United States Natural Gas Fund, LP  
Notes to Condensed Financial Statements  
For the period ended September 30, 2009 (Unaudited)

NOTE 1 - ORGANIZATION AND BUSINESS

The United States Natural Gas Fund, LP (“USNG”) was organized as a limited partnership under the laws of the state of Delaware on September 11, 2006. USNG is a commodity pool that issues limited partnership units (“units”) that may be purchased and sold on the NYSE Arca, Inc. (the “NYSE Arca”). Prior to November 25, 2008, USNG’s units traded on the American Stock Exchange (the “AMEX”). USNG will continue in perpetuity, unless terminated sooner upon the occurrence of one or more events as described in its Second Amended and Restated Agreement of Limited Partnership dated as of December 4, 2007 (the “LP Agreement”). The investment objective of USNG is to have the changes in percentage terms of its units’ net asset value reflect the changes in percentage terms of the spot price of natural gas delivered at the Henry Hub, Louisiana as measured by the changes in the price of the futures contract on natural gas as traded on the New York Mercantile Exchange (the “NYMEX”) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case the futures contract will become the next month contract to expire, less USNG’s expenses. USNG accomplishes its objective through investments in futures contracts for natural gas, crude oil, heating oil, gasoline and other petroleum-based fuels that are traded on the NYMEX, ICE Futures or other U.S. and foreign exchanges (collectively, “Futures Contracts”) and other natural gas-related investments such as cash-settled options on Futures Contracts, forward contracts for natural gas, cleared swap contracts and over-the-counter transactions that are based on the price of natural gas, crude oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, “Other Natural Gas-Related Investments”). As of September 30, 2009, USNG held 80,350 Futures Contracts traded on the NYMEX and 100,610 cleared swap contracts traded on the ICE Futures and over-the-counter swap transactions with two counterparties.

USNG commenced investment operations on April 18, 2007 and has a fiscal year ending on December 31. United States Commodity Funds LLC (formerly known as Victoria Bay Asset Management, LLC) (the “General Partner”) is responsible for the management of USNG. The General Partner is a member of the National Futures Association (the “NFA”) and became a commodity pool operator registered with the Commodity Futures Trading Commission effective December 1, 2005. The General Partner is also the general partner of the United States Oil Fund, LP (“USOF”), the United States 12 Month Oil Fund, LP (“US12OF”), the United States Gasoline Fund, LP (“UGA”) and the United States Heating Oil Fund, LP (“USHO”), which listed their limited partnership units on the AMEX under the ticker symbols “USO” on April 10, 2006, “USL” on December 6, 2007, “UGA” on February 26, 2008 and “UHN” on April 9, 2008 respectively. As a result of the acquisition of the AMEX by NYSE Euronext, each of USOF’s, US12OF’s, UGA’s and USHO’s units commenced trading on the NYSE Arca on November 25, 2008. The General Partner is also the general partner of the United States Short Oil Fund, LP (“USSO”), which listed its limited partnership units on the NYSE Arca on September 24, 2009. The General Partner has also filed registration statements to register units of the United States 12 Month Natural Gas Fund, LP and the United States Brent Oil Fund, LP.

The accompanying unaudited condensed financial statements have been prepared in accordance with Rule 10-01 of Regulation S-X promulgated by the U.S. Securities and Exchange Commission (the “SEC”) and, therefore, do not include all information and footnote disclosure required under accounting principles generally accepted in the United States of America. The financial information included herein is unaudited; however, such financial information reflects all adjustments which are, in the opinion of management, necessary for the fair presentation of the condensed financial statements for the interim period.

USNG issues units to certain authorized purchasers (“Authorized Purchasers”) by offering baskets consisting of 100,000 units (“Creation Baskets”) through ALPS Distributors, Inc. (the “Marketing Agent”). The purchase price for a Creation Basket is based upon the net asset value of a unit calculated shortly after the close of the core trading session on the

NYSE Arca on the day the order to create the basket is properly received.

In addition, Authorized Purchasers pay USNG a \$1,000 fee for each order to create one or more Creation Baskets or redeem one or more baskets consisting of 100,000 units (“Redemption Baskets”). Units may be purchased or sold on a nationally recognized securities exchange in smaller increments than a Creation Basket or Redemption Basket. Units purchased or sold on a nationally recognized securities exchange are not purchased or sold at the net asset value of USNG but rather at market prices quoted on such exchange.

In April 2007, USNG initially registered 30,000,000 units on Form S-1 with the SEC. On April 18, 2007, USNG listed its units on the AMEX under the ticker symbol "UNG". On that day, USNG established its initial net asset value by setting the price at \$50.00 per unit and issued 200,000 units in exchange for \$10,001,000. USNG also commenced investment operations on April 18, 2007 by purchasing Futures Contracts traded on the NYMEX based on natural gas. As of September 30, 2009, USNG had registered a total of 1,480,000,000 units, 347,400,000 of which were outstanding.

## NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Revenue Recognition

Commodity futures contracts, forward contracts, physical commodities and related options are recorded on the trade date. All such transactions are recorded on the identified cost basis and marked to market daily. Unrealized gains or losses on open contracts are reflected in the condensed statement of financial condition and in the difference between the original contract amount and the market value (as determined by exchange settlement prices for futures contracts and related options and cash dealer prices at a predetermined time for forward contracts, physical commodities, and their related options) as of the last business day of the year or as of the last date of the condensed financial statements. Changes in the unrealized gains or losses between periods are reflected in the condensed statement of operations. USNG earns interest on its assets denominated in U.S. dollars on deposit with the futures commission merchant at the overnight Federal Funds Rate less 32 basis points. In addition, USNG earns interest on funds held at the custodian at prevailing market rates earned on such investments.

Investments in over-the-counter swap contracts (see Note 5) are arrangements to exchange a periodic payment for a market-linked return, each based on a notional amount. To the extent that the total return of the security or index underlying the transaction exceeds or falls short of the offsetting periodic payment obligation, USNG receives a payment from, or makes a payment to, the swap counterparty. The over-the-counter swap contracts are valued daily based upon the appreciation or depreciation of the underlying securities subsequent to the effective date of the contract. Changes in the value of the swaps are reported as unrealized gains and losses and periodic payments are recorded as realized gains or losses in the accompanying condensed statements of operations.

### Brokerage Commissions

Brokerage commissions on all open commodity futures contracts are accrued on a full-turn basis.

### Swap Premiums

Upfront fees paid by USNG for over-the-counter swap contracts are reflected on the condensed statements of financial condition and represent payments made upon entering into a swap agreement to compensate for differences between the stated terms of the agreement and prevailing market conditions. The fees are amortized daily over the term of the swap agreement.

### Income Taxes

USNG is not subject to federal income taxes; each partner reports his/her allocable share of income, gain, loss deductions or credits on his/her own income tax return.

### Additions and Redemptions

Authorized Purchasers may purchase Creation Baskets or redeem Redemption Baskets only in blocks of 100,000 units equal to the net asset value of the units calculated shortly after the close of the core trading session on the NYSE Arca on the day the order is placed.

USNG receives or pays the proceeds from units sold or redeemed within three business days after the trade date of the purchase or redemption. The amounts due from Authorized Purchasers are reflected in USNG's condensed statement of financial condition as receivable for units sold, and amounts payable to Authorized Purchasers upon redemption are reflected as payable for units redeemed.

#### Partnership Capital and Allocation of Partnership Income and Losses

Profit or loss shall be allocated among the partners of USNG in proportion to the number of units each partner holds as of the close of each month. The General Partner may revise, alter or otherwise modify this method of allocation as described in the LP Agreement.

#### Calculation of Net Asset Value

USNG's net asset value is calculated on each NYSE Arca trading day by taking the current market value of its total assets, subtracting any liabilities and dividing the amount by the total number of units issued and outstanding. USNG uses the closing price for the contracts on the relevant exchange on that day to determine the value of contracts held on such exchange.

### Net Income (Loss) per Unit

Net income (loss) per unit is the difference between the net asset value per unit at the beginning of each period and at the end of each period. The weighted average number of units outstanding was computed for purposes of disclosing net income (loss) per weighted average unit. The weighted average units are equal to the number of units outstanding at the end of the period, adjusted proportionately for units redeemed based on the amount of time the units were outstanding during such period. There were no units held by the General Partner at September 30, 2009.

### Offering Costs

Offering costs incurred in connection with the registration of additional units after the initial registration of units are borne by USNG. These costs include registration fees paid to regulatory agencies and all legal, accounting, printing and other expenses associated with such offerings. These costs will be accounted for as a deferred charge and thereafter amortized to expense over twelve months on a straight-line basis or a shorter period if warranted.

### Cash Equivalents

Cash equivalents include money market funds and overnight deposits or time deposits with original maturity dates of three months or less.

### Use of Estimates

The preparation of condensed financial statements in conformity with accounting principles generally accepted in the United States of America requires USNG's management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed financial statements, and the reported amounts of the revenue and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

### NOTE 3 - FEES PAID BY THE FUND AND RELATED PARTY TRANSACTIONS

#### General Partner Management Fee

Under the LP Agreement, the General Partner is responsible for investing the assets of USNG in accordance with the objectives and policies of USNG. In addition, the General Partner has arranged for one or more third parties to provide administrative, custody, accounting, transfer agency and other necessary services to USNG. For these services, USNG is contractually obligated to pay the General Partner a fee, which is paid monthly and based on average daily net assets, that is equal to 0.60% per annum on average daily net assets of \$1,000,000,000 or less and 0.50% per annum on average daily net assets that are greater than \$1,000,000,000.

#### Ongoing Registration Fees and Other Offering Expenses

USNG pays all costs and expenses associated with the ongoing registration of its units subsequent to the initial offering. These costs include registration or other fees paid to regulatory agencies in connection with the offer and sale of units, and all legal, accounting, printing and other expenses associated with such offer and sale. For the nine months ended September 30, 2009 and 2008, USNG incurred \$1,086,478 and \$216,699, respectively, in registration fees and other offering expenses.

#### Directors' Fees

USNG is responsible for paying its portion of the directors' and officers' liability insurance of the General Partner and the fees and expenses of the independent directors of the General Partner who are also the General Partner's audit committee members. USNG shares these fees with USOF, US12OF, UGA, USHO and USSO based on the relative assets of each fund, computed on a daily basis. These fees for the calendar year 2009 are estimated to be a total of \$477,000 for all funds.

#### Licensing Fees

As discussed in Note 4, USNG entered into a licensing agreement with the NYMEX on May 30, 2007. Pursuant to the agreement, USNG and the affiliated funds managed by the General Partner pay a licensing fee that is equal to 0.04% for the first \$1,000,000,000 of combined assets of the funds and 0.02% for combined assets above \$1,000,000,000. During the nine months ended September 30, 2009 and 2008, USNG incurred \$388,475 and \$175,384, respectively, under this arrangement.

#### Investor Tax Reporting Cost

The fees and expenses associated with USNG's audit expenses and tax accounting and reporting requirements, with the exception of certain initial implementation service fees and base service fees which are borne by the General Partner, are paid by USNG.

#### Other Expenses and Fees

In addition to the fees described above, USNG pays all brokerage fees, transaction costs for over-the-counter swaps, taxes and other expenses in connection with the operation of USNG, excluding costs and expenses paid by the General Partner as outlined in Note 4.

#### NOTE 4 - CONTRACTS AND AGREEMENTS

USNG is party to a marketing agent agreement, dated as of April 17, 2007, with the Marketing Agent and the General Partner, whereby the Marketing Agent provides certain marketing services for USNG as outlined in the agreement. The fee of the Marketing Agent, which is borne by the General Partner, is equal to 0.06% on USNG's assets up to \$3 billion; and 0.04% on USNG's assets in excess of \$3 billion.

The above fee does not include the following expenses, which are also borne by the General Partner: the cost of placing advertisements in various periodicals; web construction and development; or the printing and production of various marketing materials.

USNG is also party to a custodian agreement, dated January 12, 2007, with Brown Brothers Harriman & Co. ("BBH&Co.") and the General Partner, whereby BBH&Co. holds investments on behalf of USNG. The General Partner pays the fees of the custodian, which are determined by the parties from time to time. In addition, USNG is party to an administrative agency agreement, dated March 5, 2007, with the General Partner and BBH&Co., whereby BBH&Co. acts as the administrative agent, transfer agent and registrar for USNG. The General Partner also pays the fees of BBH&Co. for its services under this agreement and such fees are determined by the parties from time to time.

Currently, the General Partner pays BBH&Co. for its services, in the foregoing capacities, a minimum amount of \$75,000 annually for its custody, fund accounting and fund administration services rendered to USNG and each of the affiliated funds managed by the General Partner, as well as a \$20,000 annual fee for its transfer agency services. In addition, the General Partner pays BBH&Co. an asset-based charge of (a) 0.06% for the first \$500 million of USNG's, USOF's, US12OF's, UGA's, USHO's and USSO's combined net assets, (b) 0.0465% for USNG's, USOF's, US12OF's, UGA's, USHO's and USSO's combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% once USNG's, USOF's, US12OF's, UGA's, USHO's and USSO's combined net assets exceed \$1 billion. The annual minimum amount will not apply if the asset-based charge for all accounts in the aggregate exceeds \$75,000. The General Partner also pays transaction fees ranging from \$7.00 to \$15.00 per transaction.

USNG has entered into a brokerage agreement with UBS Securities LLC (“UBS Securities”). The agreement requires UBS Securities to provide services to USNG in connection with the purchase and sale of Futures Contracts and Other Natural Gas-Related Investments that may be purchased and sold by or through UBS Securities for USNG’s account. The agreement provides that UBS Securities charge USNG commissions of approximately \$7 per round-turn trade, plus applicable exchange and NFA fees for Futures Contracts and options on Futures Contracts.

On May 30, 2007, USNG and the NYMEX entered into a licensing agreement whereby USNG was granted a non-exclusive license to use certain of the NYMEX’s settlement prices and service marks. Under the licensing agreement, USNG and the affiliated funds managed by the General Partner pay the NYMEX an asset-based fee for the license, the terms of which are described in Note 3.

USNG expressly disclaims any association with the NYMEX or endorsement of USNG by the NYMEX and acknowledges that “NYMEX” and “New York Mercantile Exchange” are registered trademarks of the NYMEX.

#### NOTE 5 - FINANCIAL INSTRUMENTS, OFF-BALANCE SHEET RISKS AND CONTINGENCIES

USNG engages in the trading of futures contracts, options on futures contracts, cleared swaps and over-the-counter swaps (collectively, “derivatives”). USNG is exposed to both market risk, which is the risk arising from changes in the market value of the contracts, and credit risk, which is the risk of failure by another party to perform according to the terms of a contract.

USNG may enter into futures contracts, options on futures contracts, cleared swaps and over-the-counter swaps to gain exposure to changes in the value of an underlying commodity. A futures contract obligates the seller to deliver (and the purchaser to accept) the future delivery of a specified quantity and type of a commodity at a specified time and place. Some futures contracts may call for physical delivery of the asset, while others are settled in cash. The contractual obligations of a buyer or seller may generally be satisfied by taking or making physical delivery of the underlying commodity or by making an offsetting sale or purchase of an identical futures contract on the same or linked exchange before the designated date of delivery. Cleared swaps are over-the-counter (“OTC”) agreements that are eligible to be cleared by a clearinghouse, e.g., ICE Clear U.S., but which are not traded on an exchange. A cleared swap is created when the parties to an off-exchange OTC transaction agree to extinguish their OTC contract and replace it with a cleared swap. Cleared swaps are intended to provide the efficiencies and benefits that centralized clearing on an exchange offers to traders of futures contracts, including credit risk intermediation and the ability to offset positions initiated with different counterparties.

The purchase and sale of futures contracts, options on futures contracts and cleared swaps require margin deposits with a futures commission merchant. Additional deposits may be necessary for any loss on contract value. The Commodity Exchange Act requires a futures commission merchant to segregate all customer transactions and assets from the futures commission merchant’s proprietary activities.

Futures contracts and cleared swaps involve, to varying degrees, elements of market risk (specifically commodity price risk) and exposure to loss in excess of the amount of variation margin. The face or contract amounts reflect the extent of the total exposure USNG has in the particular classes of instruments. Additional risks associated with the use of futures contracts are an imperfect correlation between movements in the price of the futures contracts and the market value of the underlying securities and the possibility of an illiquid market for a futures contract.

All of USNG’s investment contracts through September 30, 2009 have been exchange-traded futures contracts, cleared swaps or fully-collateralized over-the-counter swaps. The liquidity and credit risks associated with exchange-traded contracts and cleared swaps are generally perceived to be less than those associated with over-the-counter transactions since, in over-the-counter transactions, USNG must rely solely on the credit of its respective individual counterparties. As of September 30, 2009, USNG has entered into over-the-counter transactions with two counterparties. Subsequent to September 30, 2009, USNG has entered into over-the-counter transactions with three additional counterparties. Over-the-counter transactions subject USNG to the credit risk associated with counterparty non-performance. The credit risk from counterparty non-performance associated with such instruments is the net unrealized gain, if any, on the transaction. USNG also has credit risk under its futures contracts since the sole counterparty to all domestic and foreign futures contracts is the exchange on which the relevant contracts are traded. However, as compared to its over-the-counter transactions, it may more easily realize value by reselling its futures contracts. In addition, USNG bears the risk of financial failure by the clearing broker.

At September 30, 2009, USNG’s counterparties posted \$96,070,000 in cash and \$0 in securities as collateral with USNG’s custodian, as compared with the prior period for which no collateral was posted since USNG had not yet

entered into any swaps. Under these agreements, USNG posted collateral with respect to its obligations of \$134,910,105 at September 30, 2009, while no collateral was posted for the prior period.

USNG's cash and other property, such as U.S. Treasuries, deposited with a futures commission merchant are considered commingled with all other customer funds subject to the futures commission merchant's segregation requirements. In the event of a futures commission merchant's insolvency, recovery may be limited to a pro rata share of segregated funds available. It is possible that the recovered amount could be less than the total of cash and other property deposited. The insolvency of a futures commission merchant could result in the complete loss of USNG's assets posted with that futures commission merchant; however, the vast majority of USNG's assets are held in Treasuries, cash and/or cash equivalents with USNG's custodian and would not be impacted by the insolvency of a futures commission merchant. Also, the failure or insolvency of USNG's custodian could result in a substantial loss of USNG's assets.

USNG invests its cash in money market funds that seek to maintain a stable net asset value. USNG is exposed to any risk of loss associated with an investment in these money market funds. As of September 30, 2009 and December 31, 2008, USNG had deposits in domestic and foreign financial institutions, including cash investments in money market funds, in the amounts of \$3,671,896,465 and \$713,549,385, respectively. This amount is subject to loss should these institutions cease operations.

For derivatives, risks arise from changes in the market value of the contracts. Theoretically, USNG is exposed to a market risk equal to the value of futures contracts purchased and unlimited liability on such contracts sold short. As both a buyer and a seller of options, USNG pays or receives a premium at the outset and then bears the risk of unfavorable changes in the price of the contract underlying the option.

USNG's policy is to continuously monitor its exposure to market and counterparty risk through the use of a variety of financial, position and credit exposure reporting controls and procedures. In addition, USNG has a policy of requiring review of the credit standing of each broker or counterparty with which it conducts business.

The financial instruments held by USNG are reported in its condensed statement of financial condition at market or fair value, or at carrying amounts that approximate fair value, because of their highly liquid nature and short-term maturity.

#### NOTE 6 – FAIR VALUE OF FINANCIAL INSTRUMENTS

Effective January 1, 2008, USNG adopted Accounting Standards Codification 820 – Fair Value Measurements and Disclosures (“ASC 820”). ASC 820 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The changes to past practice resulting from the application of ASC 820 relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurement. ASC 820 establishes a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from sources independent of USNG (observable inputs) and (2) USNG's own assumptions about market participant assumptions developed based on the best information available under the circumstances (unobservable inputs). The three levels defined by the ASC 820 hierarchy are as follows:

Level I – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level II – Inputs other than quoted prices included within Level I that are observable for the asset or liability, either directly or indirectly. Level II assets include the following: quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs).

Level III – Unobservable pricing input at the measurement date for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available.

In some instances, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest input level that is significant to the fair value measurement in its entirety.

The following table summarizes the valuation of USNG's securities at September 30, 2009 using the fair value hierarchy:

| At September 30, 2009                        | Total            | Level I          | Level II | Level III  |
|--|------------------|------------------|----------|------------|
| Short-Term Investments                       | \$ 1,850,871,341 | \$ 1,850,871,341 | \$ —     | —          |
| Exchange-Traded Futures Contracts            | 259,412,845      | 259,412,845      | —        | —          |
| Exchange-Traded Cleared Swap Contracts       | 102,820,588      | 102,820,588      | —        | —          |
| Over-the-Counter Total Return Swap Contracts | 45,339,121       | —                | —        | 45,339,121 |

Following is a reconciliation of assets in which significant observable inputs (Level 3) were used in determining fair value:

|                                | Level 3<br>Beginning<br>Balance<br>January<br>1,<br>2009 | Net<br>Transfers<br>In and<br>or (Out)<br>of Level<br>3 | Realized<br>and<br>Unrealized<br>Gain (Loss) | Net<br>Purchases<br>(Sales) | Level 3<br>Ending<br>Balance<br>September 30,<br>2009 | Unrealized<br>Gain of<br>Investments<br>Still Held at<br>September 30,<br>2009 |
|--------------------------------|--|---|--|-----------------------------|---|--|
| Total Return Swap<br>Contracts | \$ -   | \$ -  | \$ 42,008,446                                | \$ 3,330,675                | \$ 45,339,121   | \$ 45,339,121  |

Effective January 1, 2009, USNG adopted the provisions of Accounting Standards Codification 815 - Derivatives and Hedging, which require presentation of qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts and gains and losses on derivatives.

## NOTE 7 - FINANCIAL HIGHLIGHTS

The following table presents per unit performance data and other supplemental financial data for the nine months ended September 30, 2009 and 2008 for the unitholders. This information has been derived from information presented in the condensed financial statements.

|  | For the nine months ended |                  | For the nine months ended |                 |
|--|---------------------------|------------------|---------------------------|-----------------|
|  | September 30, 2009        |                  | September 30, 2008        |                 |
|  | (Unaudited)               |                  | (Unaudited)               |                 |
| <b>Per Unit Operating Performance:</b> |                           |                  |                           |                 |
| Net asset value, beginning of period   | \$                        | 23.27            | \$                        | 36.18           |
| Total loss                             |                           | (11.57)          |                           | (2.80)          |
| Total expenses                         |                           | (0.13)           |                           | (0.31)          |
| Net decrease in net asset value        |                           | (11.70)          |                           | (3.11)          |
| Net asset value, end of period         | \$                        | 11.57            | \$                        | 33.07           |
| <b>Total Return</b>                    |                           | <b>(50.28) %</b> |                           | <b>(8.60) %</b> |

| Ratios to Average Net Assets        |           |           |
|-------------------------------------|-----------|-----------|
| Total loss                          | (50.37) % | (27.93) % |
| Expenses excluding management fees* | 0.84%     | 0.33%     |
| Management fees*                    | 0.54%     | 0.60%     |
| Net loss                            | (51.40) % | (28.62) % |

\*Annualized

Total returns are calculated based on the change in value during the period. An individual unitholder's total return and ratio may vary from the above total returns and ratios based on the timing of contributions to and withdrawals from USNG.

NOTE 8 – RECENTLY ADOPTED ACCOUNTING STANDARDS

In March 2008, the Financial Accounting Standards Board (the “FASB”) released Accounting Standards Codification 815 – Derivatives and Hedging (“ASC 815”). ASC 815 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of, and gains and losses on, derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. USNG adopted ASC 815 on January 1, 2009.

NOTE 9 – SUBSEQUENT EVENTS

USNG has performed an evaluation of subsequent events through November 9, 2009, which is the date the financial statements were issued. This evaluation did not result in any subsequent events that necessitated disclosures and/or adjustments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the condensed financial statements and the notes thereto of the United States Natural Gas Fund, LP ("USNG") included elsewhere in this quarterly report on Form 10-Q.

Forward-Looking Information

This quarterly report on Form 10-Q, including this "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains forward-looking statements regarding the plans and objectives of management for future operations. This information may involve known and unknown risks, uncertainties and other factors that may cause USNG's actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe USNG's future plans, strategies and expectations, are generally identifiable by use of the words "may," "will," "should," "expect," "anticipate," "estimate," "believe," "intend" or "project," the negative of these words or variations on these words or comparable terminology. These forward-looking statements are based on assumptions that may be incorrect, and USNG cannot assure investors that the projections included in these forward-looking statements will come to pass. USNG's actual results could differ materially from those expressed or implied by the forward-looking statements as a result of various factors.

USNG has based the forward-looking statements included in this quarterly report on Form 10-Q on information available to it on the date of this quarterly report on Form 10-Q, and USNG assumes no obligation to update any such forward-looking statements. Although USNG undertakes no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, investors are advised to consult any additional disclosures that USNG may make directly to them or through reports that USNG in the future files with the U.S. Securities and Exchange Commission (the "SEC"), including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Introduction

USNG, a Delaware limited partnership, is a commodity pool that issues units that may be purchased and sold on the NYSE Arca, Inc. (the "NYSE Arca"). The investment objective of USNG is to have the changes in percentage terms of its units' net asset value ("NAV") reflect the changes in percentage terms of the spot price of natural gas delivered at the Henry Hub, Louisiana, as measured by the changes in the price of the futures contract on natural gas as traded on the New York Mercantile Exchange (the "NYMEX") that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will become, the futures contract that is the next month contract to expire (the "Benchmark Futures Contract"), less USNG's expenses.

USNG seeks to achieve its investment objective by investing in a combination of natural gas futures contracts and other natural gas-related investments such that changes in its NAV, measured in percentage terms, will closely track the changes in the price of the Benchmark Futures Contract, also measured in percentage terms. USNG's general partner believes the Benchmark Futures Contract historically has exhibited a close correlation with the spot price of natural gas. It is not the intent of USNG to be operated in a fashion such that the NAV will equal, in dollar terms, the spot price of natural gas or any particular futures contract based on natural gas. Management believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in listed natural gas futures contracts and other natural gas-related investments.

On any valuation day, the Benchmark Futures Contract is the near month futures contract for natural gas traded on the NYMEX unless the near month contract will expire within two weeks of the valuation day, in which case the Benchmark Futures Contract becomes, over a 4-day period, the next month contract for natural gas traded on the NYMEX. "Near month contract" means the next contract traded on the NYMEX due to expire. "Next month contract" means the first contract traded on the NYMEX due to expire after the near month contract.

USNG may also invest in futures contracts for crude oil, heating oil, gasoline and other petroleum-based fuels that are traded on the NYMEX, ICE Futures or other U.S. and foreign exchanges (collectively, "Futures Contracts") and other natural gas-related investments such as cash-settled options on Futures Contracts, forward contracts for natural gas cleared swap contracts and over-the-counter transactions that are based on the price of natural gas, crude oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, "Other Natural Gas-Related Investments"). For convenience and unless otherwise specified, Futures Contracts and Other Natural Gas-Related Investments collectively are referred to as "Natural Gas Interests" in this quarterly report on Form 10-Q. Due, in part, to the increased size of USNG over the last several quarters and its obligation to comply with regulatory limits, it is likely that it will invest in increased numbers of Other Natural Gas-Related Investments in order to fulfill its investment objective.

The regulation of Natural Gas Interests in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. As stated in the section "What are the Risk Factors Involved with an Investment in USNG?" of USNG's prospectus as filed with the SEC, regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments in the commodity interests and energy markets are impossible to predict but may significantly and adversely affect USNG.

Currently, a number of proposals that would alter the regulation of Natural Gas Interests are being considered by federal regulators and Congress. These proposals include the imposition of fixed position limits on energy-based commodity futures contracts, extension of position and accountability limits to futures contracts on non-U.S. exchanges previously exempt from such limits, and the forced use of clearinghouse mechanisms for all over-the-counter transactions. Certain proposals would aggregate and limit all positions in energy futures held by a single entity, whether such positions exist on U.S. futures exchanges, non-U.S. futures exchanges, or in over-the-counter contracts. While it cannot be predicted at this time what reforms will eventually be made or how they will impact USNG, if any of the aforementioned proposals is implemented, USNG's ability to meet its investment objective may be negatively impacted and investors could be adversely affected.

In addition, due to potential regulatory limitations, USNG may determine to hold greater amounts of cash and cash equivalents and lesser amounts of Natural Gas Interests, or greater amounts of Other Natural Gas-Related Investments if it determines that will most appropriately satisfy USNG's investment objective. Holding more cash and cash equivalents and less Natural Gas Interests, or more Other Natural Gas-Related Investments for some period of time may result in increased tracking error. Increasing USNG's investments in Other Natural Gas-Related Investments, such as through increased investments in over-the-counter swaps, may result in increased tracking error due to the fact that transaction costs for over-the-counter swaps are significantly higher as compared to those for exchange-traded Natural

Gas Interests, which to date are the principal investment of USNG. In the event that USNG determines that suitable Other Natural Gas-Related Investments are not obtainable, USNG will need to consider other actions to protect its unitholders and to permit USNG to achieve its investment objectives.

The general partner of USNG, United States Commodity Funds LLC (formerly, Victoria Bay Asset Management, LLC) (the “General Partner”), which is registered as a commodity pool operator (“CPO”) with the U.S. Commodity Futures Trading Commission (the “CFTC”), is authorized by the Second Amended and Restated Agreement of Limited Partnership of USNG (the “LP Agreement”) to manage USNG. The General Partner is authorized by USNG in its sole judgment to employ and establish the terms of employment for, and termination of, commodity trading advisors or futures commission merchants.

Natural gas futures prices exhibited a general downtrend during the nine months ended September 30, 2009. The price of the Benchmark Futures Contract started the year at \$5.971. It hit a peak on January 5, 2009 of \$6.072 and then fell over the course of the period. The low price of the period was on September 3, 2009 when prices reached \$2.058. The period ended with the Benchmark Futures Contract at \$4.841, down approximately 13.89% over the period. Similarly, USNG's NAV initially rose during the period from a starting level of \$23.27 per unit to a high on January 5, 2009 of \$25.30 per unit. USNG's NAV reached its low for the period on September 3, 2009 at \$7.73 per unit. The NAV on September 30, 2009 was \$11.57, down approximately 50.28% over the period.

For the first month of 2009, the natural gas futures market remained in a state of backwardation, meaning that the price of the near month natural gas futures contract was typically higher than the price of the next month natural gas futures contract, or contracts further away from expiration. For the rest of the first quarter and for the second and third quarters of 2009, the natural gas futures market moved into a contango market, with short periods of backwardation. A contango market is one in which the price of the near month natural gas futures contract is less than the price of the next month natural gas futures contract, or contracts further away from expiration. As a result of contango or backwardation, as the case may be, the return of approximately -13.89% on the Benchmark Futures Contract listed above is a hypothetical return only and could not actually be achieved by an investor holding futures contracts. For a discussion of the impact of backwardation and contango on total returns, see "Term Structure of Natural Gas Futures Prices and the Impact on Total Returns".

#### Valuation of Futures Contracts and the Computation of the NAV

The NAV of USNG units is calculated once each NYSE Arca trading day. The NAV for a particular trading day is released after 4:00 p.m. New York time. Trading during the core trading session on the NYSE Arca typically closes at 4:00 p.m. New York time. USNG's administrator uses the NYMEX closing price (determined at the earlier of the close of the NYMEX or 2:30 p.m. New York time) for the contracts held on the NYMEX, but calculates or determines the value of all other USNG investments, including cleared swaps or other futures contracts, as of the earlier of the close of the New York Stock Exchange or 4:00 p.m. New York time.

#### Results of Operations and the Natural Gas Market

Results of Operations. On April 18, 2007, USNG listed its units on the American Stock Exchange (the "AMEX") under the ticker symbol "UNG." On that day, USNG established its initial offering price at \$50.00 per unit and issued 200,000 units to the initial authorized purchaser, Merrill Lynch Professional Clearing Corp., in exchange for \$10,001,000 in cash. As a result of the acquisition of the AMEX by NYSE Euronext, USNG's units no longer trade on the AMEX and commenced trading on the NYSE Arca on November 25, 2008.

Since its initial offering of 30,000,000 units, USNG has made four subsequent offerings of its units: 50,000,000 units which were registered with the SEC on November 21, 2007, 100,000,000 units which were registered with the SEC on August 28, 2008, 300,000,000 units which were registered with the SEC on May 6, 2009 and an additional 1,000,000,000 units which were registered with the SEC on August 12, 2009. As of September 30, 2009, USNG had issued 480,000,000 units, 347,400,000 of which were outstanding. As of September 30, 2009, there were 1,000,000,000 units registered but not yet issued. On August 11, 2009, USNG's management determined to suspend offerings of USNG's units since it could not invest the proceeds from such offerings in investments that would permit it to meet its investment objective due to current and anticipated new regulatory restrictions and limitations on its investments in Futures Contracts. This suspension of creation activity may have led to an increase in USNG's tracking error and, at times, a greater premium paid for transactions in its units on the NYSE Arca when compared to its per unit NAV on the same day. On September 28, 2009, USNG resumed offerings of units subject to certain limitations including that (1) USNG may require authorized purchasers of its units ("Authorized Purchasers") to sell USNG specified investments, including the arrangement of an over-the-counter swap contract between the Authorized

Purchaser and USNG, (2) USNG may limit its issuance of creation baskets to an Authorized Purchaser to a specified minimum or maximum number of baskets, (3) USNG's management may vary the terms and conditions of investments to be delivered or arranged by an Authorized Purchaser in order to purchase a creation basket and (4) USNG's management may decide to offer creation baskets only on particular days. Units offered by USNG in the subsequent offerings were sold by it for cash at the units' NAV as described in the applicable prospectus.

More units may have been issued by USNG than are outstanding due to the redemption of units. Unlike funds that are registered under the Investment Company Act of 1940, as amended, units that have been redeemed by USNG cannot be resold by USNG. As a result, USNG contemplates that additional offerings of its units will be registered with the SEC in the future in anticipation of additional issuances and redemptions.

For the Nine Months Ended September 30, 2009 Compared to the Nine Months Ended September 30, 2008

As of September 30, 2009, the total unrealized gain on natural gas Futures Contracts, cleared swap contracts and over-the-counter swap contracts owned or held on that day was \$304,751,966 and USNG established cash deposits, including cash investments in money market funds, that were equal to \$3,671,896,465. USNG held 80.49% of its cash assets in overnight deposits and money market funds at its custodian bank, while 19.51% of the cash balance was held with the futures commission merchant as margin deposits for the Futures Contracts purchased. The ending per unit NAV on September 30, 2009 was \$11.57.

By comparison, as of September 30, 2008, the total unrealized loss on natural gas Futures Contracts owned or held on that day was \$55,301,140 and USNG established cash deposits, including cash investments in money market funds, that were equal to \$1,147,517,640. USNG held 65.04% of its cash assets in overnight deposits and money market funds at its custodian bank, while 34.96% of the cash balance was held with the futures commission merchant as margin deposits for the Futures Contracts purchased. The increase in cash assets in overnight deposits and money market funds from September 30, 2008 to September 30, 2009 was the result of a greater portion of USNG's assets consisting of over-the-counter contracts and cleared swaps. The ending per unit NAV on September 30, 2008 was \$33.07. The decrease in the per unit NAV from September 30, 2008 to September 30, 2009 was primarily a result of sharply lower prices for natural gas and the related decline in the value of the natural gas futures contracts that USNG had invested in between the period ended September 30, 2008 and the period ended September 30, 2009.

**Portfolio Expenses.** USNG's expenses consist of investment management fees, brokerage fees and commissions, certain offering costs, licensing fees, the fees and expenses of the independent directors of the General Partner and other extraordinary expenses. The management fee that USNG pays to the General Partner is calculated as a percentage of the total net assets of USNG. For total net assets of up to \$1 billion, the management fee is 0.60%. For total net assets over \$1 billion, the management fee is 0.50% on the incremental amount of assets. The fee is accrued daily.

During the nine months ended September 30, 2009, the daily average total net assets of USNG were \$2,207,965,179. The management fee paid by USNG during the period amounted to \$8,923,338, which was calculated at the 0.60% rate on total net assets up to and including \$1 billion and at the rate of 0.50% on total net assets over \$1 billion, and accrued daily. Management fees as a percentage of average net assets averaged 0.54% over the course of this nine month period. By comparison, during the nine months ended September 30, 2008, the daily average total net assets of USNG were \$711,569,945. The management fee paid by USNG during the period amounted to \$3,177,614, which was calculated at the 0.60% rate for total net assets up to and including \$1 billion and at the rate of 0.50% on total net assets over \$1 billion, and accrued daily. Management fees as a percentage of average net assets averaged 0.60% over the course of this nine month period. Management fees as a percentage of average net assets were lower for the nine months ended September 30, 2009 compared to the nine months ended September 30, 2008 due to the period ended September 30, 2008 having a fewer number of days in which total net assets exceeded \$1 billion and were therefore charged the lower rate of 0.50%.

In addition to the management fee, USNG pays all brokerage fees, transaction costs for over-the-counter swaps, taxes and other expenses, including certain tax reporting costs, licensing fees for the use of intellectual property, ongoing registration or other fees paid to the SEC, the Financial Industry Regulatory Authority ("FINRA") and any other regulatory agency in connection with offers and sales of its units subsequent to the initial offering and all legal,

accounting, printing and other expenses associated therewith. The total of these fees, taxes and expenses for the nine months ended September 30, 2009 was \$13,860,003, as compared to \$1,742,706 for the nine months ended September 30, 2008. The increase in expenses from the nine months ended September 30, 2008 to the nine months ended September 30, 2009 was primarily due to the relative size of USNG and activity that resulted from its increased size, including the registration and the offering of additional units, increased brokerage fees, increased transaction costs for over-the-counter swaps, increased licensing fees and increased tax reporting costs due to the greater number of unitholders during the period. For the nine months ended September 30, 2009, USNG incurred \$1,806,478 in ongoing registration fees and other expenses relating to the registration and offering of additional units. By comparison, for the nine months ended September 30, 2008, USNG incurred \$216,699 in ongoing registration fees and other expenses relating to the registration and offering of additional units.

USNG is responsible for paying its portion of the directors' and officers' liability insurance of the General Partner and the fees and expenses of the independent directors of the General Partner who are also the General Partner's audit committee members. USNG shares these fees with the United States Oil Fund, LP ("USOF"), the United States 12 Month Oil Fund, LP ("US12OF"), the United States Gasoline Fund, LP ("UGA") the United States Heating Oil Fund, LP ("USHO") and the United States Short Oil Fund ("USSO"), based on the relative assets of each fund computed on a daily basis. These fees for calendar year 2009 are estimated to be a total of \$477,000 for all funds. By comparison, for the year ended December 31, 2008, these fees amounted to a total of \$282,000 for all funds, and USNG's portion of such fees was \$130,371. Directors' expenses are expected to increase in 2009 due to payment for directors' and officers' liability insurance and an increase in the compensation awarded to the independent directors of the General Partner. Effective as of March 3, 2009, the General Partner has obtained directors' and officers' liability insurance covering all of the directors and officers of the General Partner. Previously, the General Partner did not have liability insurance for its directors and officers; instead, the independent directors received a payment in lieu of directors' and officers' liability insurance coverage.

USNG also incurs commissions to brokers for the purchase and sale of Futures Contracts, Other Natural Gas-Related Investments or short-term obligations of the United States of two years or less ("Treasuries"). During the nine months ended September 30, 2009, total commissions paid to brokers amounted to \$9,704,462. By comparison, during the nine months ended September 30, 2008, total commissions paid to brokers amounted to \$604,734. The increase in the total commissions paid to brokers from the nine months ended September 30, 2008 to the nine months ended September 30, 2009 was primarily a function of increased brokerage fees due to a higher number of Natural Gas Interests being held and traded as a result of the increase in USNG's average total net assets, the decrease in the price of Natural Gas Interests and the increase in redemptions and creations of units during the nine months ended September 30, 2009. The increase in assets required USNG to purchase a greater number of Natural Gas Interests and incur a larger amount of commissions. As an annualized percentage of total net assets, the figure for the nine months ended September 30, 2009 represents approximately 0.59% of total net assets. By comparison, the figure for the nine months ended September 30, 2008 represented approximately 0.11% of total net assets. However, there can be no assurance that commission costs and portfolio turnover will not cause commission expenses to rise in future quarters.

USNG's transaction fees have also increased during the nine months ended September 30, 2009 due to the increased investment in Other Natural Gas-Related Investments, including over-the-counter swaps, including up front fees and spreads charged by counterparties, during that period. In particular, the transaction costs for over-the-counter swaps are significantly higher as compared to those for exchange-traded Natural Gas Interests, which to date are the principal investment of USNG. USNG incurred \$1,286,544 in transaction costs during the nine months ended September 30, 2009 as compared to no transaction costs during the nine months ended September 30, 2008.

Interest Income. USNG seeks to invest its assets such that it holds Futures Contracts and Other Natural Gas-Related Investments in an amount equal to the total net assets of its portfolio. Typically, such investments do not require USNG to pay the full amount of the contract value at the time of purchase, but rather require USNG to post an amount as a margin deposit against the eventual settlement of the contract. As a result, USNG retains an amount that is approximately equal to its total net assets, which USNG invests in Treasuries, cash and/or cash equivalents. This includes both the amount on deposit with the futures commission merchant as margin, as well as unrestricted cash and cash equivalents held with USNG's custodian bank. The Treasuries, cash and/or cash equivalents earn interest that accrues on a daily basis. For the nine months ended September 30, 2009, USNG earned \$2,241,532 in interest income on such cash holdings. Based on USNG's average daily total net assets, this was equivalent to an annualized yield of 0.14%. USNG did not purchase Treasuries during the nine months ended September 30, 2009 and held all of its funds in cash and/or cash equivalents during this time period. By comparison, for the nine months ended September 30, 2008, USNG earned \$10,380,019 in interest income on such cash holdings. Based on USNG's average daily total net assets, this was equivalent to an annualized yield of 1.95%. USNG did not purchase Treasuries during the nine months ended September 30, 2008 and held all of its funds in cash and/or cash equivalents during this time period. Interest

rates on short-term investments in the United States, including cash, cash equivalents, and short-term Treasuries, were sharply lower during the nine months ended September 30, 2009 compared to the same time period in 2008. As a result, the amount of interest earned by USNG as a percentage of total net assets was lower during the nine months ended September 30, 2009 compared to the nine months ended September 30, 2008.

For the Three Months Ended September 30, 2009 Compared to the Three Months Ended September 30, 2008

During the three months ended September 30, 2009, the daily average total net assets of USNG were \$3,893,286,748. The management fee paid by USNG during the period amounted to \$5,158,662, which was calculated at the 0.60% rate on total net assets up to and including \$1 billion and at the rate of 0.50% on total net assets over \$1 billion, and accrued daily. Management fees as a percentage of average net assets averaged 0.53% over the course of this three month period. By comparison, during the three months ended September 30, 2008, the daily average total net assets of USNG were \$933,171,008. The management fee paid by USNG for the three months ended September 30, 2008 amounted to \$1,390,316, which was calculated at the 0.60% rate for total net assets up to and including \$1 billion and at the rate of 0.50% on total net assets over \$1 billion, and accrued daily. Management fees as a percentage of average net assets averaged 0.60% over the course of the three months ended September 30, 2008. USNG's management fees as a percentage of average net assets were lower for the three months ended September 30, 2009 compared to the three months ended September 30, 2008 due to the period ended September 30, 2008 having a fewer number of days in which total net assets exceeded \$1 billion.

In addition to the management fee, USNG pays all brokerage fees, transaction costs for over-the-counter swaps, taxes and other expenses, including certain tax reporting costs, licensing fees for the use of intellectual property, ongoing registration or other fees paid to the SEC, FINRA and any other regulatory agency in connection with offers and sales of its units subsequent to the initial offering and all legal, accounting, printing and other expenses associated therewith. The total of these fees, taxes and expenses for the three months ended September 30, 2009 was \$8,112,692, as compared to \$668,860 for the three months ended September 30, 2008. The increase in expenses from the three months ended September 30, 2008 to the three months ended September 30, 2009 was primarily due to the relative size of USNG and activity that resulted from its increased size, including the registration and the offering of additional units, increased brokerage fees, increased transaction costs for over-the-counter swaps, increased licensing fees and increased tax reporting costs due to the greater number of unitholders during the period. For the three months ended September 30, 2009, USNG incurred \$763,759 in ongoing registration fees and other expenses relating to the registration and offering of additional units. By comparison, for the three months ended September 30, 2008, USNG incurred \$127,741 in ongoing registration fees and other expenses relating to the registration and offering of additional units.

USNG is responsible for paying its portion of the directors' and officers' liability insurance of the General Partner and the fees and expenses of the independent directors of the General Partner who are also the General Partner's audit committee members. USNG shares these fees with USOF, US12OF, UGA, USHO and USSO based on the relative assets of each fund computed on a daily basis. These fees for the three months ended September 30, 2009 amounted to a total of \$80,648 for all funds, and USNG's portion of such fees was \$49,631. By comparison, for the three months ended September 30, 2008, these fees amounted to a total of \$72,126 for all funds, and USNG's portion of such fees was \$30,262. Directors' expenses increased from the three months ended September 30, 2008 to the three months ended September 30, 2009 due to payment for directors' and officers' liability insurance and an increase in the compensation awarded to the independent directors of the General Partner. Effective as of March 3, 2009, the General Partner has obtained directors' and officers' liability insurance covering all of the directors and officers of the General Partner. Previously, the General Partner did not have liability insurance for its directors and officers; instead, the independent directors received a payment in lieu of directors' and officers' liability insurance coverage.

USNG also incurs commissions to brokers for the purchase and sale of Futures Contracts, Other Natural Gas-Related Investments or Treasuries. During the three months ended September 30, 2009, total commissions paid to brokers amounted to \$5,726,699. By comparison, during the three months ended September 30, 2008, total commissions paid to brokers amounted to \$324,156. The increase in the total commissions paid to brokers from the three months ended September 30, 2008 to the three months ended September 30, 2009 was primarily a function of increased brokerage fees due to a higher number of Natural Gas Interests being held and traded as a result of the increase in USNG's

average total net assets and the decrease in the price of Natural Gas Interests during the three months ended September 30, 2009. The increase in assets required USNG to purchase a greater number of Natural Gas Interests and incur a larger amount of commissions. As an annualized percentage of total net assets, the figure for the three months ended September 30, 2009 represents approximately 0.58% of total net assets. By comparison, the figure for the three months ended September 30, 2008 represented approximately 0.14% of total net assets. However, there can be no assurance that commission costs and portfolio turnover will not cause commission expenses to rise in future quarters.

USNG's transaction fees have also increased during the three months ended September 30, 2009 due to the increased investment in Other Natural Gas-Related Investments, including over-the-counter swaps, during that period. In particular, the transaction costs for over-the-counter swaps, including up front fees and spreads charged by counterparties, are significantly higher as compared to those for exchange-traded Natural Gas Interests, which to date are the principal investment of USNG. USNG incurred \$1,286,544 in transaction costs during the three months ended September 30, 2009 as compared to no transaction costs during the three months ended September 30, 2008.

**Interest Income.** USNG seeks to invest its assets such that it holds Futures Contracts and Other Natural Gas-Related Investments in an amount equal to the total net assets of its portfolio. Typically, such investments do not require USNG to pay the full amount of the contract value at the time of purchase, but rather require USNG to post an amount as a margin deposit against the eventual settlement of the contract. As a result, USNG retains an amount that is approximately equal to its total net assets, which USNG invests in Treasuries, cash and/or cash equivalents. This includes both the amount on deposit with the futures commission merchant as margin, as well as unrestricted cash and cash equivalents held with USNG's custodian bank. The Treasuries, cash and/or cash equivalents earn interest that accrues on a daily basis. For the three months ended September 30, 2009, USNG earned \$968,387 in interest income on such cash holdings. Based on USNG's average daily total net assets, this was equivalent to an annualized yield of 0.10%. USNG did not purchase Treasuries during the three months ended September 30, 2009 and held all of its funds in cash and/or cash equivalents during this time period. By comparison, for the three months ended September 30, 2008, USNG earned \$4,484,691 in interest income on such cash holdings. Based on USNG's average daily total net assets, this was equivalent to an annualized yield of 1.91%. USNG did not purchase Treasuries during the three months ended September 30, 2008 and held all of its funds in cash and/or cash equivalents during this time period. Interest rates on short-term investments in the United States, including cash, cash equivalents, and short-term Treasuries, were sharply lower during the three months ended September 30, 2009 compared to the same time period in 2008. As a result, the amount of interest earned by USNG as a percentage of total net assets was lower during the three months ended September 30, 2009 compared to the three months ended September 30, 2008.

#### Tracking USNG's Benchmark

USNG seeks to manage its portfolio such that changes in its average daily NAV, on a percentage basis, closely track the changes in the average daily price of the Benchmark Futures Contract, also on a percentage basis. Specifically, USNG seeks to manage the portfolio such that over any rolling period of 30 valuation days, the average daily change in the NAV is within a range of 90% to 110% (0.9 to 1.1) of the average daily change in the price of the Benchmark Futures Contract. As an example, if the average daily movement of the price of the Benchmark Futures Contract for a particular 30-day time period was 0.5% per day, USNG's management would attempt to manage the portfolio such that the average daily movement of the NAV during that same time period fell between 0.45% and 0.55% i.e., between 0.9 and 1.1 of the benchmark's results. USNG's portfolio management goals do not include trying to make the nominal price of USNG's NAV equal to the nominal price of the current Benchmark Futures Contract or the spot price for natural gas. Management believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in listed natural gas Futures Contracts and Other Natural Gas-Related Investments.

For the 30 valuation days ended September 30, 2009, the simple average daily change in the Benchmark Futures Contract was 0.425%, while the simple average daily change in the NAV of USNG over the same time period was -0.420%. The average daily difference was -0.005% (or -0.05 basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the Benchmark Futures Contract, the average error in daily tracking by the NAV was 0.0027%, meaning that over this time period USNG's tracking error was within the plus or minus 10% range established as its benchmark tracking goal. The first chart below shows the daily movement of USNG's NAV versus the daily movement of the Benchmark Futures Contract for the 30-day period ended September 30, 2009.

\*PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

**\*PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

Since the offering of USNG's units to the public on April 18, 2007 to September 30, 2009, the simple average daily change in the Benchmark Futures Contract was -0.185%, while the simple average daily change in the NAV of USNG over the same time period was -0.182%. The average daily difference was -0.003% (or -0.3 basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the Benchmark Futures Contract, the average error in daily tracking by the NAV was 0.508%, meaning that over this time period USNG's tracking error was within the plus or minus 10% range established as its benchmark tracking goal.

An alternative tracking measurement of the return performance of USNG versus the return of its Benchmark Futures Contract can be calculated by comparing the actual return of USNG, measured by changes in its NAV, versus the expected changes in its NAV under the assumption that USNG's returns had been exactly the same as the daily changes in its Benchmark Futures Contract.

For the nine months ended September 30, 2009, the actual total return of USNG as measured by changes in its NAV was -50.28%. This is based on an initial NAV of \$23.27 on December 31, 2008 and an ending NAV as of September 30, 2009 of \$11.57. During this time period, USNG made no distributions to its unitholders. However, if USNG's daily changes in its NAV had instead exactly tracked the changes in the daily return of the Benchmark Futures Contract, USNG would have ended the third quarter of 2009 with an estimated NAV of \$11.68, for a total return over the relevant time period of -49.81%. The difference between the actual NAV total return of USNG of -50.28% and the expected total return based on the Benchmark Futures Contract of -49.81% was an error over the time period of 0.47%, which is to say that USNG's NAV trailed the benchmark result by that percentage. Management believes that a portion of the difference between the actual return and the expected benchmark return can be attributed to the net impact of the expenses and the interest that USNG collects on its cash and cash equivalent holdings. During the nine months ended September 30, 2009, USNG received interest income of \$2,241,532, which is equivalent to a weighted average interest rate of 0.14% for the nine months ended September 30, 2009. In addition, during the nine months ended September 30, 2009, USNG also collected \$185,000 from its Authorized Purchasers creating or redeeming baskets of units. This income contributed to USNG's actual return. However, if the total assets of USNG continue to increase, management believes that the impact on total returns of these fees from creations and redemptions will diminish as a percentage of the total return. During the nine months ended September 30, 2009, USNG incurred total expenses of \$22,783,341. Income from interest and Authorized Purchaser collections net of expenses was \$(20,794,241), which is equivalent to a weighted average net interest rate of -1.26% for the nine months ended September 30, 2009.

By comparison, for the nine months ended September 30, 2008, the actual total return of USNG as measured by changes in its NAV was -8.60%. This was based on an initial NAV of \$36.18 on December 31, 2007 and an ending NAV as of September 30, 2008 of \$33.07. During this time period, USNG made no distributions to its unitholders. However, if USNG's daily changes in its NAV had instead exactly tracked the changes in the daily return of the Benchmark Futures Contract, USNG would have ended the third quarter of 2008 with an estimated NAV of \$32.85, for a total return over the relevant time period of -9.20%. The difference between the actual NAV total return of USNG of -8.60% and the expected total return based on the Benchmark Futures Contract of -9.20% was an error over the time period of 0.60%, which is to say that USNG's actual total return exceeded the benchmark result by that percentage. Management believes that a portion of the difference between the actual return and the expected benchmark return can be attributed to the impact of the interest that USNG collected on its cash and cash equivalent holdings. During the nine months ended September 30, 2008, USNG received interest income of \$10,380,019, which is equivalent to a weighted average interest rate of 1.95% for the nine months ended September 30, 2008. In addition, during the nine months ended September 30, 2008, USNG also collected \$147,000 from Authorized Purchasers creating or redeeming baskets of units. During the nine months ended September 30, 2008, USNG incurred total expenses of \$4,920,319. Income from interest and Authorized Purchaser collections net of expenses was \$5,606,700, which is equivalent to a weighted average net interest rate of 1.05% for the nine months ended September 30, 2008. This income also contributed to USNG's actual return exceeding the benchmark results.

There are currently three factors that have impacted or are most likely to impact USNG's ability to accurately track its Benchmark Futures Contract.

First, USNG may buy or sell its holdings in the then current Benchmark Futures Contract at a price other than the closing settlement price of that contract on the day during which USNG executes the trade. In that case, USNG may pay a price that is higher, or lower, than that of the Benchmark Futures Contract, which could cause the changes in the daily NAV of USNG to either be too high or too low relative to the changes in the Benchmark Futures Contract. During the nine months ended September 30, 2009, management attempted to minimize the effect of these transactions by seeking to execute its purchase or sale of the Benchmark Futures Contract at, or as close as possible to, the end of the day settlement price. However, it may not always be possible for USNG to obtain the closing settlement price and there is no assurance that failure to obtain the closing settlement price in the future will not adversely impact USNG's attempt to track the Benchmark Futures Contract over time.

Second, USNG earns interest on its cash, cash equivalents and Treasury holdings. USNG is not required to distribute any portion of its income to its unitholders and did not make any distributions to unitholders during the nine months ended September 30, 2009. Interest payments, and any other income, were retained within the portfolio and added to USNG's NAV. When this income exceeds the level of USNG's expenses for its management fee, brokerage commissions and other expenses (including ongoing registration fees, licensing fees and the fees and expenses of the independent directors of the General Partner), USNG will realize a net yield that will tend to cause daily changes in the NAV of USNG to track slightly higher than daily changes in the Benchmark Futures Contract. During the nine months ended September 30, 2009, USNG earned, on an annualized basis, approximately 0.14% on its cash holdings. It also incurred cash expenses on an annualized basis of 0.54% for management fees and approximately 0.59% in brokerage commission costs related to the purchase and sale of futures contracts, and 0.28% for other expenses. The foregoing fees and expenses resulted in a net yield on an annualized basis of approximately -1.27% and affected USNG's ability to track its benchmark. If short-term interest rates rise above the current levels, the level of deviation created by the yield would decrease. Conversely, if short-term interest rates were to decline, the amount of error created by the yield would increase. When short-term yields drop to a level lower than the combined expenses of the management fee and the brokerage commissions, then the tracking error becomes a negative number and would tend to cause the daily returns of the NAV to underperform the daily returns of the Benchmark Futures Contract.

Third, USNG may hold Other Natural Gas-Related Investments in its portfolio that may fail to closely track the Benchmark Futures Contract's total return movements. In that case, the error in tracking the Benchmark Futures Contract could result in daily changes in the NAV of USNG that are either too high, or too low, relative to the daily changes in the Benchmark Futures Contracts. During the nine months ended September 30, 2009, USNG held Other Natural Gas-Related Investments. These holdings included a financially settled natural gas futures contract traded on NYMEX whose settlement price tracks the settlement price of the Benchmark Futures Contract. USNG also held investments in cleared swaps traded on the ICE Futures whose settlement price also tracks the settlement price of the Benchmark Futures Contract and fully-collateralized over-the-counter swaps designed to track the settlement price of the Benchmark Futures Contract. Due, in part, to the increased size of USNG over the last several quarters and its obligations to comply with regulatory limits, USNG has invested in Other Natural Gas-Related Investments, such as over-the-counter swaps, which have increased transaction-related expenses and may result in increased tracking error. Over-the-counter swaps increase transaction-related expenses due to the fact that USNG must pay to the swap counterparty certain fees that USNG does not have to pay for transactions executed on an exchange. Finally, due to potential regulatory limitations, USNG may determine to hold greater amounts of cash and cash equivalents and lesser amounts of Natural Gas Interests, if it determines that will most appropriately satisfy USNG's investment objective. Holding more cash and cash equivalents and less Natural Gas Interests for some period of time may result in increased tracking error. There are additional Other Natural Gas-Related Investments that USNG is permitted to invest in whose price movements may not track the settlement price of the Benchmark Futures Contract.

On August 12, 2009, USNG's management determined to suspend offerings of USNG's units since it could not invest the proceeds from such offerings in investments that would permit it to meet its investment objective due to current and anticipated new regulatory restrictions and limitations. As a result of this suspension of creation activity, USNG's shares may have been trading at a premium during a portion of the period from August 12, 2009 to September 28, 2009, when creation activity resumed subject to certain limitations. These limitations included the following: (1) USNG may require Authorized Purchasers of its units to sell USNG specified investments, including the arrangement of an over-the-counter swap contract between the Authorized Purchaser and USNG, (2) USNG may limit its issuance of creation baskets to an Authorized Purchaser to a specified minimum or maximum number of baskets, (3) USNG's management may vary the terms and conditions of investments to be delivered or arranged by an Authorized Purchaser in order to purchase a creation basket and (4) USNG's management may decide to offer creation baskets only on particular days. The trading of USNG's units at a premium may have caused an increase in tracking error.

Term Structure of Natural Gas Futures Prices and the Impact on Total Returns. Several factors determine the total return from investing in a futures contract position. One factor that impacts the total return that will result from investing in near month natural gas futures contracts and "rolling" those contracts forward each month is the price relationship between the current near month contract and the next month contract. For example, if the price of the near month contract is higher than the next month contract (a situation referred to as "backwardation" in the futures market), then absent any other change there is a tendency for the price of a next month contract to rise in value as it becomes the near month contract and approaches expiration. Conversely, if the price of a near month contract is lower than the next month contract (a situation referred to as "contango" in the futures market), then absent any other change there is a tendency for the price of a next month contract to decline in value as it becomes the near month contract and approaches expiration.

As an example, assume that the price of natural gas for immediate delivery (the "spot" price), was \$7 per 10,000 million British thermal units ("MMBtu"), and the value of a position in the near month futures contract was also \$7. Over time, the price of 10,000 MMBtu of natural gas will fluctuate based on a number of market factors, including demand for natural gas relative to its supply. The value of the near month contract will likewise fluctuate in reaction to a number of market factors. If investors seek to maintain their position in a near month contract and not take delivery of the natural gas, every month they must sell their current near month contract as it approaches expiration and invest in the next month contract.

If the futures market is in backwardation, e.g., when the expected price of natural gas in the future would be less, the investor would be buying a next month contract for a lower price than the current near month contract. Hypothetically, and assuming no other changes to either prevailing natural gas prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the interest earned on Treasuries, cash and/or cash equivalents), the value of the next month contract would rise as it approaches expiration and becomes the new near month contract. In this example, the value of the \$7 investment would tend to rise faster than the spot price of natural gas, or fall slower. As a result, it would be possible in this hypothetical example for the price of spot natural gas to have risen to \$9 after some period of time, while the value of the investment in the futures contract would have risen to \$10, assuming backwardation is large enough or enough time has elapsed. Similarly, the spot price of natural gas could have fallen to \$5 while the value of an investment in the futures contract could have fallen to only \$6. Over time, if backwardation remained constant, the difference would continue to increase.

If the futures market is in contango, the investor would be buying a next month contract for a higher price than the current near month contract. Hypothetically, and assuming no other changes to either prevailing natural gas prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the interest earned on cash), the value of the next month contract would fall as it approaches expiration and becomes the new near month contract. In this example, it would mean that the value of the \$7 investment would tend to rise slower than the spot price of natural gas, or fall faster. As a result, it would be possible in this hypothetical example for the spot price of natural gas to have risen to \$9 after some period of time, while the value of the investment in the futures contract will have risen to only \$8, assuming contango is large enough or enough time has elapsed. Similarly, the spot price of natural gas could have fallen to \$6 while the value of an investment in the futures contract could have fallen to \$7. Over time, if contango remained constant, the difference would continue to increase.

The chart below compares the price of the near month contract to the price of the next month contract over the last 10 years (1999-2008) for natural gas. When the price of the near month contract is higher than the price of the next month contract, the market would be described as being in backwardation. When the price of the near month contract is lower than the price of the next month contract, the market would be described as being in contango. Although the prices of the near month contract and the price of the next month contract do tend to move up or down together, it can be seen that at times the near month prices are clearly higher than the price of the next month contract (backwardation), and other times they are below the price of the next month contract (contango). In addition, investors can observe that natural gas prices, both near month and next month, often display a seasonal pattern in which the price of natural gas tends to rise in the early winter months and decline in the summer months. This mirrors the physical demand for natural gas, which typically peaks in the winter.

\*PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

Another way to view backwardation and contango data over time is to subtract the dollar price of the next month natural gas Futures Contract from the dollar price of the near month natural gas Futures Contract. If the resulting number is a positive number, then the near month price is higher than the price of the next month and the market could be described as being in backwardation. If the resulting number is a negative number, then the near month price is lower than the price of the next month and the market could be described as being in contango. The chart below shows the results from subtracting the next month price from the price of the near month contract for the 10 year period between 1999 and 2008. Investors will note that the natural gas market spent time in both backwardation and contango. Investors will further note that the markets display a seasonal pattern that corresponds to the seasonal demand patterns for natural gas described above. That is, in many, but not all, cases the price of the next month is higher than the near month as the winter months approach, as the price of natural gas for delivery in those winter months rises on expectations of demand. At the same time, the price of the near month, when that month is just before the onset of winter, does not rise as far or as fast as the price of a next month contract whose delivery falls during the winter season.

**\*PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS**

Historically, the natural gas futures markets have experienced periods of contango and backwardation. Because natural gas demand is seasonal, it is possible for the price of Futures Contracts for delivery within one or two months to rapidly move from backwardation into contango and back again within a relatively short period of time of less than one year. While the investment objective of USNG is not to have the market price of its units match, dollar for dollar, changes in the spot price of natural gas, contango impacted the total return on an investment in USNG units during the nine months ended September 30, 2009 relative to a hypothetical direct investment in natural gas. For example, an investment in USNG units made on December 31, 2008 and held to September 30, 2009 decreased, based upon the changes in the NAV for USNG units on those days, by approximately 50.28%, while the spot price of natural gas for immediate delivery during the same period decreased by approximately 49.81% (note: this comparison ignores the potential costs associated with physically owning and storing natural gas, which could be substantial). By comparison, during the period from December 31, 2007 to September 30, 2008, contango impacted the total return on an investment in USNG units relative to a hypothetical direct investment in natural gas. For example, an investment in USNG units made on December 31, 2007 and held to September 30, 2008 decreased, based upon the changes in the NAV for USNG units on those days, by approximately 8.60%, while the spot price of natural gas for immediate delivery during the same period increased by approximately 9.20% (note: this comparison ignores the potential costs associated with physically owning and storing natural gas, which could be substantial).

Periods of contango or backwardation do not materially impact USNG's investment objective of having the percentage changes in its per unit NAV track the percentage changes in the price of the Benchmark Futures Contract since the impact of backwardation and contango tended to equally impact the percentage changes in price of both USNG's units and the Benchmark Futures Contract. It is impossible to predict with any degree of certainty whether backwardation or contango will occur in the future. It is likely that both conditions will occur during different periods and, because of the seasonal nature of natural gas demand, both may occur within a single year's time.

Natural Gas Market. During the nine months ended September 30, 2009, natural gas prices in the United States were impacted by several factors. At the beginning of the first quarter of 2009, the amount of natural gas in storage was at higher than average levels versus the previous five years. During the entire first half of 2009, the seasonally adjusted inventory levels of stored natural gas remained well above five-year averages. In addition, a combination of slowing U.S. economic growth and increased natural gas production all contributed to a very significant decline in natural gas prices during the first half of 2009, with prices reaching a low of \$2.508 on September 3, 2009 and ending the third quarter of 2009 with a price of \$4.481.

Natural Gas Price Movements in Comparison to other Energy Commodities and Investment Categories. The General Partner believes that investors frequently measure the degree to which prices or total returns of one investment or asset class move up or down in value in concert with another investment or asset class. Statistically, such a measure is usually done by measuring the correlation of the price movements of the two different investments or asset classes over some period of time. The correlation is scaled between 1 and -1, where 1 indicates that the two investment options move up or down in price or value together, known as "positive correlation," and -1 indicating that they move in completely opposite directions, known as "negative correlation." A correlation of 0 would mean that the movements of the two are neither positively or negatively correlated, known as "non-correlation." That is, the investment options sometimes move up and down together and other times move in opposite directions.

For the ten year time period between 1998 and 2008, the chart below compares the monthly movements of natural gas prices versus the monthly movements of the prices of several other energy commodities, such as crude oil, heating oil, and unleaded gasoline, as well as several major non-commodity investment asset classes, such as large cap U.S. equities, U.S. government bonds and global equities. It can be seen that over this particular time period, the movement of natural gas on a monthly basis was not strongly correlated, positively or negatively, with the movements of large cap U.S. equities, U.S. government bonds or global equities. However, movements in natural gas had a positive correlation to movements in heating oil. Finally, natural gas had a positive, but very weak, correlation with crude oil and unleaded gasoline.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

29

---

The chart below covers a more recent, but much shorter, range of dates than the above chart. Over the one year period ended September 30, 2009, natural gas had a slightly weaker positive correlation with crude oil, heating oil and unleaded gasoline than it had displayed over the ten year period ended December 31, 2008. The correlation between natural gas and U.S. government bonds, which had been essentially non-correlated over the ten year period ended December 31, 2008, appeared to remain non-correlated over this shorter time period. Correlations compared to global equities and U.S. large-cap equities appeared to be weakly correlated over this shorter time period. This may have been as a result of the drop in both industrial production in the U.S. as well as natural gas demand as a result of the slowing economy.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

Investors are cautioned that the historical price relationships between natural gas and various other energy commodities, as well as other investment asset classes, as measured by correlation may not be reliable predictors of future price movements and correlation results. The results pictured above would have been different if a different range of dates had been selected. The General Partner believes that natural gas has historically not demonstrated a strong correlation with equities or bonds over long periods of time. However, the General Partner also believes that in the future it is possible that natural gas could have long term correlation results that indicate prices of natural gas more closely track the movements of equities or bonds. In addition, the General Partner believes that, when measured over time periods shorter than ten years, there will always be some periods where the correlation of natural gas to equities and bonds will be either more strongly positively correlated or more strongly negatively correlated than the long term historical results suggest.

The correlations between natural gas, crude oil, heating oil and gasoline are relevant because the General Partner endeavors to invest USNG's assets in natural gas Futures Contracts and Other Natural Gas-Related Investments so that daily changes in percentage terms in USNG's NAV correlate as closely as possible with daily changes in percentage terms in the price of the Benchmark Futures Contract. If certain other fuel-based commodity futures contracts do not closely correlate with the natural gas Futures Contract, then their use could lead to greater tracking error. As noted, the General Partner also believes that the changes in percentage terms in the price of the Benchmark Futures Contract will closely correlate with changes in percentage terms in the spot price of natural gas.

#### Critical Accounting Policies

Preparation of the condensed financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate accounting rules and guidance, as well as the use of estimates. USNG's application of these policies involves judgments and actual results may differ from the estimates used.

The General Partner has evaluated the nature and types of estimates that it makes in preparing USNG's condensed financial statements and related disclosures and has determined that the valuation of its investments which are not traded on a United States or internationally recognized futures exchange (such as forward contracts and over-the-counter contracts) involves a critical accounting policy. The values which are used by USNG for its forward contracts are provided by its commodity broker who uses market prices when available, while over-the-counter contracts are valued based on the present value of estimated future cash flows that would be received from or paid to a third party in settlement of these derivative contracts prior to their delivery date and valued on a daily basis. In addition, USNG estimates interest income on a daily basis using prevailing interest rates earned on its cash and cash equivalents. These estimates are adjusted to the actual amount received on a monthly basis and the difference, if any, is not considered material.

#### Liquidity and Capital Resources

USNG has not made, and does not anticipate making, use of borrowings or other lines of credit to meet its obligations. USNG has met, and it is anticipated that USNG will continue to meet, its liquidity needs in the normal course of business from the proceeds of the sale of its investments, or from the Treasuries, cash and/or cash equivalents that it intends to hold at all times. USNG's liquidity needs include: redeeming units, providing margin deposits for its existing Futures Contracts or the purchase of additional Futures Contracts and posting collateral for its over-the-counter contracts and payment of its expenses, summarized below under "Contractual Obligations."

USNG currently generates cash primarily from (i) the sale of baskets consisting of 100,000 units ("Creation Baskets") and (ii) interest earned on Treasuries, cash and/or cash equivalents. USNG has allocated substantially all of its net assets to trading in Natural Gas Interests. USNG invests in Natural Gas Interests to the fullest extent possible without

being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Futures Contracts and Other Natural Gas-Related Investments. A significant portion of the NAV is held in cash and cash equivalents that are used as margin and as collateral for USNG's trading in Natural Gas Interests. The balance of the net assets is held in USNG's account at its custodian bank. Interest earned on USNG's interest-bearing funds is paid to USNG. In prior periods, the amount of cash earned by USNG from the sale of Creation Baskets and from interest earned has exceeded the amount of cash required to pay USNG's expenses. However, during the nine months ended September 30, 2009, USNG's expenses exceeded the interest income USNG earned and the cash earned by the sale of Creation Baskets. To the extent expenses have exceeded interest income, USNG's NAV will be negatively impacted.

USNG's investment in Natural Gas Interests may be subject to periods of illiquidity because of market conditions, regulatory considerations and other reasons. For example, most commodity exchanges limit the fluctuations in futures contracts prices during a single day by regulations referred to as "daily limits." During a single day, no trades may be executed at prices beyond the daily limit. Once the price of a futures contract has increased or decreased by an amount equal to the daily limit, positions in the contracts can neither be taken nor liquidated unless the traders are willing to effect trades at or within the specified daily limit. In addition, USNG's over-the-counter contracts have very limited liquidity since they are negotiated agreements that are not transferable by USNG except with the consent of its counterparty, and even if consent were granted, there may not be an available transferee. Such market conditions or contractual limits could prevent USNG from promptly liquidating its positions in Natural Gas Interests. During the nine months ended September 30, 2009, USNG was not forced to purchase or liquidate any of its positions while daily limits were in effect; however, USNG cannot predict whether such an event may occur in the future.

Since the initial offering of units, USNG has been responsible for expenses relating to (i) management fees, (ii) brokerage fees and commissions and fees associated with its over-the-counter transactions, (iii) licensing fees for the use of intellectual property, (iv) ongoing registration expenses in connection with offers and sales of its units subsequent to the initial offering, (v) taxes and other expenses, including certain tax reporting costs, (vi) fees and expenses of the independent directors of the General Partner and (vii) other extraordinary expenses not in the ordinary course of business, while the General Partner has been responsible for expenses relating to the fees of USNG's marketing agent, administrator and custodian and registration expenses relating to the initial offering of units. If the General Partner and USNG are unsuccessful in raising sufficient funds to cover these respective expenses or in locating any other source of funding, USNG will terminate and investors may lose all or part of their investment.

#### Market Risk

Trading in Futures Contracts and Other Natural Gas-Related Investments, such as forwards, involves USNG entering into contractual commitments to purchase or sell natural gas at a specified date in the future. The aggregate market value of the contracts will significantly exceed USNG's future cash requirements since USNG intends to close out its open positions prior to settlement. As a result, USNG is generally only subject to the risk of loss arising from the change in value of the contracts. USNG considers the "fair value" of its derivative instruments to be the unrealized gain or loss on the contracts. The market risk associated with USNG's commitments to purchase natural gas is limited to the aggregate market value of the contracts held. However, should USNG enter into a contractual commitment to sell natural gas, it would be required to make delivery of the natural gas at the contract price, repurchase the contract at prevailing prices or settle in cash. Since there are no limits on the future price of natural gas, the market risk to USNG could be unlimited.

USNG's exposure to market risk depends on a number of factors, including the markets for natural gas, the volatility of interest rates and foreign exchange rates, the liquidity of the Futures Contracts and Other Natural Gas-Related Investments markets and the relationships among the contracts held by USNG. Drastic market occurrences could ultimately lead to the loss of all or substantially all of an investor's capital.

#### Credit Risk

When USNG enters into Futures Contracts and Other Natural Gas-Related Investments, it is exposed to the credit risk that the counterparty will not be able to meet its obligations. The counterparty for the Futures Contracts traded on the NYMEX and on most other futures exchanges is the clearinghouse associated with the particular exchange. In general, in addition to margin required to be posted by the exchange or clearinghouse in connection with trades on the exchange or through the clearinghouse, clearinghouses are backed by their members who may be required to share in the financial burden resulting from the nonperformance of one of their members and, therefore, this additional member support should significantly reduce credit risk. Some foreign exchanges are not backed by their clearinghouse

members but may be backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearinghouse, or their members or their financial backers will satisfy their obligations to USNG in such circumstances.

USNG was a party to over-the-counter transactions on what it intends to be a fully-collateralized basis with two counterparties as of September 30, 2009. Subsequent to September 30, 2009, USNG has entered into fully-collateralized over-the-counter transactions with three additional counterparties. Unlike most of the exchange-traded Futures Contracts, cleared swaps or exchange-traded options on such futures, each party to an over-the-counter contract bears the credit risk that the other party may not be able to perform its obligations under its contract. See “Item 3. Quantitative and Qualitative Disclosures About Market Risk” of this quarterly report on Form 10-Q for a discussion of over-the-counter contracts.

The General Partner attempts to manage the credit risk of USNG by following various trading limitations and policies. In particular, USNG generally posts margin and/or holds liquid assets that are approximately equal to the market value of its obligations to counterparties under the Futures Contracts and Other Natural Gas-Related Investments it holds. The General Partner has implemented procedures that include, but are not limited to, executing and clearing trades only with creditworthy parties and/or requiring the posting of collateral or margin by such parties for the benefit of USNG to limit its credit exposure. UBS Securities LLC, USNG’s commodity broker, or any other broker that may be retained by USNG in the future, when acting as USNG’s futures commission merchant in accepting orders to purchase or sell Futures Contracts on United States exchanges, is required by CFTC regulations to separately account for and segregate as belonging to USNG, all assets of USNG relating to domestic Futures Contracts trading. These futures commission merchants are not allowed to commingle USNG’s assets with its other assets. In addition, the CFTC requires commodity brokers to hold in a secure account USNG’s assets related to foreign Futures Contracts trading and, in some cases, to cleared swaps executed through the Futures Commission Merchant. Similarly, under its current over-the-counter agreements, USNG requires that collateral it posts or receives be posted with its custodian and, under agreements among the custodian, USNG and its counterparties, such collateral is segregated.

As of September 30, 2009, USNG had deposits in domestic and foreign financial institutions, including cash investments in money market funds, in the amount of \$3,671,896,465. This amount is subject to loss should these institutions cease operations.

#### Off Balance Sheet Financing

As of September 30, 2009, USNG has no loan guarantee, credit support or other off-balance sheet arrangements of any kind other than agreements entered into in the normal course of business, which may include indemnification provisions relating to certain risks that service providers undertake in performing services which are in the best interests of USNG. While USNG's exposure under these indemnification provisions cannot be estimated, they are not expected to have a material impact on USNG's financial position.

#### Redemption Basket Obligation

In order to meet its investment objective and pay its contractual obligations described below, USNG requires liquidity to redeem units, which redemptions must be in blocks of 100,000 units called "Redemption Baskets". USNG has to date satisfied this obligation by paying from the cash or cash equivalents it holds or through the sale of its Treasuries in an amount proportionate to the number of units being redeemed.

#### Contractual Obligations

USNG's primary contractual obligations are with the General Partner. In return for its services, the General Partner is entitled to a management fee calculated as a fixed percentage of USNG's NAV, currently 0.60% for a NAV of \$1 billion or less, and thereafter 0.50% for a NAV above \$1 billion.

The General Partner agreed to pay the start-up costs associated with the formation of USNG, primarily its legal, accounting and other costs in connection with the General Partner's registration with the CFTC as a CPO and the registration and listing of USNG and its units with the SEC, FINRA and the AMEX, respectively. However, following USNG's initial offering of units, offering costs incurred in connection with registering and listing additional units of USNG are directly borne on an ongoing basis by USNG, and not by the General Partner.

The General Partner pays the fees of USNG's marketing agent, ALPS Distributors, Inc., and the fees of the custodian and transfer agent, Brown Brothers Harriman & Co. ("BBH&Co."), as well as BBH&Co.'s fees for performing administrative services, including those in connection with the preparation of USNG's condensed financial statements and its SEC and CFTC reports. The General Partner and USNG have also entered into a licensing agreement with the NYMEX pursuant to which USNG and the affiliated funds managed by the General Partner pay a licensing fee to the NYMEX. USNG also pays the fees and expenses associated with its tax accounting and reporting requirements with the exception of certain initial implementation service fees and base service fees which are paid by the General Partner.

In addition to the General Partner's management fee, USNG pays its brokerage fees (including fees to a futures commission merchant), over-the-counter dealer spreads and up-front fees, any licensing fees for the use of intellectual property, and, subsequent to the initial offering, registration and other fees paid to the SEC, FINRA, or other regulatory agencies in connection with the offer and sale of units, as well as legal, printing, accounting and other expenses associated therewith, and extraordinary expenses. The latter are expenses not incurred in the ordinary course of USNG's business, including expenses relating to the indemnification of any person against liabilities and obligations to the extent permitted by law and under the LP Agreement, the bringing or defending of actions in law or in equity or otherwise conducting litigation and incurring legal expenses and the settlement of claims and litigation. Commission payments to a futures commission merchant are on a contract-by-contract, or round turn, basis. USNG also pays a portion of the fees and expenses of the independent directors of the General Partner. See Note 3 to the Notes to Condensed Financial Statements (Unaudited).

The parties cannot anticipate the amount of payments that will be required under these arrangements for future periods, as USNG's NAVs and trading levels to meet its investment objectives will not be known until a future date. These agreements are effective for a specific term agreed upon by the parties with an option to renew, or, in some cases, are in effect for the duration of USNG's existence. Either party may terminate these agreements earlier for certain reasons described in the agreements.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

#### Over-the-Counter Derivatives

USNG was a party to over-the-counter transactions on what it intends to be a fully-collateralized basis with two counterparties as of September 30, 2009. Subsequent to September 30, 2009, USNG has entered into fully-collateralized over-the-counter transactions with three additional counterparties and was in the process of negotiating agreements governing over-the-counter transactions with additional counterparties. Unlike most of the exchange-traded Futures Contracts, cleared swaps or exchange-traded options on such futures, each party to an over-the-counter contract bears the credit risk that the other party may not be able to perform its obligations under its contract.

Some natural gas-based derivatives transactions contain fairly generic terms and conditions and are available from a wide range of participants. Other natural gas-based derivatives have highly customized terms and conditions and are not as widely available. Many of these over-the-counter contracts are cash-settled forwards for the future delivery of natural gas- or petroleum-based fuels that have terms similar to the Futures Contracts. Others take the form of "swaps" in which the two parties exchange cash flows based on pre-determined formulas tied to the spot price of natural gas, forward natural gas prices or natural gas futures prices. For example, USNG may enter into over-the-counter derivative contracts whose value will be tied to changes in the difference between the spot price of natural gas, the price of Futures Contracts traded on the NYMEX and the prices of other Futures Contracts in which USNG may invest.

To protect itself from the credit risk that arises in connection with such contracts, USNG may enter into agreements with each counterparty that provide for the netting of its overall exposure to such counterparty, such as the agreements published by the International Swaps and Derivatives Association, Inc. USNG also may require that the counterparty be highly rated and/or provide collateral or other credit support to address USNG's exposure to the counterparty (i.e., the amount the counterparty would have to pay to USNG if the transaction with the counterparty were to terminate on that day). USNG must, to the extent its counterparty has exposure to it under the transaction, also post collateral. In addition, it is also possible for USNG and its counterparty to agree to clear their agreement through an established futures clearinghouse such as those connected to the NYMEX or the ICE Futures. In that event, USNG would no longer have credit risk of its original counterparty, as the clearinghouse would now be USNG's counterparty. USNG

would still retain any price risk associated with its transaction and would be required to deposit margin to secure the clearinghouse's exposure to USNG.

The creditworthiness of each potential counterparty is assessed by the General Partner. The General Partner assesses or reviews, as appropriate, the creditworthiness of each potential or existing counterparty to an over-the-counter contract pursuant to guidelines approved by the General Partner's board of directors (the "Board"). Furthermore, the General Partner on behalf of USNG only enters into over-the-counter contracts with counterparties who are, or are affiliates of, (a) banks regulated by a United States federal bank regulator, (b) broker-dealers regulated by the SEC, (c) insurance companies domiciled in the United States, and (d) producers, users or traders of energy, whether or not regulated by the CFTC. Any entity acting as a counterparty shall be regulated in either the United States or the United Kingdom unless otherwise approved by the Board after consultation with its legal counsel. Existing counterparties are also reviewed periodically by the General Partner.

USNG anticipates that the use of Other Natural Gas-Related Investments together with its investments in Futures Contracts will produce price and total return results that closely track the investment goals of USNG. However, there can be no assurance of this. Over-the-counter contracts may result in higher transaction-related expenses than the brokerage commissions paid in connection with the purchase of Futures Contracts, which may impact USNG's ability to successfully track the Benchmark Futures Contract.

USNG may employ spreads or straddles in its trading to mitigate the differences in its investment portfolio and its goal of tracking the price of the Benchmark Futures Contract. USNG would use a spread when it chooses to take simultaneous long and short positions in futures written on the same underlying asset, but with different delivery months. The effect of holding such combined positions is to adjust the sensitivity of USNG to changes in the price relationship between futures contracts which will expire sooner and those that will expire later. USNG would use such a spread if the General Partner felt that taking such long and short positions, when combined with the rest of its holdings, would more closely track the investment goals of USNG, or if the General Partner felt it would lead to an overall lower cost of trading to achieve a given level of economic exposure to movements in natural gas prices. USNG would enter into a straddle when it chooses to take an option position consisting of a long (or short) position in both a call option and put option. The economic effect of holding certain combinations of put options and call options can be very similar to that of owning the underlying futures contracts. USNG would make use of such a straddle approach if, in the opinion of the General Partner, the resulting combination would more closely track the investment goals of USNG or if it would lead to an overall lower cost of trading to achieve a given level of economic exposure to movements in natural gas prices.

During the nine months ended September 30, 2009, USNG employed hedging methods such as those described above to the extent it invested in fully-collateralized over-the-counter swap transactions designed to track percentage changes in the price of the Benchmark Futures Contract. During the nine months ended September 30, 2009, USNG was exposed to counterparty risk on its fully-collateralized over-the-counter swap transactions with two counterparties.

The counterparty credit ratings for the exposure on over-the-counter swap transactions to which USNG was a party that would be owed to USNG due to a default or early termination by USNG's counterparties at September 30, 2009 and December 31, 2008 were:

| Moody's<br>Credit<br>Rating | December 31, 2008           |                    |                    |                    |     | Exposure,<br>Net of<br>Collateral |

| Aa1                         | 1                           | \$ 520,896,084     | \$46,980,693       | \$46,470,000       | \$ 510,693 |                                    |
| A2                          | 1                           | 226,638,773        | 49,572,216         | 49,600,000         | (27,784)   |                                    |
| Unrated                     | —                           | —                  | —                  | —                  | —          |                                    |
| Total                       | 2                           | \$ 747,534,857     | \$96,552,909       | \$96,070,000       | \$ 482,909 |                                    |

\* The difference reflects minimum transfer amounts for collateral and potentially one day's movement in the underlying total return, which would be collateralized the following business day.

The aggregate notional amount of USNG's over-the-counter derivative transactions, most of which consisted of total return swaps, increased to \$747,533,857 at September 30, 2009, as compared with no swaps for the prior period. The aggregate notional amount of these derivative transactions, which is not included in the Condensed Schedule of Investments (Unaudited), is indicative of USNG's activities in derivative transactions, but is not an indicator of the level of credit risk associated with these transactions.

At September 30, 2009, USNG's counterparties posted \$96,070,000 in cash and no securities as collateral with USNG's custodian, as compared with the prior period for which no collateral was posted since USNG had not yet entered into any swaps. Under these over-the-counter swap agreements, USNG posted collateral with respect to its obligations of \$134,910,105 at September 30, 2009, while no collateral was posted for the prior period.

#### Item 4. Controls and Procedures.

##### Disclosure Controls and Procedures

USNG maintains disclosure controls and procedures that are designed to ensure that material information required to be disclosed in USNG's periodic reports filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms.

The duly appointed officers of the General Partner, including its chief executive officer and chief financial officer, who perform functions equivalent to those of a principal executive officer and principal financial officer of USNG if USNG had any officers, have evaluated the effectiveness of USNG's disclosure controls and procedures and have concluded that the disclosure controls and procedures of USNG have been effective as of the end of the period covered by this quarterly report on Form 10-Q.

##### Change in Internal Control Over Financial Reporting

There were no changes in USNG's internal control over financial reporting during USNG's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, USNG's internal control over financial reporting.

## Part II. OTHER INFORMATION

### Item 1. Legal Proceedings.

Not applicable.

### Item 1A. Risk Factors.

Except as noted below, there has not been a material change from the risk factors previously disclosed in USNG's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments are impossible to predict but may significantly and adversely affect USNG.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits and the suspension of trading. The regulation of futures transactions in the United States is a rapidly changing area of law and is subject to modification by government and judicial action.

The regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. Considerable regulatory attention has been focused on non-traditional investment pools which are publicly distributed in the United States. There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in USNG or the ability of USNG to continue to implement its investment strategy. In addition, various national governments have expressed concern regarding the disruptive effects of speculative trading in the energy markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on USNG is impossible to predict, but could be substantial and adverse.

In the wake of the economic crisis last year, the Administration, federal regulators and Congress are revisiting the regulation of the financial sector, including securities and commodities markets. These efforts are likely to result in significant changes in the regulation of these markets.

Currently, a number of proposals that would alter the regulation of Natural Gas Interests are being considered by federal regulators and Congress. These proposals include the imposition of fixed position limits on energy-based commodity futures contracts, extension of position and accountability limits to futures contracts on non-U.S. exchanges previously exempt from such limits, and the forced use of clearinghouse mechanisms for all over-the-counter transactions. Certain proposals would aggregate and limit all positions in energy futures held by a single entity, whether such positions exist on U.S. futures exchanges, non-U.S. futures exchanges, or in over-the-counter contracts. While it cannot be predicted at this time what reforms will eventually be made or how they will impact USNG, if any of the aforementioned proposals are implemented, USNG's ability to meet its investment objective may be negatively impacted and investors could be adversely affected.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable.

### Item 3. Defaults Upon Senior Securities.

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders.

Not applicable.

Item 5. Other Information.

#### Monthly Account Statements

Pursuant to the requirement under Rule 4.22 under the Commodity Exchange Act, each month USNG publishes an account statement for its unitholders, which includes a Statement of Income (Loss) and a Statement of Changes in NAV. The account statement is furnished to the SEC on a current report on Form 8-K pursuant to Section 13 or 15(d) of the Exchange Act and posted each month on USNG's website at [www.unitedstatesnaturalgasfund.com](http://www.unitedstatesnaturalgasfund.com).

Item 6. Exhibits.

Listed below are the exhibits which are filed as part of this quarterly report on Form 10-Q (according to the number assigned to them in Item 601 of Regulation S-K):

| Exhibit Number | Description of Document  |
|----------------|--|
| 3.1*           | Second Amended and Restated Agreement of Limited Partnership.  |
| 3.3*           | Fourth Amended and Restated Limited Liability Company Agreement of the General Partner.  |
| 10.2*          | Marketing Agent Agreement.   |
| 10.4*          | Custodian Agreement.   |
| 10.5*          | Amendment Agreement to the Custodian Agreement.  |
| 10.6*          | Administrative Agency Agreement.   |
| 10.7*          | Amendment Agreement to the Administrative Agency Agreement.  |
| 10.8*          | Amendment Agreement to the Marketing Agent Agreement.  |
| 31.1*          | Certification by Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.  |
| 31.2*          | Certification by Principal Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.  |
| 32.1*          | Certification by Principal Executive Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 32.2*          | Certification by Principal Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 99.1*          | Customer Agreement for Futures Contracts.  |
