Fair Value Measurements

RENN Capital Group, Inc. (“RENN Group”), a Texas corporation, serves as the Investment Adviser to RENN Fund, Inc. (“the “Fund”). RENN Group is a registered investment adviser under the Investment Advisers Act of 1940, as amended. The Fund, a Texas corporation, is a registered, non-diversified, closed-end management investment company under the Investment Company Act of 1940.

Investments are carried in the statements of assets and liabilities at fair value, as determined in good faith by RENN Group, subject to the approval of the Fund’s Board of Directors. The fair values reported are subject to various risk including changes in the equity markets, general economic conditions, and the financial performance of the companies. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the fair value of investment securities, it is possible that the amounts reported in the accompanying financial statements could change materially in the near term.

The Fund generally invests in common securities, preferred securities, convertible and nonconvertible debt securities, and warrants. These securities may be unregistered and thinly-to-moderately traded. Generally, the Fund negotiates registration rights at the time of purchase and the portfolio companies are required to register the shares within a designated period, and the cost of registration is borne by the portfolio company.

On a weekly basis, RENN Group prepares a valuation to determine fair value of the investments of the Fund. The Board of Directors approves the valuation on a quarterly basis. Interim board involvement may occur if material issues arise before quarter end. The valuation principles are described below.

Unrestricted common stock of companies listed on an exchange, such as the NYSE or NASDAQ, or in the over-the-counter market is valued at the closing price on the date of valuation. Thinly traded unrestricted common stock of companies listed on an exchange, such as the NYSE or NASDAQ, or in the over-the-counter market is valued at the closing price on the date of valuation, less a marketability discount as determined appropriate by the Fund Managers and approved by the Board of Directors.

Edgar Filing: RENN Fund, Inc. - Form N-Q

Restricted common stock of companies listed on an exchange, such as the NYSE or NASDAQ, or in the over-the-counter market is valued based on the quoted price for an otherwise identical unrestricted security of the same issuer that trades in a public market, adjusted to reflect the effect of any significant restrictions.

The unlisted preferred stock of companies with common stock listed on an exchange, such as the NYSE or NASDAQ, or in the over-the-counter market is valued at the closing price of the common stock into which the preferred stock is convertible on the date of valuation.

Debt securities are valued at fair value. The Fund considers, among other things, whether a debt issuer is in default or bankruptcy. It also considers the underlying collateral. Fair value is generally determined to be the greater of the face value of the debt or the market value of the underlying common stock into which the instrument may be converted.

The unlisted in-the-money options or warrants of companies with the underlying common stock listed on an exchange, such as the NYSE or NASDAQ, or in the over-the-counter market are valued at fair value (the positive difference between the closing price of the underlying common stock and the strike price of the warrant or option). An out-of-the-money warrant or option has no value; thus the Fund assigns no value to it.

Investments in privately held entities are valued at fair value. If there is no independent and objective pricing authority (i.e., a public market) for such investments, fair value is based on the latest sale of equity securities to independent third parties. If a private entity does not have an independent value established over an extended period of time, then the Investment Adviser will determine fair value on the basis of appraisal procedures established in good faith and approved by the Board of Directors.

RENN Fund, Inc.

Third Quarter Report

September 30, 2015 (Unaudited)

The Fund follows the provisions of Accounting Standards Codification ASC 820, *Fair Value Measurements*, under which the Fund has established a fair value hierarchy that prioritizes the sources (“inputs”) used to measure fair value into three broad levels: inputs based on quoted market prices in active markets (Level 1 inputs); observable inputs based on corroboration with available market data (Level 2 inputs); and unobservable inputs based on uncorroborated market data or a reporting entity’s own assumptions (Level 3 inputs).

The following table shows a summary of investments measured at fair value on a recurring basis classified under the appropriate level of fair value hierarchy as of September 30, 2015:

	Level 1	Level 2	Level 3	Total
Convertible Bonds	\$0	\$17,000	\$ 0	\$17,000
Convertible				
Preferred Equities	0	1,509,226	0	1,509,226
Common stock	4,592,301	0	0	4,592,301
Miscellaneous Securities	0	97,199	0	97,199
Total Investments	\$4,592,301	\$1,623,425	\$ 0	\$6,215,726

As of September 30, 2015, no portfolio companies were classified as Level 3.
