CUMMINS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1. NATURE OF OPERATIONS

Cummins Inc. (Cummins, the Company, we, our, or us) is a leading global power provider that designs, manufactures, distributes and service diesel and natural gas engines, electric power generation systems and engine-related component products, including filtration and emissions solutions, fuel systems, controls and air handling systems. We were founded in 1919 as one of the first manufacturers of diesel engines and are headquartered in Columbus, Indiana. We sell our products to Original Equipment Manufacturers (OEMs), distributors and other customers worldwide. We serve our customers through a network of more than 500 company-owned and independent distributor locations and approximately 5,200 dealer locations in more than 190 countries and territories.

NOTE 2. BASIS OF PRESENTATION

The unaudited *Condensed Consolidated Financial Statements* reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of operations, financial position and cash flows. All such adjustments are of a normal recurring nature. The *Condensed Consolidated Financial Statements* have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted as permitted by such rules and regulations. Certain reclassifications have been made to prior period amounts to conform to the presentation of the current period condensed financial statements.

Our reporting period ends on the Sunday closest to the last day of the quarterly calendar period. The first quarters of 2010 and 2009 ended on March 28, and March 29, respectively. The interim periods for both 2010 and 2009 contain 13 weeks, respectively. Our fiscal year ends on December 31, regardless of the day of the week on which December 31 falls.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect reported amounts in the *Condensed Consolidated Financial Statements*. Significant estimates and assumptions in these *Condensed Consolidated Financial Statements* require the exercise of judgment and are used for, but not limited to, allowance for doubtful accounts, estimates of future cash flows and other assumptions associated with goodwill and long-lived asset impairment tests, useful lives for depreciation and amortization, warranty programs, determination of discount and other rate assumptions for pension and other postretirement benefit expenses, restructuring costs, income taxes and deferred tax valuation allowances, lease classifications and contingencies. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may be different from these estimates.

In preparing our *Condensed Consolidated Financial Statements*, we evaluated subsequent events through the date our quarterly report was filed with the Securities and Exchange Commission.

The weighted-average diluted common shares outstanding exclude the anti-dilutive effect of certain stock options since such options had an exercise price in excess of the monthly average market value of our common stock. The options excluded from diluted earnings per share for the three month periods ended March 28, 2010, and March 29, 2009, were as follows:

	Three mor	nths ended
	March 28, 2010	March 29, 2009
Options excluded	18,638	58,050

You should read these interim condensed financial statements in conjunction with the *Consolidated Financial Statements* included in our Annual Report on Form 10-K for the year ended December 31, 2009. Our interim period financial results for the three month interim periods presented are not necessarily indicative of results to be expected

Table of Contents

for any other interim period or for the entire year. The year-end *Consolidated Balance Sheet* data was derived from audited financial statements, but does not include all disclosures required by GAAP.

NOTE 3. RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Accounting Pronouncements Recently Adopted

In January 2010, the Financial Accounting Standards Board (FASB) amended its standards related to fair value measurements and disclosures, which are effective for interim and annual fiscal periods beginning after December 15, 2009, except for disclosures about certain Level 3 activity which will not become effective until interim and annual periods beginning after December 15, 2010. The new standard requires us to disclose transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers as well as activity in Level 3 fair value measurements. The new standard also requires a more detailed level of disaggregation of the assets and liabilities being measured as well as increased disclosures regarding inputs and valuation techniques of the fair value measurements. Our disclosures related to the new standard are included in Note 9.

In June 2009, the FASB amended its standards for accounting for transfers of financial assets, which was effective for interim and annual fiscal periods beginning after November 15, 2009. The new standard removes the concept of a qualifying special-purpose entity from GAAP. The new standard modifies the financial components approach used in previous standards and limits the circumstances in which a financial asset, or portion of a financial asset, should be derecognized. The new standard also requires enhanced disclosure regarding transfers of financial interests and a transferor s continuing involvement with transferred assets. The new standard requires us to report any activity under our receivable sales program as secured borrowings. As of March 28, 2010, there were no outstanding amounts under our receivable sales program and there was no significant activity during the quarter.

In June 2009, the FASB amended its existing standards related to the consolidation of variable interest entities, which was effective for interim and annual fiscal periods beginning after November 15, 2009. The new standard requires entities to analyze whether their variable interests give it a controlling financial interest of a variable interest entity (VIE) and outlines what defines a primary beneficiary. The new standard amends GAAP by: (a) changing certain rules for determining whether an entity is a VIE; (b) replacing the quantitative approach previously required for determining the primary beneficiary with a more qualitative approach; and (c) requiring entities to continuously analyze whether they are the primary beneficiary of a VIE among other amendments. The new standard also requires enhanced disclosures regarding an entity s involvement in a VIE. The only significant impact of the adoption of this standard was to deconsolidate Cummins Komatsu Engine Corporation (CKEC) as of January 1, 2010 and to account for CKEC under GAAP accounting for equity method investees. The impact of the deconsolidation on our *Condensed Consolidated Statements of Income* was minimal as all sales were eliminated in consolidation in the past. The most significant impacts on our *Condensed Consolidated Balance Sheets* was to decrease current assets by \$9 million, decrease long-term assets by \$10 million, increase investments and advances related to equity method investees by \$11 million and decrease noncontrolling interest by \$11 million.

Accounting Pronouncements Issued But Not Yet Effective

In October 2009, the FASB amended its rules regarding the accounting for multiple element revenue arrangements. The objective of the amendment is to allow vendors to account for revenue for different deliverables separately as opposed to part of a combined unit when those

deliverables are provided at different times. Specifically, this amendment addresses how to separate deliverables and simplifies the process of allocating revenue to the different deliverables when more than one deliverable exists. The new rules are effective for us beginning January 1, 2011. We are in the process of evaluating the impact that this amendment will have on our *Consolidated Financial Statements*.

NOTE 4. EQUITY, ROYALTY AND INTEREST INCOME FROM INVESTEES

Equity, royalty and interest income from investees included in our *Condensed Consolidated Statements of Income* for the interim reporting periods was as follows:

	Three months ended							
In millions		March 28, 2010	M	arch 29, 2009				
Distribution Entities								
North American distributors	\$	23	\$	26				
Komatsu Cummins Chile, Ltda.		3		2				
All other distributors		1		1				
Manufacturing Entities								
Dongfeng Cummins Engine Company,								
Ltd.		18						
Chongqing Cummins Engine Company,								
Ltd.		10		8				
Tata Cummins Ltd.		4		(2)				
All other manufacturers		10		(5)				
Cummins share of net income		69		30				
Royalty and interest income		7		3				
Equity, royalty and interest income from								
investees	\$	76	\$	33				

NOTE 5. PENSION AND OTHER POSTRETIREMENT BENEFITS

We sponsor funded and unfunded domestic and foreign defined benefit pension and other postretirement plans. Cash contributions to these plans were as follows:

		Three mon	nonths ended				
	N	Iarch 28,		March 29,			
In millions		2010		2009			
Defined benefit pension and other postretirement plans:							
Voluntary pension	\$	60	\$				
Mandatory pension		51			7		
Defined benefit pension contributions		111			7		
Other postretirement plans		6			14		
Total defined benefit plans	\$	117	\$		21		
Defined contribution pension plans	\$	11	\$		16		

We presently anticipate contributing approximately \$170 million to our defined benefit pension plans in 2010 and paying approximately \$53 million in claims and premiums for other postretirement benefits. The \$170 million of contributions for the full year include voluntary contributions of approximately \$107 million. These contributions and payments include payments from our funds either to increase pension assets or to make direct payments to plan participants.

The components of net periodic pension and other postretirement benefit cost under our plans consisted of the following:

			Pens	ion					Oth	ier	
	U.S. 1	Plans			Non-U.S Three mon				Postretireme	ent Bene	fits
In millions	arch 28, 2010	M	larch 29, 2009	N	March 28, 2010	N	Iarch 29, 2009	M	arch 28, 2010		rch 29, 2009
Service cost	\$ 11	\$	11	\$	5	\$	4	\$		\$	
Interest cost	28		29		15		13		7		7
Expected return on plan assets	(37)		(35)		(18)		(14)				
Amortization of prior service cost (credit)					1		1		(2)		(2)
Recognized net actuarial loss	9		8		4		5		(=)		(2)
Net periodic benefit cost	\$ 11	\$	13	\$	7	\$	9	\$	5	\$	5

NOTE 6. INVENTORIES

Inventories included the following:

In millions	March 28, 2010	December 31, 2009
Finished products	\$ 857	\$ 785
Work-in-process and raw materials	771	638
Inventories at FIFO cost	1,628	1,423
Excess of FIFO over LIFO	(79)	(82)
Total inventories	\$ 1,549	\$ 1,341

NOTE 7. PRODUCT WARRANTY LIABILITY

We charge the estimated costs of warranty programs, other than product recalls, to income at the time products are shipped to customers. We use historical claims experience to develop the estimated liability. We review product recall programs on a quarterly basis and, if necessary, record a liability when we commit to an action. We also sell extended warranty coverage on several engines. The following is a tabular reconciliation of the product warranty liability, including the deferred revenue related to our extended warranty coverage:

		Three mon	ths end	ed
	Ma	rch 28,]	March 29,
In millions		2010		2009
Balance, beginning of period	\$	989	\$	962
Provision for warranties issued		62		77
Deferred revenue on extended warranty contracts sold		25		26
Payments		(115)		(117)
Amortization of deferred revenue on extended warranty contracts		(21)		(18)
Changes in estimates for pre-existing warranties		(20)		29

Foreign currency translation	(5)	
Balance, end of period	\$ 915	\$ 959

Warranty related deferred revenue, supplier recovery receivables and the long-term portion of the warranty liability on our March 28, 2010 balance sheet were as follows:

In millions	Mar	ch 28, 2010	Balance Sheet Location
Deferred revenue related to extended coverage programs:			
Current portion	\$	82	Deferred revenue
Long-term portion		182	Other liabilities and deferred revenue
Total	\$	264	
Receivables related to estimated supplier recoveries:			
Current portion	\$	5	Trade and other receivables
Long-term portion		3	Other assets
Total	\$	8	
Long-term portion of warranty liability	\$	264	Other liabilities and deferred revenue

NOTE 8. COMMITMENTS AND CONTINGENCIES

We are subject to numerous lawsuits and claims arising out of the ordinary course of our business, including actions related to product liability; personal injury; the use and performance of our products; warranty matters; patent, trademark or other intellectual property infringement; contractual liability; the conduct of our business; tax reporting in foreign jurisdictions; distributor termination; workplace safety; and environmental matters. We also have been identified as a potentially responsible party at multiple waste disposal sites under U.S. federal and related state environmental statutes and regulations and may have joint and several liability for any investigation and remediation costs incurred with respect to such sites. We have denied liability with respect to many of these lawsuits, claims and proceedings and are vigorously defending such lawsuits, claims and proceedings. We carry various forms of commercial, property and casualty, product liability and other forms of insurance; however, such insurance may not be applicable or adequate to cover the costs associated with a judgment against us with respect to these lawsuits, claims and proceedings. We do not believe that these lawsuits are material individually or in the aggregate. While we believe we have also established adequate accruals for our expected future liability with respect to pending lawsuits, claims and proceedings, where the nature and extent of any such liability can be reasonably estimated based upon then presently available information, there can be no assurance that the final resolution of any existing or future lawsuits, claims or proceedings will not have a material adverse effect on our business, results of operations, financial condition or cash flows.

In June 2008, four of our sites in Southern Indiana, including our Technical Center, experienced extensive flood damage. We have submitted a claim for \$237 million to our insurance carriers, which includes a claim for business interruption. As of March 28, 2010, we have received \$91 million in recoveries from the insurance carriers. Our insurance carriers have disputed certain aspects of our claim and the parties have filed suit against each other. Although we believe that we are insured against the full amount of our claim, there is no assurance that we will be successful recovering the amounts we believe are due under the policies.

U.S. Distributor Commitments

Our distribution agreements with independent and partially-owned distributors generally have a three-year term and are restricted to specified territories. Our distributors develop and maintain a network of dealers with which we have no direct relationship. The distributors are permitted to sell other, noncompetitive products only with our consent. We license all of our distributors to use our name and logo in connection with the sale and service of our products, with no right to assign or sublicense the trademarks, except to authorized dealers, without our consent. Products are sold to the distributors at standard domestic or international distributor net prices, as applicable. Net prices are wholesale prices we establish to permit our distributors an adequate margin on their sales. Subject to local laws, we can generally refuse to renew these agreements upon expiration or terminate them upon written notice for inadequate sales, change in principal ownership and certain other reasons. Distributors also have the right to terminate the agreements upon 60-day notice without cause, or 30-day notice for cause. Upon termination or failure to renew, we are required to purchase the distributor s current inventory, signage and special tools, and may, at our option purchase other assets of the distributor, but are under no obligation to do so.

Table of Contents

Residual Value Guarantees

We have various residual value guarantees on equipment leased under operating leases. The total amount of these residual value guarantees at March 28, 2010, was \$8 million.

Other Guarantees and Commitments

In addition to the guarantees discussed above, from time to time we enter into other guarantee arrangements, including guarantees of non-U.S. distributor financing and other miscellaneous guarantees of third-party obligations. As of March 28, 2010, the maximum potential loss related to these other guarantees is \$108 million (\$74 million of which relates to the Beijing Foton guarantee discussed below and \$32 million relates to the Cummins Olayan Energy Limited guarantee discussed below).

We have arrangements with certain suppliers that require us to purchase minimum volumes or be subject to monetary penalties. The penalty amounts are less than our purchase commitments and essentially allow the supplier to recover their tooling costs in most instances. As of March 28, 2010, if we were to stop purchasing from each of these suppliers, the amount of the penalty would be approximately \$69 million, of which \$62 million relates to a contract with an engine parts supplier that extends to 2013. This arrangement enables us to secure critical components. We do not currently anticipate paying any penalties under these contracts.

In July 2008, Beijing Foton Cummins Engine Company, a 50 percent owned entity accounted for under the equity method, entered into a line of credit agreement with a borrowing capacity of up to \$176 million (at current exchange rates). The line will be used primarily to fund equipment purchases for a new manufacturing plant. As a part of this transaction, we guaranteed 50 percent of any outstanding borrowings up to a maximum guarantee of \$88 million (at current exchange rates). As of March 28, 2010, outstanding borrowings under this agreement were \$148 million and our guarantee was \$74 million (at current exchange rates). We recorded a liability for the fair value of this guarantee. The amount of the liability was less than \$1 million. The offset to this liability was an increase in our investment in the joint venture.

In February 2010, Cummins Olayan Energy Limited, a 49 percent owned entity accounted for under the equity method, executed a four-year \$66 million (at current exchange rates) debt financing arrangement to acquire certain rental equipment assets. As a part of this transaction, we guaranteed 49 percent of the total outstanding loan amount or \$32 million (at current exchange rates). We recorded a liability for the fair value of this guarantee. The amount of the liability was less than \$1 million. The offset to this liability was an increase in our investment in the joint venture.

We have guarantees with certain customers that require us to satisfactorily honor contractual or regulatory obligations, or compensate for monetary losses related to nonperformance. Performance bonds and other performance-related guarantees at March 28, 2010, were \$72 million.

Indemnifications

Periodically, we enter into various contractual arrangements where we agree to indemnify a third-party against certain types of losses. Common types of indemnifications include:
• product liability and license, patent or trademark indemnifications,
• asset sale agreements where we agree to indemnify the purchaser against future environmental exposures related to the asset sold and
• any contractual agreement where we agree to indemnify the counter-party for losses suffered as a result of a misrepresentation in the contract.

Table of Contents

We regularly evaluate the probability of having to incur costs associated with these indemnifications and accrue for expected losses that are probable. Because the indemnifications are not related to specified known liabilities and due to their uncertain nature, we are unable to estimate the maximum amount of the potential loss associated with these indemnifications.

Joint Venture Commitments

As of March 28, 2010, we have committed to invest an additional \$4 million into existing joint ventures. It is expected that \$4 million will be funded in 2010.

NOTE 9. FAIR VALUE OF FINANCIAL INSTRUMENTS

The majority of the assets and liabilities we carry at fair value are available-for-sale (AFS) securities and derivatives. AFS securities are derived from level 1 or level 2 inputs. Derivative assets and liabilities are derived from level 2 inputs. The predominance of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services. When material, we adjust the values of our derivative contracts for counter-party or our credit risk. There were no transfers into or out of Levels 2 or 3 in the first quarter of 2010.

The following table summarizes our financial instruments recorded at fair value in our *Condensed Consolidated Balance Sheets* at March 28, 2010:

	Fair Value Measurements Using						
In millions	active m	l prices in narkets for cal assets evel 1)	observa	cant other ble inputs evel 2)	Significant unobservable inputs (Level 3)	1	Total
Available-for-sale debt securities:							
Debt mutual funds	\$	125	\$	13	\$	\$	138
Bank debentures				34			34
Certificates of deposit				33			33
Government debt securities-non-U.S.				3			3
Corporate debt securities				2			2
Total available-for-sale debt securities		125		85			210
Available-for-sale equity securities:							
Financial services industry		7					7
Total available-for-sale equity securities		7					7
Derivative assets:							
Commodity swap contracts				17			17
Interest rate contracts				25			25
Total derivative assets				42			42

Derivative liabilities:			
Foreign currency forward contracts		(8)	(8)
Total derivative liabilities		(8)	(8)
Total	\$ 132	\$ 119 \$	\$ 251

The substantial majority of our assets were valued utilizing a market approach. A description of the valuation techniques and inputs used for our level 2 fair value measures are as follows:

Debt mutual funds Assets in level 2 consist of exchange traded mutual funds that lack sufficient trading volume to be classified at level 1. The fair value measure for these investments is the daily net asset value published on a regulated governmental website. Daily quoted prices are available from the issuing brokerage and are used on a test basis to corroborate this level 2 input.

Table of Contents

Bank debentures and Certificates of deposit These investments provide us with a fixed rate of return and generally range in maturity from six months to one year. The counterparties to these investments are reputable financial institutions with investment grade credit ratings. Since these instruments are not tradable and must be settled directly by Cummins with the respective financial institution, our fair value measure is the financial institutions month-end statement.

Government debt securities non-U.S. and Corporate debt securities The fair value measure for these securities are broker quotes received from reputable firms. These securities are infrequently traded on a national stock exchange and these values are used on a test basis to corroborate our level 2 input measure.

Foreign currency forward contracts The fair value measure for these contracts are determined based on forward foreign exchange rates received from third-party pricing services. These rates are based upon market transactions and are periodically corroborated by comparing to third-party broker quotes.

Commodity swap contracts The fair value measure for these contracts are current spot market data adjusted for the appropriate current forward curves provided by external financial institutions. The current spot price is the most significant component of this valuation and is based upon market transactions. We use third-party pricing services for the spot price component of this valuation which is periodically corroborated by market data from broker quotes.

Interest rate contracts We currently have only one interest rate contract. We utilize the month-end statement from the issuing financial institution as our fair value measure for this investment. We corroborate this valuation through the use of a third party pricing service for similar assets and liabilities.

Fair Value of Other Financial Instruments

Based on borrowing rates currently available to us for bank loans with similar terms and average maturities, considering our risk premium, the fair value and carrying value of total debt, including current maturities, at March 28, 2010 and December 31, 2009, was as follows:

In millions	March 28, 2010	December 31, 2009
Fair value of total debt	\$ 785	\$ 674
Carrying value of total debt	758	703

The carrying values of all other receivables and liabilities approximated fair values.

NOTE 10. DERIVATIVES

We are exposed to financial risk resulting from volatility in foreign exchange rates, commodity prices and interest rates. This risk is closely monitored and managed through the use of financial derivative instruments including foreign currency forward contracts, commodity swap contracts and interest rate swaps. As stated in our policies and procedures, financial derivatives are used expressly for hedging purposes, and under no circumstances are they used for speculative purposes. When material, we adjust the value of our derivative contracts for counter-party or our credit risk. The results and status of our hedging transactions are reported to senior management on a monthly and quarterly basis.

Foreign Exchange Rates

As a result of our international business presence, we are exposed to foreign currency exchange risks. We transact business in foreign currencies and, as a result, our income experiences some volatility related to movements in foreign currency exchange rates. To help manage our exposure to exchange rate volatility, we use foreign exchange forward contracts on a regular basis to hedge forecasted intercompany and third-party sales and purchases denominated in non-functional currencies. Our internal policy allows for managing anticipated foreign currency cash flows for up to one year. These foreign currency forward contracts are designated and qualify as foreign currency cash flow hedges under GAAP. The effective portion of the unrealized gain or loss on the forward contract is deferred and reported as a component of accumulated other comprehensive loss (AOCL). When the hedged

14

forecasted transaction (sale or purchase) occurs, the unrealized gain or loss is reclassified into income in the same line item associated with the hedged transaction in the same period or periods during which the hedged transaction affects income. The ineffective portion of the hedge, unrealized gain or loss, if any, is recognized in current income during the period of change. As of March 28, 2010, we expect to reclassify an unrealized net loss of \$6 million from AOCL to income over the next year. For the three month periods ended March 28, 2010 and March 29, 2009, there were no circumstances that would have resulted in the discontinuance of a foreign currency cash flow hedge.

To minimize the income volatility resulting from the remeasurement of net monetary assets and payables denominated in a currency other than the functional currency, we enter into foreign currency forward contracts, which are considered economic hedges. The objective is to offset the gain or loss from remeasurement with the gain or loss from the fair market valuation of the forward contract. These derivative instruments are not designated as hedges under GAAP.

The table below summarizes our outstanding foreign currency forward contracts. The currencies in this table represent 96 percent and 95 percent of the notional amounts of contracts outstanding as of March 28, 2010 and December 31, 2009, respectively.

	Notional amount in millions				
Currency denomination	March 28, 2010	December 31, 2009			
United States Dollar (USD)	83	107			
British Pound Sterling (GBP)	88	70			
Euro (EUR)	25	12			
Singapore Dollar (SGD)	10	15			
Indian Rupee (INR)	1,934	616			
Japanese Yen (JPY)	1,656	1,335			
Romanian Leu (RON)		44			
Canadian Dollar (CAD)	24				
Chinese Renmimbi (CNY)	79	39			

Commodity Price Risk

We are exposed to fluctuations in commodity prices due to contractual agreements with component suppliers. In order to protect ourselves against future price volatility and, consequently, fluctuations in gross margins, we periodically enter into commodity swap contracts with designated banks to fix the cost of certain raw material purchases with the objective of minimizing changes in inventory cost due to market price fluctuations. The swap contracts are derivative contracts that are designated as cash flow hedges under GAAP. The effective portion of the unrealized gain or loss is deferred and reported as a component of AOCL. When the hedged forecasted transaction (purchase) occurs, the unrealized gain or loss is reclassified into income in the same line item associated with the hedged transaction in the same period or periods during which the hedged transaction affects income. The ineffective portion of the hedge, if any, is recognized in current income in the period in which the ineffectiveness occurs. As of March 28, 2010, we expect to reclassify an unrealized net gain of \$7 million from AOCL to income over the next year. For the period ended March 28, 2010, there were no material circumstances that would have resulted in the discontinuance of a cash flow hedge. For the three month period ended March 29, 2009, we discontinued hedge accounting on certain contracts where the forecasted transactions were no longer probable. The amount reclassified to income as a result of this action was a less than one million dollars for the three months ended March 29, 2009. Our internal policy allows for managing these cash flow hedges for up to three years.

Table of Contents

The following table summarizes our outstanding commodity swap contracts that were entered into to hedge the cost of certain raw material purchases:

	Three months ended						
Dollars in millions		March 28	3, 2010	March 29, 2009			
Commodity	Notiona	l Amount	Quantity	Notion	nal Amount	Quantity	
						21,522 metric	
Copper	\$	61	9,179 metric tons(1)	\$	147	tons(1)	
			12,952 troy			29,055 troy	
Platinum		12	ounces(2)		28	ounces(2)	
Palladium		1	2,619 troy ounces(2)		1	5,399 troy ounces(2)	

- (1) A metric ton is a measurement of mass equal to 1,000 kilograms.
- (2) A troy ounce is a measurement of mass equal to approximately 31 grams.

Interest Rate Risk

We are exposed to market risk from fluctuations in interest rates. We manage our exposure to interest rate fluctuations through the use of interest rate swaps. The objective of the swaps is to more effectively balance our borrowing costs and interest rate risk.

In November 2005, we entered into an interest rate swap to effectively convert our \$250 million debt issue, due in 2028, from a fixed rate of 7.125% to a floating rate based on a LIBOR spread. The terms of the swap mirror those of the debt, with interest paid semi-annually. This swap qualifies as a fair value hedge under GAAP. The gain or loss on this derivative instrument as well as the offsetting gain or loss on the hedged item attributable to the hedged risk are recognized in current income as interest expense. The following table summarizes these gains and losses for the three month interim reporting periods presented below:

		Three months ended						
	March 28, 2010 March 29, 2009							
In millions								
Income Statement	Gain/(Loss)	Gain/(Loss) on	Gain/	(Loss)	Gain/(Le	oss) on		
Classification	on Swaps	Borrowings	on S	waps	Borrov	vings

Total comprehensive income	\$	89	\$	25	\$	114	\$	21	\$	2	\$	23

NOTE 12. RESTRUCTURING AND OTHER CHARGES

In 2009, we executed restructuring actions in response to a reduction in orders in most of our U.S. and foreign markets due to the deterioration in the global economy. We reduced our global workforce by approximately 1,000 professional employees. In addition, we took numerous employee actions at many of our manufacturing locations, including approximately 3,200 hourly employees, significant downsizing at numerous facilities and complete closure of several facilities and branch distributor locations. Employee termination and severance costs were recorded based on approved plans developed by the businesses and corporate management which specified positions to be eliminated, benefits to be paid under existing severance plans, union contracts or statutory requirements and the expected timetable for completion of the plan. Estimates of restructuring were made based on information available at the time charges were recorded. Due to the inherent uncertainty involved, actual amounts paid for such activities may differ from amounts initially recorded and we may need to revise previous estimates.

At March 28, 2010, of the approximately 4,200 employees affected by this plan, all terminations were substantially complete.

During the first quarter of 2009 we recorded a total pre-tax restructuring charge of \$66 million in Restructuring and other charges in the *Condensed Consolidated Statements of Income* related to the 2009 actions.

We do not include restructuring charges in our operating segment results. The pretax impact of allocating restructuring charges to the segment results would have been as follows:

In millions	2009 Cl	narges
Engine	\$	31
Power Generation		3
Components		24
Distribution		4
Non-segment		4
Total restructuring charges	\$	66

The following table summarizes the balance of accrued restructuring charges by expense type and the changes in the accrued amounts for the applicable periods. The restructuring related accruals were recorded in Other accrued expenses in our *Condensed Consolidated Balance Sheets*.

In millions	Severance Costs		Exit Activities		Total	
Balance at December 31,						
2009	3	10	\$	1	\$	11
Cash payments for 2009						
actions		(3)				(3)
Balance at March 28, 2010	3	7	\$	1	\$	8

NOTE 13. ACQUISITIONS

On January 4, 2010, we acquired the remaining 70 percent interest in Cummins Western Canada (CWC) from our former principal for consideration of approximately \$71 million. We formed a new partnership with a new distributor principal where we own 80 percent of CWC and the new distributor principal owns 20 percent. The acquisition was effective on January 1, 2010. The \$71 million of consideration consisted of:

In millions	
Borrowings under credit revolver	\$ 44
Capital contributed by Cummins Inc.	10
Capital contributed by new principal, as described below	8
Funded from first quarter operations	9
Total consideration	\$ 71

Table of Contents

The purchase price was approximately \$97 million as presented below. The intangible assets are primarily customer related and are being amortized over periods ranging from one to three years. The acquisition of CWC was accounted for as a business combination, with the results of the acquired entity and the goodwill included in the Distribution operating segment as of the acquisition date. Distribution segment results also include a \$12 million gain for the three months ended March 28, 2010, as we were required to re-measure our pre-existing 30 percent ownership interest in CWC to fair value in accordance with GAAP. Net sales for CWC were \$206 million for the twelve months ended December 31, 2009, which represents less than 2 percent of Cummins Inc. consolidated sales for same period.

The purchase price was allocated as follows:

In millions	
Accounts receivable	\$ 31
Inventory	48
Fixed assets	45
Intangible assets	11
Goodwill	2
Other assets	2
Current liabilities	(42)
Total purchase price	\$ 97
Fair value of pre-existing 30 percent interest	(26)
Consideration given	\$ 71

We provided a loan to our partner of approximately \$8 million to fund the purchase of his 20 percent interest. The purchase transaction resulted in \$8 million of noncontrolling interest (representing our partner s 20 percent interest) which was completely offset by the \$8 million receivable from our partner, reducing the noncontrolling interest impact to zero as of the acquisition date. The interest-bearing loan is expected to be repaid over a period of 3-5 years. The partner also has periodic options to purchase an additional 10 to 15 percent interest in CWC up to a maximum of an additional 30 percent (total ownership not to exceed 50 percent).

At March 29, 2009, we had one minor acquisition with consideration of approximately \$2 million.

NOTE 14. OPERATING SEGMENTS

Our reportable operating segments consist of the following: Engine, Power Generation, Components and Distribution. This reporting structure is organized according to the products and markets each segment serves. We use segment EBIT (defined as earnings or loss before interest expense, income taxes and noncontrolling interests) as the primary basis for the chief operating decision-maker to evaluate the performance of each operating segment.

A summary of operating results by segment for the three month periods is shown below:

·	ъ.	Power		D: () (1)	Non-segment	m 1
In millions	Engine	Generation	Components	Distribution(1)	items(2)	Total
Three months ended March 28, 2010						
External sales	\$ 1,173					2,478

Three months ended March 29, 2009						
External sales	\$ 1,205	\$ 477	\$ 346	\$ 411	\$	2,439
Intersegment sales	287	180	184	2	(653)	
Total sales	1,492	657	530	413	(653)	2,439
Depreciation and amortization(3)	41	11	18	5		75
Research, development and engineering						
expenses	58	8	19			85
Equity, royalty and interest income						
(loss) from investees	(3) 5	1	30		33
Restructuring charges					66	66
Interest income	1	1				2
Segment EBIT	(16) 69	1	58	(84)	28

⁽¹⁾ Total assets for our Distribution segment materially increased due to the acquisition of Cummins Western Canada. See Note 13 for further information.

⁽²⁾ Includes intersegment sales and profit in inventory eliminations and unallocated corporate expenses. There were no significant unallocated corporate expenses for the three months ended March 28, 2010. For the three months ended March 29, 2009, unallocated corporate expenses included \$66 million of restructuring charges and a \$6 million gain related to flood damage recoveries.

⁽³⁾ Depreciation and amortization as shown on a segment basis excludes the amortization of debt discount that is included in the *Condensed Consolidated Statements of Income* as interest expense.

A reconciliation of our segment information to the corresponding amounts in the *Condensed Consolidated Statements of Income* is shown in the table below:

	Three months ended					
		March 28,		March 29,		
In millions		2010		2009

Less:						
Interest expense		9		7		
Income before income taxes	\$	257	\$	21		

20

Table of Contents

NOTE 15. SUBSEQUENT EVENT

In April 2010, we terminated our existing facility and entered into a new 364-day agreement (subject to renewal) with a financial institution to sell a designated pool of trade receivables to Cummins Trade Receivables, LLC (CTR), a wholly-owned subsidiary. The purchase limitation of the agreement is \$250 million. As necessary, CTR may transfer a direct interest in its receivables, without recourse, to a commercial paper conduit. To maintain a balance in the designated pools of receivables sold, we sell new receivables to CTR as existing receivables are collected. Receivables sold to CTR in which an interest is not transferred to the conduit are included in Receivables, net on our *Consolidated Balance Sheets*. The maximum interest in sold receivables that can be outstanding at any point in time is limited to the lesser of \$250 million or the amount of eligible receivables held by CTR. There are no provisions in this agreement that require us to maintain a minimum investment credit rating; however, the terms of the agreement contain the same financial covenants as our revolving credit facility. As of April 26, 2010, (the day of closing) the amount available under this program was \$72 million.

CTR is a separate legal entity from Cummins and its assets and credit are not available to satisfy the debts and obligations of Cummins. CTR s assets are listed separately on its balance sheet on a stand-alone basis. CTR s assets will be available first and foremost to satisfy claims of its creditors.

Cummins Inc. and its consolidated subsidiaries are hereinafter sometimes referred to as Cummins, the Company, we, our, or us.

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING INFORMATION

Certain parts of this quarterly report contain forward-looking statements intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include those that are based on current expectations, estimates and projections about the industries in which we operate and management s beliefs and assumptions. Forward-looking statements are generally accompanied by words such as anticipates, expects, forecasts, intends, plans, believes, seeks. estimates. should, or wor could. meaning. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions, which we refer to as future factors, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some future factors that could cause our results to differ materially from the results discussed in such forward-looking statements are discussed below and shareholders, potential investors and other readers are urged to consider these future factors carefully in evaluating forward-looking statements. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. Future factors that could affect the outcome of forward-looking statements include the following:

- price and product competition by foreign and domestic competitors, including new entrants;
- rapid technological developments of diesel engines;
- our ability to continue to introduce competitive new products in a timely, cost-effective manner;
- our sales mix of products;
- our continued achievement of lower costs and expenses;
- domestic and foreign governmental and public policy changes, including environmental regulations;

• 1	protection and validity of our patent and other intellectual property rights;
• (our reliance on large customers;
• t	echnological, implementation and cost/financial risks in our increasing use of large, multi-year contracts;
• t	he cyclical nature of some of our markets;
• t	he outcome of pending and future litigation and governmental proceedings;
	continued availability of financing, financial instruments and financial resources in the amounts, at the times and on the terms required to ort our future business;
• t	he overall stability of global economic markets and conditions; and
• (other risk factors described in our 2009 Form 10-K, Part 1, Item 1A under the caption Risk Factors.
econo	dition, such statements could be affected by general industry and market conditions and growth rates, general domestic and international omic conditions, including the price of crude oil (diesel fuel), interest rate and currency exchange rate fluctuations, commodity prices and future factors.

EXECUTIVE SUMMARY AND FINANCIAL HIGHLIGHTS

We are a global power leader that designs, manufactures, distributes and services diesel and natural gas engines, electric power generation systems and engine-related component products, including filtration, exhaust aftertreatment, fuel systems, controls and air handling systems. We sell our products to original equipment manufacturers (OEMs), distributors and other customers worldwide. We have long-standing relationships with many of the leading manufacturers in the markets we serve, including PACCAR Inc., Daimler Trucks North America, Chrysler Group, LLC, Volvo AB, Ford Motor Company, Komatsu, MAN Nutzfahrzeuge AG and Case New Holland. We serve our customers through a network of more than 500 company-owned and independent distributor locations and approximately 5,200 dealer locations in more than 190 countries and territories.

Our reportable operating segments consist of the following: Engine, Power Generation, Components and Distribution. This reporting structure is organized according to the products and markets each segment serves and allows management to focus its efforts on providing enhanced service to a wide range of customers. The Engine segment produces engines and parts for sale to customers in on-highway and various industrial markets. The engines are used in trucks of all sizes, buses and recreational vehicles, as well as various industrial applications including construction, mining, agriculture, marine, oil and gas, rail and military. The Power Generation segment is an integrated provider of power systems which sells engines, generator sets and alternators. The Components segment sells filtration products, exhaust aftertreatment systems, turbochargers and fuel systems. The Distribution segment includes wholly-owned and partially-owned distributorships engaged in wholesaling engines, generator sets and service parts, as well as performing service and repair activities on our products and maintaining relationships with various OEMs throughout the world.

Our financial performance depends, in large part, on varying conditions in the markets we serve, particularly the on-highway, construction and general industrial markets. Demand in these markets tends to fluctuate in response to overall economic conditions and is particularly sensitive to changes in interest rate levels and our customers access to credit. Our sales may also be impacted by OEM inventory levels and production schedules and stoppages. Economic downturns in markets we serve generally result in reductions in sales and pricing of our products. As a worldwide business, our operations are also affected by political, economic and regulatory matters, including environmental and emissions standards, in the countries we serve. At the same time, our geographic diversity and broad product and service offerings have helped limit the impact from a drop in demand in any one industry or customer and the economy of any single country on our consolidated results.

In the first quarter of 2010, we continued to see signs of economic recovery particularly in the emerging markets with stronger demand in China, India and Brazil which mostly offset the weaker demand in North America. As we expected, after the strong demand in the second half of 2009 in advance of the 2010 U.S. emissions change, demand for our medium-duty and heavy-duty on-highway products in North America was down approximately 80 percent in the first quarter of 2010 as compared to the same period in 2009. We expect demand to improve throughout 2010 in most markets and we expect demand in emerging markets to remain strong.

Although total revenue for the first quarter of 2010 was only two percent higher than the same period in 2009, our first quarter results were significantly better, primarily due to the gross margin improvement of 35 percent over the same period in 2009. Our current results reflect operational efficiencies gained from our lower cost structure as the result of restructuring actions taken in late 2008 and throughout 2009. In addition, we benefited from price increases, and lower material and warranty costs. We expect margins to remain strong throughout 2010, however, product mix could add downward pressure to gross margin percentage as we sell more 2010 engines and accrue higher warranty costs for new product launches. We could also experience increasing commodity cost pressure.

Net income attributable to Cummins was \$149 million, or \$0.75 per diluted share, on sales of \$2.5 billion for the three month interim reporting period ended March 28, 2010, versus the comparable prior year period with net income attributable to Cummins of \$7 million, or \$0.04 per diluted share, on sales of \$2.4 billion. We recorded restructuring charges of \$66 million, or \$0.22 per share in the first quarter of 2009. The increase in income was driven by improved gross margin primarily due to manufacturing efficiencies as the result of restructuring actions taken in late 2008 and throughout 2009 and the absence of restructuring charges in 2010. Equity earnings more than doubled from the same period last year, also contributing to the improvement in income.

Net Sales

Net sales for the three month period ended March 28, 2010, increased in the Components and Distribution segments versus the comparable period in 2009, primarily due to increased demand from the slight improvement in global economic conditions. The primary drivers were:

[•] Components segment sales increased by 19 percent due to increased demand in most lines of business led by the turbo technologies and filtration businesses, particularly in international markets and emission solutions in North America.

•	Distribution segment sales increased by 15 percent primarily due to the acquisition of the majority interest in an equity investee.
These inc	reases were partially offset by the following:
of 31 perc	Engine segment sales decreased by 5 percent primarily due to declines in on-highway sales of 13 percent and stationary power sale tent.
• line of bu	Power Generation segment sales decreased by 21 percent due to declines in most lines of business led by the commercial products siness.
A more de	etailed discussion of sales by segment is presented in the OPERATING SEGMENT RESULTS section.
	nternational markets based on location of customers for the three month period ended March 28, 2010, were 64 percent of total net appared with 52 percent of total net sales for the comparable period in 2009.
	25

Gross Margin

Significant drivers of the change in gross margin for the three month period ended March 28, 2010, versus the comparable period ended March 29, 2009, were as follows:

In millions	Increase (Do 2010 vs. Three month	2009
Warranty expense	\$	66
Production costs		41
Price		35
Currency		34
Material costs		33
Acquisition		12
Volume/Mix		(62)
Other		(3)
Total	\$	156

Gross margin increased by \$156 million for the three month period ended March 28, 2010, versus the comparable period in 2009, and increased as a percentage of sales by 6.1 percentage points. The increase was led by decreases in warranty expense, production costs and material costs as well as favorable pricing and foreign currency impacts, which were partially offset by lower volumes. The provision for warranties issued as a percent of sales was 2.5 percent in 2010 compared to 3.1 percent in 2009 for the three month period. The decrease as a percent of sales was primarily due to the engine mix.

A more detailed discussion of margin by segment is presented in the OPERATING SEGMENT RESULTS section.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to an increase of \$25 million in compensation and related expenses. Compensation and related expenses include salaries, fringe benefits and variable compensation. Variable compensation related to 2010 performance increased \$17 million over variable compensation related to 2009 performance.

Research, Development and Engineering Expenses

Research, development and engineering expenses for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to an increase of \$7 million in compensation and related expenses and decreased reimbursements for engineering projects which were partially offset by a decrease in the number of engineering projects. Compensation and related expenses include salaries, fringe

benefits and variable compensation. Variable compensation related to 2010 performance increased \$7 million over variable compensation related to 2009 performance. Research activities continue to focus on development of new products to meet future emission standards around the world and improvements in fuel economy performance.

Equity, Royalty and Interest Income From Investees

Equity, royalty and interest income from investees for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to the following:

	Increase/	(Decrease)
	2010 v	s. 2009
In millions	Three mo	nths ended
Dongfeng Cummins Engine Company, Ltd. (DCEC)	\$	18
Tata Cummins Ltd. (TCL)		6

These increases were primarily due to higher demand as a result of economic recovery in emerging markets.

Other Operating (Expense) Income, net

Other operating (expense) income was as follows:

	Three months ended				
In millions	March	28, 2010	Mar	ch 29, 2009	
Amortization of intangible assets	\$	(4)	\$	(2)	
Royalty expense		(1)		(3)	
Flood damage (loss) gain		(1)		6	
Royalty income		2		2	
Other income (expense), net				(1)	
Total other (expense) income, net	\$	(4)	\$	2	

Interest Income

Interest income for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to increased investment balances in the first quarter of 2010 compared to the first quarter of 2009.

Interest Expense

Interest expense for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to increased interest expense on capital leases.

Other Income (Expense), net

Other income (expense) was as follows:

	Three months ended			
In millions]	March 28, 2010		March 29, 2009
Gain on acquisition of Cummins Western Canada (CWC)(1)	\$	12	\$	
Foreign currency gains (losses), net		7		(8)
Other, net		(2)		5
Total other income (expense), net	\$	17	\$	(3)

⁽¹⁾ See Note 13, ACQUISITIONS, to the Condensed Consolidated Financial Statements for further information.

Income Tax Expense

Our effective tax rate for the year is expected to approximate 31 percent, absent discrete period activity. Our tax rate is generally less than the 35 percent U.S. income tax rate primarily due to lower tax rates on foreign income. The tax rate for the three month period ended March 28, 2010, was 34 percent and includes a discrete tax charge of \$7 million (3 percent) related to the enactment of the Patient Protection and Affordable Care Act.

Table of Contents

Our effective tax rate for March 29, 2009 was 33 percent. This rate is less than the 35 percent U.S. income tax rate primarily due to lower tax rates on foreign income.

Noncontrolling Interests

Noncontrolling interests eliminate the income or loss attributable to non-Cummins ownership interests in our consolidated entities. Noncontrolling interests in income of consolidated subsidiaries for the three month period ended March 28, 2010, increased versus the comparable periods in 2009, primarily due to higher income at Cummins India Ltd., a publicly traded company on various exchanges in India, and Wuxi Cummins Turbo Technologies Co. Ltd. reflecting the modest economic recovery in emerging markets.

Net income and diluted earnings per share attributable to Cummins Inc.

Net income and diluted earnings per share attributable to Cummins Inc. for the three month period ended March 28, 2010, increased versus the comparable period in 2009, primarily due to cost reductions, higher volumes in emerging markets, increased equity income and restructuring charges incurred in 2009 that were not repeated in 2010. These were partially offset by higher income tax expense.

RESTRUCTURING AND OTHER CHARGES

In 2009, we executed restructuring actions in response to a reduction in orders in most of our U.S. and foreign markets due to the deterioration in the global economy. We reduced our global workforce by approximately 1,000 professional employees. In addition, we took numerous employee actions at many of our manufacturing locations, including approximately 3,200 hourly employees, significant downsizing at numerous facilities and complete closure of several facilities and branch distributor locations. Employee termination and severance costs were recorded based on approved plans developed by the businesses and corporate management which specified positions to be eliminated, benefits to be paid under existing severance plans, union contracts or statutory requirements and the expected timetable for completion of the plan. Estimates of restructuring were made based on information available at the time charges were recorded. Due to the inherent uncertainty involved, actual amounts paid for such activities may differ from amounts initially recorded and we may need to revise previous estimates.

At March 28, 2010, of the approximately 4,200 employees affected by this plan, all terminations were substantially complete.

During the first quarter of 2009 we recorded a total pre-tax restructuring charge of \$66 million in Restructuring and other charges in the *Condensed Consolidated Statements of Income* related to the 2009 actions.

We do not include restructuring charges in our operating segment results. The pretax impact of allocating restructuring charges to the segment results would have been as follows:

In millions	2009 Cl	narges
Engine	\$	31
Power Generation		3
Components		24
Distribution		4
Non-segment		4
Total restructuring charges	\$	66

The following table summarizes the balance of accrued restructuring charges by expense type and the changes in the accrued amounts for the applicable periods. The restructuring related accruals were recorded in other accrued expenses in our *Condensed Consolidated Balance Sheets*.

In millions	Sever	ance Costs	Exit Activities		Total	
Balance at December 31, 2009	\$	10	\$	1	\$	11
Cash payments for 2009 actions		(3)				(3)
Balance at March 28, 2010	\$	7	\$	1	\$	8

OUTLOOK

Near-Term:

Many of the international markets we serve are improving from their low levels in 2009. We continue to see signs of recovery in emerging markets including China, India and Brazil and expect this trend to continue throughout 2010 although there is some concern that availability of credit may tighten in China and India later in the year. Consistent with prior emissions standards implementations, the North American on-highway markets experienced increased demand prior to the implementation of the EPA s 2010 emissions standards change, leading to reduced demand in the first quarter of 2010. Based on our prior experience, we expect heavy-duty engine sales to on-highway OEM customers to remain weak through the second quarter of 2010; however, we expect this market will begin to improve in the second half of the year. In most of our other markets, we expect demand to continue to improve throughout 2010.

m	. 1		c	\sim			
Tal	hl	e	Ωt	(:(าท	te	nts

Long-Term:

We are starting to see signs of improvement in our current markets and we are confident that opportunities for long-term growth and profitability will continue in the future.

OPERATING SEGMENT RESULTS

Our operating segments consist of the following: Engine, Power Generation, Components and Distribution. This reporting structure is organized according to the products and markets each segment serves. We use segment EBIT (defined as earnings or loss before interest expense, income taxes and noncontrolling interests) as the primary basis for the chief operating decision-maker to evaluate the performance of each operating segment.

Following is a discussion of operating results for each of our business segments.

Engine Segment Results

Financial data for the Engine segment was as follows:

	Three months ended					Favorable/			
In millions		March 28, 2010		March 29, 2009		(Unfavorable) Amount	Percent

Heavy-duty	8,700	16,600	(7,900)	(48)%
High-horsepower	3,400	3,900	(500)	(13)%
Total unit shipments	81,200	81,100	100	%

Table of Contents
Sales
Engine segment sales for the three month period ended March 28, 2010, decreased versus the comparable period in 2009, due to weakness in most North American markets, especially the heavy-duty and medium-duty truck markets, which was partially offset by improvements in international markets, especially emerging markets. The following are the primary drivers by market.
• Heavy-duty truck sales declined, consistent with prior emissions standards changes, as North American (includes the U.S and Canada and excludes Mexico) unit sales declined 80 percent due to increased engine purchases by OEMs in late 2009 ahead of the EPA s 2010 emissions standards change as part of the OEM s transition plan.
• Stationary power engine sales declined due to decreased demand in the power generation markets.
These decreases were partially offset by:
• Industrial market sales increased due to a 99 percent improvement in construction shipments and an 18 percent improvement in units sold in the mining markets.
• Light-duty truck sales increased due to increased demand from Chrysler.
Total on-highway-related sales for the three month period ended March 28, 2010, were 48 percent of total engine segment sales, compared to 52 percent for the comparable period in 2009.
Segment EBIT
Engine segment EBIT for the three month period ended March 28, 2010, increased significantly versus the comparable period in 2009, primarily due to higher gross margin and equity, royalty and interest income from investees which were partially offset by increased selling, general and administrative expenses. Changes in Engine segment EBIT and EBIT as a percentage of sales were as follows:
Three months ended

March 28, 2010 vs. March 29, 2009 Favorable/(Unfavorable) Change

				Percentage point change as a
In millions	A	mount	Percent	percent of sales
Gross margin	\$	117	63%	8.9 percentage points
Equity, royalty and interest income from				
investees		38	NM	NM
Selling, general and administrative expenses		(10)	(7)%	(1.2) percentage points

The increase in gross margin for the three month period ended March 28, 2010, versus the comparable period in 2009, was primarily due to cost structure improvements from actions taken in late 2008 and early 2009, decreased warranty expense, price realization, decreased material costs and increased volumes in certain markets as a result of improvements in global economic conditions, which were partially offset by decreased volumes in the North American heavy-duty truck market as a result of the EPA 2010 emissions standards change. Equity, royalty and interest income from investees increased due to higher demand in emerging markets, especially at DCEC, Komatsu-Cummins Engine Company and TCL. The increase in selling, general and administrative expenses was primarily due to increased variable compensation.

Power Generation Segment Results

Financial data for the Power Generation segment was as follows:

		Three mon	ths en	ded	Favorable/			
	March 28,		March 29,			(Unfavorable))	
In millions		2010		2009		Amount	Percent	
External sales	\$	378	\$	477	\$	(99)	(21)%	
Intersegment sales		139		180		(41)	(23)%	
Total sales		517		657		(140)	(21)%

Interest income		1		1			%	
Segment EBIT		34		69		(35)	(51)%	
Segment EBIT as a percentage of total sales		6.6%		10.5%)	(3.9) perce	ntage points	

Sales for our Power Generation segment by business were as follows:

	Three months ended March 28, March 29,					Favorable (Unfavorabl	ole)	
In millions		2010	2009			Amount	Percent	
Commercial products	\$	307	\$	419	\$	(112)	(27)%	
Generator technologies		107		135		(28)	(21)%	
Consumer		43		30		13	43%	
Commercial projects		33		42		(9)	(21)%	
Power electronics		27		31		(4)	(13)%	
Total sales	\$	517	\$	657	\$	(140)	(21)%	

Sales

Power Generation segment sales for the three month period ended March 28, 2010, decreased in most businesses, versus the comparable period in 2009, as our Power Generation segment entered the downturn after the first quarter of 2009. The following are the primary drivers by business.

• Commercial products business sales decreased due to lower demand across most regions, especially in the Middle East, North America, the U.K. and Africa.

• Generator technologies business sales decreased due to lower demand in Western Europe.

Segment EBIT

Power Generation segment EBIT for the three month period ended March 28, 2010, decreased versus the comparable period in 2009, primarily due to lower gross margin and increased selling, general and administrative expenses. Changes in Power Generation segment EBIT and EBIT as a percentage of sales were as follows:

Three month period March 28, 2010 vs. March 29, 2009 Favorable/(Unfavorable) Change

In millions	Ar	nount	Percent	Percentage point change as a percent of sales
Gross margin	\$	(34)	(28)%	(1.5) percentage points
Selling, general and administrative expenses		(4)	(8)%	(2.9) percentage points
Research, development and engineering				
expenses		1	13%	(0.2) percentage points
Equity, royalty and interest income from				
investees		1	20%	NM

31

Table of Contents

The decrease in gross margin for the three month period ended March 28, 2010, was primarily due to lower volumes and unfavorable absorption which were partially offset by cost structure improvements from actions taken in 2009, decreased material and commodity costs and favorable foreign currency translation.

Components Segment Results

Financial data for the Components segment was as follows:

	Three months ended March 28, March 29,					Favorabl (Unfavoral	-,
In millions	2	2010	2	2009		Amount	Percent
External sales	\$	453	\$	346	\$	107	31%
Intersegment sales		177		184		(7)	(4)%
Total sales		630		530		100	19%
Depreciation and amortization		20		18		(2)	(11)%
Research, development and engineering expenses		25		19		(6)	(32)%
Equity, royalty and interest income from investees		5		1		4	NM
Segment EBIT		57		1		56	NM
Segment EBIT as a percentage of total sales		9.0%		0.2%	,	8.8 percei	ntage points

Sales for our Components segment by business were as follows:

		Three months ended March 28, March 29,				Favorable/ (Unfavorable)		
In millions	2	010	2	009	A	Amount	Percent	
Filtration	\$	228	\$	201	\$	27	13%	
Turbo technologies		200		156		44	28%	
Emission solutions		137		105		32	30%	
Fuel systems		65		68		(3)	(4)%	
Total sales	\$	630	\$	530	\$	100	19%	

Sales

Components segment sales for the three month period ended March 28, 2010, increased in most businesses versus the comparable period in 2009. The increase was primarily the result of aftermarket recovery in the turbo technologies and filtration businesses and improved demand in emerging markets for most businesses and in North America for our emission solutions business. The following are the primary regional drivers by business.

- Turbo technologies business sales increased due to improved demand and OEM s resuming production to restock their inventory channels especially in China, Europe, India and Latin America which was partially offset by decreased demand in North America.
- Emission solutions business sales increased due to increased demand in North America for pre-2010 aftertreatment systems for engines that were ordered in the fourth quarter of 2009 as well as sales of our new EPA 2010 aftertreatment systems.
- Filtration business sales increased due to improved demand in Latin America, Europe, the South Pacific, Asia and in Africa and the Middle East as well as favorable foreign currency impacts.

Segment EBIT

Components segment EBIT for the three month period ended March 28, 2010, increased significantly versus the comparable period in 2009, primarily due to improved gross margin which was partially offset by increased selling, general and administrative and research, development and engineering expenses. Changes in Components segment EBIT and EBIT as a percentage of sales were as follows:

Three months ended March 28, 2010 vs. March 29, 2009 Favorable/(Unfavorable) Change

In millions	Amo	ount	Percent	Percentage point change as a percent of sales
Gross margin	\$	63	100%	8.1 percentage points
Selling, general and administrative expenses		(5)	(11)%	0.6 percentage points
Research, development and engineering				
expenses		(6)	(32)%	(0.4) percentage points
Equity, royalty and interest income from				
investees		4	NM	NM

The increase in gross margin for the three month period ended March 28, 2010, was due to higher volumes for most businesses, cost structure improvements from actions taken in late 2008 and throughout 2009 and favorable foreign currency translation. The increase in selling, general and administrative expenses and research, development and engineering expenses were primarily due to higher compensation and emission development program expenses.

Distribution Segment Results

Financial data for the Distribution segment was as follows:

		Three months ended				e/

		Three mon	ths en	ded	Favorable/		
	Ma	rch 28,	M	arch 29,	(Unfavoral	ole)	
In millions	2	2010		2009	Amount	Percent	
Sales excluding impact from acquisition(1)	\$	422	\$	413	\$ 9	2%	
EBIT excluding impact from acquisition(1)		59(2)		58	1	2%	

⁽¹⁾ The acquisition represents the purchase of the majority interest in Cummins Western Canada (CWC), an equity investee, in the three months ended March 28, 2010, as explained in Note 13, ACQUISITIONS, to the *Condensed Consolidated Financial Statements*. The acquisition increased sales by \$54 million and EBIT by \$15 million for the three months ended March 28, 2010.

Sales

Distribution segment sales, excluding the acquisition, for the three month period ended March 28, 2010, increased versus the comparable period in 2009, in parts and service which were partially offset by lower sales in the power generation, engine and filtration product lines. The increase was also partially driven by a favorable foreign currency impact.

Segment EBIT

Distribution segment EBIT for the three month period ended March 28, 2010, increased versus the comparable periods in 2009, primarily due to a one-time gain from an acquisition which was partially offset by increased selling, general and administrative expenses. Changes in Distribution segment EBIT and EBIT as a percentage of sales were as follows:

Three months ended March 28, 2010 vs. March 29, 2009 Favorable/(Unfavorable) Change

In millions	Ar	nount	Percent	Percentage point change as a percent of sales
Gross				
Gross margin	\$	16	17%	0.3 percentage points
Other income(1)		13	NM	NM
Selling, general and administrative				
expenses		(15)	(23)%	(1.0) percentage points
Excluding acquisition				
Gross margin	\$	4	4%	0.4 percentage points
Selling, general and administrative				
expenses		(7)	(11)%	(1.3) percentage points

⁽²⁾ This amount includes \$2 million of equity earnings which would have been our share of CWC s income for the three months ended March 28, 2010, if we had not consolidated them.

(1) The primary increase in other income represents the purchase of the majority interest in an equity investee in the three months ended March 28, 2010, which resulted in a gain as explained in Note 13, ACQUISITIONS, to the *Condensed Consolidated Financial Statements*.

Excluding the acquisition, the increase in gross margin for the three month period ended March 28, 2010, versus the comparable period in 2009, was primarily due to favorable foreign currency impacts partially offset by unfavorable pricing, product mix, customer mix and lower sales volumes. Excluding the effects from the acquisition, the increase in selling, general and administrative expenses was mainly due to unfavorable foreign currency impacts.

Reconciliation of Segment EBIT to Income Before Income Taxes

The table below reconciles the segment information to the corresponding amounts in the Condensed Consolidated Statements of Income:

	Three months ended					
In millions	Marcl	h 28, 2010	March 29, 2009			
Total segment EBIT	\$	296	\$	112		
Non-segment EBIT (1)		(30)		(84)		
Total EBIT	\$	266	\$	28		
Less:						
Interest expense		9		7		
Income before income taxes	\$	257	\$	21		

(1) Includes intersegment profit in inventory eliminations and unallocated corporate expenses. There were no significant unallocated corporate expenses for the three month period ended March 28, 2010. For the three month period ended March 29, 2009, unallocated corporate expenses included \$66 million of restructuring and other charges and a \$6 million gain from flood damage recoveries.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Management s Assessment of Liquidity

Our financial condition and liquidity remain strong. Our strong balance sheet and credit ratings enable us to continue to have access to credit.

We assess our liquidity in terms of our ability to generate adequate cash to fund our operating, investing and financing activities. Cash provided by operations is our principal source of liquidity. As of March 28, 2010, other sources of liquidity include:

- cash and cash equivalents of \$885 million,
- marketable securities of \$217 million,
- \$1.07 billion available under our revolving credit facility,
- \$266 million available under international and other domestic credit facilities and
- \$59 million, based on eligible receivables, available under our accounts receivable sales program.

We believe our liquidity provides us with the financial flexibility needed to fund working capital, capital expenditures, projected pension obligations, dividend payments, common stock repurchases and debt service obligations.

Although economic conditions in many of our markets have started to improve and global credit availability has started to ease, our customers and suppliers could still be negatively impacted by economic challenges. We have considered these impacts in assessing the adequacy of our liquidity and capital resources and are monitoring the impact on our customers and suppliers. Despite these challenges, we expect to generate positive cash flow from operations in 2010. We will continue to diligently monitor our receivables for potential slowing in collections and our customer s access to credit.

At this time, we are comfortable that the currently unused \$1.07 billion credit capacity under our revolving credit facility is available to us. This assertion is based upon the fact that we drew upon our revolving credit facility in February 2010, with a prompt repayment, to confirm participation by the banks included in the facility. As a result, we believe our access to liquidity sources has not been materially impacted by the credit environment and we do not expect that it will be materially impacted in the near future. There can be no assurance, however, that the cost or availability of future borrowings, if any, in the debt markets or our credit facilities will not be materially impacted by the ongoing capital market disruptions.

A significant portion of our cash flows is generated outside the U.S. More than half of our cash and cash equivalents and most of our marketable securities at March 28, 2010, are denominated in foreign currencies. We manage our worldwide cash requirements considering available funds among the many subsidiaries through which we conduct our business and the cost effectiveness with which those funds can be accessed. The repatriation of cash balances from certain subsidiaries could have adverse tax consequences; however, those balances are generally available, without legal restrictions, to fund ordinary business operations at the local level. We have and will continue to transfer cash from these subsidiaries to us and to other international subsidiaries when it is cost effective to do so.

Working Capital Summary

We fund our working capital with cash from operations and short-term borrowings when necessary. Various assets and liabilities, including short-term debt, can fluctuate significantly from month to month depending on short-term liquidity needs. As a result, working capital is a prime focus of management attention.

						Char March 28,	0	0 vs.
In millions	March 28, 2010	Ι	December 31, 2009	March 29, 2009	Γ	December 31, 2009		March 29, 2009
Cash and cash equivalents	\$ 885	\$	930	\$ 353	\$	(45)	\$	532
Accounts and notes								
receivable	1,727		2,004	1,729		(277)		(2)
Inventories	1,549		1,341	1,738		208		(189)
Other current assets	759		728	614		31		145
Current assets	4,920		5,003	4,434		(83)		486
Accounts and loans								
payable	1,125		994	950		131		175
Current portion of accrued								
warranty	387		426	382		(39)		5
Other accrued expenses	974		1,012	949		(38)		25
Current liabilities	2,486		2,432	2,281		54		205
Working capital	\$ 2,434	\$	2,571	\$ 2,153	\$	(137)	\$	281
Current ratio	1.98		2.06	1.94		(0.08)		0.04
Days sales in receivables	69		64	66		5		3
Inventory turnover	5.1		5.2	4.3		(0.1)		0.8

Current assets decreased compared to December 31, 2009, primarily due to decreased accounts and notes receivable caused by lower sales partially offset by an increase in inventory due to restocking the distribution channel in anticipation of sales growth in certain markets and the consolidation of CWC.

Current liabilities increased compared to December 31, 2009, primarily due to an increase in accounts and loans payable primarily due to the acquisition of the majority interest in CWC and increased purchasing volume.

Cash Flows

Cash and cash equivalents decreased \$45 million during the three month period ended March 28, 2010, compared to a \$73 million decrease in cash and cash equivalents during the comparable period in 2009. The change in cash and cash equivalents was as follows:

Operating Activities

In millions	Ma	rch 28, 2010	Mar	ch 29, 2009	Change	
Consolidated net income	\$	170	\$	14	\$	156
Restructuring charges				48		(48)
Depreciation and amortization		79		76		3
Gain on fair value adjustment for consolidated						
investee		(12)				(12)
Equity in income of investees, net of dividends		(53)		52		(105)
Pension expense, net of pension contributions		(93)		15		(108)
Translation and hedging activities		(9)		19		(28)
Changes in:						
Accounts and notes receivable		275		49		226
Inventories		(189)		44		(233)
Accounts payable		54		(103)		157
Accrued expenses		(154)		(173)		19
Changes in long-term liabilities		29		36		(7)
Other, net		29		(1)		30
Net cash provided by operating activities	\$	126	\$	76	\$	50

Net cash provided by operating activities increased for the three months ended March 28, 2010, versus the comparable period in 2009, primarily due to higher consolidated net income and favorable working capital fluctuations as a result of the trend of increasing sales and production at the end of the first quarter in 2010 versus a trend of decreasing sales and production at the end of the first quarter in 2009. In addition, collections on accounts and notes receivable benefited from stronger sales in the fourth quarter of 2009, as compared to the same quarter in 2008. These favorable trends were partially offset by higher inventories mostly due to a build-up of levels to meet anticipated demand, increased pension contributions and lower dividends from our equity investees.

Pensions

The funded status of our pension plans is dependent upon a variety of variables and assumptions including return on invested assets, market interest rates and levels of voluntary contributions to the plans. In the first quarter of 2010, financial markets continued to recover from the global economic recession. Thus, for the three month interim reporting period ended March 28, 2010, the return for our U.S. plan was 3.8 percent while our U.K. plan return was 5.9 percent. Approximately 94 percent of our pension plan assets are invested in highly liquid investments such as equity and fixed income securities. The remaining six percent of our plan assets are invested in less liquid, but market valued investments, including real estate and private equity. We made \$111 million of pension contributions in the three month period ended March 28, 2010 and we anticipate making contributions of approximately \$170 million to our pension plans in 2010. Expected contributions to our defined benefit pension plans in 2010 will meet or exceed the current funding requirements. Claims and premiums for other postretirement benefits are expected to approximate \$53 million in 2010. The \$111 million of pension contributions in the three months ended March 28, 2010, included voluntary contributions of \$60 million. These contributions and payments include payments from our funds either to increase pension plan assets or to make direct payments to participants.

Investing Activities

		i			
In millions	Mar	ch 28, 2010	Ma	rch 29, 2009	Change
Capital expenditures	\$	(47)	\$	(64) \$	17
Investments in internal use software		(17)		(11)	(6)
Proceeds from the disposals of property, plant and					
equipment		38		6	32
Investments in and advances (to) from equity investees		(11)		5	(16)
Acquisitions of businesses, net of cash acquired		(71)		(2)	(69)
Investments in marketable securities, net		(25)		9	(34)
Cash flows from derivatives not designated as hedges		(11)		(33)	22
Net cash used in investing activities	\$	(144)	\$	(90) \$	(54)

Net cash used in investing activities increased for the three months ended March 28, 2010, versus the comparable period in 2009, primarily due to the acquisition of CWC, increased investments in marketable securities and increased investments in and advances to equity investees which were partially offset by increased proceeds from the disposal of property, plant and equipment, decreased cash outflows for derivatives not designated as hedges and lower capital expenditures.

Capital expenditures for the three month period ended March 28, 2010, were \$47 million compared to \$64 million in the comparable period in 2009. We continue to invest in the development of new products and we plan to spend approximately \$400 million in 2010.

Financing Activities

In millions	March	28, 2010	Mar	rch 29, 2009	Change
Proceeds from borrowings	\$	70	\$	7 \$	63
Payments on borrowings and capital lease					
obligations		(20)		(19)	(1)
Distributions to noncontrolling interests		(1)		(9)	8
Dividend payments on common stock		(35)		(35)	
Repurchases of common stock		(39)			(39)
Other, net		18		3	15
Net cash used in financing activities	\$	(7)	\$	(53) \$	46

Net cash used in financing activities decreased for the three months ended March 28, 2010, versus the comparable period in 2009, primarily due to the increased proceeds from borrowings related to the acquisition of CWC which was partially offset by the increased repurchases of common stock.

Our total debt was \$758 million as of March 28, 2010, compared with \$704 million as of December 31, 2009. Total debt as a percent of our total capital, including total long-term debt, was 15.8 percent at March 28, 2010, compared with 14.9 percent at December 31, 2009.

Credit Ratings

A number of our contractual obligations and financing agreements, such as our revolving credit facility and our equipment sale-leaseback agreements have restrictive covenants and/or pricing modifications that may be triggered in the event of downward revisions to our corporate credit rating. There were no downgrades of our credit ratings in the first quarter of 2010 that have impacted these covenants or pricing modifications. In March 2010, Fitch affirmed our ratings.

Table of Contents

Credit ratings are not recommendations to buy and are subject to change, and each rating should be evaluated independently of any other rating. In addition, we undertake no obligation to update disclosures concerning our credit ratings, whether as a result of new information, future events or otherwise. Our ratings and outlook as of March 28, 2010, from each of the credit rating agencies are shown in the table below.

Credit Rating Agency	Senior L-T Debt Rating	S-T Debt Rating	Outlook
Moody s Investors Service, Inc.	Baa3	Non-Prime	Stable
Standard & Poor s	BBB	NR	Stable
Fitch	BBB+	BBB+	Stable

OFF BALANCE SHEET FINANCING

A discussion of our off balance sheet financing arrangements may be found in Item 7 of our 2009 Form 10-K. There have been no material changes in this information since the filing of our 2009 Form 10-K.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

A summary of our significant accounting policies is included in Note 1, SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, of the *Notes to the Consolidated Financial Statements* of our 2009 Form 10-K which discusses accounting policies that we have selected from acceptable alternatives.

Our *Condensed Consolidated Financial Statements* are prepared in accordance with generally accepted accounting principles that often require management to make judgments, estimates and assumptions regarding uncertainties that affect the reported amounts presented and disclosed in the financial statements. Management reviews these estimates and assumptions based on historical experience, changes in business conditions and other relevant factors they believe to be reasonable under the circumstances. In any given reporting period, our actual results may differ from the estimates and assumptions used in preparing our *Condensed Consolidated Financial Statements*.

Critical accounting estimates are defined as follows: the estimate requires management to make assumptions about matters that were highly uncertain at the time the estimate was made; different estimates reasonably could have been used; or if changes in the estimate are reasonably likely to occur from period to period and the change would have a material impact on our financial condition or results of operations. Our senior management has discussed the development and selection of our accounting policies, related accounting estimates and the disclosures set forth below with the Audit Committee of our Board of Directors. We believe our critical accounting estimates include those addressing the estimation of liabilities for recoverability of investment related to new products, warranty programs, accounting for income taxes, pension benefits and annual assessment of recoverability of goodwill.

A discussion of all other critical accounting estimates may be found in the Management's Discussion and Analysis section of our 2009 Form 10-K under the caption APPLICATION OF CRITICAL ACCOUNTING ESTIMATES. Within the context of these critical accounting estimates, we are not currently aware of any reasonably likely events or circumstances that would result in different policies or estimates being

reported in the first three months of 2010.

RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

See Note 3, RECENTLY ADOPTED AND RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS, in the *Notes to Condensed Consolidated Financial Statements*.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

A discussion of quantitative and qualitative disclosures about market risk may be found in Item 7A of our 2009 Form 10-K. There have been no material changes in this information since the filing of our 2009 Form 10-K. Further information regarding financial instruments and risk management is discussed in Note 10, DERIVATIVES, in the *Notes to the Condensed Consolidated Financial Statements*.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company carried out an evaluation under the supervision and with the participation of the Company s management, including the Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of the Company s disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company s disclosure controls and procedures were effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is (1) recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and (2) accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter ended March 28, 2010, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

We are subject to numerous lawsuits and claims arising out of the ordinary course of our business, including actions related to product liability; personal injury; the use and performance of our products; warranty matters; patent, trademark or other intellectual property infringement; contractual liability; the conduct of our business; tax reporting in foreign jurisdictions; distributor termination; workplace safety; and environmental matters. We also have been identified as a potentially responsible party at multiple waste disposal sites under U.S. federal and related state environmental statutes and regulations and may have joint and several liability for any investigation and remediation costs incurred with respect to such sites, as more fully described in Item 1 of our 2009 Form 10-K under Environmental Compliance-Other Environmental Statutes and Regulations. We have denied liability with respect to many of these lawsuits, claims and proceedings and are vigorously defending such lawsuits, claims and proceedings. We carry various forms of commercial, property and casualty, product liability and other forms of insurance; however, such insurance may not be applicable or adequate to cover the costs associated with a judgment against us with respect to these lawsuits, claims and proceedings. We do not believe that these lawsuits are material individually or in the aggregate. While we believe we have also established adequate accruals for our expected future liability with respect to pending lawsuits, claims and proceedings, where the nature and extent of any such liability can be reasonably estimated based upon then presently available information, there can be no assurance that the final resolution of any existing or future lawsuits, claims or proceedings will not have a material adverse effect on our business, results of operations, financial condition or cash flows.

In June 2008, four of our sites in Southern Indiana, including our Technical Center, experienced extensive flood damage. We have submitted a claim for \$237 million to our insurance carriers, which includes a claim for business interruption. As of March 28, 2010, we have received \$91 million in recoveries from the insurance carriers. Our insurance carriers have disputed certain aspects of our claim and the parties have filed suit against each other. Although we believe that we are insured against the full amount of our claim, there is no assurance that we will be successful recovering the amounts we believe are due under the policies.

The information in Item 1 Other Environmental Statutes and Regulations referred to above should be read in conjunction with this disclosure. See also Note 14, COMMITMENTS AND CONTINGENCIES, in the *Notes to the Consolidated Financial Statements* included in our 2009 Form 10-K. There has been no material change in this information since the filing of our 2009 Form 10-K.

ITEM 1A. Risk Factors

In addition to other information set forth in this report, you should consider other risk factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K or the CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING INFORMATION in this Quarterly report are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently judge to be immaterial also may materially adversely affect our business, financial condition or operating results.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following information is provided pursuant to Item 703 of Regulation S-K:

	Issuer Purchases of Equity Securities				
	(a) Total Number of Shares	`	o) Average Price Paid	(c) Total Number of Shares Purchased as Part of Publicly Announced	(d) Maximum Number of Shares that May Yet Be Purchased Under the
Period	Purchased(1)	I	per Share	Plans or Programs	Plans or Programs(2)
January 1 January 31, 2010	1,047	\$	51.73		255,744
February 1 February 28, 2010	41,788		54.69		220,926
March 1 March 28, 2010	676,031		60.36	650,000	202,616
Total	718,866	\$	60.02	650,000	

⁽¹⁾ Shares purchased represent shares under 2007 Board authorized repurchase program (for up to \$500 million of our common shares) and our Key Employee Stock Investment Plan established in 1969 (there is no maximum repurchase limitation in this plan).

In December 2007, the Board of Directors authorized us to acquire an additional \$500 million worth of Cummins common stock beginning in 2008. During the three month period ended March 28, 2010, we repurchased 650,000 shares under this plan. As of March 28, 2010, we have \$312 million available for purchase under this authorization.

During the three month period ended March 28, 2010, we repurchased 68,866 shares from employees in connection with the Key Employee Stock Investment Plan which allows certain employees, other than officers, to purchase shares of common stock on an installment basis up to an established credit limit. Loans are issued for five-year terms at a fixed interest rate established at the date of purchase and may be refinanced after its initial five-year period for an additional five-year period. Participants must hold shares for a minimum of six months from date of purchase and after shares are sold must wait six months before another share purchase may be made. We hold participants—shares as security for the loans and would, in effect repurchase shares if the participant defaulted in repayment of the loan. There is no maximum amount of shares that we may purchase under this plan.

⁽²⁾ These values reflect the sum of shares held in loan status of our Key Employee Stock Investment Plan. The \$500 million repurchase program authorized by the Board of Directors in 2007 does not limit the number of shares that may be purchased and was excluded from this column.
