NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1 Organization and Basis of Presentation

Organization

Plains All American Pipeline, L.P. is a Delaware limited partnership formed in 1998. Our operations are conducted directly and indirectly through our primary operating subsidiaries. As used in this Form 10-Q and unless the context indicates otherwise, the terms Partnership, PAA, we, us, our, ours and similar terms refer to Plains All American Pipeline, L.P. and its subsidiaries.

We own and operate midstream energy infrastructure and provide logistics services for crude oil, natural gas liquids (NGL), natural gas and refined products. The term NGL includes ethane and natural gasoline products as well as products commonly referred to as liquefied petroleum gas (LPG) such as propane and butane. When used in this Form 10-Q, NGL refers to all NGL products including LPG. We own an extensive network of pipeline transportation, terminalling, storage, and gathering assets in key crude oil and NGL producing basins and transportation corridors and at major market hubs in the United States and Canada. Our business activities are conducted through three operating segments: (i) Transportation, (ii) Facilities and (iii) Supply and Logistics. See Note 12 for further discussion of our operating segments.

Our 2% general partner interest is held by PAA GP LLC, a Delaware limited liability company, whose sole member is Plains AAP, L.P. (AAP), a Delaware limited partnership. In addition to its ownership of PAA GP LLC, AAP also owns all of our incentive distribution rights. Plains All American GP LLC (GP LLC), a Delaware limited liability company, is AAP s general partner. GP LLC manages our operations and activities and employs our domestic officers and personnel. Our Canadian officers and personnel are employed by our subsidiary, Plains Midstream Canada ULC (PMC). References to our general partner, as the context requires, include any or all of PAA GP LLC, AAP and GP LLC.

Definitions

Additional defined terms are used in this Form 10-Q and shall have the meanings indicated below:

AOCI = Accumulated other comprehensive income

Bcf = Billion cubic feet
Btu = British thermal unit
CAD = Canadian dollar

DERs = Distribution equivalent rights

EBITDA = Earnings before interest, taxes, depreciation and amortization

FASB = Financial Accounting Standards Board

GAAP = Generally accepted accounting principles in the United States

ICE = IntercontinentalExchange
LIBOR = London Interbank Offered Rate
LTIP = Long-term incentive plan
Mcf = Thousand cubic feet
MLP = Master limited partnership

NGL = Natural gas liquids including ethane, natural gasoline products, propane and butane

NYMEX = New York Mercantile Exchange

PLA = Pipeline loss allowance PNG = PAA Natural Gas Storage, L.P. SEC = Securities and Exchange Commission

USD = United States dollar
White Cliffs = White Cliffs Pipeline, LLC
WTI = West Texas Intermediate

Table of Contents

Basis of Consolidation and Presentation

The accompanying unaudited condensed consolidated interim financial statements and notes thereto should be read in conjunction with our 2013 Annual Report on Form 10-K. The financial statements have been prepared in accordance with the instructions for interim reporting as set forth by the SEC. All adjustments (consisting only of normal recurring adjustments) that in the opinion of management were necessary for a fair statement of the results for the interim periods have been reflected. All significant intercompany transactions have been eliminated in consolidation. Certain reclassifications have been made to information from previous years to conform to the current presentation. The condensed consolidated balance sheet data as of December 31, 2013 was derived from audited financial statements, but does not include all disclosures required by GAAP. The results of operations for the three months ended March 31, 2014 should not be taken as indicative of results to be expected for the entire year.

Subsequent events have been evaluated through the financial statements issuance date and have been included in the following footnotes where applicable.

Note 2 Recent Accounting Pronouncements

Other than as discussed below and in our 2013 Annual Report on Form 10-K, no new accounting pronouncements have become effective or have been issued during the three months ended March 31, 2014 that are of significance or potential significance to us.

In March 2013, the FASB issued guidance regarding the release of cumulative translation adjustments into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity. This guidance became effective for interim and annual periods beginning after December 15, 2013. We adopted this guidance on January 1, 2014. Our adoption did not have a material impact on our financial position, results of operations or cash flows.

Note 3 Accounts Receivable

Our accounts receivable are primarily from purchasers and shippers of crude oil and, to a lesser extent, purchasers of NGL and natural gas storage. These purchasers include, but are not limited to refiners, producers, marketing and trading companies and financial institutions that are active in the physical and financial commodity markets. The majority of our accounts receivable relate to our crude oil supply and logistics activities that can generally be described as high volume and low margin activities, in many cases involving exchanges of crude oil volumes.

To mitigate credit risk related to our accounts receivable, we have in place a rigorous credit review process. We closely monitor market conditions in order to make a determination with respect to the amount, if any, of credit to be extended to any given customer and the form and amount of financial performance assurances we require. Such financial assurances are commonly provided to us in the form of standby letters of credit, parental guarantees or advance cash payments. As of March 31, 2014 and December 31, 2013, we had received approximately \$105 million and \$117 million, respectively, of advance cash payments from third parties to mitigate credit risk. Furthermore, as of March 31, 2014 and December 31, 2013, we had received approximately \$206 million and \$426 million, respectively, of standby letters of credit to support

obligations due from third parties, a portion of which applies to future business. In addition, in an effort to mitigate credit risk, a significant portion of our transactions with counterparties are settled on a net-cash basis. Further, we enter into netting agreements (contractual agreements that allow us to offset receivables and payables with those counterparties against each other on our balance sheet) for a majority of such arrangements.

We review all outstanding accounts receivable balances on a monthly basis and record a reserve for amounts that we expect will not be fully recovered. We do not apply actual balances against the reserve until we have exhausted substantially all collection efforts. At March 31, 2014 and December 31, 2013, substantially all of our accounts receivable (net of allowance for doubtful accounts) were less than 30 days past their scheduled invoice date. Our allowance for doubtful accounts receivable totaled approximately \$4 million and \$5 million at March 31, 2014 and December 31, 2013, respectively. Although we consider our allowance for doubtful accounts receivable to be adequate, actual amounts could vary significantly from estimated amounts.

Table of Contents

Note 4 Inventory, Linefill and Base Gas and Long-term Inventory

Inventory, linefill and base gas and long-term inventory consisted of the following as of the dates indicated (barrels and natural gas volumes in thousands and carrying value in millions):

	March 31, 2014						December 31, 2013					
	Volumes	Unit of Measure	Carrying Value		Price/ Unit (1)		Volumes	Unit of Measure				Price/ Init (1)

Total			\$	2,042					\$	2,114		

⁽¹⁾ Price per unit of measure represents a weighted average associated with various grades, qualities and locations. Accordingly, these prices may not coincide with any published benchmarks for such products.

At the end of each reporting period, we assess the carrying value of our inventory and make any adjustments necessary to reduce the carrying value to the applicable net realizable value. We recorded a charge of approximately \$37 million during the three months ended March 31, 2014 related to the writedown of our natural gas inventory that was purchased in conjunction with managing natural gas storage deliverability requirements during the extended period of severe cold weather in the three months ended March 31, 2014. This adjustment is a component of Purchases and related costs in our accompanying condensed consolidated statements of operations.

Note 5 Goodwill

The table below reflects our goodwill by segment and changes during the period indicated (in millions):

	Trans	sportation	Facilities	Supp	oly and Logistics	Total
Balance at December 31, 2013	\$	878 \$	1,162	\$	463 \$	2,503

Balance at March 31, 2014	\$	867 \$	1,157	\$	461 \$	2,485
		10				

Table of Contents

Note 6 Debt

Debt consisted of the following as of the dates indicated (in millions):

	March 31, 2014	December 31, 2013
SHORT-TERM DEBT		
PAA commercial paper notes, bearing a weighted-average interest rate of 0.30% and 0.33%,		
respectively (1) (2)	\$ 876	\$ 1,109
Other	3	4
Total short-term debt	879	1,113
LONG-TERM DEBT		
Senior notes, net of unamortized discounts of \$14 and \$15, respectively	\$ 6,711	\$ 6,710
PAA commercial paper notes, bearing a weighted-average interest rate of 0.30% (2)	102	
Other	5	5
Total long-term debt	6,818	6,715
Total debt (1) (3)	\$ 7,697	\$ 7,828

⁽¹⁾ At March 31, 2014 and December 31, 2013, we classified \$876 million and \$1.1 billion, respectively, of borrowings under our commercial paper program as short-term. These borrowings are primarily designated as working capital borrowings, must be repaid within one year and are primarily for hedged NGL and crude oil inventory and NYMEX and ICE margin deposits.

Borrowings and Repayments

PAA commercial paper notes are backstopped by the PAA senior unsecured revolving credit facility and the PAA senior secured hedged inventory facility, which mature in August 2018 and August 2016, respectively; as such, any borrowings under the PAA commercial paper program reduce the available capacity under these facilities. Although our PAA commercial paper notes generally have maturities of less than one year, we classified \$102 million of such notes as long-term based on our ability and intent to refinance them on a long-term basis.

Our fixed-rate senior notes had a face value of approximately \$6.7 billion at both March 31, 2014 and December 31, 2013. We estimated the aggregate fair value of these notes as of March 31, 2014 and December 31, 2013 to be approximately \$7.3 billion and \$7.2 billion, respectively. Our fixed-rate senior notes are traded among institutions, and these trades are routinely published by a reporting service. Our determination of fair value is based on reported trading activity near quarter end. We estimate that the carrying value of outstanding borrowings under our credit facilities and agreements and commercial paper program approximates fair value as interest rates reflect current market rates. The fair value estimates for both our senior notes and credit facilities are based upon observable market data and are classified within Level 2 of the fair value hierarchy.

Total borrowings under our credit agreements and the commercial paper program for the three months ended March 31, 2014 and 2013 were approximately \$19.2 billion and \$3.2 billion, respectively. Total repayments under our credit agreements and the commercial paper program were approximately \$19.3 billion and \$3.6 billion for the three months ended March 31, 2014 and 2013, respectively. The variance in total gross borrowings and repayments is impacted by various business and financial factors including, but not limited to, the timing, average term and method of general partnership borrowing activities.

Letters of Credit

In connection with our supply and logistics activities, we provide certain suppliers with irrevocable standby letters of credit to secure our obligation for the purchase of crude oil, NGL and natural gas. Additionally, we issue letters of credit to support insurance programs and construction activities. At March 31, 2014 and December 31, 2013, we had outstanding letters of credit of approximately \$70 million and \$41 million, respectively.

Senior Notes Issuance

In April 2014, we completed the issuance of \$700 million, 4.70% senior notes due 2044 at a public offering price of 99.734%. Interest payments are due on June 15 and December 15 of each year, commencing on December 15, 2014. In anticipation of the issuance of these senior notes, we entered into \$250 million notional principal amount of U.S. treasury locks in March and April 2014 to hedge the treasury rate portion of the interest rate on a portion of the notes. See Note 10 for additional disclosure.

Note 7 Net Income Per Limited Partner Unit

Basic and diluted net income per limited partner unit is determined pursuant to the two-class method for Master Limited Partnerships as prescribed in the FASB guidance. The two-class method is an earnings allocation formula that is used to determine earnings to our general partner, common unitholders and participating securities according to distributions pertaining to the current period s net income and participation rights in undistributed earnings. Under this method, all earnings are allocated to our general partner, common unitholders and participating securities based on their respective rights to receive distributions, regardless of whether those earnings would actually be distributed during a particular period from an economic or practical perspective.

The Partnership calculates basic and diluted net income per limited partner unit by dividing net income attributable to Plains, after deducting the amount allocated to the general partner s interest, incentive distribution rights (IDRs) and participating securities, by the basic and diluted weighted-average number of limited partner units outstanding during the period. Participating securities include LTIP awards that have vested DERs, which entitle the grantee to a cash payment equal to the cash distribution paid on our outstanding common units.

Diluted net income per limited partner unit is computed based on the weighted average number of units plus the effect of dilutive potential units outstanding during the period using the two-class method. Our LTIP awards that contemplate the issuance of common units are considered dilutive unless (i) vesting occurs only upon the satisfaction of a performance condition and (ii) that performance condition has yet to be satisfied. LTIP awards that are deemed to be dilutive are reduced by a hypothetical unit repurchase based on the remaining unamortized fair value, as prescribed by the treasury stock method in guidance issued by the FASB. See Note 15 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K for a complete discussion of our LTIP awards including specific discussion regarding DERs.

The following table sets forth the computation of basic and diluted earnings per limited partner unit for the three months ended March 31, 2014 and 2013 (in millions, except per unit data):

	Three Mon Marcl	 ed
	2014	2013
Basic Net Income per Limited Partner Unit		
Net income attributable to PAA	\$ 384	\$ 528
Less: General partner s incentive distribution(1)	(110)	(86)
Less: General partner 2% ownership (1)	(6)	(9)
Net income available to limited partners	268	433
Less: Undistributed earnings allocated and distributions to participating securities (1)	(2)	(3)
Net income available to limited partners in accordance with application of the two-class		
method for MLPs	\$ 266	\$ 430
Basic weighted average number of limited partner units outstanding	360	336
Basic net income per limited partner unit	\$ 0.74	\$ 1.28
Diluted Net Income per Limited Partner Unit		
Net income attributable to PAA	\$ 384	\$ 528
Less: General partner s incentive distribution(1)	(110)	(86)

Less: General partner 2% ownership (1)	(6)	(9)
Net income available to limited partners	268	433
Less: Undistributed earnings allocated and distributions to participating securities (1)	(2)	(1)
Net income available to limited partners in accordance with application of the two-class		
method for MLPs	\$ 266	\$ 432
Basic weighted average number of limited partner units outstanding	360	336
Effect of dilutive securities: Weighted average LTIP units	3	3
Diluted weighted average number of limited partner units outstanding	363	339
Diluted net income per limited partner unit	\$ 0.73	\$ 1.27

Table of Contents

(1) We calculate net income available to limited partners based on the distributions pertaining to the current period s net income. After adjusting for the appropriate period s distributions, the remaining undistributed earnings or excess distributions over earnings, if any, are allocated to the general partner, limited partners and participating securities in accordance with the contractual terms of the partnership agreement and as further prescribed under the two-class method.

The terms of our partnership agreement limit the general partner s incentive distribution to the amount of available cash, which, as defined in the partnership agreement, is net of reserves deemed appropriate. As such, IDRs are not allocated undistributed earnings or distributions in excess of earnings in the calculation of net income per limited partner unit. If, however, undistributed earnings were allocated to our IDRs beyond amounts distributed to them under the terms of the partnership agreement, basic and diluted earnings per limited partner unit as reflected in the table above would be impacted as follows:

	Three Mon Marc	ed
	2014	2013
Basic net income per limited partner unit impact	\$ (0.05)	\$ (0.34)
Diluted net income per limited partner unit impact	\$ (0.05)	\$ (0.34)

Note 8 Partners Capital and Distributions

Distributions

The following table details the distributions paid during or pertaining to the first three months of 2014, net of reductions to the general partner s incentive distributions (in millions, except per unit amounts):

	Common General Partner											Distributions per limited	
Date Declared	Date Paid or To Be Paid	Units			Incentive		2%		-	Total		partner unit	
April 7, 2014	May 15, 2014 (1)	\$	229	\$	110	\$		5	\$	344	\$	0.6300	
January 9, 2014	February 14, 2014	\$	221	\$	102	\$		5	\$	328	\$	0.6150	

⁽¹⁾ Payable to unitholders of record at the close of business on May 2, 2014 for the period January 1, 2014 through March 31, 2014.

Continuous Offering Program

During the three months ended March 31, 2014, we issued an aggregate of approximately 2.8 million common units under our continuous offering program, generating proceeds of approximately \$151 million, including our general partner s proportionate capital contribution, net of approximately \$1 million of commissions to our sales agents.

Noncontrolling Interests in Subsidiaries

As of March 31, 2014, noncontrolling interests in subsidiaries consisted of a 25% interest in SLC Pipeline LLC. On December 31, 2013, we purchased the noncontrolling interests in PNG, and PNG became our wholly-owned subsidiary (the PNG Merger).

Table of Contents

Note 9 Equity-Indexed Compensation Plans

We refer to the PAA LTIPs and AAP Management Units collectively as our Equity-indexed compensation plans. For additional discussion of our equity-indexed compensation plans and awards, see Note 15 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K.

PAA LTIP Awards. Our equity-indexed compensation activity for LTIP awards denominated in PAA units is summarized in the following table (units in millions):

		Weighted Average Grant Date
	Units (1)	Fair Value per Unit
Outstanding at December 31, 2013	8.4 \$	36.97
Granted	0.6 \$	45.02
Vested (2)	(0.1) \$	34.78
Cancelled or forfeited	(0.1) \$	38.07
Outstanding at March 31, 2014	8.8 \$	37.55

⁽¹⁾ Amounts do not include AAP Management Units.

(2) Approximately 0.1 million PAA common units were issued, net of tax withholding of less than 0.1 million units, during the three months ended March 31, 2014 in connection with the settlement of vested awards. The remaining PAA awards that vested during the three months ended March 31, 2014 (less than 0.1 million units) were settled in cash.

AAP Management Units. The following table contains a summary of AAP Management Units (in millions):

	Reserved for Future Grants	Outstanding	Outstanding Units Earned	Grant Date Fair Value Of Outstanding AAP Management Units (1)
Balance as of December 31, 2013	3.5	48.6	47.0	\$ 51
Granted	(0.4)	0.4		11
Earned	N/A	N/A	0.3	N/A
Balance as of March 31, 2014	3.1	49.0	47.3	\$ 62

⁽¹⁾ Of the grant date fair value, approximately \$1 million was recognized as expense during the three months ended March 31, 2014. Of the \$62 million grant date fair value, approximately \$50 million had been recognized through March 31, 2014.

Other Equity-Indexed Compensation Information. The table below summarizes the expense recognized and the value of vesting (settled both in units and cash) related to our equity-indexed compensation plans and includes both liability-classified and equity-classified awards (in millions):

			Three Mon Marc	ed	
		201	14	2013	
Equity-indexed compensation expense		\$	34	\$	51
LTIP unit-settled vestings		\$	5	\$	
LTIP cash-settled vestings		\$	1	\$	
DER cash payments		\$	2	\$	2
	1.4

Note 10 Derivatives and Risk Management Activities

We identify the risks that underlie our core business activities and use risk management strategies to mitigate those risks when we determine that there is value in doing so. Our policy is to use derivative instruments for risk management purposes and not for the purpose of speculating on hydrocarbon commodity (referred to herein as commodity) price changes. We use various derivative instruments to (i) manage our exposure to commodity price risk as well as to optimize our profits, (ii) manage our exposure to interest rate risk and (iii) manage our exposure to currency exchange rate risk. Our commodity risk management policies and procedures are designed to help ensure that our hedging activities address our risks by monitoring our derivative positions, as well as physical volumes, grades, locations, delivery schedules and storage capacity. Our interest rate and currency exchange rate risk management policies and procedures are designed to monitor our derivative positions and ensure that those positions are consistent with our objectives and approved strategies. When we apply hedge accounting, our policy is to formally document all relationships between hedging instruments and hedged items, as well as our risk management objectives for undertaking the hedge. This process includes specific identification of the hedging instrument and the hedged transaction, the nature of the risk being hedged and how the hedging instrument s effectiveness will be assessed. Both at the inception of the hedge and on an ongoing basis, we assess whether the derivatives used in a transaction are highly effective in offsetting changes in cash flows or the fair value of hedged items.

Commodity Price Risk Hedging

Our core business activities involve certain commodity price-related risks that we manage in various ways, including through the use of derivative instruments. Our policy is to (i) only purchase inventory for which we have a market, (ii) structure our sales contracts so that price fluctuations do not materially affect our operating income and (iii) not acquire and hold physical inventory or derivatives for the purpose of speculating on commodity price changes. The material commodity-related risks inherent in our business activities can be divided into the following general categories:

Commodity Purchases and Sales In the normal course of our operations, we purchase and sell commodities. We use derivatives to manage the associated risks and to optimize profits. As of March 31, 2014, net derivative positions related to these activities included:

- An average of 272,000 barrels per day net long position (total of 8.2 million barrels) associated with our crude oil purchases, which was unwound ratably during April 2014 to match monthly average pricing.
- A net short spread position averaging approximately 24,700 barrels per day (total of 9.8 million barrels), which hedges a portion of our anticipated crude oil lease gathering purchases through May 2015. These derivatives are time spreads consisting of offsetting purchases and sales between two different months. Our use of these derivatives does not expose us to outright price risk.
- An average of 2,900 barrels per day (total of 1.1 million barrels) of butane/WTI spread positions, which hedge specific butane sales contracts that are priced as a percentage of WTI through March 2015.

• WTI deriv	An average of 19,000 barrels per day (total of 1.2 million barrels) of Brent/WTI spread positions, which hedge purchases based on red indices and sales based on Brent derived indices through June 2014.
•	A long position of approximately 2.1 Bcf through April 2016 related to anticipated base gas requirements.
•	A short position of approximately 12.6 Bcf through July 2014 related to anticipated sales of natural gas inventory.
• and refined	A net short position of approximately 5.0 million barrels through March 2015 related to the anticipated sales of our crude oil, NGL d products inventory.
Storage Co	apacity Utilization We own a significant amount of crude oil, NGL and refined products storage capacity other than that used in our

Storage Capacity Utilization We own a significant amount of crude oil, NGL and refined products storage capacity other than that used in our transportation operations. This storage may be leased to third parties or utilized in our own supply and logistics activities, including for the storage of inventory in a contango market. For capacity allocated to our supply and logistics operations, we have utilization risk in a backwardated market structure. As of March 31, 2014, we used derivatives to manage the risk of not utilizing approximately 0.5 million barrels of storage capacity through June 2014. These positions involve no outright price exposure, but instead enable us to profitably use the capacity to store hedged crude oil.

Pipeline Loss Allowance Oil As is common in the pipeline transportation industry, our tariffs incorporate a loss allowance factor that is intended to offset losses due to evaporation, measurement and other losses in transit. We utilize derivative instruments to hedge a portion of the anticipated sales of the allowance oil that is to be collected under our tariffs. As of March 31, 2014, our PLA hedges included a net short position for an average of approximately 1,800 barrels per day (total of 1.1 million barrels) through December 2015 and a long call option position of approximately 0.4 million barrels through December 2015.

Table of Contents

Natural Gas Processing/NGL Fractionation As part of our supply and logistics activities, we purchase natural gas for processing and NGL mix for fractionation, and we sell the resulting individual specification products (including ethane, propane, butane and condensate). In conjunction with these activities, we hedge the price risk associated with the purchase of the natural gas and the subsequent sale of the individual specification products. As of March 31, 2014, we had a long natural gas position of approximately 21.8 Bcf through December 2015, a short propane position of approximately 3.8 million barrels through December 2015, a short butane position of approximately 1.2 million barrels through December 2015 and a short WTI position of approximately 0.4 million barrels through December 2015. In addition, we had a long power position of 0.7 million megawatt hours which hedges a portion of our power supply requirements at our natural gas processing and fractionation plants through December 2016.

All of our commodity derivatives that qualify for hedge accounting are designated as cash flow hedges. We have determined that substantially all of our physical purchase and sale agreements qualify for the normal purchase normal sale scope exception. Physical commodity contracts that meet the definition of a derivative but are ineligible, or not designated, for the normal purchase normal sale scope exception are recorded on the balance sheet at fair value, with changes in fair value recognized in earnings.

Interest Rate Risk Hedging

We use interest rate derivatives to hedge interest rate risk associated with anticipated debt issuances and outstanding debt instruments. The derivative instruments we use to manage this risk consist primarily of interest rate swaps and treasury locks. As of March 31, 2014, AOCI includes deferred losses of approximately \$83 million that relate to open and terminated interest rate derivatives that were designated for hedge accounting. The terminated interest rate derivatives were cash-settled in connection with the issuance or refinancing of debt agreements. The deferred loss related to these instruments is being amortized to interest expense over the terms of the hedged debt instruments.

We have entered into forward starting interest rate swaps to hedge the underlying benchmark interest rate related to forecasted debt issuances through 2015. The following table summarizes the terms of our forward starting interest rate swaps as of March 31, 2014 (notional amounts in millions):

Hedged Transaction	Number and Types of Derivatives Employed	Notional Amount	Expected Termination Date	Average Rate Locked	Accounting Treatment
Anticipated debt offering	10 forward starting swaps	\$ 250	6/15/2015	3.60%	Cash flow
	(30-year)				hedge

In anticipation of our April 2014 issuance of senior notes, we entered into four treasury lock agreements in March 2014 for a combined notional amount of \$200 million at a locked in rate of 3.64%. In addition, we entered into a treasury lock agreement in April 2014 for a notional amount of \$50 million. The treasury locks were designated as cash flow hedges, thus changes in fair value are deferred in AOCI. In connection with our April 2014 senior notes issuance, these treasury locks were terminated prior to maturity for an aggregate cash payment of approximately \$7 million. The effective portion of the treasury locks will be deferred in AOCI and amortized to interest expense over the life of the senior notes.

Currency Exchange Rate Risk Hedging

Because a significant portion of our Canadian business is conducted in CAD and, at times, a portion of our debt is denominated in CAD, we use foreign currency derivatives to minimize the risks of unfavorable changes in exchange rates. These instruments include foreign currency exchange contracts and forwards.

As of March 31, 2014, our outstanding foreign currency derivatives include derivatives we use to (i) hedge currency exchange risk associated with USD-denominated commodity purchases and sales in Canada and (ii) hedge currency exchange risk created by the use of USD-denominated commodity derivatives to hedge commodity price risk associated with CAD-denominated commodity purchases and sales.

16

Table of Contents

The following table summarizes our open forward exchange contracts as of March 31, 2014 (in millions):

				Average Exchange Rate USD
		USD	CAD	to CAD
Forward exchange contracts that exchange CAD for USD:				
	2014	\$ 265 \$	293	\$1.00 - \$1.11
	2015	9	10	\$1.00 - \$1.11
		\$ 274 \$	303	\$1.00 - \$1.11
Forward exchange contracts that exchange USD for CAD:				
	2014	\$ 265 \$	291	\$1.00 - \$1.10
	2015	9	9	\$1.00 - \$1.06
		\$ 274 \$	300	\$1.00 - \$1.10
Net position by currency:				
	2014	\$ \$	2	
	2015		1	
		\$ \$	3	

Summary of Financial Impact

We record all open derivatives on the balance sheet as either assets or liabilities measured at fair value. Changes in the fair value of derivatives are recognized currently in earnings unless specific hedge accounting criteria are met. For derivatives that qualify as cash flow hedges, changes in fair value of the effective portion of the hedges are deferred in AOCI and recognized in earnings in the periods during which the underlying physical transactions are recognized in earnings. Derivatives that do not qualify for hedge accounting and the portion of cash flow hedges that are not highly effective in offsetting changes in cash flows of the hedged items are recognized in earnings each period. Cash settlements associated with our derivative activities are reflected as cash flows from operating activities in our condensed consolidated statements of cash flows.

A summary of the impact of our derivative activities recognized in earnings for the three months ended March 31, 2014 and 2013 is as follows (in millions):

Three Months Ended March 31, 201 Derivatives in Hedging Relationships					014	Three Months Ended March Derivatives in Hedging Relationships						013

Table of Contents

During the three months ended March 31, 2013 we reclassified a gain of approximately \$2 million from AOCI to Supply and Logistics segment revenues as a result of anticipated hedged transactions that are probable of not occurring. During the three months ended March 31, 2014, all of our hedged transactions were probable of occurring.

The following table summarizes the derivative assets and liabilities on our condensed consolidated balance sheet on a gross basis as of March 31, 2014 (in millions):

Our derivative transactions are governed through ISDA (International Swaps and Derivatives Association) master agreements and clearing brokerage agreements. These agreements include stipulations regarding the right of set off in the event that we or our counterparty default on our performance obligations. If a default were to occur, both parties have the right to net amounts payable and receivable into a single net settlement between parties.

Table of Contents

Our accounting policy is to offset derivative assets and liabilities executed with the same counterparty when a master netting arrangement exists. Accordingly, we also offset derivative assets and liabilities with amounts associated with cash margin. Our exchange-traded derivatives are transacted through clearing brokerage accounts and are subject to margin requirements as established by the respective exchange. On a daily basis, our account equity (consisting of the sum of our cash balance and the fair value of our open derivatives) is compared to our initial margin requirement resulting in the payment or return of variation margin. As of March 31, 2014, we had a net broker receivable of approximately \$43 million (consisting of initial margin of \$65 million reduced by \$22 million of variation margin that had been returned to us). As of December 31, 2013, we had a net broker receivable of approximately \$161 million (consisting of initial margin of \$85 million increased by \$76 million of variation margin that had been posted by us).

The following tables present information about derivatives and financial assets and liabilities that are subject to offsetting, including enforceable master netting arrangements at March 31, 2014 and December 31, 2013 (in millions):

	March 31, 2014					December 31, 2013			
	Derivative Asset Positions		Derivative Liability Positions		Derivative Asset Positions		Derivative Liability Positions

Other current liabilities				(4)				(8)	
Other long-term liabilities				(2)				(1)	
	\$	107	\$	(6)	\$	146	\$	(9)	

As of March 31, 2014, there was a net loss of approximately \$89 million deferred in AOCI including tax effects. The deferred net loss recorded in AOCI is expected to be reclassified to future earnings contemporaneously with (i) the earnings recognition of the underlying hedged commodity transaction or (ii) interest expense accruals associated with underlying debt instruments. Of the total net loss deferred in AOCI at March 31, 2014, we expect to reclassify a net gain of approximately \$1 million to earnings in the next twelve months. The remaining deferred loss of approximately \$90 million is expected to be reclassified to earnings through 2045. A portion of these amounts are based on market prices as of March 31, 2014; thus, actual amounts to be reclassified will differ and could vary materially as a result of changes in market conditions.

The net deferred gain/(loss), including tax effects, recognized in AOCI for derivatives for the three months ended March 31, 2014 and 2013 are as follows (in millions):

Three Months Ended March 31,
