UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F

___ REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF
THE SECURITIES EXCHANGE ACT OF 1934

OR

XX ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934 for the fiscal year ended December
31, 2007

OR

___ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

OR

___ SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934
Date of event requiring this shell company report _____
For the transition period from _____ to _____

Commission file number: 0-50657

Seabridge Gold Inc.
(Exact name of Registrant as specified in its charter)

Not Applicable
(Translation of Registrant's Name into English)

Canada
(Jurisdiction of incorporation or organization)

106 Front Street East, 4th Floor, Toronto, Ontario CANADA M5A 1E1
(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Common Stock, no par value	American Stock Exchange

Edgar Filing: SEABRIDGE GOLD INC - Form 20-F

Common Stock, no par value TSX Venture Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act.

N/A
(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act. None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 37,298,885

1

Table of Contents

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerate filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

US GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

Yes No

METRIC EQUIVALENTS

For ease of reference, the following factors for converting metric measurements into imperial equivalents are provided:

To Convert from Metric	To Imperial	Multiply by
Hectares	Acres	2.471
Meters	Feet (ft.)	3.281
Kilometers (km)	Miles	0.621
Tonnes	Tons (2000 pounds)	1.102
Grams/tonne	Ounces (troy/ton)	0.029

GLOSSARY OF TERMS

S.E.C Industry Guide

National Instrument 43-101

Reserve: That part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination. The United States Securities and Exchange Commission requires a final or full Feasibility Study to support either Proven or Probable Reserves and does not recognize other classifications of mineralized deposits.

Mineral Reserve: The economically mineable part of a Measured or Indicated Mineral Resource demonstrated by at least a Preliminary Feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.

Proven Reserves: Reserves for which a quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; grade and/or quality are computed from the results of detailed sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth, and mineral content of reserves are well established.

Proven Mineral Reserve: The economically mineable part of a Measured Mineral Resource demonstrated by at least a Preliminary Feasibility study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction is justified.

Probable Reserves: For which quantity and grade and/or quality are computed from information similar to that used for proven reserves, but the sites for inspection, sampling and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven reserves, is high enough to assume continuity between points of observation.

Probable Mineral Reserve: The economically mineable part of an indicated, and in some circumstances, a Measured Mineral Resource, demonstrated by at least a Preliminary Feasibility Study. This study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified.

Adularia - A colorless, moderate- to low-temperature variety of orthoclase feldspar typically with relatively high barium content.

Andesite - A dark-colored, fine-grained extrusive rock that, when porphyritic, contains phenocrysts composed primarily of zoned sodic plagioclase and one or more of the mafic minerals.

Argulite - A variety of asphaltic sandstone

4

Table of Contents

Arkose - A feldspar-rich sandstone, typically coarse-grained and pink or reddish, that is composed of angular to subangular grains that may be either poorly or moderately well sorted; usually derived from the rapid disintegration of granite or granitic rocks, and often closely resembles granite.

Basalt - A general term for dark-colored mafic igneous rocks, commonly extrusive but locally intrusive.

Breccia - A rock in which angular fragments are surrounded by a mass of fine-grained minerals.

Caldera - A large, basin-shaped volcanic depression, more or less circular, the diameter of which is many times greater than that of the included vent or vents.

Carbonate - A sediment formed by the organic or inorganic precipitation from aqueous solution of carbonates of calcium, magnesium, or iron; e.g., limestone and dolomite.

Cut-off grade - The lowest grade of mineralized material that qualifies as reserve in a deposit. It is also used to estimate mineral reserves by including in the estimates only those assays above the cut-off grade.

Cut Value - Applies to assays that have been reduced to a statistically determined maximum to prevent erratic high values from inflating the average.

Diamond Drilling - A type of rotary drilling in which diamond bits are used as the rock-cutting tool to produce a recoverable drill core sample of rock for observation and analysis.

Diorite - An intrusive igneous rock.

Drift - A horizontal underground opening that follows along the length of a vein or rock formation.

Environmental Baseline Study - A geotechnical study that monitors and establishes the numerous naturally occurring base levels present within a specific area/environment. These can include; water chemistry, flora and fauna.

Epithermal - Low temperature hydrothermal process or product.

Fault - A fracture or break in rock along which there has been movement.

Feasibility Study - A definitive study of the viability of a mineral project by a qualified professional which defines: (1) mining methods, pit configuration, mine scheduling, mine equipment and all related costing, (2) method of mineral processing and all related plant, equipment and costing, (3) necessary determination of all infrastructure required and relevant costs and (4) all requirements of government and markets for mine operation. A definitive financial analysis of the mineral project taking into consideration all relevant factors, which will establish the presence of a Mineral Reserve and the details of its economic viability.

Geochemistry - The study of the chemical properties of rocks.

Geophysical Survey - A scientific method of prospecting that measures the physical properties of rock formations. Common properties investigated include magnetism, specific gravity, electrical conductivity and radioactivity.

Grade - The metal content of rock with precious metals, grade can be expressed as troy ounces or grams per tonne of rock.

Granite - Any holocrystalline, quartz-bearing plutonic rock.

Granitic - Pertaining to or composed of granite.

5

Table of Contents

Hydrothermal - The products or the actions of heated waters in a rock mass such as a mineral deposit precipitating from a hot solution.

Indicated Resource - In reference to minerals means quantity and grade and (or) quality are computed from information similar to that used for resources, but the sites for inspection, sampling, and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for resources, is high enough to assume continuity between points of observation.

Inferred Resource - In reference to minerals, means estimates are based on an assumed continuity beyond measured and (or) indicated resources, for which there is geological evidence. Inferred resources may or may not be supported by samples or measurements.

Intrusion; Intrusive - Molten rock that is intruded (injected) into spaces that are created by a combination of melting and displacement.

Kriging - In the estimation of ore reserves by geostatistical methods, the use of a weighted, moving-average approach both to account for the estimated values of spatially distributed variables, and also to assess the probable error associated with the estimates.

Lode - A mineral deposit consisting of a zone of veins, veinlets, disseminations, or planar breccias; a mineral deposit in consolidated rock as opposed to a placer deposit.

Measured Resources - In reference to minerals, means a quantity is computed from dimensions revealed in outcrops, trenches, workings, or drill holes; grade and (or) quality are computed from the results of detailed sampling. The sites for inspection, sampling, and measurement are spaced so closely and the geological character is so well defined that size, shape, depth and mineral content of the resource are well established.

Monzonite - A granular plutonic rock containing approx. equal amounts of orthoclase and plagioclase, and thus intermediate between syenite and diorite. Quartz is minor or absent.

Net Smelter Return Royalty/ NSR - A phrase used to describe a royalty payment made by a producer of metals based on gross metal production from the property, less deduction of certain limited costs including smelting, refining, transportation and insurance costs.

Patented - A claim to which a patent has been secured from the U.S. Government, in compliance with the laws relating to such claims.

Placer - A deposit of sand or gravel that contains particles of gold, ilmenite, gemstones, or other heavy minerals of value. The common types are stream gravels and beach sands.

Porphyry - Any igneous rock in which relatively large crystals are set in a fine-grained matrix of rock.

Prefeasability Study - A comprehensive study of the viability of a mineral project that has advanced to a stage where the mining method, in the case of underground mining, or the pit configuration, in the case of an open pit, has been established, and where an effective method of mineral processing had been determined. This Study must include a financial analysis based on reasonable assumptions of technical engineering, operating, and economic factors, which are sufficient for a Qualified Person acting reasonably, to determine if all or part of the Mineral Resource may be classified as a Mineral Reserve.

Pyrite - An iron sulphide mineral (FeS_2), the most common naturally occurring sulphide mineral.

Quartz - Crystalline silica; often forming veins in fractures and faults within older rocks.

Quartz Monzonite - A coarse grained, quartz rich igneous rock usually occurring as a smaller rock mass associated with major granitic bodies.

Table of Contents

Raise - A vertical or inclined underground working that has been excavated from the bottom upward.

Reclamation - Restoration of mined land to original contour, use, or condition.

Resource - Under the Canadian Institute of Mining (“CIM”) standards, Mineral Resource is a concentration or occurrence of natural, solid, inorganic or fossilized organic material in or on the earth’s crust in such form and quantity and of such a grade or quality that it has reasonable prospects for economic extraction. The location, quantity, grade, geological characteristics and continuity of a Mineral Resource are known, estimated or interpreted from specific geological evidence and knowledge.

A mineral resource estimate is based on information on the geology of the deposit and the continuity of mineralization. Assumptions concerning economic and operating parameters, including cut-off grades and economic mining widths, based on factors typical for the type of deposit, may be used if these factors have not been specifically established for the deposit at the time of the mineral resource estimate. A mineral resource is categorized on the basis of the degree of confidence in the estimate of quantity and grade or quality of the deposit, as follows:

Measured Mineral Resource: Under CIM standards, a Measured Mineral Resource is that part of a Mineral Resource for which quantity, grade or quality, densities, shape, physical characteristics are so well established that they can be estimated with confidence sufficient to allow the appropriate application of technical and economic parameters, to support production planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration, sampling and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough to confirm both geological and grade continuity.

Indicated Mineral Resource: Under CIM standards, an Indicated Mineral Resource is that part of a Mineral Resource for which quantity, grade or quality, densities, shape and physical characteristics can be estimated with a level of confidence sufficient to allow the appropriate application of technical and economic parameters, to support mine planning and evaluation of the economic viability of the deposit. The estimate is based on detailed and reliable exploration and testing information gathered through appropriate techniques from locations such as outcrops, trenches, pits, workings and drill holes that are spaced closely enough for geological and grade continuity to be reasonably assumed.

Inferred Mineral Resource: Under CIM standards, an Inferred Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality can be estimated on the basis of geological evidence and limited sampling and reasonably assumed, but not verified, geological and grade continuity. The estimate is based on limited information and sampling gathered through appropriate techniques from such as outcrops, trenches, pits, workings and drill holes.

Rhyolite - A group of extrusive igneous rocks, typically porphyritic and commonly exhibiting flow texture, with phenocrysts of quartz and alkali feldspar in a glassy to cryptocrystalline groundmass; also, any rock in that group; the extrusive equivalent of granite.

Sedimentary - Formed by the deposition of sediment or pertaining to the process of sedimentation.

Sediments - Solid fragmental material that originates from weathering of rocks and is transported or deposited by air, water, or ice, or that accumulates by other natural agents, such as chemical precipitation from solution or secretion by organisms, and that forms in layers on the Earth’s surface at ordinary temperatures in a loose, unconsolidated form; e.g., sand, gravel, silt, mud, alluvium.

Sericite - A fine-grained potassium mica found in various metamorphic rocks.

Silification - The in situ alteration of a rock, which involves an increase in the proportion of silica minerals.

Trenching - The process of exploration by which till is removed from a trench cut from the earth's surface.

7

Table of Contents

Tuff - A general term for all consolidated pyroclastic rocks.

Unpatented Claim - Mining claim to which a deed from the U.S. Government has not been received. A claim is subject to annual assessment work, to maintain ownership.

Vein - A thin, sheet-like, crosscutting body of hydrothermal mineralization, principally quartz.

Volcanics - Those originally molten rocks, generally fine grained, that have reached or nearly reached the Earth's surface before solidifying.

C. Auditors

The Company's auditor is KPMG LLP, Chartered Accountants, of Suite 3300 Commerce Court West, Toronto, Ontario, Canada. KPMG was initially appointed on June 4, 2002 for the fiscal year ending December 31, 2002.

Item 2. Offer Statistics and Expected Timetable

Not Applicable

Item 3. Key Information

As used within this Annual Report, the terms "Seabridge", "the Company", "Issuer" and "Registrant" refer collectively to Seabridge Gold Inc, and depending on the context, its predecessors, subsidiaries and affiliates.

All currency figures stated herein are in Canadian dollars, unless otherwise noted.

A. Selected Financial Data

The selected financial data of the Company as at December 31, 2007 and 2006 and for the Years Ended December 31, 2007, December 31, 2006 and December 31, 2005 was derived from the financial statements audited by KPMG LLP, Chartered Accountants, Licensed Public Accountants, as indicated in its audit report which is included elsewhere in this Annual Report. The selected financial data as at December 31, 2005, 2004 and 2003 and for the years ended December 31, 2004 and December 31, 2003 was derived from the audited financial statements of the Company which are not included in this Report.

The selected financial data should be read in conjunction with the financial statements and other financial information included elsewhere in the Annual Report.

The Company has not declared any dividends on its common shares since incorporation and does not anticipate that it will do so in the foreseeable future. The present policy of the Company is to retain future earnings for use in its operations and the expansion of its business.

Table No. 2 is derived from the financial statements of the Company, which have been prepared in accordance with Canadian Generally Accepted Accounting Principles (GAAP), the application of which, in the case of the Company, conforms in all material respects for the periods presented with US GAAP, except as disclosed in footnote #11 to the financial statements.

In this Annual Report, unless otherwise specified, all dollar amounts are expressed in Canadian Dollars (CDN\$). The Government of Canada permits a floating exchange rate to determine the value of the Canadian Dollar against the U.S. Dollar (US\$).

Table No. 3 sets forth the rate of exchange for the Canadian Dollar at the end of the five most recent fiscal periods ended December 31st, the average rates for the periods, and the range of high and low rates for the periods. Table No. 3 also sets forth the rate of exchange for the Canadian Dollar at the end of the 12 most recent fiscal quarters, and the range of high and low rates for these periods.

For purposes of this table, the rate of exchange means the noon buying rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York. The table sets forth the number of Canadian dollars required under that formula to buy one U.S. Dollar. The average rate means the average of the exchange rates on the last day of each month during the period.

B. Capitalization and Indebtedness

Not applicable

C. Reasons for the Offer and Use of Proceeds

Not applicable

D. Risk Factors

An investment in the Common Shares of the Company must be considered speculative due to the nature of the Company's business and the present stage of exploration of its non-producing mineral properties. In particular, the following risk factors apply:

Risks Associated with Mineral Exploration

The Company is Involved in the Resource Industry which is Highly Speculative and has Certain Inherent Exploration Risks which Could have a Negative Effect on the Company's Operations

Table of Contents

Resource exploration is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits which, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Company may be affected by numerous factors which are beyond the control of the Company and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environment protection, the combination of which factors may result in the Company not receiving an adequate return on investment capital.

The Company's Operations Contain Significant Uninsured Risks which Could Negatively Impact Profitability as the Company Maintains No Insurance Against its Operations

The Company's exploration of its mineral properties incurs certain risks, including unexpected or unusual operating conditions including rock bursts, cave-ins, flooding, fire and earthquakes which could adversely affect operations and may result in liabilities.

The Company currently maintains \$5 million insurance for its properties and operations which may not cover larger liabilities or uninsured situations. If such larger liabilities or uninsured situations arise, they could reduce or eliminate the Company's assets and shareholder equity as well as result in increased costs and a decline in the value of the Company's securities.

The Company Has No Known Reserves and No Economic Reserves May Exist on Its Properties Which Would have a Negative Effect on the Company's Operations and Valuation

Despite exploration work on its mineral claims, no known bodies of commercial ore or economic deposits have been established on any of the Company's mineral properties. In addition, the Company is at the exploration stage on all of its properties and substantial additional work will be required in order to determine if any economic deposits occur on the Company's properties. Even in the event commercial quantities of minerals are discovered, the exploration properties might not be brought into a state of commercial production. Finding mineral deposits is dependent on a number of factors, not the least of which is the technical skill of exploration personnel involved. The commercial viability of a mineral deposit once discovered is also dependent on a number of factors, some of which are particular attributes of the deposit, such as size, grade and proximity to infrastructure, as well as metal prices. Most of these factors are beyond the control of the entity conducting such mineral exploration. The Company is an exploration stage company with no history of pre-tax profit and no income from its operations. There can be no assurance that the Company's operations will be profitable in the future.

The Company Has Not Surveyed Any of Its Properties and the Company Could Lose Title and Ownership of Its Properties which would have a Negative Effect on the Company's Operations and Valuation

Table of Contents

The Company has only done a preliminary legal survey of the boundaries of any of these properties, and therefore, in accordance with the laws of the jurisdictions in which these properties are situated, their existence and area could be in doubt. The Company has not obtained formal title reports on any of its properties and title may be in doubt. If title is disputed, the Company will have to defend its ownership through the courts. In the event of an adverse judgment, the Company would lose its property rights.

The Mining Industry is Highly Competitive which could Restrict the Company's Growth

The Company competes with other corporations that may have greater resources. Such corporations could outbid the Company for potential projects or produce minerals at lower costs which would have a negative effect on the Company's operations.

Mineral Operations are Subject to Market Forces Outside of the Company's Control which could Negatively Impact the Company's Operations

The marketability of minerals, especially the price of gold, is affected by numerous factors beyond the control of the entity involved in their mining and processing. These factors include market fluctuations, government regulations relating to prices, taxes, royalties, allowable production, import, exports and supply and demand. One or more of these risk elements could have an impact on costs of an operation and if significant enough, reduce the profitability of the operation and threaten its continuation.

The Company is Subject to Substantial Government Regulatory Requirements which could cause a Restriction or Suspension of the Company's Operations

The Company's exploration operations are affected to varying degrees by government regulations relating to resource operations, the acquisition of land, pollution control and environmental protection, safety, production and expropriation of property. Changes in these regulations or in their application are beyond the control of the Company and may adversely affect its operations, business and results of operations. Failure to comply with the conditions set out in any permit or failure to comply with the applicable statutes and regulations may result in orders to cease or curtail operations or to install additional equipment. The Company may be required to compensate those suffering loss or damage by reason of its operating or exploration activities. Operations may be affected in varying degrees by government regulations with respect to restrictions on production, price controls, export controls, foreign exchange controls, income taxes, expropriation of property, environmental legislation and mine safety.

Currently, the Company's Canadian properties are subject to the jurisdiction of the federal laws of Canada, the provincial laws of British Columbia and the Northwest Territories, as well as local laws where they are located. In addition, the Company's U.S. properties are subject to U.S. Federal laws, the state laws of Nevada and Oregon, as well as local laws where they are located. The Company's Mexican property is subject to Mexican federal laws as well as local laws where it is located. Mineral exploration and mining may be affected in varying degrees by government regulations relating to the mining industry. Any changes in regulations or shifts in political conditions are beyond the control of the Company and may adversely affect its business.

Table of Contents

On the Federal and Provincial level, the Company must comply with exploration permitting requirements which require sound operating and reclamation plans to be approved by the applicable government body prior to the start of exploration. Depending upon the type and extent of the exploration activities, the Company may be required to post reclamation bonds and/or assurances that the affected areas will be reclaimed. Currently, the Company has estimated \$1,849,475 in reclamation liabilities for its properties. \$1,269,900 has been deposited for the benefit of the various government agencies until released or applied to reclamation costs. If the reclamation requires funds in addition to those already allocated, Seabridge could be forced to pay for the extra work and it could have a significant negative effect upon the Company's financial position and operations.

On the State and Provincial level, the government has jurisdiction over certain properties and requires their own permitting and compliance with applicable regulations. On the local level, regulations deal primarily with zoning, land use and specific building permits, as well as taxation and the impact of the Company's operations on the existing population and local services.

The Company is Subject to Substantial Environmental Requirements which could cause a Restriction or Suspension of Company Operations

In connection with its operations and properties, the Company is subject to extensive and changing environmental legislation, regulation and actions. The Company cannot predict what environmental legislation, regulation or policy will be enacted or adopted in the future or how future laws and regulations will be administered or interpreted. The recent trend in environmental legislation and regulation generally is toward stricter standards and this trend is likely to continue in the future. The recent trend includes, without limitation, laws and regulations relating to air and water quality, mine reclamation, waste handling and disposal, the protection of certain species and the preservation of certain lands. These regulations may require obtaining permits or other authorizations for certain activities. These laws and regulations may also limit or prohibit activities on certain lands lying within wetland areas, area providing for habitat for certain species or other protected areas. Compliance with more stringent laws and regulations, as well as potentially more vigorous enforcement policies or stricter interpretation of existing laws, may necessitate significant capital outlays, which may materially affect the Company's results of operations and business, or may cause material changes or delays in the Company's intended activities.

On the Federal, State and Provincial level, regulations deal with environmental quality and impacts upon air, water, soils, vegetation and wildlife, as well as historical and cultural resources. Approval must be received from the applicable bureau and/or department before exploration can begin, and will also conduct ongoing monitoring of operations. If operations result in negative effects upon the environment, government agencies will usually require the Company to provide remedial actions to correct the negative effects.

Table of Contents

Specific to its U.S. properties, costs involved with complying with various government environmental regulations vary by anticipated operations. Typically, surface sampling does not require any permits. Agency review and approval for exploration drilling and access construction can vary from several hundred dollars to several thousands of dollars, depending upon the level of activity. Permitting and environmental compliance costs vary, depending upon the level of activities proposed and the sensitivity of the areas where mineral activities are proposed. As a general rule, these costs makeup 10% or less of the total cost amount of the program. The Company also may be required to post reclamation bonding and assurance that areas will be reclaimed after exploration. These bonds and guarantees range from approximately \$1,000 on a small-scale exploratory drill program in Nevada to approximately \$150,000 on an advanced exploration program in Oregon.

At present, the Company has not estimated or allocated any funds for reclamation at its Courageous Lake property, nor have any specific environmental concerns been identified. However, the history of mining and exploration of the property by others may have caused certain environmental damage which will require cleanup funded by Seabridge as the current landholder. In addition, unidentified environmental deficiencies may exist on other of the Company's properties. The discovery of and any required reclamation of any additional properties would likely have a negative effect on the Company's operations and financial position.

Financing Risks

The Company is Likely to Require Additional Financing which Could Result in Substantial Dilution to Existing Shareholders and/or the Delay or Cessation of Operations

The Company, while engaged in the business of exploiting mineral properties, has sufficient funds to undertake its planned current exploration projects. If the Company's exploration programs are successful, additional financing will be required to develop the mineral properties identified and to place them into commercial production. The exploration of the Company's mineral properties is, therefore, dependent upon the Company's ability to obtain financing through the joint venturing of projects, debt financing, equity financing or other means. Such sources of financing may not be available on acceptable terms, if at all. Failure to obtain such financing may result in delay or indefinite postponement of exploration work on the Company's mineral properties, as well as the possible loss of such properties. Any transaction involving the issuance of previously authorized but unissued shares of common or preferred stock, or securities convertible into common stock, could result in dilution, possibly substantial, to present and prospective holders of common stock. These financings may be on terms less favorable to the Company than those obtained previously.

The Company Has a History of Net Losses and Expects Losses to Continue for the Foreseeable Future

Table of Contents

The Company has had a history of losses and there is no assurance that it can reach profitability in the future. As of the end of the last fiscal year dated December 31, 2007, the Company's historical net losses total \$27,350,897. The Company will require significant additional funding to meet its business objectives. Capital will need to be available to help maintain and to expand exploration on the Company's principal exploration property. The Company may not be able to obtain additional financing on reasonable terms, or at all. If equity financing is required, as expected, then such financings could result in significant dilution to existing shareholders. If the Company is unable to obtain sufficient financing, the Company might have to dramatically slow exploration efforts and/or lose control of its projects. The Company has historically obtained the majority of its financing through the issuance of equity, there is no limit to the number of authorized common shares, and the Company has no current plans to obtain financing through means other than equity financing.

The Company has a Lack of Cash Flow to Sustain Operations and Does Not Expect to Begin Receiving Operating Revenue in the Foreseeable Future

None of the Company's properties have advanced to the commercial production stage and the Company has no history of earnings or cash flow from operations. The Company has paid no dividends on its shares since incorporation and does not anticipate doing so in the foreseeable future. Historically, the only source of funds available to the Company has been through the sale of its common shares and convertible debt instruments. Any future additional equity financing would cause dilution to current stockholders. If the Company does not have sufficient capital for its operations, management would be forced to reduce or discontinue its activities which would likely have a negative effect on the stock price.

The Company Operates in Foreign Countries and is Subject to Currency Fluctuations which could have a Negative Effect on the Company's Operating Results

While engaged in the business of exploiting mineral properties, the Company's operations outside of Canada, i.e. in the United States and Mexico, make it subject to foreign currency fluctuation as the Company's accounts are conducted in Canadian dollars while certain expenses are numerated in US dollars and Mexican pesos. Such fluctuations may adversely affect the Company's financial positions and results. Management may not take any steps to address foreign currency fluctuations that will eliminate all adverse effects and, accordingly, the Company may suffer losses due to adverse foreign currency fluctuations.

Risks Relating to an Investment in the Securities of the Company

The Market for the Company's Stock has Been Subject to Volume and Price Volatility which Could Negatively Effect a Shareholder's Ability to Buy or Sell the Company's Shares

The market for the common shares of the Company may be highly volatile for reasons both related to the performance of the Company or events pertaining to the industry (i.e., mineral price fluctuation/high production costs/accidents) as well as factors unrelated to the Company or its industry. In particular, the price for gold has recently been at an all time high and may not sustain such levels. In addition, market demand for products incorporating minerals in their manufacture fluctuates from one business cycle to the next, resulting in change of demand for the mineral and an attendant change in the price for the

Table of Contents

mineral. The Company's common shares can be expected to be subject to volatility in both price and volume arising from market expectations, announcements and press releases regarding the Company's business, and changes in estimates and evaluations by securities analysts or other events or factors. In recent years the securities markets in the United States and Canada have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly small-capitalization companies such as the Company, have experienced wide fluctuations that have not necessarily been related to the operations, performances, underlying asset values, or prospects of such companies. For these reasons, the shares of the Company's common shares can also be expected to be subject to volatility resulting from purely market forces over which the Company will have no control. Further, despite the existence of markets for trading the Company's common shares in Canada and the United States, stockholders of the Company may be unable to sell significant quantities of common shares in the public trading markets without a significant reduction in the price of the stock. Also see Item 10.E of this Report.

The Company has a Dependence Upon Key Management Employees, the Absence of Which Would Have a Negative Effect on the Company's Operations

The Company strongly depends on the business and technical expertise of its management and key personnel, including Rudi Fronk, President. There is little possibility that this dependence will decrease in the near term. As the Company's operations expand, additional general management resources will be required. The Company may not be able to attract and retain additional qualified personnel and this would have a negative effect on the Company's operations. The Company does not carry any formal services agreements between itself and its officers/directors. The Company does not carry any "Key Man" Life Insurance.

Certain Officers and Directors May Have Conflicts of Interest Which Could have a Negative Effect on the Company's Operations

Certain of the directors and officers of the Company are also directors and/or officers and/or shareholders of other natural resource companies. While the Company was engaged in the business of exploiting mineral properties, such associations may have given rise to conflicts of interest from time to time. The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest that they may have in any project or opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any director in a conflict must disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at the time.

The Company Could be Deemed a Passive Foreign Investment Company Which Could have Negative Consequences for U.S. Investors

The Company could be classified as a Passive Foreign Investment Company ("PFIC") under the United States tax code. If the Company is declared a PFIC, then owners of the Company's Common Stock who are U.S. taxpayers generally will be required to treat any so-called "excess distribution" received on its common shares, or any gain realized

Table of Contents

upon a disposition of common shares, as ordinary income and to pay an interest charge on a portion of such distribution or gain, unless the taxpayer makes a qualified electing fund ("QEF") election or a mark-to-market election with respect to the Company's shares. A U.S. taxpayer who makes a QEF election generally must report on a current basis its share of the Company's net capital gain and ordinary earnings for any year in which the Company is classified as a PFIC, whether or not the Company distributes any amounts to its shareholders. U.S. investors should consult with their tax advisors for advice as to the U.S. tax consequences of an investment in the Common Stock of the Company.

U.S. Investors May Not Be Able to Enforce Their Civil Liabilities Against The Company or Its Directors, Controlling Persons and Officers

It may be difficult to bring and enforce suits against the Company. The Company is a corporation incorporated in Canada under the Canada Business Corporation Act. A majority of the Company's directors and officers are residents of Canada and a substantial portion of the Company's assets and its subsidiaries are located outside of the United States. Consequently, it may be difficult for United States investors to effect service of process in the United States upon those directors or officers who are not residents of the United States, or to realize in the United States upon judgments of United States courts predicated upon civil liabilities under United States securities laws. There is substantial doubt whether an original action could be brought successfully in Canada against any of such persons or the Company predicated solely upon such civil liabilities under the U.S. Securities Act.

Forward Looking Statements

Certain Statements presented herein contain certain forward-looking statements relating but not limited to the Company's expectations, intentions, plans and beliefs. Forward-looking information can often be identified by forward-looking words such as "anticipate", "believe", "expect", "goal", "plan", "intend", "estimate", "may" and "will" or similar words suggesting future outcomes, or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance. Forward-looking information may include reserve and resource estimates, estimates of future production, unit costs, costs of capital projects and timing of commencement of operations, and is based on current expectations that involve a number of business risks and uncertainties. Factors that could cause actual results to differ materially from any forward-looking statement include, but are not limited to, failure to establish estimated resources and reserves, the grade and recovery of ore which is mined varying from estimates, capital and operating costs varying significantly from estimates, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects related to accidents, equipment break downs, weather or other difficulties, and other factors. Forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from expected results.

Potential shareholders and prospective investors should be aware that these statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those suggested by the forward-looking statements. Shareholders are cautioned not to place undue reliance on forward-looking information. By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and various future events will not occur. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking information whether as a result of new information, future events or other such factors which affect this information, except as required by law.

By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and various future events will not occur. Shareholders should carefully review the cautionary statements and risk factors contained in this and other documents that the Company files from time to time with the securities commissions in Canada (see SEDAR filings at www.sedar.com) and with the U.S. Securities and Exchange Commission. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking information whether as a result of new information, future events or other such factors which affect this information, except as required by law.

Item 4. Information on the Company

DESCRIPTION OF BUSINESS

Introduction

The Company's executive office is located at:

102 Front Street East, 4th Floor, Toronto, Ontario M5A 1E1 Canada

Telephone: (416) 367-9292

Facsimile: (416) 367-2711

E-Mail: info@seabridgegold.net

Website: www.seabridgegold.net

The Contact person in Toronto is Rudi Fronk, President and CEO.

The Company currently leases its executive offices in Toronto from Allied Property REIT. The lease covers the entire 4th floor of a building located at 106 Front Street East, Toronto, Ontario, Canada. The lease was effective commencing May 1, 2007 and will expire on April 30, 2012. The rent in 2007 was \$8,900 per month, and will be adjusted annually based upon a building cost operating adjustment. Current monthly rent for 2008 is approximately \$9,000.

The Company's fiscal year ends December 31st.

The Company's common shares trade on the TSX Venture Exchange under the symbol "SEA" and on the American Stock Exchange under the symbol "SA".

The authorized share capital of the Company consists of an unlimited number of common shares and an unlimited number of preferred shares. As of December 31, 2007, the end of the most recent fiscal year, there were 37,297,885 common shares issued and outstanding and no preferred shares issued and outstanding.

Table of Contents

Corporate Background

The Company was originally incorporated under the Company Act of British Columbia under the name of Chopper Mines Ltd. on September 14, 1979. After conducting a 1 for 5 reverse split, the Company changed its name to Dragoon Resources Ltd. on November 9, 1984. On May 20, 1998, the Company conducted a 1 for 10 reverse split and changed its name to Seabridge Resources Ltd. On June 20, 2002, the Company changed its name to Seabridge Gold Inc. in order to better reflect the Company's focus on gold and gold projects. On October 31, 2002 the Company also continued from British Columbia into Canadian Federal jurisdiction under the Canada Business Corporations Act.

The Company presently has four active subsidiaries: Seabridge Gold Corporation, a Nevada corporation; Pacific Intermountain Gold Inc., a Nevada corporation; 5073 N.W.T. Limited, a company incorporated under the laws of the Northwest Territories of Canada; and Minera Seabridge Gold SA de CV, a company incorporated in Mexico. The following diagram illustrates the current inter-corporate relationship between the Company and its material subsidiaries:

(1)The Company's 100% interest in the Quartz Mountain project is subject to the terms of an option agreement with Quincy Energy Corp. (which subsequently became Golden Predator Mines Inc.) under which Quincy can earn up to a 62.5% interest in portions of the property.

Table of Contents

Currently, the Company conducts operations in Canada, Mexico and the United States. As of December 31, 2007, the Company's non-current assets were located as follows:

U n i t e d	
States:	\$ 8,855,729
Canada:	\$ 48,991,219
Mexico:	\$ 6,316,381

History and Development of the Business

On May 20, 1998, the Company completed a 1 for 10 reverse split and changed its name to Seabridge Resources Inc.

In October 1999, the Company initiated a corporate strategy based on its belief that the then depressed gold market offered significant upside potential. In October 1999, a new Board and senior management team possessing the required technical and financial skills to implement the new strategy were put in place. The new corporate direction was to acquire gold mining assets, including developed resources and shutdown or suspended projects, which had been made available by depressed gold prices and a lack of capital and which were uneconomic at the current gold price. The Company observed that projects that previously commanded significant market capitalization when gold prices were higher were becoming available at fractions of their previous valuations. The success of this new strategy was dependent on a return to higher gold prices. From October 1999 through to the present the Company acquired nine North American based gold projects which collectively contain substantial gold resources.

With the recent improvement in gold prices, the Company has commenced engineering studies and exploration activities on several of its projects. In addition, the Company has entered into joint venture agreements on some of its projects where partners will be conducting exploration activities.

In February 2000, the Company acquired an option to purchase 100% of the Grassy Mountain gold project located in eastern Oregon from Atlas Precious Metals Inc. ("Atlas"). In March 2003, the Company exercised its option and acquired a 100% interest in the Grassy Mountain Property.

In June 2000, the Company entered into a Letter of Intent with Placer Dome (CLA) Limited to acquire a 100% interest in the KSM project located in the Iskut-Stikine River region, approximately 20 km southeast of the Eskay Creek Mine in British Columbia. In June 2001, the Company completed the acquisition of Placer Dome's 100% interest in the project. In September 2002, the Company announced that it had entered into an agreement with Noranda Inc. (which subsequently became Falconbridge Limited and then Xstrata plc) whereupon Falconbridge could earn a 50% interest in the project by spending \$6,000,000 on exploration at the project within 6 years. Falconbridge could earn an additional 15% interest by funding all costs to complete a feasibility study. During 2003 and 2004, Falconbridge conducted field programs at KSM consisting of mapping, rock and soil sampling, and IP surveys. During 2005 Falconbridge drilled 16 widely-spaced core drill holes totaling 4,092 meters designed to test six targets situated

Table of Contents

outside the resources previously defined for the Kerr and Sulphurets zones. In 2006 Falconbridge was acquired by Xstrata plc. In April 2006, the Company announced that it had reached agreement with Falconbridge whereby the Company would purchase Falconbridge's option to earn up to a 65% interest at KSM by issuing Falconbridge 200,000 common shares and 2.0 million conditional common share purchase warrants with an exercise price of C\$13.50 per share. One warrant would become exercisable for each new ounce of gold resources discovered at KSM, up to a maximum of two million. The transaction closed in August 2006. In 2006 the Company drilled 24 holes at the Mitchell zone and defined an initial mineral resource thereby triggering the vesting of all 2.0 million Xstrata warrants. In 2007, Xstrata exercised all 2.0 million warrants, thereby providing the Company with \$27.0 million in proceeds. During 2007, the Company continued exploration activities at the Mitchell zone. In January 2008, the Company announced independent resource estimates for the Kerr and Sulphurets zones at KSM. In February 2008, the Company announced independent resource estimates for the Mitchell zone at KSM.

In December 2001, the Company entered into an agreement to acquire a 100% interest in the Quartz Mountain Gold Project located in Lake County, Oregon. The Quartz Mountain acquisition was completed in January 2002. In October 2003, the Company granted Quincy Gold Corp. an option to earn a 50% interest in the Quartz Mountain gold project, excluding the existing gold resources. Under certain conditions Quincy can increase its interest to 62.5%. During 2004, Quincy completed approximately 4,000 meters of core drilling at the property designed to test for higher-grade feeder zones. Additional drilling is planned by Quincy in 2008.

Effective December 31, 2001, the Company entered into an agreement to acquire a 100% interest in the Red Mountain Gold Project located near Stewart, British Columbia. Closing of the Red Mountain transaction was completed in April 2002.

In May 2002, the Company reached agreement to purchase a 100% interest in the Courageous Lake Project located in the Northwest Territories, Canada. The Company paid former owners Newmont Canada Limited and Total Resources (Canada) US\$2,500,000 and granted them a 2.0% NSR for 100% of the project. Seabridge also agreed to pay Newmont and Total up to an additional US\$3,000,000 depending upon the price of gold. The purchase was closed in July 2002. In April 2003 and February 2004, the Company paid the former owners of the Courageous Lake Project the US\$3,000,000 (\$1,500,000 on each date) as the price of gold exceeded the two threshold levels that triggered the obligations to make these payments. In 2004, an additional property was optioned in the area ("Red 25"). Under the terms of the agreement, the Company paid \$50,000 on closing and is required to make option payments of \$50,000 on each of the first two anniversary dates and subsequently \$100,000 per year. In addition, the property may be purchased at any time for \$1,250,000 with any option payments being credited against the purchase price. During 2005, an independent Preliminary Assessment was completed on the known FAT (felsic ash tuff) resources at that time including capital and operating costs estimates for a large-scale open pit operation. In March 2008, the Company announced the results of an updated Preliminary Assessment incorporating a new resource estimate and updating capital and operating cost estimates from the 2005 study.

Table of Contents

In June 2002, the Company and an independent third party incorporated a Nevada company named Pacific Intermountain Gold Corporation to acquire and explore early-stage exploration projects which have previously identified gold systems capable of hosting large-scale deposits. In 2004, the Company increased its ownership in Pacific Intermountain Gold to 100%, subject to a 10% net profits interest retained by the previous equity owner. To date, Pacific Intermountain Gold has entered into a number of option agreements with third parties whereby the third parties can earn interests in specific projects by funding exploration and making payments to Pacific Intermountain Gold.

In April 2006, the Company acquired a 100% interest in the Noche Buena gold project located in Sonora, Mexico from Hecla Mining Company for US\$4,350,000 in cash.

Business Overview

All of the Company's operations are located in Canada, the United States and Mexico. The Company operates in the mineral exploration sector.

All of the Company's properties are currently at the exploration stage. There is no assurance that an economic and commercially viable deposit exists on any of the Company's properties, and substantial additional work will be required in order to determine if any economic and legally feasible deposits occur on the Company's properties.

Operations are not seasonal as the Company can conduct exploration at certain of its properties year-round. To date, the Company's income has been limited to interest on its cash balances and therefore it is not currently dependent upon market prices for its operations, nor is it dependent upon any patents, licenses or manufacturing processes.

The mineral exploration operations of the Company are subject to regulation by several government agencies at the Federal, Provincial and local levels. These regulations are well documented and a fundamental aspect of operations for any resource company in Canada and the United States. Management believes the Company is in compliance with all current requirements and does not anticipate any significant changes to these regulations which will have a material effect on the Company's operations. The Company has obtained or has applied for all material permits required for its anticipated exploration activities.

Mineral Properties

The Company currently operates in the mineral exploration sector. All of the Company's properties are located in Canada, Mexico and the United States and are at the exploration stage.

Table of Contents

25

Table of Contents

Seabridge considers its material properties to be the KSM Project and the Courageous Lake Project. These material properties are described in detail below.

Courageous Lake Project

The Courageous Lake project is a gold project covering approximately 67,000 acres located in the Northwest Territories, Canada. Seabridge has a 100% interest in the project, subject to a 2% NSR on certain portions of the property. The Property is without known mineral reserves and is at the exploration stage; the Company's current efforts are exploratory in nature.

Location and Access

The project is located approximately 240 kilometers northeast of Yellowknife in the Northwest Territories. Year round access is available by air, either by fixed wing aircraft to the airstrip at the former Salmita mine 6 kilometers to the south or via float-equipped aircraft to several adjacent lakes. During mid-winter, access is available via a winter road. There are about 10 kilometers of gravel roads located on the property.

Table of Contents

27

Table of Contents

How Acquired

In May 2002, Seabridge entered into a purchase agreement with Newmont Canada Limited and Total Resources Canada Limited on the Courageous Lake project comprised of 17 mining leases covering 18,178 acres. Under the purchase agreement, Seabridge paid Newmont/Total US\$2.5 million in cash and granted them a 2.0% NSR and agreed that it would be liable to make two (2) further payments of US\$1.5 million, each subject to the price of gold passing certain thresholds, for a 100% interest in the property. A further US\$1.5 million was paid to Newmont/Total in April 2003 as a result of the spot price of gold closing above US\$360 per ounce for 10 consecutive days, which occurred in February 2003. A further US\$1.5 million was payable to Newmont/Total 60 days after the spot price of gold closes at or above US\$400 per ounce. This final payment was made in February 2004. The purchase by Seabridge closed on July 31, 2002. Upon acquiring the Courageous Lake project, Seabridge assigned its right thereto to its wholly owned subsidiary, 5073 N.W.T. Ltd. The obligations of 5073 N.W.T. Ltd. under the agreement, including the payment of the royalty, is secured by a debenture under which the vendors have been granted a security interest in the Courageous Lake property. Subsequent to this acquisition, Seabridge staked contiguous open ground totaling an additional 48,905 acres in 42 mining claims of which a portion is subject to the terms of the purchase agreement, including the 2% royalty. In 2004, an additional property was optioned in the area ("Red 25"). Under the terms of the agreement, the Company paid \$50,000 on closing and is required to make option payments of \$50,000 on each of the first two anniversary dates (paid) and subsequently \$100,000 per year. In addition, the property may be purchased at any time for \$1,250,000 with any option payments being credited against the purchase price.

Regional and Property Geology

The Courageous-Matthews Lakes belt is characterized by a series of north to northwest trending Archean metavolcanic and metasedimentary rocks that are within the Yellowknife Supergroup and are locally referred to as the Courageous Lake Greenstone Belt ("CLGB"). The CLGB is approximately 60 kilometers long, with a maximum east-west width of 5.5 kilometers. Two distinct volcanic cycles have been recognized within the CLGB. The second cycle of volcanism is conformably overlain by a thick sequence of metasedimentary rocks that are locally known as the Yellowknife Group Sediments ("YGS"). The dominant post YGS lithology consists of large granodiorite to diorite plutons that bound the Courageous Lake deposit along its east and west flanks.

North of Matthews Lake, the Courageous Lake property consists of a sequence of northerly trending, steeply dipping metasedimentary and metavolcanic rocks, with tops to the east. All of the currently recognized gold occurrences on the property are located within or near the top of the second cycle of volcanism of the CLGB. Generally, the units that make up the second volcanic cycle are about 2 kilometers thick and have been subdivided into 8 distinct mappable units.

Table of Contents

Both the main Tundra and carbonate zones within the Courageous Lake property strike north-south and have a near vertical dip component. The zones are characterized by moderate to intense shearing, sericite-carbonate alteration, and quartz veining. These mineralized zones are very persistent along strike and down dip. The continuity of gold mineralization has been demonstrated to be at least 800 meters along strike based upon previous drilling results. Within the area that has been tested by drilling, the continuity of gold mineralization is at least 100 meters in a down dip direction. The limits of gold mineralization have not been fully tested and the deposit remains open along strike and down dip.

Previous Exploration History

Gold was first discovered in the Courageous Lake area in the early 1940's. Beginning in 1976, Noranda Exploration Ltd. initiated exploration in the Courageous Lake Volcanic Belt. Exploration activities included geological reconnaissance, airborne, EM and magnetic surveys, ground follow-up and claim staking. In 1982, Noranda initiated a limited drill program to evaluate rock units north of Matthews Lake. Detailed geophysics, geological mapping, and extensive diamond drilling followed this initial program leading to the discovery of two gold deposits, the Tundra Deposit (Main Zone), known as the FAT Deposit, and the Carbonate Zone.

From 1982 to 1987, Noranda continued core drilling the property from the surface and also constructed a winter road to the property. They also began an environmental impact study. In late 1987, Noranda made the decision to sink a vertical shaft to provide access for conducting an underground definition drilling program and to be able to test gold grade continuity and tenor by drifting and raising on ore grade shoots. This also allowed Noranda to extract a bulk sample for metallurgical testing. In conjunction with the development of the shaft, surface core drilling, magnetic, VLF, and HLM surveys were also completed.

In late 1987, Noranda completed an in-house preliminary resource estimate. Based upon this work, a two-year underground exploration program was initiated. The program was designed to establish an underground mining reserve, access material for bulk metallurgical sampling and provide engineering information for mine design and planning. The shaft was timbered and completed to a depth of 472.6 meters in April 1989. Drifting on the target zone occurred between May to November 1989 and totaled 1,948.2 meters. Both lateral drifts and sub-vertical raises were completed and provided access to bulk sample locations and diamond drilling stations along the strike of the target zones. Approximately 200 vertical meters and 750 to 8000 of strike length of the mineralized zone were tested by underground drill holes. Additional horizontally fanned holes were drilled on 25-meter centers to aid in the interpretation of the target zone. Underground drilling was completed in November 1989 and totaled 27,459.25 meters in 125 diamond drill holes.

Little additional work was performed on the property until Placer Dome optioned the property in 1998. Placer's exploration included a core drilling/sampling program in order to verify Noranda's previous work and to provide infill sample data. Detailed mapping and structural analysis was done by Placer concurrent with the drilling to help design a

Table of Contents

drill plan as well as conducting a ground magnetic survey to define the zone of mineralization. Placer utilized two diamond drill rigs to provide detailed information on the continuity of the Tundra Main Zone and to confirm the Carbonate Zone. The total diamond drilling completed by Placer was 15,988 meters in 76 drill holes. Placer dropped its option on the property in 1999.

Environmental/Regulatory Information

As part of its due diligence review on the property, Seabridge engaged EBA Engineering Consultants Ltd. of Yellowknife, Northwest Territories, to prepare an Environmental Review of the Courageous Lake property. EBA determined the governmental environmental review process in the NWT would likely take 24 to 36 months from the time a Project Description Report had been filed with the authorities before the review process began. An additional 12 to 16 months would likely be required to complete the regulatory review process, all at a cost of \$2-8 million, plus another \$0.5-1 million for costs during the regulatory phase.

Additionally, EBA visited and evaluated the site for any current or potential environmental damage related to historical exploration work conducted at Courageous Lake by previous operators. EBA found no significant environmental concerns, but did note several areas of potential concerns, including the existing land disturbances, acid rock drainage from waste rock and drill casings.

The Company began to collect environmental data at their Courageous Lake, NWT property in 2003. The data collection was designed and implemented by EBA Engineering Consultants Ltd and focused on multi-year studies required to obtain operating permits. To date the data includes archaeology, fisheries, water quality, hydrology and wildlife. The environmental programs in 2005, 2006 and 2007 included hydrology and a comprehensive review of environmental data collection programs to support the application to the McKenzie Valley Land and Water Board for development licenses and permits.

Current and Planned Work

In late 2002, Seabridge engaged a group of independent consulting firms to undertake an engineering study for Courageous Lake. During 2003, preliminary reports were completed on key mining and metallurgical issues relating to the project. In January 2004, Seabridge authorized the independent consultants to upgrade capital and operating cost estimates in its Courageous Lake study to pre-feasibility levels to better define the economics of the project. As a result of a 2004 drilling program, the Company commissioned a new independent resource estimate for the FAT deposit which was completed in December 2004 and was incorporated into the engineering study. The engineering study was completed in September 2005 and the results are presented below.

During a 2003 summer exploration program, Seabridge successfully identified 12 gold targets at Courageous Lake with characteristics similar to the existing FAT zone at the project. The Company also identified significant drill core from previous owners of these

Table of Contents

targets which had not been assayed. The drill core, an estimated 110,000 meters, was retained on the property but never evaluated for bulk mineable potential. From September through December of 2003, Seabridge conducted a program to evaluate and prioritize these 12 targets by sampling and assaying available core. The results from this program confirmed that nine of the 12 targets have the potential to host bulk mineable deposits similar to FAT. Of these nine targets, four have been consolidated into what is now called the Salmita Zone and five have been consolidated into what is now called the Tundra Zone. A 10,000-meter core drill program was conducted by Seabridge during 2004 that focused on testing the Salmita and Tundra Zones as well as the potential strike extension of the FAT zone and the FAT hanging wall zone.

In 2004, drill testing of selected priority targets was undertaken by the Company. The program was conceived in 2 stages, initial testing for strataform gold concentrations similar to the FAT Deposit and sectional drilling for potential resource additions. The initial program intended to test 3 target areas, Olsen Lake, Walsh Lake and the South FAT Extension. Ground conditions precluded a test of the Walsh Lake target, but the other targets were tested. Results from the initial stage of the program led Seabridge to initiate sectional drilling on the South FAT Extension. The South FAT Extension was a projection of the previous resource model where little work had been completed. Surface and initial drilling results indicated that 300 meters of strike could be added to the FAT Deposit with the completion of sectional drilling. The second stage of the 2004 program completed the sectional drilling on 50-meter section lines across these 300 meters of strike.

In September 2005, an engineering study (classified as a Preliminary Assessment under National Instrument 43-101 in Canada) for the Courageous Lake project was completed by a team of independent consultants. The Preliminary Assessment is dated September 7, 2005 and is entitled "Seabridge Gold Inc., Courageous Lake Project, Preliminary Technical Assessment". The independent consultants concluded that given the resource size, location and grade, a year round, open-pit bulk mineable operation with on-site processing is the most suitable development scenario. A base case scenario was developed for the project incorporating a 25,000 tonne per day operation (9.0 million tonne per year throughput) resulting in a projected 8.5 year operation with average annual production of 545,000 ounces of gold.

During 2005 and 2006, the Company completed an additional 15,689 meters of core drilling at Courageous Lake, designed to test areas to the west of the main mineralized zones and to the north.

In 2007, the Company commissioned a group of independent consultants to update the Preliminary Assessment by incorporating the new 2007 resource estimate for the project and updating all capital and operating cost estimates. An updated Preliminary Assessment was completed in March 2008, and the results are mentioned in the next section.

The Company estimates its annual holding costs of the Courageous Lake Project to be \$236,000 with \$136,000 of these costs paid to the Department of Indian Affairs and Northern Development, Northwest Territories and the remaining \$100,000 as an option payment on the Red 25 claim payable to Bathurst Inlet Developments (1984) Ltd.

Table of Contents

Mineral Resources

Over the period of previous exploration at Courageous Lake, several resource estimates have been prepared. The most detailed historic estimates were conducted by Noranda in 1990 at the conclusion of its underground exploration program, by Placer Dome in 1999 at the conclusion of its exploration program and by Resource Modeling Inc. (an independent consulting firm based in Tucson, Arizona) in July 2002 as part of the Company's due diligence when it acquired the project from Newmont and Total, and in December 2004 incorporating additional exploration results subsequent to the 2002 estimate.

In January 2007, RMI completed a new resource model for Courageous Lake, incorporating the results from the Company's 2005 and 2006 exploration programs. The study provided resource estimates at various cut-off grades.

In March 2008, an updated Preliminary Assessment for the Courageous Lake project was completed by a group of independent consultants including Wardrop Engineering Inc. ("Wardrop"), Snowden Mining Consultants Inc. ("Snowden"), EBA Engineering Consultants Ltd. ("EBA"), TJS Mining-Met Services Inc. ("TJS"), W.N. Brazier & Associates Inc. ("Brazier"), and Resource Modeling Inc. ("RMI") (collectively the "Project Consultants").

In the March 2008 Preliminary Assessment, Snowden determined that based on a mining cost of \$1.15 per tonne, a processing and G&A cost of \$14.19 per tonne, an 88.9% recovery rate, and a gold price of US\$690, that a 0.76 gram per tonne cut-off grade was appropriate for the deposit.

Courageous Lake Gold Resources at 0.76 grams per tonne cut-off:

Measured		Indicated	
Tonnes	Grade Ounces	Tonnes	Grade Ounces
(000's)	(g/T)	(000's)	(g/T)
6,531	2.85	598	56,577
		2.05	3,729

Cautionary Note to U.S. Investors concerning estimates of Measured and Indicated Resources

This section uses the terms "measured resources", "indicated resources" and "inferred resources". We advise U.S. investors that while those terms are recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize them. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Table of Contents

Courageous Lake Gold Inferred Resources at 0.76 grams per tonne cut-off

	Inferred	
	Tonnes Grade	Ounces
	(000's) (g/T)	(000's)
	101,394 1.89	6,161

Cautionary Note to U.S. investors concerning estimates of Inferred Resources

This section uses the term “inferred resources”. We advise U.S. investors that while this term is recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize it. “Inferred resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. U.S. investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.

None of the resource can be classified as a Mineral Reserve. Additional exploration work will be required in order to upgrade the resources into reserve categories, and a full feasibility study will be required in order to determine if any of the mineral resources are economic and can be profitably mined.

The resource model constructed for the Courageous Lake deposit incorporates data from 488 holes drilled by Seabridge, Noranda and Placer Dome totaling 131,338 meters. Block model gold grades in the Courageous Lake resource model were estimated using an inverse distance weighting interpolation procedure.

KSM Project

The KSM Project consists of three separate gold zones (Kerr, Sulphurets and Mitchell) located in the Iskut-Stikine River region of British Columbia. Seabridge currently has a 100% interest in the project. The Property is without known mineral reserves and is at the exploration stage; the Company’s current efforts are exploratory in nature.

Location and Access

The KSM property is located in the Iskut-Stikine River region, approximately 65 km northwest of Stewart, British Columbia. Access to the property is by helicopter from Stewart. Mobilization of equipment and personnel can be staged quite effectively from the Tide Lake airstrip, Bronson Strip or from Bob Quinn and Bell II Crossing on the Stewart Cassiar Highway.

How Acquired

Seabridge entered into a Letter of Intent with Placer Dome in June 2000 to acquire a 100% interest in KSM. On March 27, 2001, the Company and Placer Dome executed a definitive acquisition agreement and the acquisition closed in June 2001. At closing, the Company issued Placer Dome (i) 500,000 common shares of Seabridge; (ii) 500,000 common share purchase warrants, exercisable by Placer Dome at C\$2.00 per share for two years; and (iii) a 1% net smelter royalty interest on the Project, capped at C\$4.5 million. Seabridge will be obligated to purchase the 1% net smelter royalty from Placer Dome for \$4.5 million in the event that a positive feasibility study demonstrates a 10% internal rate of return after tax and financing costs.

In September 2002, the Company optioned KSM to Noranda Inc. (which subsequently became Falconbridge Limited and then Xstrata plc.) which could have earned a 50% interest by spending \$6 million on exploration within 6 years. Noranda was entitled to earn a further 15% by funding all costs to complete a feasibility study on the project.

In April 2006, the Company announced that it had reached agreement with Falconbridge whereby the Company would re-acquire Falconbridge's option to earn a 65% interest at KSM for 200,000 common shares of the Company and 2.0 million conditional common share purchase warrants of the Company with an exercise price of C\$13.50 per share. One warrant becomes exercisable for each new ounce of gold resource discovered at KSM, up to the maximum of two million. The transaction closed in August 2006. With the announcement of an initial mineral resource at the Mitchell mineral resource, the full 2.0 million warrants became exercisable in February 2007. During 2007, all two million warrants were exercised by Xstrata and the Company received \$27 million in proceeds.

The KSM project consists of two contiguous claim blocks known as the Kerr Property and the Sulphurets Property. Total minimum annual holding costs associated with the project are approximately \$100,000.

Property Description

The property consists of 30 contiguous mineral claims and 19 contiguous placer claims covering an area of approximately 6,726 hectares while the placer claims cover about 4,554 hectares. It should be noted that most of the placer claims lie "over the top" of the mineral claims. Seabridge also has acquired 45 contiguous mineral claims (Seabee Property) that are located about 19 kilometers northeast of the KSM property.

The KSM mineral claims were converted from 58 legacy claims to B.C.'s new Mineral Titles Online (MTO) system in 2005. Eleven legacy placer claims were converted in 2005 to nine cell placer claims. Ten cell placer claims have been added to the property and are contiguous with the converted legacy placer claims. In the MTO system, claims are located digitally using a fixed grid on lines of latitude and longitude with cells measuring 15 seconds north-south and 22.5 seconds east-west (approx. 460 by 380 meters at KSM). The legacy claims were located by previous owners by placing tagged posts along the boundaries; however the survey method employed in locating the legacy claims is not known. With the MTO system no markings are required on the ground and the potential for gaps and/or overlapping claims inherent in the old system is eliminated.

Table of Contents

The claims are 100% owned by Seabridge. Placer Dome Inc. (now Barrick Gold) retains a 1% net smelter royalty (NSR) that is capped at \$4.5 million. Two of the pre-converted claims (Xray 2 and 6) are subject to a contractual royalty obligation in accordance with terms in the underlying Dawson Agreement. The lands covered by these claims are now contained within the converted Xray 1 claim (Tenure No. 516245). There is an additional underlying agreement whereby advance annual royalties payable to Dawson are being paid by Placer Dome Inc.

Annual holding costs for all of the claims (mineral and placer) are approximately \$172,988. In 2007, assessment work was filed to advance the year of expiry to 2018. Neither the KSM placer claims nor the Seabee Property claims have had any work filed to date, but both are in good standing to 2008 and 2009.

Regional and Property Geology

The KSM property lies within the Stikine Terrane and is underlain largely volcanic, volcanoclastic and sedimentary rocks at the western edge of the Bowser Basin. Within this geologic framework, copper, gold and molybdenum mineralization and associated alteration are focused in a local core where intense folding, faulting, thrust faulting and intrusions are prevalent. A number of deformed porphyry and vein type deposits occur in the Mitchell-Sulphurets area. These deposits are characterized by a strong copper-gold and minor molybdenum association, and spatially occur along the flanks of a horseshoe-shaped trend.

The project consists of three separate gold/copper zones (Kerr, Sulphurets and Mitchell) and are discussed separately below:

Kerr Zone

The Kerr zone extends approximately 3,000 m in a northerly trend from the crest of a ridge above the southwestern branch of the Sulphurets Glacier down to the lower slopes of a cirque-like basin just above Sulphurets Lake. The zone is a pyrite-rich copper-gold system that occurs in strongly altered and deformed monzonitic intrusions in sedimentary and volcanoclastic rocks. The most important mineralization type is quartz stockwork. The strongest copper-gold mineralization is associated with a core of chlorite-bearing alteration and quartz stockwork.

Sulphurets Zone

Disseminated copper-gold mineralization in the Sulphurets Gold Zone is centered about a hydrothermal breccia (Breccia Gold Zone) and dyke complex (Raewyn Copper-Gold Zone) representing the higher levels of a copper-gold porphyry system. The combined gold and copper lithogeochemical anomaly associated with the Sulphurets Gold Zone Target has a strike length of 2.5 kilometers by up to one kilometer in width.

Table of Contents

Mitchell Zone

The Mitchell zone is situated at the base of the Mitchell Glacier within an erosional window through the major thrust fault complex that crosses the property. The intermediate volcanic rocks exposed in the erosional window are dominated by intense phyllic alteration that diminishes to the west. This conspicuous phyllic alteration is characterized by abundant fine-grained pervasive sericite, 5 to 20% pyrite and quartz stockwork veins that locally exceed 80% of the rock mass. Gold and copper are associated with fine grained sulfide minerals which are disseminated in the rock and in stockwork veins. Gold and copper grades in the drill results are remarkably consistent down hole, along and across strike. This homogeneity of grades and the lack of sharp grade contrasts across the Mitchell zone probably resulted from regional deformation of the mineral system after its deposition.

Exploration History

Placer gold was discovered in Sulphurets Creek in the 1880s. In 1935, copper mineralization was discovered on Mitchell-Sulphurets Ridge in a location now known as the Main Copper Zone. In 1959, gold-silver mineralization was discovered in the Brucejack Lake area. These showings were subsequently explored with surface and underground exploration in the 1980s and 1990s as three comparatively small high-grade gold-silver zones by Newhawk Gold Mines Ltd. and Lacana Mining Corp.

In 1960, claims on the Sulphurets property were staked by Granduc Mines Ltd. and some independent prospectors. Exploration including diamond drilling was completed over an eight-year period on Sulphurets Gold, Main Copper and Quartz Stockwork Zones by Granduc and the Newmont Mines Joint Venture. From 1971 to 1975 Granduc continued exploration on the Sulphurets Property. From 1980 to 1985, Esso Minerals optioned the Sulphurets Property from Granduc in order to explore for porphyry molybdenum, bulk mineable copper-molybdenum-gold and gold-bearing vein type deposits. In 1985, Esso surrendered its interest in the Sulphurets Property to Granduc.

The Alpha Joint Venture (“Alpha”) staked the Kerr Property in 1982. Anomalous gold values in soils were identified in 1983 by Alpha and based on these results Brinco Limited optioned the Kerr Property in 1984 and funded the next phase of geological mapping, prospecting and geochemical sampling. This work outlined a gold anomaly over one kilometer long. In 1985, Newhawk Gold Mines Ltd. and Lacana Mining Corp. formed a joint venture, and optioned the adjoining Sulphurets Property from Granduc and explored several zones, including conducting diamond drilling.

In 1989, fieldwork completed by Placer Dome included additional diamond drilling to extend the Kerr zone to a strike length of more than 1,600 meters. In 1990, Placer Dome completed a major diamond drill program on the Kerr Property to further define the zone. Placer further completed a major diamond drill program on the Sulphurets Gold Zones and adjoining Kerr zone during the summer of 1992, with the total exploration expenditures incurred by Placer on the KSM property through to year-end 1992 was C\$6.6 million.

Table of Contents

During 2003 and 2004, under its option to earn up to a 65% interest in the project from the Company, Falconbridge conducted geophysics, surface mapping, surface sampling and target delineation at the project. Falconbridge completed a \$1.3 million drill program on six new targets during the summer of 2005.

In 2006, the Company completed a 9,100 meter core drill program at KSM designed to expand the project's known gold resource by testing for the strike and depth extensions of the Sulphurets zone and by systematically drilling the promising new Mitchell gold zone identified in previous work. In February 2007, the Company announced a 43-101 compliant resource estimate for the Mitchell zone prepared by RMI.

In 2007, the Company completed a 15,300 meter core drill program at KSM designed to expand the Mitchell zone's known gold resource by testing for the strike and depth extensions. In January 2008, RMI completed a 43-101 compliant resource estimate for the Kerr and Sulphurets zones. In February 2008, RMI completed an updated 43-101 compliant resource estimate for the Mitchell zone.

Mineral Resources

A significant amount of work has been performed on the Kerr and Sulphurets zones by previous owners including Placer Dome. RMI remodeled these zones, as well as the Mitchell zone, using independently constructed gold and copper grade envelopes as the primary constraint for estimating block grades and then tabulated Mineral Resources by using a gold equivalent cutoff grade (which converts copper values to gold values at set prices and estimated metal recoveries).

RMI estimated gold and copper grades using inverse distance weighting methods within gold and copper grade envelopes that were constructed for each zone. The grade models were validated visually and by comparisons with nearest neighbor models. The estimated block grades were classified into indicated and inferred mineral resource categories based on mineralized continuity that was determined both visually and statistically (i.e. variogram ranges) together with the proximity to drill hole data.

RMI estimated gold and copper mineral resources using a gold equivalent cut-off grade of 0.50 grams per tonne. The key parameters used in determining this cut-off included gold and copper prices of US\$650/ounce (70% recovery) and US\$2.00/pound (85% recovery). Mining costs of US\$1.25/tonne and processing, smelting/refining and general and administrative costs of US\$8.20/tonne were also used.

Table of Contents

KSM Indicated Mineral Resources at 0.50 grams per tonne gold equivalent cut-off:

Zone	Indicated Mineral Resources				
	Tonnes (000)	Gold (g/t)	Copper (%)	Gold Ounces (000)	Copper Pounds (millions)
Mitchell	734,163	0.69	0.18	16,287	2,913
Kerr	206,272	0.25	0.45	1,651	2,037
Sulphurets	74,655	0.75	0.24	1,798	388
Total	1,015,090	0.61	0.24	19,736	5,338

Cautionary Note to U.S. Investors concerning estimates of Indicated Resources

This section uses the term “indicated resources”. We advise U.S. investors that while those terms are recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize them. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

KSM Inferred Mineral Resources at 0.50 grams per tonne gold equivalent cut-off:

Zone	Inferred Mineral Resources				
	Tonnes (000)	Gold (g/t)	Copper (%)	Gold Ounces (000)	Copper Pounds (millions)
Mitchell	667,421	0.62	0.15	13,304	2,206
Kerr	51,387	0.21	0.45	352	506
Sulphurets	33,636	0.62	0.20	675	147
Total	752,444	0.59	0.18	14,331	2,859

Cautionary Note to U.S. investors concerning estimates of Inferred Resources

This section uses the term “inferred resources”. We advise U.S. investors that while this term is recognized and required by Canadian regulations, the U.S. Securities and Exchange Commission does not recognize it. “Inferred resources” have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. U.S. investors are cautioned not to assume that part or all of an inferred resource exists, or is economically or legally mineable.

None of the resource can be classified as a Mineral Reserve. Additional exploration work will be required in order to upgrade the resources into reserve categories, and a full feasibility study will be required in order to determine if any of the mineral resources are economic and can be profitably mined.

Table of Contents

The database for the Kerr zone incorporates 144 core drill holes totaling 26,409 meters. The database for the Sulphurets zone incorporates 60 core drill holes totaling 13,033 meters. The database for the Mitchell zone incorporates 69 core holes totaling 24,824 meters.

Environmental/Regulatory Information

The KSM Property falls within the Cassiar-Iskut-Stikine Land and Resource Management Plans (LRMP). At this stage, there are no direct Protected or Special Management Areas overlapping the KSM Property. However, as negotiations on recommendations proceed, there may be potential Land Use conflicts arising from future allocations by the Regional Protected Areas Team in the vicinity of the KSM project. In particular, a Conservation-oriented Protection Area and large River Corridor Special Management Area are currently being recommended along the lower two-thirds of the Unuk River. The establishment of this type of Protected Area, although it does not overlap the KSM Property, could impact the approval process of potential development plans and valley access to the project.

The KSM Project falls within the traditional lands of the Tahltan First Nation. The Tahltan have been active community and development partners in other mining projects such as the Golden Bear mine, and Homestake's nearby Eskay Creek Mine.

Placer Dome investigated water drainage at the Kerr and Sulphurets zones and found that the waste rock to be generated by any project would be acid generating. High levels of acidity were observed locally, but further downstream the high volume of glacial meltwater that flowed into the drainage system neutralized the PH levels in the water.

Reclamation and decommissioning activities associated with previous exploration activities have been initiated and almost completed on the KSM Property. The main activities include response to periodic inspections by the British Columbia Ministry of Energy and Mines. Key activities have concentrated on decommissioning the Kerr Camp, the old Western Canadian Camp, general clean-up of old equipment and materials, and reclamation of drill access roads and drill sites. The majority of the tasks have been concluded including the plugging and cementing of water-making drill hole collars. There are a number of outstanding activities that are still required to be administered in accordance with recommendations from the Ministry including additional reclamation on drill access roads and equipment and material clean-up. At the time of the Company's acquisition of the KSM Property, the Ministry estimated \$225,000 of additional reclamation work may be required and the Company deposited this amount under a safekeeping agreement with the Ministry for these obligations. In early 2004, Falconbridge assumed these reclamation obligations and the \$225,000 deposit was returned to the Company. Following Seabridge's acquisition of Falconbridge's option at KSM, in 2007 the Company deposited \$200,000 towards additional reclamation liabilities under a safekeeping agreement with the Ministry.

Table of Contents

Current and Planned Work

In December 2007, the Company announced that it had assembled a team of independent consultants to prepare a National Instrument 43-101 Preliminary Assessment for its KSM project. The Preliminary Assessment will establish a project development scenario for KSM including preliminary capital and operating cost estimates.

The Preliminary Assessment is being coordinated by TJS Mining-Met Services and includes a number of independent contractors including: Resource Modeling Inc. (resource estimate), Rescan Environmental Services (environmental baseline and permitting), Klohn Crippen Berger (geotechnical work on tailing, diversions, tunnels and site services), Piteaus Associates Engineering Ltd. (rock mechanics and mining pit slopes), Moose Mountain Technical Services (mine planning, costing and production scheduling), WN Brazier Associates (electrical and power generation plans and economics), TJS Mining-Met Services Inc. (metallurgy and process).

In addition to on-site sampling, selected ore samples and waste samples will be tested in 2008 to determine the environmental parameters and further characterize the metallurgical response of the Mitchell ore zones. The Preliminary Assessment is scheduled for completion in late 2008. As part of their mandate, TJS Mining-Met Services and Rescan Environmental Associates will also facilitate the preparation of a Project Description document, scheduled for completion by April 2008. This document is required by the government to initiate permitting activities for the project.

The Company also is planning to conduct additional exploration activities at KSM during 2008. The Company is planning a 15,000 meter core drill program designed to improve the value of the asset by exploring for higher grade gold zones, upgrading more of the remaining inferred mineral resources to the indicated category and further expanding the Mitchell zone.

Other Projects

The Company also holds a 100% interest in several other projects, all of which are situated in North America. The Company does not consider any of these other projects material to the overall operations. These projects include Noche Buena (Sonora, Mexico), Quartz Mountain (Oregon), Grassy Mountain (Oregon), Hog Ranch (Nevada) and Red Mountain (British Columbia, Canada). The Company's ownership at Quartz Mountain is subject to a 65% earn-in by Quincy Gold.

The Company also owns a 100% interest in Pacific Intermountain Gold Corporation ("PIGCO"), a private company focused on the acquisition and exploration of early-stage gold and silver properties in Nevada. The Company's ownership interest in PIGCO is subject to a 10% net profits interest held by a previous minority shareholder in PIGCO.

Table of Contents

The Company is not planning any additional work on any of these other projects at this time.

All of the Company's Properties are without known mineral reserves and are at the exploration stage.

Item 4A. Unresolved Staff Comments

Not applicable

Item 5. Operating and Financial Review and Prospects

Overview

The following is a discussion of the results of operations and financial condition of Seabridge Gold Inc. and its subsidiary companies for the years ended December 31, 2007, December 31, 2006 and December 31, 2005. This report should be read in conjunction with the audited consolidated financial statements for the years ended December 31, 2007, 2006 and 2005 in Item 17 of this report.

The Company's financial statements are stated in Canadian Dollars (C\$) and are prepared in accordance with Canadian Generally Accepted Accounting Principles (GAAP), the application of which, in the case of the Company, conforms in all material respects for the periods presented with United States GAAP except as noted in Footnote #11 to its audited annual consolidated financial statements for the year ended December 31, 2007. The value of the U.S. Dollar in relationship to the Canadian Dollar was \$0.99 as of December 31, 2007.

The Company is a development stage company engaged in the acquisition and exploration of gold properties located in North America. The Company is designed to provide its shareholders with exceptional leverage to a rising gold price. The Company's business plan is to increase its gold ounces in the ground but not to go into production on its own. The Company will either sell projects or participate in joint ventures towards production with major mining companies. During the period 1999 through 2002, when the price of gold was lower than it is today, Seabridge acquired 100% interests in eight advanced-stage gold projects situated in North America. Subsequently, the Company also acquired a 100% interest in the Noche Buena project in Mexico. As the price of gold has moved higher over the past several years, Seabridge has commenced exploration activities and engineering studies at several of its projects. Seabridge's principal projects include the Courageous Lake property located in the Northwest Territories and the KSM (Kerr-Sulphurets-Mitchell) property located in British Columbia. Seabridge's common shares trade in Canada on the TSX Venture Exchange under the symbol "SEA" and in the United States on the American Stock Exchange under the symbol "SA".

Selected Annual Information

Table of Contents

The Company has since inception financed its activities through the distribution of equity capital. The Company anticipates having to raise additional funds by equity issuance in the next several years, as all of the Company's properties are at the exploration stage. The timing of such offerings is dependent upon the success of the Company's exploration programs, the ability to attract joint-venture partners, as well as the general economic climate.

Part A. Results of Operations

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

The net loss for the year ended December 31, 2007 was \$5,542,000 or \$0.15 per share compared to a net loss of \$3,300,000 or \$0.10 per share for 2006. For both years, reported losses were reduced due to the recognition of income tax recoveries (\$620,000 in 2007 and \$1,906,000 in 2006) relating to the renouncing of Canadian Exploration Expenses to the investors of flow-through financings. The Company's interest income from cash investments was up considerably at \$823,000 compared with \$363,000 in 2006 with higher cash balances resulting primarily from the exercise of share purchase warrants for proceeds of \$27 million. Corporate and general expenses were higher in the 2007 period due to activity levels, bonus payments and stock option compensation expenses of \$2,830,000 (2006 - \$1,979,000), resulting mainly from the vesting of stock options granted in 2006 due to the increase in the Company's share price. At December 31, 2006, the Company wrote down the value of its investment in Atlas Precious Metals Inc. amounting to \$749,000 as that company was not able to secure financing due to perceived political risks in the jurisdiction where its main asset was located.

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

The net loss for the year ended December 31, 2006 was \$3,300,000 or \$0.10 per share compared to a net loss of \$1,157,000 or \$0.04 per share for 2005. For both years, reported losses were less due to the recognition of income tax recoveries (\$1,906,000 in 2006 and \$821,000 in 2005) relating to the renouncing of Canadian Exploration Expenses to the investors of flow-through financings. The Company's interest income from cash investments was up considerably at \$363,000 compared with \$135,000 in 2005 with higher cash balances to invest from financings and higher interest rates compared to 2005. Corporate and general expenses were higher in the 2006 period due to stock option compensation expenses of \$1,979,000 (2005 - \$361,000), resulting mainly from one third of the options granted early in 2006 vesting due to the significant increase in the Company's share price, increased management compensation, higher investor relations expenses, mineral property search activities and stock exchange and other regulatory fees, and a loss on foreign exchange of \$161,000 as funds were accumulated to acquire the Noche Buena property. At December 31, 2006, the Company wrote down the value of its investment in Atlas Precious Metals Inc. amounting to \$749,000 as that company had not been able to secure financing due to perceived political risks in the jurisdiction where its main asset is located.

Quarterly Information

Selected financial information for each of the last eight quarters ended December 31, 2007 is as follows (unaudited):

	4th Quarter Ended December 31, 2007	3rd Quarter Ended September 30, 2007	2nd Quarter Ended June 30, 2007	1st Quarter Ended March 31, 2007
Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Loss for period	\$ (1,336,000)	\$ (1,473,000)	\$ (1,947,000)	\$ (786,000)
Loss per share	\$ (0.04)	\$ (0.04)	\$ (0.05)	\$ (0.02)
	4th Quarter Ended December 31, 2006	3rd Quarter Ended September 30, 2006	2nd Quarter Ended June 30, 2006	1st Quarter Ended March 31, 2006

Edgar Filing: SEABRIDGE GOLD INC - Form 20-F

Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Income (loss) for period	\$ (1,598,000)	\$ (1,878,000)	\$ (1,134,000)	\$ 1,310,000

43

Table of Contents

The loss in the second and third quarters of 2007 and the third quarter of 2006 were higher than other quarters due to the stock option compensation expense for the vesting of two-tiered stock options. The loss in the fourth quarter of 2006 was higher due to the write-down of an investment amounting to \$749,000.

The income for the first quarter in 2006 was due to the recognition of income tax recoveries relating to the renouncing of Canadian Exploration Expenses to the investors of the flow-through financings completed in 2005.

Mineral Interest Activities

During the year ended December 31, 2007, the Company incurred net expenditures of \$9,406,000 on mineral interests compared to \$28,867,000 in the year ended December 31, 2006. In 2007, expenditures were mainly for exploration drilling programs at the KSM, Noche Buena and the Golden Arrow in Nevada (part of the Pacific Intermountain property group) projects. In addition in 2007, a new 13.1 million ounce inferred gold mineral resource estimate was completed for the Mitchell zone of the KSM project and engineering and metallurgical studies were undertaken at the KSM and Courageous Lake projects. At Courageous Lake, the 2006 and 2007 work and new mineral resource will be used to complete a revised Preliminary Economic Assessment (“PEA”) and engineering studies in 2008.

In the 2006 year, almost \$15 million of the costs were for the deemed value of the shares and warrants issued to acquire the KSM project and an additional \$4.9 million was paid in cash for the acquisition of the Noche Buena project in Mexico. Exploration expenditures incurred in the 2006 period included \$4,553,000 at the Courageous Lake project where drilling programs have helped expand the gold mineral resource, and \$3,656,000 for drilling on the Kerr-Sulphurets project.

For 2008, at KSM, another drilling program is planned to expand the zone and upgrade mineral resources. It is planned to complete a Preliminary Economic Assessment on this project by year end. In Nevada, 2008 exploration activities will include drilling on the Four-Mile Basin project.

Part B. Liquidity and Capital Resources

The ability of the Company to successfully acquire additional advanced-stage gold projects or to advance the projects already acquired is conditional on its ability to secure financing when required. The Company proposes to meet any additional cash requirements through equity financings. In light of the continually changing financial markets, there is no assurance that new funding will be available at the times required or desired by the Company or will not be dilutive to existing shareholders.

During 2008, the Company plans to continue to advance its two major gold projects, KSM and Courageous Lake in order to either sell them or joint venture them towards production with major mining companies. In addition, it will seek to sell off its other properties, initially, Noche Buena and Red Mountain.

Year Ended December 31, 2007

During 2008, the Company plans to continue to advance its two major gold projects, KSM and Courageous Lake in order to either sell them or joint venture them towards production with major mining companies. In addition, it will seek to sell off its other properties, initially, Noche Buena and Red Mountain.

The Company’s working capital position, at December 31, 2007, was \$25,055,000 up from \$6,420,000 at the end of 2006. In 2007, the two million share purchase warrants issued as part of the KSM project acquisition in 2006 were exercised for proceeds of \$27 million. In addition, during 2007 \$4,327,000, (2006 - \$585,000) was received from the exercise of stock options. In 2006, two private placement financings were completed which netted \$12,008,000. The

increase in share capital in 2007 was used for expenditures on exploration and operating costs.

Cash and short-term deposits at December 31, 2007 totaled \$24,942,000, up from \$5,786,000 at December 31, 2006. Operations activities used \$3,446,000 in 2007 compared to \$2,330,000 in the prior year due to increased compensation costs, investor activities and corporate costs. Cash expenditures on Mineral Interests were \$8,351,000 compared to the \$14,571,000 cash expenditures in 2006.

Table of Contents

The Company's cash position at December 31, 2007 is sufficient to undertake planned exploration and corporate activities for 2008 and 2009.

Contractual Obligations

(\$,000)	Total	Payments due by period			
		2008	2009-11	2012-13	After 2013
Mineral interests	8,283	1,069	3,530	2,456	1,228
Reclamation liabilities	1,849	24	-	162	1,663
Business premises operating lease	438	101	303	34	-
	10,570	1,194	3,833	2,652	2,891

US GAAP Reconciliation with Canadian GAAP

Under U.S. GAAP, all expenditures relating to mineral interests prior to the completion of a definitive feasibility study, which establishes proven and probable reserves, must be expensed as incurred. Under Canadian GAAP, these amounts can be deferred. As such, under US GAAP, these amounts and related future tax liabilities are not recorded on the balance sheets.

Reference is made to Seabridge's audited annual consolidated financial statements for the year ended December 31, 2007, particularly Note #11, Reconciliation to United States Generally Accepted Accounting Principles, for the quantification of the differences.

Variation in Operating Results

The Company derives interest income on its bank deposits, which depend on the Company's ability to raise funds, the amount of the deposits and interest rates.

Management periodically, through the exploration process, reviews results both internally and externally through resource related professionals. Decisions to abandon, reduce or expand exploration efforts is based upon many factors including general and specific assessments of mineral deposits, the likelihood of increasing or decreasing those deposits, land costs, estimates of future mineral prices, potential extraction methods and costs, the likelihood of positive or negative changes to the environment, permitting, taxation, labor and capital costs. There cannot be a pre-determined hold period for any property as geological or economic circumstances render each property unique.

Under United States GAAP when flow-through shares are issued, the proceeds are allocated between the issue of shares and the sale of tax benefits. The allocation is made based on the difference between the quoted price of the existing shares and the amount that the investor pays for the shares. The shareholders' equity is reduced and a liability is recognized for this difference which amounted to \$393,250 for the flow-through shares issued in 2006. The liability is reversed when the tax benefits are renounced and a deferred tax liability recognized at that time. Income tax expense is the difference between the amount of the deferred tax liability and the liability recognized on issuance.

Table of Contents

The Company's financial statements are stated in Canadian Dollars (CDN\$) and are prepared in accordance with Canadian Generally Accepted Accounting Principles (GAAP), the application of which, in the case of the Company, conforms in all material respects for the periods presented with United States GAAP except as noted in Note 11 to the 2007 audited financial statements. The value of the Canadian Dollar in relationship to the US Dollar was \$1.01 as of December 31, 2007.

Outlook

During 2008, the Company plans to continue to advance its two major gold projects, KSM and Courageous Lake in order to either sell them or joint venture them towards production with major mining companies. In addition, it will seek to sell off its other properties, initially, Noche Buena and Red Mountain while at the same time ensuring that funding is available for its project holding costs and other corporate requirements.

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is gathered and reported to senior management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), on a timely basis so that appropriate decisions can be made regarding public disclosure. As at December 31, 2007, the Company's management, with the participation of the CEO and CFO, has evaluated the effectiveness of the Company's disclosure controls and procedures as defined in Multilateral Instrument 52-109 of the Canadian Securities Administrators and has concluded that such controls and procedures are effective.

Internal Controls Over Financial Reporting

The Company's CEO and the CFO are responsible for establishing and maintaining the Company's internal controls over financial reporting in accordance with Multilateral Instrument 52-109 of the Canadian Securities Administrators. These controls have been established as at December 31, 2007. There have been no changes in these controls during fiscal year 2007 which have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Shares Issued and Outstanding

At March 19, 2008, the issued and outstanding common shares of the Company totaled 37,298,185. In addition, there were 1,192,300 stock options granted and outstanding (of which 140,000 were unexercisable). On a fully diluted basis there would be 38,490,485 common shares issued and outstanding.

In addition to the 1,192,300 options outstanding, there were 150,000 options granted which are subject to an increase in the share option plan and the approval of shareholders at the next meeting of shareholders.

Table of Contents

Related Party Transactions

During the year ended December 31, 2007, a private company controlled by a director of the Company was paid \$33,300 (2006 - \$33,900) for technical services provided by his company related to mineral properties; a private company controlled by a second director was paid \$360,000 (2006 - \$144,000) for corporate consulting services rendered; a third director was paid \$17,300 (2006 - \$18,000) for geological consulting and outstanding accounts payable to directors at year end were \$94,000. These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Recently Issued Accounting Pronouncements

On January 1, 2007, the Company adopted the following Canadian Institute of Chartered Accountants (CICA) accounting standards which were effective for fiscal years beginning on or after October 1, 2006: Section 1530 Comprehensive Income; Section 3855 Financial Instruments – Recognition and Measurement; Section 3861 “Financial Instruments – Presentation and Disclosure”; and, Section 3865 – Hedges”. These sections require certain financial instruments and hedge positions to be recorded at fair value. The standards also introduce the concept of comprehensive income and accumulated comprehensive income. Adoption of these standards is generally on a retrospective basis without restatement.

Under the new standards, financial instruments designated as “held-for-trading” and “available-for-sale” will be carried at their fair value while financial instruments such as “loans and receivables”, “financial liabilities” and those classified as “held-to-maturity” will be carried at their amortized cost. All derivatives will be carried on the consolidated balance sheets at their fair value, including derivatives designated as hedges. Unrealized gains and losses on effective cash flow hedges will be carried in “Accumulated Comprehensive Income”, a component of “Shareholders’ Equity” on the consolidated balance sheets, while any gains or losses on ineffective hedges will be recognized in earnings.

New Pronouncements Not Yet Adopted

The Canadian Institute of Chartered Accountants (“CICA”) issued the following accounting standards effective for the Company’s fiscal year beginning on January 1, 2008:

Capital Disclosures

In December 2006, the CICA issued Handbook Section 1535, Capital Disclosures, which establishes standards for disclosing information about an entity’s capital and how it is managed. The entity’s disclosure should include information about its objectives, policies and processes for managing capital and disclose whether or not it has complied and the consequences of non-compliance with any capital requirements to which it is subject. The Company is currently evaluating the impact of the adoption of this section on the consolidated financial statements.

Financial Instruments – Disclosures and Financial Instruments - Presentation

In December 2006, the CICA issued Handbook Section 3862 Financial Instruments – Disclosures and Section 3863 Financial Instruments – Presentation. Section 3862 modifies the disclosure requirements of Section 3861 Financial Instruments - Disclosures and Presentation including required disclosure of the assessment of the significance of financial instruments for an entity’s financial position and performance; and of the extent of risks arising from financial instruments to which the Company is exposed and how the Company manages those risks. Section 3863 carries forward the presentation related requirements of Section 3861. The Company is currently evaluating the impact of the adoption of Section 3862, while it does not expect the adoption of 3863 to have a significant effect on the consolidated

financial statements.

Inventories

In March 2007, the CICA issued Handbook Section 3031 Inventories, which replaces Section 3030 Inventories. Under the new section, inventories are required to be measured at the “lower of cost and net realizable value, which is different from the existing guidance of the “lower of cost and market value”. The new section contains guidance on the determination of cost and also requires the reversal of any write-downs previously recognized, if applicable. Certain minimum disclosures are required, including the accounting policies used, carrying amounts, amounts recognized as an expense, write-downs, and the amount of any reversal of any write-downs recognized as a reduction in expenses. The Company evaluated the impact of the adoption of this new section on the consolidated financial statements and concluded the impact will not be material.

Table of Contents

Part C. Research and Development

The Company conducts no Research and Development activities, nor is it dependent upon any patents or intellectual property licenses.

Part D. Trend Information

The Company knows of no trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the Company's operations or financial condition.

PART E: Off Balance Sheet Disclosure

Not Applicable

PART F: Contractual Obligations

On-going contractual obligations of the Company are limited to property holding costs and reclamation liabilities. Although property holding costs are at the discretion of the Company, if payments are not made the Company will lose their rights to the project. Table No. 4 provides details of the Company's future contractual obligations which are required to be satisfied in order to keep its projects in good standing.

Table No. 4
Contractual Obligations (\$000's)

	Total	Payments due by period				After 2013
		2008	2009-11	2012-13		
Mineral interests	8,283	1,069	3,530	2,456	1,228	
Reclamation liabilities	1,849	24	-	162	1,663	
Business premises operating lease	438	101	303	34	-	
	10,570	1,194	3,833	2,652	2,891	

Amounts shown for mineral interests include option payments and mineral lease payments that are required to maintain the Company's interest in the mineral projects.

PART G: SAFE HARBOR

See "Forward Looking Statements" in Item 3D.

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

Table No. 5 lists as of March 20, 2008 the names of the Directors of the Company. The Directors have served in their respective capacities since their election and/or appointment and will serve until the next Annual General Meeting or until a successor is duly elected, unless the office is vacated in accordance with the Articles/By-Laws of the Company. All Directors are citizens of Canada, except, William Calhoun, Eliseo Gonzalez-Urien and Louis Fox, all of whom are citizens of the United States. Frederick Banfield and Rudi Fronk are citizens of both Canada and the United States.

Table No. 5
Directors

Name	Age	Date First Elected/Appointed
James Anthony	60	October 1999
Rudi Fronk	49	October 1999
Frederick Banfield (1,3)	65	October 1999
William Calhoun (1,2,3)	75	February 2000
Thomas Dawson (1,3)	71	January 2006
Louis Fox (2,3)	65	January 2000
Eliseo Gonzalez-Urien (2,3)	67	January 2006

(1) Member of Audit Committee.

(2) Member of Compensation Committee

(3) Member of Corporate Governance and Nominating Committee

Table No. 6 lists, as of March 20, 2008 the names of the Executive Officers of the Company. The Executive Officers serve at the pleasure of the Board of Directors. Mr. Threlkeld is a citizen of the United States. Messrs. Anthony and Chisholm are citizens of Canada. Mr. Fronk is a citizen of both Canada and the United States.

Table No. 6
Executive Officers

Name	Position	Age	Date of Appointment
James Anthony	Chairman	60	October 1999
Rudi Fronk	President and CEO	49	October 1999
William Threlkeld	Senior Vice President	53	November 2001
Roderick Chisholm	Secretary and CFO	58	August 2004

Table of Contents

James Anthony is a financier and corporate strategist specializing in growth companies. He served as a senior policy advisor to a number of cabinet ministers and a premier before establishing a corporate strategy consultancy. He advised a number of major corporations on their positioning within their political and financial environments and lectured at the Niagara Institute. Mr. Anthony has been President of J.S. Anthony & Company, a private investment company, since 1975 and was the past chairman of the board of Greenstone Resources Ltd. Mr. Anthony has been a Director of Seabridge since 1999 and as Chairman since 2001. Mr. Anthony spends approximately 50% of his time on Seabridge business.

Rudi Fronk has over 20 years experience in the gold industry, including serving as a director and senior officer of several publicly traded gold companies. He was appointed President, CEO and a Director of Seabridge in 1999 and has since that time continuously served in those roles. Mr. Fronk is the past President and Director of Greenstone Resources Ltd. from 1994 to 1999. Prior to 1994, he held positions with Columbia Resources (1992-1993), DRX Inc. (1989-1992), Behre Dolbear & Company (1986-1989), Riverside Associates (1984-1986), Phibro-Salomon (1982-1983), and Amax (1980). Mr. Fronk is a graduate of Columbia University from which he holds a Bachelor of Science in Mining Engineering and a Master of Science in Mineral Economics. Mr. Fronk spends 100% of his time on Seabridge business.

Frederick Banfield is the Founder of Mintec since 1970. Mintec is a consulting and software company that provides consulting services to the mineral industry. Mr. Banfield has also served as an independent reserves auditor and mine planning advisor gold mining organizations with respect to projects in the United States, Canada, Africa, Australia and Latin America. Mr. Banfield holds an engineering degree from the Colorado School of Mines. Mr. Banfield spends less than 10% of his time on Seabridge business.

William Calhoun is President of W.M. Calhoun Inc., an independent consultant that provides consulting services to the minerals industry in the areas of mining operations, mine planning, mine design, ore reserves and environmental issues. From 1972 through 1981, Mr. Calhoun served as President and CEO of Day Mines, Inc., an American Stock Exchange Company with mining operations in the western United States that was acquired by Hecla Mining. Mr. Calhoun's extensive public service record includes membership on President Ronald Reagan's Strategic Minerals Task Force, President Gerald Ford's Inflation Task Force; Director of the Silver Institute; Trustee of the Northwest Mining Association; Chairman of the Mining Advisors Committee to the Governors of Washington and Idaho; President of the Idaho Mining Association; Chairman of Advisory Committee of Idaho College of Mines; and numerous other civil and professional organizations. Mr. Calhoun has a Bachelor of Science degree in Mining/Geology from the University of Texas at El Paso. Mr. Calhoun spends less than 10% of his time on Seabridge business.

Thomas Dawson has been a Chartered Accountant since 1961. He is a retired senior audit and accounting partner with 40 years of experience at Deloitte & Touche LLP, Chartered Accountants. He received his B.Comm. from Loyola College (now Concordia University), Canada, in 1959. Mr. Dawson is also a director of WFI Industries Ltd., Energy Split Corp., Energy Split II Corp., R Split II Corp. and Anvil Mining Limited. Mr. Dawson spends less than 10% of his time on Seabridge business.

Table of Contents

Louis Fox has more than 25 years experience in precious metals trading, merchanting and merchant banking activities. From 1984 to 1999, Mr. Fox was a Senior Vice President of Gerald Metals, Inc., commodity trading, refining and merchant banking firm, in Stamford, Connecticut. At Gerald Metals, Mr. Fox was the head of the company's worldwide precious metals group. Prior to Gerald Metals, from 1974 to 1981, Mr. Fox was a Vice President of J. Aron & Co., a precious metals trading firm. Following the acquisition of J. Aron & Co. by Goldman Sachs in 1981, Mr. Fox was a Vice President of Goldman Sachs through 1984. Mr. Fox holds a B.A. from the University of Pittsburgh and a J.D. from the Boston University Law School. Mr. Fox spends less than 10% of his time on Seabridge business.

Eliseo Gonzalez-Urien has over 30 years of experience in the mining industry. From 1989 through 2001 Mr. Gonzalez-Urien held various executive positions with Placer Dome Inc. including Senior Vice President of the parent company and President of Placer Dome Exploration Inc. During this period he was charged with ultimate responsibility for Placer Dome's worldwide exploration activities. Prior to Placer Dome, Mr. Gonzalez-Urien held senior positions with BHP-Utah Inc. and Noranda. He holds a degree in Geology from the University of Santiago, Chile, followed by post graduate studies in Geology at the University of California, Berkley. Mr. Gonzalez-Urien spends less than 10% of his time on Seabridge business.

William Threlkeld has served as Senior Vice President of Seabridge since November 2001, and from 2000 to 2001 acted as a technical consultant to the Company. From 1997 to 2000, he was Vice President, Exploration for Greenstone Resources Ltd. and was responsible for resource delineation on three Central American gold deposits and development of an organization and strategy to identify new mineral investments. From 1991 to 1997, Mr. Threlkeld was Exploration Manager and Vice President of Placer Dome and was responsible for all of Placer Dome's exploration activity and investment in Latin America. Mr. Threlkeld obtained his MSc in Economic Geology from the University of Western Ontario. Mr. Threlkeld spends 100% of his time on Seabridge business.

Roderick Chisholm was appointed Secretary of Seabridge in June 2003 and Chief Financial Officer of Seabridge in August 2004. Since 1981, Mr. Chisholm has been a financial officer and corporate secretary of a number of Canadian junior exploration companies. Prior thereto he was an audit manager with Deloitte & Touche LLP, Chartered Accountants. Mr. Chisholm is a Chartered Accountant and spends approximately 80% of his time on Seabridge business.

Other than as set forth below, no Director and/or Executive Officer has been the subject of any order, judgment, or decree of any governmental agency or administrator or of any court or competent jurisdiction, revoking or suspending for cause any license, permit or other authority of such person or of any corporation of which he is a Director and/or

Table of Contents

Executive Officer, to engage in the securities business or in the sale of a particular security or temporarily or permanently restraining or enjoining any such person or any corporation of which he is an officer or director from engaging in or continuing any conduct, practice, or employment in connection with the purchase or sale of securities, or convicting such person of any felony or misdemeanor involving a security or any aspect of the securities business or of theft or of any felony. Mr. Chisholm served as Secretary-Treasurer of Canuc Resources Corp. (CDN-OTC: CANC) in 2000 when a cease trade order was issued halting all trading of the common shares of Canuc due to failure to file financial statements. The cease trade order was rescinded in April 2007.

There are no arrangements or understandings between any two or more Directors or Executive Officers, pursuant to which he was selected as a Director or Executive Officer. There are no family relationships between any Directors or Executive Officers.

B. COMPENSATION

Commencing in July 2003, the Company commenced to compensate directors in cash in addition to stock option grants previously granted for their services in their capacity as directors and for committee participation. In 2007, unrelated directors received US\$20,000 per annum, the Chairman of the Audit Committee received an additional US\$7,500 per annum and the chairman of the Compensation Committee received US\$2,500 per annum, all paid quarterly in arrears.

During 2003, the Company adopted a formalized stock option plan, approved by its shareholders, for the granting of incentive stock options. To assist the Company in compensating, attracting, retaining and motivating personnel, the Company grants stock options to Directors, Executive Officers and employees; refer to ITEM #10, "Stock Options".

Table of Contents

Table No. 7 sets forth the compensation paid to the Company's executive officers and members of its administrative body during the last three fiscal years.

Table No. 7

(1) The stock options were granted under the stock option plans which are described under "Item 10: Stock Options". The options stated above were granted at the market price for a period of five years with exercise prices as follows: 2007 - \$29.60, 2006 - \$10.56 and 2005 - \$4.00.

(2) Messrs. Dawson and Gonzalez-Urien were appointed directors in January 2006.

(3) Mr. Fenig stepped down as a director at the June 2007 shareholders meeting.

(4) Messrs. Chisholm's and Threlkeld's 2007 stock option grants are subject to shareholder approval which will be sought at the 2008 shareholders' meeting.

(5) The Other Compensation amounts include consulting fees, bonuses and directors fees.

No funds were set aside or accrued by the Company during Fiscal 2007 to provide pension, retirement or similar benefits for Directors or Executive Officers.

Table of Contents

C. Board Practices

Mandate of the Board

The Company's Board of directors is responsible for the supervision of the management of the Company's business and affairs. Under its governing statute (the Canada Business Corporations Act), the Board is required to carry out its duties with a view to the best interests of the Company. The Board specifically recognizes its responsibility for the following areas:

- (a) representing the interests of the shareholders in all significant decisions affecting the Company and ensuring that shareholders are kept informed of developments affecting their Company;
- (b) reviewing and approving corporate objectives, goals and strategies with a view to enhancing shareholder value;
- (c) reviewing and approving the Company's operating plans and monitoring performance;
- (d) reviewing significant operational and financial issues as they arise and providing direction to management on these matters;
- (e) acting diligently to ensure that the Company fulfils its legal and regulatory requirements;
- (f) evaluating the effectiveness of senior management and establishing their compensation; and
- (g) evaluating whether or not directors receive the information they require to perform their duties as directors.

The frequency of the meetings of the Board of directors as well as the nature of agenda items change depending upon the state of the Company's affairs and in light of opportunities or risks which the Company faces.

Composition of the Board

The TSE Report recommends that a Board of directors be constituted with a majority of individuals who qualify as "unrelated directors". The TSE Report defines an "unrelated director" as a director who is independent of management and free from any interest and any business or other relationship, which could, or could reasonably be perceived to, materially interfere with that director's ability to act with a view to the best interest of the Company, other than an interest arising from shareholding. The Company does not have a "significant" shareholder, defined in the TSE Report as a shareholder with the ability to exercise a majority of votes for the election of directors.

Table of Contents

The directors have examined the relevant definitions in the TSE Report and have individually considered their respective interests in and relationship with the Company. As a consequence, the Board has concluded that five of the Board's present seven members are "unrelated" within the meaning of the TSE Report: Frederick A. Banfield; William Calhoun; Thomas C. Dawson; Eliseo Gonzalez-Urien; and Louis J. Fox. The Corporate Governance Committee is responsible for reviewing and recommending a suitable approach for the Company to assess director performance.

The Board considers seven directors to be an appropriate size for the Board at the current time. The Board believes that the inclusion of the President and Chief Executive Officer, Rudi P. Fronk, on the Company's Board of directors is useful to the effective governance of the Company. Each director brings to the Board a specific area of expertise which is instrumental in creating a Board which is able to implement the Company's strategy effectively.

At present, in addition to those matters which must by law be approved by the Board, management seeks Board approval for any transaction which is out of the ordinary course of business or could be considered to be material to the business of the Company.

Committees

The Board has assigned specific governance responsibilities to three committees. A description of the mandate of each committee follows:

Audit Committee

The following constitutes the Charter of the Audit Committee.

The Audit Committee of Seabridge is a committee of the Board composed entirely of three outside and unrelated directors. Its overall goal is to ensure that the Company adopts and follows a policy of full, plain, true and timely disclosure of material financial information to its stakeholders. It reviews all material matters affecting the risks and financial well being of the Company and is a key part of the Corporate Governance system. The Committee is mandated to satisfy the requirements of the Canada Business Corporations Act.

The Audit Committee meets at a minimum, quarterly and on such other occasions as required. The auditors are invited to attend the meetings called to discuss the annual audit plan and the final review of the year-end financial statements. At least annually, the Committee meets with the auditors to review management's performance relating to financial reporting matters.

Specifically, the Committee:

- (a) reviews the annual statements of the Company and makes recommendations to the Board with respect to these statements,
- (b) reviews the quarterly financial statements and makes recommendations to the Board regarding these financial statements,

Table of Contents

- (c) reviews and approves financial information in all prospectuses, offering circulars, and similar documents,
- (d) oversees the adequacy and accuracy of the Company's financial disclosure policies and obligations,
- (e) reviews significant accounting policies and estimates,
- (f) monitors the Company's internal controls, financial systems and procedures, and management information systems,
- (g) oversees management's reporting on internal control,
- (h) meets with the Company's auditors to review management's financial stewardship and to review their recommendations to management, and
- (i) recommends the appointment of auditors and reviews the terms of the audit engagement and the appropriateness of the proposed fee,
- (j) reviews through discussions or by way of a formal document the plan followed for the annual audit with the auditors and management,
- (k) evaluates the performance of the auditors,
- (l) confirms the independence of auditors,
- (m) establishes procedures for the receipt, retention and treatment of complaints received regarding accounting, internal accounting controls or auditing matters, and
- (n) establishes procedures for the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

Corporate Governance and Nominating Committee

The Corporate Governance and Nominating Committee is presently composed of all five "un-related" and outside directors. This Committee has prepared and obtained approval by the Board of written policies on Fair Disclosure, Insider Trading and Conflict of Interest. Reporting to the full Board of Directors, this Committee is mandated to:

1. Prepare and recommend to the Board on an annual basis, proposed goals for the Company and its CEO and a mandate for the CEO;
2. Ensure that the Board is adequately informed of developments and issues within the Company such that it is able to fulfill its duties and responsibilities;
3. Ensure that the Board reviews and approves all major corporate decisions which could reasonably be expected to affect shareholder value;
4. Assess the effectiveness of the Board as a whole, of each of the directors and of each committee of directors and consider the impact that the number of directors has on effectiveness of the Board.

Table of Contents

5. Conduct an annual discussion among non-management directors on the role and effectiveness of independent directors;
6. Ensure that each Board Committee has a clear, written mandate and is performing diligently the tasks necessary to limit Board liability;
7. Oversee the administration of the Company's Fair Disclosure Policy and Insider Trading Policy;
8. Oversee an annual review of each director's business interests in accordance with the Company's Conflict of Interest Policy to ascertain which conflicts might exist with respect to the interests of Seabridge and how such conflicts, if any, are to be managed so as to ensure the independence of directors and to protect the interests of Seabridge and its shareholders;
9. Review disclosure of corporate governance matters to ensure that shareholders are adequately informed of the Board's procedures for governance on their behalf.

Compensation Committee

The Compensation Committee is presently composed of three directors, all of which are outside and unrelated directors. Reporting to the full Board of Directors, this Committee is mandated to:

1. On an annual basis, review the total compensation of the President and Vice President(s) against their performance, mandates and goals and make recommendations on their compensation to the Board;
2. Review, approve and recommend to the Board for confirmation all grants of options to all directors and employees; ensure the proper administration of the Company's options program in conformity with the Company's Option Plan;
3. Review on an annual basis the Company's overall hiring and compensation practices with reference to industry norms.

None of the members of the Committee have any indebtedness to the Company or any of its subsidiaries nor have they any material interest, or have any associates or affiliates which have any material interest, direct or indirect, in any actual or proposed transaction in the last financial year which has materially affected or would materially affect the Company or any of its subsidiaries.

The compensation of the Company's executive officers is determined by the Board of Directors upon recommendations made by the Committee. The Committee met twice during the last financial year. The Company's executive compensation program consists of an annual base salary and a longer-term component consisting of stock options, however, the Committee may also recommend a bonus for management or its directors in the future.

Table of Contents

D. Employees

The Company currently has 6 employees and 4 executive officers.

E. Share Ownership

The Company's shares are publicly held. The Company is not controlled by another corporation as described below.

Table No. 8 lists, as of March 20, 2008, Directors and Executive Officers who beneficially own the Company's voting securities and the amount of the Company's voting securities owned by the Directors and Executive Officers as a group.

Table No. 8
Shareholdings of Directors and Executive Officers

58

Table of Contents

Percent of Class number is based on 37,298,885 shares outstanding as of March 20, 2008 and Stock options held by each beneficial holder.

Based upon information provided by the Company's transfer agent, as of March 20, 2008, approximately 10.6 % of the Company's common shares were held of record by US residents.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

As of March 20, 2008, Pan Atlantic Bank and Trust Ltd. owned 6,489,852 shares of the Company representing 17.4% of the outstanding shares of the Company and FCMI Financial Corporation, Pan Atlantic's sole shareholder owned 180,000 shares representing 0.4% of the outstanding shares of the Company. In addition, as of March 20, 2008, principals of, and funds managed by the Friedberg Mercantile Group Ltd. owned 270,632 shares of the Company representing 1% of the Company. Pan Atlantic Bank and Trust Ltd. is ultimately beneficially owned and controlled by Albert D. Friedberg and members of his immediate family. Albert D. Friedberg is the President and a director of Friedberg Mercantile Group Ltd. The Company is not aware of any other person/company who beneficially owns 5% or more of the Company's voting securities.

No shareholders of the Company have different voting rights from any other shareholder.

There are no arrangements known to the Company, the operation of which as of a subsequent date, could result in a change of control of the Company.

B. Interest of Management in Certain Transaction

During the fiscal year ended December 31, 2007, Mintec, Inc., a private company controlled by Fred Banfield, a Director of Seabridge, was paid \$33,300 (2006 - \$33,900, 2005 - \$39,000) for technical services provided by his company related to the mineral properties. These technical services were for consulting and computer software for geologic modeling, reserve estimation, mine planning and database management. The Company negotiated the agreement at arms length, after the Company reviewed all available software in the marketplace and determined that the agreement negotiated with Mintec was the most cost effective available.

Pan Atlantic Bank and Trust Ltd. has been an investor in two convertible debt offerings and two private placements of common shares by Seabridge. Pan Atlantic Bank and Trust Ltd.'s sole shareholder is FCMI Financial Corporation.

None of the Company's interests in its mineral properties were acquired from affiliates.

Item 10. Additional Information

A. Share Capital

Stock Option Plan

During 2003, the Company adopted a formalized stock option plan, approved by its shareholders, for the granting of incentive stock options. To assist the Company in compensating, attracting, retaining and motivating personnel, the Company grants stock options to Directors, Executive Officers and employees. The plan provides for options to be granted at market prices for periods up to five years. For directors and senior management, option grants are subject to a two-tiered vesting policy designed to better align option compensation with the interests of shareholders. Grants to other employees and consultants do not have the two-tiered provision.

The two-tier option grants require a certain share price above the grant date price for 10 successive days for the first third to vest, a higher share price for the second third to vest and a further higher share price for the final third to vest. Once the share price has met the first test, the Company's share price performance must have exceeded the S&P/TSX Global Gold Index by more than 20% over the preceding six months or these options would be cancelled.

B. Memorandum and Articles of Association

Information regarding the Company's Certificate of Incorporation, By-Laws and other charter documents is incorporated by reference to Item 10B to the Company's registration statement on Form 20-F dated February 18, 2004.

C. Material Contracts

The Company considers the following as material contracts, which have been entered into by the Company which are currently in effect:

1. Agreement for the purchase and sale of the Red Mountain Project and Willoughby Joint Venture between Seabridge and North American Metals Corp.
2. Agreement between the Company and Platoro West Incorporated covering the Castle/Black Rock project;
3. Agreement between the Company and Platoro West Incorporated covering the Hog Ranch project;
4. Agreement between the Company and Placer Dome covering the Kerr/Sulphurets project;
5. Agreement between the Company and Atlas covering the Grassy Mountain project;

Table of Contents

6. Agreement between the Company and Quartz Mountain Resources covering the Quartz Mountain project.
7. Agreement between the Company and Noranda Inc. covering the Kerr/Sulphurets project.
8. Agreement between the Company, Newmont Canada and Total Resources covering the Courageous Lake project.
9. Agreement between the Company and Minera Hecla S.A. de C.V. covering the Noche Buena project.

Details and a discussion of each material contract are given in the detailed property section contained in Item 4 of this Annual Report. Copies of these contracts were filed as exhibits to the Company's registration statement on Form 20-F dated February 18, 2004 except #9 which was filed in March 2007.

D. Exchange Controls and Other Limitations Affecting Security Holders

The Company is not aware of any Canadian federal or provincial laws, decrees, or regulations that restrict the export or import of capital, including foreign exchange controls, or that affect the remittance of dividends, interest or other payments to non-Canadian holders of the common shares. There are no limitations on the right of non-Canadian owners to hold or vote the common shares imposed by Canadian federal or provincial law or by the charter or other constituent documents of the Company.

The Investment Canada Act (the "IC Act") governs acquisitions of Canadian business by a non-Canadian person or entity. The IC Act requires a non-Canadian (as defined in the IC Act) making an investment to acquire control of a Canadian business, the gross assets of which exceed certain defined threshold levels, to file an application for review with the Investment Review Division of Industry Canada. The IC Act provides, among other things, for a review of an investment in the event of acquisition of "control" in certain Canadian businesses in the following circumstances:

1. If the investor is a non-Canadian and is a national of a country belonging to the North American Free Trade Agreement ("NAFTA") and/or the World Trade Organization ("WTO") ("NAFTA or WTO National"), any direct acquisition having an asset value exceeding \$179,000,000 is reviewable. This amount is subject to an annual adjustment on the basis of a prescribed formula in the IC Act to reflect inflation and real growth within Canada. This threshold level does not apply in certain sections of Canadian industry, such as uranium, financial services (except insurance), transportation services and cultural services (i.e. the publication, distribution or sale of books, magazines, periodicals (other than printing or typesetting businesses), music in print or machine readable form, radio, television, cable and satellite services; the publication, distribution, sale or exhibition of film or video recordings on audio or video music recordings), to which lower thresholds as prescribed in the IC Act are applicable.

Table of Contents

2. If the investor is a non-Canadian and is not a NAFTA or WTO National, any direct acquisition having an asset value exceeding \$5,000,000 and any indirect acquisition having an asset value exceeding \$50,000,000 is reviewable.

3. If the investor is a non-Canadian and is NAFTA or WTO National, an indirect acquisition of control is reviewable if the value of the assets of the business located in Canada represents more than 50% of the asset value of the transaction or the business is involved in uranium, financial services, transportation services or cultural services (as set forth above).

Finally, certain transactions prescribed in the IC Act are exempted from review altogether.

In the context of the Company, in essence, three methods of acquiring control of a Canadian business are regulated by the IC Act: (i) the acquisition of all or substantially all of the assets used in carrying on business in Canada; (ii) the acquisition, directly or indirectly, of voting shares of a Canadian corporation carrying on business in Canada; or (iii) the acquisition of voting shares of an entity which controls, directly or indirectly, another entity carrying on business in Canada.

An acquisition of a majority of the voting shares of a Canadian entity, including a corporation, is deemed to be an acquisition of control under the IC Act. However, under the IC Act, there is a rebuttable presumption that control is acquired if one-third of the voting shares of a Canadian corporation or an equivalent undivided interest in the voting shares of such corporation are held by a non-Canadian person or entity. An acquisition of less than one-third of the voting shares of a Canadian corporation is deemed not to be an acquisition of control. An acquisition of less than a majority, but one-third or more, of the voting shares of a Canadian corporation is presumed to be an acquisition of control unless it can be established that, on the acquisition, the Canadian corporation is not, in fact, controlled by the acquirer through the ownership of voting shares. For partnerships, trusts, joint ventures or other unincorporated Canadian entities, an acquisition of less than a majority of the voting interests is deemed not to be an acquisition of control.

In addition, if a Canadian corporation is controlled by a non-Canadian, the acquisition of control of any other Canadian corporation by such corporation may be subject to the prior approval of the Investment Review Division, unless it can be established that the Canadian corporation is not in fact controlled by the acquirer through the ownership of voting shares.

Where an investment is reviewable under the IC Act, the investment may not be implemented unless it is likely to be of net benefit to Canada. If an applicant is unable to satisfy the Minister responsible for Industry Canada that the investment is likely to be of net benefit to Canada, the applicant may not proceed with the investment. Alternatively, an acquirer may be required to divest control of the Canadian business that is the subject of the investment.

Table of Contents

In addition to the foregoing, the IC Act provides for formal notification under the IC Act of all other acquisitions of control by Canadian businesses by non-Canadian investors. The notification process consists of filing a notification within 30 days following the implementation of an investment, which notification is for information, as opposed to review, purposes.

E. Taxation

The following summary of the material Canadian federal income tax consequences generally applicable in respect of the common stock reflects the Company's opinion. The tax consequences to any particular holder of common stock will vary according to the status of that holder as an individual, trust, corporation or member of a partnership, the jurisdiction in which that holder is subject to taxation, the place where that holder is resident and, generally, according to that holder's particular circumstances. This summary is applicable only to holders who are resident in the United States, have never been resident in Canada, deal at arm's length with the Company, hold their common stock as capital property and who will not use or hold the common stock in carrying on business in Canada. Special rules, which are not discussed in this summary, may apply to a United States holder that is an issuer that carries on business in Canada and elsewhere.

This summary is based upon the provisions of the Income Tax Act of Canada and the regulations there under (collectively, the "Tax Act" or "ITA") and the Canada-United States Tax Convention (the "Tax Convention") as at the date of the Annual Report and the current administrative practices of Canada Revenue Agency. It has been assumed that there will be no other relevant amendments of any governing law, although no assurance can be given in this respect. This summary does not take into account provincial income tax consequences.

Management urges each holder to consult his/her own tax advisor with respect to the income tax consequences applicable to him/her in his/her own particular circumstances.

CANADIAN INCOME TAX CONSEQUENCES

The summary below is restricted to the case of a holder (a "Holder") of one or more common shares ("Common Shares") who for the purposes of the Tax Act is a non-resident of Canada, holds his Common Shares as capital property and deals at arm's length with the Company.

Dividends

A Holder will be subject to Canadian withholding tax ("Part XIII Tax") equal to 25%, or such lower rates as may be available under an applicable tax treaty, of the gross amount of any dividend paid or deemed to be paid on his Common Shares. Under the Tax Convention, the rate of Part XIII Tax applicable to a dividend on Common Shares paid to a Holder who is a resident of the United States is, if the Holder is a company that beneficially owns at least 10% of the voting stock of the Company, 5% and, in any other case, 15% of the gross amount of the dividend. The Company will be required to withhold the applicable amount of Part XIII Tax from each dividend so paid and remit the withheld amount directly to the Receiver General for Canada for the account of the Holder.

Table of Contents

Disposition of Common Shares

A Holder who disposes of Common Shares, including by deemed disposition on death, will not be subject to Canadian tax on any capital gain thereby realized unless the Common Share constituted “taxable Canadian property” as defined by the Tax Act. Generally, a common share of a public corporation will not constitute taxable Canadian property of a Holder unless he held the common share as capital property used by him carrying on a business in Canada, or he or persons with whom he did not deal at arm’s length alone or together held or held options to acquire, at any time within the 60 months preceding the disposition, 25% or more of the issued shares of any class of the capital stock of the Company.

A Holder who is a resident of the United States and realizes a capital gain on disposition of Common Shares that was taxable Canadian property will nevertheless, by virtue of the Treaty, generally be exempt from Canadian tax thereon unless (a) more than 50% of the value of the Common Shares is derived from, or from an interest in, Canadian real estate, including Canadian mineral resources properties, (b) the Common Shares formed part of the business property of a permanent establishment that the Holder has or had in Canada within the 12 months preceding disposition, or (c) the Holder (i) was a resident of Canada at any time within the ten years immediately preceding the disposition, and for a total of 120 months during any period of 20 consecutive years, preceding the disposition, and (ii) owned the Common Shares when he ceased to be resident in Canada.

A Holder who is subject to Canadian tax in respect of a capital gain realized on disposition of Common Shares must include one half of the capital gain (“taxable capital gain”) in computing his taxable income earned in Canada. The Holder may, subject to certain limitations, deduct one half of any capital loss (“allowable capital loss”) arising on disposition of taxable Canadian property from taxable capital gains realized in the year of disposition in respect to taxable Canadian property and, to the extent not so deductible, from such taxable capital gains of any of the three preceding years or any subsequent year.

UNITED STATES FEDERAL INCOME TAX CONSEQUENCES

The following is a discussion of material United States Federal income tax consequences, under the law, generally applicable to a U.S. Holder (as defined below) of common shares of the Company. This discussion does not cover any state, local or foreign tax consequences.

The following discussion is based upon the sections of the Internal Revenue Code of 1986, as amended (“the Code”), Treasury Regulations, published Internal Revenue Service (“IRS”) rulings, published administrative positions of the IRS and court decisions that are currently applicable, any or all of which could be materially and adversely changed, possible on a retroactive basis, at any time. In addition, the discussion does not consider the potential effects, both adverse and beneficial, or recently proposed legislation which, if enacted, could

Table of Contents

be applied, possibly on a retroactive basis, at any time. The discussion is for general information only and it is not intended to be, nor should it be construed to be, legal or tax advice to any holder or prospective holder of common shares of the Company and no opinion or representation with respect to the U.S. federal income tax consequences to any such holder or prospective holder is made. Management urges holders and prospective holders of common shares of the Company to consult their own tax advisors about the federal, state, local, and foreign tax consequences of purchasing, owning and disposing of common shares of the Company.

U.S. Holders

As used herein, a (“U.S. Holder”) includes a holder of common shares of the Company who is a citizen or resident of the United States, a corporation created or organized in or under the laws of the United States or of any political subdivision thereof, an estate whose income is taxable in the United States irrespective of source or a trust subject to the primary supervision of a court within the United States and control of a United States fiduciary as described in Section 7701(a)(30) of the Code. This summary does not address the tax consequences to, and U.S. Holder does not include, persons subject to special provisions of Federal income tax law, such as tax-exempt organizations, qualified retirement plans, financial institutions, insurance companies, real estate investment trusts, regulated investment companies, broker-dealers, non-resident alien individuals, persons or entities that have a “functional currency” other than the U.S. dollar, shareholders who hold common shares as part of a straddle, hedging or conversion transaction, and shareholders who acquired their common shares through the exercise of employee stock options or otherwise as compensation for services. This summary is limited to U.S. Holders who own common shares as capital assets. This summary does not address the consequences to a person or entity holding an interest in a shareholder or the consequences to a person of the ownership, exercise or disposition of any options, warrants or other rights to acquire common shares.

Distribution of Common Shares of the Company

U.S. Holders receiving dividend distributions (including constructive dividends) with respect to common shares of the Company are required to include in gross income for United States Federal income tax purposes the gross amount of such distributions equal to the U.S. dollar value of such distributions on the date of receipt (based on the exchange rate on such date), to the extent that the Company has current or accumulated earnings and profits, without reduction for any Canadian income tax withheld from such distributions. Such Canadian tax withheld may be credited, subject to certain limitations, against the U.S. Holder’s United States Federal Income tax liability or, alternatively, individuals may deduct in computing the U.S. Holder’s United States Federal taxable income by those individuals who itemize deductions. (See more detailed discussion at “Foreign Tax Credit” below). To the extent that distributions exceed current or accumulated earnings and profits of the Company, they will be treated first as a return of capital up to the U.S. Holder’s adjusted basis in the common shares and thereafter as gain from the sale or exchange of the common shares. Dividend income will be taxed at marginal tax rates applicable to ordinary income while preferential tax rates for long-term capital gains are applicable to a U.S. Holder which is an individual, estate or trust. There are currently no preferential tax rates for long-term capital gains for a U.S. Holder which is a corporation.

Table of Contents

In the case of foreign currency received as a dividend that is not converted by the recipient into U.S. dollars on the date of receipt, a U.S. Holder will have a tax basis in the foreign currency equal to its U.S. dollar value on the date of receipt. Generally any gain or loss recognized upon a subsequent sale or other disposition of the foreign currency, including the exchange for U.S. dollars, will be ordinary income or loss.

Dividends paid on the common shares of the Company will not generally be eligible for the dividends received deduction provided to corporations receiving dividends from certain United States corporations. A U.S. Holder which is a corporation may, under certain circumstances, be entitled to a 70% deduction of the United States source portion of dividends received from the Company (unless the Company qualifies as a “foreign personal holding company” or a “passive foreign investment company”, as defined below) if such U.S. Holder owns shares representing at least 10% of the voting power and value of the Company. The availability of this deduction is subject to several complex limitations which are beyond the scope of this discussion.

Under current Treasury Regulations, dividends paid on the Company’s common shares, if any, generally will not be subject to information reporting and generally will not be subject to U.S. backup withholding tax. However, dividends and the proceeds from a sale of the Company’s common shares paid in the U.S. through a U.S. or U.S. related paying agent (including a broker) will be subject to U.S. information reporting requirements and may also be subject to the 31% U.S. backup withholding tax, unless the paying agent is furnished with a duly completed and signed Form W-9. Any amounts withheld under the U.S. backup withholding tax rules will be allowed as a refund or a credit against the U.S. Holder’s U.S. federal income tax liability, provided the required information is furnished to the IRS.

Foreign Tax Credit

For individuals whose entire income from sources outside the United States consists of qualified passive income, the total amount of creditable foreign taxes paid or accrued during the taxable year does not exceed \$300 (\$600 in the case of a joint return) and an election is made under section 904(j), the limitation on credit does not apply.

A U.S. Holder who pays (or has withheld from distributions) Canadian income tax with respect to the ownership of common shares of the Company may be entitled, at the option of the U.S. Holder, to either a deduction or a tax credit for such foreign tax paid or withheld. Generally, it will be more advantageous to claim a credit because a credit reduces United States Federal income taxes on a dollar-for-dollar basis, while a deduction merely reduces the taxpayer’s income subject to tax. This election is made on a year-by-year basis and applies to all foreign income taxes (or taxes in lieu of income tax) paid by (or withheld from) the U.S. Holder during the year. There are significant and complex limitations which apply to the credit, among which is the general limitation that the credit cannot exceed the proportionate share of the U.S. Holder’s United States income tax liability that the U.S.

Table of Contents

Holder's foreign source income bears to his/her or its worldwide taxable income in the determination of the application of this limitation. The various items of income and deduction must be classified into foreign and domestic sources. Complex rules govern this classification process. In addition, this limitation is calculated separately with respect to specific classes of income such as "passive income", "high withholding tax interest", "financial services income", "shipping income", and certain other classifications of income. Dividends distributed by the Company will generally constitute "passive income" or, in the case of certain U.S. Holders, "financial services income" for these purposes. The availability of the foreign tax credit and the application of the limitations on the credit are fact specific and management urges holders and prospective holders of common shares of the Company to consult their own tax advisors regarding their individual circumstances.

Disposition of Common Shares of the Company

A U.S. Holder will recognize gain or loss upon the sale of common shares of the Company equal to the difference, if any, between (I) the amount of cash plus the fair market value of any property received, and (ii) the shareholder's tax basis in the common shares of the Company. Preferential tax rates apply to long-term capital gains of U.S. Holders, which are individuals, estates or trusts. This gain or loss will be capital gain or loss if the common shares are capital assets in the hands of the U.S. Holder, which will be a short-term or long-term capital gain or loss depending upon the holding period of the U.S. Holder. Gains and losses are netted and combined according to special rules in arriving at the overall capital gain or loss for a particular tax year. Deductions for net capital losses are subject to significant limitations. For U.S. Holders, which are not corporations, any unused portion of such net capital loss may be carried over to be used in later tax years until such net capital loss is thereby exhausted, but individuals may not carry back capital losses. For U.S. Holders, which are corporations (other than corporations subject to Subchapter S of the Code), an unused net capital loss may be carried back three years from the loss year and carried forward five years from the loss year to be offset against capital gains until such net capital loss is thereby exhausted.

Other Considerations

In the following circumstances, the above sections of the discussion may not describe the United States Federal income tax consequences resulting from the holding and disposition of common shares of the Company.

Foreign Personal Holding Company

If at any time during a taxable year more than 50% of the total combined voting power or the total value of the Company's outstanding shares is owned, actually or constructively, by five or fewer individuals who are citizens or residents of the United States and 60% (50% after the first tax year) or more of the Company's gross income for such year was derived from certain passive sources (e.g. from interest income received from its subsidiaries), the Company would be treated as a "foreign personal holding company." In that event, U.S. Holders that hold common shares of the Company would be required to include in gross income for such year their allocable portions of such passive income to the extent the Company does not actually distribute such income.

Table of Contents

The Company does not believe that it currently has the status of a “foreign personal holding company”. However, there can be no assurance that the Company will not be considered a foreign personal holding company for the current or any future taxable year.

Foreign Investment Company

If 50% or more of the combined voting power or total value of the Company’s outstanding shares are held, actually or constructively, by citizens or residents of the United States, United States domestic partnerships or corporations, or estates or trusts other than foreign estates or trusts (as defined by the Code Section 7701(a)(31), and the Company is found to be engaged primarily in the business of investing, reinvesting, or trading in securities, commodities, or any interest therein, it is possible that the Company might be treated as a “foreign investment company” as defined in Section 1246 of the Code, causing all or part of any gain realized by a U.S. Holder selling or exchanging common shares of the Company to be treated as ordinary income rather than capital gains.

Passive Foreign Investment Company

As a foreign corporation with U.S. Holders, the Company could potentially be treated as a passive foreign investment company (“PFIC”), as defined in Section 1297 of the Code, depending upon the percentage of the Company’s income which is passive, or the percentage of the Company’s assets which is held for the purpose of producing passive income.

Certain United States income tax legislation contains rules governing PFICs, which can have significant tax effects on U.S. shareholders of foreign corporations. These rules do not apply to non-U.S. shareholders. Section 1297 (a) of the Code defines a PFIC as a corporation that is not formed in the United States and, for any taxable year, either (i) 75% or more of its gross income is “passive income”, which includes interest, dividends and certain rents and royalties or (ii) the average percentage, by fair market value (or, if the company is a controlled foreign corporation or makes an election, by adjusted tax basis), of its assets that produce or are held for the production of “passive income” is 50% or more. The taxation of a US shareholder who owns stock in a PFIC is extremely complex and is therefore beyond the scope of this discussion. Management urges US persons to consult with their own tax advisors with regards to the impact of these rules.

Controlled Foreign Corporation

A Controlled Foreign Corporation (CFC) is a foreign corporation more than 50% of whose stock by vote or value is, on any day in the corporation’s tax year, owned (directly or indirectly) by U.S. Shareholders. If more than 50% of the voting power of all classes of stock entitled to vote is owned, actually or constructively, by citizens or residents of the United States, United States domestic partnerships and corporations or estates or trusts other than foreign estates or trusts, each of whom own actually or constructively 10% or more of

Table of Contents

the total combined voting power of all classes of stock of the Company could be treated as a “controlled foreign corporation” under Subpart F of the Code. This classification would affect many complex results, one of which is the inclusion of certain income of a CFC, which is subject to current U.S. tax. The United States generally taxes United States Shareholders of a CFC currently on their pro rata shares of the Subpart F income of the CFC. Such United States Shareholders are generally treated as having received a current distribution out of the CFC’s Subpart F income and are also subject to current U.S. tax on their pro rata shares of the CFC’s earnings invested in U.S. property. The foreign tax credit described above may reduce the U.S. tax on these amounts. In addition, under Section 1248 of the Code, gain from the sale or exchange of shares by a U.S. Holder of common shares of the Corporation which is or was a United States Shareholder at any time during the five-year period ending with the sale or exchange is treated as ordinary income to the extent of earnings and profits of the Company (accumulated in corporate tax years beginning after 1962, but only while the shares were held and while the Company was “controlled”) attributable to the shares sold or exchanged. If a foreign corporation is both a PFIC and a CFC, the foreign corporation generally will not be treated as a PFIC with respect to the United States Shareholders of the CFC. This rule generally will be effective for taxable years of United States Shareholders beginning after 1997 and for taxable years of foreign corporations ending with or within such taxable years of United States Shareholders. The PFIC provisions continue to apply in the case of PFIC that is also a CFC with respect to the U.S. Holders that are less than 10% shareholders. Because of the complexity of Subpart F, a more detailed review of these rules is outside of the scope of this discussion.

The amount of any backup withholding will not constitute additional tax and will be allowed as a credit against the U.S. Holder’s federal income tax liability.

Filing of Information Returns. Under a number of circumstances, United States Investor acquiring shares of the Company may be required to file an information return with the Internal Revenue Service Center where they are required to file their tax returns with a duplicate copy to the Internal Revenue Service Center, Philadelphia, PA 19255. In particular, any United States Investor who becomes the owner, directly or indirectly, of 10% or more of the shares of the Company will be required to file such a return. Other filing requirements may apply, and management urges United States Investors to consult their own tax advisors concerning these requirements.

F. Dividends and Paying Agents

Not applicable

G. Statements by Experts

H. Documents on Display

The documents included as exhibits in Item 19 of this Report have been filed with the Securities and Exchange Commission (“SEC”) with the Company’s reports on Forms 6-K and 20-F, and may be reviewed at the SEC’s public reference room at 100 F Street, N.E.,

Table of Contents

Washington D.C. 20549. Copies may be obtained, upon payment of a duplication fee, by writing the SEC or reviewed on the SEC's website (<http://www.sec.gov>) or at the American Stock Exchange, 86 Trinity Place, New York, New York 10006.

I. Subsidiary Information

Not Applicable

Item 11. Quantitative and Qualitative Disclosures about Market Risk

The Company's mineral properties are all currently at the exploration stage and the Company's operations are limited to exploring those properties. Therefore, Seabridge's market risks are somewhat minimized. The Company does, however, have future property payments due in United States currency. As a Canadian Company, Seabridge's cash balances are kept in Canadian funds. Therefore, Seabridge is exposed to some exchange rate risk. The Company considers the amount of risk to be manageable and does not currently, nor is likely in the foreseeable future, conduct hedging to reduce its exchange rate risk.

The Company has the following total anticipated required property, royalty and tax payments due in US dollars for the next 3 fiscal years by individual property:

Property	2008	Payments Due (US\$)	
		2009	2010
Grassy Mountain	\$ 73,600	\$ 73,600	\$ 73,600
Quartz Mountain (1)	\$ 10,000	\$ 10,000	\$ 10,000
Castle/Black Rock	\$ 41,700	\$ 41,700	\$ 41,700
Hog Ranch	\$ 57,700	\$ 57,700	\$ 57,700
Other Nevada Properties	\$ 441,300	\$ 442,300	\$ 442,300

(1) The Quartz Mountain Property is currently under option to Golden Predator Mines Inc. (formerly named Quincy Energy Corp.) who is required to pay all required holding costs during the option period.

The Company maintains a significant amount of cash and cash equivalents as well as in short term deposits. The Company relies upon this cash to meet its future needs. As the funds are in interest bearing accounts, the Company has some interest rate risk. However, as the Company is primarily concerned with the preservation of the capital for anticipated general and property expenditures and is not dependent upon the interest from these accounts to meet its ongoing requirements, management considers the interest rate risk to be minimal and to have little to no effect on the Company's operations.

Table of Contents

Competitive Environment

The Company competes with other resource companies for exploration properties, joint venture agreements and for the acquisition of attractive gold companies. There is a risk that this competition could increase the difficulty of concluding a negotiation on terms that Seabridge considers acceptable.

Item 12. Description of Securities Other than Equity Securities

Not Applicable

Part II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None

Item 14. Material Modifications of Rights of Security Holders and Use of Proceeds

None

Item 15. Disclosure Controls and Procedures

At the end of the period covered by this report, an evaluation was carried out under the supervision of and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a – 15(e) and Rule 15d – 15(e) under the Exchange Act). Based on that evaluation the CEO and the CFO have concluded that as of the end of the period covered by this report, the Company's disclosure controls and procedures were adequately designed and effective in ensuring that: (i) information required to be disclosed by the Company in reports that it files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) material information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for accurate and timely decisions regarding required disclosure.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements for external purposes in accordance with generally accepted accounting principles.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the design and operation of the Company's internal control over financial reporting as of December 31, 2007, based on the criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on this evaluation, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2007 and no material weaknesses were discovered.

As this report is required for U.S. reporting purposes, the Company is a "foreign private issuer" as defined in Rule 3b-4 of the Exchange Act, and the Company is an accelerated filer, the Company is required to provide an auditor's attestation report on internal control over financial reporting. The Company's auditor has attested to management's evaluation of internal controls over financial reporting for the year ended December 31, 2007. The auditor's attestation is included within this annual report on Form 20-F.

Item 16A. Audit Committee Financial Expert

The Company's Board of Directors has determined that Mr. Thomas Dawson, Chairman of the Audit Committee and an independent director (as independent is defined by the American Stock Exchange) of the Company, is an "audit committee financial expert."

Item 16B. Code of Business Ethics

The Code of Business Ethics, formally adopted by the Company in March 2005, was included with the Company's Form 20-F dated March 15, 2005. The Code was updated in November 2007 and the revised document is attached to this Form 20-F. The Code is available on the Company's website at www.seabridgegold.net and from the Company's office.

During the most recently completed fiscal year, the Company has not granted any waiver including an explicit waiver, from a provision of the Code of Business Ethics to any executive officer or director.

Table of Contents

Item 16C. Principal Accountant Fees and Services

The aggregate fees billed for each of the last two fiscal years for professional services rendered by KPMG, the Company's Auditors, are as follows:

	2007	2006
Audit fees	\$ 136,000	\$ 70,000
Audit related fees	30,000	30,000
Tax Fees	3,500	0
All Other Fees	0	0
	\$ 169,500	\$ 100,000

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not Applicable

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None

Part III

Item 17. Financial Statements

The Company's financial statements are stated in Canadian Dollars (CDN\$) and are prepared in accordance with Canadian Generally Accepted Accounting Principles (GAAP), the application of which, in the case of the Company, conforms in all material respects for the periods presented with United States GAAP, except as disclosed in Note 11 to the 2007 audited consolidated financial statements.

The financial statements as required under ITEM #17 are attached hereto and found immediately following the text of this Annual Report. See Item #19 for a list of the reports.

Item 18. Financial Statements

The Company has elected to provide financial statements pursuant to ITEM #17.

Item 19. Exhibits

A. The financial statements thereto as required under ITEM #17 are attached hereto and found immediately following the text of this Annual Report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of Seabridge Gold Inc.

We have audited Seabridge Gold Inc. ("the Company")'s internal control over financial reporting as of December 31, 2007, based on the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting with this Form 20-F. Our responsibility is to express an opinion the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

KPMG LLP, a Canadian limited liability partnership is the Canadian member firm of KPMG International, a Swiss cooperative.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2007 and December 31, 2006, and the related consolidated statements of operations and deficit, comprehensive loss, accumulated other comprehensive income and cash flows for each of the years in the three-year period ended December 31, 2007, and our report dated March 19, 2008, expressed an unqualified opinion on those consolidated financial statements.
