NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1 Organization and Basis of Consolidation and Presentation

Organization

Plains GP Holdings, L.P. (PAGP) is a Delaware limited partnership formed on July 17, 2013 to own an interest in the general partner and incentive distribution rights (IDRs) of Plains All American Pipeline, L.P (PAA), a publicly traded Delaware limited partnership. PAGP has elected to be treated as a corporation for U.S. federal income tax purposes.

We completed our initial public offering (IPO) on October 21, 2013. Immediately prior to our IPO, certain owners of Plains AAP, L.P. (AAP) sold a portion of their interests in AAP to us, resulting in our ownership of Class A units of AAP (AAP units), which represent limited partnership interests in AAP. As of September 30, 2014, we owned 136,046,637 AAP units (representing an approximate 22.4% limited partner interest in AAP). AAP is a Delaware limited partnering that directly owns all of PAA s IDRs and indirectly owns the 2% general partner interest in PAA. AAP is the sole member of PAA GP LLC (PAA GP), a Delaware limited liability company that directly holds the 2% general partner interest in PAA. Also, through a series of transactions prior to our IPO with Plains GP Holdings LLC (our general partner), a Delaware limited liability company, and the owners of Plains All American GP LLC (GP LLC), a Delaware limited liability company formed on May 2, 2001, GP LLC s general partner interest in AAP became a non-economic interest, and we became the owner of a 100% managing member interest in GP LLC. See Basis of Consolidation and Presentation below for the resulting accounting impacts.

GP LLC manages the business and affairs of PAA and AAP. Except for certain matters relating to PAA that require the approval of the limited partners of PAA, and certain matters relating to AAP that require the approval of the limited partners of AAP or of us as the sole member of GP LLC, either pursuant to the governing documents of PAA, AAP or GP LLC, or as may be required by non-waivable provisions of applicable law, GP LLC has full and complete authority, power and discretion to manage and control the business, affairs and property of PAA and AAP, to make all decisions regarding those matters and to perform any and all other acts or activities customary or incident to the management of PAA and AAP s business, including the execution of contracts and management of litigation. GP LLC employs all domestic officers and personnel involved in the operation and management of PAA and AAP. PAA s Canadian officers and personnel are employed by Plains Midstream Canada ULC (PMC).

PAA is a publicly traded master limited partnership that owns and operates midstream energy infrastructure and provides logistics services for crude oil, natural gas liquids (NGL), natural gas and refined products. The term NGL includes ethane and natural gasoline products as well as products commonly referred to as liquefied petroleum gas (LPG), such as propane and butane. When used in this Form 10-Q, NGL refers to all NGL products including LPG. PAA owns an extensive network of pipeline transportation, terminalling, storage and gathering assets in key crude oil and NGL producing basins and transportation corridors and at major market hubs in the United States and Canada. Our business activities are conducted through three operating segments: (i) Transportation, (ii) Facilities and (iii) Supply and Logistics. See Note 12 for further discussion of our operating segments.

As used in this Form 10-Q and unless the context suggests otherwise (taking into account the fact that PAGP has no operating activities apart from those conducted by PAA and its subsidiaries), the terms PAGP, Partnership, Plains, we, us, our, ours and similar terms refer to P its consolidated subsidiaries.

Definitions

Additional defined terms are used in this Form 10-Q and shall have the meanings indicated below:

AOCI = Accumulated other comprehensive income

Bcf = Billion cubic feet
Btu = British thermal unit
CAD = Canadian dollar

DERs = Distribution equivalent rights

EBITDA = Earnings before interest, taxes, depreciation and amortization

FASB = Financial Accounting Standards Board

GAAP = Generally accepted accounting principles in the United States

ICE = IntercontinentalExchange LIBOR = London Interbank Offered Rate LTIP = Long-term incentive plan

8

Table of Contents

Mcf = Thousand cubic feet

NYMEX = New York Mercantile Exchange

PLA = Pipeline loss allowance

PNG = PAA Natural Gas Storage, L.P.
SEC = Securities and Exchange Commission

USD = United States dollar
White Cliffs = White Cliffs Pipeline, LLC
WTI = West Texas Intermediate

Basis of Consolidation and Presentation

The accompanying unaudited condensed consolidated interim financial statements and notes thereto should be read in conjunction with our 2013 Annual Report on Form 10-K. The financial statements have been prepared in accordance with the instructions for interim reporting as set forth by the SEC. All adjustments (consisting only of normal recurring adjustments) that in the opinion of management were necessary for a fair statement of the results for the interim periods have been reflected. All significant intercompany transactions have been eliminated in consolidation. Certain reclassifications have been made to information from previous years to conform to the current presentation. The condensed consolidated balance sheet data as of December 31, 2013 was derived from audited financial statements, but does not include all disclosures required by GAAP. The results of operations for the three and nine months ended September 30, 2014 should not be taken as indicative of results to be expected for the entire year. These financials include PAGP and all of our wholly owned subsidiaries and those entities that we control. Under GAAP, we consolidate PAA, AAP and GP LLC. Amounts associated with the interests in these entities not owned by us are reflected in our results of operations as net income attributable to noncontrolling interests and in our balance sheet partners capital section as noncontrolling interests.

For periods prior to our IPO, the accompanying condensed consolidated financial statements reflect the financial statements of GP LLC, the predecessor of PAGP, and are based on the historical ownership percentages of GP LLC and AAP. These financial statements, to the extent they relate to periods prior to our IPO, have been prepared from the separate financial records maintained by GP LLC and may not necessarily be indicative of the actual results of operations that might have occurred if PAGP had operated separately during those periods.

Subsequent events have been evaluated through the financial statements issuance date and have been included in the following footnotes where applicable.

Note 2 Recent Accounting Pronouncements

Other than as discussed below and in our 2013 Annual Report on Form 10-K, no new accounting pronouncements have become effective or have been issued during the nine months ended September 30, 2014 that are of significance or potential significance to us.

In May 2014, the FASB issued guidance regarding the recognition of revenue from contracts with customers with the underlying principle that an entity will recognize revenue to reflect amounts expected to be received in exchange for the provision of goods and services to customers upon the transfer of those goods or services. The guidance also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and the related cash flows. This guidance becomes effective for interim and annual periods beginning after December 15, 2016 and can be adopted either with a full retrospective approach or a modified retrospective approach with a cumulative-effect adjustment as of the date

of adoption. We are currently evaluating which transition approach to apply and the effect that adopting this guidance will have on our financial position, results of operations and cash flows.

In April 2014, the FASB issued guidance that modifies the criteria under which assets to be disposed of are evaluated to determine if such assets qualify as a discontinued operation and requires new disclosures for both discontinued operations and certain other disposals that do not meet the definition of a discontinued operation. This guidance is effective prospectively for annual and interim reporting periods beginning after December 15, 2014. Early adoption is permitted but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issue. We are currently evaluating the provisions of this authoritative guidance and assessing its impact, but do not believe our adoption will have a material impact on our financial position, results of operations or cash flows.

In March 2013, the FASB issued guidance regarding the release of cumulative translation adjustments into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity. This guidance became effective for interim and annual periods beginning after December 15, 2013. We adopted this guidance on January 1, 2014. Our adoption did not have a material impact on our financial position, results of operations or cash flows.

Table of Contents

Note 3 Accounts Receivable

Our accounts receivable are primarily from purchasers and shippers of crude oil and, to a lesser extent, purchasers of NGL and natural gas storage. These purchasers include, but are not limited to, refiners, producers, marketing and trading companies and financial institutions that are active in the physical and financial commodity markets. The majority of our accounts receivable relate to our crude oil supply and logistics activities that can generally be described as high volume and low margin activities, in many cases involving exchanges of crude oil volumes.

To mitigate credit risk related to our accounts receivable, we have in place a rigorous credit review process. We closely monitor market conditions in order to make a determination with respect to the amount, if any, of credit to be extended to any given customer and the form and amount of financial performance assurances we require. Such financial assurances are commonly provided to us in the form of advance cash payments, standby letters of credit or parental guarantees. As of September 30, 2014 and December 31, 2013, we had received \$181 million and \$117 million, respectively, of advance cash payments from third parties to mitigate credit risk. Furthermore, as of September 30, 2014 and December 31, 2013, we had received \$278 million and \$426 million, respectively, of standby letters of credit to support obligations due from third parties, a portion of which applies to future business. In addition, in an effort to mitigate credit risk, a significant portion of our transactions with counterparties are settled on a net-cash basis. Further, we enter into netting agreements (contractual agreements that allow us to offset receivables and payables with those counterparties against each other on our balance sheet) for a majority of such arrangements.

We review all outstanding accounts receivable balances on a monthly basis and record a reserve for amounts that we expect will not be fully recovered. We do not apply actual balances against the reserve until we have exhausted substantially all collection efforts. At September 30, 2014 and December 31, 2013, substantially all of our accounts receivable (net of allowance for doubtful accounts) were less than 30 days past their scheduled invoice date. Our allowance for doubtful accounts receivable totaled \$4 million and \$5 million at September 30, 2014 and December 31, 2013, respectively. Although we consider our allowance for doubtful accounts receivable to be adequate, actual amounts could vary significantly from estimated amounts.

Note 4 Inventory, Linefill and Base Gas and Long-term Inventory

Inventory, linefill and base gas and long-term inventory consisted of the following as of the dates indicated (barrels and natural gas volumes in thousands and carrying value in millions):

		Septem	ber 30,	2014		December 31, 2013						
	Volumes	Unit of Measure		rrying ⁷ alue		Price/ Init (1)	Volumes	Unit of Measure		rrying 'alue		Price/ (nit (1)
Inventory	, ordines	1/201151110			Ŭ	(1)	, orunics	111045411	,			1110 (1)
Crude oil	5,665	barrels	\$	476	\$	84.02	6,951	barrels	\$	540	\$	77.69
NGL	17,392	barrels		699	\$	40.19	8,061	barrels		352	\$	43.67
Natural gas	29,245	Mcf		119	\$	4.07	40,505	Mcf		150	\$	3.70

Inventory subtotal				1,314						1,065		
Linefill and base												
gas												
Crude oil	11,390	barrels		715	\$	62.77	10,966	barrels		679	\$	61.92

Edgar Filing: PLAINS GP HOLDINGS LP - Form 10-Q

NGL	1,214	barrels	54	\$ 44.48	1,341	barrels	62	\$ 46.23
Natural gas	28,612	Mcf	134	\$ 4.68	16,615	Mcf	57	\$ 3.43
Linefill and base								
gas subtotal			903				798	
Long-term								
inventory								
Crude oil	2,557	barrels	207	\$ 80.95	2,498	barrels	202	\$ 80.86
NGL	1,681	barrels	63	\$ 37.48	1,161	barrels	49	\$ 42.20
Long-term								
inventory subtotal			270				251	
Total			\$ 2,487				\$ 2,114	

Price per unit of measure is comprised of a weighted average associated with various grades, qualities and locations. Accordingly, these prices may not coincide with any published benchmarks for such products.

Table of Contents

At the end of each reporting period, we assess the carrying value of our inventory and make any adjustments necessary to reduce the carrying value to the applicable net realizable value. We did not record any such charges during the three months ended September 30, 2014. We recorded a charge of \$37 million during the nine months ended September 30, 2014 related to the writedown of our natural gas inventory that was purchased in conjunction with managing natural gas storage deliverability requirements during the extended period of severe cold weather in the first quarter of 2014. During the three and nine months ended September 30, 2013, we recorded a charge of \$7 million, primarily related to the writedown of our crude oil inventory due to declines in prices during the period. These adjustments are a component of Purchases and related costs on our accompanying condensed consolidated statements of operations. The recognition of the adjustment in 2013 was substantially offset by the recognition of gains on derivative instruments being utilized to hedge the future sales of our crude oil inventory. Substantially all of such gains were recorded to Supply and Logistics segment revenues on our accompanying condensed consolidated statements of operations. See Note 10 for discussion of our derivatives and risk management activities.

Note 5 Goodwill

The table below reflects our goodwill by segment and changes during the period indicated (in millions):

	Tran	sportation	Facilities	Supply and Logistics	Total
Balance at December 31, 2013	\$	878 \$	1,162	\$ 463	\$ 2,503
Foreign currency translation adjustments		(14)	(6)	(3)	(23)
Other			1		1
Balance at September 30, 2014	\$	864 \$	1,157	\$ 460	\$ 2,481

We completed our annual goodwill impairment test as of June 30, 2014 and determined that there was no impairment of goodwill.

Note 6 Debt

Debt consisted of the following as of the dates indicated (in millions):

		September 30, 2014		December 31, 2013
SHORT-TERM DEBT				
PAA commercial paper notes, bearing a weighted-average interest rate of 0.30% and 0.33%,

Total long-term debt		8,144		7,230
Total debt (3)	\$	9,120	\$	8,343
	Ψ	>,120	Ψ	0,515

PAA commercial paper notes are backstopped by the PAA senior unsecured revolving credit facility and the PAA senior secured hedged inventory facility, which mature in August 2019 and August 2017, respectively; as such, any borrowings under the PAA commercial paper program effectively reduce the available capacity under these facilities. At September 30, 2014 and December 31, 2013, we classified \$423 million and approximately \$1.1 billion, respectively, of borrowings under the PAA commercial paper program as short-term. These borrowings are primarily designated as working capital borrowings, must be repaid within one year and are primarily for hedged NGL and crude oil inventory and NYMEX and ICE margin deposits.

(2) In September 2014, AAP extended the maturity dates of its term loan and senior secured revolving credit facility. See Credit Facilities below for further discussion.

12

Table of Contents

PAA s fixed-rate senior notes (including current maturities) had a face value of approximately \$8.2 billion and \$6.7 billion at September 30, 2014 and December 31, 2013, respectively. We estimated the aggregate fair value of these notes as of September 30, 2014 and December 31, 2013 to be approximately \$8.8 billion and \$7.2 billion, respectively. PAA s fixed-rate senior notes are traded among institutions, and these trades are routinely published by a reporting service. Our determination of fair value is based on reported trading activity near quarter end. We estimate that the carrying value of outstanding borrowings under the credit facilities and the PAA commercial paper program approximates fair value as interest rates reflect current market rates. The fair value estimates for the PAA senior notes, the credit facilities and the PAA commercial paper program are based upon observable market data and are classified within Level 2 of the fair value hierarchy. See Note 10 for additional discussion of the fair value hierarchy.

Credit Facilities

In August 2014, PAA extended the maturity dates of its senior secured hedged inventory facility and senior unsecured revolving credit facility by one year through the exercise of the option included in the current credit agreements. The PAA senior secured hedged inventory facility and the PAA senior unsecured revolving credit facility now mature in August 2017 and August 2019, respectively.

In September 2014, AAP extended the maturity dates of its term loan and senior secured revolving credit facility by one year through the exercise of the option included in the current credit agreement. The AAP term loan and AAP senior secured revolving credit facility now mature in September 2019.

Borrowings and Repayments

Total borrowings under credit agreements and the PAA commercial paper program for the nine months ended September 30, 2014 and 2013 were approximately \$55.7 billion and \$13.2 billion, respectively. Total repayments under credit agreements and the PAA commercial paper program for the nine months ended September 30, 2014 and 2013 were approximately \$56.3 billion and \$13.4 billion, respectively. The variance in total gross borrowings and repayments is impacted by various business and financial factors including, but not limited to, the timing, average term and method of general partnership borrowing activities.

Letters of Credit

In connection with our supply and logistics activities, we provide certain suppliers with irrevocable standby letters of credit to secure our obligation for the purchase of crude oil, NGL and natural gas. Additionally, we issue letters of credit to support insurance programs and construction activities. At September 30, 2014 and December 31, 2013 we had outstanding letters of credit of \$66 million and \$41 million, respectively.

PAA Senior Notes Issuances

On April 23, 2014, PAA completed the issuance of \$700 million, 4.70% senior notes due 2044 at a public offering price of 99.734%. Interest payments are due on June 15 and December 15 of each year, commencing on December 15, 2014. In anticipation of the issuance of these senior notes, PAA entered into \$250 million notional principal amount of U.S. treasury locks in March and April 2014 to hedge the treasury rate portion of the interest rate on a portion of the notes. PAA terminated these treasury locks in April 2014. See Note 10 for additional disclosure.

On September 9, 2014, PAA completed the issuance of \$750 million, 3.60% senior notes due 2024 at a public offering price of 99.842%. Interest payments are due on May 1 and November 1 of each year, commencing on May 1, 2015.

PAA Commercial Paper Program

Effective October 20, 2014, the maximum aggregate borrowing capacity under the PAA commercial paper program was increased from \$1.5 billion to \$3.0 billion.

Note 7 Net Income Per Class A Share

Basic net income per Class A share is determined by dividing net income attributable to PAGP by the weighted average number of outstanding Class A shares during the period. Class B shares do not share in the earnings of the Partnership. Accordingly, basic and diluted net income per Class B share has not been presented.

Table of Contents

Diluted net income per Class A share is determined by dividing net income attributable to PAGP by the weighted average number of outstanding diluted Class A shares during the period. For purposes of calculating diluted net income per Class A share, both the net income attributable to PAGP and the weighted average number of outstanding diluted Class A shares consider the impact of possible future exchanges of (i) AAP units and the associated Class B shares into our Class A shares and (ii) certain Class B units of AAP (referred to herein as AAP Management Units) into our Class A shares. In addition, the calculation of the weighted average number of outstanding diluted Class A shares considers the effect of potentially dilutive awards under the Plains GP Holdings, L.P. Long-Term Incentive Plan (the PAGP LTIP).

All AAP Management Units that have satisfied the applicable performance condition are considered potentially dilutive. Exchanges of potentially dilutive AAP units and AAP Management Units are assumed to have occurred at the beginning of the period and the incremental income attributable to PAGP resulting from the assumed exchanges is representative of the incremental income that would have been attributable to PAGP if the assumed exchanges occurred on that date. Our PAGP LTIP awards that contemplate the issuance of Class A Shares are considered dilutive unless (i) vesting occurs only upon the satisfaction of a performance condition and (ii) that performance condition has yet to be satisfied. PAGP LTIP awards that are deemed to be dilutive are reduced by a hypothetical share repurchase based on the remaining unamortized fair value, as prescribed by the treasury stock method in guidance issued by FASB. All outstanding PAGP LTIP awards as of September 30, 2014 are dilutive.

For the three and nine months ended September 30, 2014, the possible exchange of any AAP units and certain AAP Management Units would have had an antidilutive effect on net income per Class A share. For the same periods, our PAGP LTIP awards are dilutive; however, there are less than 0.1 million dilutive LTIP awards, which amount is not large enough to change the presentation of weighted average shares outstanding or net income per Class A share. The following table illustrates the calculation of basic net income per Class A share and diluted net income per Class A share for the three and nine months ended September 30, 2014 (in millions, except per share data):

	 ree Months Ended otember 30, 2014	Nine Months Ended September 30, 2014	
Basic and Diluted Net Income per Class A Share			
Net income attributable to PAGP	\$ 16	\$	45
Basic and diluted weighted average Class A shares outstanding	136		136
Basic and diluted net income per Class A share	\$ 0.12	\$	0.33

Note 8 Partners Capital and Distributions

Distributions

The following table details the distributions paid to Class A shareholders during or pertaining to the first nine months of 2014 (in millions, except per share data):

Date Declared	Distribution Date	Distributions to Class A Shareholders		Distributions per Class A Share (2)
October 8, 2014	November 14, 2014 (1)	\$	26	\$ 0.19075
July 8, 2014	August 14, 2014	\$	25	\$ 0.18340

April 7, 2014	May 15, 2014	\$ 23	\$ 0.17055
January 9, 2014	February 14, 2014	\$ 17	\$ 0.12505

⁽¹⁾ Payable to shareholders of record at the close of business on October 31, 2014, for the period July 1, 2014 through September 30, 2014.

⁽²⁾ The distribution per Class A share paid on February 14, 2014 was prorated for the partial quarter following the closing of our IPO on October 21, 2013.

Table of Contents

Units Outstanding

Exchange Rights. Holders of AAP units and their permitted transferees each have the right to exchange all or a portion of their AAP units for Class A shares at an exchange ratio of one Class A share for each AAP unit exchanged (referred to herein as their Exchange Right). This Exchange Right may be exercised only if, simultaneously therewith, an equal number of Class B shares and general partner units are transferred by the exercising party to us. For additional information regarding Exchange Rights, see Note 10 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K. During the nine months ended September 30, 2014, certain holders of AAP units and their permitted transferees exercised their Exchange Right, which resulted in the exchange of AAP units, general partner units and our Class B shares for our Class A shares. The following table reflects the impact of such Exchange Right exercises on our Class A and Class B shares outstanding:

	Class B Shares	Class A Shares
Balance at December 31, 2013	472,196,136	133,833,637
Shares (exchanged)/issued in connection with Exchange Right exercises	(2,213,000)	2,213,000
Balance at September 30, 2014	469,983,136	136,046,637

Consolidated Subsidiaries

Sales of Common Units by Subsidiaries

PAA Continuous Offering Program. In August 2014, PAA entered into an equity distribution agreement with several financial institutions pursuant to which PAA may offer and sell, through sales agents, common units representing limited partner interests in PAA having an aggregate offering price of up to \$900 million. During the nine months ended September 30, 2014, PAA issued an aggregate of approximately 11.8 million common units under its continuous offering program, generating proceeds of \$655 million, net of offering costs.

Noncontrolling Interests in Subsidiaries

As of September 30, 2014, noncontrolling interests in subsidiaries consisted of (i) a 98% limited partner interest in PAA, (ii) an approximate 78% limited partner interest in AAP that consists of Class A units and AAP Management Units (a profits interest) and (iii) a 25% interest in SLC Pipeline LLC.

Subsidiary Distributions

PAA Distributions. The following table details the distributions to PAA s partners paid during or pertaining to the first nine months of 2014, net of incentive distribution reductions (in millions, except per unit data):

October 8, 2014	November 14, 2014 (1)	\$ 245	\$ 124	\$ 5	\$ 374	\$ 0.6600
April 7, 2014	May 15, 2014	\$ 229	\$ 110	\$ 5	\$ 344	\$ 0.6300

⁽¹⁾ Payable to unitholders of record at the close of business on October 31, 2014, for the period July 1, 2014 through September 30, 2014.

During the nine months ended September 30, 2014, distributions of approximately \$2 million were paid to noncontrolling interests in SLC Pipeline LLC.

Table of Contents

AAP Distributions. The following table details the distributions to AAP s partners from distributions received from PAA paid during or pertaining to the first nine months of 2014 (in millions):

		ributions received	Cash	Distributions to AAP s Partners Noncontrolling							
Distribution Date	by	AAP from PAA	Reserves	To	otal		Interests		PAGP		
November 14, 2014 (1)	\$	129	\$ (4) \$		125	\$	99	\$	26		
August 14, 2014	\$	122	\$ (3) \$		119	\$	94	\$	25		
May 15, 2014	\$	115	\$ (4) \$		111	\$	88	\$	23		
February 14, 2014 (2)	\$	107	\$ (3) \$		104	\$	87	\$	17		

⁽¹⁾ Payable to unitholders of record at the close of business on October 31, 2014, for the period July 1, 2014 through September 30, 2014.

The distribution paid by AAP on February 14, 2014 was prorated as of the date of the consummation of our IPO, such that the owners of AAP prior to our IPO received the portion of the distribution attributable to the period prior to our IPO, and the owners of AAP at the date of record of January 31, 2014, including us, received the portion of the distribution attributable to the period beginning on the date of the IPO through the end of the fourth quarter of 2013.

In September 2013, the AAP credit agreement was amended to increase the amount of the term loan by \$300 million. Upon receipt, the net term loan proceeds of \$299 million were distributed to AAP s partners, excluding AAP Management Unit holders, in proportion to their respective ownership interests.

Note 9 Equity-Indexed Compensation Plans

We refer to the PAGP LTIP, PAA LTIPs and AAP Management Units collectively as our Equity-indexed compensation plans. For additional discussion of our equity-indexed compensation plans and awards, see Note 15 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K.

In connection with our IPO in October 2013, our general partner adopted the PAGP LTIP, which is intended to align the interests of employees and directors with those of our shareholders by providing such employees and directors incentive compensation awards that reward achievement of targeted distribution levels and other business objectives. The PAGP LTIP provides for awards of options, restricted shares, phantom shares and share appreciation rights. Certain awards may also include distribution equivalent rights (DERs), which, subject to applicable vesting criteria, entitle the grantee to a cash payment equal to the cash distribution paid on an outstanding Class A share. The PAGP LTIP authorizes the issuance of up to 10 million Class A shares deliverable upon vesting. In February 2014, an aggregate of 83,200 phantom Class A shares were issued to our directors, resulting in expense of approximately \$1 million for the nine months ended September 30, 2014. These awards will vest annually in 25% increments, beginning in February 2015, and have an automatic re-grant feature such that as they vest, an equivalent amount is granted.

Equity-indexed compensation activity for PAA and PAGP LTIP awards is summarized in the following table (units and shares in millions):

	PAA Units (1)	Weighted Average Grant Date Fair Value per Unit	PAGP Shares (1)	Weighted Average Grant Date Fair Value per Share
Outstanding at December 31, 2013	8.4	\$ 36.97		\$ _
Granted	1.1	\$ 47.27	0.1	\$ 27.84
Vested (2)	(1.9)	\$ 25.54		\$
Cancelled or forfeited	(0.3)	\$ 39.63		\$
Outstanding at September 30, 2014	7.3	\$ 41.28	0.1	\$ 27.84

⁽¹⁾ Amounts do not include AAP Management Units.

During the nine months ended September 30, 2014, approximately 0.6 million PAA common units were issued, net of approximately 0.3 million units withheld for taxes, in connection with the settlement of vested awards. The remaining PAA awards (approximately 1.0 million units) that vested during the nine months ended September 30, 2014 were settled in cash.

Table of Contents

AAP Management Units

Activity for AAP Management Units is summarized in the following table (in millions):

				Grant Date
	Reserved for Future Grants	Outstanding	Outstanding Units Earned	Fair Value Of Outstanding AAP Management Units (1)
Balance at December 31, 2013	3.5	48.6	47.0	\$ 51
Granted	(0.4)	0.4		11
Earned	N/A	N/A	0.8	N/A
Balance at September 30, 2014	3.1	49.0	47.8	\$ 62

⁽¹⁾ Of the \$62 million grant date fair value, approximately \$54 million had been recognized through September 30, 2014. Approximately \$5 million of such amount was recognized as expense during the nine months ended September 30, 2014.

Other Consolidated Equity-Indexed Compensation Plan Information

The table below summarizes the expense recognized and the value of vested LTIPs (settled both in PAA common units and cash) under our equity-indexed compensation plans and includes both liability-classified and equity-classified awards (in millions):

	Three Mor Septem	Nine Months Ended September 30,						
	2014	2013			2014		2013	
Equity-indexed compensation expense	\$ 22	\$	17	\$	91	\$		96
LTIP unit-settled vestings	\$ 1	\$	1	\$	52	\$		47
LTIP cash-settled vestings	\$	\$		\$	52	\$		61
DER cash payments	\$ 2	\$	2	\$	6	\$		5

Note 10 Derivatives and Risk Management Activities

We identify the risks that underlie our core business activities and use risk management strategies to mitigate those risks when we determine that there is value in doing so. Our policy is to use derivative instruments for risk management purposes and not for the purpose of speculating on hydrocarbon commodity (referred to herein as commodity) price changes. We use various derivative instruments to (i) manage our exposure to commodity price risk as well as to optimize our profits, (ii) manage our exposure to interest rate risk and (iii) manage our exposure to currency exchange rate risk. Our commodity risk management policies and procedures are designed to help ensure that our hedging activities address our risks by monitoring our derivative positions, as well as physical volumes, grades, locations, delivery schedules and storage capacity. Our interest rate and currency exchange rate risk management policies and procedures are designed to monitor our derivative positions and ensure that those positions are consistent with our objectives and approved strategies. When we apply hedge accounting, our policy is to formally document all relationships between hedging instruments and hedged items, as well as our risk management objectives for undertaking the hedge. This process includes specific identification of the hedging instrument and the hedged transaction, the nature of the risk being hedged

and how the hedging instrument s effectiveness will be assessed. Both at the inception of the hedge and on an ongoing basis, we assess whether the derivatives used in a transaction are highly effective in offsetting changes in cash flows or the fair value of hedged items.

Commodity Price Risk Hedging

Our core business activities involve certain commodity price-related risks that we manage in various ways, including through the use of derivative instruments. Our policy is to (i) only purchase inventory for which we have a market, (ii) structure our sales contracts so that price fluctuations do not materially affect our operating income and (iii) not acquire and hold physical inventory or derivatives for the purpose of speculating on commodity price changes. The material commodity-related risks inherent in our business activities can be divided into the following general categories:

Commodity Purchases and Sales In the normal course of our operations, we purchase and sell commodities. We use derivatives to manage the associated risks and to optimize profits. As of September 30, 2014, net derivative positions related to these activities included:

• An average of 248,700 barrels per day net long position (total of 7.7 million barrels) associated with our crude oil purchases, which was unwound ratably during October 2014 to match monthly average pricing.

17

Table of Contents

- A net short time spread position averaging approximately 19,900 barrels per day (total of 11.5 million barrels), which hedges a portion of our anticipated crude oil lease gathering purchases through June 2016. Our use of these derivatives does not expose us to outright price risk.
- An average of 15,200 barrels per day (total of 6.5 million barrels) of crude oil grade spread positions through December 2015. These derivatives allow us to lock in grade basis differentials. Our use of these derivatives does not expose us to outright price risk.
- A net short position of approximately 25.1 Bcf through April 2016 related to anticipated sales of natural gas inventory and base gas requirements.
- A net short position of approximately 12.1 million barrels through December 2015 related to the anticipated sales of our crude oil, NGL and refined products inventory.

Pipeline Loss Allowance Oil As is common in the pipeline transportation industry, our tariffs incorporate a loss allowance factor that is intended to offset losses due to evaporation, measurement and other losses in transit. We utilize derivative instruments to hedge a portion of the anticipated sales of the allowance oil that is to be collected under our tariffs. As of September 30, 2014, our PLA hedges included a net short position for an average of approximately 1,400 barrels per day (total of 1.1 million barrels) through December 2016 and a long call position of approximately 0.6 million barrels through December 2016.

Natural Gas Processing/NGL Fractionation As part of our supply and logistics activities, we purchase natural gas for processing and NGL mix for fractionation, and we sell the resulting individual specification products (including ethane, propane, butane and condensate). In conjunction with these activities, we hedge the price risk associated with the purchase of the natural gas and the subsequent sale of the individual specification products. As of September 30, 2014, we had a long natural gas position of approximately 33.3 Bcf through December 2016, a short propane position of approximately 5.4 million barrels through December 2016 and a short butane position of approximately 1.6 million barrels through December 2016.

To the extent they qualify and we decide to make the election, all of our commodity derivatives where we elect hedge accounting are designated as cash flow hedges. We have determined that substantially all of our physical purchase and sale agreements qualify for the normal purchase normal sale scope exception. Physical commodity contracts that meet the definition of a derivative but are ineligible, or not designated, for the normal purchase normal sale scope exception are recorded on the balance sheet at fair value, with changes in fair value recognized in earnings.

Interest Rate Risk Hedging

We use interest rate derivatives to hedge interest rate risk associated with anticipated debt issuances and outstanding debt instruments. The derivative instruments we use to manage this risk consist primarily of interest rate swaps and treasury locks. As of September 30, 2014, AOCI includes deferred losses of \$108 million that relate to open and terminated interest rate derivatives that were designated for hedge accounting.

The terminated interest rate derivatives were cash-settled in connection with the issuance or refinancing of debt agreements. The deferred loss related to these instruments is being amortized to interest expense over the terms of the hedged debt instruments.

PAA has entered into forward starting interest rate swaps to hedge the underlying benchmark interest rate related to forecasted debt issuances through 2015. The following table summarizes the terms of these forward starting interest rate swaps as of September 30, 2014 (notional amounts in millions):

	Number and Types of		otional	Expected	Average Rate	Accounting Treatment	
Hedged Transaction	Derivatives Employed	Amount		Termination Date	Locked		
Anticipated debt offering	10 forward starting swaps (30-year)	\$	250	6/15/2015	3.60%	Cash flow hedge	

In anticipation of PAA s April 2014 issuance of senior notes, PAA entered into an aggregate of five treasury lock agreements in March and April 2014 for a combined notional amount of \$250 million at a locked in rate of 3.62%. The treasury locks were designated as cash flow hedges, thus changes in fair value are deferred in AOCI. In connection with PAA s April 2014 senior notes issuance, these treasury locks were terminated prior to maturity for an aggregate cash payment of \$7 million. The effective portion of the treasury locks was deferred in AOCI and will be amortized to interest expense over the life of the senior notes.

Table of Contents

Currency Exchange Rate Risk Hedging

Because a significant portion of our Canadian business is conducted in CAD and, at times, a portion of our debt is denominated in CAD, we use foreign currency derivatives to minimize the risk of unfavorable changes in exchange rates. These instruments include foreign currency exchange contracts and forwards.

As of September 30, 2014, our outstanding foreign currency derivatives include derivatives we use to (i) hedge currency exchange risk associated with USD-denominated commodity purchases and sales in Canada and (ii) hedge currency exchange risk created by the use of USD-denominated commodity derivatives to hedge commodity price risk associated with CAD-denominated commodity purchases and sales.

The following table summarizes our open forward exchange contracts as of September 30, 2014 (in millions):

		USD	CAD	Average Exchange Rate USD to CAD
Forward exchange contracts that exchange CAD for				
USD:				
	2014	\$ 284	\$ 319	\$1.00 - \$1.12
	2015	178	200	\$1.00 - \$1.12
		\$ 462	\$ 519	\$1.00 - \$1.12
Forward exchange contracts that exchange USD for				
CAD:				
	2014	\$ 284	\$ 313	\$1.00 - \$1.10
	2015	178	195	\$1.00 - \$1.09
		\$ 462	\$ 508	\$1.00 - \$1.10

Summary of Financial Impact

We record all open derivatives on the balance sheet as either assets or liabilities measured at fair value. Changes in the fair value of derivatives are recognized currently in earnings unless specific hedge accounting criteria are met. For derivatives that qualify as cash flow hedges, changes in fair value of the effective portion of the hedges are deferred in AOCI and recognized in earnings in the periods during which the underlying physical transactions are recognized in earnings. Derivatives that do not qualify for hedge accounting and the portion of cash flow hedges that are not highly effective in offsetting changes in cash flows of the hedged items are recognized in earnings each period. Cash settlements associated with our derivative activities are reflected as cash flows from operating activities in our condensed consolidated statements of cash flows.

During the three and nine months ended September 30, 2014, all of our hedged transactions were probable of occurring. During the three months ended September 30, 2013 we reclassified losses of \$2 million from AOCI to Facilities segment revenues as a result of anticipated hedged transactions that were probable of not occurring. During the nine months ended September 30, 2013, we reclassified gains of \$3 million and losses of \$1 million from AOCI to Supply and Logistics segment revenues and Facilities segment revenues, respectively, as a result of anticipated hedged transactions that were probable of not occurring.

Table of Contents

The following table summarizes the derivative assets and liabilities on our condensed consolidated balance sheet on a gross basis as of September 30, 2014 (in millions):

		Asset De	Asset Derivatives					Derivativ	es

Our derivative transactions are governed through ISDA (International Swaps and Derivatives Association) master agreements and clearing brokerage agreements. These agreements include stipulations regarding the right of set off in the event that we or our counterparty default on our performance obligations. If a default were to occur, both parties have the right to net amounts payable and receivable into a single net settlement between parties.

Table of Contents

Our accounting policy is to offset derivative assets and liabilities executed with the same counterparty when a master netting arrangement exists. Accordingly, we also offset derivative assets and liabilities with amounts associated with cash margin. Our exchange-traded derivatives are transacted through clearing brokerage accounts and are subject to margin requirements as established by the respective exchange. On a daily basis, our account equity (consisting of the sum of our cash balance and the fair value of our open derivatives) is compared to our initial margin requirement resulting in the payment or return of variation margin. As of September 30, 2014, we had a net broker receivable of \$35 million (consisting of initial margin of \$74 million reduced by \$39 million of variation margin that had been returned to us). As of December 31, 2013, we had a net broker receivable of \$161 million (consisting of initial margin of \$85 million increased by \$76 million of variation margin that had been posted by us).

The following tables present information about derivatives and financial assets and liabilities that are subject to offsetting, including enforceable master netting arrangements at September 30, 2014 and December 31, 2013 (in millions):

	Dov	September	,	4 Derivative	December 31, 2013 Derivative Derivative					
		Positions	_	Liability Positions		Asset Positions	Liability Position

Other long-term liabilities				(2)				(1)		
	\$	73	\$	(32)	\$	146	\$	(9)		

As of September 30, 2014, there was a net loss of \$118 million deferred in AOCI including tax effects. The deferred net loss recorded in AOCI is expected to be reclassified to future earnings contemporaneously with (i) the earnings recognition of the underlying hedged commodity transaction or (ii) interest expense accruals associated with underlying debt instruments. Of the total net loss deferred in AOCI at September 30, 2014, we expect to reclassify a net gain of \$1 million to earnings in the next twelve months. The remaining deferred loss of \$119 million is expected to be reclassified to earnings through 2045. A portion of these amounts are based on market prices as of September 30, 2014; thus, actual amounts to be reclassified will differ and could vary materially as a result of changes in market conditions.

The net deferred gain/(loss), including tax effects, recognized in AOCI for derivatives for the three and nine months ended September 30, 2014 and 2013 are as follows (in millions):

	Three Mon Septem	Nine Months Ended September 30,					
	2014	2013		2014		2013	
Commodity derivatives, net	\$ 2	\$	66	\$ (10)	\$		77
Interest rate derivatives, net	(8)		12	(47)			64
Total	\$ (6)	\$	78	\$ (57)	\$		141

At September 30, 2014 and December 31, 2013, none of our outstanding derivatives contained credit-risk related contingent features that would result in a material adverse impact to us upon any change in our credit ratings. Although we may be required to post margin on our cleared derivatives as described above, we do not require our non-cleared derivative counterparties to post collateral with us.

Recurring Fair Value Measurements

Derivative Financial Assets and Liabilities

The following table sets forth by level within the fair value hierarchy our financial assets and liabilities that were accounted for at fair value on a recurring basis as of September 30, 2014 and December 31, 2013 (in millions):

		Fai	r Valu	e as of Se	eptem	ber 30, 2	014		Fair Value as of December 31, 2013							
Recurring Fair Value Measures (1)	Leve	l 1	Le	vel 2	Le	vel 3		Total	I	Level 1	Ι	evel 2	L	evel 3		Total
Commodity derivatives	\$	6	\$	22	\$	3	\$	31	\$	16	\$	(59)	\$	(3)	\$	(46)
Interest rate derivatives				(15)				(15)				26				26
Foreign currency derivatives				(10)				(10)				(4)				(4)
Total net derivative																
asset/(liability)	\$	6	\$	(3)	\$	3	\$	6	\$	16	\$	(37)	\$	(3)	\$	(24)

⁽¹⁾ Derivative assets and liabilities are presented above on a net basis but do not include related cash margin deposits.

Level 1

Level 1 of the fair value hierarchy includes exchange-traded commodity derivatives such as futures and options. The fair value of exchange-traded commodity derivatives is based on unadjusted quoted prices in active markets.

Level 2

Level 2 of the fair value hierarchy includes exchange-cleared commodity derivatives and over-the-counter commodity, interest rate and foreign currency derivatives that are traded in active markets. In addition, it includes certain physical commodity contracts. The fair value of these derivatives is based on broker price quotations which are corroborated with market observable inputs.

Level 3

Level 3 of the fair value hierarchy includes certain physical commodity contracts. The fair value of our Level 3 physical commodity contracts is based on a valuation model utilizing broker-quoted forward commodity prices, and timing estimates, which involve management judgment. The significant unobservable inputs used in the fair value measurement of our Level 3 derivatives are forward prices obtained from brokers. A

significant increase or decrease in these forward prices could result in a material change in fair value to our Level 3 derivatives.

Rollforward of Level 3 Net Asset/(Liability)

The following table provides a reconciliation of changes in fair value of the beginning and ending balances for our derivatives classified as Level 3 (in millions):

	Septe	lonths End ember 30,		Nine Mont Septemb			
	2014		2013	2014		2013

Included in earnings (1)	1		(4)				(1)
Included in other comprehensive income							
Settlements			(1)	3			(3)
Derivatives entered into during the period	1			3			(1)
Transfers out of Level 3							
Ending Balance	\$ 3	\$	(1)	\$ 3	\$		(1)
Change in unrealized gains/(losses) included in earnings relating to Level 3 derivatives still held							
at the end of the periods	\$ 2	\$	(4)	\$ 3	\$		(1)

⁽¹⁾ We reported unrealized gains and losses associated with Level 3 commodity derivatives in our condensed consolidated statements of operations as Supply and Logistics segment revenues.

Table of Contents

Note 11 Commitments and Contingencies

Litigation

General. In the ordinary course of business, we are involved in various legal proceedings. To the extent we are able to assess the likelihood of a negative outcome for these proceedings, our assessments of such likelihood range from remote to probable. If we determine that a negative outcome is probable and the amount of loss is reasonably estimable, we accrue the estimated amount. We do not believe that the outcome of these legal proceedings, individually or in the aggregate, will have a material adverse effect on our financial condition, results of operations or cash flows. Although we believe that our operations are presently in material compliance with applicable requirements, as we acquire and incorporate additional assets it is possible that the EPA or other governmental entities may seek to impose fines, penalties or performance obligations on us (or on a portion of our operations) as a result of any past noncompliance whether such noncompliance initially developed before or after our acquisition.

Environmental

General. Although we believe that our efforts to enhance our leak prevention and detection capabilities have produced positive results, we have experienced (and likely will experience future) releases of hydrocarbon products into the environment from our pipeline, rail and storage operations. These releases can result from unpredictable man-made or natural forces and may reach surface water bodies, groundwater aquifers or other sensitive environments. Whether current or past, damages and liabilities associated with any such releases from our assets may substantially affect our business.

At September 30, 2014, our estimated undiscounted reserve for environmental liabilities totaled \$87 million, of which \$13 million was classified as short-term and \$74 million was classified as long-term. At December 31, 2013, our estimated undiscounted reserve for environmental liabilities totaled \$93 million, of which \$11 million was classified as short-term and \$82 million was classified as long-term. The short- and long-term environmental liabilities referenced above are reflected in Accounts payable and accrued liabilities and Other long-term liabilities and deferred credits, respectively, on our condensed consolidated balance sheets. At September 30, 2014 and December 31, 2013, we had recorded receivables totaling \$9 million and \$10 million, respectively, for amounts probable of recovery under insurance and from third parties under indemnification agreements, which are predominantly reflected in Trade accounts receivable and other receivables, net on our condensed consolidated balance sheets.

In some cases, the actual cash expenditures may not occur for three years or longer. Our estimates used in these reserves are based on information currently available to us and our assessment of the ultimate outcome. Among the many uncertainties that impact our estimates are the necessary regulatory approvals for, and potential modification of, our remediation plans, the limited amount of data available upon initial assessment of the impact of soil or water contamination, changes in costs associated with environmental remediation services and equipment and the possibility of existing legal claims giving rise to additional liabilities. Therefore, although we believe that the reserve is adequate, costs incurred may be in excess of the reserve and may potentially have a material adverse effect on our financial condition, results of operations or cash flows.

Table of Contents

Bay Springs Pipeline Release. During February 2013, we experienced a crude oil release of approximately 120 barrels on a portion of one of our pipelines near Bay Springs, Mississippi. Most of the released oil was contained within our pipeline right of way, but some of the released oil entered a nearby waterway where it was contained with booms. The EPA has issued an administrative order requiring us to take various actions in response to the release, including remediation, reporting and other actions. We have satisfied the requirements of the administrative order; however, we may be subjected to a civil penalty. The aggregate cost to clean up and remediate the site was approximately \$6 million.

Kemp River Pipeline Release. During May and June 2013, two separate releases were discovered on our Kemp River pipeline in Northern Alberta, Canada that, in the aggregate, resulted in the release of approximately 700 barrels of condensate and light crude oil. Clean-up and remediation activities are being conducted in cooperation with the applicable regulatory agencies. AER s final investigation is not complete. To date, no charges, fines or penalties have been assessed against PMC with respect to these releases; however, it is possible that fines or penalties may be assessed against PMC in the future. We estimate that the aggregate clean-up and remediation costs associated with these releases will be approximately \$15 million. Through September 30, 2014, we spent approximately \$8 million in connection with clean-up and remediation activities.

Note 12 Operating Segments

We manage our operations through three operating segments: (i) Transportation, (ii) Facilities and (iii) Supply and Logistics. Our Chief Operating Decision Maker (our Chief Executive Officer) evaluates segment performance based on measures including segment profit and maintenance capital investment. We define segment profit as revenues and equity earnings in unconsolidated entities less (i) purchases and related costs, (ii) field operating costs and (iii) segment general and administrative expenses. Each of the items above excludes depreciation and amortization. Maintenance capital consists of capital expenditures for the replacement of partially or fully depreciated assets in order to maintain the operating and/or earnings capacity of our existing assets.

The following table reflects certain financial data for each segment for the periods indicated (in millions):

	Transportation	Facilities	5	Supply and Logistics	Total
Three Months Ended September 30, 2014	•

⁽¹⁾ Effective January 1, 2014, our natural gas sales and costs, primarily attributable to the activities performed by our natural gas storage commercial optimization group, are reported in the Supply and Logistics segment. Such items were previously reported in the Facilities segment.

(2) Segment revenues and purchases and related costs include intersegment amounts. Intersegment sales are conducted at posted tariff rates, rates similar to those charged to third parties or rates that we believe approximate market. For further discussion, see Analysis of Operating Segments under Item 7 of our 2013 Annual Report on Form 10-K.

Supply and Logistics segment profit includes interest expense (related to hedged inventory purchases) of \$4 million and \$8 million for the three months ended September 30, 2014 and 2013, respectively, and \$11 million and \$21 million for the nine months ended September 30, 2014 and 2013, respectively.

(4) The following table reconciles segment profit to net income attributable to PAGP (in millions):

		Three Months Ended September 30,					Nine Months Ended September 30,

Note 13 Related Party Transactions

See Note 14 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K for a complete discussion of our related party transactions.

Occidental Petroleum Corporation

As of September 30, 2014, a subsidiary of Occidental Petroleum Corporation (Oxy) owned approximately 25% of the limited partner interests in AAP and had a representative on the board of directors of GP LLC and our general partner. During the three and nine months ended September 30, 2014 and 2013, we recognized sales and transportation revenues and purchased petroleum products from companies affiliated with Oxy. These transactions were conducted at posted tariff rates or prices that we believe approximate market. See detail below (in millions):

		Three Mor Septem	ed	Nine Months Ended September 30,					
	20)14	2013	2014		2013			
Revenues	\$	369	\$ 441	\$ 812	\$	1,135			
Purchases and related costs	\$	233	\$ 229	\$ 701	\$	604			

We currently have a netting arrangement with Oxy. Our gross receivable and payable amounts with affiliates of Oxy were as follows (in millions):

	\$ September 30, 2014	December 2013	31,
Trade accounts receivable and other receivables	\$ 274	\$	133
Accounts payable	\$ 233	\$	181

Note 14 Subsequent Events

As of November 5, 2014, PAA entered into a definitive purchase and sale agreement with Oxy that provides for PAA s purchase of Oxy s 50% interest in BridgeTex Pipeline Company LLC (BridgeTex) for \$1.075 billion. BridgeTex owns a 300,000 barrel-per-day crude oil pipeline (BridgeTex Pipeline) that extends from Colorado City in West Texas to Texas City. The remaining 50% interest in BridgeTex is owned by Magellan Midstream Partners, L.P. (MMP), which is also the operator of the BridgeTex Pipeline. Contemporaneous with the purchase by PAA of Oxy s 50% interest in BridgeTex, BridgeTex has agreed to sell the southern leg of the pipeline system which runs from Houston to Texas City (the Texas City Leg) to MMP, and MMP has agreed to enter into a long term capacity lease with BridgeTex pursuant to which BridgeTex shippers will have access to capacity on the Texas City Leg.

In addition to customary closing conditions and the contemporaneous consummation of the sale of the Texas City Leg and execution of the capacity lease, PAA is acquisition of Oxy is 50% interest in BridgeTex is subject to the completion by us, prior to December 31, 2014, of an underwritten secondary offering pursuant to which Oxy would sell a portion of its equity interest in us. In order to facilitate such offering and the overall transaction, (i) the board of directors of our general partner has agreed to an early release of the 15-month lock-up arrangement that was originally imposed on certain of our equity owners, including Oxy, in connection with our initial public offering in October 2013, (ii) certain affiliates of Kayne Anderson Investment Management, Inc., The Energy & Minerals Group and PAA Management, Inc., The Energy & Minerals Group and PAA Management, Inc., The Energy & Minerals Group and PAA Management, Inc., The Energy & Minerals Group and PAA Management, L.P. have agreed to refrain from selling any of their respective interests in us for a period of up to 90 days following such offering. If an offering is not completed prior to December 31, 2014, both PAA and Oxy have the right to terminate the purchase and sale agreement.

Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction
The following discussion is intended to provide investors with an understanding of our financial condition and results of our operations, including periods prior to the closing of our IPO on October 21, 2013. Such analysis should be read in conjunction with our historical Consolidated Financial Statements and accompanying notes and Management s Discussion and Analysis of Financial Condition and Results of Operations as presented in our 2013 Annual Report on Form 10-K. For more detailed information regarding the basis of presentation for the following financial information, see the condensed consolidated financial statements and related notes that are contained in Part I, Item 1 of this Quarterly Report on Form 10-Q.
Our discussion and analysis includes the following:
• Executive Summary
Acquisitions and Internal Growth Projects
• Results of Operations
Liquidity and Capital Resources
Off-Balance Sheet Arrangements
Recent Accounting Pronouncements
Critical Accounting Policies and Estimates

Executive	Summary
-----------	---------

Company Overview

We are a Delaware limited partnership formed on July 17, 2013 to own an interest in the general partner and IDRs of PAA, a publicly traded Delaware limited partnership. Although we were formed as a limited partnership, we have elected to be taxed as a corporation for United States federal income tax purposes. As of September 30, 2014, we owned an approximate 22.4% limited partner interest in AAP, a Delaware limited partnership that directly owns all of PAA s IDRs and indirectly owns the 2% general partner interest in PAA. AAP is the sole member of PAA GP, a Delaware limited liability company that directly holds the 2% general partner interest in PAA.

Since we are the managing member of and control GP LLC, which in turn effectively controls PAA, we reflect our ownership in PAA and its subsidiaries on a consolidated basis in accordance with GAAP. Accordingly, our financial results are combined with those of GP LLC and PAA as well as with their subsidiaries. As such, our results of operations as discussed below do not differ materially from the results of operations of PAA.

PAA owns and operates midstream energy infrastructure and provides logistics services for crude oil, NGL, natural gas and refined products. PAA owns an extensive network of pipeline transportation, terminalling, storage and gathering assets in key crude oil and NGL producing basins and transportation corridors and at major market hubs in the United States and Canada.

Overview of Operating Results, Capital Investments and Significant Activities

During the first nine months of 2014, net income was \$958 million, as compared to net income of \$1.070 billion recognized during the first nine months of 2013. These results include total segment profit that was relatively flat between periods, but higher costs as discussed further below.

Our segment profit includes favorable results from our Transportation segment, primarily driven by the continued increase in North American crude oil production and our related, recently completed internal growth projects. These favorable results were offset by less favorable results from our NGL marketing activities in our Supply and Logistics segment, partially offset by a favorable period-over-period impact from the mark-to-market of derivative instruments. Our results were also impacted by decreased margins from our crude oil marketing activities; however, these unfavorable results were primarily attributable to the comparative first-quarter periods, as we experienced more favorable results in the second and third quarters of 2014. In addition, our Facilities and Supply and Logistics segments were negatively impacted by costs incurred in our natural gas storage activities to manage deliverability requirements in conjunction with the severe cold weather experienced during the first quarter of 2014.

Table of Contents

Other significant items during the period were:

- Increased depreciation and amortization expense resulting from internal growth projects completed since September 30, 2013 and accelerated depreciation on certain pipeline assets;
- Increased interest expense resulting from higher average debt outstanding during the 2014 period; and
- Increased income tax expense resulting from higher year over year earnings from taxable Canadian operations.

Acquisitions and Internal Growth Projects

The following table summarizes our capital expenditures for acquisitions, internal growth projects and maintenance capital for the periods indicated (in millions):

	Nine Mon Septem	i
	2014	2013
Acquisition capital	\$ 10	\$ 19
Internal growth projects	1,552	1,253
Maintenance capital	151	124
Total	\$ 1.713	\$ 1,396

Internal Growth Projects

The following table summarizes our more notable projects in progress during 2014 and the forecasted expenditures for the year ending December 31, 2014 (in millions):

Projects	2014
Permian Basin Area Projects	\$425
Cactus Pipeline	350
Rail Terminal Projects (1)	235
Ft. Sask Facility Projects / NGL Line	130
Eagle Ford JV Project	110
Western Oklahoma Extension	80
Mississippian Lime Pipeline	55

White Cliffs Expansion	40
Line 63 Reactivation	35
Natural Gas Storage Expansions	35
Diamond Pipeline	25
St. James Facility Expansions	25
Other Projects	505
	\$2,050
Potential Adjustments for Timing / Scope Refinement (2)	-\$100 + \$100
Total Projected Expansion Capital Expenditures	\$1,950 \$2,150

(1) Includes projects located in or near Bakersfield, CA; Carr, CO; Van Hook, ND; and Kerrobert, Canada.

(2) Potential variation to current capital costs estimates may result from changes to project design, final cost of materials and labor and timing of incurrence of costs due to uncontrollable factors such as permits, regulatory approvals and weather.

Table of Contents

Results of Operations

Analysis of Operating Segments

We manage our operations through three operating segments: (i) Transportation, (ii) Facilities and (iii) Supply and Logistics. Our Chief Operating Decision Maker (our Chief Executive Officer) evaluates such segment performance based on a variety of measures including segment profit, segment volumes, segment profit per barrel and maintenance capital investment. See Note 18 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K for further discussion of how we evaluate segment profit.

The following table sets forth an overview of our consolidated financial results calculated in accordance with GAAP (in millions, except per share data):

		Septem	Months Ended			Favorab (Unfavora Varian	able) ce		Nine Mont Septem		30,		Favorable/ (Unfavorable) Variance

Table of Contents

Transportation Segment

Our Transportation segment operations generally consist of fee-based activities associated with transporting crude oil and NGL on pipelines, gathering systems, trucks and barges. The Transportation segment generates revenue through a combination of tariffs, third-party leases of pipeline capacity and other transportation fees.

The following table sets forth operating results from our Transportation segment for the periods indicated:

	Favorable/													e/
Operating Results (1)	Three Months Ended September 30,				(Unfavoral Varianc]	Nine Mont Septem				(Unfavorable) Variance

Transportation segment total	4,226	3,741	485	13%	4,000	3,662	338	9%	

⁽¹⁾ Revenues and costs and expenses include intersegment amounts.

Tariffs and other fees on our pipeline systems vary by receipt point and delivery point. The segment profit generated by our tariff and other fee-related activities depends on the volumes transported on the pipeline and the level of the tariff and other fees charged as well as the fixed and variable field costs of operating the pipeline. Revenue from our pipeline capacity leases generally reflects a negotiated amount.

⁽²⁾ Field operating costs and Segment general and administrative expenses exclude equity-indexed compensation expense, which is presented separately in the table above.

⁽³⁾ Segment general and administrative expenses reflect direct costs attributable to each segment and an allocation of other expenses to the segments. The proportional allocations by segment require judgment by management and are based on the business activities that exist during each period.

⁽⁴⁾ Volumes associated with assets employed through acquisitions and internal growth projects represent total volumes (attributable to our interest) for the number of days we employed the assets divided by the number of days in the period.

The following is a discussion of items impacting Transportation segment profit and segment profit per barrel for the periods indicated.

Net Operating Revenues and Volumes. As noted in the table above, our total Transportation segment revenues, net of trucking costs, and volumes increased for both the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013. Our Transportation segment results for the comparative periods were impacted by the following:

• North American Crude Oil Production and Related Expansion Projects The increase in North American crude oil production has had a favorable impact on volumes and revenues on our existing pipeline systems and has also provided opportunities for midstream infrastructure development in production growth areas. The resulting increases in volumes for the three and nine months ended September 30, 2014 over the comparable 2013 periods were most notably on our Permian

33

Table of Contents

Basin, Eagle Ford and Mid-Continent Area Systems. We estimate that increased production combined with our recently completed internal growth projects increased revenues by \$20 million and \$70 million for the three and nine months ended September 30, 2014, respectively, compared to the three and nine months ended September 30, 2013.

- Loss Allowance Revenue As is common in the pipeline transportation industry, our tariffs incorporate a loss allowance factor that is intended to offset losses due to evaporation, measurement and other losses in transit. We value the variance of allowance volumes to actual losses at the estimated net realizable value (including the impact of gains and losses from derivative-related activities) at the time the variance occurred and the result is recorded as either an increase or decrease to tariff revenues. The loss allowance revenue increased by \$7 million and \$37 million, respectively, for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 driven primarily by higher volumes.
- Rate Changes Revenues on our pipelines are impacted by various rate changes that may occur during the period. These primarily include the indexing of rates on our FERC regulated pipelines, rate increases or decreases on our intrastate and Canadian pipelines or other negotiated rate changes. We estimate that the net impact of rate changes on our pipelines increased revenues by \$17 million and \$30 million for the three and nine months ended September 30, 2014, respectively, compared to the three and nine months ended September 30, 2013.
- Sale of Refined Products Pipelines We sold certain refined products pipeline systems and related assets in July 2013 and November 2013. As we did not own these assets during the three and nine months ended September 30, 2014, our revenues were lower by \$7 million and \$27 million, respectively, and volumes were lower by 54,000 and 88,000 barrels per day, respectively, as compared to the three and nine months ended September 30, 2013.
- Foreign Exchange Impact Revenues and expenses from our Canadian based subsidiaries, which use the Canadian dollar as their functional currency, are translated at the prevailing average exchange rates for each month. The average CAD to USD exchange rates for the three months ended September 30, 2014 and 2013 were \$1.09 CAD: \$1.00 USD and \$1.04 CAD: \$1.00 USD, respectively. The average CAD to USD exchange rates for the nine months ended September 30, 2014 and 2013 were \$1.09 CAD: \$1.00 USD and \$1.02 CAD: \$1.00 USD, respectively. Therefore, we estimate that revenues from our Canadian pipeline systems and trucking operations were unfavorably impacted by \$5 million and \$20 million for the three and nine months ended September 30, 2014, respectively, compared to the three and nine months ended September 30, 2013 due to the depreciation of the Canadian dollar relative to the U.S. dollar.

Additional noteworthy volume and revenue variances on our pipelines for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 were (i) increased volumes and revenues on our Rangeland, South Saskatchewan and Co-Ed pipelines, as these pipelines were shut down during a portion of the second and third quarters of 2013 due to high river flow rates and flooding in the surrounding area, (ii) incremental volumes and revenues from our Pascagoula, Wascana and Bakken North pipelines, which were placed into service during the second quarter of 2014, (iii) incremental revenues from increased pumpover volumes at our Basin pipeline terminal, (iv) decreased volumes and revenues on our Rainbow pipeline due to (a) lower producer volumes and (b) operational issues during September 2014, (v) higher revenues resulting from a reclassification of certain of our Canadian storage facilities to our Transportation segment during the second quarter of 2014, (vi) increased volumes and revenues on our Line 2000 pipeline for the three-month comparable period due to increased refiner demand for heavy volumes, (vii) increased volumes and revenues on our Capline pipeline for the three-month comparative period due to the timing of a refinery turnaround, which occurred in the third quarter of 2013 and (viii) decreased volumes and revenues on certain of our NGL pipelines due to (a) the discontinuation in the fourth quarter of 2013 of an agreement to transport volumes on a pipeline and (b) the impact of netting joint venture related volumes to our share on a pipeline during 2014, which did not affect revenues.

Field Operating Costs. Field operating costs (excluding equity-indexed compensation expenses) increased during the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 due to (i) a change in classification of certain costs from General and Administrative expenses, (ii) increased asset integrity spending, (iii) higher utility costs associated with increased throughput volumes and (iv) operational issues related to crude oil contamination. The increase in field operating costs was not as pronounced for the comparative nine-month periods due to higher environmental remediation costs in 2013.

General and Administrative Expenses. General and administrative expenses (excluding equity-indexed compensation expenses) decreased during the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 primarily due to a change in classification of certain costs to Field Operating Costs.

Table of Contents

Maintenance Capital. Maintenance capital consists of capital expenditures for the replacement of partially or fully depreciated assets in order to maintain the operating and/or earnings capacity of our existing assets. The increase in maintenance capital for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 is primarily due to increased investments on integrity-related projects.

Equity-Indexed Compensation Expense. On a consolidated basis across all segments, equity-indexed compensation expense increased for the three months ended September 30, 2014 compared to the same period in 2013, primarily due to a smaller impact of the decrease in PAA unit price during the period compared to the impact of the decrease in PAA unit price for the same period in 2013. Consolidated equity-indexed compensation expense decreased for the nine months ended September 30, 2014 compared to the same period in 2013, primarily due to a less significant impact of the increase in PAA unit price during the nine months ended September 30, 2014 compared to the same period in 2013.

Allocations of equity-indexed compensation expense vary over time (i) between field operating costs and general and administrative expenses and (ii) between segments and could result in variances in those expense categories or segments that differ from the consolidated variance explanations above. See Note 15 to our Consolidated Financial Statements included in Part IV of our 2013 Annual Report on Form 10-K for additional information regarding our equity-indexed compensation plans.

Equity Earnings in Unconsolidated Entities. The favorable variance in equity earnings in unconsolidated entities for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 was largely due to increased throughput on the Eagle Ford joint venture pipeline as a result of increased production, as discussed above, and increased throughput on the White Cliffs pipeline due to an expansion of the pipeline that was placed into service in July 2014.

Facilities Segment

Our Facilities segment operations generally consist of fee-based activities associated with providing storage, terminalling and throughput services for crude oil, refined products, NGL and natural gas, as well as NGL fractionation and isomerization services and natural gas and condensate processing services. The Facilities segment generates revenue through a combination of month-to-month and multi-year agreements and processing arrangements.

The following table sets forth operating results from our Facilities segment for the periods indicated:

Operating Results (1)	Tł	Three Months Ended September 30, Favorable/ (Unfavorable) Variance							Nine Mon Septem	 	Favorable/ (Unfavorable) Variance

- (2) Effective January 1, 2014, our natural gas sales and costs, primarily attributable to the activities performed by our natural gas storage commercial optimization group, are reported in the Supply and Logistics segment.
- (3) Field operating costs and Segment general and administrative expenses exclude equity-indexed compensation expense, which is presented separately in the table above.
- (4) Segment general and administrative expenses reflect direct costs attributable to each segment and an allocation of other expenses to the segments. The proportional allocations by segment require judgment by management and are based on the business activities that exist during each period.
- Volumes associated with assets employed through acquisitions and internal growth projects represent total volumes for the number of months we employed the assets divided by the number of months in the period.
- (6) Facilities segment total is calculated as the sum of: (i) crude oil, refined products and NGL terminalling and storage capacity; (ii) rail load and unload volumes multiplied by the number of days in the period and divided by the number of months in the period; (iii) natural gas storage working capacity divided by 6 to account for the 6:1 mcf of gas to crude Btu equivalent ratio and further divided by 1,000 to convert to monthly volumes in millions; and (iv) NGL fractionation volumes multiplied by the number of days in the period and

divided by the number of months in the period.

The following is a discussion of items impacting Facilities segment profit and segment profit per barrel for the periods indicated.

Net Operating Revenues and Volumes. As noted in the table above, our Facilities segment revenues, less storage related costs, increased during the three and nine months ended September 30, 2014 as compared to the same periods of 2013. Total Facilities segment volumes were relatively consistent over the periods presented. Variances between the comparative periods were driven by:

• NGL Fractionation, NGL Storage and Natural Gas Processing Activities Increased net revenues from our NGL fractionation and storage and natural gas processing activities of \$11 million and \$33 million, respectively, for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013, were largely driven by higher facility fee revenues due to rate increases at certain of our storage and fractionation facilities, which more than offset the impact of lower fractionation volumes during the 2014 periods.

These increases in NGL revenues include estimated unfavorable foreign currency impacts of \$3 million and \$13 million for the three and nine months ended September 30, 2014, respectively, as compared to the three and nine months ended September 30, 2013 due to the depreciation of the Canadian dollar relative to the U.S. dollar. The average CAD to USD exchange rates for the three months ended September 30, 2014 and 2013 were \$1.00 USD and \$1.04 CAD: \$1.00 USD, respectively. The average CAD to USD exchange rates for the nine months ended September 30, 2014 and 2013 were \$1.09 CAD: \$1.00 USD and \$1.02 CAD: \$1.00 USD, respectively.

Table of Contents

- Rail Terminals Revenues from rail load and unload activities increased by \$3 million and \$5 million for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. These increases were due to new rail terminals that came on line in the fourth quarter of 2013, partially offset by the unfavorable impact of rail delays and lower volumes at certain of our existing rail terminals during the comparative 2014 periods. The nine-month 2014 period was further unfavorably impacted by weather-related issues at certain of our terminals during the first quarter of 2014.
- Condensate Processing Activities Increased revenues from our condensate processing activities of \$2 million and \$7 million for the three and nine months ended September 30, 2014, respectively, compared to the three and nine months ended September 30, 2013 were largely driven by the start-up and subsequent expansion of our Eagle Ford processing facility.
- Crude Oil Storage Revenues from our crude oil storage activities increased by \$3 million and \$4 million, respectively, for the three and nine months ended September 30, 2013, primarily due to an expansion at our St. James terminal and increased throughput at our Cushing and Yorktown terminals. However, such results were partially offset by lower net revenues from certain storage facilities in California and the East Coast due to decreased demand, as well as the reclassification of certain of our Canadian storage facilities to our Transportation segment during the second quarter of 2014.
- Natural Gas Storage Operations Net revenues from our natural gas storage operations decreased by approximately \$5 million and \$26 million during the three and nine month 2014 periods, respectively, primarily due to less favorable storage rates on contracts that renewed or replaced expiring contracts. The nine-month 2014 period was further unfavorably impacted by costs incurred in our natural gas storage activities to manage deliverability requirements in conjunction with the extended period of severe cold weather experienced during the first quarter of 2014

Field Operating Costs. Field operating costs (excluding equity-indexed compensation expenses) increased during the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 due to (i) increased costs for rail facilities which came on line in the fourth quarter of 2013, (ii) a change in classification of certain costs from General and Administrative expenses and (iii) an increase in costs associated with our NGL storage caverns. Higher gas and electricity utility prices in the first and second quarters of 2014 also contributed to an increase in costs for the comparative nine-month periods.

General and Administrative Expenses. General and administrative expenses (excluding equity-indexed compensation expenses) remained relatively consistent for the three months ended September 30, 2014 compared to the three months ended September 30, 2013 and decreased slightly during the comparative nine-month periods. These results reflect the net impact of a decrease in General and Administrative expenses due to a change in classification of certain costs to Field Operating Costs during the 2014 periods partially offset by increased expenses resulting from overall growth in the segment.

Maintenance Capital. The increase in maintenance capital for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 is primarily due to timing of maintenance projects for tanks and other facility assets.

Our revenues from supply and logistics activities reflect the sale of gathered and bulk-purchased crude oil, as well as sales of NGL volumes purchased from suppliers and natural gas sales attributable to the activities performed by our natural gas storage commercial optimization group. We do not anticipate that future changes in revenues resulting from variances in commodity prices will be a primary driver of segment profit. Generally, we expect our segment profit to increase or decrease directionally with (i) increases or decreases in our Supply and Logistics segment volumes (which consist of lease gathering crude oil purchase volumes, NGL sales volumes and waterborne cargos), (ii) demand for lease gathering services we provide producers and (iii) the overall volatility and strength or weakness of market conditions and the allocation of our assets among our various risk management strategies. In addition, the execution of our risk management strategies in conjunction with our assets can provide upside in certain markets.

Table of Contents

The following table sets forth operating results from our Supply and Logistics segment for the periods indicated:

Operating Results (1) (2)	Three Months Ended September 30,			Favorab (Unfavora Varian	Nine Mon Septem		Favorable/ (Unfavorable) Variance			
(in millions, except per barrel data)	2014		2013	\$	%		2014	2013	\$	%

⁽¹⁾ Revenues and costs include intersegment amounts.

⁽²⁾ Prior to January 1, 2014, natural gas sales revenues and costs attributable to the activities performed by our natural gas storage commercial optimization group were reported in the Facilities segment.

⁽³⁾ Purchases and related costs include interest expense (related to hedged inventory purchases) of \$4 million and \$11 million for the three and nine months ended September 30, 2014 and \$8 million and \$21 million for the three and nine months ended September 30, 2013, respectively.

⁽⁴⁾ Field operating costs and Segment general and administrative expenses exclude equity-indexed compensation expense, which is presented separately in the table above.

⁽⁵⁾ Segment general and administrative expenses reflect direct costs attributable to each segment and an allocation of other expenses to the segments. The proportional allocations by segment require judgment by management and are based on the business activities

that exist during each period.

The following table presents the range of the NYMEX West Texas Intermediate benchmark price of crude oil during the three and nine months ended September 30, 2014 and 2013.

		NYMEX WTI Crude Oil Price							
	Lov	v		High					
Three months ended September 30, 2014	\$	90	\$		106				
Three months ended September 30, 2013	\$	96	\$		112				
Nine months ended September 30, 2014	\$	90	\$		108				
Nine months ended September 30, 2013	\$	86	\$		112				

Table of Contents

Because the commodities that we buy and sell are generally indexed to the same pricing indices for both the sales and purchases, revenues and costs related to purchases will fluctuate with market prices. However, the margins related to those sales and purchases will not necessarily have a corresponding increase or decrease. The absolute amount of our revenues and purchases increased for the three and nine months ended September 30, 2014 relative to the comparative periods, primarily resulting from increases in crude oil volumes in 2014, partially offset by decreases in crude oil prices relative to the comparative three-month period.

Generally, we expect a base level of earnings from our Supply and Logistics segment from the assets employed by this segment. This base level may be optimized and enhanced when there is a high level of market volatility, favorable basis differentials and/or a steep contango or backwardated market structure. Also, our NGL marketing operations are sensitive to weather-related demand, particularly during the approximate five-month peak heating season of November through March, and temperature differences from period-to-period may have a significant effect on NGL demand and thus our financial performance.

The following is a discussion of items impacting Supply and Logistics segment profit and segment profit per barrel for the periods indicated.

Net Operating Revenues and Volumes. Our Supply and Logistics segment revenues, net of purchases and related costs, excluding gains and losses from certain derivative activities (see the Impact from Certain Derivative Activities section below), increased slightly for the three months ended September 30, 2014 compared to the three months ended September 30, 2013, while such results decreased year-over-year for the nine month comparative periods presented. The following factors impacted revenues and volumes in the comparative periods:

- NGL Marketing Operations Net revenues from our NGL marketing operations decreased during the three and nine months ended September 30, 2014 as compared to the three and nine months ended September 30, 2013. This decrease was driven by higher purchases and related costs in the 2014 periods, primarily due to (i) a higher weighted average inventory cost and (ii) increased facility fees. Additionally, NGL margins during the nine-month 2014 period were further impacted by less favorable market conditions, most notably during the second quarter of 2014, as market pricing was stronger in 2013 due to heating requirements during a winter season that extended into the second quarter and greater petrochemical demand for propane.
- North American Crude Oil Production and Related Market Economics The significant increase in oil and liquids-rich gas production growth in North America has generally created regional supply and demand imbalances due to the lack of sufficient infrastructure to support the movement of such production, which increased certain crude oil location differentials. The lack of existing pipeline takeaway capacity and associated logistical challenges created market conditions that provided opportunities to capture above-baseline margins in our supply and logistics crude oil activities over the last few years.

For the nine months ended September 30, 2014 compared to the nine months ended September 30, 2013, net revenues from our crude oil supply and logistics activities decreased, as there were fewer opportunities to capture above-baseline margins, particularly in the first quarter of 2014 compared to the first quarter of 2013. However, the widening of certain differentials in the third quarter of 2014 allowed for more opportunities to capture above-baseline margins as compared to the third quarter of 2013, which led to an increase in net revenues from our crude oil supply and logistics activities for the three months ended September 30, 2014 compared to the three months ended September 30, 2013.

We believe the fundamentals of our business remain strong as lease-gathered volumes for the three and nine month periods ended September 30, 2014 increased by 13% and 9%, respectively, as compared to volumes in the same three and nine month periods in 2013. However, as the midstream infrastructure continues to be developed, we believe a normalization of margins will continue to occur as the logistics challenges are addressed. (See Items 1 and 2 Business and Properties Description of Segments and Associated Assets Supply and Logistics Segment Impact of Commodity Price Volatility and Dynamic Market Conditions on Our Business Model included in Part I of our 2013 Annual Report on Form 10-K for further discussion regarding our business model, including diversification and utilization of our asset base among varying demand- and supply-driven markets.)

• Natural Gas Storage Commercial Optimization Our natural gas storage commercial optimization activities for the nine months ended September 30, 2014 were unfavorably impacted by costs incurred to manage deliverability requirements in conjunction with the extended period of severe cold weather experienced during the first quarter of 2014.

Table of Contents

Impact from Certain Derivative Activities. The mark-to-market valuation of certain of our derivative activities impacted our net revenues as shown in the table below (in millions):

	Three Months Ended September 30,					Nine Months Ended September 30,				
	20)14	2013	Vai	riance	2	2014	2013	Va	riance
Gains/(losses) from certain derivative										
activities (1)	\$	29	\$	(57) \$	86	\$	81	\$	(6) \$	87

⁽¹⁾ Includes mark-to-market and other gains and losses resulting from certain derivative instruments that are related to underlying activities in future periods or the reversal of mark-to-market gains and losses from the prior period. These amounts are reduced by the net impact of inventory valuation adjustments attributable to inventory hedged by the related derivative and gains recognized in later periods on physical sales of inventory that was previously written down. See Note 10 to our condensed consolidated financial statements for a comprehensive discussion regarding our derivatives and risk management activities.

Field Operating Costs. The increase in field operating costs (excluding equity-indexed compensation expenses) for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 was primarily due to an increase in trucking costs associated with higher crude oil lease gathered volumes. However, the increase in field operating costs for the comparative nine-month periods was partially offset by a decrease in third-party transportation costs in the first quarter of 2014 as compared to the first quarter of 2013.

Maintenance Capital. The decrease in maintenance capital for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 is primarily due to reduced spending on trucking assets.

Other Income and Expenses

Depreciation and Amortization

The increase in depreciation and amortization expense for the three and nine months ended September 30, 2014 over the three and nine months ended September 30, 2013 was primarily due to various internal growth projects completed throughout 2013 and 2014, as well as an acceleration of depreciation on certain pipeline assets to reflect a change in their estimated useful lives.

Interest Expense

The increase in interest expense for the three and nine months ended September 30, 2014 over the three and nine months ended September 30, 2013 resulted from higher average debt outstanding during the 2014 periods, primarily due to (i) PAA s August 2013 issuance of \$700 million,

3.85% senior notes, (ii) PAA s April 2014 issuance of \$700 million, 4.70% senior notes and (iii) PAA s September 2014 issuance of \$750 million, 3.60% senior notes, partially offset by the maturity of PAA s \$250 million, 5.63% senior notes in December 2013.

Other Income/(Expense), Net

Other income/(expense), net in each of the periods presented was primarily comprised of foreign currency gains or losses related to revaluations of CAD-denominated interest receivables associated with our intercompany notes and the impact of related foreign currency hedges.

Income Tax Expense

The increase in income tax expense for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013 was primarily due to the tax expense of the amortization of the deferred tax asset created in connection with our IPO, as well as an increase in PAA s income tax expense, primarily resulting from higher year over year earnings from taxable Canadian operations.

40

Table of Contents

Liquidity and Capital Resources

General

On a consolidated basis, our primary sources of liquidity are (i) cash flow from operating activities, (ii) borrowings under the PAA commercial paper program or the credit facilities and (iii) funds received from PAA s sales of equity and debt securities. Our primary cash requirements include, but are not limited to, (i) ordinary course of business uses, such as the payment of amounts related to the purchase of crude oil, NGL and other products and other expenses and interest payments on outstanding debt, (ii) expansion and maintenance activities, (iii) acquisitions of assets or businesses, (iv) repayment of principal on long-term debt and (v) distributions to our Class A shareholders and noncontrolling interests. We generally expect to fund our short-term cash requirements through cash flow generated from operating activities and/or borrowings under the PAA commercial paper program or the credit facilities. In addition, we generally expect to fund long-term needs, such as those resulting from expansion activities or acquisitions and refinancing long-term debt, through a variety of sources (either separately or in combination), which may include the sources mentioned above as funding for short-term needs and/or the issuance of additional PAA equity or debt securities. As of September 30, 2014, we had a working capital deficit of \$408 million and approximately \$2.6 billion of liquidity available to meet our ongoing operating, investing and financing needs as noted below (in millions):

	Septer	As of mber 30, 2014
Availability under PAA senior unsecured revolving credit facility (1)	\$	1,591
Availability under PAA senior secured hedged inventory facility (1)		1,343
Less: Amounts outstanding under PAA commercial paper program		(423)
Subtotal		2,511
Availability under AAP senior secured revolving credit facility		44
Cash and cash equivalents		35
Total	\$	2,590

⁽¹⁾ Represents availability prior to giving effect to amounts outstanding under the PAA commercial paper program. Borrowings under the PAA commercial paper program reduce available capacity under the facility.

We believe that we have, and will continue to have, the ability to access the PAA commercial paper program and credit facilities, which we use to meet our short-term cash needs. We believe that our financial position remains strong and we have sufficient liquidity; however, extended disruptions in the financial markets and/or energy price volatility that adversely affect our business may have a materially adverse effect on our financial condition, results of operations or cash flows. Also, see Risk Factors in Item 1A of our 2013 Annual Report on Form 10-K for further discussion regarding risks that may impact our liquidity and capital resources. Usage of the PAA credit facilities, which provide the backstop for the PAA commercial paper program, and the AAP credit facility is subject to ongoing compliance with covenants. As of September 30, 2014, PAA and AAP were in compliance with all such covenants.

Cash Flow from Operating Activities

For a comprehensive discussion of the primary drivers of cash flow from operating activities, including the impact of varying market conditions and the timing of settlement of our derivative activities, see Liquidity and Capital Resources-Cash Flow from Operating Activities under Item 7 of our 2013 Annual Report on Form 10-K.

Net cash provided by operating activities for the first nine months of 2014 was approximately \$1.3 billion, primarily resulting from earnings from our operations. Net cash provided by operating activities for the first nine months of 2013 of approximately \$1.6 billion also resulted primarily from earnings from our operations. In addition, we decreased the amount of our inventory during the first nine months of 2013, primarily due to the sale of crude oil inventory that had been stored during the contango market. This decrease in crude oil inventory was partially offset by an increase in NGL inventory as we began to increase inventory levels in preparation for end users increased demand for product used for heating during the peak heating season of November through March. The net proceeds received from liquidation of our crude oil inventory during this period was used to repay borrowings under credit facilities or the PAA commercial paper program and favorably impacted our cash flow from operating activities.

Table of Contents

Acquisitions and Capital Expenditures

In addition to operating needs discussed above, we also use cash for acquisition activities and internal growth projects. We have made and will continue to make capital expenditures for acquisitions, expansion capital and maintenance capital.

2014 Capital Expansion Projects. See Acquisitions and Internal Growth Projects for detail of our projected capital expenditures for the year ending December 31, 2014. We expect the majority of funding for our remaining 2014 capital program will continue to be provided by borrowings under the PAA commercial paper program, the credit facilities and cash flow in excess of partnership distributions, as well as through our access to the capital markets for equity and debt as we deem necessary.

Acquisitions. The price of acquisitions includes cash paid, assumed liabilities and net working capital items. Because of the non-cash items included in the total price of the acquisition and the timing of certain cash payments, the net cash paid may differ significantly from the total price of the acquisitions completed during the period. Historically, we have financed acquisitions primarily with cash generated from operating activities and the financing activities discussed below.

As of November 5, 2014, PAA entered into a definitive purchase and sale agreement with Oxy that provides for PAA s purchase of Oxy s 50% interest in BridgeTex for \$1.075 billion. See Note 14 to our condensed consolidated financial statements for details of this potential acquisition, including discussion of conditions precedent to closing. PAA intends to initially use borrowings under the PAA commercial paper program to fund this acquisition. On a long-term basis, PAA intends to follow its financial strategy by funding at least 55% of the acquisition with equity and cash flow in excess of distributions and the remaining amount with long-term debt.

Equity and Debt Financing Activities

On a consolidated basis, our financing activities primarily relate to funding acquisitions, internal capital expansion projects and refinancing our debt maturities, as well as short-term working capital and hedged inventory borrowings related to our NGL business and contango market activities. Our financing activities have primarily consisted of PAA equity offerings, PAA senior notes offerings and borrowings and repayments under the PAA commercial paper program or credit facilities, as well as payments to our Class A shareholders and noncontrolling interests.

PAA Registration Statements. PAA periodically accesses the capital markets for both equity and debt financing. PAA has filed with the SEC a universal shelf registration statement that, subject to effectiveness at the time of use, allows PAA to issue up to an aggregate of \$2.0 billion of debt or equity securities (Traditional Shelf). All issuances of equity securities associated with PAA s continuous offering program, as discussed further below, have been issued pursuant to the Traditional Shelf. At September 30, 2014, PAA had approximately \$809 million of unsold securities available under the Traditional Shelf. PAA also has access to a universal shelf registration statement (WKSI Shelf), which provides it with the ability to offer and sell an unlimited amount of debt and equity securities via an underwritten offering, subject to market conditions and capital needs.

PAA Continuous Offering Program. In August 2014, PAA entered into an equity distribution agreement with several financial institutions pursuant to which PAA may offer and sell, through sales agents, common units representing limited partner interests having an aggregate offering price of up to \$900 million. During the nine months ended September 30, 2014, PAA issued an aggregate of approximately 11.8 million common units under its continuous offering program, generating net proceeds of \$655 million. The net proceeds from sales were used for general partnership purposes.

Credit Agreements, Commercial Paper Program and Indentures. The PAA credit agreements (which impact the ability to access the PAA commercial paper program because they provide the backstop that supports PAA s short-term credit ratings), the AAP credit agreement and the indentures governing PAA s senior notes contain cross-default provisions. A default under the credit agreements would permit the lenders to accelerate the maturity of the outstanding debt. As long as PAA and AAP are in compliance with the provisions in the credit agreements, their ability to make distributions of available cash is not restricted. PAA and AAP were in compliance with the covenants contained in the credit agreements and indentures as of September 30, 2014.

On a consolidated basis, during the nine months ended September 30, 2014 and 2013, we had net repayments on the credit agreements and PAA commercial paper program of \$667 million and \$163 million, respectively. The net repayments during both periods resulted primarily from cash flow from operating activities, as well as cash received from PAA s debt and equity activities.

In August 2014, PAA extended the maturity dates of its senior secured hedged inventory facility and senior unsecured revolving credit facility by one year through the exercise of the option included in the current credit agreements. The PAA senior secured hedged inventory facility and the PAA senior unsecured revolving credit facility now mature in August 2017 and August 2019, respectively.

Table of Contents

In September 2014, AAP extended the maturity dates of its term loan and senior secured revolving credit facility by one year through the exercise of the option included in the current credit agreement. The AAP term loan and AAP senior secured revolving credit facility now mature in September 2019.

Effective October 20, 2014, the maximum aggregate borrowing capacity under the PAA commercial paper program was increased from \$1.5 billion to \$3.0 billion.

In April 2014, PAA completed the issuance of \$700 million, 4.70% senior notes due 2044 at a public offering price of 99.734%. Interest payments are due on June 15 and December 15 of each year, commencing on December 15, 2014. The net proceeds from this offering of \$691 million, after deducting the underwriting discount and offering expenses, were used to repay outstanding borrowings under the PAA commercial paper program and for general partnership purposes.

In September 2014, PAA completed the issuance of \$750 million, 3.60% senior notes due 2024 at a public offering price of 99.842%. Interest payments are due on May 1 and November 1 of each year, commencing on May 1, 2015. The net proceeds from this offering of \$743 million, after deducting the underwriting discount and offering expenses, was used to repay outstanding borrowings under the PAA commercial paper program and for general partnership purposes.

PAA s \$150 million, 5.25% senior notes will mature in June 2015, and PAA s \$400 million, 3.95% senior notes will mature in September 2015. Borrowings under the PAA commercial paper program are intended to be used to repay these senior notes when they mature.

Distributions Paid to Our Class A Shareholders and Noncontrolling Interests

Distributions to our Class A shareholders. We distribute 100% of our available cash within 55 days after the end of each quarter to Class A shareholders of record. Available cash is generally defined as all of our cash and cash equivalents on hand at the end of each quarter less reserves established in the discretion of our general partner for future requirements. On November 14, 2014, we will pay a distribution of \$0.19075 per Class A share. See Note 8 to our condensed consolidated financial statements for details of distributions paid. Also, see Item 5.

Market for Registrant s Shares, Related Shareholder Matters and Issuer Purchases of Equity Securities-Cash Distribution Policy included in our 2013 Annual Report on Form 10-K for additional discussion on distributions.

Distributions to noncontrolling interests. Distributions to noncontrolling interests represent amounts paid on interests in consolidated entities that are not owned by us. During the nine months ended September 30, 2014 and 2013 we paid distributions of approximately \$959 million and \$1.2 billion, respectively, to noncontrolling interests.

We believe that we have sufficient liquid assets, cash flow from operating activities and borrowing capacity under credit agreements to meet our financial commitments, debt service obligations, contingencies and anticipated capital expenditures. We are, however, subject to business and operational risks that could adversely affect our cash flow. A prolonged material decrease in our cash flows would likely produce an adverse effect on our borrowing capacity.

Contingencies

For a discussion of contingencies that may impact us, see Note 11 to our condensed consolidated financial statements.

Commitments

Contractual Obligations. In the ordinary course of doing business, we purchase crude oil and NGL from third parties under contracts, the majority of which range in term from thirty-day evergreen to five years with a limited number of contracts extending up to approximately ten years. We establish a margin for these purchases by entering into various types of physical and financial sale and exchange transactions through which we seek to maintain a position that is substantially balanced between purchases on the one hand and sales and future delivery obligations on the other. In addition, we enter into similar contractual obligations in conjunction with our natural gas operations. The table below includes purchase obligations related to these activities. Where applicable, the amounts presented represent the net obligations associated with our counterparties (including giving effect to netting buy/sell contracts and those subject to a net settlement arrangement). We do not expect to use a significant amount of internal capital to meet these obligations, as the obligations will be funded by corresponding sales to entities that we deem creditworthy or who have provided credit support we consider adequate.

Table of Contents

The following table includes our best estimate of the amount and timing of these payments as well as others due under the specified contractual obligations as of September 30, 2014 (in millions):

	Remainder	of					2019 and	
	2014		2015	2016	2017	2018	Thereafter	Total
Long-term debt, including								
current maturities and related								
interest payments (1)	\$	105 \$	963 \$	569 \$	765 \$	938 \$	10,336 \$	13,676
Leases (2)		41	148	140	116	93	419	957
Other obligations (3)		79	127	93	64	45	213	621
Subtotal		225	1,238	802	945	1,076	10,968	15,254
Crude oil, natural gas, NGL								
and other purchases (4)		4,360	7,584	6,497	4,987	2,909	8,215	34,552
Total	\$	4,585 \$	8,822 \$	7,299 \$	5,932 \$	3,985 \$	19,183 \$	49,806

Includes debt service payments, interest payments due on PAA s senior notes, interest payments on long-term borrowings outstanding under the AAP credit agreement and the commitment fee on assumed available capacity under the PAA revolving credit facilities. Although there may be short-term borrowings under the PAA revolving credit facilities and the PAA commercial paper program, we historically repay and borrow at varying amounts. As such, we have included only the maximum commitment fee (as if no short-term borrowings were outstanding on the facilities or the PAA commercial paper program) in the amounts above.

(2) Leases are primarily for (i) surface rentals, (ii) office rent, (iii) pipeline assets and (iv) trucks, trailers and railcars.

(3) Includes (i) other long-term liabilities, (ii) storage, processing and transportation agreements and (iii) commitments related to capital expansion projects, including projected contributions for our share of the capital spending of our equity-method investments. Excludes a non-current liability of \$2 million related to derivative activity included in Crude oil, natural gas, NGL and other purchases.

(4) Amounts are primarily based on estimated volumes and market prices based on average activity during September 2014. The actual physical volume purchased and actual settlement prices will vary from the assumptions used in the table. Uncertainties involved in these estimates include levels of production at the wellhead, weather conditions, changes in market prices and other conditions beyond our control.

Letters of Credit. In connection with supply and logistics activities, we provide certain suppliers with irrevocable standby letters of credit to secure our obligation for the purchase of crude oil, NGL and natural gas. Additionally, we issue letters of credit to support insurance programs and construction activities. At September 30, 2014 and December 31, 2013, we had outstanding letters of credit of \$66 million and \$41 million, respectively.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements as defined by Item 303 of Regulation S-K.		
Recent Accounting Pronouncements

FORWARD-LOOKING STATEMENTS

All statements included in this report, other than statements of historical fact, are forward-looking statements, including but not limited to statements incorporating the words anticipate, believe, estimate, expect, plan, intend and forecast, as well as similar expressions and st regarding our business strategy, plans and objectives for future operations. The absence of such words, expressions or statements, however, does not mean that the statements are not forward-looking. Any such forward-looking statements reflect our current views with respect to future events, based on what we believe to be reasonable assumptions. Certain factors could cause actual results or outcomes to differ materially from the results or outcomes anticipated in the forward-looking statements. The most important of these factors include but are not limited to:

the results of	outcomes anticipated in the forward-looking statements. The most important of these factors include, but are not immed to.
• 01	ur ability to pay distributions to our Class A shareholders;
• 01	ur expected receipt of, and amounts of, distributions from AAP;
• fa	ailure to implement or capitalize, or delays in implementing or capitalizing, on planned internal growth projects;
• ui	nanticipated changes in crude oil market structure, grade differentials and volatility (or lack thereof);
• ei	nvironmental liabilities or events that are not covered by an indemnity, insurance or existing reserves;
or through th	eclines in the volume of crude oil, refined product and NGL shipped, processed, purchased, stored, fractionated and/or gathered at the use of our facilities, whether due to declines in production from existing oil and gas reserves, failure to develop or slowdown in ment of additional oil and gas reserves or other factors;
	luctuations in refinery capacity in areas supplied by our mainlines and other factors affecting demand for various grades of crude oil, ucts and natural gas and resulting changes in pricing conditions or transportation throughput requirements;
• th	ne occurrence of a natural disaster, catastrophe, terrorist attack or other event, including attacks on our electronic and computer

weather interference with business operations or project construction, including the impact of extreme weather events or conditions;

•	tightened capital markets or other factors that increase our cost of capital or limit our access to capital;
•	maintenance of PAA s credit rating and ability to receive open credit from our suppliers and trade counterparties;
• which we	continued creditworthiness of, and performance by, our counterparties, including financial institutions and trading companies with do business;
•	the currency exchange rate of the Canadian dollar;
•	the availability of, and our ability to consummate, acquisition or combination opportunities;
• business th	the successful integration and future performance of acquired assets or businesses and the risks associated with operating in lines of nat are distinct and separate from our historical operations;
•	shortages or cost increases of supplies, materials or labor;
•	the effectiveness of our risk management activities;
• requireme	our ability to obtain debt or equity financing on satisfactory terms to fund additional acquisitions, expansion projects, working capita and the repayment or refinancing of indebtedness;
• interpretat	the impact of current and future laws, rulings, governmental regulations, accounting standards and statements, and related ions;
•	non-utilization of our assets and facilities;
	45

Table of Contents

•	the effects of competition;
•	increased costs or lack of availability of insurance;
• plans;	fluctuations in the debt and equity markets, including the price of PAA s units at the time of vesting under its long-term incentive
• customers	risks related to the development and operation of our facilities, including our ability to satisfy our contractual obligations to our at our facilities;
•	factors affecting demand for natural gas and natural gas storage services and rates;
• constraints	general economic, market or business conditions and the amplification of other risks caused by volatile financial markets, capital and pervasive liquidity concerns; and
• well as in t	other factors and uncertainties inherent in the transportation, storage, terminalling and marketing of crude oil and refined products, as the storage of natural gas and the processing, transportation, fractionation, storage and marketing of natural gas liquids.
Please read	ors described herein, as well as factors that are unknown or unpredictable, could also have a material adverse effect on future results. Risk Factors discussed in Item 1A of our 2013 Annual Report on Form 10-K. Except as required by applicable securities laws, we not to update these forward-looking statements and information.
Item 3. Q	UANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to various market risks, including (i) commodity price risk, (ii) interest rate risk and (iii) currency exchange rate risk. We use various derivative instruments to manage such risks and, in certain circumstances, to realize incremental margin during volatile market

through a formal process. The following discussion addresses each category of risk.

conditions. Our risk management policies and procedures are designed to help ensure that our hedging activities address our risks by monitoring our exchange-cleared and over-the-counter positions, as well as physical volumes, grades, locations, delivery schedules and storage capacity. We have a risk management function that has direct responsibility and authority for our risk policies, related controls around commercial activities and certain aspects of corporate risk management. Our risk management function also approves all new risk management strategies

Commodity Price Risk

We use derivative instruments to hedge commodity price risk associated with the following commodities:

• Crude oil and refined products

We utilize crude oil and refined products derivatives to hedge commodity price risk inherent in our Supply and Logistics and Transportation segments. Our objectives for these derivatives include hedging anticipated purchases and sales, stored inventory, and storage capacity utilization. We manage these exposures with various instruments including exchange-traded and over-the-counter futures, forwards, swaps and options.

• <u>Natural gas</u>

We utilize natural gas derivatives to hedge commodity price risk inherent in our Supply and Logistics and Facilities segments. Our objectives for these derivatives include hedging anticipated purchases and sales and managing our anticipated base gas requirements. We manage these exposures with various instruments including exchange-traded futures, swaps and options.

• <u>NGL</u>

We utilize NGL derivatives, primarily butane and propane derivatives, to hedge commodity price risk inherent in our Supply and Logistics segment. Our objectives for these derivatives include hedging anticipated purchases and sales. We manage these exposures with various instruments including exchange-traded and over-the-counter futures, forwards, swaps and options.

46

Table of Contents

See Note 10 to our condensed consolidated financial statements for further discussion regarding our hedging strategies and objectives.

Our policy is to (i) purchase only product for which we have a market, (ii) hedge our purchase and sales contracts so that price fluctuations do not materially affect our operating income and (iii) not acquire and hold physical inventory or other derivative instruments for the purpose of speculating on outright commodity price changes, as these activities could expose us to significant losses.

The fair value of our commodity derivatives and the change in fair value as of September 30, 2014 that would be expected from a 10% price increase or decrease is shown in the table below (in millions):

	Fair Value	Effect of 10% Price Increase	Effect of 10% Price Decrease
Crude oil and related products	\$ 7	\$ 32	\$ (27)
Natural gas	(2)	\$ 1	\$ (1)
NGL and other	26	\$ (69)	\$ 69
Total fair value	\$ 31		

The fair values presented in the table above reflect the sensitivity of the derivative instruments only and do not include the effect of the underlying hedged commodity. Price-risk sensitivities were calculated by assuming an across-the-board 10% increase or decrease in price regardless of term or historical relationships between the contractual price of the instruments and the underlying commodity price. In the event of an actual 10% change in near-term commodity prices, the fair value of our derivative portfolio would typically change less than that shown in the table as changes in near-term prices are not typically mirrored in delivery months further out.

Interest Rate Risk

Our use of variable rate debt and any forecasted issuances of fixed rate debt expose us to interest rate risk. Therefore, from time to time we use interest rate derivatives to hedge interest rate risk associated with anticipated debt issuances and, in certain cases, outstanding debt instruments. All of our senior notes are fixed rate notes and thus are not subject to interest rate risk. The majority of our variable rate debt at September 30, 2014, \$954 million, is subject to interest rate re-sets, which range from one week to three months. The average interest rate of approximately 0.9% is based upon rates in effect during the nine months ended September 30, 2014. The fair value of our interest rate derivatives is a liability of \$15 million as of September 30, 2014. A 10% increase in the forward LIBOR curve as of September 30, 2014 would result in an increase of \$17 million to the fair value of our interest rate derivatives. A 10% decrease in the forward LIBOR curve as of September 30, 2014 would result in a decrease of \$17 million to the fair value of our interest rate derivatives. See Note 10 to our condensed consolidated financial statements for a discussion of our interest rate risk hedging activities.

Currency Exchange Rate Risk

We use foreign currency derivatives to hedge foreign currency exchange rate risk associated with our exposure to fluctuations in the USD-to-CAD exchange rate. Because a significant portion of our Canadian business is conducted in CAD and, at times, a portion of our debt is

denominated in CAD, we use certain financial instruments to minimize the risks of unfavorable changes in exchange rates. These instruments include foreign currency exchange contracts, forwards and options. The fair value of our foreign currency derivatives is a liability of \$10 million as of September 30, 2014. A 10% increase in the exchange rate (USD-to-CAD) would result in a decrease of \$41 million to the fair value of our foreign currency derivatives. A 10% decrease in the exchange rate (USD-to-CAD) would result in an increase of \$42 million to the fair value of our foreign currency derivatives. See Note 10 to our condensed consolidated financial statements for a discussion of our currency exchange rate risk hedging.

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain written disclosure controls and procedures, which we refer to as our DCP. Our DCP is designed to ensure that information required to be disclosed by us in reports that we file under the Securities Exchange Act of 1934 (the Exchange Act) is (i) recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and (ii) accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow for timely decisions regarding required disclosure.

Table of Contents

Applicable SEC rules require an evaluation of the effectiveness of the design and operation of our DCP. Management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our DCP as of the end of the period covered by this report, and has found our DCP to be effective in providing reasonable assurance of the timely recording, processing, summarization and reporting of information, and in accumulation and communication of information to management to allow for timely decisions with regard to required disclosure.

Changes in Internal Control over Financial Reporting

In addition to the information concerning our DCP, we are required to disclose certain changes in internal control over financial reporting. Although we have made various enhancements to our controls, there have been no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Certifications

The certifications of our Chief Executive Officer and Chief Financial Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a) are filed with this report as Exhibits 31.1 and 31.2. The certifications of our Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. 1350 are furnished with this report as Exhibits 32.1 and 32.2.

EXHIBIT INDEX

3.1	Certificate of Limited Partnership of Plains GP Holdings, L.P. (incorporated by reference to Exhibit 3.1 to the Registration Statement on Form S-1 (333-190227) filed July 29, 2013).
3.2	Amended and Restated Limited Partnership Agreement of Plains GP Holdings, L.P. (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K filed October 25, 2013).
3.3	Certificate of Formation of PAA GP Holdings LLC (incorporated by reference to Exhibit 3.3 to the Registration Statement on Form S-1 (333-190227) filed July 29, 2013).
3.4	Amended and Restated Limited Liability Company Agreement of PAA GP Holdings LLC (incorporated by reference to Exhibit 3.2 to the Current Report on Form 8-K filed October 25, 2013).
3.5	Amendment No. 1 to Amended and Restated Limited Liability Company Agreement of PAA GP Holdings LLC, dated as of December 31, 2013 (incorporated by reference to Exhibit 3.2 to the Current Report on Form 8-K filed December 31, 2013).
3.6	Fourth Amended and Restated Agreement of Limited Partnership of Plains All American Pipeline, L.P. dated as of May 17, 2012 (incorporated by reference to Exhibit 3.1 to PAA s Current Report on Form 8-K filed May 23, 2012).
3.7	Amendment No. 1 dated October 1, 2012 to the Fourth Amended and Restated Agreement of Limited Partnership of Plains All American Pipeline, L.P. (incorporated by reference to Exhibit 3.1 to PAA s Current Report on Form 8-K filed October 2, 2012).
3.8	Amendment No. 2 dated December 31, 2013 to the Fourth Amended and Restated Agreement of Limited Partnership of Plains All American Pipeline, L.P. (incorporated by reference to Exhibit 3.3 to the Current Report on Form 8-K filed December 31, 2013).
3.9	Sixth Amended and Restated Limited Liability Company Agreement of Plains All American GP LLC dated October 21, 2013 (incorporated by reference to Exhibit 3.4 to the Current Report on Form 8-K filed October 25, 2013).
3.10	Seventh Amended and Restated Limited Partnership Agreement of Plains AAP, L.P. dated October 21, 2013 (incorporated by reference to Exhibit 3.3 to the Current Report on Form 8-K filed October 25, 2013).
3.11	Amendment No. 1 dated December 31, 2013 to Seventh Amended and Restated Limited Partnership Agreement of Plains AAP, L.P. (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K filed December 31, 2013).
3.12	Limited Liability Company Agreement of PAA GP LLC dated December 28, 2007 (incorporated by reference to Exhibit 3.3 to PAA s Current Report on Form 8-K filed January 4, 2008).
4.1	Indenture dated September 25, 2002 among Plains All American Pipeline, L.P., PAA Finance Corp. and Wachovia Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Quarterly Report on Form 10-Q for the quarter ended September 30, 2002).
4.2	Fourth Supplemental Indenture (Series A and Series B 5.875% Senior Notes due 2016) dated August 12, 2004 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and Wachovia Bank, National Association, as trustee (incorporated by reference to Exhibit 4.5 to PAA s Registration Statement on Form S-4, File No. 333-121168).
4.3	Fifth Supplemental Indenture (Series A and Series B 5.25% Senior Notes due 2015) dated May 27, 2005 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and Wachovia Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed May 31, 2005).

Table of Contents

4.4	Sixth Supplemental Indenture (Series A and Series B 6.70% Senior Notes due 2036) dated May 12, 2006 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and Wachovia Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed May 12, 2006).
4.5	Ninth Supplemental Indenture (Series A and Series B 6.125% Senior Notes due 2017) dated October 30, 2006 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed October 30, 2006).
4.6	Tenth Supplemental Indenture (Series A and Series B 6.650% Senior Notes due 2037) dated October 30, 2006 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.2 to PAA s Current Report on Form 8-K filed October 30, 2006).
4.7	Thirteenth Supplemental Indenture (Series A and Series B 6.5% Senior Notes due 2018) dated April 23, 2008 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed April 23, 2008).
4.8	Fifteenth Supplemental Indenture (8.75% Senior Notes due 2019) dated April 20, 2009 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed April 20, 2009).
4.9	Seventeenth Supplemental Indenture (5.75% Senior Notes due 2020) dated September 4, 2009 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed September 4, 2009).
4.10	Eighteenth Supplemental Indenture (3.95% Senior Notes due 2015) dated July 14, 2010 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed July 13, 2010).
4.11	Nineteenth Supplemental Indenture (5.00% Senior Notes due 2021) dated January 14, 2011 among Plains All American Pipeline, L.P., PAA Finance Corp., the Subsidiary Guarantors named therein and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed January 11, 2011).
4.12	Twentieth Supplemental Indenture (3.65% Senior Notes due 2022) dated March 22, 2012 among Plains All American Pipeline, L.P., PAA Finance Corp and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed March 26, 2012).
4.13	Twenty-First Supplemental Indenture (5.15% Senior Notes due 2042) dated March 22, 2012 among Plains All American Pipeline, L.P., PAA Finance Corp and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.3 to PAA s Current Report on Form 8-K filed March 26, 2012).
4.14	Twenty-Second Supplemental Indenture (2.85% Senior Notes due 2023) dated December 10, 2012, by and among Plains All American Pipeline, L.P., PAA Finance Corp., and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.1 to PAA s Current Report on Form 8-K filed December 12, 2012).
4.15	Twenty-Third Supplemental Indenture (4.30% Senior Notes due 2043) dated December 10, 2012, by and among Plains All American Pipeline, L.P., PAA Finance Corp., and U.S. Bank National Association, as trustee (incorporated by reference to Exhibit 4.3 to PAA s Current Report on Form 8-K filed December 12, 2012).
