SEVCON, INC.

Notes to Consolidated Financial Statements – December 28, 2013

(Unaudited)

(1)Basis of presentation

Sevcon, Inc. (“Sevcon” or “the Company”) is a Delaware corporation organized on December 22, 1987 to carry on the electronic controls business previously performed by Tech/Ops, Inc. Through wholly-owned subsidiaries located in the United States, the United Kingdom, France, South Korea and Japan, the Company designs and sells, under the Sevcon name, microprocessor based controls for zero emission and hybrid electric vehicles. The controls are used to vary the speed and movement of vehicles, to integrate specialized functions and to prolong the shift life of vehicles’ power source. The Company’s customers are manufacturers of on-road, off-road and industrial vehicles including automobiles, buses, fork lift trucks, aerial lifts, mining vehicles, airport ground support vehicles, utility vehicles, sweepers and other battery powered vehicles. Through another subsidiary located in the United Kingdom, Sevcon, Inc. manufactures special metalized film capacitors that are used as components in the power electronics, signaling and audio equipment markets.

In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of only normally recurring accruals) necessary to present fairly the financial position of Sevcon, Inc. as of December 28, 2013 and the results of operations and cash flows for the three months ended December 28, 2013. These unaudited interim financial statements should be read in conjunction with the 2013 annual consolidated financial statements and related notes included in the 2013 Sevcon, Inc. Annual Report filed on Form 10-K (the “2013 10-K”). Unless otherwise indicated, each reference to a year means the Company’s fiscal year, which ends on September 30.

The results of operations for the three month period ended December 28, 2013 are not necessarily indicative of the results to be expected for the full year.

(2)Summary of significant accounting policies

There have been no changes since the end of 2013 to the significant accounting policies followed by Sevcon, Inc.

(3)Stock-based compensation plans

Under the Company’s 1996 Equity Incentive Plan (the “Plan”) there were 62,000 shares reserved and available for grant at December 28, 2013. There were 122,800 shares reserved and available for grant at December 29, 2012. There were no options granted or exercised in the quarters ended December 28, 2013 and December 29, 2012.

Recipients of grants must execute a standard form of non-competition agreement. The plan provides for the grant of Restricted Stock, Restricted Stock Units, Options, and Stock Appreciation Rights (“SARs”). SARs may be awarded either separately, or in relation to options granted, and for the grant of bonus shares. Options granted are exercisable at a price not less than fair market value on the date of grant.

Index

A summary of option activity for all plans for the three months ended December 28, 2013 is as follows:

	Shares under Option	Weighted average Exercise Price	Weighted average contractual life (years)	Aggregate Intrinsic Value
Outstanding at September 30, 2013	5,000	\$ 5.40	0.1 years	\$ -
Cancelled	(5,000)	5.40	-	-
Outstanding at December 28, 2013	-	\$ -	-	\$ -
Exercisable at December 28, 2013	-	\$ -	-	\$ -
Exercisable and expected to vest at December 28, 2013	-	\$ -	-	\$ -

The aggregate intrinsic value represents the difference between the exercise price of the options and the market price of the Company's common stock for the options that had exercise prices that were lower than the \$5.27 and \$4.85 closing market price of the Company's common stock at December 28, 2013 and September 30, 2013, respectively.

In December 2013, the Company granted 80,000 shares of restricted stock to seven employees, which will vest in five equal annual installments so long as the employee is then employed by the Company or as determined by the Compensation Committee. The estimated fair value of the stock on the date of grant was \$354,000 based on the fair market value of stock on the date of issue. This unvested compensation is being charged to income on a straight line basis over five years. The charge to income for this employee restricted stock will be approximately \$18,000 on a quarterly basis.

A summary of restricted stock activity for the three months ended December 28, 2013 is as follows:

	Number of shares of Restricted Stock	Weighted Average Grant-Date Fair Value
Non-vested balance as of September 30, 2013	103,800	\$ 5.05
Granted	80,000	\$ 4.43
Vested	(27,000)	\$ 4.86
Non-vested balance as of December 28, 2013	156,800	\$ 4.77

Stock-based compensation expense was \$59,000 and \$71,000 for the three month periods ended December 28, 2013 and December 29, 2012, respectively. At December 28, 2013, there was \$667,000 of unrecognized compensation expense related to restricted stock granted under the Plan. The Company expects to recognize that cost over a weighted average period of 4.0 years.

Index

(4) Cash dividends

The Board of Directors suspended dividends to conserve cash during the global recession that began in 2009 and will consider whether to resume paying dividends as conditions and the Company's operating results improve.

(5) Calculation of earnings per share and weighted average shares outstanding

Basic and fully diluted earnings per share were calculated as follows:

	(in thousands except per share data)	
	Three Months ended	
	December 28, 2013	December 29, 2012
Net income (loss)	\$488	\$ (1,302)
Weighted average shares outstanding - basic	3,375	3,339
Basic income (loss) per share	\$.14	\$ (.39)
Common stock equivalents	36	18
Weighted average shares outstanding - diluted	3,411	3,357
Diluted income (loss) per share	\$.14	\$ (.39)
No. of options that are anti-dilutive excluded from calculation of common stock equivalents	-	36

(6) Segment information

The Company has two reportable segments: electronic controls and capacitors. The electronic controls segment produces microprocessor based control systems for zero emission and hybrid electric vehicles. The capacitors segment produces metalized film capacitors for sale to electronic equipment manufacturers. Each segment has its own management team and sales force and the capacitors segment has its own manufacturing facility.

The significant accounting policies of the segments are the same as those described above and in Note 1 to the Notes to Consolidated Financial Statements in the 2013 10-K. Inter-segment revenues are accounted for at current market prices. The Company evaluates the performance of each segment principally based on operating income. The Company does not allocate income taxes, interest income and expense or foreign currency translation gains and losses to segments. Information concerning operations of these businesses is as follows:

	(in thousands of dollars)			
	Three months ended December 28, 2013			
	Controls	Capacitors	Corporate	Total
Sales to external customers	8,535	514	-	9,049
Inter-segment revenues	-	-	-	-
Operating income	649	40	21	710
Identifiable assets	21,798	1,385	334	23,517
	Three months ended December 29, 2012			
	Controls	Capacitors	Corporate	Total
Sales to external customers	6,202	438	-	6,640
Inter-segment revenues	-	2	-	2

Edgar Filing: SEVCON, INC. - Form 10-Q

Operating income (loss)	(1,143)	(14)	(28)	(1,185)
Identifiable assets	20,027	1,283	407	21,717

7

Index

In the electronic controls segment, revenues derive from the following products and services:

	(in thousands of dollars)	
	Three Months ended	
	December 28, 2013	December 29, 2012
Electronic controls for zero emission and hybrid electric vehicles	\$6,584	\$ 4,085
Accessory and aftermarket products and services	1,951	2,117
Total electronic controls segment revenues	\$8,535	\$ 6,202

(7) Research and development

The cost of research and development programs is charged against income as incurred and was as follows:

	(in thousands of dollars)	
	Three Months ended	
	December 28, 2013	December 29, 2012
Research and development expense, net of grants receivable	\$930	\$ 1,083
Percentage of sales	10.3	16.3

In recent years the Company has received several awards of research and development grants by the Technology Strategy Board, a public body established by the U.K. government to stimulate technology-enabled innovation.

In 2011, the Company was awarded a research and development grant by the Technology Strategy Board to lead a collaborative project with Cummins Generator Technologies and Newcastle University in the U.K. to develop an innovative electric drive system for electric vehicles using advanced switched reluctance motor technology. The Company recorded grant income from this Technology Strategy Board project of \$17,000 in the first quarter of 2014 associated with research and development expense of \$50,000. The Company recorded grant income of \$6,000 associated with research and development expense of \$19,000 in respect of this Technology Strategy Board grant in the same period in 2013.

In 2013, the Company was awarded a research and development grant by the Technology Strategy Board as one of a consortium of organizations in the U.K to research and design ultra-efficient systems for electric and hybrid vehicles. The Company recorded grant income from this Technology Strategy Board project of \$1,000 in the first quarter of 2014 associated with research and development expense of \$3,000. The Company did not record any grant income or incur any research and development expense in respect of this grant in the first quarter of 2013.

In July 2013, the Company was awarded a grant of approximately \$480,000 by the Low Emission Transport Collaborative Projects Fund, a U.K. government body. The grant is to develop next-generation controls for high-voltage, low-power applications. This grant will defray part of the research and development expense associated with this project over the period to March 2015. The Company recorded grant income from this project in the first quarter of 2014 of \$97,000 associated with research and development expense of \$422,000. The Company did not record any grant income or incur any research and development expense in respect of this grant in the first quarter of

2013.

The grant income in the first quarter of 2014 and 2013 was recorded as a reduction of research and development expense.

8

Index

(8) Employee benefit plans

Sevcon has defined contribution plans covering the majority of its U.S. and U.K. employees in the controls business. There is also a small defined contribution plan covering senior managers in the capacitor business. The Company has frozen U.K. and U.S. defined benefit plans for which no future benefits are being earned by employees. The following table sets forth the components of the net pension cost for the three month periods ended December 28, 2013 and December 29, 2012, respectively:

	(in thousands of dollars)	
	Three Months ended	
	December 28, 2013	December 29, 2012
Interest cost	\$318	\$ 323
Expected return on plan assets	(320)	(293)
Amortization of net loss	56	72
Net periodic benefit cost	54	102
Net cost of defined contribution plans	\$ 115	\$ 122

The following table sets forth the movement in the liability for pension benefits in the three month periods ended December 28, 2013 and December 29, 2012:

	(in thousands of dollars)	
	Three Months ended	
	December 28, 2013	December 29, 2012
Liability for pension benefits at beginning of period	\$8,354	\$ 10,264
Net periodic benefit cost	54	102
Plan contributions	(171)	(60)
Amortization of net loss	(56)	(72)
Effect of exchange rate changes	85	78
Balance at end of period	\$8,266	\$ 10,312

Amounts recognized in the balance sheet consist of:

	(in thousands of dollars)	
	December	
	28, 2013	29, 2012
Non-current liabilities	\$8,266	\$ 10,312

Amounts recognized in accumulated other comprehensive (loss) consist of:

(in thousands of
dollars)

December

28, 29,

2013 2012

Actuarial loss, net of \$13,000 tax benefit (2013: net of \$19,000 tax benefit)	\$43	\$ 53
---	------	-------

Sevcon, Inc. contributed \$50,000 to its U.S. defined benefit plan in the three months ended December 28, 2013; it presently anticipates contributing \$150,000 to fund its U.S. plan in the remainder of fiscal 2014. In addition, employer contributions to the U.K. defined benefit plan were \$121,000 in the first three months and are estimated to total \$368,000 in 2014.

The table below presents information about the Company's pension plan assets measured and recorded at fair value as of December 28, 2013 and indicates the fair value hierarchy of the inputs utilized by the Company to determine the fair values.

Work-in-process	7	11
Finished goods	3,822	3,511

\$5,937 \$ 5,723

10

Index

(10) Other receivables

Other receivables of \$833,000 at December 28, 2013 include \$555,000 of receivables in the Company's French subsidiary that have been reclassified from trade receivables. In January 2014 management was advised that SITL, a customer of the Company's French subsidiary and a manufacturer of on-road electric vehicles, had entered administration protection for a minimum period of six months. SITL's principal activity is the manufacture of domestic appliances; they also have a waste filtration business and a start-up business which manufactures electric vehicles with which the Company trades. The main customer of SITL's domestic appliances business, Fagor Spain, was placed into administration in late 2013; the impact of this event caused SITL, including its electric vehicle division, to also be placed in administration. The Company has submitted a claim with the French court appointed administrator for the full amount of the receivable of \$555,000. The administrator is seeking a buyer for the SITL business and will make an initial report into the administration process to the commercial court in Lyon, France, on March 6, 2014. This is the earliest estimate of when management will have any information upon which to assess the recoverability of this receivable. Due to the high level of uncertainty at this time, management has not assessed a reserve for an uncollectible amount, but any loss incurred may be up to the full amount recorded at December 28, 2013, of \$555,000.

(11) Fair value of financial instruments

The Company's financial instruments consist mainly of cash and cash equivalents, short-term investments, accounts receivable and accounts payable. The carrying amount of these financial instruments as of December 28, 2013 approximates fair value due to the short-term nature of these instruments. The fair value of the Company's long term debt at December 28, 2013 approximated \$1,763,000 (the carrying value on the consolidated balance sheet at December 28, 2013) based on recent financial market pricing. The long term debt represented a level 2 liability in accordance with the fair value hierarchy described in Note 8.

(12) Accrued expenses

Set out below is an analysis of other accrued expenses at December 28, 2013 and September 30, 2013, which shows separately any items in excess of 5% of total current liabilities:

	(in thousands of dollars)	
	December 28, 2013	September 30, 2013
Accrued compensation and related costs	\$1,071	\$ 1,015
Other accrued expenses	863	1,072
	\$1,934	\$ 2,087

(13) Warranty reserves

The movement in warranty reserves was as follows:

(in thousands of dollars)	
Three Months ended	
December 28, 2013	December 29, 2012

Edgar Filing: SEVCON, INC. - Form 10-Q

Warranty reserves at beginning of period	\$ 138	\$ 89
Decrease in beginning balance for warranty obligations settled during the period	(43)	(8)
Foreign currency translation adjustment	1	3
Net increase in warranty reserves for products sold during the period	\$43	\$ 22
Warranty reserves at end of period	\$139	\$ 106

(14)Debt

At December 28, 2013 the Company had \$63,000 outstanding under a U.K. bank loan entered into in April 2010, with a fixed interest rate of 6.8%. The loan, which was entered into by the U.K. metalized film capacitor subsidiary to purchase an item of capital equipment, is denominated in British Pounds. The loan agreement provides for equal monthly installments comprising interest and principal for a five year period commencing in May 2010. Of the total amount outstanding at December 28, 2013, \$47,000 is shown in the current liabilities section of the accompanying consolidated balance sheet under current debt, representing the principal element of the loan installments ending on December 31, 2013. Included in other long term liabilities at December 28, 2013, is \$16,000 which represents the principal element of the loan installments payable in the fiscal year 2015. The fair market value of the debt at December 28, 2013 was \$63,000.

11

Index

The Company's wholly owned subsidiary, Sevcon USA, Inc., has a \$3,500,000 secured revolving credit facility with RBS Citizens, National Association for working capital and general corporate purposes. The loan and security agreement will expire on June 14, 2017 when all outstanding principal and unpaid interest will be due and payable in full. The facility may be paid before maturity in whole or in part at the option of Sevcon USA, Inc., without penalty or premium. Interest on the loan is payable monthly, and in the first quarter of 2014, was calculated at a margin of 3.25% over LIBOR. Under the facility, Sevcon USA, Inc. must maintain, on a quarterly basis, a debt to tangible net worth ratio of no more than 2.40:1 and a debt service coverage ratio of no less than 1.25:1 for each rolling twelve-month period. Upon entering into the revolving credit facility, Sevcon USA, Inc. drew down \$1,700,000, which was the total amount outstanding at December 28, 2013. This \$1,700,000 is shown in the accompanying consolidated balance sheet under long-term debt. The carrying value of the debt approximated to fair value based on current interest rates.

In July 2013, the Company's U.K. bank renewed the overdraft facilities of the Company's U.K. controls and capacitor subsidiaries. The Company's U.K. controls and capacitor subsidiaries each have multi-currency overdraft facilities which together total \$1,470,000 and which are secured by real estate owned by those companies. In common with bank overdrafts in Europe, the renewal of the facilities is for a twelve month period although in line with normal practice in Europe, they can be withdrawn on demand by the bank. The facilities were unused at December 28, 2013.

Annual principal payments on long term debt at December 28, 2013 are as follows:

	(in thousands Fiscal year of dollars)
2015	\$ 16
2016	-
2017	1,700
Total	\$ 1,716

(15) Subsequent events

In preparing these interim consolidated financial statements, the Company has evaluated, for potential recognition or disclosure, events or transactions subsequent to the end of the most recent quarterly period, the issuance date of these financial statements.

On December 31, 2013 the Company received the required approval of the government authorities in China to enter into a joint-venture agreement with Risenbo Technology Co., Ltd, (Risenbo), based in Hubei Province, China. Operating as Sevcon (Hubei) New Energy Technology Company, Ltd., the new joint venture company will market and sell existing and future Sevcon products for on-road electric and hybrid vehicle applications principally to Tier 1 automotive suppliers in China. Sevcon and Risenbo each will own a 50 percent stake in the joint venture, which will be led by a Sevcon-nominated chair. Subject to the satisfaction of certain closing conditions, the joint-venture agreement is expected to commence operations in the second quarter of 2014.

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations.

FORWARD LOOKING STATEMENTS

Statements in this discussion and analysis about the Company's anticipated financial results and growth, as well as those about the development of its products and markets, are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from those projected. Important factors that could cause these statements not to be realized include the risks discussed under "Risk Factors" below and others discussed in

this report.

CRITICAL ACCOUNTING ESTIMATES

As of December 28, 2013, there have been no material changes to the critical accounting estimates described in the Company's 2012 10-K. However, if the business and economic realities vary from those assumed in these judgments and estimates, actual operating results may differ materially from the amounts derived from these judgments and estimates. In addition, if the continuing worldwide economic troubles continue to have a negative effect on our business, estimates used in future periods may vary materially from those included in the Company's previous disclosures.

For example:

- (i) if the financial condition of any of the Company's customers deteriorates as a result of further business declines, the Company may be required to increase its estimated allowance for bad debts;
- (ii) if actual future demand is less than previously projected, inventory write-downs may be required; or
- (iii) significant negative industry or economic trends that adversely affect our future revenues and profits, or a reduction of our market capitalization relative to net book value, among other factors, may change the estimated future cash flows or other factors that we use to determine whether or not goodwill has been impaired and lead us to conclude that an impairment charge is required.

All of these factors, and others resulting from the current economic situation, may have a material adverse impact on the Company's results.

Index

OVERVIEW OF FIRST QUARTER

Results of Operations

Three months ended December 28, 2013

The following table compares the results by segment for the three months ended December 28, 2013 with the same period in the prior year. The table shows the effect of currency and volume changes in percentage terms:

	Three months ended		Favorable (unfavorable) % change due to:		
	December 28, 2013	December 29, 2012	Total	Currency	Volume
Sales:					
Controls - to external customers	\$8,535	\$ 6,202	38	2	36
Capacitors - to external customers	514	438	17	-	17
Capacitors - inter-segment	-	2	100	-	100
Capacitors – total	514	440	17	-	17
Total sales to external customers	9,049	6,640	36	1	35
Gross Profit:					
Controls	3,625	2,105	72	(4)	76
Capacitors	207	135	54	2	52
Total	3,832	2,240	71	(4)	75
Selling research and administrative expenses:					
Controls	2,976	3,248	8	(1)	9
Capacitors	167	149	(12)	-	(12)
Unallocated corporate expense	(21)	28	175	-	175
Total	3,122	3,425	9	(1)	10
Operating income (loss):					
Controls	649	(1,143)	157	(10)	167
Capacitors	40	(14)	381	22	359
Unallocated corporate expense	21	(28)	175	-	175
Total	710	(1,185)	160	(10)	170
Other income and expense	(101)	(225)	55	52	3
Income (loss) before income tax	609	(1,410)	143	-	143
Income tax (provision) benefit	(121)	108	(212)	(1)	(211)
Net income (loss)	\$488	\$ (1,302)	138	-	138

Sales in the first quarter of 2014 were \$9,049,000 compared to \$6,640,000 in the same quarter last year. This increase was mainly in our controls business and reflected higher sales in our traditional markets of aerial work platform and fork lift truck. In addition there was higher demand in the on-road sector for four-wheel applications which were partially offset by lower sales in the two-wheel on-road sector. Foreign currency exchange rates were similar to last year and had little effect on reported sales.

In the controls business segment, sales were higher than the first quarter last year in all of our three main geographic markets. Excluding foreign currency effects, revenues increased 38% from the first quarter last year in Europe, reflecting stronger aerial work platform business as well as higher product demand for four-wheel on-road electric vehicle applications. Sales were higher in North America by 31% driven by increased product demand in both the aerial work platform and fork lift truck markets while demand in the mining sector was essentially flat year-over-year.

Sales in the Far East increased 65% driven primarily by year-over-year growth in demand for aerial work platform and fork lift truck applications in China and Japan.

In the capacitor business, volumes shipped were 17% higher compared to the first quarter last year, largely reflecting higher demand from railway signaling customers.

Gross profit of \$3,832,000 was 42.3% of sales in the first quarter, compared to \$2,240,000 or 33.7% of sales in the same quarter last year. The increase in the gross profit percentage compared to the prior year was largely due to an improved sales mix in the controls business as well as fixed overhead costs being a lower percentage of sales as sales volumes increased year-on-year.

14

Index

Selling, research and administrative expense in the first quarter of 2014 was \$3,122,000, a decrease of \$303,000, or 9%, compared to the same period last year. This decrease year-on-year partly reflects the cost savings implemented in the second quarter of 2013 in response to the reduction in customer demand in the first quarter of last year. The Company also recorded grant income of \$115,000 in the first quarter of 2014 compared to \$6,000 in the first quarter in the prior year; this grant income was recorded as a reduction of research and development expense in each year. The decrease in selling, research and administrative expense also reflects lower consulting and legal expenses in the first quarter of 2014 than in the first quarter last year when we recorded the cost of the final round of consultation in closing our U.K. defined benefit pension plan.

Engineering and research and development expense, net of grants receivable, as a percentage of total sales was 10.3% in the first quarter of fiscal 2014, compared with 16.3% in the first quarter of last year. This decrease reflects both the higher sales recorded in 2014 as well as the increased grants receivable in 2014 compared with the prior year.

There was operating income for the first quarter of 2014 of \$710,000 which is \$1,895,000 higher than last year when we recorded an operating loss of \$1,185,000.

In the first quarter of 2014, interest expense was \$16,000, a decrease of \$8,000 compared to the prior year due to the Company's U.K. bank overdraft facility being little used during the first quarter of 2014. There was a foreign currency loss of \$85,000 in the first quarter of 2014 compared to a loss of \$201,000 in the same period last year.

The Company recorded income before income taxes of \$609,000 in the first quarter of 2014 compared to a loss before income taxes of \$1,410,000 in the same period last year, and the Company recorded an income tax charge of \$121,000 compared with an income tax benefit of \$108,000 in the same period last year. There was net income after income tax for the quarter of \$488,000 or income of \$.14 per diluted share, compared to a loss after tax of \$1,302,000, or a loss per diluted share of \$.39, in the same quarter last year.

As discussed in Part II, Item 1A, "Risk Factors," the continuing debt crisis in certain European countries poses significant potential risks to the Company's business, financial position and results of operations.

Financial Condition

Cash balances at the end of the first quarter of 2014 were \$2,159,000, compared to \$2,062,000 on September 30, 2013, an increase in cash of \$97,000 in the first three months of 2014.

In the first three months of 2014, operating activities generated \$126,000 of cash. Excluding the impact of currency fluctuations, receivables decreased by \$36,000, payables decreased by \$290,000, and inventories increased by \$169,000 in the quarter. The number of days sales in receivables decreased by two days from 65 day's sales at September 30, 2013 to 63 days sales at December 28, 2013. Capital expenditures in the first three months were \$64,000. Exchange rate changes increased reported cash by \$46,000 in the first three months of 2013.

Other receivables of \$833,000 at December 28, 2013 include \$555,000 of receivables in the Company's French subsidiary that have been reclassified from trade receivables. In January 2014 management was advised that SITL, a customer of the Company's French subsidiary and a manufacturer of on-road electric vehicles, had entered administration protection for a minimum period of six months. SITL's principal activity is the manufacture of domestic appliances; they also have a waste filtration business and a start-up business which manufactures electric vehicles with which the Company trades. The main customer of SITL's domestic appliances business, Fagor Spain, was placed into administration in late 2013; the impact of this event caused SITL, including its electric vehicle division, to also be placed in administration. The Company has submitted a claim with the French court appointed administrator for the full amount of the receivable of \$555,000. The administrator is seeking a buyer for the SITL business and will make an initial report into the administration process to the commercial court in Lyon, France, on March 6, 2014. This is the

earliest estimate of when management will have any information upon which to assess the recoverability of this receivable. Due to the high level of uncertainty at this time, management has not assessed a reserve for an uncollectible amount, but any loss incurred may be up to the full amount recorded at December 28, 2013, of \$555,000.

Index

The Company had a U.K. bank loan of \$63,000, of which \$47,000 was short-term and \$16,000 long-term debt at December 28, 2013. It has overdraft facilities in the United Kingdom amounting to \$1,470,000 which were unused as of December 28, 2013 and September 30, 2013. The overdraft facility of the U.K. capacitor subsidiary is secured by a legal charge over the facility owned and occupied by that company. The overdraft facility of the U.K. controls subsidiary is secured by a legal charge over a facility owned by that company. Both facilities were renewed in the third quarter of 2013 for a further period of twelve months but, in line with normal practice in Europe, can be withdrawn on demand by the bank. Management believes that, if these facilities were withdrawn, adequate alternative credit resources would be available. However, this would depend on the Company's situation and the economic environment at the time. Accordingly, management does not rely on their availability in projecting the adequacy of the Company's capital resources.

The Company's wholly owned subsidiary, Sevcon USA, Inc., has a \$3,500,000 secured revolving credit facility with RBS Citizens, National Association for working capital and general corporate purposes. The obligations under the revolving credit facility are guaranteed by the Company and are secured by all of the assets of Sevcon USA, Inc. and a pledge of all of the capital stock of Sevcon USA, Inc. The facility imposes customary limitations on Sevcon USA, Inc.'s ability to, among other things, pay dividends, make distributions, and incur additional indebtedness. Under the facility, Sevcon USA, Inc. must maintain, on a quarterly basis, a debt to tangible net worth ratio of no more than 2.40:1 and a debt service coverage ratio of no less than 1.25:1 for each rolling twelve-month period. Upon entering into the revolving credit facility, Sevcon USA, Inc. drew down \$1,700,000, which was the total amount outstanding at December 28, 2013. The revolving credit facility will expire on June 14, 2017 when all outstanding principal and unpaid interest will be due and payable in full.

There were no significant capital expenditure commitments at December 28, 2013. It is estimated that the Company will make contributions to its U.K. and U.S. defined benefit pension plans of approximately \$568,000 in fiscal 2014; should the Company suffer a material reduction in revenues in 2014 this commitment could adversely impact the Company's financial position. In the opinion of management, the Company's requirements for working capital to meet projected operational and capital spending in both the short and long term can be met by a combination of existing cash resources, future earnings and existing borrowing facilities in Europe. Any material reduction in revenues will have a materially adverse impact on the Company's financial position, which would be exacerbated if any of the Company's lenders withdraws or reduces available credit. If the Company is unable to generate sufficient cash from operations and if the bank overdraft facilities are withdrawn, the Company would need to raise additional debt or equity capital from other sources to avoid significantly curtailing its business and materially adversely affecting its results.

Item 3 Quantitative and Qualitative Disclosures about Market Risk.

As a smaller reporting company, the Company is not required to respond to this item. However, we are providing the following information about our foreign currency and interest rate risks to supplement the disclosures in Item 2.

Foreign currency risk

The Company sells to customers throughout the industrialized world. The majority of the Company's products are manufactured in, or sourced from, the United Kingdom. In the first three months of 2014, approximately 50% of the Company's sales were made in U.S. Dollars, 30% were made in British Pounds and 20% were made in Euros. Approximately 80% of the Company's cost of sales was incurred in British Pounds and Euros. This resulted in the Company's sales and margins being exposed to fluctuations due to the change in the exchange rates of the U.S. Dollar, the British Pound and the Euro. The Company has trade accounts receivable and accounts payable denominated in both British Pounds and Euros that are exposed to exchange fluctuations.

In addition, the translation of the sales and income of foreign subsidiaries into U.S. Dollars is also subject to fluctuations in foreign currency exchange rates.

Index

The following table provides information about the Company's foreign currency accounts receivable, accounts payable and firmly committed sales contracts outstanding as of December 28, 2013. The information is provided in U.S. Dollar amounts, as presented in the Company's consolidated financial statements. The table presents the amounts at which the Company's foreign currency accounts receivable, accounts payable and firmly committed sales contracts as of December 28, 2013 are expected to mature based on the exchange rate of the relevant foreign currency to U.S. Dollars at December 28, 2013:

	(in thousands of dollars) Expected maturity or transaction date Fiscal Fair 2014 Value	
On balance sheet financial instruments:		
In \$ U.S. Functional Currency		
Accounts receivable in British Pounds	1,238	1,238
Accounts receivable in Euros	2,295	2,295
Accounts payable in British Pounds	1,117	1,117
Accounts payable in Euros	1,949	1,949
Anticipated Transactions		
In \$ U.S. Functional Currency		
Firmly committed sales contracts		
In British Pounds	1,670	1,670
In Euros	1,253	1,253

Interest Rate Risk

The Company's policy is to invest surplus funds in instruments with maturities of less than 12 months at both fixed and floating interest rates. This investment portfolio is generally subject to general credit, liquidity, counterparty, market and interest rate risks that may be exacerbated by the current global financial crisis. If the banking system or the fixed income or credit markets continue to deteriorate or remain volatile, the values and liquidity of these investments could be adversely affected. The Company did not have any surplus funds invested as of December 28, 2013.

At December 28, 2013, the Company had \$63,000 of interest bearing debt related to a bank loan for the purchase of capital equipment by the Company's U.K. metalized film capacitor business. The Company also had, at December 29 2013, a \$3,500,000 secured revolving credit facility with RBS Citizens, National Association of which \$1,700,000 had been drawn down by the Company's U.S. controller business, Sevcon USA, Inc., and which was the total amount outstanding at that date. The Company incurs short-term borrowings from time-to-time on its overdraft facilities in Europe at variable interest rates.

Item 4 Controls and Procedures.

(a) Evaluation of disclosure controls and procedures. The Company's principal executive officer and principal financial officer, after evaluating the effectiveness of the Company's "disclosure controls and procedures" (as defined in the Securities Exchange Act of 1934 Rule 13a-15(e)), have concluded that, as of December 28, 2013, these disclosure controls and procedures were effective.

(b) Changes in internal control over financial reporting. Our principal executive officer and principal financial officer have identified no change in the Company's "internal control over financial reporting" (as defined in Securities Exchange Act of 1934 Rule 13a-15(f)) that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1 Legal Proceedings

None.

17

Index

Item 1A Risk Factors

In addition to the market risk factors set forth in Part I, Item 1A of our 2013 10-K and the considerations set out in Part I, Items 2 and 3 above, the Company believes that the following represent the most significant risk factors for the Company:

Capital markets are cyclical and weakness in the United States and international economies may harm our business.

The Company's traditional customers are mainly manufacturers of capital goods such as fork lift trucks, aerial lifts and railway signaling equipment. These markets are cyclical and depend heavily on worldwide transportation, shipping and other economic activity. They experienced a significant decline in demand during the recent global recession. Further, as our business has expanded globally, we have become increasingly subject to the risks arising from adverse changes in global economic conditions. While market conditions have appeared to improve since 2010, economic instability remains, particularly in the Eurozone. As a result, current or potential customers may be unable to fund purchases or manufacturing of products, which could cause them to delay, decrease or cancel purchases of our products or not to pay the Company or to delay paying for previously purchased products. In addition, the effect of the crisis on the Company's banks and other banks may cause the Company to lose its current overdraft facilities and be unable otherwise to obtain financing for operations as needed.

Demand for on-road electric vehicles incorporating our products may not materialize.

The Company has become increasingly involved in developing products for the on-road electric vehicle market. We have relationships with several customers that incorporate our products into their EV products. Our competitors and others are also developing products for other entrants in the EV market, with similar and competing technologies. If our customers' products or technology are not successful commercially, or if worldwide demand for EVs fails to grow as much as we hope, we may not realize the anticipated demand for our products in the EV market, which may have a material adverse effect on our results of operations.

The Company relies on a small number of key customers for a substantial portion of its revenues.

Ten customers accounted for 52% of the Company's revenues in the first three months of 2014 and the largest customer accounted for 15% of revenues. Although we have had business relationships with some of these customers for many years, our relationships with on-road EV customers are newer and, in any event, there are no long-term contractual supply agreements in place with any customer. Accordingly our performance could be adversely affected by the loss of one or more of these key customers.

The Company has substantial sales and operations outside the United States that could be adversely affected by changes in international markets.

A significant portion of our operations is located, and a significant portion of our business comes from, outside the United States. Accordingly, our performance could be adversely affected by economic downturns in Europe or the Far East as well as in the United States. A consequence of significant international business is that a large percentage of our revenues and expenses are denominated in foreign currencies that fluctuate in value versus the U.S. Dollar. Significant fluctuations in foreign exchange rates can and do have a material impact on our financial results, which are reported in U.S. Dollars. Other risks associated with international business include: changing regulatory practices and tariffs; staffing and managing international operations, including complying with local employment laws; longer collection cycles in certain areas; and changes in tax and other laws.

The continuing debt crisis in the Eurozone may have a material adverse effect on our business and operating results, which could adversely affect our stock price.

There continues to be significant uncertainty about the stability of global credit and financial markets in light of the continuing debt crisis in certain European countries. A default or a withdrawal from the Eurozone by any of the countries involved, or the uncertainty alone, could cause the value of the Euro to deteriorate. This, or a change to a local currency, would reduce the purchasing power of affected European customers. We are unable to predict the likelihood of any of these events but, if any occurs, our business, financial position and results of operations could be materially and adversely affected.

18

Index

Single source materials and sub-contractors may not meet the Company's needs.

The Company relies on single, or a small number of, suppliers and sub-contractors for its requirements for most components, sub-assemblies and finished products. In the event that such suppliers and sub-contractors are unable or unwilling to continue supplying the Company, or to meet the Company's cost and quality targets or needs for timely delivery, there is no certainty that the Company would be able to establish alternative sources of supply in time to meet customer demand.

Damage to the Company's or sub-contractors' buildings would hurt results.

In the electronic controls segment, the majority of the Company's finished product is produced in three separate plants in Poland, Mexico and China; these plants are owned by sub-contractors. The capacitor business is located in a single plant in Wales. In the event that any of these plants was to be damaged or destroyed, there is no certainty that the Company would be able to establish alternative facilities in time to meet customer demand. The Company does carry property damage and business interruption insurance but this may not cover certain lost business due to the long-term nature of the relationships with many customers.

Failure to comply with financial covenants in our loan agreement could adversely affect us.

As of December 28, 2013, the Company's subsidiary in the United States, Sevcon USA, Inc. had approximately \$1,700,000 of outstanding indebtedness under a revolving credit facility with RBS Citizens, National Association. This indebtedness is secured by all of Sevcon USA, Inc.'s assets and a pledge of all the capital stock of Sevcon USA, Inc. The loan agreement includes financial covenants which require us to maintain compliance with certain financial ratios during the term of the agreement. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Financial Condition". Failure to comply with the financial covenants would be an event of default under the loan agreement that would give the lender the right to cease making additional advances, accelerate repayment of all sums due and take action to collect the monies owed to it, including foreclosing on its security interest, which would have a material adverse effect on the Company's financial condition.

Product liability claims may have a material adverse effect.

The Company's products are technically complex and are installed and used by third parties. Defects in their design, installation, use or manufacturing may result in product liability claims against the Company. Such claims may result in significant damage awards, and the cost of any such litigation could be material.
