Item 2.02. Results of Operations and Financial Condition

On April 24, 2019, UMH Properties, Inc. (the “Company”, “we” or “our”) launched an underwritten follow-on offering of 2,000,000 shares of its 6.75% Series C Cumulative Redeemable Preferred Stock (the “Offering”). In connection with the Offering, the Company disclosed preliminary estimates of recent financial results for the quarter ended March 31, 2019 in a preliminary prospectus supplement. Such disclosure is excerpted below.

Preliminary Estimates of Recent Financial Results

Although our unaudited consolidated financial statements for the three months ended March 31, 2019 are not yet available, we estimate that our rental and related income for the three months ended March 31, 2019 totaled approximately \$30.6 million as compared to \$27.3 million for the three months ended March 31, 2018, an estimated increase of approximately 12%. We estimate that sales of manufactured homes for the three months ended March 31, 2019 totaled approximately \$3.6 million as compared to \$2.5 million for the three months ended March 31, 2018, an estimated increase of approximately 44%. In addition, we estimate that for the three months ended March 31, 2019, our same property occupancy, which includes communities owned and operated as of January 1, 2018, was approximately 83.1% as compared to 81.9% for the three months ended March 31, 2018, an estimated increase of approximately 120 basis points. We estimate an increase in fair value of marketable securities of approximately \$8.6 million for the three months ended March 31, 2019 as compared to a decrease in fair value of marketable securities of approximately \$25.9 million for the three months ended March 31, 2018. We also estimate that dividend income was approximately \$1.9 million for the three months ended March 31, 2019 as compared to \$2.4 million for the three months ended March 31, 2018. We estimate that net income attributable to common shareholders for the three months ended March 31, 2019 was approximately \$5.9 million, or \$0.15 per diluted share, as compared to a net loss attributable to common shareholders of \$27.2 million, or \$0.76 per diluted share, for the three months ended March 31, 2018.

We also estimate that our normalized funds from operations attributable to common shareholders (“Normalized FFO”) for the three months ended March 31, 2019 totaled approximately \$6.5 million, or \$0.17 per diluted share, as compared to \$6.3 million, or \$0.18 per diluted share, for the three months ended March 31, 2018. Management believes that Normalized FFO is a useful indicator of our operating performance. Normalized FFO is used by industry analysts and investors as a supplemental operating performance measure of a real estate investment trust. We define Normalized FFO as net income (loss) attributable to common shareholders, as defined by accounting principles generally accepted in the United States of America (“U.S. GAAP”), excluding extraordinary items, as defined under U.S. GAAP, gains or losses from sales of previously depreciated real estate assets, impairment charges related to depreciable real estate assets, acquisition costs, costs of early extinguishment of debt, change in the fair value of marketable securities, costs associated with the Redemption of Preferred Stock, gains and losses realized on marketable securities investments and certain one-time charges, plus certain non-cash items such as real estate asset depreciation and amortization. Normalized FFO (i) does not represent Cash Flow from Operations as defined by U.S. GAAP; (ii) should not be considered as an alternative to net income (loss) as a measure of operating performance or to cash flows from operating, investing and financing activities; and (iii) is not an alternative to cash flow as a measure of liquidity.
