial statements and footnotes thereto included in Republic's Form 10-K for the year ended December 31, 2007.

Securitization The Company utilized a securitization structure to fund, over a four week period, a portion of the RALs originated during the first quarters of 2008 and 2007. The securitization consisted of \$1.1 billion and \$350 million of loans originated and sold during January and February of 2008 and 2007, respectively. The Company's continuing involvement in loans sold into the securitization was limited to only servicing of the RALs. Compensation for servicing of the RALs securitized was not contingent upon performance of the RALs securitized.

Generally, from mid January to the end of February of each year, RALs which upon origination meet certain underwriting criteria related to refund amount and Earned Income Tax Credit amount are classified as loans held for sale and sold into the securitization. All other RALs originated are retained by the Company. There are no RALs held for sale as of any quarter end. The Company retains a related residual value in the securitization, which is classified on the balance sheet as a trading security. The initial residual interest has a weighted average life of approximately one month, and as such, substantially all of its cash flows are received by the end of the first quarter. The disposition of the remaining anticipated cash flows is expected to occur within the remainder of the calendar year. At its initial valuation, and on a quarterly basis thereafter, the Company adjusts the carrying amount of the residual value to its fair value, which is determined based on expected future cash flows and is significantly influenced by the estimated credit losses of the underlying RALs.

The Company concluded that the transaction was a sale as defined in Statement of Financial Accounting Standards (SFAS) 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*. This conclusion was based on, among other things, legal isolation of assets, the ability of the purchaser to pledge or sell the assets, and the absence of a right or obligation of the Company to repurchase the financial assets.

See the sections titled Business Segment Composition and Results of Operations in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loans Losses, Footnote 9 Segment Information and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

Recently Issued Accounting Pronouncements In March 2008, the FASB issued SFAS 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133. SFAS 161 requires enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related items are accounted for under SFAS 133 and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The new standard is effective for the Company on January 1, 2009. The Company is currently evaluating the impact of adopting SFAS 161 on the consolidated financial statements.

Reclassifications Certain amounts presented in prior periods have been reclassified to conform to the current period presentation.

Table of Contents**2 SECURITIES****Trading securities:**

Trading securities consisting of residual interest in the RAL securitization totaled \$177,000 and \$0 at June 30, 2008 and December 31, 2007.

Other-than-temporary Impairment Analysis

Unrealized losses for all investment securities are reviewed to determine whether the losses are other-than-temporary. Investment securities are evaluated for other-than-temporary impairment on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value below amortized cost is other-than-temporary. In conducting this assessment, the Company evaluates a number of factors including, but not limited to:

- How much fair value has declined below amortized cost;
- How long the decline in fair value has existed;

- The financial condition of the issuer;
- Significant rating agency changes on the issuer; and
- The Company's intent and ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.

The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value are not necessarily favorable, or that there is a lack of evidence to support a realizable

Table of Contents

value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

Nationally, residential real estate values declined significantly during the first six months of 2008. These declines in value, coupled with the reduced ability of homeowners to refinance or repay their residential real estate obligations, have led to elevated delinquencies and losses in residential real estate loans. Many of these loans have previously been securitized and sold to investors as non agency mortgage backed or other non agency mortgage-related securities. The Company currently owns five non agency mortgage backed and other non agency mortgage-related securities with a carrying value of \$28 million at June 30, 2008. These securities are not guaranteed by government agencies. Approximately \$21 million (*Securities 1 through 4 in the table below*) of these securities are backed by Alternative A first lien mortgage loans. The remaining \$7 million (*Security 5 in the table below*) represents an asset backed security with an insurance wrap or guarantee. Due to current market conditions, all of these assets are extremely illiquid, and as such, the fair value is difficult to estimate due to the volatility in the mortgage industry. The average life of these securities is currently estimated to be approximately five years.

Prior to the second quarter of 2008, unrealized losses on the Company's non agency mortgage backed securities and other non agency mortgage related securities were not recognized into income because the bonds were deemed to be of sufficient credit quality (rated A+, Aa1 or higher) and the Company had the intent and ability to hold them for the foreseeable future. The Company had evaluated the performance of the loans underlying these securities and concluded it would continue to receive the future expected cash flows of these securities in accordance with their original terms. As such, prior to the second quarter of 2008, the Company concluded that the fair value of all non agency mortgage backed securities and other non agency mortgage related securities would recover as the securities approach maturity. During the second quarter of 2008, however, the Company recorded an other-than-temporary-impairment totaling \$3.4 million for two of its available for sale non agency mortgage related securities. These securities are listed as Security 2 and Security 5 in the table below.

As a result of the impairment charges noted above, an unrealized loss totaling \$3.4 million for Security 2 and Security 5 was transferred from accumulated other comprehensive loss to an immediate reduction of earnings classified in net loss on sales, calls and impairments of securities in the consolidated statements of operations.

In determining that Security 2 was other-than-temporarily impaired, the Company gave considerable weight to the significance of the downgrade in the security by S&P in June. The significance of the downgrade raised doubt about the ability of the Company to continue to collect the principal and interest of the security in accordance with its original terms. In evaluating Security 5, the Company gave considerable weight to the rating downgrade and subsequent withdrawal of the security's rating by Fitch in June. In addition, the Company also gave consideration to the continued deterioration in the financial condition of the insurer providing the insurance wrap on the security.

For securities 1, 3 and 4 in the table below, unrealized losses were not recognized into income because the bonds were of sufficient credit quality (Aa1 or higher) and the Company has the intent and ability to hold for the foreseeable future. The Company also evaluated the performance of the loans underlying these securities and concluded it would continue to receive the future expected cash flows of these securities in accordance with their original terms. As such, the Company concluded that the fair value of securities 1, 3 and 4 in the table below would recover as the securities approach maturity.

Table of Contents

Additional detail for non agency mortgage backed and other non agency mortgage-related securities as of June 30, 2008 follows:

(in thousands)	Carrying Amount	Estimated Fair Value	Unrealized Loss	Ratings		
				S&P	Fitch	Moody's
Security 1	\$ 11,380	\$ 6,280	\$ (5,100)	AAA		Aa1(1)(2)
Security 2	1,296	1,296		BBB-		Aaa(1)(2)
Security 3	5,433	4,036	(1,397)	AAA	AAA	(2)
Security 4	2,473	1,579	(894)	AAA	AAA	(2)
Security 5	7,363	7,363		AA	(3)	
Total	\$ 27,945	\$ 20,554	\$ (7,391)			

(1) -Rating is currently under review by Moody's.

(2) - Security is backed by Alternative A first lien mortgage loans.

(3) -Rating was downgraded to A+ by Fitch in April 2008 and withdrawn in June 2008.

During the first quarter of 2008, the Company determined that its Federal Home Loan Mortgage Corporation (FHLMC) preferred stock investment, with an aggregate carrying value at the time of \$2 million, was other-than-temporarily impaired and recorded an impairment charge of \$680,000. This investment represents approximately 40,000 shares of adjustable rate investment grade preferred stock with a variable coupon rate of 4.00% and tax equivalent investment yield of 5.51%. While the Company's intent is to hold the FHLMC preferred stock indefinitely for interest rate risk protection, in accordance with SFAS 115, *Accounting for Certain Investments in Debt and Equity Securities*, the Company wrote the security down to its market value through the income statement because it has no final maturity and the Company cannot estimate if and when it will recover in market value. At June 30, 2008 the market value of the FHLMC preferred stock approximated its carrying value. Subsequent to June 30, 2008, however, the fair market value of the security declined significantly below the Company's carrying value. The significant decline in value was due to the uncertainty surrounding the on-going viability of FHLMC. If the fair value does not recover significantly prior to September 30, 2008, the Company will record another impairment charge during the third quarter. The Company believes this impairment charge could range from \$400,000 to \$800,000 based on current market conditions. The overall magnitude of the impairment charge could be significantly influenced positively or negatively by the outcome of new or potential legislation.

RAL Loss Reserves and Provision for Loan Losses:

Substantially all RALs issued by the Company each year are made during the first quarter. Losses associated with RALs result from the IRS not remitting funds associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return and tax return fraud. At March 31st of each year, with adjustments each quarter end thereafter, the Company reserves for its estimated RAL losses for the year based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company applies its loss estimates to both RALs retained on balance sheet and to securitized RALs. During both 2008 and 2007, a significant portion of these loss reserves were included as a reduction to Net RAL securitization income because they represented the loss of future expected cash flows from the Company's residual interest.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

As of June 30, 2008, \$9.4 million of total RALs retained on balance sheet remained uncollected compared to \$6.3 million at June 30, 2007, representing 1.38% and 2.76% of total RALs originated and retained on balance sheet during the respective tax years by the Company. At June 30, 2008, the Company estimated that 1.31% of RALs originated and retained on balance sheet by the Company during the current tax season were uncollectible compared to 1.61% during 2007. As a result of these estimates, the Company recorded a net provision for loan losses of \$8.2 million during the first six months of 2008 compared to \$3.4 million during the first six months of 2007. Approximately \$772,000 of these loan loss provisions were recorded during the second quarter of 2008 compared to a credit of \$24,000 during the second quarter of 2007. The decrease in RAL losses as a percent of total RALs retained on balance sheet from year to year is attributable primarily to revised underwriting standards and a reduction in known fraud resulting from improved fraud detection techniques utilized by the Company.

Table of Contents

As of June 30, 2008, \$7.2 million of securitized RALs remained uncollected compared to \$2.5 million at June 30, 2007, representing 0.65% and 0.72% of total securitized RALs during the respective tax years by the Company. At June 30, 2008 in estimating the Company's residual interest for securitized RALs, which is classified as a trading security on the Company's balance sheet, the Company estimated that 0.64% of total RALs securitized by the Company during the current year tax season were uncollectible compared to 0.70% during 2007. As a result of this estimate, the Company recorded a net reduction to Net RAL securitization income of \$6.8 million for the first six months of 2008 compared to \$2.0 million for the first six months of 2007. The Company recorded a net credit to Net RAL securitization income of \$343,000 and \$644,000 during the second quarters of 2008 and 2007. As with the RALs retained on balance sheet, the decrease in securitized RAL losses as a percent of total loans securitized from year to year is attributable primarily to revised underwriting standards and a reduction in known fraud resulting from improved fraud detection techniques utilized by the Company.

The overall earnings of the TRS segment are highly dependent upon the Company's loss estimates for RALs retained on balance sheet and securitized RALs. The Company believes that based on information currently available, it has provided the appropriate amount of reserves for losses associated with RALs. The possibility remains, however, that payments from the IRS throughout the remainder of the year could differ from what the Company estimated during the first six months of the year causing an adjustment to the Company's previous allowance for loan losses and residual interest trading security. The following tables illustrates the effect on the 2008 provision for loan losses of TRS and the 2008 net RAL securitization income of TRS if final losses of RALs retained on balance sheet and RALs securitized by the Company differ from the Company's current estimates by as much as 25 basis points higher or lower (not exceeding the current uncollected percentage):

As of June 30, 2008 (dollars in thousands)

Total RALs retained on balance sheet during the current year tax season:	\$	682,104

Table of Contents**5 FEDERAL HOME LOAN BANK (FHLB) ADVANCES**

(in thousands)	June 30, 2008	December 31, 2007
FHLB convertible fixed interest rate advances with a weighted average interest rate of 4.51%(1)	\$ 150,000	\$ 150,000
Overnight FHLB advances with an interest rate of 2.16%	153,500	35,000
FHLB fixed interest rate advances with a weighted average interest rate of 3.91% due through 2035	446,337	293,550
Total FHLB advances	\$ 749,837	\$ 478,550

(1) Represents putable advances with the FHLB. These advances have original fixed rate periods ranging from one to five years with original maturities ranging from three to ten years if not put back to the Company earlier by the FHLB. At the end of their respective fixed rate periods and on a quarterly basis thereafter, the FHLB has the right to require payoff of the advances by the Company at no penalty. During the first quarter of 2007, the Company entered into \$100 million of putable advances with a final maturity of 10 years and a fixed rate period of 3 years. Based on market conditions at this time, the Company does not believe that any of its putable advances are likely to be put back to the Company in the short-term by the FHLB.

Each FHLB advance is payable at its maturity date, with a prepayment penalty for fixed rate advances paid off earlier than maturity. FHLB advances are collateralized by a blanket pledge of eligible real estate loans. At June 30, 2008, Republic had available collateral to borrow an additional \$200 million from the FHLB. In addition to its borrowing line with the FHLB, Republic also had unsecured lines of credit totaling \$227 million available through various other financial institutions.

Table of Contents

Aggregate future principal payments on FHLB advances, based on contractual maturity dates are detailed below:

Year	(in thousands)	
2008	\$	254,500
2009		107,000
2010		92,370
2011		100,000
2012		70,000
Thereafter		125,967
Total	\$	749,837

The following table illustrates real estate loans pledged to collateralize advances and letters of credit from the FHLB:

(in thousands)	June 30, 2008	December 31, 2007
First lien, single family residential	\$ 829,000	\$ 854,000
Home equity lines of credit	116,000	114,000
Multi-family, commercial real estate	17,000	29,000

6 FAIR VALUE

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS 157, *Fair Value Measurements*. SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. SFAS 157 describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that an entity has the ability to access as of the measurement date, or observable inputs.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect an entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. When that occurs, the Company classifies the fair value hierarchy on the lowest level of input that is significant to the fair value measurement. The Company uses the following methods and significant assumptions to estimate fair value:

Trading securities: The Company's residual interest for securitized RALs is classified as a trading security. The fair value of the trading security is determined by analyzing expected future cashflows and is significantly influenced by the anticipated credit losses of the underlying RALs. Factors that the Company applies in determining the fair value include current year and historical funding patterns, as well as, information received from the IRS on current year payment processing.

Securities available for sale: For all securities available for sale, excluding non agency mortgage backed and other non agency mortgage related securities, fair value is typically determined by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on

Table of Contents

the securities' relationship to other benchmark quoted securities. Matrix pricing relies on the securities' relationship to similarly traded securities, benchmark curves, and the benchmarking of like securities. Matrix pricing utilizes observable market inputs such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic events. In instances where broker quotes are used, these quotes are obtained from market makers or broker-dealers recognized to be market participants. These securities are classified as Level 2 in the fair value hierarchy.

The Company currently owns five non agency mortgage backed and other non agency mortgage-related securities with a carrying value of \$28 million and a fair value of \$21 million at June 30, 2008. These securities are not guaranteed by government agencies. Approximately \$21 million of these securities are backed by Alternative A first lien mortgage loans. The remaining \$7 million represents an asset backed security with an insurance wrap or guarantee. Due to current market conditions, all of these assets are extremely illiquid, and as such, the fair value is difficult to estimate due to the volatility in the mortgage industry. The average life of these securities is currently estimated to be approximately five years. These securities are classified as Level 3 in the fair value hierarchy.

Derivative instruments: Mortgage Banking derivatives used in the ordinary course of business consist of mandatory forward sales contracts (forward contracts) and rate lock loan commitments. Forward contracts represent future commitments to deliver loans at a specified price and date and are used to manage interest rate risk on loan commitments and mortgage loans held for sale. Rate lock commitments represent commitments to fund loans at a specific rate. These derivatives involve underlying items, such as interest rates, and are designed to transfer risk. Substantially all of these instruments expire within 90 days from the date of issuance. Notional amounts are amounts on which calculations and payments are based, but which do not represent credit exposure, as credit exposure is limited to the amounts required to be received or paid. The fair value of our derivative instruments is primarily measured by obtaining pricing from broker-dealers recognized to be market participants. The pricing is derived from market observable inputs that can generally be verified and do not typically involve significant judgment by the Company.

Mortgage loans held for sale: The fair value of mortgage loans held for sale is determined using quoted secondary-market prices. The purchaser provides the Company with a commitment to purchase the loan at the origination price. This commitment qualifies as an exit price under SFAS 157 and therefore is classified as Level 1 in the fair value hierarchy. If no such quoted price exists, the fair value of a loan would be determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan.

Impaired Loans: Impaired loans are evaluated at the time the loan is identified as impaired and are recorded at the lower of cost or market value. Market value is measured based on the value of the collateral securing these loans generally determined based on appraisals by qualified licensed appraisers. If an appraisal is not available, the fair value of the collateral may be determined by using a cash flow analysis, a broker's opinion of value, the net present value of future cash flows, or an observable market price from an active market. Fair value on non-real estate collateral loans is determined using similar methods. In addition, business equipment may be valued by using the net book value from the business' financial statements. Impaired loans are evaluated quarterly for impairment.

Table of Contents

Items measured at fair value on a recurring basis, for which the Company has elected the fair value option, are summarized below:

(in thousands)	Quoted Prices in Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2008
Trading securities	\$	\$	\$ 177	\$ 177
Securities available for sale		438,720	20,554	459,274
Forward contracts	15,640			15,640
Rate lock loan commitments		23,214		23,214
Mortgage loans held for sale	11,621			11,621

Rollforwards of activity for the Company's Significant Unobservable Inputs (Level 3), follows:

Trading Securities - Residual interest in the RAL securitization

(in thousands)	Three Months Ended June 30, 2008	Six Months Ended June 30, 2008
Balance, beginning of period	\$ 2,074	\$ 4,560

Retained securitization residual		102,059
Paydown of securitization residual	(2,240)	(106,442)
Balance, end of period	\$ 177	\$ 177

Securities available for Sale - Non agency mortgage backed and other non agency mortgage-related securities

(in thousands)	Three and Six Months Ended June 30, 2008
Balance, beginning of period	\$
Transfer into level 3	22,085
Net unrealized gain / (loss)	70
Premium amortization	(33)
Principal paydowns	(1,568)
Balance, end of period	\$ 20,554

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The Company recorded a realized impairment loss in the level 3 non agency mortgage backed and other non agency mortgage related securities totaling \$3.4 during the second quarter of 2008.

Table of Contents

Items measured at fair value on a non-recurring basis are summarized below:

(in thousands)	Quoted Prices in Active Markets for Identical Assets and Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2008
Impaired loans	\$	\$	\$ 10,696	\$ 10,696

Impaired loans had a carrying amount of \$15.1 million, with a valuation allowance of \$4.4 million, resulting in an additional provision for loan losses of \$4.4 million for the first six months of 2008.

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. The standard provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. The new standard was effective for the Company on January 1, 2008. The Company elected the fair value option for all loans held for sale originated after December 31, 2007.

7 OFF BALANCE SHEET RISKS, COMMITMENTS AND CONTINGENT LIABILITIES

Republic is a party to financial instruments with off balance sheet risk in the normal course of business in order to meet the financing needs of its customers. These financial instruments primarily include commitments to extend credit and standby letters of credit. The contract or notional amounts of these instruments reflect the potential future obligations of Republic pursuant to those financial instruments. Creditworthiness for all instruments is evaluated on a case by case basis in accordance with Republic's credit policies. Collateral from the customer may be required based on the Company's credit evaluation of the customer and may include business assets of commercial customers, as well as personal property and real estate of individual customers or guarantors.

Republic also extends binding commitments to customers and prospective customers. Such commitments assure the borrower of financing for a specified period of time at a specified rate. The risk to Republic under such loan commitments is limited by the terms of the contracts. For example, Republic may not be obligated to advance funds if the customer's financial condition deteriorates or if the customer fails to meet specific covenants. An approved but unfunded loan commitment represents a potential credit risk once the funds are advanced to the customer. Unfunded loan commitments also represent liquidity risk since the customer may demand immediate cash that would require funding and interest rate risk as market interest rates may rise above the rate committed. In addition, since a portion of these loan commitments normally expire unused, the total amount of outstanding commitments at any point in time may not require future funding.

As of June 30, 2008, exclusive of Mortgage Banking loan commitments discussed below, Republic had outstanding loan commitments of \$444 million, which included unfunded home equity lines of credit totaling \$328 million. At December 31, 2007, Republic had outstanding loan commitments of \$487 million, which included unfunded home equity lines of credit totaling \$326 million. These commitments generally have variable rates.

Standby letters of credit are conditional commitments issued by Republic to guarantee the performance of a customer to a third party. The terms and risk of loss involved in issuing standby letters of credit are similar to those involved in issuing loan commitments and extending credit. Commitments outstanding under standby letters of credit totaled \$23 million and \$38 million at June 30, 2008 and December 31, 2007.

At June 30, 2008 and December 31, 2007, Republic had a \$12 million letter of credit from the FHLB issued on behalf of one RB&T client. This letter of credit was used as a credit enhancement for a client bond offering and reduced RB&T s

Table of Contents

available borrowing line at the FHLB. The Company uses a blanket pledge of eligible real estate loans to secure the letter of credit.

On November 5, 2007, the SEC issued Staff Accounting Bulletin (SAB) No. 109, *Written Loan Commitments Recorded at Fair Value through Earnings*. Previously, SAB 105, *Application of Accounting Principles to Loan Commitments*, stated that in measuring the fair value of a derivative loan commitment, a company should not incorporate the expected net future cash flows related to the associated servicing of the loan. SAB 109 supersedes SAB 105 and indicates that the expected net future cash flows related to the associated servicing of the loan should be included in measuring fair value for all written loan commitments that are accounted for at fair value through earnings. SAB 105 also indicated that internally-developed intangible assets should not be recorded as part of the fair value of a derivative loan commitment, and SAB 109 retains that view. The Company also elected to adopt Staff Accounting Bulletin SAB 109 which effectively causes Mortgage Banking revenue to be recognized on the date the Company enters into the rate lock commitment with the customer.

With the adoption of SAB 109 and SFAS 159 during 2008, the Company recognized \$300,000 in additional Mortgage Banking income related to the Company's mandatory forward sales contracts and rate lock loan commitments.

Mortgage Banking derivatives used in the ordinary course of business consist of mandatory forward sales contracts and rate lock loan commitments. Forward contracts represent future commitments to deliver loans at a specified price and date and are used to manage interest rate risk on loan commitments and mortgage loans held for sale. Rate lock commitments represent commitments to fund loans at a specific rate. These derivatives involve underlying items, such as interest rates, and are designed to transfer risk. Substantially all of these instruments expire within 90 days from the date of issuance. Notional amounts are amounts on which calculations and payments are based, but which do not represent credit exposure, as credit exposure is limited to the amounts required to be received or paid. The approximate notional amounts and realized gain/(loss) for Mortgage Banking derivatives recognized in Mortgage Banking income for the period end June 30, 2008 and December 31, 2007 follows:

(in thousands)	June 30, 2008	December 31, 2007
Forward contracts:		
Notional amount	\$ 15,483	\$ 10,700
Gain / (loss) on change in market value of forward contracts	157	(41)
Rate lock loan commitments:		
Notional amount	\$ 23,150	\$ 9,635
Gain on change in market value of rate lock commitments	64	24

Forward contracts also contain an element of risk in the event that the counterparties may be unable to meet the terms of such agreements. In the event the parties to deliver commitments are unable to fulfill their obligations, the Company could potentially incur significant additional costs by replacing the positions at then current market rates. The Company manages its risk of exposure by limiting counterparties to those major banks and financial institutions deemed appropriate by management and the Board of Directors. The Company does not expect any counterparty to default on their obligations and therefore, the Company does not expect to incur any cost related to counterparty default.

The Company is exposed to interest rate risk on loans held for sale and rate lock loan commitments. As market interest rates increase or decrease, the fair value of mortgage loans held for sale and rate lock commitments will decline or increase. To offset this interest rate risk, the Company enters into derivatives such as forward contracts to sell loans. The fair value of these forward contracts will change as market interest

rates change, and the change in the value of these instruments is expected to largely, though not entirely, offset the change in fair value of loans held for sale and rate lock commitments. The objective of this activity is to minimize the exposure to losses on rate lock commitments and loans held for sale due to market interest rate fluctuations. The net effect of derivatives on earnings will depend on risk management activities and a variety of other factors, including market interest rate volatility, the amount of rate lock commitments that close, the ability to fill the forward contracts before expiration, and the time period required to close and sell loans.

Table of Contents**8 EARNINGS PER SHARE**

Class A and Class B shares participate equally in undistributed earnings. The difference in earnings per share between the two classes of common stock results solely from the 10% per share cash dividend premium paid on Class A Common Stock over that paid on Class B Common Stock.

A reconciliation of the combined Class A and Class B Common Stock numerators and denominators of the earnings per share and diluted earnings per share computations is presented below:

(in thousands, except per share data)	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Net income	\$ 6,423	\$ 5,969	\$ 28,546	\$ 14,275

9 SEGMENT INFORMATION

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The reportable segments are determined by the type of products and services offered, distinguished between Banking operations, Mortgage Banking operations and Tax Refund Solutions (TRS). Loans, investments and deposits provide the majority of revenue from banking operations; servicing fees and loan sales provide the majority of revenue from mortgage banking operations; RAL fees, ERC fees and Net RAL securitization income provide the majority of the revenue from TRS. The overall earnings of the TRS segment is highly dependent upon the Company's loss estimates for RALs retained on balance sheet and RALs securitized (*for further discussion of these loss estimates see Footnote 3 Loans and Allowance for Loan Losses in this document*). All Company segments are domestic.

The accounting policies used for Republic's reportable segments are the same as those described in the summary of significant accounting policies. Income taxes are allocated based on income before income tax expense. Transactions among reportable segments are made at fair value.

See the sections titled Business Segment Composition and Results of Operations in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loans Losses and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

10 SECURITIZATION

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

In January 2006, the Company established TRS RAL Funding, LLC (TRS RAL, LLC), a qualified special purpose entity (QSPE) and wholly-owned subsidiary corporation of RB&T. The QSPE securitized and sold a portion of the RAL portfolio to an independent third party during the first quarters of 2008 and 2007. The purpose of the securitization was to provide a funding source for the Company's RAL portfolio and also reduce the impact of the RAL program to the Company's regulatory capital.

As part of the securitization, the Company established a two step structure to handle the sale of the assets to third party investors. In the first step, a sale provided for TRS RAL, LLC to purchase the assets from RB&T as Originator and Servicer. In the second step, a sale and administration agreement was entered into by and among TRS RAL, LLC and various other third parties, with TRS RAL, LLC retaining a residual interest in an over-collateralization.

Generally, from mid January to the end of February of each year, RALs which, upon origination, meet certain underwriting criteria related to refund amount and Earned Income Tax Credit amount are classified as loans held for sale and sold into the securitization. All other RALs originated are retained by the Company. There are no RALs held for sale as of any quarter end. The Company retains a related residual value in the securitization, which is classified on the balance sheet as a trading security. The initial residual interest has a weighted average life of approximately one month, and as such, substantially all of its cash flows are received by the end of the first quarter. The disposition of the remaining anticipated cash flows is expected to occur within the remainder of the calendar year. At its initial valuation, and on a quarterly basis thereafter, the Company adjusts the carrying amount of the residual value to its fair value, which is determined based on expected future cash flows and is significantly influenced by the anticipated credit losses of the underlying RALs.

During the first quarters of 2008 and 2007, respectively, the securitization consisted of \$1.1 billion and \$350 million of loans originated and sold. The Company's continuing involvement in loans sold into the securitization was limited to only servicing of the RALs. Compensation for servicing of the RALs securitized was not contingent upon performance of the RALs securitized.

The residual value related to the securitization is presented as a trading security on the balance sheet and was \$177,000 and \$0 at June 30, 2008 and December 31, 2007. At June 30, 2008, in estimating the Company's residual interest for securitized RALs, the Company estimated that 0.64% of RALs securitized by the Company were uncollectible compared to 0.70% during the first six months of 2007. As a result, the Company recorded a net reduction to Net RAL securitization income of \$6.8 million for the first six months of 2008 and \$2.0 million for the first six months of 2007.

See Footnote 3, Loans and Allowance for Loans Losses for detailed tables illustrating the effect on the 2008 provision for loan losses of TRS and the 2008 net RAL securitization income of TRS if final losses of RALs retained on balance sheet and RALs securitized by the Company differ from the Company's current estimates by as much as 25 basis points higher or lower (not exceeding the current uncollected percentage).

The Company concluded that the transaction was a sale as defined in SFAS 140 Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125. This conclusion was based on, among other things, legal isolation of assets, the ability of the purchaser to pledge or sell the assets, and the absence of a right or obligation of the Company to repurchase the financial assets.

Detail of Net RAL securitization income follows:

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations of Republic Bancorp, Inc. (Republic or the Company) analyzes the major elements of Republic's consolidated balance sheets and statements of income. Republic, a bank holding company headquartered in Louisville, Kentucky, is the Parent Company of Republic Bank & Trust Company, (RB&T), Republic Bank (collectively referred together with RB&T as the Bank), Republic Funding Company and Republic Invest Co. Republic Invest Co. includes its subsidiary, Republic Capital LLC. The consolidated financial statements also include the wholly-owned subsidiaries of RB&T: Republic Financial Services, LLC, TRS RAL Funding, LLC and Republic Insurance Agency, LLC. Republic Bancorp Capital Trust is a Delaware statutory business trust that is a 100%-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. Management's Discussion and Analysis of Financial Condition and Results of Operations of Republic should be read in conjunction with Part I Item 1 *Financial Statements*.

This discussion includes various forward-looking statements with respect to credit quality, including but not limited to, delinquency trends and the adequacy of the allowance for loan losses, business segments, corporate objectives, the Company's interest rate sensitivity model and other financial and business matters. Broadly speaking, forward-looking statements may include:

- projections of revenue, income, losses, earnings per share, capital expenditures, dividends, capital structure or other financial items;
- descriptions of plans or objectives for future operations, products or services;
- forecasts of future economic performance; and
- descriptions of assumptions underlying or relating to any of the foregoing.

The Company may make forward-looking statements discussing management's expectations about various matters, including:

- future credit losses and non-performing assets;
- the adequacy of the allowance for loans losses;
- the anticipated future cash flows of securitized Refund Anticipation Loans (RALs);
- the future value of mortgage servicing rights;
- the impact of new accounting pronouncements;
- future short-term and long-term interest rate levels and the respective impact on net interest margin, net interest spread, net income, liquidity and capital;
- legal and regulatory matters; and
- future capital expenditures.

Forward-looking statements discuss matters that are not historical facts. As forward-looking statements discuss future events or conditions, the statements often include words such as anticipate, believe, estimate, expect, intend, plan, project, target, ca should, will, would, or similar expressions. Do not rely on forward-looking statements. Forward-looking statements detail management's expectations regarding the future and are not guarantees. Forward-looking statements are assumptions based on information known to management only as of the date the statements are made and management may not update them to reflect changes that occur subsequent to the date the statements are made.

Table of Contents

OVERVIEW

Net income for the quarter ended June 30, 2008 was \$6.4 million, representing an increase of \$454,000, or 8%, compared to the same period in 2007. Diluted earnings per Class A Common Share increased 10% to \$0.31 for the quarter ended June 30, 2008 compared to \$0.28 for the same period in 2007.

Net income for the six months ended June 30, 2008 was \$28.5 million, representing an increase of \$14.3 million, or 100%, compared to the same period in 2007. Diluted earnings per Class A Common Share increased 106% to \$1.38 for the six months ended June 30, 2008 compared to \$0.67 for the same period in 2007.

General highlights for the second quarter and six months ended June 30, 2008 consist of the following:

- Republic ended the quarter with total assets of \$3.1 billion, representing a decline of \$53 million, or 2%, compared to June 30, 2007 and a decline of \$112 million, or 4%, compared to December 31, 2007.
- Traditional Banking segment net income increased \$721,000, or 15%, and \$1.6 million, or 18%, for the second quarter and six months ended June 30, 2008 compared to the same periods in 2007. The rise in segment net income was primarily attributable to increases in net interest income and non interest income, partially offset by increases in the provision for loan losses and non interest expenses.
- Net income within the Company's Tax Refund Solutions (TRS) business segment decreased \$451,000 for the second quarter of 2008 compared to the second quarter of 2007. The decrease in net income for the quarter was primarily due to an additional provision for loan loss expense of \$796,000 recorded during the second quarter of 2008 as compared to the same period in 2007, as the Company revised its first quarter loss estimate higher due to lower than expected paydowns on outstanding RAL balances.
- For the first six months of 2008, TRS net income increased \$11.9 million, or 223%, compared to the same period in 2007 primarily due to the overall growth in product volume coupled with lower estimated RAL losses as a percent of total originations. Total RAL volume (which occurred primarily in the first quarter and includes RALs sold into the securitization) increased from \$577 million during 2007 to \$1.8 billion during 2008. In addition to the increased RAL volume, Electronic Refund Checks (ERC) and Electronic Refund Deposits (ERD) volume increased approximately 311%. The increase in volume was attributable to the new business gained through the Jackson Hewitt contracts previously disclosed, as well as significant growth through the Company's independent tax-preparer customer base.
- Net interest income increased \$7.3 million, or 33%, and \$24.6 million, or 50%, for the second quarter and six months ended June 30, 2008 compared to the same periods in 2007. The traditional banking segment represented \$7.4 million and \$11.4 million of the increase for the second quarter and six months ended June 30, 2008 compared to the same periods in 2007. Net interest income within the traditional Banking segment benefited significantly from declining short-term interest rates in combination with an overall steepening of the yield curve, and to a lesser extent, year-over-year growth in the loan portfolio. From September 2007 through the end of the year, the Federal Open Markets

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Committee (FOMC) of the Federal Reserve Bank (FRB) lowered the Federal Funds Target rate by 100 basis points. During the first and second quarters of 2008, the FOMC dropped rates another 200 basis points and 25 basis points, respectively, ending the period with a Federal Funds Target rate at 2.00%. Because the Company's interest bearing liabilities continue to be more sensitive to interest rate movements than its assets, the decreases in the Federal Funds Target rate have significantly benefited the Company's net interest income and net interest margin since the fourth quarter of 2007. The change in net interest income not related to the Banking segment was primarily related to the TRS segment and the substantial increase in RAL volume during the tax season.

- Non interest income decreased \$1.3 million, or 14%, for the second quarter primarily due to a \$3.4 million other-than-temporary impairment charge recognized for two non agency mortgage backed securities (*see additional discussion under Footnote 2 Securities.*) This decline was offset by a \$2.3 million increase in ERC fees tied to growth in the TRS program. Non interest income for the six months ended June 30, 2008 increased \$20.5 million, primarily attributable to growth in the Company's tax business at TRS.

- The Company recorded a provision for loan losses of \$3.6 million and \$14.1 million for the second quarter and six months ended June 30, 2008, compared to a provision of \$147,000 and \$3.8 million for the same periods in 2007.

Table of Contents

- The traditional Banking segment provision for loan losses was \$2.9 million for the quarter ended June 30, 2008 compared to \$171,000 for the same period in 2007. For the six months ended June 30, 2008 and 2007, the Banking segment provision for loan losses was \$5.9 million and \$380,000. In general, the increase in the bank level provision expense for the quarter and six months ended June 30, 2008 was attributable to the increase in classified, delinquent and non performing loans and an adjustment to the allowance calculation for qualitative factors generally related to the deteriorating real estate market conditions. For the quarter and six months ended June 30, 2008, approximately \$885,000 and \$2.8 million of the increase related to the specific write down of one land development loan in Florida placed on non accrual during the first quarter of 2008.
- The TRS segment provision for loan losses (for RALs retained on balance sheet) was \$772,000 for the quarter ended June 30, 2008 compared to a credit of \$24,000 for the same period in 2007. For the six months ended June 30, 2008 and 2007, the TRS segment provision for loan losses was \$8.2 million and \$3.4 million. The year to date increase in estimated losses associated with RALs was primarily due the increased volume detailed above. *For additional discussion the loan loss reserve estimates for TRS, see Footnote 3 Loans and Allowance for Loans Losses of Part I Item 1 Financial Statements.*
- Non interest expenses increased \$2.1 million, or 10%, and \$12.8 million, or 29%, for the second quarter and six months ended June 30, 2008 compared to the same periods in 2007. Approximately \$1.5 million and \$12.0 million of the increases were related to TRS and were driven by the significant year-over-year growth in the program as discussed throughout. Despite continued banking center expansion, non interest expenses within the Banking segment increased only 2% year-over-year.

BUSINESS SEGMENT COMPOSITION

As of June 30, 2008, the Company was divided into three distinct business operating segments: Banking, Tax Refund Solutions and Mortgage Banking. Net income, total assets and net interest margin by segment for the three and six month periods ended June 30, 2008 and 2007 are presented below:

Table of Contents

(in thousands)	Three Months Ended June 30, 2008

(I) Banking

Currently, Republic has a total of 44 full-service banking centers with 36 located in Kentucky, three in southern Indiana and five in metropolitan Tampa, Florida. RB&T's primary market areas are located in metropolitan Louisville, central Kentucky, northern Kentucky and southern Indiana. Louisville, the largest city in Kentucky, is the location of Republic's headquarters, as well as 20 banking centers. RB&T's central Kentucky market includes 12 banking centers in the following Kentucky cities: Bowling Green (1); Elizabethtown (1); Frankfort (1); Georgetown (1); Lexington, the second largest city in Kentucky (5); Owensboro (2); and Shelbyville (1). RB&T's northern Kentucky market includes banking centers in Covington, Florence, Fort Wright and Independence. RB&T also has banking centers located in Floyds Knobs, Jeffersonville and New Albany, Indiana. Republic Bank has locations in Hudson, New Port Richey, Palm Harbor, Port Richey and Temple Terrace, Florida.

Banking related operating revenues are derived primarily from interest earned from the Bank's loan and investment securities and fee income from loans, deposits and other banking products. The Bank has historically extended credit and provided general banking services through its banking center network to individuals and businesses. The Bank principally markets its banking products and services through the following delivery channels:

Table of Contents

Mortgage Lending The Bank generally retains adjustable rate residential real estate loans with fixed terms up to ten years. These loans are originated through the Bank's retail banking center network. Fixed rate residential real estate loans that are sold into the secondary market, and their accompanying servicing rights, which may be either sold or retained, are included as a component of the Company's *Mortgage Banking* segment and are discussed below and throughout this document.

Commercial Lending Commercial loans are primarily real estate secured and are generated through banking centers in the Bank's market areas. The Bank makes commercial loans to a variety of industries and promotes this business through focused calling programs in order to broaden relationships by providing business customers with loan, deposit and treasury management services.

Consumer Lending Traditional consumer loans made by the Bank include home improvement and home equity loans, as well as secured and unsecured personal loans. With the exception of home equity loans, which are actively marketed in conjunction with single family first lien mortgage loans, other traditional consumer loan products are not actively promoted in the Bank's markets.

Treasury Management Services The Bank provides various deposit products designed for business customers located throughout its market areas. Lockbox processing, remote deposit capture, business online banking, account reconciliation and Automated Clearing House (ACH) processing are additional services offered to businesses through the Treasury Management Department. The *Premier First* product is the Bank's premium money market sweep account designed for business customers.

Internet Banking The Bank expands its market penetration and service delivery by offering customers Internet banking services and products through its website, www.republicbank.com.

Other Banking Services The Bank also provides trust, title insurance and other financial institution related products and services.

(II) Tax Refund Solutions (TRS)

RB&T, through its TRS business segment, is one of a limited number of financial institutions which facilitate the payment of federal and state tax refunds through third party tax-preparers located throughout the U.S. Substantially all of the business generated by TRS occurs in the first quarter of the year. The Company facilitates the payment of these tax refunds through three primary products: RALs, ERCs and ERDs.

ERCs/ERDs are products whereby a tax refund is issued to the taxpayer after RB&T has received the refund from the federal or state government. There is no credit risk or borrowing cost for the Company because ERCs/ERDs are only delivered to the taxpayer upon receipt of the refund directly from the Internal Revenue Service (IRS). Fees earned on ERCs/ERDs are reported in non interest income under the line item Electronic refund check fees.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

RALs are short-term consumer loans offered to taxpayers, secured by their anticipated tax refund, which represents the source of repayment. The Company underwrites the RAL application through an automated credit review process utilizing information contained with the taxpayer's tax return. If the application is approved, the Company advances the amount of the refund due on the taxpayer's return up to specified amounts less the loan fee due to the Company and, if requested by the taxpayer, the fees due for preparation of the return to the tax preparer. As part of the RAL application process, each taxpayer signs an agreement directing the IRS to send the taxpayer's refund directly to the Company. The refund received from the IRS is used by the Company to pay off the RAL. Any amount due the taxpayer above the amount of the RAL is remitted to the taxpayer once the refund is received by the Company. The funds advanced by the Company are generally repaid by the IRS within two weeks. The fees earned on RALs are reported in interest income under the line item Loans, including fees.

While the loan application form is completed by the taxpayer in the tax preparer's office, the credit criteria is established by the Company and the underwriting decision is made by the Company. The Company reviews and evaluates all tax returns to determine the likelihood of IRS payment. If any attribute of the tax return appears to fall outside of predetermined parameters, the Company will not originate the RAL.

Substantially all RALs issued by the Company each year are made during the first quarter. Losses associated with RALs result

Table of Contents

from the IRS not remitting funds associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return and tax return fraud. At March 31st of each year, with adjustments each quarter end thereafter, the Company reserves for its estimated RAL losses based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company applies its loss estimates to both RALs retained on balance sheet and to securitized RALs. The Company applies loss estimates to securitized RALs because the securitization residual is valued based on the future expected cash flows of the securitization, which is significantly influenced by the anticipated credit losses of the underlying RALs. Estimated losses related to securitized RALs are recorded in non interest income as a reduction to Net RAL securitization income.

For additional discussion the loan loss reserve estimates for TRS see Footnote 3 Loans and Allowance for Loans Losses of Part I Item 1 Financial Statements. Footnote 3 contains detailed tables illustrating the effect on the 2008 provision for loan losses of TRS and the 2008 net RAL securitization income of TRS if final losses of RALs retained on balance sheet and RALs securitized by the Company differ from the Company's current estimates by as much as 25 basis points higher or lower (not exceeding the current uncollected percentage).

The overall earnings reported for the TRS segment are highly dependent upon the Company's loss estimates for RALs retained on balance sheet and securitized RALs. The Company believes that based on information currently available, it has provided the appropriate amount of reserves for losses associated with RALs. The possibility remains, however, that payments from the IRS throughout the remainder of the year could differ from what the Company estimated causing an adjustment to the Company's previous allowance for loan losses and residual interest trading security.

Subsequent to the first quarter of 2008, the results of operations for the TRS segment consist primarily of fixed overhead expenses and adjustments to the segment's estimated residual interest and estimated provision for loan losses as estimated results become final.

TRS Funding

Generally, from mid January to the end of February of each year, RALs which, upon origination, meet certain underwriting criteria related to refund amount and Earned Income Tax Credit amount are classified as loans held for sale and sold into the securitization. All other RALs originated are retained by the Company. There are no RALs held for sale as of any quarter end. The Company retains a related residual value in the securitization, which is classified on the balance sheet as a trading security. The initial residual interest has a weighted average life of approximately one month, and as such, substantially all of its cash flows are received by the end of the first quarter. The disposition of the remaining anticipated cash flows is expected to occur within the remainder of the calendar year. At its initial valuation, and on a quarterly basis thereafter, the Company adjusts the carrying amount of the residual value to its fair value, which is determined based on expected future cash flows and is significantly influenced by the anticipated credit losses of the underlying RALs.

During the first quarters of 2008 and 2007, respectively, the securitization consisted of a total of \$1.1 billion and \$350 million of RALs originated and sold. The Company's continuing involvement in RALs sold into the securitization was limited to only servicing of the RALs. Compensation for servicing of the RALs securitized was not contingent upon performance of the RALs securitized.

The Company concluded that the transaction was a sale as defined in SFAS 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a replacement of FASB Statement No. 125*. This conclusion was based on, among other things, legal isolation of

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

assets, the ability of the purchaser to pledge or sell the assets, and the absence of a right or obligation of the Company to repurchase the financial assets.

In addition to the securitization structure, the Company also utilized brokered deposits to fund RALs retained on balance sheet. During the fourth quarter of 2007, the Company obtained \$272 million in brokered deposits to be utilized to fund the RAL program. These brokered deposits had a life of three months with a weighted average rate of 5.09%. Also, during January of 2008, the Company obtained an additional \$200 million in brokered deposits to fund additional RAL demand. These brokered deposits had a three month life and a weighted average rate of 4.95%.

See the section titled Results of Operations in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loans Losses, Footnote 9 Segment Information and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

Table of Contents

(III) Mortgage Banking

Mortgage Banking activities primarily include 15, 20 and 30-year fixed rate real estate loans that are sold into the secondary market. Since 2003, the Bank has historically retained servicing on substantially all loans sold into the secondary market. Administration of loans with the servicing retained by the Bank includes collecting principal and interest payments, escrowing funds for taxes and insurance and remitting payments to the secondary market investors. A fee is received by the Bank for performing these standard servicing functions.

See additional detail regarding Mortgage Banking under Footnote 9 Segment Information of Item 1 Financial Statements.

RESULTS OF OPERATIONS

Tax Refund Solutions (TRS)

The total volume of tax return refunds processed during the 2008 tax season increased \$3.9 billion, or 270%, over the same period in 2007. The Company originated \$1.8 billion in RALs during 2008 compared to \$577 million for the same period in 2007. Total ERC/ERD volume was \$3.6 billion during 2008 compared to \$866 million for the same period in 2007. The substantial growth at TRS primarily resulted from successful sales efforts to independent tax preparers and the previously disclosed Jackson Hewitt contracts signed in the latter half of 2007. These new contract opportunities became available to Republic with the announced exiting of the business in early 2007 by a large competitor of Republic.

For the past three years, the Company implemented a RAL securitization to provide an alternative liquidity vehicle to supplement brokered deposits. In addition to providing an additional funding source, the purpose of the securitization was to reduce the impact to regulatory capital of the RAL portfolio, helping ensure the Company was able to maintain well-capitalized status. Approximately \$1.1 billion and \$350 million in RALs were sold through the securitization during the first quarters of 2008 and 2007. The Company used brokered deposits and overnight borrowing lines to fund the RALs that were retained on-balance sheet.

During 2008, TRS earned \$19.3 million in net RAL fee income, compared to \$6.0 million for the same period in 2007. TRS also earned \$16.9 million in net ERC/ ERD revenue during 2008 compared to \$4.1 million for the same period in 2007. Net RAL securitization income increased \$9.2 million, or 248%, to \$12.9 million as of June 30, 2008 compared to \$3.7 million for the same period in 2007. All of these increases were attributed to an increase in volume detailed throughout this document.

Total tax refund volume for 2008 increased 270% over 2007. Overall segment net income increased \$11.9 million, or 223%, compared to the same period due to the increase in volume discussed above, as well as lower estimated losses, lower confirmed fraud losses and a decline in the amount of refunds held by the IRS for reasons such as audits and liens from prior debts offset by the increase in non interest expenses.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Substantially all RALs issued by the Company each year are made during the first quarter. Losses associated with RALs result from the IRS not remitting funds associated with a particular tax return. This occurs for a number of reasons, including errors in the tax return and tax return fraud. At March 31st each year, with adjustments each quarter end thereafter, the Company reserves for its estimated RAL losses based on current year and historical funding patterns and based on information received from the IRS on current year payment processing. The Company applies its loss estimates to both RALs retained on balance sheet and to securitized RALs. The Company applies loss estimates to securitized RALs because the securitization residual is valued based on the future expected cash flows of the securitization, which is significantly influenced by the anticipated credit losses of the underlying RALs. Estimated losses related to securitized RALs are recorded as a reduction to Net RAL securitization income.

The overall earnings reported for the TRS segment are highly dependent upon the Company's loss estimates for RALs retained on balance sheet and securitized RALs. The Company believes that based on information currently available, it has provided the appropriate amount of reserves for losses associated with RALs. The possibility remains, however, that payments from the IRS throughout the remainder of the year could differ from what the Company estimated causing an adjustment to the Company's previous allowance for loan losses and residual interest trading security.

Table of Contents

For additional discussion the loan loss reserve estimates for TRS see Footnote 3 Loans and Allowance for Loans Losses of Part I Item 1 Financial Statements. Footnote 3 contains detailed tables illustrating the effect on the 2008 provision for loan losses of TRS and the 2008 net RAL securitization income of TRS if final losses of RALs retained on balance sheet and RALs securitized by the Company differ from the Company's current estimates by as much as 25 basis points higher or lower (not exceeding the current uncollected percentage).

Subsequent to the first quarter of 2008, the results of operations for the TRS segment consist primarily of fixed overhead expenses and adjustments to the segment's estimated residual interest and estimated provision for loan losses as actual results become final.

Detail of Net RAL securitization income follows:

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Net gain on sale of RALs	\$ (57)	\$ 474	\$ 8,313	\$ 2,256
Increase in securitization residual	343	621	4,560	1,446
Net RAL securitization income	\$ 286	\$ 1,095	\$ 12,873	\$ 3,702

See the section titled Business Segment Composition in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loan Losses, Footnote 9 Segment Information and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

Net Interest Income

The largest source of Republic's revenue is net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and securities and the interest expense on liabilities used to fund those assets, such as interest-bearing deposits and borrowings. Net interest income is impacted by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities, as well as market interest rates.

For the second quarter of 2008, net interest income was \$29.3 million, an increase of \$7.3 million, or 33%, over the second quarter of 2007. The Company experienced a \$7.4 million, or 35%, increase in net interest income within the traditional Banking segment primarily related to a significant reduction in the Company's cost of funds resulting from declining short-term interest rates in combination with an overall steepening of the yield curve.

As illustrated in Table 3, for the second quarter of 2008 compared to 2007, the Company was able to increase its net interest income primarily through the decline in rates on deposits and borrowings which reprice with short-term indices. For the second quarter of 2008, the Company's net interest spread improved 114 basis points over the second quarter of 2007 while net interest margin improved 97 basis points for the same

period.

For the first six months of 2008, net interest income was \$73.9 million, an increase of \$24.6 million, or 50%, over the same period in 2007. The previously discussed growth in RAL volume was a significant factor in the Company's increase in net interest income, as TRS contributed \$13.2 million to this category. The traditional Banking segment also realized an \$11.4 million, or 27%, increase over the first six months of 2007. As with the second quarter, the Banking segment also benefited from declining short-term interest rates in combination with an overall steepening of the yield curve.

The Company's net interest spread increased 153 basis points to 4.28% for six months ended June 30, 2008 compared to the same period in 2007. The Company's net interest margin increased 144 basis points to 4.82% for the same period. As previously discussed, the increase was tied to the increased RAL volume, as well as recent decreases in the Federal Funds Target rate. From September 2007 through the end of the year, the Federal Open Markets Committee (FOMC) of the Federal Reserve Bank (FRB) lowered the Federal Funds Target rate by 100 basis points. During the first and second quarters of 2008, the FOMC dropped rates another 200 basis points and 25 basis points, respectively, ending the period with a Federal Funds Target rate at 2.00%. The Federal Funds Target rate is an index which many of the Company's short-term deposit rates

Table of Contents

track. Because the Company's interest bearing liabilities continue to be more sensitive to interest rate movements than its assets, the decreases in the Federal Funds Target rate have significantly benefited the Company's net interest income and net interest margin since the fourth quarter of 2007.

The Company believes that any further rate reductions of the Federal Funds Target rate by the FOMC would continue to benefit the Company's net interest income and net interest margin in the short-term. However, the general lack of liquidity in the wholesale markets has caused a large part of the Company's incremental funding costs to increase—a trend that will likely begin to offset some of the positive impact to the Company's net interest margin it has received from declining short-term rates. In addition, paydowns in the Company's loan and investment portfolios will also possibly begin causing compression in Republic's net interest income and net interest margin, as the cash received from these paydowns will likely be reinvested at a lower yield. Any increases in the Federal Funds Target Rate will cause compression to the Company's net interest income and net interest margin.

The Company is unable to precisely determine the ultimate impact to the Company's net interest spread and margin in the future resulting from FOMC rate cuts or increases because of factors such as consumer demand for the Company's products and overall need for liquidity, among many others.

For additional information on the past effect of rising short-term interest rates on Republic's net interest income, see section titled Volume/Rate Variance Analysis in this section of the document. For additional information on the potential future effect of rising short-term interest rates on Republic's net interest income, see section titled Interest Rate Sensitivity in this section of the document. For additional discussion regarding the securitization, see the section titled Tax Refund Solutions in this section of the document and Footnote 9 Segment Information and Footnote 10 Securitization of Item 1 Financial Statements.

Table 1 and Table 2 provide detailed information as to average balances, interest income/expense and rates by major balance sheet category for the three and six month periods ended June 30, 2008 and 2007. Table 3 provides an analysis of the changes in net interest income attributable to changes in rates and changes in volume of interest-earning assets and interest-bearing liabilities.

Table of Contents

Table 3 illustrates the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities impacted Republic's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume) and (iii) net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Table of Contents

Non interest Income

Non interest income declined \$1.3 million, or 14%, for the second quarter of 2008 compared to the second quarter of 2007. For the first six months of 2008 non interest income increased \$20.5 million, or 98%, compared to the same period in 2007.

Service charges on deposit accounts increased \$275,000, or 6%, for the second quarter of 2008 and \$668,000, or 8%, for the first six months of 2008 as compared to the same periods in 2007. The increase for both the quarter and six months was primarily due to growth in the Company's checking account base in conjunction with growth in the Bank's Overdraft Honor program, which permits selected customers to overdraw their accounts up to a predetermined dollar amount (up to a maximum of \$1,000) for the Bank's customary overdraft fee. The Company also increased its overdraft fee by 7% in April of 2008. Included in service charges on deposits are net per item net overdraft fees of \$3.5 million and \$3.4 million for the second quarters of 2008 and 2007 and \$6.7 million and \$6.5 million for the first six months of 2008 and 2007.

For the second quarter and first six months of 2008, Electronic refund check (ERC) fees increased \$2.3 million and \$12.8 million. The increase in ERC fees for both the quarter and six months was attributable to an increase in volume.

For the second quarter of 2008, net RAL securitization income declined \$809,000. The decline in net RAL securitization income related to positive revisions made during the second quarter of 2007 to the Company's estimated future cash flows from the securitization residual as cash received within the residual were better than originally forecast during the first quarter of 2007. For the six months ended June 30, 2008, net RAL securitization income increased \$9.2 million. The increase was attributable to the overall increase in volume at TRS during the season in combination with a lower estimated loss rate on underlying securitized RALs. The potential exists during the remainder of the year that the Company will further revise its estimate for future cash flows of the residual interest of the securitization based on the collectibility of the underlying securitized RALs. The Company believes the impact of these changes in estimate will be immaterial to the financial statements and will recognize any changes in subsequent quarters as they are realized.

For additional discussion the loan loss reserve estimates for TRS see Footnote 3 Loans and Allowance for Loans Losses of Part I Item 1 Financial Statements. Footnote 3 contains detailed tables illustrating the effect on the 2008 provision for loan losses of TRS and the 2008 net RAL securitization income of TRS if final losses of RALs retained on balance sheet and RALs securitized by the Company differ from the Company's current estimates by as much as 25 basis points higher or lower (not exceeding the current uncollected percentage).

See the sections titled Business Segment Composition and Results of Operations in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loans Losses, Footnote 9 Segment Information and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

Mortgage Banking income increased \$1.6 million during the six months ended June 30, 2008 compared to the same period in 2007. The increase was due primarily to a \$1.9 million increase in net gain on sale of loans. Consistent with the decline in long-term rates during 2008, the Company experienced a \$30 million increase in 15- and 30-year fixed rate loans that were sold into the secondary market during 2008. In addition, during 2008, the Company recognized a \$300,000 gain related to the adoption of SAB 109 *Written Loan Commitments Recorded at Fair Value Through Earnings* and SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*.

The Company recognized a net loss on impairment of securities of \$4.1 million during the first six months of 2008, as three investment securities were deemed to be other-than-temporarily impaired by the Company. Approximately \$3.4 million of this loss was realized during the second quarter of 2008 as the Company determined that two non agency mortgage backed securities were other-than-temporarily impaired during the quarter. *See additional discussion under the section titled Investment Securities in this section of the document, as well as Footnote 2 Securities of Item 1 Financial Statements.*

Table of Contents

Non interest Expenses

Non interest expenses increased \$2.1 million, or 10%, for the quarter ended June 30, 2008 compared to the same period in 2007 due primarily to an increase in salaries and employee benefits combined with higher other expenses. Non interest expenses increased \$12.8 million, or 29%, during the first six months of 2008 compared to the same period in 2007, due primarily to the same reasons.

Approximately \$1.5 million of the second quarter increase was related to TRS and was driven by the significant year-over-year growth in the program. Within the Company's traditional Banking segment, non interest expenses increased only \$621,000, or 3%, for the second quarter of 2008 compared to 2007.

- With respect to the increase in non interest expense at TRS:
 - TRS salaries and employee benefits increased \$988,000 consistent with annual merit increases, increased permanent staffing, increased seasonal contract labor staffing, and increased incentive compensation accruals.
 - TRS occupancy and equipment expense increased \$315,000 primarily due to higher leased and rented equipment and facility rent expense, as the Company expanded its infrastructure to accommodate the anticipated increase in volume.
 - Other expenses at TRS increased \$143,000 primarily due to expenses such as routine professional fees, fraud detection and identification verification, and correspondent banking relationships. Included in professional fees is the annual review of the RAL underwriting by a third party consultant and routine annual audits of tax preparation offices nationwide.
- With respect to the change in non interest expense associated with the Company's traditional Banking segment:
 - Salaries and employee benefits increased \$318,000 due primarily to higher costs associated with the Company's health insurance.
 - Occupancy and equipment increased \$150,000 primarily due to growth in the Company's infrastructure and banking center network, as well as increased leasing costs and service agreements for the Company's technology and operating systems.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

- Other expense increased \$291,000 with approximately one half of the increase attributable to the reimbursement of foreign ATM fees to the Company's BreakFree and Ultimate checking account clients.

Approximately \$11.9 million of the year to date increase was related to TRS and was also driven by the significant year-over-year growth in the program. Within the Company's traditional Banking segment, non interest expenses increased only \$829,000, or 2% for the six months ended June 30, 2008.

- With respect to the increase in non interest expense at TRS:
 - TRS salaries and employee benefits increased \$3.1 million consistent with annual merit increases, increased permanent staffing, increased seasonal contract labor staffing, and increased incentive compensation accruals.
 - TRS occupancy and equipment expense increased \$614,000 primarily due to higher leased and rented equipment and facility rent expense, as the Company expanded its infrastructure to accommodate the anticipated increase in volume.
 - TRS marketing and development expense increased \$6.1 million due to expenses associated with the Program and Technology Agreements related to the Jackson Hewitt relationship.
 - TRS telephone and postage expense increased \$202,000 consistent with the overall growth in the program.

Table of Contents

- TRS office supplies increased \$118,000 consistent with the overall growth in the program and increased printed materials.
- Other expenses at TRS increased \$1.8 million primarily due to expenses such as routine professional fees, fraud detection and identification verification, and correspondent banking relationships. Included in professional fees is the annual review of the RAL underwriting by a third party consultant and routine annual audits of tax preparation offices nationwide.
- With respect to the change in non interest expense associated with the Company's traditional Banking segment:
- Salaries and employee benefits increased \$332,000 due primarily to higher costs associated with the Company's health insurance.
- Occupancy and equipment increased \$474,000 primarily due to growth in the Company's infrastructure and banking center network, as well as increased leasing costs and service agreements for the Company's technology and operating systems.

COMPARISON OF FINANCIAL CONDITION AT JUNE 30, 2008 AND DECEMBER 31, 2007

Investment Securities

Securities available for sale primarily consists of U.S. Treasury and U.S. Government Agency obligations, including agency mortgage backed securities (MBSs), agency collateralized mortgage obligations (CMOs), non agency mortgage backed and other non agency mortgage-related securities and FHLMC preferred stock. The agency MBSs primarily consist of hybrid mortgage securities, as well as other adjustable rate mortgage securities, underwritten and guaranteed by Ginnie Mae (GNMA), Freddie Mac (FHLMC) and Fannie Mae (FNMA). Agency CMOs held in the investment portfolio are substantially all floating rate securities that adjust monthly. The Company primarily uses the securities portfolio as collateral for securities sold under agreements to repurchase (repurchase agreements) and to mitigate its risk position from rising interest rates. Strategies for the securities portfolio may also be influenced by economic and market conditions, loan demand, deposit mix and liquidity needs.

During the first six months of 2008, Republic purchased \$1.3 billion in securities and had maturities and calls of \$1.3 billion. All of the securities purchased were agency discount notes, which the Company utilized primarily for collateral purposes. The weighted average yield on these discount notes was 3.01% with an average term of 2 days. Substantially all of the cash received from the maturities and calls of the investment securities that was not reinvested into discount notes was utilized to pay down advances from the Federal Home Loan Bank.

The Company recognized a net loss on impairment of securities of \$4.1 million during the first six months of 2008, as three investment securities were determined to be other-than-temporarily impaired. In addition, subsequent to June 30, 2008, the fair market value of the

Company's FHLMC stock declined significantly below the Company's carrying value. The significant decline in value was due to the uncertainty surrounding the on-going viability of FHLMC. If the fair value does not recover significantly prior to September 30, 2008, the Company will record another impairment charge during the third quarter. *See additional discussion under Footnote 2 Securities of Part I Item 1 Financial Statements.*

Loan Portfolio

Net loans, primarily consisting of secured real estate loans, decreased by \$54 million during the first six months of 2008 to \$2.3 billion at June 30, 2008. While commercial and home equity loans increased \$14 million and \$9 million during the first six months of 2008, the Company experienced a decline of \$31 million, \$16 million and \$25 million in the residential real estate, commercial real estate and real estate construction loan portfolios, respectively. Generally, the overall decline was due to higher pricing requirements implemented by the Company which effectively shifted 1-4 family real estate loan volume into secondary market products or to other financial institutions with lower offering rates. In addition, the Company implemented stricter underwriting standards due to the deterioration in the real estate markets which, in combination with higher pricing strategies, caused overall origination volume to decrease significantly during the first six months of 2008. The Company currently expects to

Table of Contents

maintain these pricing and underwriting strategies through the remainder of 2008 and, as a result, does not anticipate loan growth during the second half of the year.

The decrease in commercial real estate from December 31, 2007 to June 30, 2008 primarily related to stricter underwriting guidelines adopted by the Company. At June 30, 2008, commercial real estate loans comprised 27% of the total gross loan portfolio and were concentrated primarily within the Bank's existing markets. These loans are principally secured by multi-family investment properties, single family developments, medical facilities, small business owner occupied offices, retail properties and hotels. These loans typically have interest rates that are initially fixed for one to ten years with the remainder of the loan term subject to repricing based on various market indices. In order to reduce the negative effect of refinance activity within the portfolio during a declining interest rate environment, the Company requires an early termination penalty on substantially all commercial real estate loans for a portion of the fixed term period. The Bank's underwriting standards typically include personal guarantees on most commercial real estate loans. Overall, commercial real estate loans decreased \$16 million, or 2%, from December 31, 2007.

Similar to commercial real estate loans, residential real estate loans that are not sold into the secondary market typically have fixed interest rate periods of one to ten years with the remainder of the loan term subject to repricing based on various market indices. These loans also typically carry early termination penalties during a portion of their fixed rate periods in order to lessen the overall negative effect to the Company of refinancing in a declining interest rate environment. To increase its competitiveness within its markets, Republic offered closing costs at \$599 since late 2007. Overall, residential real estate loans decreased \$31 million, or 3%, from December 31, 2007. Consistent with the steepening of the yield curve during 2008, the Company maintained a higher spread on its adjustable rate product offerings effectively driving consumer demand to 15 and 30-year fixed secondary market loan products.

Within the real estate loan construction category, the Company substantially exited a relationship during the first quarter in which it originated construction loans on a national basis through a building material supplier. In addition to being secured by the underlying collateral, these loans contained a guarantee from a related party of the building material supplier. The Company chose to exit this relationship due to the economic uncertainty in the national residential real estate market. Exiting this relationship resulted in a reduction of approximately \$21 million with the real estate loan construction category.

Allowance for Loan Losses and Provision for Loan Losses

The allowance for loan losses as a percent of total loans increased to 0.77% at June 30, 2008 compared to 0.53% at December 31, 2007. In general, the increase in the allowance for loan losses as a percentage of total loans was primarily attributable to additional reserves recorded based on the increase in past due, non-performing and classified loans. The Company believes, based on information presently available, that it has adequately provided for loan losses at June 30, 2008.

The Company recorded a provision for loan losses of \$14.1 million for the six months ended June 30, 2008, compared to a provision of \$3.8 million for the same period in 2007. Included in the provision for loan losses for 2008 and 2007 was \$8.2 million and \$3.4 million for net estimated losses associated with RALs retained on-balance sheet. The increase in estimated losses associated with RALs was primarily due the increased volume offset by lower confirmed fraud and a decline in the amount of refunds held by the IRS for reasons such as audits and liens from prior debts.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The Banking segment provision for loan losses was \$5.9 million for the six months ended June 30, 2008 compared to \$380,000 or the same period in 2007. In general, the increase in the allowance for loan losses was primarily attributable to reserves required for the increase in classified, delinquent and non performing loans and an adjustment to several qualitative factors within the allowance calculation as a result of generally deteriorating real estate market conditions. Approximately \$2.8 million of the increase was related to one land development loan in Florida placed on non accrual during the first quarter of 2008.

The Company recorded a provision for loan losses of \$3.6 million for the second quarter 2008, compared to a provision of \$147,000 for the same period in 2007. Included in the provision for loan losses for 2008 and 2007 was \$772,000 and a credit of \$24,000 for net estimated losses associated with RALs retained on-balance sheet.

Table of Contents

The Banking segment provision for loan losses was \$2.9 million for the second quarter of 2008 compared to \$171,000 for the same period in 2007. In general, the increase in the allowance for loan losses was primarily attributable to reserves required for the increase in classified, delinquent and non performing loans and an adjustment to several qualitative factors within the allowance calculation as a result of generally deteriorating real estate market conditions. Approximately \$885,000 of the increase was related to one land development loan in Florida placed on non accrual during the first quarter of 2008.

See the sections titled Business Segment Composition and Results of Operations in Part I Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as Footnote 3 Loans and Allowance for Loans Losses, Footnote 9 Segment Information and Footnote 10 Securitization of Part I Item 1 Financial Statements and Part II Item 1A Risk Factors for additional discussion regarding TRS and the securitization.

Asset Quality

The Company maintains a watch list of commercial loans and reviews those loans on a regular basis. Generally, assets are designated as watch list loans to ensure more frequent monitoring. The assets are reviewed to ensure proper earning status and management strategy. If it is determined that there is serious doubt as to performance in accordance with original terms of the contract, then the loan is placed on non accrual.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Loans, including impaired loans under SFAS 114, but excluding consumer loans, are placed on non-accrual status when the loans become past due 90 days or more as to principal or interest, unless the loans are adequately secured

Table of Contents

and in the process of collection. Past due status is based on how recently payments have been received. When loans are placed on non-accrual status, all unpaid interest is reversed from interest income and accrued interest receivable. These loans remain on non-accrual status until the borrower demonstrates the ability to become and remain current or the loan or a portion of the loan is deemed uncollectible and is charged off.

Consumer loans, exclusive of RALs, are not placed on non-accrual status but are reviewed periodically and charged off when the loans reach 120 days past due or at any point the loan is deemed uncollectible. RALs traditionally undergo a review in March and July of each year and those RALs deemed uncollectible are charged off against the allowance for loan losses.

Total non performing loans to total loans increased to 0.82% at June 30, 2008, from 0.40% at December 31, 2007, as the total balance of non performing loans increased by \$9.5 million for the same period. Approximately \$7.2 million of the increase relates to one large land development loan in Florida. During the first six months of 2008, the Company recorded a \$2.8 million provision for loan loss directly related to the non performing loan noted above.

The remainder of the increase within the non performing loan category was substantially concentrated within the residential real estate and construction categories. Republic is generally well secured on these loans. As such, the Company does not anticipate a substantial increase in losses resulting from the current rise in the level of these non-performing loans at this time.

Table 5 Non Performing Loans and Non Performing Assets

(dollars in thousands)	June 30, 2008	December 31, 2007
Loans on non-accrual status(1)	\$ 17,688	\$ 8,303
Loans past due 90 days or more and still on accrual	1,476	1,318
Total non-performing loans	19,164	9,621
Other real estate owned	2,160	795
Total non-performing assets	\$ 21,324	\$ 10,416
Non-performing loans to total loans	0.82%	0.40%
Non-performing assets to total loans	0.91	0.43

(1) Loans on non-accrual status include impaired loans. See Footnote 3 Loans and Allowance for Loan Losses of Item 1 Financial Statements for additional discussion regarding impaired loans.

Republic defines impaired loans to be those commercial loans that the Company has classified as doubtful (collection of total amount due is improbable) or loss (all or a portion of the loan has been written off or a specific allowance for loss has been provided) or otherwise meet the definition of impaired. Republic's policy is to charge off all or that portion of its investment in an impaired loan upon a determination that it is probable the full amount will not be collected. Impaired loans totaled \$15.1 million at June 30, 2008 compared to \$6.4 million at December 31, 2007. The increase in impaired loans primarily related to one land development loan in Florida that was placed on non accrual during the first quarter of 2008.

Deposits

Total deposits declined \$340 million from December 31, 2007 to June 30, 2008 to \$1.6 billion. Interest-bearing deposits decreased \$354 million, or 21%, while non interest-bearing deposits increased \$14 million, or 5%, from December 31, 2007 to June 30, 2008. The decrease in interest-bearing accounts occurred primarily in the money market and brokered deposit categories. The increase in non interest bearing deposits primarily related to the increase in mortgage escrow balances. A substantial portion of these balances are paid out during the fourth quarter of each year. Subsequent to year end, the balances in the escrow accounts trend upwards, consistent with borrower payments.

As expected, the Company experienced a \$75 million decline in one money market commercial relationship, as the client elected to move their funds from the Bank to higher yielding investment alternatives. Brokered deposits

Table of Contents

decreased \$292 million during 2008 to \$80 million at June 30, 2008. During the fourth quarter of 2007, the Company acquired approximately \$272 million in brokered deposits to be utilized in the first quarter of 2008 to fund RALs. These deposits had a weighted average cost of 5.09% with an average maturity of 92 days. The Company also called \$56 million of brokered CDs with a weighted average interest rate of 5.40% during the first quarter of 2008. The Company replaced these brokered deposits as they matured during the first quarter of 2008 with FHLB advances.

In addition to the brokered deposits obtained during the fourth quarter of 2007, the Company also obtained \$200 million in brokered deposits during January of 2008 to fund the RAL program. These brokered deposits had a three month maturity and a weighted average rate of 4.95%. The Company replaced these brokered deposits with advances from the FHLB.

During the second quarter of 2008, the Company entered into a relationship with a large broker to obtain brokered money market deposits indexed to the three month libor plus 0.25%. As of June 30, 2008, the Company had \$29 million in funds from this relationship. The Company anticipates the balance of these funds will likely reach \$50 million by September 30, 2008, with the long-term potential to grow to approximately \$100 million if the Company deems market conditions to be favorable.

Securities Sold Under Agreements to Repurchase and Other Short-term Borrowings

Securities sold under agreements to repurchase and other short-term borrowings declined \$68 million during 2008. The majority of the repurchase accounts are large treasury management transaction relationships with normal recurring large fluctuations in account balances. All of these accounts require security collateral on behalf of Republic. The substantial majority of these accounts are indexed to immediately repricing indices such as the Federal Funds target rate. Based on the transactional nature of the Company's treasury management accounts, repurchase agreement balances are subject to large fluctuations on a daily basis.

Federal Home Loan Bank Advances

FHLB advances increased \$271 million to \$750 million at June 30, 2008. The increase primarily occurred as the Company replaced maturing brokered deposits with FHLB advances.

Approximately \$150 million of the FHLB advances at June 30, 2008 and December 31, 2007 were puttable advances with original fixed rate periods ranging from one to five years and original maturities ranging from three to ten years. To moderate the continued contraction on its margin, during March of 2007 the Company refinanced \$100 million in overnight borrowings from the FHLB with an approximate cost of 5.25% into a 10-year fixed rate advance with a 3-year put option at an average cost of 4.39%. At the end of the three year period, the FHLB has the right to require the Company to pay off the advances at no penalty. The weighted average coupon on all of the Company's puttable advances at June 30, 2008 was 4.51%. Based on market conditions at this time, the Company does not believe that any of its puttable advances are likely to be put back to the Company in the short-term by the FHLB.

Liquidity

The Company's 2008 RAL program required significantly more liquidity than in prior tax seasons. In addition to the new business gained through the Jackson Hewitt relationship, the Company also experienced significant growth through its independent tax-preparer customer base during the first quarter of 2008. The Company utilized a securitization structure once again in 2008 to fund a significant portion of the RAL portfolio. Brokered deposits were utilized to fund all RALs not funded through the securitization structure. In March of 2008, the Company replaced approximately \$328 million in matured brokered CDs with FHLB advances.

The Company is significantly leveraged and had a loan to deposit ratio of 144% at June 30, 2008 and 122% at December 31, 2007. Traditionally, the Company has utilized secured and unsecured borrowing lines to supplement its funding requirements. At June 30, 2008 and December 31, 2007, Republic had available collateral to borrow an additional \$200 million and \$545 million, respectively from the FHLB. In addition to its borrowing line with the FHLB, Republic also had unsecured lines of credit totaling \$227 million available through various other financial institutions as of June 30, 2008. If the Company were to lose a significant funding source, such as a few major

Table of Contents

depositors, or any of its lines of credit were canceled, or if the Company cannot obtain brokered deposits, the Company would be forced to offer above market deposit interest rates to raise funding.

Republic maintains sufficient liquidity to fund routine loan demand and routine deposit withdrawal activity. Liquidity is managed by maintaining sufficient liquid assets in the form of investment securities. Funding and cash flows can also be realized by the sale of securities available for sale, principal paydowns on loans and MBSs and proceeds realized from loans held for sale. The Company's liquidity is impacted by its ability to sell certain securities, which is limited due to the level of securities that are needed to secure public deposits, securities sold under agreements to repurchase and for other purposes, as required by law. At June 30, 2008 and December 31, 2007, these securities had a fair market value of \$458 million and \$520 million, respectively. Republic's banking centers and its website, www.republicbank.com, provide access to retail deposit markets. These retail deposit products, if offered at attractive rates, have historically been a source of additional funding when needed.

At June 30, 2008, the Company had approximately \$264 million in Premier First money market accounts, which is the Bank's primary product offering for medium to large business customers. These accounts do not require collateral by Republic, and as such, cash from these accounts can be utilized to fund the loan portfolio. The 25 largest Premier first relationships represent approximately \$114 million of the total balance. If any of these balances are moved from the Bank, the Company would likely utilize overnight borrowings in the short-term to replace the balances. One relationship elected to move \$75 million in balances away from the Company during the 2008, as more favorable investment alternatives became available to the client. On a longer-term basis, the Company would likely utilize brokered deposits to replace the balances. Based on past experience with brokered deposits, the Company believes it can quickly obtain brokered deposits if needed. The overall cost of gathering brokered deposits, however, could be substantially higher than the deposits they replace, potentially decreasing the Company's earnings.

The Company's liquidity risk is increased significantly during the first quarter of each year due to the RAL program. The Company has committed to its electronic filers and tax-preparer base that it will make RALs available to their customers under the terms of its contracts with them. This requires the Company to estimate liquidity needs for the RAL program well in advance of the tax season. If the Company materially overestimates the need for liquidity during the tax season, a significant expense could be incurred with no offsetting revenue stream. If the Company materially underestimates the need for liquidity during the tax season, the Bank could experience a significant shortfall of cash needed to fund RALs and could potentially be required to stop originating new RALs.

The Parent Company's principal source of funds for dividend payments are dividends received from RB&T. Federal and state regulations limit the amount of dividends that may be paid to the Parent Company by the Bank without prior approval of the respective banking regulators. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's net profits, combined with the retained net profits of the preceding two years. At June 30, 2008, RB&T could, without prior approval, declare dividends of approximately \$63 million. The Company does not plan to pay dividends from its Florida subsidiary, Republic Bank, in the foreseeable future.

Capital

Total stockholders' equity increased from \$249 million at December 31, 2007 to \$271 million at June 30, 2008. The increase in stockholders' equity was primarily attributable to net income earned during 2008 reduced by cash dividends declared.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

See Part II, Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds* for additional detail regarding stock repurchases and buy back programs.

Regulatory Capital Requirements The Parent Company and the Bank are subject to various regulatory capital requirements administered by banking regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on Republic's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Parent Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities and certain off balance sheet items, as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Table of Contents

Banking regulators have categorized the Bank as well-capitalized. To be categorized as well-capitalized, the Bank must maintain minimum Total Risk Based, Tier I Capital and Tier I Leverage ratios. Regulatory agencies measure capital adequacy within a framework that makes capital requirements, in part, dependent on the individual risk profiles of financial institutions. Republic continues to exceed the regulatory requirements for Total Risk Based Capital, Tier I Capital and Tier I Leverage. Republic and the Bank intend to maintain a capital position that meets or exceeds the well-capitalized requirements as defined by the Federal Reserve and FDIC. Republic's average capital to average assets ratio was 8.08% at June 30, 2008 compared to 7.86% at December 31, 2007. Formal measurements of the capital ratios for Republic and the Bank are performed by the Company at each quarter end.

In 2004, the Company executed an intragroup trust preferred transaction, with the purpose of providing RB&T access to additional capital markets, if needed, in the future. On a consolidated basis, this transaction has had no impact on the capital levels and ratios of the Company. The subordinated debentures held by RB&T, as a result of this transaction, however, are treated as Tier 2 Capital based on requirements administered by the Bank's federal banking agency. If RB&T's Tier I capital ratios should not meet the minimum requirement to be well-capitalized, the Company could immediately modify the transaction in order to maintain its well-capitalized status.

In 2005, Republic Bancorp Capital Trust (RBCT), an unconsolidated trust subsidiary of Republic Bancorp, Inc., was formed and issued \$40 million in Trust Preferred Securities (TPS). The TPS pay a fixed interest rate for ten years and adjust with LIBOR thereafter. The TPS mature on September 30, 2035 and are redeemable at the Company's option after ten years. The subordinated debentures are treated as Tier I Capital for regulatory purposes. The sole asset of RBCT represents the proceeds of the offering loaned to Republic Bancorp, Inc. in exchange for subordinated debentures which have terms that are similar to the TPS. The subordinated debentures and the related interest expense, which are payable quarterly at the annual rate of 6.015%, are included in the consolidated financial statements. The proceeds obtained from the TPS offering have been and will continue to be utilized to fund loan growth, support an existing stock repurchase program and for other general business purposes including stock repurchases and the acquisition of GulfStream Community Bank in October of 2006.

The following table sets forth the Company's risk based capital amounts and ratios as of June 30, 2008 and December 31, 2007:

Table 6 Capital Ratios

(dollars in thousands)	As of June 30, 2008		As of December 31, 2007	
	Amount	Ratio	Amount	Ratio
Total Risk Based Capital (to Risk Weighted Assets)				
Republic Bancorp, Inc.	\$ 320,671	15.85%	\$ 290,155	13.90%
Republic Bank & Trust Co.	302,466	15.37	272,747	13.41
Republic Bank	13,034	25.96	13,296	23.70
Tier I Capital (to Risk Weighted Assets)				
Republic Bancorp, Inc.	\$ 302,676	14.96%	\$ 277,420	13.29%
Republic Bank & Trust Co.	262,197	13.32	237,018	11.66
Republic Bank	12,406	24.71	12,840	22.89
Tier I Leverage Capital (to Average Assets)				

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Republic Bancorp, Inc.	\$	302,676	9.94%	\$	277,420	8.75%
Republic Bank & Trust Co.		262,197	8.79		237,018	7.66
Republic Bank		12,406	16.72		12,840	16.59

Asset/Liability Management and Market Risk

Asset/liability management control is designed to ensure safety and soundness, maintain liquidity and regulatory capital standards and achieve acceptable net interest income. Interest rate risk is the exposure to adverse changes in net interest income as a result of market fluctuations in interest rates. The Company, on an ongoing basis, monitors interest rate and liquidity risk in order to implement appropriate funding and balance sheet strategies. The Company considers interest rate risk to be Republic's most significant market risk.

Table of Contents

The interest sensitivity profile of Republic at any point in time will be affected by a number of factors. These factors include the mix of interest sensitive assets and liabilities, as well as their relative pricing schedules. It is also influenced by market interest rates, deposit growth, loan growth and other factors.

Republic utilized an earnings simulation model to analyze net interest income sensitivity. Potential changes in market interest rates and their subsequent effects on net interest income are evaluated with the model. The model projects the effect of instantaneous movements in interest rates of both 100 and 200 basis point increments equally across all points on the yield curve. These projections are computed based on various assumptions, which are used to determine the 100 and 200 basis point increments, as well as the base case (which is a twelve month projected amount) scenario. Assumptions based on growth expectations and on the historical behavior of Republic's deposit and loan rates and their related balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and the application and timing of various management strategies. Additionally, actual results could differ materially from the model if interest rates do not move equally across all points on the yield curve. As with the Company's previous simulation models, the June 30, 2008 simulation analysis continues to indicate that an increase in interest rates would generally have a negative effect on net interest income and a decrease in interest rates would generally have a positive impact on net interest income. As the Company has continued to implement strategies to mitigate the negative impact of rising interest rates, these strategies have lessened the positive impact from declining interest rates and also reduced the Company's forecasted base case net interest income in the event of no interest rate changes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information required by this item is included under Part I, Item 2., *Management's Discussion and Analysis of Financial Condition and Results of Operation* and Item 1A. *Risk Factors*.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, an evaluation was carried out by Republic Bancorp, Inc.'s management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting, except as disclosed in Item 4 of our amended Form 10-Q for the quarter ended March 31, 2008, filed on July 14, 2008.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

In the ordinary course of operations, Republic and the Bank are defendants in various legal proceedings. In the opinion of management, there is no proceeding pending or, to the knowledge of management, threatened litigation in which an adverse decision could result in a material adverse change in the business or consolidated financial position of Republic or the Bank.

Item 1A. Risk Factors.

Information regarding risk factors appears in the Company's Form 10-K for the year ending December 31, 2007, under the heading titled *Cautionary Statement Regarding Forward-Looking Statements* and in the Form 10-K Part I, Item 1A *Risk Factors*. There has been no material changes from the risk factors previously disclosed in the Company's Form 10-K for the year ended December 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Details of Republic's Class A Common Stock purchases during the second quarter of 2008 are included in the following table:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs
April 1 - April 30	41,453	\$ 19.88		
May 1 - May 31	24,265	23.78	14,000	
June 1 - June 30				
Total	65,718*	\$ 21.06	14,000	89,053

* - Includes 51,718 shares received by the Company in connection with stock option exercises.

During the first six months of 2008, the Company repurchased 14,000 shares and there were 85,826 shares exchanged for stock option exercises. During the second quarter of 2007, the Company's Board of Directors amended its existing share repurchase program by approving the repurchase of an additional 300,000 shares from time to time, if market conditions are deemed favorable to the Company. The repurchase program will remain effective until the total number of shares authorized is repurchased or until Republic's Board of Directors terminates

Table of Contents

the program. As of June 30, 2008, the Company had 89,053 shares which could be repurchased under the current stock repurchase programs.

During the first six months of 2008, there were approximately 5,000 shares of Class A Common Stock issued upon conversion of shares of Class B Common Stock by shareholders of Republic in accordance with the share-for-share conversion provision option of the Class B Common Stock. The exemption from registration of the newly issued Class A Common Stock relied upon was Section (3)(a)(9) of the Securities Act of 1933.

There were no equity securities of the registrant sold without registration during the quarter covered by this report.
