SELECTIVE INSURANCE GROUP, INC.

(Exact Name of Registrant as Specified in Its Charter)

New Jersey (State or Other Jurisdiction of Incorporation or Organization)	22-2168890 (I.R.S. Employer Identification No.)
40 Wantage Avenue, Branchville, New Jersey (Address of Principal Executive Offices)	07890 (Zip Code)
Registrant's telephone number, including area code:	(973) 948-3000

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, par value \$2 per share	NASDAQ Global Select Market
7.5% Junior Subordinated Notes due September 27, 2066	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

..

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting

Item 1. Business.

Overview

Selective Insurance Group, Inc. (referred to as the “Parent”) is a New Jersey holding company, incorporated in 1977, that offers property and casualty insurance products and services through its insurance subsidiaries (collectively referred to as “we,” “us,” or “our”). Our main offices are located in Branchville, New Jersey and our Parent’s common stock is publicly traded on the NASDAQ Global Select Market under the symbol “SIGI.” In 2011, we were ranked as the 50th largest property and casualty group in the United States based on 2010 net premium written (“NPW”) in A.M. Best and Company’s (“A.M. Best”) annual list of “Top 200 U.S. Property/Casualty Writers.” We have provided a glossary of terms as Exhibit 99.1 to this Form 10-K, which defines certain industry-specific and other terms that are used in this Form 10-K.

We classify our business into two operating segments:

- Insurance Operations, which sells property and casualty insurance products and services; and
- Investments, which invests the premiums collected by our insurance operations.

Our Insurance Operations offers standard market insurance products and services through seven insurance subsidiaries and, in 2011, we began offering excess and surplus lines (“E&S”) insurance products as the result of the following acquisition activity:

The purchase of the renewal rights to an E&S book of business in August 2011. This renewal book had gross annual premiums of approximately \$77 million in 2010.

The purchase of Montpelier U.S. Insurance Company (“MUSIC”) in December 2011. MUSIC had gross annual premiums of approximately \$48 million in 2010.

For each of the acquisitions, all unearned premium reserves remained with the selling entities. Only premium written after the closings is for our account. For the renewal rights book, this was August 1, 2011 and for the MUSIC book this was January 1, 2012.

· During 2011, \$24.1 million of E&S lines premium was recorded by us.

Our eight insurance subsidiaries are collectively referred to as the “Insurance Subsidiaries”.

We derive substantially all of our income in three ways:

Underwriting income from Insurance Operations. Underwriting income is comprised of revenues, which are the premiums earned on our insurance products and services, less expenses. The gross premiums we bill our insureds are direct premium written (“DPW”) plus premiums assumed from other insurers. Gross premiums billed less premium ceded to reinsurers, is NPW. NPW is recognized as revenue ratably over the policy’s term as net premiums earned (“NPE”). Expenses related to our Insurance Operations fall into three main categories: (i) losses associated with claims and various loss expenses incurred for adjusting claims (referred to as “loss and loss expenses”); (ii) expenses related to insurance policy issuance, such as agent commissions, premium taxes, reinsurance, and other expenses incurred in issuing and maintaining policies, including employee compensation and benefits (referred to as “underwriting expenses”); and (iii) policyholder dividends.

Net investment income from Investments. We generate income from investing insurance premiums from the time they are collected until the time we need to make certain expenditures such as paying loss and loss expenses, underwriting expenses, equity and debt offering obligations, and policyholder dividends. Net investment income consists primarily of interest earned on fixed maturity investments, dividends earned on equity securities, and other income primarily generated from our alternative investment portfolio.

Net realized gains and losses on investment securities from the Investments segment. Realized gains and losses from the investment portfolios of the Insurance Subsidiaries and the Parent are typically the result of sales, maturities, calls, and redemptions. They also include write downs from other-than-temporary impairments (“OTTI”).

We measure the performance of our Insurance Operations by the combined ratio. Under U.S. generally accepted accounting principles (“GAAP”), the combined ratio is calculated by adding: (i) the loss and loss adjustment expense ratio, which is the ratio of incurred loss and loss adjustment expense to NPE; (ii) the expense ratio, which is the ratio of policy acquisition and other underwriting expenses to NPE; and (iii) the dividend ratio, which is the ratio of policyholder dividends to NPE. A combined ratio under 100% generally indicates an underwriting profit and a combined ratio over 100% generally indicates an underwriting loss. The combined ratio does not reflect investment income, federal income taxes, or other non-insurance related income or expense.

We measure the performance of our Investments segment by pre- and after-tax investment income and the associated return on invested assets. Our investment philosophy includes setting certain risk and return objectives for the fixed maturity, equity, and other investment portfolios. We generally measure our performance by comparing our returns for each of these components of our portfolio to a weighted-average benchmark of comparable indices.

Our Insurance Operations and Investments segments are heavily regulated by the state insurance regulators in the states in which our Insurance Subsidiaries are organized and licensed. The Insurance Subsidiaries are required to file financial statements with these states prepared in accordance with statutory accounting principles (“SAP”), promulgated by the National Association of Insurance Commissioners (“NAIC”) and adopted by the various states. Because of these regulatory requirements, we use SAP to manage our Insurance Operations. The purpose of state insurance regulation is to protect policyholders, so SAP focuses on solvency and liquidation value unlike GAAP, which focuses on the potential for shareholder profits. Consequently, significant differences exist between SAP and GAAP that are discussed further under “*Measure of Insurance Operations Profitability.*”

Insurance Operations

Overview

We derive all of our Insurance Operations revenue from selling insurance products and services to businesses and individuals for premium. Our sales to businesses, non-profit organizations, and local government entities, which we refer to as Commercial Lines, represent about 82% of our NPW. Our sales to individuals, which we refer to as Personal Lines, represent about 18% of our NPW. The majority of our sales are annual insurance policies. Commercial Lines sales are seasonally heaviest in January and July and lightest during the fourth quarter of the year.

Insurance Operations Products and Services

The types of insurance we sell in our Insurance Operations fall into three broad categories:

- Standard market property insurance, which generally covers the financial consequences of accidental loss of an insured’s real and/or personal property. Property claims are generally reported and settled in a relatively short period

of time;

Standard market casualty insurance, which generally covers the financial consequences of employee injuries in the course of employment and bodily injury and/or property damage to a third party as a result of an insured's negligent acts, omissions, or legal liabilities. Some casualty claims may take several years to be reported and settled; and

E&S insurance, which generally provides property and casualty coverage through established underwriting guidelines to small commercial accounts with moderate degrees of hazard that do not have access to coverage in the standard markets because of their small premium size, unique/niche risk characteristics, and/or regulatory restrictions that prevent standard markets from offering appropriate underwriting terms and conditions. E&S property claims are generally reported and settled in a relatively short period of time, whereas E&S casualty claims may take several years to be reported and settled.

The main Commercial Lines we underwrite and insure primarily through traditional insurance and, to a lesser extent, through alternative risk management products, such as retrospective rating plans, self-insured group retention programs, or individual self-insured accounts, are as follows:

Type of Policy	Category of Insurance
Standard Insurance	
Commercial Property	Property
Commercial Automobile	Property/Casualty
General Liability (including Excess Liability/Umbrella)	Casualty
Workers Compensation	Casualty
Business Owners Policy	Property/Casualty
Bonds (Fidelity and Surety)	Casualty
Flood ¹	Property

¹Flood insurance premiums and losses are 100% ceded to the federal government's write-your-own ("WYO") Program. Certain other policies contain minimal Flood or Flood related coverages.

The main Personal Lines we underwrite and insure are as follows:

Type of Policy	Category of Insurance
Homeowners	Property/Casualty
Personal Automobile	Property/Casualty
Flood ¹	Property

¹Flood insurance premiums and losses are 100% ceded to the federal government's WYO Program. Certain other policies contain minimal Flood or Flood related coverages.

The main E&S products that we underwrite and insure are as follows:

Type of Policy	Category of Insurance
General Liability (including Excess Liability/Umbrella)	Casualty
Commercial Property	Property

Product Development and Pricing

Our Insurance Operations policies are contracts that specify our coverages – what we will pay to or for an insured upon specified losses. We develop our coverages internally and by adopting and modifying forms and statistical data licensed from third party aggregators, notably Insurance Services Office, Inc. ("ISO"). Determining the price to charge for our coverages is complicated. At the time we underwrite and issue a policy, we do not know what our actual costs

for the policy will be in the future. To calculate and project future costs, we examine and analyze historical statistical data and factor in expected changes in loss trends. In the last five years, we have also developed predictive models for certain of our standard insurance lines. Predictive models analyze historical statistical data regarding our insureds and their loss experience, ranks our policies based on this analysis, and applies this risk data to current and future insureds to predict the likely profitability of an account. A model's predictive capabilities are limited by the amount and quality of the statistical data available. As a regional insurance group, our loss experience is not always statistically large enough to analyze and project future costs. Consequently, we use ISO data to supplement our own.

Customers and Customer Markets

Commercial Lines customers represent 81% of our total DPW. We categorize this business as follows:

	Percent of Total Commercial Lines	Average Premium per Policy	Description
Small Business	21	% \$ 2,314	Standard insurance policies generally under \$25,000, with certain restrictions for hazard grade and exposure that can be written through our internet-based One & Done® and Two & Done automated underwriting templates.
Middle Market Business	66	% \$ 8,563	Standard insurance policies that cannot be written through our automated systems and are the focus of our field-based underwriters, known as agency management specialists (“AMSs”).
Large Account Business	11	% \$ 138,750	Standard insurance policies that are larger in size or include alternative risk transfer. This business is written by large account specialists. Approximately 24% of these accounts include alternative risk transfer mechanisms.
E&S Business	2	% \$ 2,204	E&S insurance policies that are generally written through contract binding authority through established underwriting guidelines with our wholesale general agency partners.

We do not sub-divide our Personal Lines customers by size or class. No one customer accounts for 10% or more of our premium within our Insurance Operations segment.

Geographic Markets

We principally sell our standard insurance products and services in 22 states in the Eastern and Midwestern regions of the country. In addition, beginning in 2012, we have the ability to write E&S business in all 50 states and the District of Columbia. We believe this geographic diversification lessens our exposure to regulatory, competitive, and catastrophic risk. The principal states where we conduct business and their respective percentage of our total NPW over the last three fiscal years is shown in the following table:

% of NPW	Year Ended December		
	2011	2010	2009
	31,		
New Jersey	25.3 %	26.2	26.9
Pennsylvania	13.0	13.8	14.0
New York	8.3	9.0	10.1
Maryland	6.4	6.9	7.1
Illinois	5.5	5.5	5.6
Virginia	5.3	5.3	5.4
Indiana	4.9	4.8	4.1
Michigan	3.6	3.0	2.7
Georgia	3.1	3.1	3.5
North Carolina	3.0	3.3	3.5
South Carolina	2.7	2.6	2.6
Ohio	2.7	2.5	2.3
Other states	16.2	14.0	12.2
Total	100.0%	100.0	100.0

Distribution and Marketing

We sell and distribute our Insurance Operations standard products and services through independent retail insurance agents. As of December 31, 2011, we had retail agency agreements with approximately 1,000 independent agencies. As these agencies often have multiple offices, we have approximately 1,800 independent agency offices selling our products and services. We sell and distribute our Insurance Operations E&S products primarily through contract binding authority with approximately 90 wholesale general agencies, who in-turn receive their business through numerous retail agencies. We pay our agencies commissions and other consideration for business placed with us. We seek to compensate our agencies fairly and consistent with market practices. No one agency is responsible for 10% or more of our Insurance Operations premium.

Independent insurance agents and brokers write approximately 80% of commercial property and casualty insurance and approximately a third of the personal lines insurance business in the United States according to a study released in 2011 by the Independent Insurance Agents & Brokers of America. We believe that independent insurance agents will remain a significant force in overall insurance industry premium production because they represent more than one insurance carrier and can provide a wider choice of commercial lines and personal lines insurance products to insureds. Because our agencies generally represent several of our competitors and we face competition within our distribution channel, it is sometimes difficult to develop brand recognition among our customers, who do not always differentiate between insurance carriers and insurance coverages because of their reliance on their independent insurance agent. Our primary marketing strategy with agents is to:

Use a business model that provides them resources within close geographic proximity, including: (i) field underwriters; (ii) regional office underwriters, (iii) safety management specialists; and (iv) field claims personnel. These resources make timely underwriting and claim decisions based on established authority parameters;

Develop close relationships with each agency and its principals: (i) by soliciting their feedback on products and services; (ii) by advising them concerning company developments; and (iii) through significant interaction with them; and

Develop with each agency, and then carefully monitor, annual goals regarding: (i) types and mix of risks placed with us; (ii) amounts of premium or numbers of policies placed with us; (iii) customer service levels; and (iv) profitability of business placed with us.

In our most recent survey, which was conducted in 2010, we received an overall satisfaction score of 8.3 out of 10 from our agent survey, which highlighted our agents' satisfaction with our Commercial Lines products, the ease of reporting claims, and the professionalism and effectiveness of our employees.

Field and Technology Strategies Supporting Independent Agent Distribution

We use the service mark "High-tech x High-touch = HTSM" to describe our Insurance Operations business strategy. "High-tech" refers to our technology that we use to make it easy for our independent insurance agents and customers to do standard business with us. "High-touch" refers to the close relationships that we have with our independent insurance agents and customers due to our field business model that places underwriters, claims representatives, technical staff, and safety management representatives near our agents and customers.

Employees

To support our independent agents, we employ a field model in both underwriting and claims. The field model places various employees in the field, usually working from home offices near our agents. We believe that we build better and stronger relationships with our agents because of the close proximity of our field employees to our agents and the resulting direct and regular interaction with our agents and our customers.

At December 31, 2011, including our E&S business, we had approximately 2,000 employees, 300 of which work in the field.

We support our field model with our corporate headquarters in Branchville, New Jersey, and regional branch offices (“Regions”). As of December 31, 2011, the Regions and their office locations were as follows:

Region	Office Location
Heartland	Carmel, Indiana
New Jersey	Hamilton, New Jersey
Northeast	Branchville, New Jersey
Mid-Atlantic	Allentown, Pennsylvania and Hunt Valley, Maryland
Southern	Charlotte, North Carolina
E&S	Horsham, Pennsylvania and Scottsdale, Arizona

Underwriting Process Involving Agents and Field Model

Our underwriting process requires communication and interaction among:

- Our independent agents, who act as front-line underwriters, our AMSs, our field marketing specialists, and our corporate underwriters;
- Our corporate underwriting department, which includes our strategic business units (“SBUs”), organized by product and customer type, and our line-of-business units. These units develop our pricing and underwriting guidelines in conjunction with the Regions;
- Our Regions, which establish: (i) annual premium and pricing goals in consultation with the SBUs; (ii) agency new business targets; and (iii) agency profit improvement plans; and
- Our Actuarial Department, located in our corporate headquarters, which assists in the determination of rate and pricing levels, while also monitoring pricing and profitability.

We also have an underwriting service center (“USC”) located in Richmond, Virginia. The USC assists our independent agents by servicing Personal Lines and Commercial Lines Small Business and Middle Market accounts. At the USC, our employees are licensed agents who respond to customer inquiries about insurance coverage, billing transactions, and other matters. For the convenience of using the USC and our handling of certain transactions, our independent agents agree to receive a slightly lower than standard commission for the premium associated with the USC. As of December 31, 2011, our USC was servicing Commercial Lines NPW of \$45 million and Personal Lines NPW of \$29 million. The \$74 million total serviced by the USC represents 5% of our total NPW.

We believe that our field model has a distinct advantage in its ability to provide a wide range of front-line safety management services focused on improving an insured’s safety and risk management programs – and we have obtained the service mark “Safety Management: Solutions for a safer workplace®.” Safety management services include: (i) risk evaluation and improvement surveys intended to evaluate potential exposures and provide solutions for mitigation; (ii) Internet-based safety management educational resources, including a large library of coverage-specific safety materials, videos and online courses, such as defensive driving and employee educational safety courses; (iii) thermographic infrared surveys aimed at identifying electrical hazards; and (iv) Occupational Safety and Health Administration construction and general industry certification training. Risk improvement efforts for existing customers are designed to improve loss experience and policyholder retention through valuable ongoing consultative service. Our safety management goal is to work with our insureds to identify and eliminate potential loss exposures.

Claims Management and Field Claims Model

Effective, fair, and timely claims management is one of the most important services that we provide our customers and agents. It also is one of the critical factors in achieving underwriting profitability. We have structured our claims organization to emphasize: (i) cost-effective delivery of claims services and control of loss and loss expenses; and (ii) maintenance of timely and adequate claims reserves. We believe that we can achieve lower claims expenses through our field model by locating claims representatives in close proximity to our customers and independent agents.

Claims management specialists (“CMSs”) are primarily responsible for investigating and settling the majority of our non workers compensation claims directly with insureds and claimants. By promptly and personally investigating claims, we believe CMSs are able to provide better customer and agent service and quickly resolve claims within their authority. All workers compensation claims are handled in the Regional Claim Offices through a specialized claim handling model. Workers compensation adjusters specialize in medical management, investigation, resolution, or fast tracking portions of a claim. Because of the special nature of property claims, CMSs refer those claims above certain amounts to our general property adjusters for consultation. We also refer complex liability claims to an experienced adjusting team that focuses solely on complex large exposure liability claims. All environmental claims are referred to our specialized corporate environmental unit. This structure allows us to provide experienced adjusting to each claim segment.

We also have a claims service center (“CSC”), co-located with the USC, in Richmond, Virginia. The CSC receives first notices of loss from our insureds and claimants. The CSC is designed to help: (i) reduce the claims settlement time on first- and third-party automobile property damage claims; (ii) increase our use of body shops, glass repair shops, and car rental agencies that have contracted with us at discounted rates; (iii) handle and settle small property claims; and (iv) investigate and negotiate auto liability claims. Upon receipt of a claim, the CSC, as appropriate, will assign the matter to the appropriate Region or the specialized area at our corporate headquarters.

We have a special investigations unit (“SIU”) that investigates potential insurance fraud and abuse, and supports efforts by regulatory bodies and trade associations to curtail the cost of fraud. The SIU adheres to uniform internal procedures to improve detection and take action on potentially fraudulent claims. It is our practice to notify the proper authorities of its findings. This practice sends a clear message that we will not tolerate fraudulent activity committed against us or our customers. The SIU also supervises anti-fraud training for all claims adjusters and AMSs.

Technology

We leverage the use of technology in our business. In recent years, we have made significant investments in information technology platforms, integrated systems, Internet-based applications, and predictive modeling initiatives. We did this to provide:

· Our independent agents and customers with access to accurate business information and the ability to process certain transactions from their locations, seamlessly integrating those transactions into our systems;

· Our SIU investigators access to our business intelligence systems to better identify claims with potential fraudulent activities;

· Our claims recovery and subrogation departments the ability to expand and enhance their models through the use of our business intelligence systems, an effort that is expected to be completed over the coming year; and

· Our underwriters with targeted pricing tools to enhance profitability while growing the business.

In 2011, for the fourth consecutive year, we received the Interface Partner Award from Applied Systems, an automated solutions provider to independent insurance agents, for our commitment to real-time communication with agencies. The award recognized our leadership and innovation, specifically citing our interface advancements in download and real-time rating. In 2011, we also received the Quantum Award from NetVu, for outstanding achievements in agency-company technology, offering superior workflow productivity and profitability for the company’s independent agency partners.

We manage our information technology projects through an enterprise project management office (“EPMO”). The EPMO is staffed by certified individuals who apply methodologies to: (i) communicate project management standards; (ii) provide project management training and tools; (iii) review project status and cost; and (iv) provide non-technology project management consulting services to the rest of the organization. The EPMO, which includes senior management representatives from all major business areas, corporate functions and information technology, meets regularly to review all major initiatives and receives reports on the status of other projects. We believe that the EPMO is an important factor in the success of our technology implementation. Our technology operations are located in Branchville, New Jersey and Glastonbury, Connecticut. We also have agreements with two consulting and information technology services companies from India that have a significant presence in the United States to provide supplemental staffing services to our information technology operation. Together, they provide approximately 24% of our total capacity for skilled technology resources. We retain management oversight of all projects and ongoing information technology production operations. We believe we would be able to manage an efficient transition to new vendors without significant impact to our operations if we terminated either vendor.

In 2011, we launched several initiatives to enhance our customers’ experience with us. In addition to redesigning our bill to provide clearer communication to our customers, we are currently working on changes to our customer Internet portal, and are conducting customer and brand assessment surveys.

Insurance Operations Competition

Market Competition

The commercial lines property and casualty market is highly competitive and market share is fragmented among many companies. Despite a slight economic improvement and some encouraging signs of price firming, A.M. Best maintains its negative outlook for the commercial lines segment for 2012. We compete with four types of companies, primarily on the basis of price, coverage terms, claims service, safety management services, ease of technology, and financial ratings:

Regional insurers, such as Cincinnati Financial Corporation, The Hanover Insurance Group, Inc., and Harleyville Group, Inc., which offer commercial lines and personal lines products and services;

National insurers, such as Liberty Mutual Group, The Travelers Companies, Inc., The Hartford Financial Services Group, Inc., and Zurich Financial Services Group, which offer commercial lines and personal lines products and services;

Alternative risk insurers, which includes entities that self-insure their risks. Generally, only large entities have the capacity to self-insure. In the public sector, some small and mid-sized public entities have the opportunity to partially self-insure their risks through the use of risk pools or joint insurance funds that are generally created by legislative act; and

E&S lines insurers, such as Scottsdale, Nautilus, Colony, Markel, Western World, Century Surety and Burlington, which offer a variety of property and casualty insurance products on an E&S basis. In addition, we also face competition from E&S lines insurers who work directly with retail agencies such as U.S. Liability Insurance. Our E&S business is typically small-to-medium sized accounts that are subject to a lower level of competition than larger accounts.

We also face competition in personal lines, although the market is less fragmented than commercial lines and carriers have been more successful at obtaining rate increases. The A.M. Best outlook for personal lines is stable, as the auto line continues to perform well with generally adequate and stable returns. Our Personal Lines business faces competition primarily from the regional and national carriers noted above, as well as direct insurers such as GEICO and The Progressive Corporation, which primarily offer personal lines coverage and market through a direct response model.

Some of these competitors are public companies and some are mutual companies. Some, like us, rely solely on independent insurance agents for distribution of their products and services and have competition within their distribution channel. Others either employ their own agents who only represent one insurance carrier or use a combination of independent and captive agents. In 2011, we, along with the Independent Insurance Agents and

Brokers of America and several other insurance companies, have invested in an initiative that will provide independent agents with digital marketing products and services. This initiative seeks to increase the independent agents' share of the personal lines marketplace by improving their online visibility.

Financial Ratings

Because agent and customer concerns about a carrier's ability to pay claims in the future are such an important factor in our competitiveness, our financial ratings are important. Major financial rating agencies evaluate us on our financial strength, operating performance, strategic position, and ability to meet policyholder obligations. We believe that our ability to write insurance business is most significantly influenced by our rating from A.M. Best. We have had our current rating of "A+ (Superior)" for the last 50 years. A.M. Best uses its Financial Strength Rating of "Secure," and a descriptor of "Superior," for its "A+" rating, which it defines as, "assigned to companies that have, in our opinion, a superior ability to meet their ongoing obligations." It is the second highest of 15 ratings. Only approximately 9% of ratings groups carry an "A+" or better rating from A.M. Best.

Our A.M. Best Financial Strength Rating of “A+ (Superior)” with a “negative” outlook was most recently reaffirmed in the second quarter of 2011. A.M. Best cited our strong capitalization, solid level of operating profitability and established presence within our targeted regional markets in establishing their rating. The negative outlook reflects the ongoing challenges to improve underwriting performance given the competitive nature of the marketplace coupled with elevated catastrophe losses through April 2011. Following the acquisition of MUSIC, the newly-acquired company was included in our Insurance Subsidiaries intercompany pooling agreement. As a result, on January 12, 2012, A.M. Best upgraded the Financial Strength Rating of MUSIC to “A+ (Superior)” from “A- (Excellent)” with a negative outlook to reflect their revised pooled rating. A downgrade from A.M. Best to a rating below “A-” could affect our ability to write new business with customers and/or agents, some of whom are required (under various third party agreements) to obtain insurance with a carrier that maintains a minimum A.M. Best rating; usually an “A-.”

Our standard market Insurance Subsidiaries’ ratings by other major rating agencies, are as follows:

Rating Agency	Financial Strength Rating	Outlook
Standard & Poor’s (“S&P”)	A	Stable
Moody’s Investors Service (“Moody’s”)	A2	Stable
Fitch Ratings (“Fitch”)	A+	Stable

While customers and agents may be aware of our S&P, Moody’s and Fitch financial strength ratings, these ratings are not as important in insurance decision-making. They do, however, affect our ability to access capital markets. For further discussion on this, please see the “Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources” section of Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” of this Form 10-K.

Other factors that might impact our competitiveness are discussed in Item 1A. “Risk Factors.” of this Form 10-K.

Reinsurance

We use reinsurance to protect our capital resources and insure us against losses on property and casualty risks that we underwrite. We use two main reinsurance vehicles: (i) a reinsurance pooling agreement among our Insurance Subsidiaries in which each company agrees to share in premiums and losses based on certain specified percentages; and (ii) reinsurance contracts and arrangements with third parties that cover various policies that our Insurance Operations issue to insureds.

Reinsurance Pooling Agreement

The primary purposes of the reinsurance pooling agreement among our Insurance Subsidiaries are the following:

· Pool or share proportionately the underwriting profit and loss results of property and casualty insurance underwriting operations through reinsurance;

· Prevent any of our Insurance Subsidiaries from suffering undue loss;

· Reduce administration expenses; and

· Permit all of the Insurance Subsidiaries to obtain a uniform rating from A.M. Best.

Under the Pooling Agreement, as of December 31, 2011, the following Insurance Subsidiaries mutually reinsure all insurance risks written by them pursuant to the respective percentage set forth opposite each Insurance Subsidiary's name on the table below:

Insurance Subsidiary	Respective Percentage	
Selective Insurance Company of America (SICA)	49.5	%
Selective Way Insurance Company (SWIC)	21.0	%
Selective Insurance Company of South Carolina (SICSC)	9.0	%
Selective Insurance Company of the Southeast (SICSE)	7.0	%
Selective Insurance Company of New York (SICNY)	7.0	%
Selective Auto Insurance Company of New Jersey (SAICNJ)	6.0	%
Selective Insurance Company of New England (SICNE)	0.5	%

On January 1, 2012, the Pooling Agreement was revised as follows to include our recent E&S acquisition:

Insurance Subsidiary	Respective Percentage	
Selective Insurance Company of America	44.5	%
Selective Way Insurance Company	21.0	%
Selective Insurance Company of South Carolina	9.0	%
Selective Insurance Company of the Southeast	7.0	%
Selective Insurance Company of New York	7.0	%
Selective Auto Insurance Company of New Jersey	6.0	%
Montpelier U.S. Insurance Company (MUSIC)	5.0	%
Selective Insurance Company of New England	0.5	%

Reinsurance Treaties and Arrangements

By entering reinsurance treaties and arrangements, we are able to increase underwriting capacity and accept larger risks and a larger number of risks without directly increasing capital or surplus. All of our reinsurance treaties are for traditional reinsurance; we do not purchase finite reinsurance. Under our reinsurance treaties, the reinsurer generally assumes a portion of the losses we cede to them in exchange for a portion of the premium. Amounts not reinsured are known as retention. Reinsurance does not legally discharge us from liability under the terms and limits of our policies, but it does make our reinsurer liable to us for the amount of liability we cede to them. Accordingly, we have counterparty credit risk to our reinsurers. We attempt to mitigate this credit risk by: (i) pursuing relationships with reinsurers rated "A-" or higher; and (ii) obtaining collateral to secure reinsurance obligations. Some of our reinsurance contracts include provisions that permit us to terminate or commute the reinsurance treaty if the reinsurer's financial condition or rating deteriorates. We continuously monitor the financial condition of our reinsurers. We also continuously review the quality of reinsurance recoverables and reserves for uncollectible reinsurance.

We primarily use the following three reinsurance treaty and arrangement types for standard property and casualty insurance:

Treaty reinsurance, under which certain types of policies are automatically reinsured without prior approval by the reinsurer of the underlying individual insured risks;

Facultative reinsurance, under which an individual insurance policy or a specific risk is reinsured with the prior approval of the reinsurer. We use facultative reinsurance for policies with limits greater than those available under our treaty reinsurance; and

Protection provided under the Terrorism Risk Insurance Act of 2002 as modified and extended through December 31, 2014 by the Terrorism Risk Insurance Program Reauthorization Act of 2007 (collectively referred to as "TRIA"). Under TRIA, terrorism coverage is mandatory for all primary workers compensation policies. Insureds with non-workers compensation commercial policies, however, have the option to accept or decline our terrorism coverage or negotiate with us for other terms. Under TRIA, each participating insurer is responsible for paying a deductible of specified losses based on a percentage of the prior year's applicable commercial lines direct premiums earned before federal assistance is available. In 2012, the deductible is approximately \$182 million. For losses above the deductible, the federal government will pay 85% and the insurer retains 15%. Although TRIA's provisions will mitigate our loss exposure to a large-scale terrorist attack, our deductible is substantial.

The following is a summary of our property reinsurance treaties and arrangements covering our Insurance Subsidiaries:

PROPERTY REINSURANCE ON INSURANCE PRODUCTS

Treaty Name	Reinsurance Coverage	Terrorism Coverage
<p>Property Excess of Loss (covers standard lines)</p>	<p>\$28 million above \$2 million retention in two layers. Losses other than TRIA certified losses are subject to the following reinstatements and annual aggregate limits:</p> <ul style="list-style-type: none"> · \$8 million in excess of \$2 million layer provides unlimited reinstatements; and · \$20 million in excess of \$10 million layer provides three reinstatements, \$80 million in aggregate limits. 	<p>All nuclear, biological, chemical, and radioactive (“NBCR”) losses are excluded regardless of whether or not they are certified under TRIA. For non-NBCR losses, the treaty distinguishes between acts certified under TRIA and those that are not. The treaty provides annual aggregate limits for TRIA certified (other than NBCR) acts of \$24 million for the first layer and \$40 million for the second layer. Non-certified terrorism losses (other than NBCR) are subject to the normal limits under the treaty.</p>
<p>Property Catastrophe Excess of Loss (covers both standard and E&S lines)</p>	<p>\$435 million above \$40 million retention in three layers:</p> <ul style="list-style-type: none"> · 95% of losses in excess of \$40 million up to \$100 million; · 90% of losses in excess of \$100 million up to \$225 million; and · 90% of losses in excess of \$225 million up to \$475 million. 	<p>All nuclear, biological, and chemical (“NBC”) losses are excluded regardless of whether or not they are certified under TRIA. TRIA losses related to foreign acts of terrorism are excluded from the treaty. Domestic terrorism is included regardless of whether it is certified under TRIA or not. Please see Item 1A. “Risk Factors.” of this Form 10-K for further discussion regarding changes in TRIA.</p>

The treaty provides one reinstatement per layer, \$789 million annual aggregate limit, net of the Insurance Subsidiaries' co-participation.

Flood 100% reinsurance by the federal government's WYO Program. None

The following is a summary of our casualty reinsurance treaties and arrangements covering our Insurance Subsidiaries:

CASUALTY REINSURANCE ON INSURANCE PRODUCTS

Treaty Name	Reinsurance Coverage	Terrorism Coverage
Casualty Excess of Loss (covers standard lines)	There are six layers covering 100% of \$88 million in excess of \$2 million. Losses other than terrorism losses are subject to the following reinstatements and annual aggregate limits: <ul style="list-style-type: none"> · \$3 million in excess of \$2 million layer provides 23 reinstatements, \$72 million net annual aggregate limit; · \$7 million in excess of \$5 million layer provides three reinstatements, \$28 million annual aggregate limit; · \$9 million in excess of \$12 million layer provides two reinstatements, \$27 million annual aggregate limit; · \$9 million in excess of \$21 million layer provides one reinstatement, \$18 million annual aggregate limit; · \$20 million in excess of \$30 million layer provides one reinstatement, \$40 million annual aggregate limit; and · \$40 million in excess of \$50 million layer provides with one reinstatement, \$80 million in net annual aggregate limit. 	All NBCR losses are excluded. All other losses stemming from the acts of terrorism are subject to the following reinstatements and annual aggregate limits: <ul style="list-style-type: none"> · \$3 million in excess of \$2 million layer provides four reinstatements for terrorism losses, \$15 million net annual aggregate limit; · \$7 million in excess of \$5 million layer provides two reinstatements for terrorism losses, \$21 million annual aggregate limit; · \$9 million in excess of \$12 million layer provides two reinstatements for terrorism losses, \$27 million annual aggregate limit; · \$9 million in excess of \$21 million layer provides one reinstatement for terrorism losses, \$18 million annual aggregate limit;

- \$20 million in excess of \$30 million layer provides one reinstatement for terrorism losses, \$40 million annual aggregate limit; and

- \$40 million in excess of \$50 million layer provides one reinstatement for terrorism losses, \$80 million in net annual aggregate limit.

Montpelier Re
Quota Share and
Loss Development
Cover
(covers E&S lines)

As part of the acquisition of MUSIC we entered into several reinsurance agreements that together provide protection for losses on policies written prior to the acquisition and any development on reserves established by MUSIC as of the date of acquisition. The reinsurance recoverables under these treaties are 100% collateralized.

Provides full terrorism coverage including NBCR.

We also have other reinsurance treaties that we do not consider core to our reinsurance program for our standard insurance products, such as our Surety and Fidelity Excess of Loss Reinsurance Treaty, National Workers Compensation Reinsurance Pool (NWCRP) that covers business assumed from the involuntary workers compensation pool, and our Equipment Breakdown Coverage Reinsurance Treaty. In addition, we have Property and Casualty Excess of Loss Reinsurance Treaties providing coverage on our E&S business. For further discussion on reinsurance, see the “Reinsurance” section of Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” of this Form 10-K.

Claims Reserves

Net Loss and Loss Expense Reserves

We establish loss and loss expense reserves that are estimates of the amounts we will need to pay in the future for claims and related expenses for insured losses that have already occurred. Estimating reserves as of any date involves a considerable degree of judgment by management and is inherently uncertain. We regularly review our reserving techniques and our overall amount of reserves. We also review:

Information regarding each claim for losses, including potential extra-contractual liabilities, or amounts paid in excess of the policy limits, which may not be covered by our contracts with reinsurers;

Our loss history and the industry’s loss history;

Legislative enactments, judicial decisions and legal developments regarding damages;

Changes in political attitudes; and

Trends in general economic conditions, including inflation.

See “Critical Accounting Policies and Estimates” in Item 7. “Management’s Discussion and Analysis of Financial Condition and Results for Operations.” of this Form 10-K for full discussion regarding our loss reserving process.

Our loss and loss expense reserve development over the preceding 10 years is shown on the following table, which has five parts:

Section I shows the estimated liability recorded at the end of each indicated year for all current and prior accident year's unpaid loss and loss expenses. The liability represents the estimated amount of loss and loss expenses for unpaid claims, including incurred but not reported ("IBNR") reserves. In accordance with GAAP, the liability for unpaid loss and loss expenses is recorded gross of the effects of reinsurance. An estimate of reinsurance recoverables is reported separately as an asset. The net balance represents the estimated amount of unpaid loss and loss expenses outstanding reduced by estimates of amounts recoverable under reinsurance contracts.

Section II shows the re-estimated amount of the previously recorded net liability as of the end of each succeeding year. Estimates of the liability of unpaid loss and loss expenses are increased or decreased as payments are made and more information regarding individual claims and trends, such as overall frequency and severity patterns, becomes known.

Section III shows the cumulative amount of net loss and loss expenses paid relating to recorded liabilities as of the end of each succeeding year.

Section IV shows the re-estimated gross liability and re-estimated reinsurance recoverables through December 31, 2011.

Section V shows the cumulative net (deficiency)/redundancy representing the aggregate change in the liability from the original balance sheet dates and the re-estimated liability through December 31, 2011.

This table does not present accident or policy year development data. Conditions and trends that have affected past reserve development may not necessarily occur in the future. As a result, extrapolating redundancies or deficiencies based on this table is inherently uncertain.

(\$ in millions)	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011

Note: Some amounts may not foot due to rounding.

We experienced favorable prior year loss and loss expense reserve development in 2011, 2010, and 2009:

The primary drivers of 2011's favorable development of \$38.7 million were the following:

Our commercial automobile line experienced favorable development of approximately \$13 million driven by accident years 2007 through 2009. This represents a continued trend driven by lower frequencies in these years.

Our general liability line had favorable development of approximately \$12 million. This is driven by favorable development on the premises and operations coverages for accident years 2009 and prior. The favorable premises development was largely offset by adverse development for the products coverage in 2010 and prior.

Our business owners' policy line had favorable development of approximately \$11 million. This is driven by favorable development on the liability coverage for accident years 2008 through 2010. While the profitability of the property portion of this line continues to perform adversely, the liability coverage has experienced continued favorable reported loss emergence in recent years.

Our workers compensation line experienced unfavorable loss development of approximately \$7 million. This was driven by increases in the 2010 accident year partially offset by various earlier accident years. This increase represents a continued trend related to increased severities in recent years.

Our remaining lines of business collectively experienced approximately \$10 million of favorable development largely driven by favorable prior year catastrophe development.

The primary drivers of 2010's favorable development of \$43.6 million were the following:

Our commercial automobile line experienced favorable development of approximately \$28 million driven by accident years 2004 through 2009, representing a consistent trend in recent years, as reported loss activity continues to emerge lower than expected.

Our general liability line had favorable development of approximately \$26 million. This was driven by favorable development on the premises and operations coverages for accident years 2006 and prior. Favorable premises development for 2007 through 2009 was essentially offset by increases for the products coverage.

Our workers compensation line experienced unfavorable loss development of approximately \$22 million. This was driven by increases in the 2008 and 2009 accident years, which experienced increases in average severity.

Our remaining lines of business collectively experienced approximately \$11 million of favorable development. While there were some offsetting impacts among these lines, homeowners contributed \$6 million of favorable development towards the total. This was due to lower than expected liability losses in accident years 2008 and 2009.

The primary drivers of 2009's favorable development of \$29.4 million were the following:

Our workers compensation line experienced favorable development of approximately \$11 million. Accident years 2005 to 2007 had favorable development of approximately \$36 million from the impact of a series of underwriting improvement strategies in that period, partially offset by approximately \$22 million of adverse development due to higher than expected severity in accident year 2008.

Our commercial automobile line experienced favorable development of approximately \$10 million from lower than anticipated severity emergence primarily in accident year 2007.

Our general liability line had favorable development of approximately \$8 million. We had favorable loss emergence in accident years 2004 through 2007 in our premises coverage business that was partially offset by adverse development in our products/completed operations business.

The significant cumulative loss and loss expense reserve net deficiencies seen between 2001 and 2003 reflect the property and casualty insurance industry's soft market pricing during those years. As a whole, the industry underestimated reserves and loss trends and created intense pricing competition.

The following table reconciles losses and loss expense reserves under SAP and GAAP at December 31 as follows:

(\$ in thousands)	2011	2010
Statutory losses and loss expense reserves	\$2,591,570	2,513,065
Provision for uncollectible reinsurance	3,900	3,400
Other	(36)	(146)
GAAP losses and loss expense reserves – net	2,595,434	2,516,319
Reinsurance recoverables on unpaid losses and loss expenses	549,490	313,739
GAAP losses and loss expense reserves – gross	\$3,144,924	2,830,058

Environmental Reserves

Our general liability, excess liability, and homeowners reserves include exposure to environmental claims, which primarily include asbestos and non-asbestos claims. Our exposure to environmental liability is primarily due to: (i) policies written prior to the absolute pollution endorsement in the mid 1980s; and (ii) underground storage tank leaks mainly from New Jersey homeowners' policies. Our environmental claims stem primarily from insured exposures in municipal government, small non-manufacturing commercial risks, and homeowners policies. The emergence of these claims is slow and highly unpredictable.

“Asbestos claims” are claims for bodily injury alleged to have occurred from exposure to asbestos-containing products. In the past, we were the insurer of various distributors of asbestos-containing products, such as electrical and plumbing materials, and, in some cases, the manufacturers of these products. Over the last 20 years, a large number of asbestos claims have been made against the insurance industry. While most of our claims are the result of incidental exposure, we insure a former manufacturer of asbestos related products, which comprises more than half of our outstanding claims. These claims are associated with two policies, each written with a \$1.0 million policy aggregate limit. At December 31, 2011, asbestos claims constituted 17% of our \$38.4 million net environmental reserves compared to 21% of our \$39.4 million net environmental reserves at December 31, 2010.

“Non-asbestos claims” are claims alleging bodily injury or property damage from pollution or other environmental contaminants other than asbestos. These claims primarily include landfills and leaking underground storage tanks. Landfill claims continue to account for a significant portion of our environmental claim unit's litigation costs. In past years, we experienced adverse development in our homeowners line of business due to unfavorable trends in claims for groundwater contamination from leaking underground heating oil storage tanks in New Jersey. Over the past couple of years, claims related to leaking underground heating oil storage tanks has stabilized. In addition, in 2007 we

instituted a fuel oil system exclusion on our New Jersey homeowners policies that limits our exposure to leaking underground storage tanks for certain customers. At that time, existing insureds were offered a one-time opportunity to buy back oil tank liability coverage. The exclusion applies to all new homeowners policies in New Jersey. These customers are eligible for the buy-back option only if the tank meets specific eligibility criteria.

Our environmental claims are handled in our centralized and specialized environmental claim unit. Environmental reserves are evaluated on a claim-by-claim basis. The ability to assess potential exposure often improves as an environmental claim develops, including judicial determinations of coverage issues. As a result, reserves are adjusted accordingly.

Estimating IBNR reserves for environmental claims is difficult because, in addition to other factors, there are significant uncertainties associated with estimating critical assumptions, such as average clean-up costs, third-party costs, potentially responsible party shares, allocation of damages, litigation and coverage costs, and potential state and federal legislative changes. Normal historically based actuarial approaches are difficult to apply to environmental claims because past loss history is not indicative of future potential environmental losses. In addition, while models can be applied, such models can produce significantly different results with small changes in assumptions. As a result, we do not calculate a specific environmental loss range. Historically, our environmental claims have been significantly less volatile and uncertain than other competitors in the commercial lines industry. In part, this is due to the fact that we are the primary insurance carrier on the majority of our environmental exposures, thus providing more certainty in our reserve position compared to others in the insurance marketplace.

Measure of Insurance Operations Profitability

We manage and evaluate the performance and profitability of our Insurance Operations in accordance with SAP, which differs from GAAP. We base our incentive compensation to our employees and our independent agents on the SAP results of our Insurance Operations. In addition, our rating agencies use SAP information to evaluate our performance, including against our industry peers.

We measure our statutory underwriting performance by four different ratios:

1. The loss and loss expense ratio, which is calculated by dividing incurred loss and loss expenses by NPE;
2. The underwriting expense ratio, which is calculated by dividing all expenses related to the issuance of insurance policies by NPW;
3. The dividend ratio, which is calculated by dividing policyholder dividends by NPE; and
4. The combined ratio, which is the sum of the loss and loss expense ratio, the underwriting expense ratio, and the dividend ratio.

SAP differs in several ways from GAAP, under which we report our financial results to shareholders and the United States Securities Exchange Commission (“SEC”):

With regard to the underwriting expense ratio, NPE is the denominator for GAAP; whereas NPW is the denominator for SAP.

With regard to income:

o Underwriting expenses are deferred and amortized to expense over the life of an insurance policy under GAAP; whereas they are recognized when incurred under SAP.

o Deferred taxes are recognized in our Consolidated Statements of Income as either a deferred tax expense or a deferred tax benefit under GAAP; whereas they are recorded directly to surplus under SAP.

o Changes in the value of our alternative investments, which are part of our other investment portfolio on our Consolidated Balance Sheets, are recognized in income under GAAP; whereas they are recorded directly to surplus under SAP.

With regard to equity under GAAP and statutory surplus under SAP:

The timing difference in income due to the GAAP/SAP differences in expense recognition creates a difference between GAAP equity and SAP statutory surplus.

o Regarding unrealized gains and losses on fixed maturity securities:

Under GAAP, unrealized gains and losses on available-for-sale (“AFS”) fixed maturity securities are recognized in equity; but they are not recognized in equity on purchased held-to-maturity (“HTM”) securities. Unrealized gains and losses on HTM securities transferred from an AFS designation are amortized from equity as a yield adjustment.

Under SAP, unrealized gains and losses on fixed maturity securities assigned certain NAIC Security Valuation Office ratings (specifically designations of one or two, which generally equate to investment grade bonds) are not recognized in statutory surplus. However, fixed maturity securities that have a designation of three or higher must recognize unrealized losses as an adjustment to statutory surplus.

Certain assets are designated under insurance regulations as “non-admitted,” including, but not limited to, certain deferred tax assets, overdue premium receivables, furniture and equipment, and prepaid expenses. These assets are excluded from statutory surplus under SAP, but are recorded in the Consolidated Balance Sheets net of applicable allowances under GAAP; and

o Regarding recognition of the liability for our defined benefit plan:

Under GAAP, the liability is recognized in an amount equal to the excess of the projected benefit obligation over the fair value of the plan assets, and any changes in this balance not recognized in income are recognized in equity as a component of other comprehensive income (“OCI”).

Under SAP, the liability is recognized in an amount equal to the excess of the vested accumulated benefit obligation over the fair value of the plan assets, and any changes in this balance not recognized in income are recognized in statutory surplus.

Our Insurance Operations statutory results for the last three completed fiscal years are shown on the following table:

(\$ in thousands)	Year Ended December 31,		
	2011	2010	2009
Insurance Operations Results			
NPW	\$ 1,485,349	1,388,556	1,422,655

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

NPE	\$1,439,313	1,414,612	1,431,047

Insurance Regulation

Primary Oversight from the States in Which We Operate

Our Insurance Operations are heavily regulated. The primary public policy behind insurance regulation is the protection of policyholders and claimants over all other constituencies, including shareholders. By virtue of the McCarran-Ferguson Act, Congress has largely delegated insurance regulation to the various states. For our Insurance Subsidiaries, the primary regulators of their business and financial condition are the departments of insurance in the states in which they are organized and are licensed. For a discussion of the broad regulatory, administrative, and supervisory powers of the various departments of insurance, refer to the risk factor that discusses regulation in Item 1A. "Risk Factors." of this Form 10-K.

Our various state insurance regulators are members of the NAIC. The NAIC has codified SAP and other accounting reporting formats and drafts model insurance laws and regulations governing insurance companies. An NAIC model only becomes law when the various state legislatures enact it. The adoption of certain NAIC model laws and regulations, however, is a key aspect of the NAIC Financial Regulations Standards and Accreditation Program, which also sets forth minimum staffing and resource levels for state insurance departments. The NAIC recently adopted a model law changing reinsurance collateral requirements for reinsurers not domiciled in the United States. The adoption of the model law by states in which we operate will likely impact our ability to obtain collateral from foreign reinsurers in the future.

IRIS, RBC, and the Model Audit Rule

Among the various financial regulatory initiatives of the NAIC that are material to the regulators in which our Insurance Subsidiaries are organized are the following:

The Insurance Regulatory Information System (“IRIS”). IRIS identifies 13 industry financial ratios and specifies “usual values” for each ratio. Departure from the usual values on four or more of the financial ratios can lead to inquiries from individual state insurance departments about certain aspects of the insurer’s business. Our Insurance Subsidiaries have consistently met the majority of the IRIS ratio tests.

Risk-Based Capital. Risk-based capital is measured by the four major areas of risk to which property and casualty insurers are exposed: (i) asset risk; (ii) credit risk; (iii) underwriting risk; and (iv) off-balance sheet risk. Insurers with total adjusted capital that is two times or less than their calculated “Authorized Control Level,” are subject to different levels of regulatory intervention and action. Based upon the unaudited 2011 statutory financial statements, the total adjusted capital for each of our Insurance Subsidiaries substantially exceeded two times their Authorized Control Level.

Annual Financial Reporting Regulation (referred to as the “Model Audit Rule”). Effective January 1, 2010, the regulators of our Insurance Subsidiaries adopted the Model Audit Rule, modeled closely on the Sarbanes-Oxley Act of 2002, concerning: (i) auditor independence; (ii) corporate governance; and (iii) internal control over financial reporting. As permitted under the regulation, the Audit Committee of the Board of Directors (the “Board”) of the Parent also serves as the audit committee of each of our Insurance Subsidiaries.

Federal Regulation

Federal legislation and administrative policies also affect the insurance industry. Among the most notable are TRIA, the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”), and various privacy laws that apply to us because we have personal non-public information, including the Gramm-Leach-Bliley Act, the Fair Credit Reporting Act, the Drivers Privacy Protection Act, and the Health Insurance Portability and Accountability Act. Like all businesses, we also are required to enforce the economic and trade sanctions of the Office of Foreign Assets Control (“OFAC”).

In response to the financial markets crises in 2008 and 2009, the Dodd-Frank Act was enacted and became law. This act provides for, among other things, the following:

- The establishment of the Federal Insurance Office (“FIO”);
- Federal Reserve oversight of financial services firms designated as systemically significant; and
- Corporate governance reforms for publicly traded companies.

For additional information on the potential impact of the Dodd-Frank Act, refer to the risk factor related to legislation within Item 1A. “Risk Factors.” of this Form 10-K.

Investments

Like many other property and casualty insurance companies, we depend on income from our investment portfolio for a significant portion of our revenues and earnings. We are exposed to significant financial and capital markets risks, primarily relating to interest rates, credit spreads, equity prices, and the change in market value of our alternative investment portfolio. A decline in both income and our investment portfolio asset values could occur as a result of, among other things, a decrease in market liquidity, fluctuations in interest rates, decreased dividend payment rates, negative market perception of credit risk with respect to types of securities in our portfolio, a decline in the performance of the underlying collateral of our structured securities, reduced returns on our alternative investment portfolio, or general market conditions.

Our Investments segment invests the premiums collected by the Insurance Operations to satisfy our equity and debt obligations and generate investment income. At December 31, 2011, our investment portfolio consisted of the following:

Category of Investment (\$ in millions)	Carrying Value	% of Investment Portfolio
Fixed maturities	\$ 3,609.7	88
Equities	157.4	4
Short-term investments	217.0	5
Other investments, including alternatives	128.3	3
Total	\$ 4,112.4	100

Our investment philosophy includes setting certain return and risk objectives for the fixed maturity and equity portfolios. The primary fixed maturity portfolio return objective is to maximize after-tax investment yield and income while balancing risk. A secondary objective is to meet or exceed a weighted-average benchmark of public fixed income indices. Within the equity portfolio, the high dividend yield strategy, which was implemented in 2011, is designed to generate consistent dividend income while maintaining a minimal tracking error to the S&P 500 Index. Additional equity strategies are focused on meeting or exceeding strategy specific benchmarks of public equity indices. The risk objectives for our portfolios are focused on: (i) asset diversification; (ii) investment quality; (iii) liquidity, particularly to coincide with cash obligations of the Insurance Operations; (iv) consideration of taxes; and (v) preservation of capital. Our overall philosophy is to invest with a long-term horizon along with a “buy-and-hold” principle; however, yield and income generation remain the key drivers to our investment strategy.

For further information regarding our risks associated with the overall investment portfolio, see Item 7A. “Quantitative and Qualitative Disclosures About Market Risk.” and Item 1A. “Risk Factors.” of this Form 10-K. For additional information about investments, see the section entitled, “Investments,” in Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” and Item 8. “Financial Statements and Supplementary Data.” Note 5. of this Form 10-K.

Executive Officers of the Registrant

Biographical information about our Chief Executive Officer and other executive officers is as follows:

Name, Age, Title	Occupation and Background
	<ul style="list-style-type: none"> · Present position since May 2000 · President, Chief Executive Officer, and Director, Selective, 1999 – 2000 · President, Chief Operating Officer, and Director, Selective, 1997 – 1999 · Other senior executive, management, and operational positions, Selective, since 1980 · Certified Public Accountant (New Jersey) (Inactive)
Gregory E. Murphy, 56	<ul style="list-style-type: none"> · Trustee, Newton Medical Center Foundation, since 1999
Chairman, President, and Chief Executive Officer	<ul style="list-style-type: none"> · Director, Property Casualty Insurers Association of America, since 2008 · Director, Insurance Information Institute, since 2000 · Trustee, the American Institute for CPCU (AICPCU) and the Insurance Institute of America (IIA), since June 2001 · Graduate of Boston College (B.S. Accounting) · Harvard University (Advanced Management Program) · M.I.T. Sloan School of Management
Dale A. Thatcher, 50	<ul style="list-style-type: none"> · Present position since April 2010
Executive Vice President and Chief Financial Officer	<ul style="list-style-type: none"> · Executive Vice President, Chief Financial Officer and Treasurer, 2003 – 2010 · Senior Vice President, Chief Financial Officer and Treasurer, Selective, 2000 – 2003 · Certified Public Accountant (Ohio) (Inactive) · Chartered Property and Casualty Underwriter (CPCU) · Chartered Life Underwriter (CLU) · Member, American Institute of Certified Public Accountants

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

- Member, Ohio Society of Certified Public Accountants
- Member, Financial Executives Institute
- Member, Insurance Accounting and Systems Association
- University of Cincinnati (B.B.A. Accounting; M.B.A. Finance)
- Harvard University (Advanced Management Program)
- Present position since February 2003
- Senior Vice President and Chief Actuary, Selective, 2000 – 2003

Ronald J. Zaleski Sr., 57

Executive Vice President and Chief Actuary

- Vice President and Chief Actuary, Selective, 1999 – 2000
- Fellow of Casualty Actuarial Society
- Member, American Academy of Actuaries
- Loyola College (B.A. Mathematics)

Michael H. Lanza, 50 Executive Vice President, General Counsel, and Chief Compliance Officer	<ul style="list-style-type: none"> · Present position since October 2007 · Senior Vice President and General Counsel, Selective, 2004 – 2007 · Member, Society of Corporate Secretaries and Corporate Governance Professionals · Member, National Investor Relations Institute · University of Connecticut (B.A.) · University of Connecticut School of Law (J.D.) · Present position since February 2010 · Executive Vice President, Chief Underwriting and Field Operations Officer, 2008 – February 2010 · Executive Vice President, Chief Field Operations Officer, Selective 2007 – 2008
John J. Marchioni, 42 Executive Vice President, Insurance Operations	<ul style="list-style-type: none"> · Senior Vice President, Director of Personal Lines, Selective 2005 – 2007 · Various insurance operation and government affairs positions, Selective, 1998 – 2005 · Director, Consumer Agent Portal, LLC, since September 2011 · Chartered Property Casualty Underwriter (CPCU) · Princeton University (B.A. History) · Harvard University (Advanced Management Program) · Present position since April 2011
Ronald E. St. Clair, 47 Executive Vice President and Chief Information Officer	<ul style="list-style-type: none"> · IT Executive, Enterprise Resource Organization, Progressive Casualty Insurance, 2008 – March 2011 · IT Executive, Progressive Commercial Auto, Progressive Casualty Insurance, 2006 – 2008 · Harding University (B.S. Computer Science) · Case Western Reserve University (M.B.A.)

- Present position since February 2012
- Vice President, Human Resources Operations, 2006 – 2012
- Assistant Vice President, Leadership and Professional Development, 2003 – 2006
- Assistant Vice President, Employee Relations, 1998 – 2003
- Senior Professional in Human Resources (SPHR)
- Member, Society for Human Resource Management
- The Ohio State University (B.A.)
- Fairleigh Dickinson University, Human Resources Professional Development Certificate

Kimberly Burnett, 54

Executive Vice President and

Chief Human Resources Officer

Information about our Board is in our definitive Proxy Statement for the 2012 Annual Meeting of Stockholders to be held on April 25, 2012 in “Information About Proposal 1, Election of Directors,” and is also incorporated by reference into Part III of this Form 10-K.

Reports to Security Holders

We file with the SEC all required disclosures, including our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements, and other required information under Sections 13(a) or 15(d) of the Securities Exchange Act of 1934 (“Exchange Act”). We also provide access to these filed materials on our Internet website, www.selective.com.

Item 1A. Risk Factors

Any of the following risk factors could cause our actual results to differ materially from historical or anticipated results. They also could have a significant impact on our business, liquidity, capital resources, results of operations, financial condition, and debt ratings. These risk factors also might affect, alter, or change actions that we might take in executing our long-term capital strategy, including but not limited to, contributing capital to any or all of the Insurance Subsidiaries, issuing additional debt and/or equity securities, repurchasing our equity securities, redeeming our fixed income securities, or increasing or decreasing stockholders' dividends. The following list of risk factors is not exhaustive, and others may exist.

Risks Related to Insurance Operations

The failure of our risk management strategies could have a material adverse effect on our financial condition or results of operations.

We employ a number of risk management strategies to reduce our exposure to risk that include, but are not limited to, the following:

- Being disciplined in our underwriting practices;
- Being prudent in our claims management practices and establishing adequate loss and loss expense reserves;
- Continuing to develop and implement predictive models to analyze historical statistical data regarding our insureds and their loss experience to: (i) classify such policies based on that information; (ii) apply that information to current and prospective accounts; and (iii) better predict account profitability; and
- Purchasing reinsurance.

All of these strategies have inherent limitations. We cannot be certain that an event or series of unanticipated events will not occur and result in losses greater than we expect and have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

Our loss reserves may not be adequate to cover actual losses and expenses.

We are required to maintain loss reserves for our estimated liability for losses and loss expenses associated with reported and unreported insurance claims. Our estimates of reserve amounts are based on facts and circumstances that we know, including our expectations of the ultimate settlement and claim administration expenses, predictions of future events, trends in claims severity and frequency, and other subjective factors relating to our insurance policies in force. There is no method for precisely estimating the ultimate liability for settlement of claims. From time-to-time, we adjust reserves and increase them if they are inadequate or reduce them if they are redundant. We cannot be certain

that the reserves we establish are adequate or will be adequate in the future. An increase in reserves: (i) reduces net income and stockholders' equity for the period in which the deficiency in reserves is identified; and (ii) could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

We are subject to losses from catastrophic events.

Our results are subject to losses from natural and man-made catastrophes, including but not limited to: hurricanes, tornadoes, windstorms, earthquakes, hail, terrorism, explosions, severe winter weather, floods and fires, some of which may be related to climate changes. The frequency and severity of these catastrophes are inherently unpredictable. One year may be relatively free of such events while another may have multiple events. For further discussion regarding man-made catastrophes that relate to terrorism, see the risk factor directly below regarding the potential for significant losses from acts of terrorism.

There is widespread interest among scientists, legislators, regulators, and the public regarding the effect that greenhouse gas emissions may have on our environment, including climate change. If greenhouse gases continue to shift our climate, it is possible that more devastating catastrophic events could occur.

Catastrophe losses are determined by the severity of the event and the total amount of insured exposures in the area affected by the event. Most of the risks underwritten by our Insurance Operations are concentrated geographically in the Eastern and Midwestern regions of the United States, particularly in New Jersey, which represented approximately 25% of our total NPW during the year ended December 31, 2011. Catastrophes in the Eastern and Midwestern regions of the United States could adversely impact our financial results, as was the case for the past two years.

Although catastrophes can cause losses in a variety of property and casualty insurance lines, most of our historic catastrophe-related claims have been from commercial property and homeowners coverages. In an effort to limit our exposure to catastrophe losses, we purchase catastrophe reinsurance. Reinsurance could prove inadequate if: (i) the modeling software we use to analyze the Insurance Subsidiaries' risk results in an inadequate purchase of reinsurance by us; (ii) a major catastrophe loss exceeds the reinsurance limit or the reinsurers' financial capacity; or (iii) the frequency of catastrophe losses results in our Insurance Subsidiaries exceeding their one reinstatement. Even after considering our reinsurance protection, our exposure to catastrophe risks could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

We are subject to potential significant losses from acts of terrorism.

TRIA requires private insurers and the United States government to share the risk of loss on future acts of terrorism that are certified by the U.S. Secretary of the Treasury. As a Commercial Lines writer, we are required to participate in TRIA. Under TRIA, terrorism coverage is mandatory for all primary workers compensation policies. Insureds with non-workers compensation commercial policies, however, have the option to accept or decline our terrorism coverage or negotiate with us for other terms. In 2011, approximately 86% of our Commercial Lines non-workers compensation policyholders purchased terrorism coverage.

TRIA rescinded all previously approved coverage exclusions for terrorism. Many of the states in which we write commercial property insurance, however, mandate that we cover fire following an act of terrorism. Under TRIA, each participating insurer is responsible for paying a deductible of specified losses before federal assistance is available. This deductible is based on a percentage of the prior year's applicable commercial lines premiums. In 2012, the deductible is approximately \$182 million. For losses above the deductible, the federal government will pay 85%, up to an industry limit of \$100 billion, and the insurer retains 15%. Although TRIA's provisions will mitigate our loss exposure to a large-scale terrorist attack, our deductible is substantial and could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings. TRIA legislation is in effect through December 31, 2014.

Our ability to reduce our risk exposure depends on the availability and cost of reinsurance.

We transfer a portion of our underwriting risk exposure to reinsurance companies. Through our reinsurance arrangements, a specified portion of our losses and loss adjustment expenses are assumed by the reinsurer in exchange for a specified portion of premiums. The availability, amount, and cost of reinsurance depend on market conditions, which may vary significantly. Our major reinsurance contracts renew annually and may be impacted by the market

conditions at the time of the renewal that are unrelated to our specific book of business or experience. Any decrease in the amount of our reinsurance will increase our risk of loss. Any increase in the cost of reinsurance, absent a decrease in the amount of reinsurance, will reduce our earnings. Accordingly, we may be forced to incur additional expenses for reinsurance or may not be able to obtain sufficient reinsurance on acceptable terms. Either could adversely affect our ability to write future business or result in the assumption of more risk with respect to those policies we issue.

We are exposed to credit risk.

We are exposed to credit risk in several areas of our Insurance Operations business, including from:

Our reinsurers, who are obligated to us under our reinsurance agreements. The relatively small size of the reinsurance market and our objective to maintain an average weighted rating of “A” by A.M. Best on our current reinsurance programs constrains our ability to diversify this credit risk. However, some of our reinsurance credit risk is collateralized.

Some of our independent agents, who collect premiums from insureds and are required to remit the collected premium to us.

- Some of our insureds, who are responsible for payment of deductibles and/or premiums directly to us.

The invested assets in our defined benefit plan, which partially serve to fund the Insurance Operations liability associated with this plan. To the extent that credit risk adversely impacts the valuation and performance of the invested assets within our defined benefit plan, the funded status of the defined benefit plan could be adversely impacted and, as result, could increase the cost of the plan to our Insurance Operations.

It is possible that current economic conditions could increase our credit risk. Our exposure to credit risk could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

The property and casualty insurance industry is subject to general economic conditions and is cyclical.

The property and casualty insurance industry has experienced significant fluctuations in its historic results due to competition, occurrence or severity of catastrophic events, levels of capacity, general economic conditions, interest rates, and other factors. Demand for insurance is influenced significantly by prevailing general economic conditions. The supply of insurance is related to prevailing prices, the levels of insured losses and the levels of industry surplus which, in turn, may fluctuate in response to changes in rates of return on investments being earned in the insurance industry. As a result, the insurance industry historically has been a cyclical industry characterized by periods of intense price competition due to excessive underwriting capacity as well as periods when shortages of capacity permitted favorable premium levels. Competitors pricing business below technical levels could force us to reduce our profit margin in order to protect our best business.

Pricing and loss trends impact our profitability. For example, assuming retention and all other factors remain constant:

- A pure price decline of approximately 1% increases the statutory combined ratio by approximately one point;

A 3% increase in expected claim costs for the year will cause the loss and loss adjustment expense ratio to increase by approximately two points; and

· A combination of the two could raise the combined ratio approximately three points.

The industry's profitability also is affected by unpredictable developments, including:

- Natural and man-made disasters;
- Fluctuations in interest rates and other changes in the investment environment that affect investment returns;
- Inflationary pressures (medical and economic) that affect the size of losses;
- Judicial, regulatory, legislative, and legal decisions that affect insurers' liabilities;
- Changes in the frequency and severity of losses;
- Pricing and availability of reinsurance in the marketplace; and
- Weather-related impacts due to the effects of climate changes.

Any of these developments could cause the supply or demand for insurance to change and could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

Difficult conditions in global capital markets and the economy may adversely affect our revenue and profitability and harm our business, and these conditions may not improve in the near future.

General economic conditions in the United States and throughout the world and volatility in financial and insurance markets materially affect our results of operations. Concerns over such issues as the availability and cost of credit, the stability of the United States mortgage market, weak real estate markets, high unemployment, volatile energy and commodity prices, and geopolitical issues, also have led to declines in business and consumer confidence and precipitated an economic slowdown.

Factors such as consumer spending, business investment, government spending, the volatility and strength of the capital markets, and inflation all affect the business and economic environment and, indirectly, the amount and profitability of our business. With continuing high unemployment, lower family income, lower corporate earnings, lower business investment, and lower consumer spending, the demand for insurance products is adversely affected. In addition, we are impacted by the recent decrease in commercial and new home construction and home ownership because 34% of direct premiums written in our Commercial Lines business during 2011 were generated through contractors business. In addition, 38% of direct premiums written in our Commercial Lines business during 2011 was based on payroll/sales of our underlying insureds. The impact of an economic downturn in Commercial Lines will adversely affect our audit and endorsement premium, as it had in 2010 and 2009. Further unfavorable economic developments could adversely affect our earnings if our customers have less need for insurance coverage, cancel existing insurance policies, modify coverage, or choose not to renew with us. Challenging economic conditions also may impair the ability of our customers to pay premiums as they come due. We are unable to predict the likely duration and severity of the current economic conditions in the United States, and other countries, which may have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

A downgrade or a potential downgrade in our financial strength or credit ratings could result in a loss of business and could have a material adverse effect on our financial condition and results of operations.

We are rated on our financial strength, primarily our ability to pay claims, by various Nationally Recognized Statistical Rating Organizations (“NRSROs”). The financial strength ratings on our standard market Insurance Subsidiaries, which does not take into consideration our acquisition of MUSIC, are as follows:

NRSRO	Financial Strength Rating	Outlook
A.M. Best and Company	“A+”	Negative
S&P	“A”	Stable
Moody’s Investor Service	“A2”	Stable
Fitch	“A+”	Stable

Following the acquisition of MUSIC, the newly-acquired company was included in our Insurance Subsidiaries’ intercompany pooling agreement. As a result, on January 12, 2012, A.M. Best upgraded the financial strength rating of MUSIC to “A+ (Superior)” from “A- (Excellent)” with a negative outlook to reflect their revised pooled rating. There has not yet been any rating action on MUSIC from the other rating agencies.

A significant rating downgrade, particularly from A.M. Best, could: (i) affect our ability to write new business with customers, some of whom are required under various third party agreements to maintain insurance with a carrier that maintains a specified minimum rating; or (ii) be an event of default under our line of credit with Wachovia Bank, National Association (“Line of Credit”). The Line of Credit requires our Insurance Subsidiaries to maintain an A.M. Best rating of at least “A-” (two levels below our current rating) and a default could lead to acceleration of any outstanding principal. Such an event also could trigger default provisions under certain of our other debt instruments and negatively impact our ability to borrow in the future. As a result, any significant downgrade in our financial strength ratings could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength and debt ratings.

NRSROs also rate our long-term debt creditworthiness. Credit ratings indicate the ability of debt issuers to meet debt obligations in a timely manner and are important factors in our overall funding profile and ability to access certain types of liquidity. Our current credit ratings are as follows:

NRSRO	Credit Rating	Long Term Credit Outlook
A.M. Best and Company	“a-”	Negative
S&P	“BBB”	Stable
Moody’s Investor Services	“Baa2”	Stable
Fitch	“A-”	Stable

Downgrades in our credit ratings could have a material adverse effect on our financial condition and results of operations in many ways, including making it more expensive for us to access capital markets.

Because of the difficulties experienced by many financial institutions during the recent credit crisis, including insurance companies, and the public criticism of NRSROs, we believe it is possible that the NRSROs: (i) will heighten their level of scrutiny of financial institutions; (ii) will increase the frequency and scope of their reviews; and (iii) may adjust upward the capital and other requirements employed in their models for maintaining certain rating levels. We cannot predict possible actions NRSROs may take regarding our ratings that could adversely affect our business or the possible actions we may take in response to any such action.

We have many competitors and potential competitors.

The insurance industry is highly competitive. The current economic environment has only served to further increase competition. We compete with regional, national, and direct-writer property and casualty insurance companies for customers, agents, and employees. Some competitors are public companies and some are mutual companies. Many competitors are larger and may have lower operating costs or costs of capital. They also may have the ability to absorb greater risk while maintaining their financial strength ratings. Consequently, some competitors may be able to price their products more competitively. These competitive pressures could result in increased pricing pressures on a number of our products and services, particularly as competitors seek to win market share, and may impair our ability to maintain or increase our profitability. We also face competition, primarily in Commercial Lines, from entities that self-insure their own risks. Because of its relatively low cost of entry, the Internet has also emerged as a significant place of new competition, both from existing competitors and new competitors. It is also possible that reinsurers, who have significant knowledge of the primary property and casualty insurance business because they reinsure it, could enter the market to diversify their operations. New competition could cause changes in the supply or demand for insurance and adversely affect our business.

We have less loss experience data than our larger competitors.

We believe that insurance companies are competing and will continue to compete on their ability to use reliable data about their insureds and loss experience in complex analytics and predictive models to select profitable risks. With the consistent expansion of computing power and the decline in its cost, we believe that data and analytics use will continue to increase and become more complex and accurate. As a regional insurance group, the loss experience from our Insurance Operations is not large enough in all circumstances to analyze and project our future costs. In addition, we have limited data regarding E&S business, which we began writing in 2011. We use data from ISO to obtain sufficient industry loss experience data. While statistically relevant, that data is not specific to the performance of risks we have underwritten. Larger competitors, particularly national carriers, have significantly more data regarding the performance of risks that they have underwritten. The analytics of their loss experience data may be more predictive of profitability of their risks than our analysis using, in part, general industry loss experience. For the same reason, should Congress repeal the McCarran-Ferguson Act and we are unable to access data from ISO, we will be at a competitive disadvantage to larger insurers who have more sufficient loss experience data on their own insureds.

We depend on independent insurance agents and wholesale agency partners.

We market and sell our insurance products through independent insurance agents and wholesale agents who are not our employees. We believe that independent agents will remain a significant force in overall insurance industry premium production because they can provide insureds with a wider choice of insurance products than if they represented only one insurer. That, however, creates competition in our distribution channel and we must market our products and services to our agents before they sell them to our mutual customers. Our financial condition and results of operations are tied to the successful marketing and sales efforts of our products by our agents. In addition, under insurance laws and regulations and common law, we potentially can be held liable for business practices or actions taken by our agents.

We face risks regarding our Flood business because of uncertainties regarding the funding of the National Flood Insurance Program (“NFIP”).

We are the sixth largest insurance group participating in the WYO arrangement of the NFIP, which is managed by the Mitigation Division of Federal Emergency Management Agency in the U.S. Department of Homeland Security. For WYO participation, we receive an expense allowance, or servicing fee, for policies written and claims serviced. Currently, the expense allowance is 30.4%. The servicing fee is the combination of 1% of direct written premiums and 1.5% of incurred losses.

The NFIP is funded by Congress. In the last several years, funding of the program has continued through short extensions as part of continuing resolutions to temporarily maintain current spending. At present, the funding for the program has been extended to May 31, 2012. Some members of Congress have expressed a desire to explore a comprehensive revision of the program, its costs, and its administration. We are actively monitoring developments in Washington regarding reform proposals to the NFIP, particularly regarding any changes to the fee structure. We cannot predict whether proposals will be adopted or, if adopted, what impact their adoption could have on our business, financial condition, or results of operations.

As a WYO carrier, we are required to follow certain NFIP procedures when administering flood policies and claims. Some of these requirements may be different from our normal business practices and may present a reputational risk to our brand. Insurance companies are regulated by states, however, NFIP is a federal program and there may be instances where requirements placed on WYO carriers by NFIP are not consistent with the regulations of a particular state. Consequently, we have the risk that our regulator’s position may conflict with NFIP’s position on the same issue.

We are heavily regulated and changes in regulation may reduce our profitability and limit our growth.

Our Insurance Operations are heavily regulated by extensive laws and regulations that may change on short notice. The primary public policy behind insurance regulation is the protection of policyholders and claimants over all other constituencies, including shareholders. By virtue of the McCarran-Ferguson Act, Congress has largely ceded insurance regulation to the various states. However, we are subject to federal legislation and administrative policies,

such as disclosure under the securities laws, TRIA, OFAC, and various privacy laws, including the Gramm-Leach-Bliley Act, the Fair Credit Reporting Act, the Drivers Privacy Protection Act, the Health Insurance Portability and Accountability Act, and the policies of the Federal Trade Commission. As a result of issuing workers compensation policies, we also are subject to Mandatory Medicare Secondary Payer Reporting under the Medicare, Medicaid, and SCHIP Extension Act of 2007.

There is significant regulatory interest in insurance companies' enterprise risk management solutions and the NAIC is evaluating what standards, if any, to follow regarding a company's own risk and solvency assessment, which international insurance regulators have developed.

Solvency II, which sets out new, stronger European Union-wide requirements on capital adequacy and risk management for insurers, is scheduled to become effective in November 2012. The strengthened regime is intended to reduce the possibility of consumer loss or market disruption in insurance. Solvency II does not directly govern domestic United States' insurers, so it is unclear what effect, if any, it may have. The NAIC is expected to evaluate the effect of Solvency II and it is possible that some changes to United States' insurance regulation could be proposed.

We also are subject to non-governmental regulators, such as the NASDAQ Stock Market and the New York Stock Exchange, where we list our securities. Many of these regulators, to some degree, overlap with each other on various matters. They also have different regulations on the same legal issues that are subject to their individual interpretative discretion. Consequently, we have the risk that one regulator's position may conflict with another regulator's position on the same issue. As compliance is generally reviewed in hindsight, we also are subject to the risk that interpretations will change over time.

The regulation of business and financial condition of our Insurance Subsidiaries is primarily delegated to the departments of insurance in the states in which they are organized and licensed. The passage of the Dodd-Frank act has not materially changed that delegation, but oversight of the insurance industry could change in the future. The broad regulatory, administrative, and supervisory powers of the various departments of insurance include the following:

Related to our financial condition, review and approval of such matters as minimum capital and surplus requirements, standards of solvency, security deposits, methods of accounting, form and content of statutory financial statements, reserves for unpaid loss and loss adjustment expenses, reinsurance, payment of dividends and other distributions to shareholders, periodic financial examinations, and annual and other report filings.

Related to our general business, review and approval of such matters as certificates of authority and other insurance company licenses, licensing and compensation of agents, premium rates (which may not be excessive, inadequate, or unfairly discriminatory), policy forms, policy terminations, reporting of statistical information regarding our premiums and losses, periodic market conduct examinations, unfair trade practices, participation in mandatory shared market mechanisms, such as assigned risk pools and reinsurance pools, participation in mandatory state guaranty funds, and mandated continuing workers compensation coverage post-termination of employment.

Related to our ownership of the Insurance Subsidiaries, we are required to register as an insurance holding company system and report information concerning all of our operations that may materially affect the operations, management, or financial condition of the insurers. As an insurance holding company, the appropriate state regulatory authority may: (i) examine us or our Insurance Subsidiaries at any time; (ii) require disclosure or prior approval of material transactions of any of the Insurance Subsidiaries with us or each other; and (iii) require prior approval or notice of certain transactions, such as payment of dividends or distributions to us.

We believe that we are in compliance with all laws and regulations that have a material effect on our results of operations, but the cost of complying with changes in laws and regulation could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

We are subject to the risk that legislation will be passed significantly changing insurance regulation and adversely impacting our business, our financial condition, and our results of operations.

In 2009, the Dodd-Frank Act was enacted to address the financial markets crises in 2008 and 2009 and the issues regarding the AIG scandal. The Dodd-Frank Act created the FIO as part of the U.S. Department of Treasury to advise the federal government regarding insurance issues. The Dodd-Frank Act also requires the Federal Reserve through the Financial Services Oversight Council (“FSOC”) to supervise financial services firms designated as systemically significant. Selective is not considered one of these firms. The Dodd-Frank Act also included a number of corporate governance reforms for publicly traded companies, including proxy access, say-on-pay, and other compensation and governance issues requiring shareholder action. We anticipate that there will continue to be a number of legislative proposals discussed and introduced in Congress that could result in the federal government becoming directly involved in the regulation of insurance:

Repeal of the McCarran-Ferguson Act. While proposals for McCarran-Ferguson Act repeal recently have been primarily directed at health insurers, if enacted and applicable to property and casualty insurers, such repeal would significantly reduce our ability to compete and materially affect our results of operations because we rely on the anti-trust exemptions the law provides to obtain loss data from third party aggregators, such as the Insurance Service Office (“ISO”), to predict future losses.

National Catastrophic Funds. Various legislative proposals have been introduced that would establish a federal reinsurance catastrophic fund as a federal backstop for future natural disasters. These bills generally encourage states to create catastrophe funds by creating a federal backstop for states that create the funds. While homeowners' insurance is primarily handled at the state level, there are important roles for the federal government to play, including the establishment of a national catastrophic fund.

Reform of the NFIP. There have been legislative proposals to reform the NFIP by: (i) expanding coverage to include coverage for losses from wind damage; and (ii) forgiving the nearly \$20 billion in debt amassed by the NFIP from the catastrophic storms of 2004 and 2005. We believe that the expansion of coverage to include wind losses would significantly increase the cost and availability of NFIP insurance.

Healthcare reform. The enactment of the Patient Protection and Affordable Care Act of 2010 (the "Healthcare Act") may have an impact on various aspects of our business, including our Insurance Operations. Lines of business that are impacted by costs and quality of medical care, such as workers compensation and personal auto Personal Injury Protection (PIP), are likely to be affected by this legislation. In addition, we will be impacted as a business enterprise by potential tax issues and changes in employee benefits. The Healthcare Act, portions of which will be subject to debate in Supreme Court in 2012, will be implemented over time and we will continue to monitor and assess its impact.

Changes in Reinsurance Collateral requirements. The NAIC recently adopted a model law changing reinsurance collateral requirements for reinsurers not domiciled in the United States. The adoption of the model law by states in which we operate will likely impact our ability to obtain collateral from foreign reinsurers in the future.

We expect the debate about the role of the federal government in regulating insurance to continue. The continued soft economy has also raised the possibility of future legislative and regulatory actions intended to help the economy, in addition to the enactment of Emergency Economic Stabilization Act of 2008, which could further impact our business. We cannot predict whether any of these or any related proposal will be adopted, or what impact, if any, such proposals, could have on our results of operations, liquidity, financial condition, financial strength, and debt ratings if enacted.

Class action litigation could affect our business practices and financial results.

Our industry has been the target of class action litigation in areas including the following:

- After-market parts;
- Urban homeowner insurance underwriting practices, including attempts by federal regulators to expand the Federal Housing Administrations guidelines to determine unfair discrimination;
- Credit scoring and predictive modeling pricing;
- Investment disclosure;
- Managed care practices;
- Timing and discounting of personal injury protection claims payments;
- Direct repair shop utilization practices; and

Changes in accounting guidance could impact the results of our operations and financial condition.

The Financial Accounting Standards Board (“FASB”) is working with the International Accounting Standards Board (“IASB”) in a joint project that could significantly impact today’s insurance model. Potential changes include, but are not limited to: (i) redefining the revenue recognition process for insurance companies; and (ii) requiring loss reserve discounting. As indicated in Note 2. “Summary of Significant Accounting Policies” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K, our premiums are earned over the period that coverage is provided and we do not discount our loss reserves. Final guidance from this joint project could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

The FASB is also currently reviewing a number of proposed changes to existing accounting guidance, several of which are the result of joint projects with the IASB. Potential changes to accounting guidance regarding the treatment of financial instruments, fair value measurement, and leases could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings. It is uncertain as to how the NAIC will react to these potential accounting changes.

Risks Related to Our Investment Operations

The failure of our risk management strategies could have a material adverse effect on our financial condition or results of operations.

We employ a number of risk management strategies to reduce our exposure to risk that include, but are not limited to, the following:

- Being prudent in establishing our investment policy and appropriately diversifying our investments;
- Using complex financial and investment models to analyze historic investment performance and predict future investment performance under a variety of scenarios using asset concentration, asset volatility, asset correlation, and systematic risk; and
- Closely monitoring investment performance, general economic and financial conditions, and other relevant factors.

All of these strategies have inherent limitations. We cannot be certain that an event or series of unanticipated events will not occur and result in losses greater than we expect and have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

Difficult conditions in global capital markets and the economy may adversely affect our revenue and profitability and harm our business, and these conditions may not improve in the near future.

Our results of operations are materially affected by conditions in the global capital markets and the economy generally, in both the U.S. and abroad. Concerns over the availability and cost of credit, the U.S. mortgage market, a weak real estate market in the U.S., high unemployment, volatile energy and commodity prices, and geopolitical issues, among other factors, have contributed to increased volatility in the financial markets, increased potential for credit downgrades, and decreased liquidity in certain investment segments. In addition, the low investment yield environment that is a result of a combination of Federal Reserve policy and the continuing weak economic conditions is expected to continue for the next several years. As our fixed income securities mature, they are replaced with lower yielding securities, which negatively impact our overall portfolio yield. These conditions impact our ability to produce investment results consistent with historical performance.

Turbulent financial markets in 2011 were driven in part from the significant level of concern surrounding rising government debt levels across the globe. The sovereign debt crisis has been particularly concentrated in Europe where ratings agencies downgraded the debt of several Eurozone countries, with Greek debt at one point being moved to junk status. The crisis in Europe has made it difficult for certain European states to refinance their debts and has caused a significant devaluation of the Euro. Lack of confidence in the stability of the European Union and continued uncertainty about growth in global economies may have an adverse effect on the valuation of our investment portfolio. As of December 31, 2011, the Company had approximately \$63.9 million, or 1.5%, invested in Eurozone government, corporate, and equity securities. Our Eurozone sovereign debt exposure in the portfolio totals less than \$17.6 million

and is issued by Germany and Finland. For further information regarding our European exposure, see Item 7A. “Quantitative and Qualitative Disclosures About Market Risk.”

We are exposed to interest rate and credit risk in our investment portfolio.

We are exposed to interest rate risk primarily related to the market price, and cash flow variability, associated with changes in interest rates. A rise in interest rates may decrease the fair value of our existing fixed maturity investments and declines in interest rates may result in an increase in the fair value of our existing fixed maturity investments. Our fixed income investment portfolio, which currently has a duration of 3.2 years excluding short term investments, contains interest rate sensitive instruments that may be adversely affected by changes in interest rates resulting from governmental monetary policies, domestic and international economic and political conditions, and other factors beyond our control. A rise in interest rates would decrease the net unrealized gain position of the investment portfolio, offset by our ability to earn higher rates of return on funds reinvested in new investments. Conversely, a decline in interest rates would increase the net unrealized gain position of the investment portfolio, offset by lower rates of return on funds reinvested and new investments. Changes in interest rates will also have an effect on the calculated duration of certain securities in the portfolio. We seek to mitigate our interest rate risk associated with holding fixed maturity investments by monitoring and maintaining the average duration of our portfolio with a view toward achieving an adequate after-tax return without subjecting the portfolio to an unreasonable level of interest rate risk. Although we take measures to manage the economic risks of investing in a changing interest rate environment, we may not be able to mitigate the interest rate risk of our assets relative to our liabilities.

The value of our investment portfolio is subject to credit risk from the issuers and/or guarantors of the securities in the portfolio, other counterparties in certain transactions and, for certain securities, insurers that guarantee specific issuer's obligations. Defaults by the issuer or an issuer's guarantor, insurer, or other counterparties regarding any of our investments, could reduce our net investment income and net realized investment gains or result in investment losses. We are also subject to the risk that the issuers, or guarantors, of fixed maturity securities we own may default on principal and interest payments due under the terms of the securities. At December 31, 2011, our fixed maturity securities portfolio represented approximately 88% of our total invested assets. The occurrence of a major economic downturn, acts of corporate malfeasance, widening credit spreads, budgetary deficits, or other events that adversely affect the issuers or guarantors of these securities could cause the value of our fixed maturity securities portfolio and our net income to decline and the default rate of our fixed maturity securities portfolio to increase.

With economic uncertainty, credit quality of issuers or guarantors could be adversely affected and a ratings downgrade of the issuers or guarantors of the securities in our portfolio could also cause the value of our fixed maturity securities portfolio and our net income to decrease. For example, rating agency downgrades of monoline insurance companies during 2009 contributed to a decline in the carrying value and market liquidity of our municipal bond investment portfolio. A reduction in the value of our investment portfolio could have a material adverse effect on our business, results of operations, financial condition, and debt ratings. Levels of write downs are impacted by our assessment of the impairment, including a review of the underlying collateral of structured securities, and our intent and ability to hold securities that have declined in value until recovery. If we reposition or realign portions of the portfolio, so that we determine not to hold certain securities in an unrealized loss position to recovery, we will incur an other-than-temporary impairment ("OTTI") charge. For further information regarding credit and interest rate risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." of this Form 10-K.

We are exposed to risk in our municipal bond portfolio.

Approximately 35% of our fixed maturity securities are state or local municipality obligations. There have been widespread reports regarding the stress on state and local governments emanating from: (i) declining revenues; (ii) large unfunded liabilities; and (iii) entrenched cost structures. Debt-to-gross domestic product ratios for many states have been deteriorating due to, among other factors: (i) declines in federal monetary assistance provided as the United States is currently experiencing the largest deficit in its history; and (ii) lower levels of sales and property tax revenue as unemployment remains elevated and the housing market continues to remain unstable. Although we closely monitor this portfolio, we may not be able to mitigate the exposure in our municipal portfolio if state and local governments are unable to fulfill their obligations. In addition at December 31, 2011, 29% of our investment portfolio was invested in tax-exempt municipal obligations. As such, the value of our investment portfolio could be adversely affected by legislation that changes the current tax preference of municipal obligations.

Our statutory surplus may be materially affected by rating downgrades on investments held in our portfolio.

We are exposed to significant financial and capital markets risks, primarily relating to interest rates, credit spreads, equity prices, and the change in market value of our alternative investment portfolio. A decline in both income and our investment portfolio asset values could occur as a result of, among other things, a decrease in market liquidity, falling interest rates, decreased dividend payment rates, negative market perception of credit risk with respect to types of securities in our portfolio, a decline in the performance of the underlying collateral of our structured securities, reduced returns on our alternative investment portfolio, or general market conditions. A global decline in asset values will be more amplified in our financial condition, as our statutory surplus is leveraged at a 3.8:1 ratio to our investment portfolio.

With economic uncertainty, the credit quality and ratings of securities in our portfolio could be adversely affected. The NAIC could potentially apply a more adverse class code on a security than was originally assigned, which could adversely affect statutory surplus because securities with NAIC class codes three through six require securities to be marked-to-market for statutory accounting purposes, as compared to securities with NAIC class codes of one or two that are carried at amortized cost.

Deterioration in the public debt and equity markets, as well as in the private investment marketplace, could lead to investment losses, which may adversely affect our results of operations, financial condition, liquidity, and debt ratings.

Like many other property and casualty insurance companies, we depend on income from our investment portfolio for a significant portion of our revenue and earnings. Our investment portfolio is exposed to significant financial and capital markets risks, and volatile changes in general market conditions could lead to a decline in the market value of our portfolio as well as the performance of the underlying collateral of our structured securities.

Our notes payable and Line of Credit are subject to certain debt-to-capitalization restrictions and net worth covenants, which could be impacted by a significant decline in investment value. Further OTTI charges could be necessary if there is a future significant decline in investment values. Depending on market conditions going forward, and in the event of extreme prolonged market events, such as the global credit crisis, we could incur additional realized and unrealized losses in future periods, which could have an adverse impact on our results of operations, financial condition, debt and financial strength ratings, and our ability to access capital markets as a result of realized losses, impairments, and changes in unrealized positions.

For more information regarding market interest rate, credit, and equity price risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." of this Form 10-K.

There can be no assurance that the actions of the U.S. Government, Federal Reserve, and other governmental and regulatory bodies will achieve their intended effect.

The Federal Reserve has taken a number of actions related to interest rates and purchasing of financial instruments intended to spur economic recovery. However, economic uncertainty is still prevalent within the markets, and, economic conditions suggest the risk of higher than expected inflation in the long term. Increased pressure on the price of our fixed income and equity portfolios may occur if these economic stimulus actions are not as effective as originally intended. These results could materially and adversely affect our results of operations, financial condition, liquidity and the trading price of our common stock. In the event of future material deterioration in business conditions, we may need to raise additional capital or consider other transactions to manage our capital position and liquidity.

A period of sustained low interest rates would have an adverse effect on investment income as higher yielding securities mature and we reinvest the proceeds at lower yields.

In addition, we are subject to extensive laws and regulations that are administered and enforced by a number of different governmental authorities and non-governmental self-regulatory agencies. In light of the current economic conditions, some of these authorities have implemented, or may in the future implement, new or enhanced regulatory requirements, such as those included in the Dodd-Frank Act, intended to restore confidence in financial institutions and reduce the likelihood of similar economic events in the future. These authorities may also seek to exercise their supervisory and enforcement authority in new or more robust ways. Such events could affect the way we conduct our business and manage our capital, and may require us to satisfy increased capital requirements. These developments, if they occurred, could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

We are subject to the types of risks inherent in investing in private limited partnerships.

Our other investments include investments in private limited partnerships that invest in various strategies such as private equity, mezzanine debt, distressed debt, and real estate. We are subject to risks arising from the fact that the determination of the fair value of these types of investments is inherently subjective. The general partner of each of these partnerships generally reports the change in the fair value of the interests in the partnership on a one quarter lag because of the nature of the underlying assets or liabilities. Since these partnerships' underlying investments consist primarily of assets or liabilities for which there are no quoted prices in active markets for the same or similar assets, the valuation of interests in these partnerships are subject to a higher level of subjectivity and unobservable inputs than substantially all of our other investments and as such, are subject to greater scrutiny and reconsideration from one reporting period to the next. These factors may result in significant changes in the fair value of these investments between reporting periods, which could lead to significant decreases in their fair value. Since we record our investments in these various partnerships under the equity method of accounting, any decreases in the valuation of these investments would negatively impact our results of operations. In addition, pursuant to the various limited partnership agreements of these partnerships, we are committed for the full life of each fund and cannot redeem our investment with the general partner. Liquidation is only triggered by certain clauses within the limited partnership agreements or at the funds' stated end date, at which time we will receive our final allocation of capital and any earned appreciation of the underlying investments. We also are subject to potential future capital calls in the aggregate amount of approximately \$57 million as of December 31, 2011.

The valuation of our investments include methodologies, estimations, and assumptions that are subject to differing interpretations and could result in changes to investment valuations that may adversely affect our results of operations or financial condition.

Fixed maturity, equity, and short-term investments, which are reported at fair value on the Consolidated Balance Sheet, represented the majority of our total cash and invested assets as of December 31, 2011. As required under accounting rules, we have categorized these securities into a three-level hierarchy, based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1). The next priority is to quoted prices in markets that are not active or inputs that are observable either directly or indirectly, including quoted prices for similar assets or liabilities or in markets that are not active and other inputs that can be derived principally from, or corroborated by, observable market data for substantially the full term of the assets or liabilities (Level 2). The lowest priority in the fair value hierarchy is to unobservable inputs supported by little or no market activity and that reflect the reporting entity's own assumptions about the exit price, including assumptions that market participants would use in pricing the asset or

liability (Level 3).

An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. We generally use an independent pricing service and broker quotes to price our investment securities. At December 31, 2011, approximately 15% and 84% of these securities represented Level 1 and Level 2, respectively. However, prices provided by an independent pricing service and independent broker quotes can vary widely even for the same security. Rapidly changing and unprecedented credit and equity market conditions could materially impact the valuation of securities as reported within our Consolidated Financial Statements and the period-to-period changes in value could vary significantly. Decreases in value may result in an increase in non-cash OTTI charges, which could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings .

36

The determination of the amount of impairments taken on our investments is highly subjective and could materially impact our results of operations or our financial position.

The determination of the amount of impairments taken on our investments is based on our periodic evaluation and assessment of our investments and known and inherent risks associated with the various asset classes. Such evaluations and assessments are revised as conditions change and new information becomes available. Management updates its evaluations regularly and reflects changes in impairments as such evaluations are revised. There can be no assurance that our management has accurately assessed the level of impairments taken as reflected in our Consolidated Financial Statements. Furthermore, additional impairments may need to be taken in the future. Historical trends may not be indicative of future impairments.

An investment in a fixed maturity or equity security is impaired if its fair value falls below its carrying value and the decline is considered to be other-than-temporary. We regularly review our entire investment portfolio for declines in value. Management's assessment of a decline in value includes, but is not limited to, current judgment as to the financial position and future prospects of the security issuer as well as general market conditions. For fixed maturity securities, if we believe that a decline in the value of a particular investment is temporary, and we do not have the intent to sell these securities and do not believe we will be required to sell these securities before recovery, we record the decline as an unrealized loss in accumulated other comprehensive income for those securities that are designated as available-for-sale. Our assessment of whether an equity security is other-than-temporarily-impaired also includes our intent-to-hold the security in the near-term. For both fixed maturity and equity securities, if we believe the decline is other-than-temporary, we write down the carrying value of the investment and record a realized loss in our Consolidated Statements of Income.

Additionally, management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Consideration in the impairment evaluation process include, but are not limited to: (i) whether the decline appears to be issuer or industry specific; (ii) the relationship of market prices per share to book value per share at the date of acquisition and date of evaluation; (iii) the price-earnings ratio at the time of acquisition and date of evaluation; (iv) the financial condition and near-term prospects of the issuer, including any specific events that may influence the issuer's operations; (v) the recent income or loss of the issuer; (vi) the independent auditors' report on the issuer's recent financial statements; (vii) the dividend policy of the issuer at the date of acquisition and the date of evaluation; (viii) any buy/hold/sell recommendations or price projections published by outside investment advisors; (ix) any rating agency announcements; (x) the length of time and the extent to which the fair value has been less than cost/amortized cost; and (xi) the evaluation of projected cash flows under various economic and default scenarios. For further information regarding our evaluation and considerations for determining whether a security is other-than-temporarily impaired, please refer to "Critical Accounting Policies and Estimates" in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" of this Form 10-K.

Changes in tax laws impacting marginal tax rates and/or the preferred tax treatment of municipal obligations could adversely impact our business.

Tax legislation that changes the tax preference of municipal obligations under current law could adversely affect the market value of municipal obligations. At December 31, 2011, 29% of our investment portfolio was invested in tax-exempt municipal obligations. As such, the value of our investment portfolio could be adversely affected by any such legislation. Additionally, any such changes in tax law could reduce the difference between tax-exempt interest rates and taxable rates, which can subject us to additional tax liability, reducing the overall net investment return of our portfolio.

Risks Related to Our General Operations

Operational risks, including human or systems failures, are inherent in our business.

Operational risks and losses can result from, among other things, fraud, errors, failure to document transactions properly or to obtain proper internal authorization, failure to comply with regulatory requirements, information technology failures, or external events.

We believe that our modeling, underwriting, and information technology and application systems are critical to our business. We expect our information technology and application systems to remain an important part of our underwriting process and our ability to compete successfully. We have also licensed certain systems and data from third parties. We cannot be certain that we will have access to these, or comparable, service providers, or that our information technology or application systems will continue to operate as intended. A major defect or failure in our internal controls or information technology and application systems could: (i) result in management distraction; (ii) harm our reputation; or (iii) increase our expenses. We believe appropriate controls and mitigation procedures are in place to prevent significant risk of defect in our internal controls around our information technology and application systems, but internal controls provide only a reasonable, not absolute, assurance as to the absence of errors or irregularities and any ineffectiveness of such controls and procedures could have a significant and negative effect on our business.

We depend on key personnel.

To a large extent, the success of our businesses is dependent on our ability to attract and retain key employees. Competition to attract and retain key personnel is intense. While we have employment agreements with certain key managers, all of our employees are at-will employees and we cannot ensure that we will be able to attract and retain key personnel. As of December 31, 2011, our workforce had an average age of approximately 46 and approximately 24% of our workforce was retirement eligible under our retirement and benefit plans.

If we experience difficulties with outsourcing relationships, our ability to conduct our business might be negatively impacted.

We outsource certain business and administrative functions to third parties for efficiencies and cost savings, and may do so increasingly in the future. If we fail to develop and implement our outsourcing strategies or our third-party providers fail to perform as anticipated, we may experience operational difficulties, increased costs, and a loss of business that may have a material adverse effect on our results of operations or financial condition. By outsourcing certain business and administrative functions to third parties, we may be exposed to enhanced risk of data security breaches. Any breach of data security could damage our reputation and/or result in monetary damages, which, in turn, could have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

We are subject to a variety of modeling risks, which could have a material adverse impact on our business results.

We rely on complex financial models, such as predictive modeling, a claims fraud model, third party catastrophe models, an enterprise risk management capital model, and modeling tools used by our investment managers, which have been developed internally or by third parties to analyze historical loss costs and pricing, trends in claims severity and frequency, the occurrence of catastrophe losses, investment performance, and portfolio risk. Flaws in these financial models, or faulty assumptions used by these financial models, could lead to increased losses. We believe that statistical models alone do not provide a reliable method of monitoring and controlling market risk. Therefore, such models are tools and do not substitute for the experience or judgment of senior management.

We have significant deferred tax assets that we may be unable to use if we do not generate sufficient future taxable income.

We have a net operating loss as of December 31, 2011 and have sufficient carryback capacity to absorb the net operating loss. We have no capital loss carryforward as of December 31, 2011. In the future, we would be required to establish a valuation allowance against our deferred tax assets if: (i) we do not have net operating loss and/or capital loss carryback capacity; (ii) it is determined that it is more likely than not that sufficient future income of the appropriate character will be generated; and (iii) there are no valid tax planning strategies to generate taxable income of the appropriate character (i.e. ordinary loss or capital loss). The establishment of a valuation allowance would have a material adverse effect on our results of operations, liquidity, financial condition, financial strength, and debt ratings.

Risks Related to Our Corporate Structure and Governance

We are a holding company and our ability to declare dividends to our shareholders, pay indebtedness, and enter into affiliate transactions may be limited because our Insurance Subsidiaries are regulated.

Restrictions on the ability of the Insurance Subsidiaries to pay dividends, make loans or advances to us, or enter into transactions with us may materially affect our ability to pay dividends on our common stock or repay our indebtedness.

Our transactions with our Insurance Subsidiaries and their ability to pay dividends or make loans or advances to us are subject to the approval or review of the insurance regulators in the states where the Insurance Subsidiaries are organized. The standards for review of such transactions are whether: (i) the terms and charges are fair and reasonable; and (ii) after the transaction, the Insurance Subsidiary's surplus for policyholders is reasonable in relation to its outstanding liabilities and financial needs. Although dividends and loans to us from our Insurance Subsidiaries historically have been approved, we can make no assurance that future dividends and loans will be approved.

Because we are an insurance holding company and a New Jersey corporation, potential acquirers may be discouraged and the value of our common stock could be adversely affected.

Because we are an insurance holding company that owns insurance subsidiaries, anyone who seeks to acquire 10% or more of our stock must seek prior approval from the insurance regulators in the states in which the subsidiaries are organized and file extensive information regarding their business operations and finances.

Because we are organized under New Jersey law, provisions in our Amended and Restated Certificate of Incorporation also may discourage, delay, or prevent us from being acquired, including:

- Supermajority voting requirements and fair price to approve business combinations;
- Supermajority voting requirements to amend the foregoing provisions; and
- The ability of the Board to issue "blank check" preferred stock.

Under the New Jersey Shareholders' Protection Act, we may not engage in specified business combinations with a shareholder having indirect or direct beneficial ownership of 10% or more of the voting power of our outstanding stock (an "interested shareholder") for a period of five years after the date the shareholder became an interested shareholder, unless the business combination is approved by our Board before the date they became an interested shareholder. We may not engage in any business combination with any interested shareholder except: (i) a business combination approved by the Board prior to the date they became an interested shareholder; (ii) a business combination approved by two-thirds of our shareholders (other than the interested shareholder); or (iii) a business combination that satisfies certain price criteria.

These provisions of our Amended and Restated Certificate of Incorporation and New Jersey law could have the effect of depriving our stockholders of an opportunity to receive a premium over our common stock's prevailing market price in the event of a hostile takeover and may adversely affect the value of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our main office is located in Branchville, New Jersey on a site owned by a subsidiary with approximately 114 acres and 315,000 square feet of operational space. We lease all of our other facilities. The principal office locations related to our Insurance Operations segment is described in the “Field and Technology Strategies Supporting Independent Agent Distribution” section of Item 1. “Business.” of this Form 10-K. We believe our facilities provide adequate space for our present needs and that additional space, if needed, would be available on reasonable terms.

Item 3. Legal Proceedings.

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our Insurance Subsidiaries as either: (a) liability insurers defending or providing indemnity for third-party claims brought against insureds; or (b) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss adjustment expense reserves. We expect that the ultimate liability, if any, with respect to such ordinary course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to our consolidated financial condition, results of operations, or cash flows.

Our Insurance Subsidiaries are also from time-to-time involved in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Our Insurance Subsidiaries are also involved from time-to-time in individual actions in which extra-contractual damages, punitive damages, or penalties are sought, such as claims alleging bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to our consolidated financial condition. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, an adverse outcome in certain matters could, from time-to-time, have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

PART II**Item 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.****(a) Market Information**

Our common stock is traded on the NASDAQ Global Select Market under the symbol "SIGI." The following table sets forth the high and low sales prices, as reported on the NASDAQ Global Select Market, for our common stock for each full quarterly period within the two most recent fiscal years:

	2011		2010	
	High	Low	High	Low
First quarter	\$18.97	16.30	17.04	15.01
Second quarter	18.06	15.32	17.28	14.17
Third quarter	16.96	12.60	16.63	14.13
Fourth quarter	18.35	12.10	18.94	15.97

On February 17, 2012, the closing price of our common stock as reported on the NASDAQ Global Select Market was \$18.04.

(b) Holders

As of February 15, 2012, there were approximately 2,322 holders of record of our common stock, including beneficial holders whose securities were held in the name of the registered clearing agency or its nominee.

(c) Dividends

Dividends on shares of our common stock are declared and paid at the discretion of the Board based on our operations results, financial condition, capital requirements, contractual restrictions, and other relevant factors. The following table provides information on the dividends declared for each quarterly period within our two most recent fiscal years:

Dividend Per Share	2011	2010
First quarter	\$0.13	0.13

Second quarter	0.13	0.13
Third quarter	0.13	0.13
Fourth quarter	0.13	0.13

Our ability to declare dividends was restricted by covenants contained in our 8.87% senior notes that we issued on May 4, 2000 and that matured on May 4, 2010. All such covenants were met during 2010.

Our ability to receive dividends, loans, or advances from our Insurance Subsidiaries is subject to the approval or review of the insurance regulators in the respective domiciliary states of our Insurance Subsidiaries. Such approval and review is made under the respective domiciliary states' insurance holding company acts, which generally require that any transaction between related companies be fair and equitable to the insurance company and its policyholders. Although our dividends have historically been met with regulatory approval, there is no assurance that future dividends will be approved given current market conditions. We currently expect to continue to pay quarterly cash dividends on shares of our common stock in the future.

(d) Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information about our common stock authorized for issuance under equity compensation plans as of December 31, 2011:

Plan Category	(a)	(b)	(c)	
	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	
Equity compensation plans approved by security holders	1,239,687	\$ 18.77	7,807,647	1

Includes 1,122,962 shares available for issuance under the Employee Stock Purchase Plan; 2,274,131 shares available for issuance under the Stock Purchase Plan for Independent Insurance Agencies; and 4,410,554 shares available for issuance under the Selective Insurance Group, Inc. 2005 Omnibus Stock Plan As Amended and Restated Effective as of May 1, 2010 (“Stock Plan”). Future grants under the Stock Plan can be made, among other things, as stock options, restricted stock units, or restricted stock.

(e) Performance Graph

The following chart, produced by Research Data Group, Inc., depicts our performance for the period beginning December 31, 2006 and ending December 31, 2011, as measured by total stockholder return on our common stock compared with the total return of the NASDAQ Composite Index and a select group of peer companies comprised of NASDAQ-listed companies in SIC Code 6330-6339, Fire, Marine, and Casualty Insurance.

This performance graph is not incorporated into any other filing we have made with the SEC and will not be incorporated into any future filing we may make with the SEC unless we so specifically incorporate it by reference. This performance graph also shall not be deemed to be “soliciting material” or to be “filed” with the SEC unless we specifically request so or specifically incorporate it by reference in any filing we make with the SEC.

(f) Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table provides information regarding our purchases of our common stock in the fourth quarter of 2011:

Period	Total Number of Shares Purchased ¹	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Maximum Number of Shares that May Yet Be Purchased Under the Announced Programs
October 1 – 31, 2011	8,283	\$ 16.33	-	-
November 1 – 30, 2011	6	18.18	-	-
December 1 – 31, 2011	4,041	16.84	-	-
Total	12,330	\$ 16.50	-	-

¹During the fourth quarter of 2011, 6 shares were purchased from employees in connection with the vesting of restricted stock units and 12,324 shares were purchased from employees in connection with stock option exercises. These repurchases were made to satisfy tax withholding obligations and/or option costs with respect to those employees. These shares were not purchased as part of the publicly announced program. The shares that were purchased in connection with the vesting of restricted stock units were purchased at fair market value as defined in the Stock Plan. The shares purchased in connection with the option exercises were purchased at the current market prices of our common stock on the dates the options were exercised.

Item 6. Selected Financial Data.

Five-Year Financial Highlights

¹In 2009, we sold our Selective HR Solutions operations. See Note 12. “Discontinued Operations” in Item 8. “Financial Statements and

Supplementary Data.” of this Form 10-K for additional information.

²Operating income and operating return on average equity are non-GAAP measures. See the Glossary of Terms attached to this Form 10-K as Exhibit 99.1 for definitions of these items and see the “Financial Highlights” section in Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” of this Form 10-K for a reconciliation of operating income to net income.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Forward-looking Statements

Certain statements in this report, including information incorporated by reference, are “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995 (“PSLRA”). The PSLRA provides a safe harbor under the Securities Act of 1933 and the Exchange Act for forward-looking statements. These statements relate to our intentions, beliefs, projections, estimations or forecasts of future events or future financial performance and involve known and unknown risks, uncertainties and other factors that may cause us or the industry’s actual results, levels of activity, or performance to be materially different from those expressed or implied by the forward-looking statements. In some cases, forward-looking statements may be identified by use of the words such as “may,” “will,” “could,” “would,” “should,” “expect,” “plan,” “anticipate,” “target,” “project,” “intend,” “believe,” “estimate,” “predict,” “potential,” “likely,” or “continue” or other comparable terminology. These statements are only predictions, and we can give no assurance that such expectations will prove to be correct. We undertake no obligation, other than as may be required under the federal securities laws, to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Factors that could cause our actual results to differ materially from those we have projected, forecasted or estimated in forward-looking statements are discussed in further detail in Item 1A. “Risk Factors.” of this Form 10-K. These risk factors may not be exhaustive. We operate in a continually changing business environment, and new risk factors emerge from time-to-time. We can neither predict such new risk factors nor can we assess the impact, if any, of such new risk factors on our businesses or the extent to which any factor or combination of factors may cause actual results to differ materially from those expressed or implied in any forward-looking statements in this report. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this report might not occur.

Introduction

We classify our business into two operating segments:

- Insurance Operations, which sells property and casualty insurance products and services; and
- Investments, which invests the premiums collected by our insurance operations.

Our Insurance Operations offers standard market insurance products and services through seven insurance subsidiaries and, in 2011, we began offering excess and surplus lines (“E&S”) insurance products as the result of the following acquisition activity:

The purchase of the renewal rights to an E&S book of business in August 2011. This renewal book had gross annual premiums of approximately \$77 million in 2010.

The purchase of Montpelier U.S. Insurance Company (“MUSIC”) in December 2011. MUSIC had gross annual premiums of approximately \$48 million in 2010.

- Our eight insurance subsidiaries are collectively referred to as the “Insurance Subsidiaries”.

For additional information regarding our recent acquisitions, refer to Note 13. “Business Combinations” in Item 8. “Financial Statements and Supplementary Data.” of the Form 10-K.

The purpose of the Management’s Discussion and Analysis (“MD&A”) is to provide an understanding of the consolidated results of operations and financial condition and known trends and uncertainties that may have a material impact in future periods.

In the MD&A, we will discuss and analyze the following:

Critical Accounting Policies and Estimates;
Financial Highlights of Results for Years Ended December 31, 2011, 2010, and 2009;
Results of Operations and Related Information by Segment;
Federal Income Taxes;
Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources;
Off-Balance Sheet Arrangements;
Contractual Obligations, Contingent Liabilities, and Commitments;
Ratings; and
Pending Accounting Pronouncements.

Critical Accounting Policies and Estimates

We have identified the policies and estimates described below as critical to our business operations and the understanding of the results of our operations. Our preparation of the Consolidated Financial Statements requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our Consolidated Financial Statements, and the reported amounts of revenue and expenses during the reporting period. There can be no assurance that actual results will not differ from those estimates. Those estimates that were most critical to the preparation of the consolidated financial statements involved the following: (i) reserves for losses and loss expenses; (ii) deferred policy acquisition costs; (iii) premium audit; (iv) pension and post-retirement benefit plan actuarial assumptions; (v) OTTI; and (vi) reinsurance.

Reserves for Losses and Loss Expenses

Significant periods of time can elapse between the occurrence of an insured loss, the reporting of the loss to the insurer, and the insurer's payment of that loss. To recognize liabilities for unpaid losses and loss expenses, insurers establish reserves as balance sheet liabilities representing an estimate of amounts needed to pay reported and unreported net losses and loss expenses. As of December 31, 2011, we had accrued \$3.1 billion of gross loss and loss expense reserves compared to \$2.8 billion at December 31, 2010.

How reserves are established

When a claim is reported to an insurance subsidiary, claims personnel establish a "case reserve" for the estimated amount of the ultimate payment. The amount of the reserve is primarily based upon a case-by-case evaluation of the type of claim involved, the circumstances surrounding each claim, and the policy provisions relating to the type of losses. The estimate reflects the informed judgment of such personnel based on their knowledge, experience, and general insurance reserving practices. Until the claim is resolved, these estimates are revised as deemed appropriate by the responsible claims personnel based on subsequent developments and periodic reviews of the case.

In addition to case reserves, we maintain estimates of reserves for losses and loss expenses that have been incurred but not reported to us (referred to as “IBNR”). Using generally accepted actuarial reserving techniques, we project our estimate of ultimate losses and loss expenses at each reporting date. The difference between: (i) the projected ultimate loss and loss expense reserves; and (ii) the case loss reserves and the loss expenses reserved thereon is carried as the IBNR reserve. The actuarial techniques used are part of a comprehensive reserving process that includes two primary components. The first component is a detailed quarterly reserve analysis performed by our internal actuarial staff. In completing this analysis, the actuaries are required to make numerous assumptions including, for example, the selection of loss development factors and the weight to be applied to each individual actuarial indication. These indications include paid and incurred versions for the following actuarial methodologies: loss development, Bornhuetter-Ferguson, Berquist-Sherman, and frequency/severity modeling. Additionally, the actuaries must gather substantially similar data in sufficient volume to ensure the statistical credibility of the data. The second component of the analysis is the projection of the expected ultimate loss ratio for each line of business for the current accident year. This projection is part of our planning process wherein we review and update expected loss ratios each quarter. This review includes actual versus expected pricing changes, loss trend assumptions, and updated prior period loss ratios from the most recent quarterly reserve analysis.

In addition to the most recent loss trends, a range of possible IBNR reserves is determined annually and continually considered, among other factors, in establishing IBNR for each reporting period. Loss trends include, but are not limited to, large loss activity, environmental claim activity, large case reserve additions or reductions for prior accident years, and reinsurance recoverable issues. We also consider factors such as: (i) per claim information; (ii) company and industry historical loss experience; (iii) legislative enactments, judicial decisions, legal developments in the imposition of damages, and changes in political attitudes; and (iv) trends in general economic conditions, including the effects of inflation. Based on the consideration of the range of possible IBNR reserves, recent loss trends, uncertainty associated with actuarial assumptions and other factors, IBNR is established and the ultimate net liability for losses and loss expenses is determined. Such an assessment requires considerable judgment given that it is frequently not possible to determine whether a change in the data is an anomaly until some time after the event. Even if a change is determined to be permanent, it is not always possible to reliably determine the extent of the change until some time later. There is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves because the eventual deficiency or redundancy is affected by many factors. The changes in these estimates, resulting from the continuous review process and the differences between estimates and ultimate payments, are reflected in the Consolidated Statements of Income for the period in which such estimates are changed. Any changes in the liability estimate may be material to the results of operations in future periods.

Major trends by line of business creating additional loss and loss expense reserve uncertainty

The Insurance Subsidiaries are multi-state, multi-line property and casualty insurance companies and, as such, are subject to reserve uncertainty stemming from a variety of sources. These uncertainties are considered at each step in the process of establishing loss and loss expense reserves. However, as market conditions change, certain trends are identified that management believes create an additional amount of uncertainty. A discussion of recent trends, by line of business, that have been recognized by management follows.

Standard Market General Liability Line of Business

At December 31, 2011, our general liability line of business had recorded reserves, net of reinsurance, of \$974 million, which represented 38% of our total net reserves. This line of business experienced favorable prior accident year loss development in 2009 through 2011. In 2011, this was driven by favorable development on the premises and operations coverages for accident years 2009 and prior. The favorable premises development was largely offset by increases for the products coverage in 2010 and prior. The broad nature of this line of business, and the longer tailed nature of the claims settlement process, makes it more susceptible to changes in litigation and the tort environment. This line of business also includes excess policies that provide additional limits above underlying automobile and general liability coverages, which is subject to catastrophic losses, and therefore influenced by the factors noted above to a greater degree.

Standard Market Workers Compensation Line of Business

At December 31, 2011, our workers compensation line of business recorded reserves, net of reinsurance, of \$898 million, or 35% of our total net reserves. In 2010 and 2011, this line experienced unfavorable loss development. In 2011 this was driven by increases in the 2010 accident year, partially offset by various earlier accident years. In

addition to the uncertainties associated with actuarial assumptions and methodologies described above, the workers compensation line of business can be impacted by a variety of issues, such as unexpected changes in medical cost inflation, higher than anticipated claim severity, changes in overall economic conditions, and company specific initiatives. Variability in our historical workers compensation medical costs, along with uncertainty regarding future medical inflation, creates the potential for additional volatility in our reserves.

During the past several years, overall economic conditions were extremely unstable. High levels of unemployment could impact both the severity and frequency of our workers compensation claims. There is also potential for an increase in severity if the longevity of workers compensation claims increase. Injured workers could have less incentive to return to work when their company is in financial distress or injured workers could be laid off while on workers compensation. Conversely, there is potential for a decrease in frequency if workers are reluctant to file claims or have less work and less exposure to injury.

Additionally, the economy could impact the frequency and severity of claims in ways unanticipated by management. In 2010, we experienced an unusually high amount of audit and endorsement activity, resulting in return premium of \$20.5 million, while in 2011, audit and endorsement activity resulted in additional premiums of \$11.2 million. Some volatility in premium activity may continue into the future and, since premiums earned are used as a basis for setting initial reserves on the current accident year, our reserves could be impacted. The result could be favorable development if the reduction in payroll resulting in return premium is truly a reduction in exposure. The result could be adverse development if the reduction in payroll resulting in return premium indicates that remaining workers are now overworked and more prone to accidents.

Finally, in the past few years, the company implemented a multi-faceted workers compensation strategy that incorporated knowledge management, predictive modeling, and a new claims handling model. While the expectation is that these initiatives will bring benefits, they are also a potential source of uncertainty in the future. If the ongoing impact of these strategies exceeds our expectations, the result could be favorable development in the future. If our internal strategies are less effective than anticipated, and we experience higher than expected claim severity, the result could be adverse development in the future.

Standard Market Commercial Automobile Line of Business

At December 31, 2011, our commercial automobile line of business had recorded reserves, net of reinsurance, of \$346 million, which represented 13% of our total net reserves. This line of business experienced favorable prior year loss development from 2005 through 2011. In 2011 this development was driven by accident years 2007 through 2009, which represents a continued trend driven by lower frequencies in these years. While management has not identified any new specific emerging trends related to this line, the variability of frequencies creates additional uncertainty in our analysis for the more recent accident years.

Claims Initiative and Inflation Impact on Standard Market Workers Compensation, General Liability and Commercial Automobile Lines of Business

In addition to the line of business specific issues mentioned above, these lines of business have been impacted by a number of initiatives undertaken by our claims department that have resulted in volatility in the average level of case reserves. This change in the average level of case reserves increases the uncertainty in the short run, but the longer-term benefit is a more refined management of the claims process. Additionally, although inflationary volatility is expected to be low in the near term, current United States' monetary policy and global economic conditions bring additional uncertainty in the long-term given the long-tail nature of these lines of business. Uncertainty regarding future inflation or deflation creates the potential for additional volatility in our reserves for these lines of business.

Standard Market Personal Automobile Line of Business

At December 31, 2011, our personal automobile line of business had recorded reserves, net of reinsurance, of \$134 million, which represented 5% of our total net reserves. The majority of the reserves are from business written in New

Jersey. Over the past several years we have been decreasing the amount of business written in New Jersey while increasing the amount of business written in other states. We review the reserves for states other than New Jersey on a combined basis so that there is a sufficient volume of data to ensure statistical credibility. However, the state mix of business changes over time, which may increase the uncertainty surrounding our personal automobile reserves.

Other Lines of Business

At December 31, 2011, no other individual line of business had recorded reserves of more than \$90 million, net of reinsurance. We have not identified any recent trends that would create additional significant reserve uncertainty for these other lines of business.

The following tables provide case and IBNR reserves for losses and loss expense, and reinsurance recoverable on unpaid losses and loss expenses as of December 31, 2011 and 2010:

As of December 31, 2011	Loss and Loss Expense Reserves			Reinsurance Recoverable on Unpaid Losses and Loss Expenses	Net Reserves

Range of reasonable reserves

We established a range of reasonably possible reserves for net claims of approximately \$2,395 million to \$2,716 million at December 31, 2011, and \$2,356 million to \$2,665 million at December 31, 2010. A low and high reasonable reserve selection was derived primarily by considering the range of indications calculated using generally accepted actuarial techniques. Such techniques assume that past experience, adjusted for the effects of current developments and anticipated trends, are an appropriate basis for predicting future events. Although this range reflects likely scenarios, it is possible that the final outcomes may fall above or below these amounts. Based on internal stochastic modeling, we believe that a reasonable estimate of the likelihood that the final outcome falls within the current range is approximately 75%. This range does not include a provision for potential increases or decreases associated with environmental reserves. Our best estimate is consistent with the actuarial central estimate. We do not discount to present value that portion of our loss reserves expected to be paid in future periods; however, the loss reserves take into account anticipated recoveries for salvage and subrogation claims.

Sensitivity Analysis: Potential impact on reserve volatility due to changes in key assumptions

Our process to establish reserves includes a variety of key assumptions, including, but not limited to, the following:

- The selection of loss development factors;
- The weight to be applied to each individual actuarial indication;
- Projected future loss trends; and
- Expected ultimate loss ratios for the current accident year.

The importance of any single assumption depends on several considerations, such as the line of business and the accident year. If the actual experience emerges differently than the assumptions used in the process to establish reserves, changes in our reserve estimate are possible and may be material to the results of operations in future periods. Set forth below is a discussion of the potential impact of using certain key assumptions that differ from those used in our latest reserve analysis. It is important to note that the following discussion considers each assumption individually, without any consideration of correlation between lines of business and accident years, and therefore, does not constitute an actuarial range. While the following discussion represents possible volatility from variations in key assumptions as identified by management, there is no assurance that the future emergence of our loss experience will be consistent with either our current or alternative set of assumptions. By the very nature of the insurance business, loss development patterns have a certain amount of normal volatility.

Standard Market General Liability Line of Business

In addition to the normal amount of volatility, general liability loss development factors have greater uncertainty due to the complexity of the coverages and the possibly significant periods of time that can elapse between the occurrence of an insured loss, the reporting of the loss to the insurer, and the insurer's payment of that loss. In our judgment, it is possible that general liability loss development factors could be +/- 5% from those actually selected in our latest reserve analysis. If the loss development assumptions were changed by +/- 5%, that would increase/decrease our indicated general liability reserves by approximately \$93 million for accident years 2010 and prior.

Standard Market Workers Compensation Line of Business

In addition to the normal amount of volatility, the combination of the sensitivity of workers compensation results to medical inflation, economic conditions including unemployment, and changes in underwriting could lead to actual experience emerging differently than the assumptions used in the process to establish reserves. In our judgment, it is possible that actual medical loss development factors could range from 6% below to 9% above those selected in our latest reserve analysis and expected loss ratios could range from 5% below to 8% above those selected in our latest reserve analysis. The combination of reducing the assumptions for medical loss development by 6% and the expected loss ratio by 5% could decrease our indicated workers compensation reserves by approximately \$73 million for accident years 2010 and prior. Alternatively, the combination of increasing the medical loss development factors by 9% and the expected loss ratio by 8% could increase our indicated workers compensation reserves by approximately \$114 million for accident years 2010 and prior.

Standard Market Commercial Automobile Line of Business

In addition to the normal amount of volatility, our commercial automobile line of business has realized significant favorable development in 2005 through 2011. In 2011, this development was driven by accident years 2007 through 2009, which represents a continued trend driven by lower frequencies in these years. The actual number of large claims has a high degree of volatility from year to year in terms of timing and ultimate final emergence. Even if large losses are ultimately consistent from year to year, if they are identified at different times than previous years, traditional loss development factors may overstate or understate actuarial indications. If the timing of large losses is significantly variable, it is our judgment that actual loss development factors could be +/- 5% different from those selected in our reserve review, which would increase/decrease our indicated commercial auto reserves by approximately \$57 million for accident years 2010 and prior.

Claims Initiatives and Inflation Impact on Standard Market Workers Compensation, General Liability, and Commercial Automobile Lines of Business

As discussed in the major trend section above, the claims initiatives and inflationary uncertainty could impact reserves for the workers compensation, general liability, and commercial automobile lines of business. In our judgment, it is possible that the selected reserves for these lines of business in our latest reserve review could increase by \$128 million or decrease by \$118 million due to the combination of case reserve volatility in accident years 2009 through 2011 due to claims initiatives and unexpected inflation or deflation. These potential impacts would likely manifest themselves as changes in development patterns and expected loss ratios as described within the discussions of the separate lines of business. Therefore, these impacts may be embedded within the line of business figures, in whole or in part.

Standard Market Personal Automobile Line of Business

In addition to a normal amount of volatility, the uncertainty of personal automobile loss development factors is greater than usual due to the change in our state mix for business written outside of New Jersey. In our judgment, it is possible that personal auto bodily injury loss development factors could be +/- 4% different from those selected in our reserve review. This would increase/decrease our indicated personal auto reserves by approximately \$33 million for accident years 2010 and prior.

Current Accident Year

For the 2011 accident year, the expected ultimate loss ratio by line of business is a key assumption. This assumption is based on a large number of inputs that are assessed periodically, such as historical loss ratios, projected future loss trend, and planned pricing amounts. In our judgment, it is possible that the actual ultimate loss ratio for the 2011 accident year could be +/-7 loss ratio points from the one selected in our latest reserve analysis for the combination of our four major long-tailed lines of business. The table below summarizes the possible impact on our reserves of varying our expected loss ratio assumption by +/-7 points by line of business for the 2011 accident year.

Reserve Impact of Changing Current Year Expected Ultimate Loss Ratio Assumption		
(\$ in millions)	If Assumption was Reduced by 7 Points	If Assumption was Raised by 7 Points
Workers compensation	(18)	18
General liability	(24)	24
Commercial automobile liability	(15)	15
Personal automobile liability	(7)	7
Combined	(64)	64

Prior year reserve development

In light of the many uncertainties associated with establishing the estimates and making the assumptions necessary to establish reserve levels, we review our reserve estimates on a regular basis as described above and make adjustments in the period that the need for such adjustment is determined. These reviews could result in the identification of information and trends that would require us to increase some reserves and/or decrease other reserves for prior periods and could also lead to additional increases in loss and loss adjustment expense reserves, which could have a material adverse effect on our results of operations, equity, insurer financial strength, and debt ratings. In 2011, we experienced overall favorable loss development of approximately \$39 million. This was driven by favorable loss development of \$60 million in the 2006, 2008, and 2009 accident years, partially offset by unfavorable development in accident year 2010 of approximately \$24 million.

In 2010, we experienced overall favorable loss development of approximately \$44 million. This was driven by favorable emergence in accident years 2007 and prior of approximately \$69 million, partially offset by unfavorable emergence in accident years 2008 and 2009 of approximately \$24 million.

In 2009, we experienced favorable loss development of approximately \$67 million in accident years 2004 through 2007, partially offset by unfavorable loss development in the 2008 accident year, as well as accident years prior to 2003, of approximately \$38 million, netting to favorable prior year development of \$29 million. For further discussion on the prior year development in loss and loss expense reserves, see the discussion on “Net Loss and Loss Expense Reserves” in Item 1. “Business” and Item 8. “Financial Statements and Supplementary Data,” Note 9 of this Form 10-K.

Asbestos and Environmental Reserves

Included in our loss and loss expense reserves are amounts for environmental claims, both asbestos and non-asbestos. Carried net loss and loss expense reserves for environmental claims were \$38.4 million as of December 31, 2011 and \$39.4 million as of December 31, 2010. Our asbestos and non-asbestos environmental claims have arisen primarily from insured exposures in municipal government, small commercial risks, and homeowners policies. The emergence of these claims is slow and highly unpredictable. In past years, we also experienced adverse development in our homeowners line of business as a result of unfavorable trends in claims for groundwater contamination caused by leakage of certain underground heating oil storage tanks in New Jersey. In addition, certain landfill sites are included on the National Priorities List (“NPL”) by the United States Environmental Protection Agency (“USEPA”). Once on the NPL, the USEPA determines an appropriate remediation plan for these sites. A landfill can remain on the NPL for many years until final approval for the removal of the site is granted from the USEPA. The USEPA also has the authority to re-open previously closed sites and return them to the NPL. We currently have reserves for 13 insureds related to five sites on the NPL, one of which was reopened in 2009 related to a natural resources claim.

IBNR reserve estimation for environmental claims is often difficult because, in addition to other factors, there are significant uncertainties associated with critical assumptions in the estimation process, such as average clean-up costs, third-party costs, potentially responsible party shares, allocation of damages, insurer litigation costs, insurer coverage defenses, and potential changes to state and federal statutes.

Moreover, normal historically-based actuarial approaches are difficult to apply because relevant history is not available. While models can be applied, such models can produce significantly different results with small changes in assumptions. As a result, we do not calculate a specific environmental loss range, as we believe it would not be meaningful.

Deferred Policy Acquisition Costs

Policy acquisition costs, which include commissions, premium taxes, fees, and certain other costs of underwriting policies, are deferred and amortized over the same period in which the related premiums are earned. Deferred policy acquisition costs are limited to the estimated amounts recoverable after providing for losses and loss expenses that are expected to be incurred, based upon historical and current experience. Anticipated investment income is considered in determining whether a premium deficiency exists. The methods of making such estimates and establishing the deferred costs are continually reviewed, and any adjustments are made in the accounting period in which the adjustment arose.

We regularly conduct reviews for potential premium deficiencies at a level consistent with that used for our segment reporting in that we group our policies at the Insurance Operations level, considering the following:

Our marketing efforts for all of our product lines within our Insurance Operations revolve around independent agencies and their touch points with our shared customers, the policyholders.

We service our agency distribution channel through our field model, which includes AMSs, safety management specialists, CMSs, and our Underwriting and Claims Service Centers, all of which service the entire population of insurance contracts acquired through each agency.

We measure the profitability of our business at the Insurance Operations level, which is evident in, among other items, the structure of our incentive compensation programs. We measure the profitability of our agents and calculate their compensation based on overall insurance results and all of our employees, including senior management, are incented based on overall insurance results.

We had deferred policy acquisition costs of \$214.1 million at December 31, 2011 compared to \$209.6 million at December 31, 2010. In October 2010, the Financial Accounting Standards Board issued accounting guidance regarding accounting for costs associated with acquiring or renewing insurance contracts effective January 1, 2012, which will result in a pre-tax impact on our deferred policy acquisition balance of \$78.3 million. For further discussion regarding the impact of this new accounting guidance, see the “Pending Accounting Pronouncements” section below.

Premium Audit

We estimate the amount of premium that is anticipated to be either billed or returned on policies subsequent to expiration based on exposure levels (i.e., payroll or sales). This estimate of premiums that are earned but unbilled is based on historical trends adjusted for the uncertainty of future economic conditions. During 2011, 2010 and 2009, we had return audit premiums paid of \$6.6 million, \$31.1 million, and \$27.7 million, respectively. Given the persistent uncertainty of the U.S. economy and the volatility in return premium over the last several years, we estimate our accrual for return audit premium on 2011 policies to be approximately \$5 million. However, further economic instability could ultimately impact our estimates and assumptions, and consequently, changes in the liability estimate may be material to the results of operations in future periods.

Pension and Post-retirement Benefit Plan Actuarial Assumptions

Our pension and post-retirement life benefit obligations and related costs are calculated using actuarial methods, within the framework of U.S. GAAP. Two key assumptions, the discount rate and the expected return on plan assets, are important elements of expense and/or liability measurement. We evaluate these key assumptions annually. Other assumptions involve demographic factors such as retirement age, mortality, turnover, and rate of compensation increases.

The discount rate enables us to state expected future cash flows at their present value on the measurement date. The purpose of the discount rate is to determine the interest rates inherent in the price at which pension benefits could be effectively settled. Our discount rate selection is based on high-quality, long-term corporate bonds. A lower discount rate increases the present value of benefit obligations and increases pension expense. We decreased our discount rate to 5.16% for 2011, from 5.55% for 2010 reflecting ongoing pressure on market interest rates. To determine the expected long-term rate of return on the plan assets, we consider the current and expected asset allocation, as well as historical and expected returns on each plan asset class. A lower expected rate of return on pension plan assets would increase pension expense. Our long-term expected return on plan assets was lowered 25 basis points to 7.75% in 2011 as compared to 8.00% in 2010, reflecting the lower interest rate environment that is anticipated in the near term and our 2011 pension asset total return of 4%. We had a pension and post-retirement benefit plan obligation of \$259.9 million at December 31, 2011 compared to \$236.3 million at December 31, 2010.

As of December 31, 2011, our pension assets were \$182.6 million, up from \$173.3 million at the end of 2010. In 2011, we made \$8.4 million in contributions to our plan assets to further improve the funded status of the pension plan. Volatility in the marketplace, coupled with changes in the discount rate assumption, could materially impact our pension valuation in the future.

For additional information regarding our pension and post-retirement benefit plan obligations, see Item 8. "Financial Statements and Supplementary Data," Note 16(c) of this Form 10-K.

Other-Than-Temporary Investment Impairments

When the fair value of any investment is lower than its cost/amortized cost, an assessment is made to determine if the decline is other than temporary. We regularly review our entire investment portfolio for declines in fair value. If we believe that a decline in the value of an AFS security is temporary, we record the decline as an unrealized loss in AOCI. Temporary declines in the value of an HTM security are not recognized in the financial statements. Our assessment of a decline in fair value includes judgment as to the financial position and future prospects of the entity that issued the investment security, as well as a review of the security's underlying collateral for fixed maturity investments. Broad changes in the overall market or interest rate environment generally will not lead to a write-down.

Fixed Maturity Securities and Short-Term Investments

Our evaluation for OTTI of a fixed maturity security or a short-term investment may include, but is not limited to, the evaluation of the following factors:

- Whether the decline appears to be issuer or industry specific;
- The degree to which the issuer is current or in arrears in making principal and interest payments on the fixed maturity security;
- The issuer's current financial condition and ability to make future scheduled principal and interest payments on a timely basis;
- Evaluation of projected cash flows;

- Buy/hold/sell recommendations published by outside investment advisors and analysts; and
- Relevant rating history, analysis, and guidance provided by rating agencies and analysts.

OTTI charges are recognized as a realized loss to the extent that they are credit related, unless we have the intent to sell the security or it is more-likely-than not that we will be required to sell the security. In those circumstances, the security is written down to fair value with the entire amount of the writedown charged to earnings as a component of realized losses. To determine if an impairment is other than temporary, discounted cash flow analyses (“DCF”) are performed on all fixed maturity securities meeting certain criteria. In addition, DCFs are performed on all previously-impaired debt securities in an unrealized loss position that continue to be held by us and all structured securities that were not of high-credit quality at the date of purchase. These impairment assessments include, but are not limited to, the following security types: commercial mortgage-backed securities (“CMBS”); residential mortgage-backed securities (“RMBS”); asset-backed securities (“ABS”); collateralized debt obligations (“CDOs”); and corporate fixed maturity securities.

For structured securities, including CMBS, RMBS, ABS, and CDOs, we also consider variables such as expected default, severity, and prepayment assumptions based on security type and vintage, taking into consideration information from credit agencies, historical performance, and other relevant economic and performance factors.

In making our assessment, we perform a DCF to determine the present value of future cash flows to be generated by the underlying collateral of the security. Any shortfall in the expected present value of the future cash flows, based on the DCF, from the amortized cost basis of a security is considered a “credit impairment,” with the remaining decline in fair value of a security considered as a “non-credit impairment.” As mentioned above, credit impairments are charged to earnings as a component of realized losses, while non-credit impairments are recorded to OCI as a component of unrealized losses.

Discounted Cash Flow Assumptions

The discount rate we use in the DCF is the effective interest rate implicit in the security at the date of acquisition for those structured securities that were not of high-credit quality at acquisition. For all other securities, we use a discount rate that equals the current yield, excluding the impact of previous OTTI charges, used to accrete the beneficial interest.

If applicable, we use a conditional default rate assumption in the DCF to estimate future defaults. The conditional default rate is the proportion of all loans outstanding in a security at the beginning of a time period that are expected to default during that period. Our assumption of this rate takes into consideration the uncertainty of future defaults as well as whether or not these securities have experienced significant cumulative losses or delinquencies to date.

If applicable, conditional default rate assumptions apply at the total collateral pool level held in the securitization trust. Generally, collateral conditional default rates will “ramp-up” over time as the collateral seasons, because the performance begins to weaken and losses begin to surface. As time passes, depending on the collateral type and vintage, losses will peak and performance will begin to improve as weaker borrowers are removed from the pool through delinquency resolutions. In the later years of a collateral pool’s life, performance is generally materially better as the resulting favorable selection of the portfolio improves the overall quality and performance.

For CMBS, we also consider the net operating income (“NOI”) generated by the underlying properties. Our assumptions of the properties’ ultimate cash flows takes into consideration both an immediate reduction to the reported NOIs and decreases to projected NOIs.

If applicable, we also use a loan loss severity assumption in our DCF that is applied at the loan level of the collateral pool. The loan loss severity assumptions represent the estimated percentage loss on the loan-to-value exposure for a particular security. For CMBS, the loan loss severities applied are based on property type. Losses generated from the evaluations are then applied to the entire underlying deal structure in accordance with the original service agreements.

Equity Securities

Evaluation for OTTI of an equity security, may include, but is not limited to, an evaluation of the following factors:

- Whether the decline appears to be issuer or industry specific;
- The relationship of market prices per share to book value per share at the date of acquisition and date of evaluation;
 - The price-earnings ratio at the time of acquisition and date of evaluation;
 - The financial condition and near-term prospects of the issuer, including any specific events that may influence the issuer's operations, coupled with our intention to hold the securities in the near term;
 - The recent income or loss of the issuer;
 - The independent auditors' report on the issuer's recent financial statements;
 - The dividend policy of the issuer at the date of acquisition and the date of evaluation;
 - Buy/hold/sell recommendations or price projections published by outside investment advisors;
 - Rating agency announcements;
- The length of time and the extent to which the fair value has been, or is expected to be, less than cost in the near term; and
 - Our expectation of when the cost of the security will be recovered.

If there is a decline in the fair value on an equity security that we do not intend to hold, or if we determine the decline is other-than-temporary, including declines driven by market volatility for which we cannot assert will recover in the near term, we will write down the carrying value of the investment and record the charge through earnings as a component of realized losses.

Other Investments

Our evaluation for OTTI of an other investment (i.e., an alternative investment) may include, but is not limited to, conversations with the management of the alternative investment concerning the following:

- The current investment strategy;
- Changes made or future changes to be made to the investment strategy;
- Emerging issues that may affect the success of the strategy; and
- The appropriateness of the valuation methodology used regarding the underlying investments.

If there is a decline in fair value on an other investment that we do not intend to hold, or if we determine the decline is other than temporary, we write down the cost of the investment and record the charge through earnings as a component of realized losses.

Reinsurance

Reinsurance recoverables on paid and unpaid losses and loss expenses represent estimates of the portion of such liabilities that will be recovered from reinsurers. Each reinsurance contract is analyzed to ensure that the transfer of risk exists to properly record the transactions in the financial statements. Amounts recovered from reinsurers are

recognized as assets at the same time and in a manner consistent with the paid and unpaid losses associated with the reinsured policies. An allowance for estimated uncollectible reinsurance is recorded based on an evaluation of balances due from reinsurers and other available information. This allowance totaled \$3.9 million at December 31, 2011 and \$3.4 million at December 31, 2010. We continually monitor developments that may impact recoverability from our reinsurers and have available to us contractually provided remedies if necessary. For further information regarding reinsurance, see the "Reinsurance" section below and Note 8. "Reinsurance" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K.

Financial Highlights of Results for Years Ended December 31, 2011, 2010, and 2009¹

(\$ in thousands, except per share amounts)	2011	2010	2011 vs. 2010	2009	2010 vs. 2009
GAAP measures:					
Revenues	\$ 1,597,475	1,564,621	2 %	1,514,018	3 %
Pre-tax net investment income	147,443	145,708	1	118,471	23
Pre-tax net income	7,065	76,141	(91)	26,253	190
Net income	19,865	65,541	(70)	36,398	80
Diluted net income per share	0.36	1.20	(70)	0.68	76

GAAP combined ratio	107.4 %	101.6	5.8 pts	99.8	1.8 pts
Statutory combined ratio	106.7 %	101.6	5.1	100.5	1.1
Return on average equity	1.8	6.3	(4.5)	3.8	2.5
Non-GAAP measures:					
Operating income	\$ 19,059	73,925	(74)%	74,538	(1)%
Diluted operating income per share	0.34	1.35	(75)	1.39	(3)
Operating return on average equity	1.7 %	7.1	(5.4)pts	7.9	(0.8)pts

¹ Refer to the Glossary of Terms attached to this Form 10-K as Exhibit 99.1 for definitions of terms used in this financial review.

Our 2011 pre-tax net income decreased \$69.1 million compared to 2010, primarily due to an increased level of catastrophe losses this year. In 2011, these losses amounted to \$118.8 million, a historic level for us, which exceeded 2010 by \$62.3 million. We were impacted by more than twenty storms in 2011, the most significant of which was Hurricane Irene which caused us to pierce the first layer of our catastrophe excess of loss treaty with losses of \$40.2 million on a net basis (\$47.1 million on a gross basis), including the reinstatement premium.

Our 2010 pre-tax net income increased \$49.9 million compared to 2009, primarily due to an improvement in net realized losses. These losses were \$7.1 million in 2010, a decrease of \$38.9 million compared to 2009. Elevated losses in 2009 reflected non-cash OTTI charges of \$55.4 million, compared to \$17.7 million in 2010. For details regarding the OTTI charges, see Note 5, "Investments" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K. Also included in the fluctuation from 2010 compared to 2009 is a \$27.2 million increase in investment income driven by our alternative investment portfolio offset by a \$24.6 million increase in underwriting losses driven by higher catastrophe losses partially offset by increased favorable prior year development.

The tax benefit from continuing operations was \$12.5 million in 2011, compared to an expense of \$12.6 million in 2010 and a benefit of \$5.5 million in 2009. These fluctuations were primarily driven by the change in the components of pre-tax net income as discussed above.

The following table reconciles operating income and net income for the periods presented above:

(\$ in thousands, except per share amounts)	2011	2010	2009
Operating income	\$19,059	73,925	74,538
Net realized gains (losses), net of tax	1,456	(4,604)	(29,880)
Loss on discontinued operations, net of tax	(650)	(3,780)	(8,260)
Net income	\$19,865	65,541	36,398
Diluted operating income per share	\$0.34	1.35	1.39
Diluted net realized gains (losses) per share	0.03	(0.08)	(0.56)
Diluted net loss on discontinued operations per share	(0.01)	(0.07)	(0.15)
Diluted net income per share	\$0.36	1.20	0.68

The variances in operating income are reflective of the results discussed above. Refer to Exhibit 99.1 of this Form 10-K for a definition of operating income.

Results of Operations and Related Information by Segment**Insurance Operations**

Our Insurance Operations offers standard market insurance products and services through seven insurance subsidiaries and, in 2011, we began offering excess and surplus lines (“E&S”) insurance products as the result of the following acquisition activity:

- The purchase of the renewal rights to an E&S book of business in August 2011; and
- The purchase of Montpelier U.S. Insurance Company (“MUSIC”) in December 2011.
- Our eight insurance subsidiaries are collectively referred to as the Insurance Subsidiaries.

Our standard market insurance products and services are sold primarily in 22 states in the Eastern and Midwestern U.S. through approximately 1,000 independent insurance agencies. Our recent E&S acquisitions provide us the opportunity to write contract binding authority E&S business in all 50 states and the District of Columbia through approximately 90 wholesale agents across the country.

Our Insurance Operations segment consists of two components: (i) Commercial Lines, which markets primarily to businesses and represents approximately 82% of NPW; and (ii) Personal Lines, which markets primarily to individuals and represents approximately 18% of NPW. The underwriting performance of these lines is generally measured by four different statutory ratios: (i) the loss and loss expense ratio; (ii) the underwriting expense ratio; (iii) the dividend ratio; and (iv) the combined ratio.

Summary of Insurance Operations
All Lines

(\$ in thousands)	2011	2010	2011 vs. 2010	2009	2010 vs. 2009
GAAP Insurance Operations Results:					
NPW	\$1,485,349	1,390,541	7 %	1,422,655	(2)%
NPE	1,439,313	1,416,598	2	1,431,047	(1)
Less:					
Losses and loss expenses incurred	1,074,987	982,118	9	971,905	1
Net underwriting expenses incurred	465,961	452,769	3	453,117	-
Dividends to policyholders	5,284	3,878	36	3,640	7
Underwriting (loss) income	\$(106,919)	(22,167)	(382)%	2,385	(1,029)%
GAAP Ratios:					
Loss and loss expense ratio	74.7 %	69.3	5.4 pts	67.9	1.4 pts
Underwriting expense ratio	32.3	32.0	0.3	31.6	0.4
Dividends to policyholders ratio	0.4	0.3	0.1	0.3	-
Combined ratio	107.4	101.6	5.8	99.8	1.8

Statutory Ratios:

Loss and loss expense ratio	74.6	69.3	5.3	67.9	1.4
Underwriting expense ratio	31.7	32.0	(0.3)	32.3	(0.3)
Dividends to policyholders ratio	0.4	0.3	0.1	0.3	-
Combined ratio	106.7	% 101.6	5.1 pts	100.5	1.1 pts

NPW increased in 2011 compared to 2010 primarily driven by the following: (i) Commercial Lines renewal pure price increases of 2.8% coupled with a one-point increase in retention to 83%; (ii) new E&S premiums of \$24.1 million in association with our renewal rights purchase in August 2011; and (iii) improvements in audit and endorsement premiums. Audit and endorsement activity was driven by economic conditions over the past three years as evidenced below:

(\$ in millions)

For the Year Ended	Audit and Endorsement Additional (Return) Premium	
December 31,		
2011	\$ 14.8	
2010	(47.4)
2009	(62.0)

The decrease in NPW in 2010 compared to 2009 was driven by audit and endorsement activity as shown in the table above, coupled with a reduction in new business of \$48.2 million, to \$272.8 billion.

NPE increases over the three-year period are consistent with the fluctuation in NPW.

The increase in the GAAP loss and loss expense ratio of 5.4 points in 2011 compared to 2010 was primarily attributable to higher property losses of \$81.7 million, which included increased catastrophe losses of \$62.3 million, or 4.3 points, to \$118.8 million in 2011. In addition, favorable prior year casualty development was \$30 million, or 2.1 points, in 2011 compared to \$39 million, or 2.8 points, in 2010. For more information on the favorable prior year development on our casualty lines of business, see the "Review of Underwriting Results by Lines of Business" below.

The increase in the GAAP loss and loss expense ratio of 1.4 points in 2010 compared to 2009 was primarily attributable to an increase in property losses of \$50.3 million, which included increased catastrophe losses of \$47.9 million, or 3.4 points, to \$56.5 million in 2010. Partially offsetting this increase was: (i) favorable casualty prior year development of approximately \$39 million, or 2.8 points, in 2010, compared to approximately \$29 million, or 2.0 points, in 2009; and (ii) a reduction of loss costs due to a change in the mix of our casualty lines of business.

The increase in the GAAP underwriting expense ratio of 0.3 points in 2011 compared to last year was driven by expenses associated with our purchase of the E&S renewal book of business in 2011. The majority of those expenses are directly related to the acquisition, and will not impact the on-going results of this operation. However, as MUSIC unearned premiums as of the acquisition date were fully ceded, our underwriting expense ratio will be under pressure going forward until such time premiums that we write subsequent to the purchase are earned to support the expenses of these operations.

The increase in the GAAP underwriting expense ratio of 0.4 points in 2010 was primarily due to declines in earned premium coupled with benefits recognized in 2009 related to the elimination of retiree life insurance benefits for current employees amounting to a total benefit of \$4.2 million, pre-tax.

Insurance Operations Outlook

Several record breaking tornado outbreaks during the spring of 2011 marked the beginning of one the most costly catastrophe loss year for the property and casualty insurance industry since 2005 when three hurricanes made a direct landfall in the United States. Hurricane Irene was the first hurricane to hit the United States coastline since 2008 and the first to strike the New York City area since Hurricane Gloria in 1985. A.M. Best estimates that catastrophe losses in the United States were approximately \$44 billion, more than double the amount in 2010. As a result, A.M. Best is projecting an industry combined ratio of 107.5% in 2011, which includes more than 10 points of catastrophe losses. Consistent with the trend noted by A.M. Best as a driver of industry-wide results, our Insurance Operations segment incurred the worst catastrophe year in the existence of our company with losses of \$118.8 million, or 8.3 points on our

combined ratio of 106.7%. As shown in the table below, catastrophe losses, by their nature, are volatile. In 2011 and 2010, we incurred elevated levels of catastrophe losses, and, conversely, 2009 was the period of lowest catastrophe losses during the last five years.

(\$ in thousands)

For the Year Ended December 31,	Catastrophe Losses Incurred	Impact on Loss Ratio	
2011	\$ 118,769	8.3	pts
2010	56,465	4.0	
2009	8,519	0.6	
2008	31,740	2.1	
2007	14,899	1.0	

As a result of the unprecedented catastrophe losses, the industry has begun experiencing a modest level of commercial lines renewal price increases, particularly in the fourth quarter of 2011, according to the Commercial Lines Insurance Pricing Survey. As reflected by A.M. Best's February 2012 affirmation to maintain its negative outlook for the commercial lines industry, we believe these modest increases in rate are not sufficient, and a widespread hardening needs to materialize given: (i) the instability of the U.S. economy and the current low interest rate environment that has continued to put pressure on investment yields; (ii) an industry statutory combined ratio for 2011 of 107.5% as reported by A.M. Best; (iii) higher anticipated reinsurance costs (see the "Reinsurance" section below for more detail); and (iv) declining industry profitability as a result of elevated levels of catastrophe-related losses.

While industry pricing has just begun to improve, we are on our eleventh consecutive quarter of Commercial Lines renewal pure price increases, with 3.4% in the fourth quarter of 2011 and 2.8% for 2011. The price increases that we have obtained demonstrate the overall strength of the relationships that we have with our independent agents, even in difficult economic and competitive times. We believe that once the market as a whole becomes more successful at driving price, we will be able to further capitalize on our relationships with our agents to generate additional renewal price increases through the use of our granular pricing capabilities. The price increases we have been able to obtain, coupled with strong retention, have led to year-over-year NPW growth in our Commercial Lines for the first time since 2007 and an increase of 7% in 2011. We also expanded our underwriting appetite with new products in para-transit, technology, and communities of faith. Our recent acquisition of MUSIC broadens our E&S footprint to all 50 states and the District of Columbia, giving us a higher-margin product and the capability to drive NPW growth in the future. The MUSIC acquisition, coupled with our renewal rights purchase in August 2011, provides the potential for annual E&S premium volume of \$120 million through 90 wholesale general agents as well as potential access to the \$300 to \$400 million of contract binding authority E&S business our independent retail agents currently write annually for our competitors. In 2011, we also invested in the consumer agent portal, along with the Independent Insurance Agents and Brokers of America and several other insurance companies, which will provide independent agents a more robust online presence on the Internet.

A.M. Best is maintaining a stable outlook for the personal lines industry, which implies their rating actions are expected to be widely affirmed with a fairly balanced distribution of negative and positive rating actions. The personal lines market has been more receptive to price increases, and our Personal Lines operations continue to experience NPW growth driven by ongoing rate increases that went into effect in 2010 and 2011. Rate increases that we were able to achieve in 2011 are expected to generate an additional \$18.0 million in annual premium. In addition, we were able to generate Personal Lines renewal pure price increases of 6.2% in 2011, while retention increased one point to 86%. While underlying results show improvement in this line during the fourth quarter of 2011, they are still not where they need to be. The extreme volatility associated with the homeowners line due to continued weather related property losses led to \$37.6 million, or 36.6 points, of catastrophe losses in 2011. We will continue to focus on driving rate and mix of business changes across our Personal Lines book to improve profitability.

We are expecting to generate a 2012 full year statutory combined ratio of 101.5% and a GAAP combined ratio of 102.5%, which includes a catastrophe loss assumption of 2.5 points. Combined ratios do not include any assumptions for reserve development, favorable or unfavorable. In addition, we expect that investment income will be approximately flat with 2011 levels. Weighted average shares at year-end 2012 are expected to be approximately 55.6 million.

Review of Underwriting Results by Lines of Business

Commercial Lines

(\$ in thousands)	2011	2010	2011 vs. 2010	2009	2010 vs. 2009
GAAP Insurance Operations Results:					
NPW	\$1,212,137	1,133,876	7 %	1,194,796	(5)%
NPE	1,174,861	1,174,282	-	1,214,952	(3)
Less:					
Losses and loss expenses incurred	835,532	790,369	6	809,430	(2)
Net underwriting expenses incurred	393,473	381,703	3	387,494	(1)
Dividends to policyholders	5,284	3,878	36	3,640	7
Underwriting (loss) income	\$(59,428)	(1,668)	3,463 %	14,388	(112)%
GAAP Ratios:					
Loss and loss expense ratio	71.1	% 67.3	3.8 pts	66.6	0.7 pts
Underwriting expense ratio	33.6	32.5	1.1	31.9	0.6
Dividends to policyholders ratio	0.4	0.3	0.1	0.3	-
Combined ratio	105.1	100.1	5.0	98.8	1.3
Statutory Ratios:					
Loss and loss expense ratio	71.1	67.3	3.8	66.6	0.7
Underwriting expense ratio	32.8	33.2	(0.4)	32.9	0.3
Dividends to policyholders ratio	0.4	0.3	0.1	0.3	-
Combined ratio	104.3	% 100.8	3.5 pts	99.8	1.0 pts

NPW increased 7% in 2011 compared to 2010, which reflects the following:

- o Renewal pure price increases of 2.8% coupled with strong retention with a one-point increase to 80%;
- o \$24.1 million in E&S premium in 2011 resulting from our renewal rights acquisition in August 2011; and
- o \$14.5 million in additional audit and endorsement premium, a \$62.4 million improvement in 2011.

NPW decreased 5% in 2010 compared to 2009, which reflects the following:

- o \$47.9 million in audit and endorsement return premiums; and
- o Net renewals of \$1.0 billion in 2010, a \$24.2 million reduction compared to 2009.

Partially offsetting these decreases was direct new business of \$210.8 million in 2010.

The 2010 NPW decrease was offset by the NPW increase in 2011 leaving NPE largely unchanged over the period. However, the decrease in NPW from 2009 to 2010 resulted in a NPE decrease in 2010.

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

The variances in the GAAP loss and loss expense ratio in both periods were reflective of increased catastrophe losses, coupled with the impact of favorable prior year casualty development, a summary of which follows:

(\$ in thousands)

For the Year Ended December 31,	Catastrophe Losses Incurred	Impact on Loss Ratio	Favorable Prior Year Casualty Development	Impact on Loss Ratio	Total Loss Ratio Impact
2011	\$ 75,207	6.4 pts	\$ 29,000	(2.5)pts	3.9
2010	38,593	3.3	37,000	(3.2)	0.1
2009	5,791	0.5	27,000	(2.2)	(1.7)

Catastrophe losses included losses from Hurricane Irene, which pierced the first layer of our catastrophe excess of loss treaty. Hurricane Irene's impact to Commercial Lines was \$21.7 million, net of reinsurance, or 1.8 points.

Prior year casualty development was driven by the following:

(\$ in millions) Line of Business	Favorable/(Unfavorable)		
	2011	2010	2009
Commercial Auto Liability	\$ 13	28	10
General Liability	12	26	8
Business Owners Property Liability	10	3	-
Workers Compensation	(7)	(22)	11
Other	1	2	(2)

The increase in the GAAP underwriting expense ratio of 1.1 points in 2011 compared to last year, was driven by expenses associated with our purchase of the E&S renewal book of business in 2011. The majority of these expenses, or \$4.7 million, are directly related to the acquisition and will not impact the on-going results of this operation. However, as MUSIC unearned premiums as of the acquisition date were fully ceded, our underwriting expense ratio will be under pressure going forward until such time as premiums that we write subsequent to the purchase are earned to support the expenses of these operations.

The GAAP underwriting expense ratio increased in 2010 compared to 2009, which was primarily due to declines in premiums earned coupled with the one-time benefit recognized in 2009 for the elimination of retiree life insurance benefits for current employees.

The following is a discussion of our most significant standard Commercial Lines of business:

General Liability

(\$ in thousands)	2011	2010	2011		2010	
			vs. 2010	2009	vs. 2009	2009
Statutory NPW	\$351,561	323,276	9 %	352,336	(8)%	
Statutory NPE	344,682	336,475	2	362,479	(7)	
Statutory combined ratio	100.7 %	96.4	5.5 pts	102.9	(6.5)pts	
% of total statutory commercial NPW	29	% 29		29		

NPW increased in 2011 driven by improved economic conditions reflected in audit and endorsement premiums. During the three-year period, our premium subject to audit in this line was approximately 50%. At the end of the policy period, actual exposure units (usually sales or payroll) on policies with premium subject to audit are compared to beginning of period estimates and a return premium or additional premium transaction occurs. Audits and endorsements resulted in additional premium of \$3.9 million in 2011 compared to return premium of \$24.6 million in 2010. We also continued to see improvements in pricing in this line as our renewal pure price increase was 3.7% in 2011 coupled with increases of 4.2% and 1.6% in 2010 and 2009, respectively.

In 2010, the economic weakness and competitive nature of the insurance marketplace negatively impacted NPW on this line compared to 2009 as evidenced by the following:

- o Net renewals were down 5%, or \$15.2 million, to \$302.9 million despite our ability to achieve pure price as indicated above;

- o New business was down 21%, or \$14.8 million, to \$56.7 million; and

- o Continued pressure from audit and endorsement activity, which resulted in a return premium of \$24.6 million in 2010 and \$27.2 million in 2009.

The fluctuations in the statutory combined ratios were driven by favorable prior year development. Favorable prior year development in the general liability line of business is often volatile year to year and, therefore, requires a longer period of time before true trends are recognized and can be acted upon.

The impact of the prior year favorable development shown above was as follows:

- 2011: 3.3 points, driven by favorable development on the premises and operations coverages for accident years 2009 and prior, largely offset by adverse development for the products coverage in 2010 and prior;

- 2010: 7.9 points, driven by 2006 and prior accident years; and

- 2009: 2.3 points.

Commercial Automobile

(\$ in thousands)	2011	2010	2011		2010	
			vs. 2010	2009	vs. 2009	
Statutory NPW	\$282,825	281,365	1 %	298,036	(6)%	
Statutory NPE	279,610	291,495	(4)	300,562	(3)	
Statutory combined ratio	94.2 %	90.2	4.0 pts	98.2	(8.0)pts	
% of total statutory commercial NPW	23	% 25		25		

NPW remained relatively flat in 2011 compared to last year while NPW decreased in 2010 compared to 2009. NPE decreased throughout the three-year period which was a reflection of the economic factors that put pressure on NPW as exposure levels declined in 2010.

The fluctuations in the statutory combined ratio were driven by favorable prior year casualty development as shown above was as follows:

- o 2011: 4.6 points, in 2011 driven by the 2007 through 2009 accident years, representing a continued trend driven by lower frequencies in those years;
- o 2010: 9.6 points, driven by lower than anticipated severity primarily in accident years 2004 through 2009; and
 - o 2009: 3.2 points, driven by lower than anticipated severity primarily in accident year 2007.

Workers Compensation

(\$ in thousands)	2011	2010	2011		2010	
			vs. 2010	2009	vs. 2009	
Statutory NPW	\$261,348	237,409	10 %	251,121	(5)%	
Statutory NPE	259,354	250,456	4	263,490	(5)	
Statutory combined ratio	116.2 %	124.2	(8.0)pts	107.6	16.6 pts	
% of total statutory commercial NPW	22	% 21		21		

As economic conditions have begun to stabilize and unemployment has leveled off, audit and endorsement premium in 2011 became more neutral resulting in additional premium of \$11.2 million, compared to return premiums of \$20.5 million in 2010 and \$29.2 million in 2009, thus driving the increase in the current year. The decrease in 2010 as compared to 2009 reflects pressure on net renewals and new business, further reflecting economic conditions in those years.

The fluctuations in the statutory combined ratio were primarily attributable to the impact of prior year casualty development on current year results as shown above was as follows:

2011: unfavorable by 2.7 points, driven by the 2010 accident year, representing a continued trend related to increased severities in recent years, partially offset by various earlier accident years;

· 2010: unfavorable by 8.3 points, driven by increased severity in the 2008 and 2009 accident years; and
2009: favorable by 3.9 points, primarily driven by accident years 2005 to 2007, partially offset by adverse severity in accident year 2008.

Commercial Property

(\$ in thousands)	2011	2010	2011		2010	
			vs. 2010	2009	vs. 2009	2009
Statutory NPW	\$ 195,927	194,382	1 %	199,707	(3)%	
Statutory NPE	192,989	199,252	(3)	197,665	1	
Statutory combined ratio	109.9 %	93.7	16.2 pts	83.9	9.8 pts	
% of total statutory commercial NPW	16 %	17		17		

NPW and NPE were relatively flat over the three-year period. However, the increase in the statutory combined ratios over the three-year period were largely due to the increases in catastrophe losses as shown below:

(\$ in thousands)			Catastrophe	
For the Year Ended	Losses	Impact on		
December 31,	Incurred	Loss Ratio		
2011	\$ 59,662	30.9 pts		
2010	31,824	16.0		
2009	3,897	2.0		

Business Owners Property

(\$ in thousands)	2011	2010	2011		2010	
			vs. 2010	2009	vs. 2009	2009
Statutory NPW	\$ 67,580	66,079	2 %	64,958	2 %	
Statutory NPE	66,225	65,260	1	62,638	4	
Statutory combined ratio	109.8 %	116.0	(6.2)pts	116.4	(0.4)pts	
% of total statutory commercial NPW	6 %	6		5		

NPW and NPE were relatively flat over the three-year period. The decrease in the statutory combined ratio in 2011 compared to 2010 was largely due to lower estimates of current year loss costs, coupled with favorable prior year development. These items were partially offset by elevated catastrophe losses.

Favorable statutory prior year casualty development was as follows:

o 2011: 15.5 points driven by favorable development on liability coverage for accident years 2008 through 2010; and
o 2010: 5.0 points.

Catastrophe losses were as follows

- o 2011: \$12.4 million, or 18.7 points;
- o 2010: \$5.3 million, or 8.2 points; and
- o 2009: \$1.4 million, or 2.2 points.

Personal Lines

			2011		2010	
(\$ in thousands)	2011	2010	vs. 2010	2009	vs. 2009	
GAAP Insurance Operations Results:						
NPW	\$273,212	256,665	6 %	227,859	13 %	
NPE	264,452	242,316	9	216,095	12	
Less:						
Losses and loss expenses incurred	239,455	191,749	25	162,475	18	
Net underwriting expenses incurred	72,488	71,066	2	65,623	8	
Underwriting loss	\$(47,491)	(20,499)	(132)%	(12,003)	(71)%	
GAAP Ratios:						
Loss and loss expense ratio	90.5 %	79.1	11.4 pts	75.2	3.9 pts	
Underwriting expense ratio	27.5	29.4	(1.9)	30.4	(1.0)	
Combined ratio	118.0	108.5	9.5	105.6	2.9	
Statutory Ratios:						
Loss and loss expense ratio	90.5	79.2	11.3	75.2	4.0	
Underwriting expense ratio	26.8	27.2	(0.4)	29.2	(2.0)	
Combined ratio	117.3 %	106.4	10.9 pts	104.4	2.0 pts	

The increase in NPW in 2011 compared to 2010 was primarily due to:

- o Rate increases of 6.8%, or \$17.9 million, that went into effect across our Personal Lines footprint during 2011; and
 - o Improved retention of one-point to 86%; and
- o New business direct premiums written of \$50.2 million compared to \$62.0 million in 2010.

The increase in NPW in 2010 compared to 2009 was primarily due to:

- o Rate increases of 6.3%, or \$14.8 million, that went into effect across our Personal Lines footprint during 2010;
 - o Improved retention of two points to 85%; and
- o New business direct premium written of \$62.0 million compared to \$55.2 million in 2009.

NPE over the three-year period was consistent with the NPW increases in 2011 compared to 2010 and 2009 as discussed above.

The 11.4-point increase in the GAAP loss and loss expense ratio in 2011 compared to 2010 was primarily attributable to an increase in property losses of \$42.4 million, or 12.7 points, which includes an increase in catastrophe losses of \$25.7 million, or 9.1 points. The unprecedented level of catastrophe losses in 2011 we incurred included losses from Hurricane Irene of \$17.9 million, or 6.8 points. Partially offsetting these losses were claims handling fees earned on our flood book of business that increased \$4.4 million, or 1.6 points, from 2010. These claims handling fees reflect the significant flooding activity during the year throughout the Northeast and Mid-Atlantic states.

The 3.9-point increase in the GAAP loss and loss expense ratio in 2010 compared to 2009 was also driven by elevated property losses of \$27.0 million, or 7.7 points, which included an increase in catastrophe losses of \$15.1 million, or 6.1 points.

The decrease in the GAAP underwriting expense ratio in 2011 and 2010 as compared to the respective prior years reflects the impact of premiums outpacing expenses, driven by the rate increases we have been able to obtain over the three-year period. On a statutory basis, the impact of this trend is recognized immediately in the expense ratio while on a GAAP basis, the impact is recognized over the course of one year, which is generally the term of our Personal Lines policies.

Reinsurance

We have reinsurance contracts that cover both property and casualty insurance business. We use traditional forms of reinsurance and do not utilize finite risk reinsurance. Available reinsurance can be segregated into the following key categories:

Property Reinsurance – includes our Property Excess of Loss treaties purchased for protection against large individual property losses and our Property Catastrophe treaty purchased to provide protection for the overall property portfolio against severe catastrophic events. Facultative reinsurance is also used for property risks that are in excess of our treaty capacity.

Casualty Reinsurance – purchased to provide protection for both individual large casualty losses and catastrophic casualty losses involving multiple claimants or insureds. Facultative reinsurance is also used for casualty risks that are in excess of our treaty capacity.

Terrorism Reinsurance – available as a federal backstop related to terrorism losses as provided under the TRIA. For further information regarding this legislation, see Item 1A. “Risk Factors.” of this Form 10-K.

Flood Reinsurance – as a servicing carrier in the WYO Program, we receive a fee for writing flood business, for which the related premiums and losses are ceded to the federal government.

Other Reinsurance – includes other treaties that we do not consider core to our reinsurance program, such as our Surety and Fidelity Excess of Loss, NWCRP and our Equipment Breakdown Coverage treaties, which do not fall within the categories above.

In addition to the above categories, we have entered into several reinsurance agreements with Montpelier Re Insurance Ltd. as part of the acquisition of MUSIC. Together, these agreements provide protection for losses on policies written prior to the acquisition and any development on reserves established by MUSIC as of the date of acquisition. The reinsurance recoverables under these treaties are 100% collateralized.

Information regarding the terms and related coverage associated with each of our categories of reinsurance above can be found in Item 1. “Business.” of this Form 10-K.

We regularly reevaluate our overall reinsurance program and try to develop effective ways to manage transfer of risk. Our analysis is based on a comprehensive process that includes periodic analysis of modeling results, aggregation of exposures, exposure growth, diversification of risks, limits written, projected reinsurance costs, financial strength of reinsurers, and projected impact on earnings and statutory surplus. We strive to balance sometimes opposing considerations of reinsurer credit quality, price, terms, and our appetite for retaining a certain level of risk.

Property Reinsurance

The Property Catastrophe treaty, which covers both our standard market and E&S business, renewed effective January 1, 2012 at an increase in premium of 19% for the same coverage, which reflected increased exposure change and recent market trends due to increased global catastrophe losses. The current treaty structure provides coverage of \$435 million in excess of \$40 million and the annual aggregate limit net of our co-participation continues to be

approximately \$790 million for 2012.

We continue to assess our property catastrophe exposure aggregations, modeled results, and effects of growth on our property portfolio, and strive to manage our exposure to individual large events balanced against the cost of reinsurance protections.

Although we model various catastrophic perils, due to our geographic spread, the risk of hurricane continues to be the most significant natural catastrophe peril to which our portfolio is exposed. Below is a summary of the largest four actual hurricane losses that we experienced in the past 22 years:

Hurricane Name	Actual Gross Loss (\$ in millions)	Accident Year
Hurricane Irene	\$ 46.5	¹ 2011
Hurricane Hugo	26.0	1989
Hurricane Floyd	14.5	1999
Hurricane Isabel	13.4	2003

¹ This amount represents reported and unreported gross losses estimated as of December 31, 2011.

We use the results of the Risk Management Solutions (“RMS”) and AIR Worldwide (“AIR”) models in our review of exposure to hurricane risk. Each of these third party models provides two views of the modeled results. A long-term view closely relates modeled event frequency to historical hurricane activity, while a near-term view adjusts historical frequencies to reflect expectations of elevated hurricane activity in the North Atlantic Basin in the short to medium term. It is our view that modeled estimates provide a range of potential outcomes and multiple estimates should be reviewed for purposes of understanding catastrophic risk. The RMS v. 11.0 model substantially increased vulnerability of construction assumptions and increased wind hazards further inland for our book of business. Other changes included storm surge, demand surge, and hurricane frequency. Reinsurance brokers indicate that the RMS version change created significant increases in modeled losses across portfolios with different geographic and business mix attributes. The following table provides long-term and near-term views of blended RMS v.11.0 and AIR v.13.0 modeled hurricane results based on the Insurance Subsidiaries’ combined property book as of July 2011, adjusted to include our recent E&S acquisitions:

(\$ in thousands)	Long-Term Basis			Near-Term Basis		
	Gross Losses	Net Losses ¹	Net Losses as a Percent of Equity ²	Gross Losses	Net Losses ¹	Net Losses as a Percent of Equity ²
Occurrence Exceedence Probability						
4.0% (1 in 25 year event)	\$94,167	25,435	2	% \$119,825	25,856	2
2.0% (1 in 50 year event)	187,903	30,159	3	227,160	32,429	3
1.0% (1 in 100 year event)	333,264	37,858	3	395,028	42,239	4
0.4% (1 in 250 year event)	667,243	173,004	16	768,144	233,804	21

¹ Losses are after tax and include applicable reinstatement premium.

² Equity as of December 31, 2011.

Our current catastrophe reinsurance program covers up to a 1 in 159 year return period, or events with 0.6% probability, based on a multi-model view of hurricane risk.

The Property Excess of Loss treaty (“Property Treaty”), which covers our standard market business, was renewed on July 1, 2011 and is effective through June 30, 2012, with the same terms as the expiring treaty. This treaty provides a per risk coverage of \$28.0 million in excess of a \$2.0 million retention.

The per occurrence cap on the total program is \$64.0 million.

The first layer continues to have unlimited reinstatements. The annual aggregate limit for the second, \$20.0 million in excess of \$10.0 million, layer remains at \$80.0 million.

Consistent with the prior year treaty, the Property Treaty excludes nuclear, biological, chemical, and radiological terrorism losses.

Casualty Reinsurance

The Casualty Excess of Loss treaty (“Casualty Treaty”), which covers our standard market business, was renewed on July 1, 2011 and is effective through June 30, 2012, with the same terms as the expiring treaty. The current program provides the following coverage:

Six layers provide coverage for 100% of up to \$88.0 million in excess of a \$2.0 million retention.

Consistent with the prior year, the Casualty Treaty excludes nuclear, biological, chemical, and radiological terrorism losses.

Annual aggregate terrorism limits, net of co-participation, increased to \$201.0 million.

Investments

Our investment philosophy includes certain return and risk objectives for the fixed maturity, equity, and other investment portfolios. The primary fixed maturity portfolio return objective is to maximize after-tax investment yield and income while balancing risk. A secondary objective is to meet or exceed a weighted-average benchmark of public fixed income indices. Within the equity portfolio, the high dividend yield strategy, which we implemented in 2011, is designed to generate consistent dividend income while maintaining a minimal tracking error to the S&P 500 Index. Additional equity strategies are focused on meeting or exceeding strategy specific benchmarks of public equity indices. Although yield and income generation remain the key drivers to our investment strategy, our overall philosophy is to invest with a long-term horizon along with predominately a “buy-and-hold” approach. The return objective of the other investment portfolio, which includes alternative investments, is to meet or exceed the S&P 500 Index.

Total Invested Assets

(\$ in thousands)	2011	2010	Change
Total invested assets	\$4,112,421	3,925,722	5 %
Unrealized gain – before tax	149,612	82,874	81
Unrealized gain – after tax	97,248	53,868	81

This increase in our investment portfolio was driven primarily by: (i) operating cash flows generated from Insurance Operations; (ii) proceeds from a borrowing with the Federal Home Loan Bank of Indiana (“FHLBI”); and (iii) valuation improvements on securities in our AFS portfolio. The cash generated from our Insurance Operations was used to invest in our high dividend yield equities strategy and to purchase AFS fixed maturity securities. We increased our outstanding borrowing with the FHLBI from \$13.0 million to \$58.0 million in the fourth quarter of 2011 to borrow funds at favorable interest rates in connection with our year-end acquisition of MUSIC. We acquired \$40.5 million in short-term investments and \$7.9 million in fixed maturity securities as part of the MUSIC acquisition.

We structure our portfolio conservatively with a focus on: (i) asset diversification; (ii) investment quality; (iii) liquidity, particularly to meet the cash obligations of our Insurance Operations segment; (iv) consideration of taxes; and (v) preservation of capital. We believe that we have a high quality and liquid investment portfolio. The breakdown of our investment portfolio is as follows:

As of December 31,	2011	2010
U.S. government obligations	9 %	11 %
Foreign government obligations	1	1
State and municipal obligations	30	36
Corporate securities	31	27

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Mortgage-backed securities (“MBS”)	15	14
ABS	2	2
Total fixed maturity securities	88	91
Equity securities	4	2
Short-term investments	5	4
Other investments	3	3
Total	100 %	100 %

Fixed Maturity Securities

The average duration of the fixed maturity securities portfolio as of December 31, 2011 was 3.2 years compared to the Insurance Subsidiaries' liability duration of approximately 3.8 years, which was relatively consistent with the prior year. The current duration of the fixed maturity securities portfolio is within our historical range, and is monitored and managed to maximize yield and limit interest rate risk. We are currently experiencing pressure on our yields within our fixed maturity securities portfolio, as higher yielding bonds that are either maturing or have been sold are being replaced with the lower yielding bonds that are currently available in the marketplace. We manage liquidity with a laddered maturity structure and an appropriate level of short-term investments to avoid liquidation of AFS fixed maturities in the ordinary course of business. We typically have a long investment time horizon, and every purchase or sale is made with the intent of improving future investment returns while balancing capital preservation. During 2011, we continued to migrate from state and municipal obligations to investment-grade corporate bonds as part of our overall investment strategy, due to the more attractive risk/return characteristics of the corporate sector.

The weighted average credit rating on our fixed maturity portfolio migrated to AA- at December 31, 2011, from AA at December 31, 2010. This slightly lower average rating is largely the result of: (i) the S&P downgrade of U.S. sovereign debt in August 2011; and (ii) our recent increased allocation to investment-grade corporate bonds. The following table presents the credit ratings of our fixed maturity securities portfolio:

Fixed Maturity Rating	December 31, 2011		December 31, 2010	
Aaa/AAA	14	%	42	%
Aa/AA	52		28	
A/A	24		21	
Baa/BBB	9		8	
Ba/BB or below	1		1	
Total	100	%	100	%

For further details on how we manage overall credit quality and the various risks to which our portfolio is subject, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." of this Form 10-K.

Equity Securities

In line with our high dividend yield equities strategy mentioned above, we increased the holdings in our equity portfolio to 4% of invested assets in 2011 from 2% of invested assets in 2010. This high dividend yield equities strategy more than doubled our dividend income in 2011 compared to 2010.

Other Investments

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

As of December 31, 2011, alternative investments represented 3% of our total invested assets. The following table outlines a summary of our other investment portfolio by strategy and the remaining commitment amount associated with each strategy:

Other Investments	Carrying Value		2011
(\$ in thousands)	December 31, 2011	December 31, 2010	Remaining Commitment
Alternative Investments:			
Secondary private equity	\$30,114	26,709	9,507
Energy/power generation	25,913	35,560	10,608
Private equity	21,736	21,601	5,368
Distressed debt	16,953	20,432	3,136
Real estate	13,767	14,192	10,569
Mezzanine financing	8,817	10,230	15,256
Venture capital	7,248	6,386	900
Total alternative investments	124,548	135,110	55,344
Other securities	3,753	2,755	1,521
Total other investments	\$128,301	137,865	56,865

In addition to the capital that we have already invested to date, we are contractually obligated to invest up to an additional \$56.9 million in our other investment portfolio through commitments that currently expire at various dates through 2022. At this time, our alternative investment strategies do not invest in hedge funds. For further discussion of our seven alternative investment strategies outlined above, as well as redemption, restrictions, and fund liquidations, see Note 5. “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

Net Investment Income

The components of net investment income earned were as follows:

(\$ in thousands)	2011	2010	2009
Fixed maturity securities	\$129,710	130,990	141,882
Equity securities	4,535	2,238	2,348
Trading securities	-	-	262
Short-term investments	160	437	1,273
Other investments	20,539	20,313	(21,726)
Miscellaneous income	133	139	343
Investment expenses	(7,634)	(8,409)	(5,911)
Net investment income earned – before tax	147,443	145,708	118,471
Net investment income tax expense	36,355	34,649	22,746
Net investment income earned – after tax	\$111,088	111,059	95,725
Effective tax rate	24.7 %	23.8	19.2
Annual after-tax yield on fixed maturity securities	2.8	2.9	3.5
Annual after-tax yield on investment portfolio	2.8	2.9	2.6

While net investment income remained relatively flat in 2011 compared to 2010, its components reflect increased dividend income from the high dividend yield equities strategy that we implemented during the year, partially offset by lower yields on our fixed maturity securities. In 2011, bonds that matured or were sold, valued at \$481.9 million, had yields that averaged 3.8%, pre-tax, while new purchases of \$490.8 million had an average yield of 2.7%.

Income from our other investments, specifically our alternative investment portfolio, was the primary driver of the increase in investment income during 2010 compared to 2009. This increase reflects the improved equity and credit markets in 2010 compared to the prior year. Partially offsetting these improved returns was a \$10.9 million reduction in income on our fixed maturity securities portfolio reflecting the currently low interest rate environment. In 2010, bonds that matured or were sold, valued at \$808.3 million, had average pre-tax yields of 3.8%, while new purchases of \$1.0 billion had an average yield of 2.8%.

For further discussion of net investment income, see Note 5. “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

*Realized Gains and Losses*Realized Gains and Losses (excluding OTTI)

Realized gains and losses, by type of security, excluding OTTI charges, are determined on the basis of the cost of specific investments sold and are credited or charged to income. The components of net realized gains (losses) were as follows:

Realized Gains (Losses) Excluding OTTI (\$ in thousands)	2011	2010	2009
HTM fixed maturity securities			
Gains	\$4	569	225
Losses	(564)	(894)	(1,049)
AFS fixed maturity securities			
Gains	9,385	8,161	20,899
Losses	(70)	(7,619)	(13,889)
AFS equity securities			
Gains	6,671	16,698	33,355
Losses	-	(1,156)	(28,056)
Other investments			
Gains	-	-	-
Losses	-	(5,184)	(2,039)
Total other net realized investment gains	15,426	10,575	9,446
Total OTTI charges recognized in earnings	(13,186)	(17,658)	(55,416)
Total net realized gains (losses)	\$2,240	(7,083)	(45,970)

For a discussion of realized gains and losses, see Note 5. "Investments" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K.

There were no securities sold at a loss during 2011. The following table presents the period of time that securities sold at a loss were continuously in an unrealized loss position prior to sale for 2010 and 2009:

Period of Time in an Unrealized Loss Position	2010		2009	
	Fair Value on Sale Date	Realized Loss	Fair Value on Sale Date	Realized Loss
(\$ in thousands)				
Fixed maturities:				
0 – 6 months	\$11,462	463	54,287	6,951
7 – 12 months	-	-	38,292	3,424

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Greater than 12 months	10,257	7,098	39,241	3,420
Total fixed maturities	21,719	7,561	131,820	13,795
Equities:				
0 – 6 months	13,914	739	29,567	20,620
7 – 12 months	3,173	417	8,230	7,436
Greater than 12 months	-	-	-	-
Total equity securities	17,087	1,156	37,797	28,056
Other Investments:				
0 – 6 months	16,357	5,184	-	-
7 – 12 months	-	-	4,816	1,189
Total other investments	16,357	5,184	4,816	1,189
Total	\$55,163	13,901	174,433	43,040

During 2010, we sold certain AFS fixed maturity securities that were in an unrealized loss position that our new external investment managers had recommended that we sell during their review of the portfolio. This recommendation was due to ongoing credit concerns of the underlying investments coupled with strategically positioning the portfolio to generate maximum yield while balancing risk objectives. In addition, as part of our transition to the newly hired external investment managers, in the third quarter of 2010, we changed our intent regarding certain equity holdings that we sold to lower our equity exposure and pursue a more index-neutral position for this asset class in the near term, providing greater sector and sponsor diversification. In the fourth quarter of 2010, we sold certain limited partnerships within our other investments at a loss to reduce our exposure in the mezzanine financing, private equity, secondary private equity, and real estate sectors of our alternative investment portfolio, as well as to reduce certain vintage year and sponsor concentrations.

Our general philosophy for sales of securities is to reduce our exposure to securities and sectors based on economic evaluations and when the fundamentals for that security or sector have deteriorated. We typically have a long investment time horizon and every purchase or sale is made with the intent of improving future investment returns while balancing capital preservation. For additional discussions, see Note 5. “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

Other-than-Temporary Impairments

The following table provides information regarding our OTTI charges recognized in earnings:

(\$ in thousands)	2011	2010	2009
HTM securities			
ABS	\$-	31	2,482
CMBS	-	4,215	11,777
RMBS	-	419	-
Total HTM securities	-	4,665	14,259
AFS securities			
Corporate securities	244	-	1,271
Obligations of state and political subdivisions	17	197	-
ABS	721	128	-
CMBS	694	2,200	-
RMBS	145	7,925	37,779
Total fixed maturity AFS securities	1,821	10,450	39,050
Equity securities	11,365	2,543	2,107
Total AFS securities	13,186	12,993	41,157
Total OTTI charges recognized in earnings	\$13,186	17,658	55,416

We regularly review our entire investment portfolio for declines in fair value. If we believe that a decline in the value of a particular investment is other than temporary, we record it as an OTTI, through realized losses in earnings for the credit-related portion and through unrealized losses in OCI for the non-credit related portion for fixed maturity securities. If there is a decline in fair value of an equity security that we do not intend to hold, or if we determine the decline is other than temporary, we write down the cost of the investment to fair value and record the charge through earnings as a component of realized losses.

For a discussion of our OTTI methodology, see Note 2. “Summary of Significant Accounting Policies” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K. In addition, for significant inputs used to measure OTTI and qualitative information regarding these charges, see Note 5. “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

Unrealized/Unrecognized Losses

The following table summarizes the aggregate fair value and gross pre-tax unrealized/unrecognized losses recorded, by asset class and by length of time, for all securities that have continuously been in an unrealized/unrecognized loss position at December 31, 2011 and December 31, 2010:

December 31, 2011	Less than 12 months		12 months or longer

Total AFS and HTM	\$551,477	(12,918)	8	69,531	(10,898)	2,251

¹ Gross unrealized losses include non-OTTI unrealized amounts and OTTI losses recognized in AOCI. In addition, this column includes remaining unrealized gain or loss amounts on securities that were transferred to a HTM designation in the first quarter of 2009 for those securities that are in a net unrealized/unrecognized loss position.

² U.S. government includes corporate securities fully guaranteed by the Federal Deposit Insurance Corporation ("FDIC").

³ Unrecognized holding gains/(losses) represent market value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an OTTI charge is recognized on an HTM security.

As evidenced by the table below, our unrealized/unrecognized loss positions improved \$10.9 million as of December 31, 2011 compared to last year as follows:

(\$ in thousands)

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

December 31, 2011			December 31, 2010

-	0% - 19%	-	1	0% - 19%	976
		\$ 10,635			\$ 21,557

We have reviewed the securities in the tables above in accordance with our OTTI policy as discussed previously in “Critical Accounting Policies and Estimates” of this Form 10-K. For qualitative information regarding our conclusions as to why these impairments are deemed temporary, see Note 5. “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

The following table presents amortized cost and fair value regarding our AFS fixed maturities that were in an unrealized loss position at December 31, 2011 by contractual maturity:

Contractual Maturities (\$ in thousands)	Amortized Cost	Fair Value
One year or less	\$29,862	28,631
Due after one year through five years	179,276	173,276
Due after five years through ten years	60,930	59,088
Due after ten years	2,166	1,861
Total	\$272,234	262,856

The following table presents information regarding our HTM fixed maturities that were in an unrealized/unrecognized loss position at December 31, 2011 by contractual maturity:

Contractual Maturities (\$ in thousands)	Amortized Cost	Fair Value
One year or less	\$266	266
Due after one year through five years	22,989	21,821
Due after five years through ten years	-	-
Due after ten years	187	186
Total	\$23,442	22,273

Investments Outlook

The sluggish pace of the 2011 economic recovery continued during the second half of the year with third quarter real gross domestic product at 1.8%. The labor market reflected some improvement toward the end of the year with the Bureau of Labor Statistics report indicating that the December 2011 unemployment rate was 8.5%, the lowest reading of the year. However, commodity price increases, domestic housing market overhang, inflation expectations, sovereign debt stability, and slower global growth rates remain as 2012 begins. The equity and bond markets were volatile in the last half of 2011 and are likely to remain so for the first half of 2012. The Federal Reserve continues to maintain an accommodative monetary policy. Yields remain low and the Federal Reserve has indicated their expectation that this will continue through 2014. The outlook for 2012 reflects the continuing challenge for the fixed income portfolio in overcoming the spread between maturing assets and the reinvestment rate available, while maintaining credit quality.

Our fixed income strategy remains focused on maintaining sufficient liquidity while maximizing yield within acceptable risk tolerances. We will continue to invest in high quality instruments, including investment-grade corporate bonds with diversified maturities to manage incremental interest rate risk, and may opportunistically invest in below investment grade and/or municipal fixed maturity securities to take advantage of risk adjusted return opportunities.

The allocation to a high dividend yield equities strategy is being maintained, and has improved diversification in the equity portfolio while providing additional yield. The strategy is relatively sector-neutral, provides broad based exposure to the domestic equity market, and provides attractive current income yields.

Our current outlook for alternative investments remains positive, and private markets continue to offer attractive risk adjusted returns.

Federal Income Taxes

The following table provides information regarding federal income taxes from continuing operations:

(\$ in millions)	2011	2010	2009
Federal income tax (benefit) expense from continuing operations	(12.5)	12.6	(5.5)
Effective tax rate	(154)%	15	(14)

The reduction in federal income tax and effective tax rate in 2011 from 2010 was primarily due to an increase in underwriting losses driven by the extreme level of catastrophe events. The increase in 2010 compared to 2009 was primarily due to lower net realized losses from improved non-cash OTTI charges. For a reconciliation of our effective tax rate to the statutory rate of 35%, see Note 15. "Federal Income Tax" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K.

Financial Condition, Liquidity, Short-term Borrowings, and Capital Resources

Capital resources and liquidity reflect our ability to generate cash flows from business operations, borrow funds at competitive rates, and raise new capital to meet operating and growth needs.

Liquidity

We manage liquidity with a focus on generating sufficient cash flows to meet the short-term and long-term cash requirements of our business operations. Our cash and short-term investment position was \$218 million at December 31, 2011, which was comprised of \$35 million at Selective Insurance Group, Inc. (the "Parent") and \$183 million at the Insurance Subsidiaries. Additionally in 2011, the Parent has begun to build a portfolio, which amounted to approximately \$20 million as of December 31, 2011, of high-quality, highly-liquid government and corporate fixed maturity investments to generate additional yield. The Insurance Subsidiaries' short-term position included \$40.5 million in short-term investments acquired through our December 31, 2011 purchase of MUSIC. The Insurance Subsidiaries were also carrying additional short-term funds to provide liquidity associated with paying claims related to the historic levels of catastrophe losses that occurred during 2011, the remaining case and IBNR reserves of which amounted to approximately \$29 million as of December 31, 2011. Short-term investments are generally maintained in AAA rated money market funds approved by the National Association of Insurance Commissioners.

Sources of cash for the Parent have historically consisted of dividends from the Insurance Subsidiaries, borrowings under lines of credit and the Federal Home Loan Bank of Indianapolis (FHLBI) through our Indiana-domiciled Insurance Subsidiaries' ("Indiana Subsidiaries") loan agreements, and the issuance of stock and debt securities. We continue to monitor these sources, giving consideration to our long-term liquidity and capital preservation strategies.

The Insurance Subsidiaries paid \$63 million in dividends to the Parent in 2011 compared to our allowable ordinary dividend amount of approximately \$110 million. Our maximum ordinary dividend amount in 2012 will be approximately \$104 million. Any dividends to the Parent continue to be subject to the approval and/or review of the insurance regulators in the respective domiciliary states under insurance company holding acts, and are generally payable only from earned surplus as reported in the statutory annual statements of those subsidiaries as of the preceding December 31. Although past dividends have historically been met with regulatory approval, there is no assurance that future dividends that may be declared will be approved. For additional information regarding dividend restrictions, refer to Note 10. "Indebtedness" and Note 6. "Stockholders' Equity and Other Comprehensive Income (Loss)" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K.

The Parent had no private or public issuances of stock or debt during 2011 and there were no borrowings under its \$30 million line of credit (“Line of Credit”). The Indiana Subsidiaries’ membership in the FHLBI provides these companies with access to additional liquidity. The Indiana Subsidiaries’ aggregate investment of \$2.9 million provides them with the ability to borrow up to 20 times the total amount of the FHLBI common stock purchased, at comparatively low borrowing rates. The Parent’s Line of Credit agreement permits collateralized borrowings by the Indiana Subsidiaries from the FHLBI so long as the aggregate amount borrowed does not exceed 10% of the respective Indiana Subsidiary’s admitted assets from the preceding calendar year. For additional information regarding the Parent’s Line of Credit, refer to the section below entitled “Short-term Borrowings.” All borrowings from FHLBI are required to be secured by certain investments. For additional information regarding the required collateral, refer to Note 5, “Investments” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K. The Indiana Department of Insurance has approved lending agreements from the Indiana Subsidiaries to the Parent for up to 10% of the admitted assets of the Indiana Subsidiaries. We increased our outstanding borrowing with the FHLBI from \$13.0 million to \$58.0 million in the fourth quarter of 2011 to borrow funds at favorable interest rates in connection with our year-end acquisition of MUSIC. These funds were loaned to the Parent under the approved lending agreements. Following this transaction, the Indiana Subsidiaries have the ability to borrow approximately \$26 million more from the FHLBI until the Line of Credit maximum borrowings of 10% of admitted assets is reached. In addition, pursuant to the lending agreement between the Indiana Subsidiaries and the Parent, additional borrowings by the Parent are limited to approximately \$15 million.

The Insurance Subsidiaries also generate liquidity through insurance float, which is created by collecting premiums and earning investment income before losses are paid. The period of the float can extend over many years. Our investment portfolio consists of maturity dates that are laddered to continually provide a source of cash flows for claims payments in the ordinary course of business. The duration of the fixed maturity portfolio, excluding short-term investments, was 3.2 years as of December 31, 2011, while the liabilities of the Insurance Subsidiaries have a duration of 3.8 years. In addition, the Insurance Subsidiaries purchase reinsurance coverage for protection against any significantly large claims or catastrophes that may occur during the year.

The liquidity generated from the sources discussed above is used, among other things, to pay dividends to our shareholders. Dividends on shares of the Parent’s common stock are declared and paid at the discretion of the Board of Directors based on our operating results, financial condition, capital requirements, contractual restrictions, and other relevant factors.

Our ability to meet our interest and principal repayment obligations on our debt, as well as our ability to continue to pay dividends to our stockholders is dependent on liquidity at the Parent coupled with the ability of the Insurance Subsidiaries to pay dividends, if necessary, and/or the availability of other sources of liquidity to the Parent. Our next principal repayments of \$13 million and \$45 million are due in 2014 and 2016, respectively. Subsequent to 2016, our next principal repayment is due in 2034. Restrictions on the ability of the Insurance Subsidiaries to declare and pay dividends, without alternative liquidity options, could materially affect our ability to service debt and pay dividends on common stock.

Short-term Borrowings

Our Line of Credit was renewed on June 13, 2011 with Wells Fargo Bank, National Association, as administrative agent, and Branch Banking and Trust Company (BB&T), with a borrowing capacity of \$30 million, which can be increased to \$50 million with the approval of both lending partners. The Line of Credit provides the Parent an additional source of short-term liquidity. The interest rate on our Line of Credit varies and is based on, among other factors, the Parent's debt ratings. The Line of Credit expires on June 13, 2014. There were no balances outstanding under this credit facility as of December 31, 2011 or at any time during 2011.

The Line of Credit agreement contains representations, warranties, and covenants that are customary for credit facilities of this type, including, without limitation, financial covenants under which we are obligated to maintain a minimum consolidated net worth, minimum combined statutory surplus, and maximum ratio of consolidated debt to total capitalization, as well as covenants limiting our ability to: (i) merge or liquidate; (ii) incur debt or liens; (iii) dispose of assets; (iv) make investments and acquisitions; and (v) engage in transactions with affiliates. The Line of Credit permits collateralized borrowings by the Indiana Subsidiaries from the FHLBI so long as the aggregate amount borrowed does not exceed 10% of the respective Indiana Subsidiary's admitted assets from the preceding calendar year.

The table below outlines information regarding certain of the covenants in the Line of Credit:

	Required as of December 31, 2011	Actual as of December 31, 2011
Consolidated net worth	\$793 million	\$1,109 million
Statutory surplus	Not less than \$750 million	\$1,063 million ¹
Debt-to-capitalization ratio ²	Not to exceed 35%	20.3%
A.M. Best financial strength rating	Minimum of A-	A+

¹ Statutory surplus includes the effect of the MUSIC acquisition.

² Calculated in accordance with Line of Credit agreement.

Capital Resources

Capital resources provide protection for policyholders, furnish the financial strength to support the business of underwriting insurance risks, and facilitate continued business growth. At December 31, 2011, we had statutory surplus and GAAP stockholders' equity of \$1.1 billion. We had total debt of \$307.4 million at December 31, 2011, which equates to a debt-to-capital ratio of approximately 21.7%.

Our cash requirements include, but are not limited to, principal and interest payments on various notes payable, dividends to stockholders, payment of claims, payment of commitments under limited partnership agreements and capital expenditures, as well as other operating expenses, which include agents' commissions, labor costs, premium taxes, general and administrative expenses, and income taxes. For further details regarding our cash requirements, refer to the section below entitled, "Contractual Obligations, Contingent Liabilities, and Commitments."

We continually monitor our cash requirements and the amount of capital resources that we maintain at the holding company and operating subsidiary levels. As part of our long-term capital strategy, we strive to maintain capital metrics, relative to the macroeconomic environment, that support an "A+" (Superior) financial strength A.M. Best rating. Based on our analysis and market conditions, we may take a variety of actions, including, but not limited to, contributing capital to our subsidiaries in our Insurance Operations, issuing additional debt and/or equity securities, repurchasing shares of the Parent's common stock, and increasing stockholders' dividends.

Our capital management strategy is intended to protect the interests of the policyholders of the Insurance Subsidiaries and our stockholders, while enhancing our financial strength and underwriting capacity.

Book value per share increased to \$20.39 as of December 31, 2011 from \$19.95 as of December 31, 2010, primarily driven by: (i) unrealized gains on our investment portfolio, which led to an increase in book value per share of \$0.80; and (ii) net income of \$0.37 per share. Partially offsetting these increases were: (i) dividends paid to shareholders of \$0.52; and (ii) an after-tax equity charge of \$10.9 million, or \$0.15, due to the annual revaluation of our retirement income plan pension liability.

Off-Balance Sheet Arrangements

At December 31, 2011 and 2010, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, we are not exposed to any financing, liquidity, market, or credit risk that could arise if we had engaged in such relationships.

Contractual Obligations, Contingent Liabilities, and Commitments

As discussed in “Net Loss and Loss Expense Reserves” in Item 1. “Business.” of this Form 10-K, we maintain case reserves and estimates of reserves for losses and loss expense IBNR, in accordance with industry practice. Using generally accepted actuarial reserving techniques, we project our estimate of ultimate losses and loss expenses at each reporting date. Included within the estimate of ultimate losses and loss expenses are case reserves, which are analyzed on a case-by-case basis by the type of claim involved, the circumstances surrounding each claim, and the policy provisions relating to the type of losses. The difference between: (i) projected ultimate loss and loss expense reserves; and (ii) case loss reserves and loss expense reserves thereon are carried as the IBNR reserve. A range of possible reserves is determined annually and considered in addition to the most recent loss trends and other factors in establishing reserves for each reporting period. Based on the consideration of the range of possible reserves, recent loss trends and other factors, IBNR is established and the ultimate net liability for losses and loss expenses is determined. Such an assessment requires considerable judgment given that it is frequently not possible to determine whether a change in the data is an anomaly until sometime after the event. Even if a change is determined to be permanent, it is not always possible to reliably determine the extent of the change until sometime later. As a result, there is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves because the eventual deficiency or redundancy is affected by many factors.

Given that the loss and loss expense reserves are estimates, as described above and in more detail under the “Critical Accounting Policies and Estimates” in this Form 10-K, the payment of actual losses and loss expenses is generally not fixed as to amount or timing. Due to this uncertainty, financial accounting standards prohibit us from discounting these reserves to their present value. Additionally, estimated losses as of the financial statement date do not consider the impact of estimated losses from future business. Therefore, the projected settlement of the reserves for net loss and loss expenses will differ, perhaps significantly, from actual future payments.

The projected paid amounts in the table below by year are estimates based on past experience, adjusted for the effects of current developments and anticipated trends, and include considerable judgment. There is no precise method for evaluating the impact of any specific factor on the projected timing of when loss and loss expense reserves will be paid and as a result, the timing and amounts of the actual payments will be affected by many factors. Care must be taken to avoid misinterpretation by those unfamiliar with this information or familiar with other data commonly reported by the insurance industry.

Our future cash payments associated with contractual obligations pursuant to operating leases for office space and equipment, notes payable, interest on debt obligations, and loss and loss expenses as of December 31, 2011 are summarized below:

Contractual Obligations	Payment Due by Period				
	Total	Less than 1 year	1-3 Years	3-5 years	More than 5 years
(\$ in millions)					
Operating leases	\$25.4	9.0	10.0	4.6	1.8

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Notes payable	308.0	-	13.0	45.0	250.0
Interest on debt obligations	659.0	18.8	37.5	36.8	565.9
Subtotal	992.4	27.8	60.5	86.4	817.7
Gross loss and loss expense payments	3,144.9	893.2	912.3	458.2	881.2
Ceded loss and loss expense payments	549.5	199.4	91.5	51.6	207.0
Net loss and loss expense payments	2,595.4	693.8	820.8	406.6	674.2
Total	\$3,587.8	721.6	881.3	493.0	1,491.9

See the “Short-term Borrowings” section above for a discussion of our syndicated Line of Credit agreement.

At December 31, 2011, we also have contractual obligations that expire at various dates through 2022 that may require us to invest up to an additional \$56.9 million in alternative and other investments. There is no certainty that any such additional investment will be required. We have issued no material guarantees on behalf of others and have no trading activities involving non-exchange traded contracts accounted for at fair value. We have no material transactions with related parties other than those disclosed in Note 18. “Related Party Transactions” included in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

Ratings

We are rated by major rating agencies that issue opinions on our financial strength, operating performance, strategic position, and ability to meet policyholder obligations. We believe that our ability to write insurance business is most influenced by our rating from A.M. Best, which was reaffirmed in the second quarter of 2011 as “A+ (Superior),” their second highest of 15 ratings, with a “negative” outlook. They cited our strong capitalization, solid level of operating profitability, and established presence within our targeted regional markets. The negative outlook reflects the ongoing challenges to improve underwriting performance given the competitive nature of the marketplace coupled with elevated catastrophe losses through April 2011. Following the acquisition of MUSIC, the newly-acquired company was included in our Insurance Subsidiaries’ intercompany pooling agreement. As a result, on January 12, 2012, A.M. Best upgraded the financial strength rating of MUSIC to “A+ (Superior)” from “A- (Excellent)” with a negative outlook to reflect their revised pooled rating. We have been rated “A” or higher by A.M. Best for the past 81 years, with our current rating of “A+ (Superior)” being in place for the last 50 consecutive years. The financial strength reflected by our A.M. Best rating is a competitive advantage in the marketplace and influences where independent insurance agents place their business. A downgrade from A.M. Best to a rating below “A-” could: (i) affect our ability to write new business with customers and/or agents, some of whom are required (under various third-party agreements) to maintain insurance with a carrier that maintains a specified A.M. Best minimum rating; or (ii) be an event of default under our Line of Credit.

Our standard lines Insurance Subsidiaries’ ratings by other major rating agencies are as follows:

S&P Insurance Rating Services - S&P cites our strong competitive position in Mid-Atlantic markets, effective use of well-developed predictive modeling and agency interface technology, strong financial flexibility, and strong capital adequacy in support of our “A” financial strength rating and outlook of stable.

Moody’s Investor Service – Our financial strength rating of “A2” and outlook of stable was reaffirmed in the first quarter of 2011. Moody’s cited our strong regional franchise with established independent agency support, along with good risk adjusted capitalization and moderate financial leverage. Their outlook reflects the expectation that we will continue to employ our technologically-based risk management process to identify and manage underperforming segments, while maintaining pricing discipline and reserve adequacy.

Fitch Ratings – Our “A+” rating and outlook of stable was reaffirmed in the second quarter of 2011, citing our disciplined underwriting culture, conservative balance sheet with very good capitalization and reserve strength, strong independent agency relationships, and improved diversification through our continued efforts to reduce our concentration in New Jersey.

Our S&P and Moody’s financial strength ratings affect our ability to access capital markets. There can be no assurance that our ratings will continue for any given period of time or that they will not be changed. It is possible that positive or negative ratings actions by one or more of the rating agencies may occur in the future.

Pending Accounting Pronouncements

In October 2010, the FASB issued ASU 2010-26, *Financial Services-Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts* (“ASU 2010-26”). This guidance requires that only costs that are incremental or directly related to the successful acquisition of new or renewal insurance contracts are to be capitalized as a deferred acquisition cost. This would include, among other items, sales commissions paid to agents, premium taxes, and the portion of employee salaries and benefits directly related to time spent on acquired contracts. We have adopted this guidance retrospectively on January 1, 2012, with a resulting \$51 million after-tax impact to stockholders’ equity.

For information regarding our adoption of ASU 2010-26 as well as restated financial statement information, see Note 3. “Adoption of Accounting Pronouncements” in Item 8. “Financial Statements and Supplementary Data.” of this Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Market Risk

The fair value of our assets and liabilities are subject to market risk, primarily interest rate, credit risk, and equity price risk related to our investment portfolio as well as fluctuations in the value of our alternative investment portfolio. Our investment portfolio is currently comprised of securities categorized as AFS and HTM. We do not hold derivative or commodity investments. Foreign investments are made on a limited basis, and all fixed maturity transactions are denominated in U.S. currency. We have minimal foreign currency fluctuation risk on certain equity securities and expenses.

Our investment philosophy includes setting certain return objectives relating to the equity and fixed maturity portfolios as well as risk objectives relating to the overall portfolio. Within the equity portfolio, the high dividend yield strategy, which we implemented in 2011, is designed to generate consistent dividend income while maintaining a minimal tracking error to the S&P 500 Index. Additional equity strategies are focused on meeting or exceeding strategy specific benchmarks of public equity indices. The primary return objective of our fixed maturity portfolio is to maximize after-tax investment yield and income while balancing risk. A secondary objective is to meet or exceed a weighted-average benchmark of public fixed income indices. Although yield and income generation remain the key drivers to our investment strategy, our overall philosophy is to invest with a long-term horizon along with a “buy-and-hold” principle. The return objective for other investments, which includes our alternative investments, is to meet or exceed the S&P 500 Index. The allocation of our portfolio was 88% fixed maturity securities, 4% equity securities, 5% short-term investments, and 3% other investments as of December 31, 2011.

We manage our investment portfolio to mitigate risks associated with various financial market scenarios. We will, however, take prudent risk to enhance our overall long-term results while managing a conservative, well-diversified investment portfolio to support our underwriting activities.

Interest Rate Risk

We invest in interest rate-sensitive securities, mainly fixed maturity securities. Our fixed maturity portfolio is comprised of primarily investment grade (investments receiving S&P or an equivalent rating of BBB- or above) corporate securities, U.S. government and agency securities, municipal obligations, and mortgage-backed securities. Our strategy to manage interest rate risk is to purchase intermediate-term fixed maturity investments that are attractively priced in relation to perceived credit risks. Our fixed maturity securities include both AFS and HTM securities. Fixed maturity securities that are not classified as either HTM securities or trading securities are classified as AFS securities and reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity. Those fixed maturity securities that we have the ability and positive intent to hold to maturity are classified as HTM and carried at either: (i) amortized cost; or (ii) market value at the date the

security was transferred into the HTM category, adjusted for subsequent amortization.

Our exposure to interest rate risk relates primarily to the market price and cash flow variability associated with changes in interest rates. A rise in interest rates may decrease the fair value of our existing fixed maturity investments and declines in interest rates may result in an increase in the fair value of our existing fixed maturity investments. However, new and reinvested money used to purchase fixed maturity securities would benefit from rising interest rates and would be negatively impacted by falling interest rates. We seek to mitigate our interest rate risk associated with holding fixed maturity investments by monitoring and maintaining the average duration of our portfolio with a view toward achieving an adequate after-tax return without subjecting the portfolio to an unreasonable level of interest rate risk. As our fixed income investment portfolio contains interest rate-sensitive instruments, it may be adversely affected by changes in interest rates resulting from governmental monetary policies, domestic and international economic and political conditions, and other factors beyond our control. During extended periods of suppressed interest rates, net investment income on our fixed maturity portfolio is pressured as higher-yielding securities are rolling over into lower-yielding replacements. In 2011, bonds that matured or were sold, valued at \$481.9 million, had yields that averaged 3.8%, pre-tax, while new purchases of \$490.8 million had an average yield of 2.7%. We expect this downward trend to continue into 2012, putting pressure on our ability to grow investment income.

The fixed maturity portfolio duration at December 31, 2011 was 3.2 years, excluding short-term investments, compared to 3.7 years a year ago. Given the state of municipal finances, we reduced our municipal exposure while increasing our allocation to corporate bonds. This, combined with some portfolio rebalancing, caused the slight decline in duration. The Insurance Subsidiaries' liability duration is approximately 3.8 years. We manage our liquidity with a laddered maturity structure and an appropriate level of short-term investments to avoid liquidation of AFS fixed maturities in the ordinary course of business.

We use interest rate sensitivity analysis to measure the potential loss or gain in future earnings, fair values, or cash flows of market sensitive fixed maturity securities. The sensitivity analysis hypothetically assumes an instant parallel 200 basis point shift in interest rates up and down in 100 basis point increments from the date of the Consolidated Financial Statements. We use fair values to measure the potential loss. This analysis is not intended to provide a precise forecast of the effect of changes in market interest rates and equity prices on our income or stockholders' equity. Further, the calculations do not take into account any actions we may take in response to market fluctuations.

The following table presents the sensitivity analysis of interest rate risk as of December 31, 2011:

(\$ in thousands)	2011 Interest Rate Shift in Basis Points				
	¹ -200	-100	0	100	200
<u>HTM fixed maturity securities</u>					
Fair value of HTM fixed maturity securities portfolio	\$779,809	776,422	758,043	733,581	708,093
Fair value change	21,766	18,379		(24,462)	(49,950)
Fair value change from base (%)	2.87	% 2.42	%	(3.23)%	(6.59)%
<u>AFS fixed maturity securities</u>					
Fair value of AFS fixed maturity securities portfolio	\$2,989,460	2,968,593	2,897,373	2,799,120	2,696,282
Fair value change	92,087	71,220		(98,253)	(201,091)
Fair value change from base (%)	3.18	% 2.46	%	(3.39)%	(6.94)%

¹Given the low interest rate environment, an interest rate decline of 200 basis points is deemed unreasonable for certain securities in our portfolio, as the decline would generate a zero or negative yield, therefore the interest rate decline for purposes of the sensitivity analysis is floored at one basis point for such securities.

Credit Risk

The financial markets were volatile in the second half of 2011 and are likely to remain so for the first half of 2012. We saw an increase in our overall investment portfolio, including a \$66.7 million increase in unrealized gains to \$149.6

million at December 31, 2011. We continue to closely monitor our \$1.3 billion municipal bond portfolio given the widely reported uncertainty about states and municipalities and the ability of such issuers to fulfill their obligations in light of ongoing budget constraints. The credit quality of our fixed maturity securities portfolio migrated to “AA-” in 2011, from “AA” in 2010. This slightly lower average rating is largely the result of: (i) the S&P downgrade of U.S. sovereign debt in August 2011; and (ii) our recent increased allocation to investment grade corporate bonds. Exposure to non-investment grade bonds represents only 1% of the total fixed maturity securities portfolio.

The following table summarizes the fair value, net unrealized gain (loss) balances, and the weighted average credit qualities of our AFS fixed maturity securities at December 31, 2011 and December 31, 2010:

(\$ in millions)	December 31, 2011			December 31, 2010

Other	17,192	AA	AA-
Total	\$ 677,972	AA-	A

To manage and mitigate exposure, we perform analyses on MBS both at the time of purchase and as part of the ongoing portfolio evaluation. This analysis includes review of average FICO® scores, loan-to-value ratios, geographic spread of the assets securing the bond, delinquencies in payments for the underlying mortgages, gains/losses on sales, evaluations of projected cash flows, as well as other information that aids in determination of the health of the underlying assets. We also consider the overall credit environment, economic conditions, total projected return on the investment, and overall asset allocation of the portfolio in our decisions to purchase or sell structured securities.

The following table details the top 10 state exposures of the municipal bond portion of our fixed maturity portfolio at December 31, 2011:

State Exposures of Municipal Bonds (\$ in thousands)	General Obligation		Special	Fair	Average
	Local	State	Revenue	Value	Credit Quality
Texas	\$85,479	1,101	55,930	142,510	AA+

There have recently been widely reported concerns regarding the stress on state and local governments emanating from declining revenues, large unfunded liabilities, and entrenched cost structures. Overall, we are comfortable with the quality, composition, and diversification of our \$1.3 billion municipal bond portfolio. In 2011, we did not reinvest proceeds of maturities and calls into this sector, and as a result, municipal bonds as a percentage of invested assets have declined to 31% from 36% a year ago. However, given some more recent positive signs for municipalities, in 2012 we intend to selectively add to our municipal bond portfolio to slightly extend the duration of our fixed maturity securities portfolio. Our municipal bond portfolio is very high quality with an average AA rating, and is laddered with 42% maturing within three years and another 40% maturing between three and five years. The weightings of the municipal bond portfolio are: 61% of high-quality revenue bonds that have dedicated revenue streams, 29% of local general obligation bonds, and 10% of state general obligation bonds. In addition, approximately 6% of the municipal bond portfolio has been refunded in advance. Our largest state exposure is to Texas, at 11%, excluding the impact of advanced refunded bonds. Of the \$85 million in local Texas general obligation bonds, \$41 million represents investments in Texas Permanent School Fund bonds, which are considered to be lower risk.

Special revenue fixed income securities of municipalities (referred to as “special revenue bonds”) generally do not have the “full faith and credit” backing of the municipal or state governments, as do general obligation bonds, but special revenue bonds have a dedicated revenue stream for repayment which can, in many instances, provide a higher quality credit profile than general obligation bonds. As such, we believe our special revenue bond portfolio is appropriate for the current environment.

The following table provides further quantitative details on our special revenue bonds:

December 31, 2011	Fair	% of Special	Average
	Value	Revenue	Rating
(\$ in thousands)		Bonds	
Essential Services:			
Water and sewer	\$158,262	21	AA
Transportation	152,906	21	AA-
Electric	102,111	14	AA-
Total essential services	413,279	56	AA
Education	127,672	17	AA
Special tax	96,905	13	AA-
Housing	54,934	7	AA+
Other:			
Leasing	12,205	2	AA-
Hospital	11,471	2	AA-
Other	24,938	3	A+
Total other	48,614	7	A+
Total special revenue bonds	\$741,404	100	AA

Essential Services

A large portion of our special revenue bond portfolio is, by design, invested in sectors that are conventionally deemed as “essential services” and thus are not considered cyclical in nature. The essential services category (as reflected in the above table) is comprised of transportation, water and sewer, and electric.

Education

The education portion of the portfolio includes school districts and higher education, including state-wide university systems.

Special Tax

This group includes special revenue bonds with a wide range of attributes. However, similar to other revenue bonds, these are backed by a dedicated lien on a tax or other revenue repayment source.

Housing

Despite the turmoil in the housing sector, these bonds continue to be highly rated, much of it with the support of U.S. housing agencies. The need for affordable housing continues to grow, especially in light of current delinquencies and defaults, and as such, political support for these programs remains high. These attributes, when combined, tend to mute this sector’s cyclical nature.

Based on the above attributes, we remain confident in the collectability of our special revenue bond portfolio and have not acquired any bond insurance in the secondary market covering any of our special revenue bonds.

We continue to evaluate underlying credit quality within this portfolio and as long-term, income-oriented investors, we remain comfortable with the credit risk in these securities.

European Sovereign Debt Crisis

Uncertainty about the ability of sovereign issuers to fully repay their debt triggered significant turbulence in global financial markets in 2011. The sovereign debt crisis has been particularly concentrated in the Eurozone and a number of member countries were downgraded. The crisis has placed strains on the stability of the currency as the European Central Bank struggled to supply liquidity to member nations and their banks. As of December 31, 2011, we had no direct exposure to Italy, Greece, or Portugal, three of the more economically troubled nations in the Eurozone. We do

not own any derivative exposures such as credit default swaps. Our Eurozone exposure is listed in the table below:

December 31, 2011

(\$ in millions)	Corporate Securities	Government Securities	Equity Securities	Total Exposure
Country:				
Netherlands	\$ 20.8	-	-	20.8
Germany	5.1	9.5	-	14.6
France	12.2	-	-	12.2
Luxembourg	7.7	-	-	7.7
Spain	4.5	-	-	4.5
Finland	-	3.0	-	3.0
Ireland	-	-	1.1	1.1
Total	\$ 50.3	12.5	1.1	63.9

Of the \$50.3 million in Eurozone corporate securities, \$30.9 million is in the banking and financial sector. Outside of the effect foreign currency exchange rates have on the underlying investments, we have minimal exposure to Euro depreciation/appreciation.

In addition to exposure in our investment portfolio, the European sovereign debt crisis may adversely impact some of our reinsurers, exposing us to counterparty credit risk. Some of the world's largest reinsurers are domiciled in Europe, and due to the global nature of reinsurance, many write business and invest in various currencies and countries. We seek to diversify our reinsurance relationships with highly rated, well established reinsurers. Our Insurance Subsidiaries remain liable to policyholders to the extent that the reinsurer becomes unable to meet their contractual obligations. The following table represents our largest unsecured reinsurance balances, excluding federal and state operated reinsurance pools, as of December 31, 2011:

(\$ in thousands)	Reinsurance
Reinsurer Name (Country of Parent's domicile; Rating)	Balances
Hannover Ruckversicherungs AG (Germany; A.M. Best rated "A")	\$ 50,636
Munich Re Group (Germany; A.M. Best rated "A+")	34,902
Swiss Re Group (Switzerland; A.M. Best rated "A+")	28,634
AXIS Reinsurance Company (Bermuda; A.M. Best rated "A")	26,172
Partner Reinsurance Company of the U.S. (Bermuda; A.M. Best rated "A+")	19,105
All other reinsurers	62,714
Total	\$ 222,163

Equity Price Risk

Our equity securities are classified as AFS. Our equity securities portfolio is exposed to equity price risk arising from potential volatility in equity market prices. We attempt to minimize the exposure to equity price risk by maintaining a diversified portfolio and limiting concentrations in any one company or industry. The following table presents the hypothetical increases and decreases in 10% increments in market value of the equity portfolio as of December 31, 2011:

(\$ in thousands)	Change in Equity Values in Percent						
	-30%	-20%	-10%	0%	10%	20%	30%
Fair value of AFS equity portfolio	\$ 110,148	125,884	141,619	157,355	173,091	188,826	204,562
Fair value change	(47,207)	(31,471)	(15,736)		15,736	31,471	47,207

In addition to our equity securities, we invest in certain other investments that are also subject to price risk. Our other investments include alternative investments in private limited partnerships that invest in various strategies such as private equity, mezzanine debt, distressed debt, and real estate. As of December 31, 2011, these types of investments represented 3% of our total invested assets and 12% of our stockholders' equity. These investments are subject to the risks arising from the fact that the determination of their value is inherently subjective. The general partner of each of

these partnerships usually reports the change in the value of the interests in the partnership on a one quarter lag because of the nature of the underlying assets or liabilities. Since these partnerships' underlying investments consist primarily of assets or liabilities for which there are no quoted prices in active markets for the same or similar assets, the valuation of interests in these partnerships are subject to a higher level of subjectivity and unobservable inputs than substantially all of our other investments. Each of these general partners is required to determine fair value by the price obtainable for the sale of the interest at the time of determination. Valuations based on unobservable inputs are subject to greater scrutiny and reconsideration from one reporting period to the next and therefore, the changes in the fair value of these investments may be subject to significant fluctuations, which could lead to significant decreases in their fair value from one reporting period to the next. As we record our investments in these various partnerships under the equity method of accounting, any decreases in the valuation of these investments would negatively impact our results of operations.

For additional information regarding these alternative investment strategies, see Note 5, "Investments" in Item 8. "Financial Statements and Supplementary Data." of this Form 10-K.

Indebtedness

(a) Long-Term Debt.

As of December 31, 2011, the Parent had outstanding long-term debt of \$307.4 million that matures as shown in the following table:

(\$ in thousands)	Year of Maturity	2011	
		Carrying Amount	Fair Value
Financial liabilities			
Notes payable			
7.25% Senior Notes	2034	\$49,908	\$51,111
6.70% Senior Notes	2035	99,452	113,195
7.50% Junior Notes	2066	100,000	100,360
2.90% borrowings from FHLBI	2014	13,000	13,759
1.25% borrowings from FHLBI	2016	45,000	44,629
Total notes payable		\$307,360	\$323,054

The weighted average effective interest rate for the Parent's outstanding long-term debt is 6.12%. The Parent is not exposed to material changes in interest rates because the interest rates are fixed on its long-term indebtedness.

(b) Short-Term Debt.

The Parent has a \$30 million line of credit that is syndicated between Wachovia Bank, National Association, a subsidiary of Wells Fargo & Company, as administrative agent, and Branch Banking and Trust Company (BB&T). The terms of this agreement allow us to increase our borrowings to \$50 million with the approval of both lending parties. We monitor current news regarding the banking industry in general, and our lending partners in particular, as, according to the syndicated line of credit agreement, the obligations of the lenders to make loans and to make payments are several and not joint. The Parent did not access the facility during 2011 and, as such, at December 31, 2011, no balances were outstanding.

Item 8. Financial Statements and Supplementary Data.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Selective Insurance Group, Inc.:

We have audited the accompanying consolidated balance sheets of Selective Insurance Group, Inc. and its subsidiaries (the "Company") as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedules I to V. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Selective Insurance Group, Inc. and its subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Selective Insurance Group, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 24, 2012 expressed

an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Notes to Consolidated Financial Statements

December 31, 2011, 2010, and 2009

Note 1. Organization

Selective Insurance Group, Inc., through its subsidiaries, (collectively referred to as “we,” “us,” or “our”) offers standard and excess and surplus lines (“E&S”) property and casualty insurance products. Selective Insurance Group, Inc. (referred to as the “Parent”) was incorporated in New Jersey in 1977 and its main offices are located in Branchville, New Jersey. The Parent’s common stock is publicly traded on the NASDAQ Global Select Market under the symbol “SIGI.” We have provided a glossary of terms as Exhibit 99.1 to this Form 10-K, which defines certain industry-specific and other terms that are used in this Form 10-K.

In August 2011, we purchased the renewal rights to an E&S book of business and, effective as of December 31, 2011, we purchased Montpelier U.S. Insurance Company (“MUSIC”) which is now our eighth insurance subsidiary. Our eight insurance subsidiaries are collectively referred to as the “Insurance Subsidiaries”. MUSIC, an E&S carrier, is authorized to write business in all 50 states and the District of Columbia, and provides us with a nationally-licensed platform to write contract binding authority E&S business.

We classify our business into two operating segments:

- Insurance Operations, which sells property and casualty insurance products and services in both the standard and E&S markets; and
- Investments, which invests the premiums collected by our insurance operations.

Note 2. Summary of Significant Accounting Policies

(a) Principles of Consolidation

The accompanying consolidated financial statements ("Financial Statements") include the accounts we have prepared in conformity with: (i) U.S. generally accepted accounting principles ("GAAP"); and (ii) the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). All significant intercompany accounts and transactions are eliminated in consolidation.

(b) Use of Estimates

The preparation of our Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported financial statement balances, as well as the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

(c) Reclassifications

Certain amounts in our prior years' consolidated financial statements and related notes have been reclassified to conform to the 2011 presentation. Such reclassifications had no effect on our net income, stockholders' equity, or cash flows.

(d) Investments

Fixed maturity securities may include bonds, redeemable preferred stocks, and mortgage-backed securities ("MBS") and asset-backed securities ("ABS"). Fixed maturity securities classified as available-for-sale ("AFS") are reported at fair value. Those fixed maturity securities that we have the ability and positive intent to hold to maturity are classified as held-to-maturity ("HTM") and are carried at either: (i) amortized cost; or (ii) market value at the date of transfer into the HTM category, adjusted for subsequent amortization. The amortized cost of fixed maturity securities is adjusted for amortization of premiums and accretion of discounts over the expected life of the security using the effective yield method. Premiums and discounts arising from the purchase of MBS are amortized over the expected life of the security based on future principal payments, and considering prepayments. These prepayments are estimated based upon historical and projected cash flows. Prepayment assumptions are reviewed quarterly and adjusted to reflect actual prepayments and changes in expectations. Future amortization of any premium and/or discount is also adjusted to reflect the revised assumptions. Interest income, as well as amortization and accretion, is included in "Net investment income earned" on our Consolidated Statements of Income. The carrying value of fixed maturity securities is written down to fair value when a decline in value is considered to be other than temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments. Unrealized gains and losses on fixed maturity securities classified as AFS, net of tax, are included in accumulated other comprehensive income (loss) ("AOCI").

Equity securities, which are classified as AFS, may include common stocks and non-redeemable preferred stocks, and are carried at fair value. Dividend income on these securities is included in "Net investment income earned." The associated unrealized gains and losses, net of tax are included in AOCI. The cost of equity securities is written down to fair value when a decline in value is considered to be other than temporary. See the discussion below on realized investment gains and losses for a description of the accounting for impairments.

Short-term investments may include certain money market instruments, savings accounts, commercial paper, and other debt issues purchased with a maturity of less than one year. These investments are carried at cost, which approximates fair value. The associated income is included in "Net investment income earned."

Other investments may include alternative investments and other miscellaneous securities. Alternative investments are accounted for using the equity method. Our share of distributed and undistributed net income from alternative investments is included in "Net investment income earned." Investments in other miscellaneous securities are either accounted for under the equity method or the effective yield method of accounting. Our share of distributed and undistributed net income is included in "Net investment income earned."

Realized gains and losses on the sale of investments are determined on the basis of the cost of the specific investments sold and are credited or charged to income. Also included in realized gains and losses are the other-than-temporary impairment ("OTTI") charges recognized in earnings, which are discussed below.

When the fair value of any investment is lower than its cost/amortized cost, an assessment is made to determine if the decline is other than temporary. We regularly review our entire investment portfolio for declines in fair value. If we believe that a decline in the value of an AFS security is temporary, we record the decline as an unrealized loss in AOCI. Temporary declines in the value of an HTM security are not recognized in the consolidated financial statements. Our assessment of a decline in fair value includes judgment as to the financial position and future prospects of the entity that issued the investment security, as well as a review of the security's underlying collateral for fixed maturity investments. Broad changes in the overall market or interest rate environment generally will not lead to a write-down.

Fixed Maturity Securities and Short-Term Investments

Our evaluation for OTTI of a fixed maturity security or a short-term investment may include, but is not limited to, the evaluation of the following factors:

- Whether the decline appears to be issuer or industry specific;
- The degree to which the issuer is current or in arrears in making principal and interest payments on the fixed maturity security;
- The issuer's current financial condition and ability to make future scheduled principal and interest payments on a timely basis;
- Evaluations of projected cash flows;
- Buy/hold/sell recommendations published by outside investment advisors and analysts; and
- Relevant rating history, analysis, and guidance provided by rating agencies and analysts.

OTTI charges are recognized as a realized loss to the extent that they are credit related, unless we have the intent to sell the security or it is more-likely-than not that we will be required to sell the security. In those circumstances, the security is written down to fair value with the entire amount of the writedown charged to earnings as a component of realized losses.

To determine if an impairment is other than temporary, discounted cash flow analyses ("DCF") are performed on all fixed maturity securities meeting certain criteria. In addition, DCFs are performed on all previously-impaired debt securities that continue to be held by us and all structured securities that were not of high-credit quality at the date of purchase. These impairment assessments include, but are not limited to, the following security types: commercial mortgage-backed securities ("CMBS"); residential mortgage-backed securities ("RMBS"); ABS; collateralized debt obligations ("CDOs"); and corporate fixed maturity securities.

For structured securities, including CMBS, RMBS, ABS, and CDOs, we also consider variables such as expected default, severity, and prepayment assumptions based on security type and vintage, taking into consideration information from credit agencies, historical performance, and other relevant economic and performance factors.

In performing our assessment, we perform a DCF analysis to determine the present value of future cash flows to be generated by the underlying collateral of the security. Any shortfall in the expected present value of the future cash flows from the amortized cost basis of a security is considered a "credit impairment," with the remaining decline to fair value considered a "non-credit impairment." As mentioned above, credit impairments are charged to earnings as a component of realized losses, while non-credit impairments are recorded to other comprehensive income ("OCI") as a component of unrealized losses.

Discounted Cash Flow Assumptions

The discount rate we use in this present value calculation is the effective interest rate implicit in the security at the date of acquisition for those structured securities that were not of high-credit quality at acquisition. For all other securities, we use a discount rate that equals the current yield, excluding the impact of previous OTTI charges, used to accrete the beneficial interest.

If applicable, we use a conditional default rate assumption in the present value calculation to estimate future defaults. The conditional default rate is the proportion of all loans outstanding in a security at the beginning of a time period that is expected to default during that period. Our assumption of this rate takes into consideration the uncertainty of future defaults as well as whether or not these securities have experienced significant cumulative losses or delinquencies to date.

If applicable, conditional default rate assumptions apply at the total collateral pool level held in the securitization trust. Generally, collateral conditional default rates will “ramp-up” over time as the collateral seasons, the performance begins to weaken, and losses begin to surface. As time passes, depending on the collateral type and vintage, losses will peak and performance will begin to improve as weaker borrowers are removed from the pool through delinquency resolutions. In the later years of a collateral pool’s life, performance is generally materially better as the resulting favorable selection of the portfolio improves the overall quality and performance.

For CMBS, we may also consider the net operating income (“NOI”) generated by the underlying properties. Our assumptions of the properties’ ultimate cash flows take into consideration both an immediate reduction to the reported NOIs and decreases to projected NOIs.

If applicable, we also use a loan loss severity assumption in our DCF that is applied at the loan level of the collateral pool. The loan loss severity assumption represents the estimated percentage loss on the loan-to-value exposure for a particular security. For CMBS, the loan loss severities applied are based on property type. Losses generated from the evaluations are then applied to the entire underlying deal structure in accordance with the original service agreements.

Equity Securities

Evaluation for OTTI of an equity security may include, but is not limited to, the evaluation of the following factors:

- Whether the decline appears to be issuer or industry specific;
- The relationship of market prices per share to book value per share at the date of acquisition and date of evaluation;
 - The price-earnings ratio at the time of acquisition and date of evaluation;
 - The financial condition and near-term prospects of the issuer, including any specific events that may influence the issuer's operations, coupled with our intention to hold the securities in the near-term;
 - The recent income or loss of the issuer;
 - The independent auditors' report on the issuer's recent financial statements;
 - The dividend policy of the issuer at the date of acquisition and the date of evaluation;
 - Buy/hold/sell recommendations or price projections published by outside investment advisors;
 - Rating agency announcements;
- The length of time and the extent to which the fair value has been, or is expected to be, less than its cost in the near term; and
 - Our expectation of when the cost of the security will be recovered.

If there is a decline in the fair value on an equity security that we do not intend to hold, or if we determine the decline is other-than-temporary, including declines driven by market volatility for which we cannot assert will recover in the near term, we will write down the carrying value of the investment and record the charge through earnings as a component of realized losses.

Other Investments

Our evaluation for OTTI of an other investment (i.e., an alternative investment) may include, but is not limited to, conversations with the management of the alternative investment concerning the following:

- The current investment strategy;
- Changes made or future changes to be made to the investment strategy;
- Emerging issues that may affect the success of the strategy; and
- The appropriateness of the valuation methodology used regarding the underlying investments.

If there is a decline in fair value on an other investment that we do not intend to hold, or if we determine the decline is other than temporary, we write down the cost of the investment and record the charge through earnings as a component of realized losses.

(e) Fair Values of Financial Instruments

Assets

The fair values of our investments are generated using various valuation techniques and are placed into the fair value hierarchy considering the following: (i) the highest priority is given to quoted prices in active markets for identical assets (Level 1); (ii) the next highest priority is given to quoted prices in markets that are not active or inputs that are observable either directly or indirectly, including quoted prices for similar assets in markets that are not active and other inputs that can be derived principally from, or corroborated by, observable market data for substantially the full term of the assets (Level 2); and (iii) the lowest priority is given to unobservable inputs supported by little or no market activity and that reflect our assumptions about the exit price, including assumptions that market participants would use in pricing the asset (Level 3). An asset's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. Transfers between levels in the fair value hierarchy are recognized at the end of the reporting period.

The techniques used to value our investment portfolio are as follows:

For valuations of securities in our equity portfolio and U.S. Treasury notes held in our fixed maturity portfolio, we receive prices from an independent pricing service that are based on observable market transactions. We validate these prices against a second external pricing service and if established market value comparison thresholds are breached, in conjunction with our external investment managers, further analysis is performed to determine the price to be used. These securities are classified as Level 1 in the fair value hierarchy.

For approximately 95% of our fixed maturity portfolio, we utilize a market approach, using primarily matrix pricing models prepared by external pricing services. Matrix pricing models use mathematical techniques to value debt securities by relying on the securities relationship to other benchmark quoted securities, and not relying exclusively on quoted prices for specific securities, as the specific securities are not always frequently traded. As a matter of policy, we consistently use one pricing service as our primary source and secondary pricing services if prices are not available from the primary pricing service. In conjunction with our external investment portfolio managers, fixed maturity portfolio pricing is reviewed for reasonableness in the following ways: (i) comparing positions traded directly by the external investment portfolio managers to prices received from the third-party pricing services; (ii) comparing the primary vendor pricing to other third-party pricing services as well as benchmark indexed pricing; (iii) comparing market value fluctuations between months for reasonableness; and (iv) reviewing stale prices. If further analysis is needed, a challenge is sent to the primary pricing service for review and confirmation of the price. In addition to the tests described above, management also selects a sample of prices for a comparison to a secondary price source. Historically, we have not experienced significant variances in prices, and therefore, we have consistently used our primary pricing service. These prices are typically Level 2 in the fair value hierarchy.

For the small portion of our fixed maturity portfolio that we cannot price using our primary service, we use non-binding broker quotes. These prices, which we review for reasonableness, are generally classified as Level 3 in the fair value hierarchy as the inputs cannot be corroborated by observable market data.

Short-term investments are carried at cost, which approximates fair value. Given the liquid nature of our short-term investments, we generally validate their fair value by way of active trades within approximately a week of the financial statement close. These securities are classified as Level 1 in the fair value hierarchy.

Our investments in other miscellaneous securities are generally accounted for under the equity method or at fair value based on net asset value and included in Level 2 in the fair value hierarchy. Investments in tax credits are carried under the effective yield method of accounting.

The fair value of the receivable for proceeds related to the sale of our Selective HR Solutions operations (“Selective HR”) is estimated using a DCF, which includes our judgment regarding future worksite life generation and retention assumptions. This receivable is classified as Level 3 in the fair value hierarchy.

Liabilities

The techniques used to value our notes payable are as follows:

The fair values of the 7.25% Senior Notes due November 15, 2034, the 6.70% Senior Notes due November 1, 2035, and the 7.50% Junior Subordinated Notes due September 27, 2066, are based on quoted market prices.

The fair value of the 2.90% and 1.25% borrowings from the Federal Home Loan Bank of Indianapolis (“FHLBI”) are estimated using a DCF based on a current borrowing rate provided by the FHLBI consistent with the remaining term of the borrowing.

See Note 7. “Fair Value Measurements” for a summary table of the fair value and related carrying amounts of financial instruments.

(f) Allowance for Doubtful Accounts

We estimate an allowance for doubtful accounts on our premiums receivable. This allowance is based on historical write-off percentages adjusted for the effects of current and anticipated trends. An account is charged off when we believe it is probable that we will not collect a receivable. In making this determination, we consider information obtained from our efforts to collect amounts due directly and/or through collection agencies.

(g) Share-Based Compensation

Share-based compensation consists of all share-based payment transactions in which an entity acquires goods or services by issuing (or offering to issue) its shares, share units, share options, or other equity instruments. The cost resulting from all share-based payment transactions are recognized in the consolidated financial statements based on the fair value of both equity and liability awards. The fair value is measured at grant date for equity awards, whereas the fair value for liability awards are remeasured at each reporting period. Both the fair value of equity and liability awards is recognized over the requisite service period. The requisite service period is typically the lesser of the vesting period or the period of time from the grant date to the date of retirement eligibility. The expense recognized for share-based awards, which, in some cases, contain performance criteria, is based on the number of shares or units expected to be issued at the end of the performance period.

(h) Reinsurance

Reinsurance recoverables represent estimates of amounts that will be recovered from reinsurers under our various treaties. Generally, amounts recoverable from reinsurers are recognized as assets at the same time and in a manner consistent with the paid and unpaid losses associated with the reinsured policies. An allowance for estimated uncollectible reinsurance is recorded based on an evaluation of balances due from reinsurers and other available information. We charge off reinsurance recoverables on paid losses when it becomes probable that we will not collect the balance.

(i) Property and Equipment

Property and equipment used in operations, including certain costs incurred to develop or obtain computer software for internal use, are capitalized and carried at cost less accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. The following estimated useful lives can be considered as general guidelines:

Asset Category	Years
Computer hardware	3
Computer software	3 to 5
Internally developed software	5
Furniture and fixtures	10
Buildings and improvements	5 to 40

(j) Deferred Policy Acquisition Costs

Policy acquisition costs directly related to the writing of insurance policies are deferred and amortized over the life of the policies. These costs include labor costs; commissions; premium taxes and assessments; board, bureau and association fees; travel; and other underwriting expenses incurred in the acquisition of premium. Deferred policy acquisition costs are limited to the sum of unearned premiums and anticipated investment income less anticipated losses and loss expenses, policyholder dividends and other expenses for maintenance of policies in force. See the "Adoption of Accounting Pronouncements" note below for details regarding updated accounting literature on the accounting for deferred policy acquisition costs that we will implement in 2012.

We regularly conduct reviews for potential premium deficiencies at a level consistent with that used for our segment reporting. We group our policies at the Insurance Operations level, considering the following:

Our marketing efforts for all of our product lines within our Insurance Operations revolve around independent agencies and their touch points with our shared customers, the policyholders.

We service our agency distribution channel through our field model, which includes agency management specialists, safety management specialists, claim management specialists, and our Underwriting and Claims Service Centers, all of which service the entire population of insurance contracts acquired through each agency.

We measure the profitability of our business at the Insurance Operations level, which is evident in, among other items, the structure of our incentive compensation programs. We measure the profitability of our agents and calculate their compensation based on overall insurance results and all of our employees, including senior management, are incented based on overall insurance results.

There were no premium deficiencies for any of the reported years, as the sum of the anticipated losses and loss expenses, policyholder dividends, and other expenses for our Insurance Operations segment did not exceed the related unearned premium and anticipated investment income. The investment yields assumed in the premium deficiency assessment for each reporting period, which are based on our actual average investment yield before tax as of the calculation date on September 30, were 4.0% for 2011, 3.6% for 2010, and 2.9% for 2009. Deferred policy acquisition costs amortized to expense were \$430.8 million for 2011, \$429.5 million for 2010, and \$428.6 million for 2009.

(k) Goodwill

Goodwill results from business acquisitions where the cost of assets and liabilities acquired exceeds the fair value of those assets and liabilities. Goodwill is tested for impairment annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. Goodwill is allocated to the reporting units for the purposes of the impairment test, if applicable.

(l) Reserves for Losses and Loss Expenses

Reserves for losses and loss expenses are comprised of both case reserves and reserves for claims incurred but not yet reported ("IBNR"). Case reserves result from claims that have been reported to our Insurance Subsidiaries and are

estimated for the amount of ultimate payment. IBNR reserves are established based on generally accepted actuarial techniques. Such techniques assume that past experience, adjusted for the effects of current developments and anticipated trends, are an appropriate basis for predicting future events. In applying generally accepted actuarial techniques, we also consider a range of possible loss and loss adjustment expense reserves in establishing IBNR.

The internal assumptions considered by us in the estimation of the IBNR amounts for both environmental and non-environmental reserves at our reporting dates are based on: (i) an analysis of both paid and incurred loss and loss expense development trends; (ii) an analysis of both paid and incurred claim count development trends; (iii) the exposure estimates for reported claims; (iv) recent development on exposure estimates with respect to individual large claims and the aggregate of all claims; (v) the rate at which new environmental claims are being reported; and (vi) patterns of events observed by claims personnel or reported to them by defense counsel. External factors identified by us in the estimation of IBNR for both environmental and non-environmental IBNR reserves include: (i) legislative enactments; (ii) judicial decisions; (iii) legal developments in the determination of liability and the imposition of damages; and (iv) trends in general economic conditions, including the effects of inflation. Adjustments to IBNR are made periodically to take into account changes in the volume of business written, claims frequency and severity, the mix of business, claims processing, and other items that are expected by management to affect our reserves for losses and loss expenses over time.

By using both individual estimates of reported claims and generally accepted actuarial reserving techniques, we estimate the ultimate net liability for losses and loss expenses. While the ultimate actual liability may be higher or lower than reserves established, we believe the reserves make a reasonable provision, in the aggregate, for all unpaid loss and loss adjustment expenses incurred. Any changes in the liability estimate may be material to the results of operations in future periods. We do not discount to present value that portion of our loss reserves expected to be paid in future periods; however, our loss reserves include anticipated recoveries for salvage and subrogation claims.

Overall reserves are reviewed for adequacy on a periodic basis. As part of the periodic review, we consider the range of possible loss and loss expense reserves, determined at the beginning of the year. This process assumes that past experience, adjusted for the effects of current developments and anticipated trends, is an appropriate basis for predicting future events. However, there is no precise method for subsequently evaluating the impact of any specific factor on the adequacy of reserves because the eventual deficiency or redundancy is affected by many factors. Based upon such reviews, we believe that the estimated reserves for losses and loss expenses make a reasonable provision to cover the ultimate cost of claims. However, the ultimate actual liability may be higher or lower than the reserve established. The changes in these estimates, resulting from the continuous review process and the differences between estimates and ultimate payments, are reflected in the consolidated statements of income for the period in which such estimates are changed and may be material to the results of operations in future periods.

(m) Revenue Recognition

The Insurance Subsidiaries' net premiums written include direct insurance policy writings plus reinsurance assumed and estimates of premiums earned but unbilled on the workers compensation and general liability lines of insurance, less reinsurance ceded. The estimated premium on the workers compensation and general liability lines is referred to as audit premium. We estimate this premium, as it is anticipated to be either billed or returned on policies subsequent to expiration based on exposure levels (i.e. payroll or sales). Audit premium is based on historical trends adjusted for the uncertainty of future economic conditions. Further economic instability could ultimately impact our estimates and assumptions, and changes in our estimate may be material to the results of operations in future periods. Premiums written are recognized as revenue over the period that coverage is provided using the semi-monthly pro-rata method. Unearned premiums and prepaid reinsurance premiums represent that portion of premiums written that are applicable to the unexpired terms of policies in force.

(n) Dividends to Policyholders

We establish reserves for dividends to policyholders on certain policies, most significantly workers compensation policies. These dividends are based on the policyholders' loss experience. The dividend reserves are established based on past experience, adjusted for the effects of current developments and anticipated trends. The expense for these dividends is recognized over a period that begins at policy inception and ends with the payment of the dividend. We do not issue policies that entitle the policyholder to participate in the earnings or surplus of the Insurance Subsidiaries.

(o) Federal Income Tax

We use the asset and liability method of accounting for income taxes. Current federal income taxes are recognized for the estimated taxes payable or refundable on tax returns for the current year. Deferred federal income taxes arise from the recognition of temporary differences between financial statement carrying amounts and the tax basis of assets and liabilities. A valuation allowance is established when it is more likely than not that some portion of the deferred tax asset will not be realized. A liability for uncertain tax positions is recorded when it is more likely than not that a tax position will not be sustained upon examination by taxing authorities. The effect of a change in tax rates is recognized in the period of enactment.

(p) Leases

We have various operating leases for office space and equipment. Rental expense for such leases is recorded on a straight-line basis over the lease term. If a lease has a fixed and determinable escalation clause, or periods of rent holidays, the difference between rental expense and rent paid is included in "Other liabilities" as deferred rent in the Consolidated Balance Sheets.

(q) Pension

Our pension and post-retirement life benefit obligations and related costs are calculated using actuarial methods, within the framework of U.S. GAAP. Two key assumptions, the discount rate and the expected return on plan assets, are important elements of expense and/or liability measurement. We evaluate these key assumptions annually. Other assumptions involve demographic factors such as retirement age, mortality, turnover, and rate of compensation increases. The discount rate enables us to state expected future cash flows at their present value on the measurement date. The purpose of the discount rate is to determine the interest rates inherent in the price at which pension benefits could be effectively settled. Our discount rate selection is based on high-quality, long-term corporate bonds. To determine the expected long-term rate of return on the plan assets, we consider the current and expected asset allocation, as well as historical and expected returns on each plan asset class.

Note 3. Adoption of Accounting Pronouncements

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures (Topic 820 – Improving Disclosures about Fair Value Measurements* (“ASU 2010-06”). This guidance requires: (i) separate disclosure of significant transfers between Level 1 and Level 2 of the fair value hierarchy and reasons for the transfers; (ii) disclosure, on a gross basis, of purchases, sales, issuances, and net settlements within Level 3 of the fair value hierarchy; (iii) disclosures by class of assets and liabilities; and (iv) a description of the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. ASU 2010-06 was effective for reporting periods beginning after December 15, 2009, except for the Level 3 disclosure requirements, which was effective for fiscal years beginning after December 15, 2010 and interim periods within those fiscal years. We have included the disclosures required by this guidance in our notes to the consolidated financial statements, where appropriate.

In December 2010, the FASB issued ASU 2010-28 *Intangibles – Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts*. This guidance modifies Step 1 of the goodwill impairment test, which assesses whether the carrying amount of a reporting unit exceeds its fair value, for reporting units with zero or negative carrying amounts. It requires that an entity perform Step 2 of the goodwill impairment test, which determines if goodwill has been impaired and measures the amount of impairment, if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider the qualitative factors within existing guidance that would require goodwill of a reporting unit to be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. This guidance was effective for interim and annual periods beginning after December 15, 2010 and did not impact our financial condition or results of operations.

In December 2010, the FASB issued ASU 2010-29 *Business Combinations (Topic 805) Disclosure of Supplementary Pro Forma Information for Business Combinations* (“ASU 2010-29”). This guidance relates to disclosure of pro forma information for business combinations that have occurred in the current reporting period. It requires that an entity presenting comparative financial statements include revenue and earnings of the combined entity as though the combination had occurred as of the beginning of the comparable prior annual period only. ASU 2010-29 was effective

prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010, and we have included the disclosures applicable to us in this Form 10-K.

Pronouncements to be effective in the future

In October 2010, the FASB issued ASU 2010-26, *Financial Services-Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts* (“ASU 2010-26”). ASU 2010-26 requires that only costs that are incremental or directly related to the successful acquisition of new or renewal insurance contracts are to be capitalized as a deferred acquisition cost. This would include, among other items, sales commissions paid to agents, premium taxes, and the portion of employee salaries and benefits directly related to time spent on acquired contracts. We have adopted this guidance, with retrospective application, on January 1, 2012. We anticipate an after-tax impact on stockholders’ equity of approximately \$51 million. Restated financial statement information will be presented beginning with our first quarter 2012 Form 10-Q. The following tables provide select restated financial information as it is expected to appear:

Balance Sheet Information**December 31,**

(\$ in thousands, except per share amounts)	2011		2010	
	As reported	As restated	As reported	As restated
Deferred policy acquisition costs	\$214,069	135,761	209,627	127,984
Total assets	5,736,369	5,685,469	5,231,772	5,178,704
Stockholders’ equity	1,109,228	1,058,328	1,071,109	1,018,041
Book value per share	20.39	19.45	19.95	18.97

Income Statement Information**December 31,**

(\$ in thousands, except per share amounts)	2011		2010		2009	
	As reported	As restated	As reported	As restated	As reported	As restated
Underwriting (loss) profit	\$(106,919)	(103,584)	(22,167)	(19,974)	2,385	2,111
Net income	19,865	22,033	65,541	66,966	36,398	36,220
Combined ratio	107.4	107.2	% 101.6	101.4	99.8	99.9
Net income per share:						
Basic	\$0.37	0.41	1.23	1.26	0.69	0.69
Diluted	0.36	0.40	1.20	1.23	0.68	0.68

The improvement in the restated per share amounts reflect the decrease in the statutory expense ratio over the last several years.

In May 2011, the FASB issued ASU 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs* (“ASU 2011-04”). This guidance changes the wording used to describe the requirements in U.S. GAAP for measuring fair value and disclosing information about fair value measurements to improve consistency in the application and description of fair value between GAAP and International Financial Reporting Standards. ASU 2011-04 clarifies that the concepts of highest and best use and valuation premise in a fair value measurement are relevant only when measuring the fair value of nonfinancial assets, and are not relevant when measuring the fair value of financial assets or liabilities. In addition, ASU 2011-04 expands the disclosures for unobservable inputs for Level 3 fair value measurements, requiring quantitative information to be disclosed related to: (i) the valuation processes used; (ii) the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs; and (iii) the use of a nonfinancial asset in a way that differs from the asset’s highest and best use. ASU 2011-04 is effective prospectively for interim and annual periods beginning after December 15, 2011. The adoption of this guidance is not expected to have a material impact on our financial condition, results of operations, or current disclosures.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income* (“ASU 2011-05”). ASU 2011-05 requires that all nonowner changes in stockholders’ equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 originally required financial statement presentation of reclassification adjustments for items that are reclassified from OCI. This guidance, which only changes financial statement presentation, is effective, on a retrospective basis, for interim and annual periods beginning after December 15, 2011. In December 2011, the FASB postponed the required financial statement presentation of reclassification adjustments and, as a result, issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. This update defers the specific requirement to present items that are reclassified from accumulated other comprehensive income to net income separately with their respective components of net income and other comprehensive income.

In September 2011, the FASB issued ASU 2011-08, *Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which simplifies the requirements to test goodwill for impairment. This guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing events and circumstances, an entity determines that it is not more likely than not that the fair value of the reporting unit is less than the carrying amount, then performing the two-step impairment test is unnecessary. However, if the entity concludes otherwise, then it is required to perform the quantitative impairment test. This guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, and early adoption is permitted. The adoption of this guidance is not expected to have a material impact on our financial condition, results of operations, or current disclosures.

Note 4. Statements of Cash Flow

Cash paid or received during the year for interest and federal income taxes was as follows for the years ended December 31, 2011, 2010, and 2009:

(\$ in thousands)	2011	2010	2009
Cash paid (received) during the period for:			
Interest	\$ 18,207	18,753	19,462
Federal income tax	(10,963)	(2,781)	(1,000)

Note 5. Investments

(a) Net unrealized gains on investments included in OCI by asset class were as follows for the years ended December 31, 2011, 2010, and 2009:

(\$ in thousands)	2011	2010	2009
-------------------	-------------	------	------

AFS securities:			
Fixed maturity securities	\$130,517	56,754	19,413
Equity securities	13,529	11,597	15,874

U.S. government and government agencies	\$93,411	4,695	98,106	5,023	-) 103,129
Foreign government	5,292	368	5,660	-	(30)) 5,630
Obligations of states and political subdivisions	874,388	22,183	896,571	16,845	(1,132)) 912,284
Corporate securities	76,663	(3,990)) 72,673	9,705	(313)) 82,065
ABS	12,947	(2,422)) 10,525	1,847	(444)) 11,928
CMBS ¹	54,909	(7,354)) 47,555	7,483	(109)) 54,929
RMBS ²	82,191	1,043	83,234	3,095	-) 86,329
Total HTM fixed maturity securities	\$ 1,199,801	14,523	1,214,324	43,998	(2,028)) 1,256,294

¹ CMBS includes government guaranteed agency securities with a carrying value \$8.9 million at December 31, 2010.

² RMBS includes government guaranteed agency securities with a carrying value \$4.0 million at December 31, 2010.

Unrecognized holding gains/losses of HTM securities are not reflected in the consolidated financial statements, as they represent fair value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an OTTI charge is recognized on an HTM security, through the date of the balance sheet. Our HTM securities had an average duration of 2.9 years as of December 31, 2011.

During 2011, 105 securities with a carrying value of \$323.1 million in a net unrecognized gain position of \$18.7 million were reclassified from the HTM category to AFS due to credit rating downgrades that occurred by either Moody's Investors Service ("Moody's"), Standard and Poor's Financial Services ("S&P"), or Fitch Ratings ("Fitch"). These unexpected rating downgrades raised significant concerns about the issuers' credit worthiness, which changed our intention to hold these securities to maturity. In addition to the transfer activity, redemptions and maturities of HTM securities in 2011 amounted to \$177.4 million.

(c) The cost/amortized cost, fair values, and unrealized gains (losses) of AFS securities were as follows:

December 31, 2011

(\$ in thousands)	Cost/	Unrealized	Unrealized	Fair

Gross unrealized losses include non-OTTI unrealized amounts and OTTI losses recognized in AOCI. In addition, this column includes remaining unrealized gain or loss amounts on securities that were transferred to an HTM designation in the first quarter of 2009 for those securities that are in a net unrealized/unrecognized loss position.

²Unrecognized holding gains/(losses) represent fair value fluctuations from the later of: (i) the date a security is designated as HTM; or (ii) the date that an OTTI charge is recognized on an HTM security.

³ U.S. government includes corporate securities fully guaranteed by the FDIC.

As evidenced by the table below, our unrealized/unrecognized loss positions improved by \$10.9 million as of December 31, 2011 compared to last year as follows:

(\$ in thousands)					
December 31, 2011			December 31, 2010		
Number of Issues	% of Market/Book	Unrealized	Number of Issues	% of Market/Book	Unrealized
		Unrecognized Loss			Unrecognized Loss
140	80% - 99	% \$ 10,166	193	80% - 99	% \$ 16,310
-	60% - 79	% -	2	60% - 79	% 1,125
1	40% - 59	% 469	2	40% - 59	% 2,160
-	20% - 39	% -	1	20% - 39	% 986
-	0% - 19	% -	1	0% - 19	% 976
		\$ 10,635			\$ 21,557

We have reviewed the securities in the tables above in accordance with our OTTI policy, as described in Note 2. "Summary of Significant Accounting Policies" of this Form 10-K.

At December 31, 2011, we had 141 securities in an aggregate unrealized/unrecognized loss position of \$10.6 million, \$4.9 million of which have been in a loss position for more than 12 months. Non-credit OTTI impairments comprised \$2.1 million of the \$4.9 million balance, with the remainder related to securities that were on average 6% impaired compared to their amortized cost.

At December 31, 2010, unrealized/unrecognized losses on securities that were in a loss position for more than 12 months amounted to \$8.6 million, primarily driven by \$5.8 million in our CMBS portfolio. This was comprised of: (i) \$3.7 million of unrealized/unrecognized losses primarily driven by non-credit OTTI charges recognized in AOCI that were generated concurrently with credit-related charges; and (ii) \$2.1 million on securities with an average decline in fair value of 17% of their amortized cost. The remaining \$2.8 million of unrealized/unrecognized losses were comprised of 37 securities, 21 of which were municipal securities and 16 of which were either RMBS or ABS. Declines in the fair value of these municipal securities, RMBS, and ABS averaged 5% of their amortized cost.

We do not have the intent to sell any securities in an unrealized/unrecognized loss position nor do we believe we will be required to sell these securities, and therefore we have concluded that they are temporarily impaired as of December 31, 2011. This conclusion reflects our current judgment as to the financial position and future prospects of the entity that issued the investment security and underlying collateral. If our judgment about an individual security changes in the future, we may ultimately record a credit loss after having originally concluded that one did not exist, which could have a material impact on our net income and financial position in future periods.

(e) Fixed-maturity securities at December 31, 2011, by contractual maturity are shown below. MBS are included in the maturity tables using the estimated average life of each security. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Listed below are HTM fixed maturity securities at December 31, 2011:

(\$ in thousands)	Carrying Value	Fair Value
Due in one year or less	\$ 97,103	102,405
Due after one year through five years	503,283	529,548
Due after five years through 10 years	104,918	117,703
Due after 10 years	7,044	8,387
Total HTM fixed maturity securities	\$ 712,348	758,043

Listed below are AFS fixed maturity securities at December 31, 2011:

(\$ in thousands)	Fair Value
Due in one year or less	\$285,717
Due after one year through five years	1,851,439
Due after five years through 10 years	750,368
Due after 10 years	9,849
Total AFS fixed maturity securities	\$2,897,373

(f) The following table outlines a summary of our other investment portfolio by strategy and the remaining commitment amount associated with each strategy:

Real estate	13,767	14,192	10,569
Mezzanine financing	8,817	10,230	15,256

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Venture capital	7,248	6,386	900
Total alternative investments	124,548	135,110	55,344
Other securities	3,753	2,755	1,521
Total other investments	\$128,301	137,865	56,865

The carrying value of our other investments decreased by \$9.6 million as of year-end 2011 compared to year end 2010. The carrying value was primarily impacted by distributions of \$45.8 million, partially offset by income of \$20.5 million, and additional contributions of \$16.1 million under our commitments.

The following is a description of our alternative investment strategies:

Energy/Power Generation

This strategy invests primarily in cash flow generating assets in the coal, natural gas, power generation, and electric and gas transmission and distribution industries.

Private Equity

This strategy makes private equity investments, primarily in established large and middle market companies across diverse industries in North America, Europe, and Asia.

Secondary Private Equity

This strategy purchases seasoned private equity funds from investors desiring liquidity prior to normal fund termination. Investments are made across all sectors of the private equity market, including leveraged buyouts, venture capital, distressed securities, mezzanine financing, real estate, and infrastructure.

Mezzanine Financing

This strategy provides privately negotiated fixed income securities, generally with an equity component, to leveraged buyout (“LBO”) firms and private and publicly traded large, mid and small-cap companies to finance LBOs, recapitalizations, and acquisitions.

Real Estate

This strategy invests opportunistically in real estate in North America, Europe, and Asia via direct property ownership, joint ventures, mortgages, and investments in equity and debt instruments.

Venture Capital

In general, these investments are venture capital investments made principally by investing in equity securities of privately held corporations, for long-term capital appreciation. This strategy also makes private equity investments in growth equity and buyout partnerships.

Distressed Debt

This strategy makes direct and indirect investments in debt and equity securities of companies that are experiencing financial and/or operational distress. Investments include buying indebtedness of bankrupt or financially troubled companies, small balance loan portfolios, special situations and capital structure arbitrage trades, commercial real estate mortgages and similar non-U.S. securities and debt obligations. This strategy also includes a fund of funds component.

The fund of funds component of our distressed debt strategy, which makes up approximately \$9.6 million of our distressed debt strategy, encompasses a number of strategies that generally fall into one of the following broad categories:

Distressed Debt Funds – Trading-Focused

These funds focus on buying and selling debt of distressed companies (“Distressed Debt”).

Distressed Debt Funds – Restructuring-Focused

These funds focus on acquiring Distressed Debt with the intent of converting it into equity in a restructuring and taking control of the company.

Special Situations Funds

These funds pursue strategies that seek to take advantage of dislocations or opportunities in the market that are often related to, or are derivatives of, distressed investing. Special situations are often event-driven and characterized by complexity, market inefficiency, and excess risk premiums.

Private Equity Funds – Turnaround-Focused

These funds are a subset of private equity funds focused on investing in under-performing or distressed companies. These funds generally create value by acquiring the equity of these companies, in certain cases out of bankruptcy, and effecting operational turnarounds or financial restructuring.

Our seven alternative investment strategies employ low or moderate levels of leverage and generally use hedging only to reduce foreign exchange or interest rate volatility. At this time, our alternative investment strategies do not include hedge funds. We cannot redeem our investments with the general partners of these investments; however, occasionally these partnerships do trade on the secondary market. Once liquidation is triggered by clauses within the limited partnership agreements or at the funds' stated end date, we will receive our final allocation of capital and any earned appreciation of the underlying investments, assuming we have not divested ourselves of our partnership interests prior to that time. We currently receive distributions from these alternative investments through the realization of the underlying investments in the limited partnerships. We anticipate that the general partners of these alternative investments will liquidate their underlying investment portfolios through 2022.

The following tables set forth summarized financial information for our investments that are accounted for under the equity method, which are primarily alternative investments. This information is presented in the aggregate for our other investment portfolio. Since the majority of these investments report results to us on a quarter lag, the summarized financial statement information is as of, and for the 12-month period ended, September 30:

Balance Sheet Information

September 30,

(\$ in millions)	2011	2010
Investments	\$13,553	18,278
Total assets	14,253	19,230
Total liabilities	1,105	864
Partners' capital	13,148	18,366

Income Statement Information

12 months ended September 30,

(\$ in millions)	2011	2010	2009
Net investment income	\$564	563	472
Realized gains (losses)	893	(358)	(499)
Net change in unrealized appreciation (depreciation)	1,485	2,250	(3,063)
Net income (loss)	\$2,942	2,455	(3,090)
Insurance Subsidiaries net income (loss)	\$21	20	(22)

(g) At December 31, 2011, we had 26 fixed maturity securities, with a carrying value of \$64.6 million, that were pledged as collateral for our outstanding borrowing with the FHLBI. We increased our outstanding borrowing with the FHLBI from \$13.0 million to \$58.0 million in the fourth quarter of 2011 to borrow funds at favorable interest rates in connection with our year-end acquisition of MUSIC. This outstanding borrowing is included in “Notes payable” on our Consolidated Balance Sheets. In accordance with the terms of our agreement with the FHLBI, we retain all rights regarding these securities, which are included in the “U.S. government and government agencies,” “RMBS,” and “CMBS” classifications of our AFS fixed maturity securities portfolio.

(h) The components of net investment income earned were as follows:

(\$ in thousands)	2011	2010	2009
Fixed maturity securities	\$ 129,710	130,990	141,882
Equity securities, dividend income	4,535	2,238	2,348
Trading securities, change in fair value	-	-	262
Short-term investments	160	437	1,273
Other investments	20,539	20,313	(21,726)
Miscellaneous income	133	139	343
Investment expenses	(7,634)	(8,409)	(5,911)
Net investment income earned	\$ 147,443	145,708	118,471

While net investment income remained relatively flat in 2011 compared to 2010, its components reflect increased dividend income from the high dividend yield equities strategy that we implemented during the year partially offset by lower yields on our fixed maturity securities. In 2011, bonds that matured or were sold, valued at \$481.9 million, had yields that averaged 3.8%, pre-tax, while new purchases of \$490.8 million had an average yield of 2.7%.

Income from our other investments, specifically our alternative investment portfolio, was the primary driver of the increase in investment income during 2010 when compared to 2009. This increase reflects the improved equity and credit markets in 2010 compared to the prior year. Partially offsetting these improved returns was a \$10.9 million reduction in income on our fixed maturity securities portfolio reflecting the interest rate environment. As higher-yielding securities either matured or were sold, they were replaced with lower yielding securities that were available in the market. In 2010, bonds that matured or were sold, valued at \$808.3 million, had average pre-tax yields of 3.8%, while new purchases of \$1.0 billion had an average yield of 2.8%.

(i) The following tables summarize OTTI by asset type for the periods indicated:

2011 (\$ in thousands)	Gross	Included in OCI	Recognized in Earnings
Fixed maturity securities			
Obligations of state and political subdivisions	\$ 17	-	17
Corporate securities	244	-	244
ABS	175	(546)	721
CMBS	(149)	(843)	694
RMBS	346	201	145
Total fixed maturity securities	633	(1,188)	1,821
Equity securities	11,365	-	11,365
OTTI losses	\$ 11,998	(1,188)	13,186

2010 (\$ in thousands)	Gross	Included in OCI	Recognized in Earnings
Fixed maturity securities			
Obligations of state and political subdivisions	\$ 197	-	197
ABS	(20)	(179)	159
CMBS	5,552	(863)	6,415
RMBS	7,953	(391)	8,344
Total fixed maturity securities	13,682	(1,433)	15,115
Equity securities	2,543	-	2,543
OTTI losses	\$ 16,225	(1,433)	17,658

2009 (\$ in thousands)	Gross	Included in OCI	Recognized in Earnings
---------------------------	-------	-----------------	---------------------------

Fixed maturity securities			
Corporate securities	\$1,271	-	1,271
ABS	1,190	(1,292) 2,482
CMBS	18,865	7,088	11,777
RMBS	40,751	2,972	37,779
Total fixed maturity securities	62,077	8,768	53,309
Equity securities	2,107	-	2,107
OTTI losses	\$64,184	8,768	55,416

OTTI losses in 2011 were primarily comprised of charges on our equity portfolio. Of these equity charges, \$8.5 million related to securities that we do not believe will recover in the near term and \$2.9 million related to securities for which we have the intent to sell.

The following is a discussion surrounding the OTTI charges that were recognized in earnings during 2010:

\$8.3 million of RMBS credit OTTI charges were largely driven by impairments on two securities in the first quarter of 2010 that we intended to sell. We sold these securities in the second quarter of 2010. The remaining charges related to securities that experienced declines in the related cash flows of their underlying collateral. Based on our analysis, we did not believe it was probable that we would receive all contractual cash flows for these securities.

\$6.4 million of CMBS credit OTTI charges. These charges were due to reductions in the related cash flows of the underlying collateral of these securities. These charges were primarily associated with securities that had been previously impaired but, over time, had shown little, if any, improvement in valuations, poor net operating income performance of the underlying properties, and, in some cases, an increase in over 60-day delinquency rates. These securities had, on average, unrealized/unrecognized loss positions of more than 60% of their amortized cost. Based on our DCF analysis, we did not believe it was probable that we would receive all contractual cash flows for these securities.

The following is a discussion surrounding the credit-related OTTI charges taken during 2009 as outlined in the table above:

\$37.8 million of RMBS credit OTTI charges related to securities that had experienced reductions in the cash flows of their underlying collateral. These securities, on average, showed signs of loss at conditional default rates of 0.33 and had declines in fair value of 65% as compared to their amortized cost. As a result, we did not believe it was probable that we would receive all contractual cash flows for these securities.

\$11.8 million of CMBS credit OTTI charges related to reductions in the cash flows of the underlying collateral of these securities. These securities, on average, showed signs of loss at conditional default rates between 2.5 to 3.0 and had declines in fair value of 77% as compared to their amortized cost. As a result, we did not believe it was probable that we would receive all contractual cash flows for these securities.

The following tables sets forth, for the periods indicated, credit loss impairments on fixed maturity securities for which a portion of the OTTI charge was recognized in OCI, and the corresponding changes in such amounts:

(\$ in thousands)	2011	2010	2009
Balance, beginning of year	\$17,723	22,189	-
Credit losses remaining in retained earnings after adoption of OTTI accounting guidance	-	-	9,719
Addition for the amount related to credit loss for which an OTTI was not previously recognized	-	2,326	10,579
Reductions for securities sold during the period	-	(2,990)	-
Reductions for securities for which the amount previously recognized in OCI was recognized in earnings because of intention or potential requirement to sell before recovery of amortized cost	-	-	-
Reductions for securities for which the entire amount previously recognized in OCI was recognized in earnings due to a decrease in cash flows expected	(11,672)	(8,143)	(693)
Additional increases to the amount related to credit loss for which an OTTI was previously recognized	551	4,341	2,584
Accretion of credit loss impairments previously recognized due to an increase in cash flows expected to be collected	-	-	-
Balance, end of year	\$6,602	17,723	22,189

(j) The components of net realized gains (losses), excluding OTTI charges, were as follows:

(\$ in thousands)	2011	2010	2009
HTM fixed maturity securities			
Gains	\$4	569	225
Losses	(564)	(894)	(1,049)
AFS fixed maturity securities			
Gains	9,385	8,161	20,899
Losses	(70)	(7,619)	(13,889)
AFS equity securities			
Gains	6,671	16,698	33,355
Losses	-	(1,156)	(28,056)
Other investments			
Gains	-	-	-
Losses	-	(5,184)	(2,039)
Total other net realized investment gains	15,426	10,575	9,446
Total OTTI charges recognized in earnings	(13,186)	(17,658)	(55,416)
Total net realized gains (losses)	\$2,240	(7,083)	(45,970)

Realized gains and losses on the sale of investments are determined on the basis of the cost of the specific investments sold. Proceeds from the sale of AFS securities were \$206.5 million in 2011, \$288.5 million during 2010, and \$676.0 million during 2009. Net realized gains in 2011, excluding OTTI charges, were driven by: (i) calls and maturities; (ii) the sale of AFS fixed maturity securities, primarily corporate, municipal, and government holdings; and (iii) the sale of AFS equity securities to facilitate the reallocation of the equity portfolio to a high-dividend yield strategy.

Realized gains in 2010 were driven by: (i) the sale of energy-focused AFS equity securities to mitigate portfolio risk and sector exposure; and (ii) the sale of AFS fixed maturity and equity securities associated with tax planning strategies. These gains were largely offset by realized losses on certain AFS fixed maturity securities that we sold in the second quarter of 2010 following an initial review of the portfolio by our newly hired external investment managers. The managers' sale recommendations were due to ongoing credit concerns of the underlying investments coupled with strategically positioning the portfolio to generate maximum yield while balancing risk objectives. Realized losses in our other investment portfolio was due to the fourth quarter 2010 sale of certain limited partnerships in the secondary market, which reduced our exposure in the mezzanine financing, private equity, secondary private equity, and real estate sectors of our alternative investment portfolio.

Realized gains and losses in 2009 from AFS securities were attributable to the sale of: (i) securities on which we had previously taken OTTI charges, as we had the intent to sell such securities; and (ii) certain securities for financial and tax planning strategies. Additional sales of AFS fixed maturity securities that resulted in realized losses were also driven by further declines in the issuers' credit worthiness and liquidity.

In addition to calls and maturities on HTM securities, we sold one HTM security with a carrying value of \$6.0 million for a loss of \$0.2 million during the second quarter of 2009. This security had experienced significant deterioration in the issuer's credit worthiness. We sold equity securities during 2009 with realized gains of \$33.4 million and realized losses of \$28.1 million. This activity included the following:

The sale of certain equity securities in the first quarter of 2009, resulting in a net realized loss of approximately \$0.6 million, comprised of \$19.7 million in realized gains and \$19.1 million in realized losses, in an effort to reduce overall portfolio risk. The decision to sell these equity positions was in response to an overall year-to-date market decline of approximately 24% by the end of the first week of March. In addition, the Parent's market capitalization at that time had decreased more than 50% since the latter part of January 2009, which we believed to be partially due to investment community views of our equity and equity-like investments. Our equity-like investments include alternative investments, many of which report results to us on a one quarter lag. Consequently, we believed the investment community would wait to evaluate our results based on the knowledge they had of the previous quarter's general market conditions. As a result, we determined it was prudent to mitigate a portion of our overall equity exposure. In determining which securities were to be sold, we contemplated, among other things, security-specific considerations with respect to downward earnings trends corroborated by recent analyst reports, primarily in the energy, commodity, and pharmaceutical sectors.

The sale of certain equity securities in the second quarter of 2009. A.M. Best changed our ratings outlook from "Stable" to "Negative" due, in part, to concerns over the risk in our investment portfolio. To reduce this risk, we sold \$31.1 million of equity securities for a net loss of \$0.6 million, which included gross gains of \$7.7 million and gross losses of \$8.3 million.

Note 6. Stockholders' Equity and Comprehensive Income (Loss)

(a) Stockholders' Equity

As of December 31, 2011, we had 12.5 million shares reserved for various stock compensation and purchase plans, retirement plans and dividend reinvestment plans. As part of our ongoing capital management strategy, we repurchase the Parent's stock from time-to-time, although we have not had an authorized stock repurchase program since July 26, 2009. The following table provides information regarding the purchase of the Parent's common stock during the 2009 through 2011 reporting periods:

(\$ in thousands)

Period	Shares Purchased in Connection with Restricted Stock Vestings and Stock Option Exercises	Cost of Shares Purchased in Connection with Restricted Stock Vestings and Stock Option Exercises
2011	149,997	\$ 2,741
2010	107,425	1,686
2009	191,858	3,010

Our ability to declare and pay dividends on the Parent's common stock is dependent on liquidity at the Parent coupled with the ability of the Insurance Subsidiaries to declare and pay dividends, if necessary, and/or the availability of other sources of liquidity to the Parent. Restrictions on the ability of the Insurance Subsidiaries to pay dividends, without alternative liquidity options, could materially affect our ability to pay dividends on common stock. The dividends from the Insurance Subsidiaries are subject to the regulatory limitations of the states in which the Insurance Subsidiaries are domiciled: New Jersey, New York, Indiana, or Maine. Based on the unaudited 2011 statutory financial statements, the maximum ordinary dividends that can be paid to the Parent by the Insurance Subsidiaries in 2012 are as follows:

(\$ in millions)

Selective Insurance Company of America	\$50.7
Selective Way Insurance Company	22.2
Selective Insurance Company of South Carolina	9.1
Selective Insurance Company of the Southeast	6.9
Selective Insurance Company of New York	7.3
Selective Insurance Company of New England	1.4
Selective Auto Insurance Company of New Jersey	6.0

Montpelier U.S. Insurance Company	-
Total	\$103.6

The statutory capital and surplus of the Insurance Subsidiaries in excess of these ordinary dividend amounts must remain with the Insurance Subsidiaries in the absence of approval of an “extraordinary dividend” from the Insurance Subsidiaries’ states of domicile. In each such jurisdiction, domestic insurers are prohibited from paying extraordinary dividends without approval of the insurance commissioner of the respective state. Additionally, New Jersey, Indiana, and Maine require notice of the declaration of any ordinary or extraordinary dividend distribution. During the notice period, the relevant state regulatory authority may disallow all or part of the proposed dividend if it determines that the insurer's surplus, with regard to policyholders, is not reasonable in relation to the insurer's outstanding liabilities and adequate for its financial needs.

(b) The components of comprehensive income (loss), both gross and net of tax, for 2011, 2010, and 2009 were as follows:

2011 (\$ in thousands)	Gross	Tax	Net
Net income	\$7,065	(12,800)	19,865
Components of OCI:			
Unrealized gains on securities:			
Unrealized holding gains during the period	70,140	24,548	45,592

¹ Amounts are reported in "Other net unrealized gains on investment securities, net of deferred income tax" on the Consolidated Statements of Stockholders' Equity.

² Amounts are reported in "Net realized gains (losses)" for realized gains and losses and "Net investment income earned" for amortization for the CMBS securities on the Consolidated Statements of Income.

³ Amounts are reported in either "Loss on disposal of discontinued operations, net of tax" or "Other income" for the receivable related to the sale of Selective HR on the Consolidated Statements of Income. Amounts in "Loss on disposal of discontinued operations, net of tax" relate to charges to reduce the fair value of our receivable and amounts

in "Other income" related to interest accretion on the receivable.

The transfers of the government and corporate securities into level 3 classification at December 31, 2011 were primarily the result of broker-priced securities being transferred from an HTM to an AFS designation in 2011. The transfers in 2010 into the level 3 classification were driven by the availability and nature of the broker quotes used at the valuation dates.

Note 8. Reinsurance

Our consolidated financial statements reflect the effects of assumed and ceded reinsurance transactions. Assumed reinsurance refers to the acceptance of certain insurance risks that other insurance entities have underwritten. Ceded reinsurance involves transferring certain insurance risks (along with the related written and earned premiums) that we have underwritten to other insurance companies that agree to share these risks. The primary purpose of ceded reinsurance is to protect the Insurance Subsidiaries from potential losses in excess of the amount that we are prepared to accept.

The Insurance Subsidiaries remain liable to policyholders to the extent that any reinsurer becomes unable to meet our contractual obligations. We evaluate and monitor the financial condition of our reinsurers under voluntary reinsurance arrangements to minimize our exposure to significant losses from reinsurer insolvencies. On an ongoing basis, we review amounts outstanding, length of collection period, changes in reinsurer credit ratings, and other relevant factors to determine collectability of reinsurance recoverables. The allowance for reinsurance recoverables was \$3.9 million at December 31, 2011 and \$3.4 million at December 31, 2010.

The following table represents our total reinsurance balances segregated by reinsurer to depict our concentration of risk throughout our reinsurance portfolio:

(\$ in thousands)	As of December 31, 2011		As of December 31, 2010	
	Reinsurance Balances	% of Net Unsecured Reinsurance	Reinsurance Balances	% of Net Unsecured Reinsurance
Total reinsurance recoverables	\$ 561,855		\$ 318,752	
Total prepaid reinsurance premiums	147,686		110,327	
Less: collateral ¹	(146,364)		(81,707)	
Net unsecured reinsurance balances	563,177		347,372	
Federal and state pools²:				
NJ Unsatisfied Claim Judgment Fund	69,179	12 %	62,098	18 %
National Flood Insurance Program ("NFIP")	267,600	48	119,241	34
Other	4,235	1	5,157	2
Total federal and state pools	341,014	61	186,496	54
Remaining unsecured reinsurance	222,163	39	160,876	46
Hannover Ruckversicherungs AG (A.M. Best rated "A")	50,636	9	33,203	10

Swiss Re Group (A.M. Best rated "A+")	28,634	5	24,552	7
AXIS Reinsurance Company (A.M. Best rated "A")	26,172	5	15,665	5
Partner Reinsurance Company of the U.S.(A.M. Best rated "A+")	19,105	3	14,206	4
All other reinsurers	62,714	11	43,938	12
Total	\$ 222,163	39 %	\$ 160,876	46 %

¹ Includes letters of credit, trust funds, and funds withheld.

² Considered to have minimal risk of default.

Note: Some amounts may not foot due to rounding

Under our reinsurance arrangements, which are prospective in nature, reinsurance premiums ceded are recorded as prepaid reinsurance and amortized over the remaining contract period in proportion to the reinsurance protection provided, or recorded periodically, as per the terms of the contract, in a direct relationship to the gross premium recording. Reinsurance recoveries are recognized as gross losses are incurred.

The following table contains a listing of direct, assumed, and ceded reinsurance amounts for premiums written, premiums earned, and losses and loss expenses incurred:

(\$ in thousands)	2011	2010	2009
Premiums written:			
Direct	\$1,725,393	1,634,415	1,657,142
Assumed	51,515	25,254	22,784
Ceded	(291,559)	(269,128)	(257,271)
Net	\$1,485,349	1,390,541	1,422,655
Premiums earned:			
Direct	\$1,693,021	1,654,301	1,657,911
Assumed	29,011	26,619	21,501
Ceded	(282,719)	(264,322)	(248,365)
Net	\$1,439,313	1,416,598	1,431,047
Losses and loss expenses incurred:			
Direct	\$1,499,340	1,102,326	1,065,594
Assumed	20,788	14,994	14,794
Ceded	(445,141)	(135,202)	(108,483)
Net	\$1,074,987	982,118	971,905

Assumed premiums written increased by \$26.3 million in 2011, as compared to 2010, primarily due to the August 2011 E&S renewal rights acquisition. Since this acquisition we have assumed \$24.1 million in E&S premium.

The increases in direct and ceded losses and loss expenses incurred in 2011 primarily reflect the impact of our Flood operation, which experienced increased volume associated with the elevated levels of catastrophic weather events, the results of which are included in the table below:

(\$ in thousands)	2011	2010	2009
Ceded premiums written	\$(206,711)	(190,964)	(178,934)
Ceded premiums earned	(198,153)	(184,833)	(171,941)
Ceded losses and loss expenses incurred	(352,619)	(60,479)	(35,597)

In addition, on a net basis, losses and loss expenses incurred also reflect increased catastrophic losses that we have retained. These losses increased by \$62.3 million, to \$118.8 million in 2011, from 2010. Hurricane Irene represented the majority of the 2011 losses, with the remainder of losses in 2011 resulting from more than 20 additional events. The total impact of Hurricane Irene was \$40.2 million (\$47.1 million on a gross basis), including the reinstatement premium.

Note 9. Reserves for Losses and Loss Expenses

The table below provides a roll forward of reserves for losses and loss expenses for beginning and ending reserve balances:

(\$ in thousands)	2011	2010	2009
Gross reserves for losses and loss expenses, at beginning of year	\$2,830,058	2,745,799	2,640,973
Less: reinsurance recoverable on unpaid loss and loss expenses, at beginning of year	313,739	271,610	224,192
Net reserves for losses and loss expenses, at beginning of year	2,516,319	2,474,189	2,416,781
Incurred losses and loss expenses for claims occurring in the:			
Current year	1,113,733	1,025,707	1,001,333
Prior years	(38,746)	(43,589)	(29,428)
Total incurred losses and loss expenses	1,074,987	982,118	971,905
Paid losses and loss expenses for claims occurring in the:			
Current year	440,786	378,650	330,006
Prior years	569,944	561,338	584,491
Total paid losses and loss expenses	1,010,730	939,988	914,497
Acquisition of MUSIC loss and loss expense reserves	14,858	-	-
Net reserves for losses and loss expenses, at end of year	2,595,434	2,516,319	2,474,189
Add: Reinsurance recoverable on unpaid loss and loss expenses, at end of year ¹	549,490	313,739	271,610
Gross reserves for losses and loss expenses at end of year	\$3,144,924	2,830,058	2,745,799

¹Includes \$44.0 million related to the acquisition of MUSIC.

The net loss and loss expense reserves increased by \$79.1 million in 2011, \$42.1 million in 2010, and \$57.4 million in 2009. The loss reserves are net of anticipated recoveries for salvage and subrogation claims, which amounted to \$67.6 million for 2011, \$55.0 million for 2010, and \$58.8 million for 2009. The changes in the net loss and loss expense reserves were the result of elevated catastrophe losses in 2011, growth in exposures, anticipated loss trends, changes in reinsurance retentions, as well as normal reserve development inherent in the uncertainty in establishing reserves for losses and loss expenses. As additional information is collected in the loss settlement process, reserves are adjusted accordingly. These adjustments are reflected in the consolidated statements of income in the period in which such adjustments are recognized. These changes could have a material impact on the results of operations of future periods when the adjustments are made.

In 2011, we experienced favorable loss development of approximately \$39 million, which was primarily driven by favorable loss development of approximately \$60 million in accident years 2006, 2008, and 2009, partially offset by unfavorable loss development in accident year 2010 of approximately \$24 million. The main driver of this development was favorable prior year development in our commercial automobile, general liability, and business owners' policy lines of business, partially offset by unfavorable development in our workers compensation line. Commercial automobile experienced favorable development of approximately \$13 million, primarily in accident years 2007 through 2009. This represents a continued trend driven by lower frequencies in those years. General liability experienced favorable development of approximately \$12 million. This was driven by favorable development on our premises and operations coverages for accident years 2009 and prior, largely offset by adverse development in our products business. Our business owners' policy line had favorable development of approximately \$11 million. This was driven by favorable development on liability coverage for accident years 2008 through 2010. Workers compensation experienced unfavorable prior year development of approximately \$7 million, primarily driven by increases in the 2010 accident year, partially offset by various earlier accident years. This increase represents a continued trend related to increased severity in recent years. Our remaining lines of business collectively experienced approximately \$10 million of favorable development, largely driven by prior year catastrophe development.

In 2010, we experienced favorable loss development of approximately \$44 million, which was primarily driven by favorable loss development in accident years 2004 through 2007, partially offset by unfavorable loss development in accident years 2008 to 2009 of approximately \$24 million. The main driver of this development was favorable prior year development in our commercial automobile and general liability lines of business, partially offset by unfavorable development in our workers compensation line. Commercial automobile experienced favorable development of approximately \$28 million driven by lower than anticipated severity emergence primarily in accident years 2004 to 2009. General liability experienced favorable development of approximately \$26 million, driven by favorable loss emergence for accident years 2006 and prior, partially offset by adverse development in our products/completed operations business. Workers compensation experienced unfavorable prior year development of approximately \$22 million, primarily driven by increases in accident years 2008 and 2009, which have experienced increases in average severity. Our remaining lines of business collectively experienced approximately \$11 million of favorable development. While there were some offsetting impacts among these lines, homeowners contributed \$6 million of favorable development towards the total development. This was due to lower than expected liability losses in accident years 2008 and 2009.

In 2009, we experienced favorable loss development of approximately \$29 million, which was primarily driven by favorable loss development in accident years 2007 and prior, partially offset by unfavorable loss development in accident year 2008 of \$29 million. The main driver of this development was favorable prior year development in our workers compensation, commercial automobile, and general liability lines of business. Workers compensation experienced favorable prior year development of approximately \$11 million primarily driven by favorable development of \$36 million in accident years 2005 to 2007, reflecting the on-going impact from a series of improvement strategies for this line in recent years, partially offset by adverse development of approximately \$22 million due to higher than expected severity in accident year 2008. Commercial automobile experienced favorable development of approximately \$10 million, driven by lower than anticipated severity emergence, primarily in accident year 2007. General liability experienced favorable development of approximately \$8 million, driven by favorable loss emergence for accident years 2004 through 2007, partially offset by adverse development in our products/completed operations business.

Reserves established for liability insurance include exposure to environmental claims, both asbestos and non-asbestos. These claims have arisen primarily from insured exposures in municipal government, small non-manufacturing commercial risk, and homeowners policies. The emergence of these claims is slow and highly unpredictable. There are significant uncertainties in estimating our exposure to environmental claims (for both case and IBNR reserves) resulting from lack of historical data, long reporting delays, uncertainty as to the number and identity of claimants and complex legal and coverage issues. Legal issues that arise in environmental cases include federal or state venue, choice of law, causation, admissibility of evidence, allocation of damages and contribution among joint defendants, successor and predecessor liability, and whether direct action against insurers can be maintained. Coverage issues that arise in environmental cases include the interpretation and application of policy exclusions, the determination and calculation of policy limits, the determination of the ultimate amount of a loss, the extent to which a loss is covered by a policy, if at all, the obligation of an insurer to defend a claim and the extent to which a party can prove the existence of coverage. Courts have reached different and sometimes inconsistent conclusions on these legal and coverage issues. We do not discount to present value that portion of our loss reserves expected to be paid in future periods.

The following table details our exposures to various environmental claims:

(\$ in millions)	2011	
	Gross	Net
Asbestos	\$8.4	6.6
Landfill sites	16.4	11.5
Other ¹	21.7	20.3
Total	\$46.5	38.4

¹ Consists of leaking underground storage tanks and other latent environmental exposures.

IBNR reserve estimation is often difficult because, in addition to other factors, there are significant uncertainties associated with critical assumptions in the estimation process such as average clean-up costs, third-party costs, potentially responsible party shares, allocation of damages, insurer litigation costs, insurer coverage defenses, and potential changes to state and federal statutes. Moreover, normal historically based actuarial approaches are difficult to apply because relevant history is not available. In addition, while models can be applied, such models can produce significantly different results with small changes in assumptions.

The following table provides a roll forward of gross and net environmental incurred losses and loss expenses and related reserves thereon:

(\$ in thousands)	2011		2010		2009

Note 10. Indebtedness

(a) Notes Payable

(1) On November 15, 2004, we issued \$50 million of 7.25% Senior Notes due 2034. These notes were issued at a discount of \$0.1 million, resulting in an effective yield of 7.27% and pay interest on May 15 and November 15 each year. We contributed \$25.0 million of the bond proceeds to the Insurance Subsidiaries as capital. The remainder of the proceeds were used for general corporate purposes. The agreements covering these notes contain a standard default cross-acceleration provision that provides the 7.25% Senior Notes will enter a state of default upon the failure to pay principal when due or upon any event or condition that results in an acceleration of principal of any other debt instrument in excess of \$10 million that we have outstanding concurrently with the 7.25% Senior Notes. There are no attached financial debt covenants to which we are required to comply in regards to these notes.

(2) On November 3, 2005, we issued \$100 million of 6.70% Senior Notes due 2035. These notes were issued at a discount of \$0.7 million resulting in an effective yield of 6.754% and pay interest on May 1 and November 1 each year commencing on May 1, 2006. Net proceeds of approximately \$50 million were used to fund an irrevocable trust to provide for certain payment obligations in respect of our outstanding debt. The remainder of the proceeds were used for general corporate purposes. The agreements covering these notes contain a standard default cross-acceleration provision that provides the 6.70% Senior Notes will enter a state of default upon the failure to pay principal when due or upon any event or condition that results in an acceleration of principal of any other debt instrument in excess of \$10 million that we have outstanding concurrently with the 6.70% Senior Notes. There are no attached financial debt covenants to which we are required to comply in regards to these notes.

(3) On September 25, 2006, we issued \$100 million aggregate principal amount of 7.5% Junior Subordinated Notes due 2066 ("Junior Notes"). The Junior Notes will pay interest, subject to our right to defer interest payments for up to 10 years, on March 15, June 15, September 15, and December 15 of each year, beginning December 15, 2006, and ending on September 27, 2066. After September 26, 2011, the Junior Notes may be called at any time, in whole or in part, at their aggregate principal amount, together with any accrued and unpaid interest. The net proceeds of \$96.8 million from the issuance were used for general corporate purposes. There are no attached financial debt covenants to which we are required to comply in regards to the Junior Notes.

(4) In the first quarter of 2009, Selective Insurance Company of the Southeast and Selective Insurance Company of South Carolina ("Indiana Subsidiaries") joined and invested in the FHLBI, which provides them with access to additional liquidity. The Indiana Subsidiaries' aggregate investment was \$2.9 million and \$0.8 million at December 31, 2011 and 2010, respectively. Our investment provides us the ability to borrow up to 20 times the total amount of the FHLBI common stock purchased with additional collateral, at comparatively low borrowing rates. All borrowings from FHLBI are required to be secured by certain investments.

The following is a summary of the Indiana Subsidiaries' borrowings from the FHLBI:

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

In 2009, the Indiana Subsidiaries borrowed \$13 million in the aggregate from the FHLBI. The unpaid principal amount accrues interest of 2.9% and is paid on the 15th of every month. The principal amount is due on December 15, 2014. These funds were loaned to the Parent to be used for general corporate purposes.

In 2011, the Indiana Subsidiaries borrowed \$45 million in the aggregate from the FHLBI. The unpaid principal amount accrues interest of 1.25% and is paid on the 15th of every month. The principal amount is due on December 16, 2016. These funds were loaned to the Parent for use in the acquisition of MUSIC on December 31, 2011.

(b) Short-Term Debt

Our Line of Credit was renewed effective June 13, 2011, with Wells Fargo Bank, National Association, as administrative agent, and Branch Banking and Trust Company (BB&T), with a borrowing capacity of \$30 million. This amount can be increased to \$50 million with the approval of both lending partners. The Line of Credit provides the Parent an additional source of short-term liquidity. The interest rate on our Line of Credit varies and is based on, among other factors, the Parent's debt ratings. We continue to monitor current news regarding the banking industry, in general, and our lending partners, in particular, as, according to the line of credit agreement, the obligations of the lenders to make loans are several and not joint. The Line of Credit expires on June 13, 2014. There were no balances outstanding under this credit facility as of December 31, 2011 or at any time during 2011.

The Line of Credit agreement contains representations, warranties, and covenants that are customary for credit facilities of this type, including, without limitation, financial covenants under which we are obligated to maintain a minimum consolidated net worth, minimum combined statutory surplus, and maximum ratio of consolidated debt to total capitalization, and covenants limiting our ability to: (i) merge or liquidate; (ii) incur debt or liens; (iii) dispose of assets; (iv) make investments and acquisitions; and (v) engage in transactions with affiliates. The Line of Credit permits collateralized borrowings by the Indiana Subsidiaries from the FHLBI so long as the aggregate amount borrowed does not exceed 10% of the respective Indiana Subsidiary's admitted assets from the preceding calendar year.

The table below outlines information regarding certain of the covenants in the Line of Credit:

	Required as of December 31, 2011	Actual as of December 31, 2011
Consolidated net worth	\$793 million	\$ 1,109 million
Statutory surplus	Not less than \$750 million	\$ 1,063 million ¹
Debt-to-capitalization ratio ²	Not to exceed 35%	20.3%
A.M. Best financial strength rating	Minimum of A-	A+

¹Statutory surplus includes the effect of the MUSIC acquisition.

² Calculated in accordance with Line of Credit agreement.

In addition to the above requirements, the Line of Credit agreement contains a cross-default provision that provides that the Line of Credit will be in default if we fail to comply with any condition, covenant, or agreement (including payment of principal and interest when due on any debt with an aggregate principal amount of at least \$10 million), which causes or permits the acceleration of principal.

Note 11. Segment Information

We have classified our operations into two segments, the disaggregated results of which are reported to and used by senior management to manage our operations:

Insurance Operations, which is evaluated based on statutory underwriting results (net premiums earned, incurred losses and loss expenses, policyholders dividends, policy acquisition costs, and other underwriting expenses), and statutory combined ratios; and

- Investments, which is evaluated based on net investment income and net realized gains and losses.

Our Insurance Operations segment has historically reflected the results of our standard market insurance products. In 2011, through our acquisition activities, we began writing E&S business. This business does not meet the quantitative thresholds for individual segment reporting as its revenue or income are not more than 10% of the related balances aggregated for all of our segments. As our E&S operations share various economic, regulatory, and production-related characteristics with our standard market insurance products, we have aggregated their results into our Insurance Operations segment.

Our standard market Insurance Operations are subject to certain geographic concentrations, particularly in the Northeast and Mid-Atlantic regions of the country. In 2011, approximately 25% of net premiums written were related to insurance policies written in New Jersey.

Our Commercial Lines and Personal Lines property and casualty insurance products are primarily sold through independent insurance agents and our E&S business is primarily sold through wholesale general agencies.

Our goodwill balance for our operating segments was \$7.8 million at December 31, 2011 and 2010 related to the standard market portion of our Insurance Operations segment.

Our segments may, from time-to-time, provide services to each other in the normal course of business. These service transactions included transactions with our discontinued operations, Selective HR, prior to its sale and totaled \$9.0 million in 2009. These transactions were eliminated in the 2009 consolidated statements. In computing the results of each segment, we do not make adjustments for interest expense, net general corporate expenses, or federal income taxes. We do not maintain separate investment portfolios for the segments and therefore, do not allocate assets to the segments.

The following summaries present revenues from continuing operations (net investment income and net realized losses on investments in the case of the Investments segment) and pre-tax income from continuing operations for the individual segments:

Revenue from Continuing Operations by Segment

Years ended December 31,

(\$ in thousands)	2011	2010	2009
Insurance Operations:			
Net premiums earned:			
Commercial automobile	\$279,610	291,495	300,562

Income from continuing operations, before federal income tax	\$8,065	81,956	39,186

Note 12. Discontinued Operations

In 2009, we sold 100% of our interest in Selective HR, which had historically comprised the HR Outsourcing segment of our operations. We sold this interest for proceeds scheduled to be received over a 10-year period based on the ability of the purchaser to retain and generate new worksite lives through our independent agency distribution channel. We have concluded that these proceeds are indirect cash flows since we have no continuing involvement with the operations of Selective HR and have no continuing cash flows other than these proceeds. We recorded after-tax charges of \$0.7 million in 2011 and \$3.8 million in 2010, respectively, due to our revaluation of the contingent proceeds, including assumptions regarding worksite life generation and retention. As of December 31, 2011, our estimated sales price was approximately \$5.9 million, of which \$2.7 million has been received to date.

In 2009, we recorded goodwill impairment charges of \$7.9 million, after-tax, which was the result of Selective HR's estimated fair value not being sufficient to support its carrying value. In determining the impairment, we calculated the fair value of that reporting unit utilizing an income approach (i.e. expected present value of future cash flows).

Operating results of discontinued operations were as follows:

(\$ in thousands)	2009
Net revenue	\$44,508
Pre-tax loss	(11,128)
After-tax loss	(7,086)

Intercompany transactions related to the discontinued operations were as follows:

(\$ in thousands)	2009
Net revenue	\$9,016

Note 13. Business Combinations

In August 2011, SICA purchased the renewal rights to the commercial E&S lines business written under contract binding authority by Alterra Excess & Surplus Insurance Company (“Alterra”). Prior to our acquisition, this business generated gross premiums written of approximately \$77 million in 2010. If all of this business had been written by SICA in 2010, our NPW would have increased by approximately 6%. Considering the size of the book of business, we do not believe it would be meaningful to provide historical pro forma financial information regarding this transaction.

To provide a nationally-licensed platform that allows us to write contract binding authority E&S business, on December 31, 2011, the Parent purchased MUSIC, a wholly-owned E&S lines subsidiary of Montpelier Re Holdings Ltd. (“Montpelier Re”). Under the terms of the agreement, the Parent acquired all of the issued and outstanding shares of MUSIC’s common stock as of December 31, 2011 for \$51.5 million, net of cash acquired.

The following table provides the assets and liabilities purchased in the MUSIC transaction:

(\$ in thousands)

ASSETS:		LIABILITIES:	
Investments	\$48,437	Reserve for losses and loss expenses	\$58,836
Cash	3,436	Unearned premium	28,520
Interest and dividends due or accrued	54	Accrued salaries and benefits	43
Premiums receivable	7,073		
Reinsurance recoverables, net	43,978	Other liabilities	6,742
Prepaid reinsurance premiums	28,520	Total Liabilities	\$94,141
Property, plant and equipment	219		
Deferred federal income taxes	6,221		
Other assets	7,525		
Total Assets	\$145,463		

We have entered into several reinsurance agreements with Montpelier Reinsurance Ltd. as part of the acquisition of MUSIC. Together, these transactions provide protection for new losses on policies written prior to the acquisition and any development on reserves established by MUSIC as of the date of the acquisition. The reinsurance recoverables under these treaties are 100% collateralized.

As part of the acquisition, we purchased intangible assets that amounted to approximately \$7.3 million. The most significant of these items are licenses and customer lists. The \$4.2 million indefinite intangible related to the licenses is reflective of the ability that these licenses provide us to write E&S business in 50 states and the District of Columbia. The \$2.5 million finite life intangible asset related to customer lists reflects the access that we have obtained, through the acquisition, to MUSIC’s renewal book of business. Prior to our acquisition, in 2010, MUSIC

wrote approximately \$48 million of contract binding authority E&S business.

In addition to the assets acquired and liabilities assumed that are detailed in the table above, SICA also purchased intellectual property and information technology assets from Montpelier Re valued at \$3.6 million as part of the transaction.

Note 14. Earnings per Share

The following table provides a reconciliation of the numerators and denominators of basic and diluted earnings per share ("EPS") of net income:

2011	Income	Shares	Per Share
(\$ in thousands, except per share amounts)	(Numerator)	(Denominator)	Amount
Basic EPS:			
Net income from continuing operations	\$ 20,515	54,095	\$ 0.38
Net loss on disposal of discontinued operations	(650)	54,095	(0.01)
Net income available to common stockholders	\$ 19,865	54,095	\$ 0.37
Effect of dilutive securities:			
Stock compensation plan	-	1,126	
Diluted EPS:			
Net income from continuing operations	\$ 20,515	55,221	\$ 0.37
Net loss on disposal of discontinued operations	(650)	55,221	(0.01)
Net income available to common stockholders	\$ 19,865	55,221	\$ 0.36
2010	Income	Shares	Per Share
(\$ in thousands, except per share amounts)	(Numerator)	(Denominator)	Amount
Basic EPS:			
Net income from continuing operations	\$ 69,321	53,359	\$ 1.30
Net loss on disposal of discontinued operations	(3,780)	53,359	(0.07)
Net income available to common stockholders	\$ 65,541	53,359	\$ 1.23
Effect of dilutive securities:			
Stock compensation plan	-	1,145	
Diluted EPS:			
Net income from continuing operations	\$ 69,321	54,504	\$ 1.27
Net loss on disposal of discontinued operations	(3,780)	54,504	(0.07)
Net income available to common stockholders	\$ 65,541	54,504	\$ 1.20
2009	Income	Shares	Per Share
(\$ in thousands, except per share amounts)	(Numerator)	(Denominator)	Amount
Basic EPS:			
Net income from continuing operations	\$ 44,658	52,630	\$ 0.84
Net loss from discontinued operations	(7,086)	52,630	(0.13)
Net loss on disposal of discontinued operations	(1,174)	52,630	(0.02)

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Net income available to common stockholders	\$ 36,398	52,630	\$ 0.69
Effect of dilutive securities:			
Stock compensation plan	-	767	
Diluted EPS:			
Net income from continuing operations	\$ 44,658	53,397	\$ 0.83
Net loss from discontinued operations	(7,086)	53,397	(0.13)
Net loss on disposal of discontinued operations	(1,174)	53,397	(0.02)
Net income available to common stockholders	\$ 36,398	53,397	\$ 0.68

Note 15. Federal Income Taxes

(a) A reconciliation of federal income tax on income at the corporate rate to the effective tax rate is as follows:

(\$ in thousands)	2011	2010	2009
Tax at statutory rate of 35%	\$2,823	28,685	13,715
Tax-advantaged interest	(14,381)	(15,992)	(18,205)
Dividends received deduction	(870)	(357)	(513)
Nonqualified deferred compensation	7	(273)	(721)
Other	(29)	572	252
Federal income tax (benefit) expense from continuing operations	\$(12,450)	12,635	(5,472)

(b) The tax effects of the significant temporary differences that give rise to deferred tax assets and liabilities are as follows:

(\$ in thousands)	2011	2010
Deferred tax assets:		
Net loss reserve discounting	\$99,768	98,014
Net unearned premiums	53,191	49,955
Employee benefits	33,100	27,079
Long-term incentive compensation plans	8,471	9,209
Temporary investment write-downs	13,251	9,340
Net operating loss	4,791	-
Tax credits	10,938	5,138
Other	7,638	6,109
Total deferred tax assets	231,148	204,844
Deferred tax liabilities:		
Deferred policy acquisition costs	74,137	72,840
Unrealized gains on investment securities	53,996	30,522
Other investment-related items, net	4,034	2,080
Accelerated depreciation and amortization	6,295	6,168
Total deferred tax liabilities	138,462	111,610
Net deferred federal income tax asset	\$92,686	93,234

After considering all evidence, both positive and negative, with respect to our federal tax loss carryback availability, expected levels of pre-tax financial statement income, and federal taxable income, we believe it is more likely than not that the existing deductible temporary differences will reverse during periods in which we generate net federal taxable income or have adequate federal carryback availability. As a result, we have no valuation allowance recognized for federal deferred tax assets at December 31, 2011 and 2010. The carry forward availability of our net operating loss will begin to expire in 2027 with the remainder expiring through 2031. Our alternative minimum tax credits, which are available to offset future regular taxable income, can be carried forward for an unlimited period of time.

Stockholders' equity reflects tax benefits related to compensation expense deductions for share-based compensation awards of \$16.6 million at December 31, 2011, \$16.7 million at December 31, 2010, and \$17.4 million at December 31, 2009.

We have analyzed our tax positions in all open tax years, which as of December 31, 2011 were 2007 through 2010. The Internal Revenue Service ("IRS") is currently conducting a limited scope examination of these open tax years. Based on our analysis, we do not have unrecognized tax expense or benefits as of December 31, 2011. In addition, we believe our tax positions will more likely than not be sustained upon examination, including related appeals or litigation. In the event we had a tax position that did not meet the more likely than not criteria, any tax, interest, and penalties incurred related to such a position would be reflected in "Total federal income tax expense (benefit)" on our Consolidated Statements of Income.

Note 16. Retirement Plans

(a) Selective Insurance Retirement Savings Plan (“Retirement Savings Plan”)

Selective Insurance Company of America ("SICA") offers a voluntary defined contribution 401(k) plan to employees who meet eligibility requirements. Participants can contribute 2% to 50% of their defined compensation to the Retirement Savings Plan not to exceed limits established by the IRS. Employees age 50 or older who are contributing the maximum may also make additional contributions not to exceed the additional amount permitted by the Internal Revenue Service (“IRS”). Effective October 1, 2011, SICA appointed T. Rowe Price Trust Company as trustee to the Retirement Savings Plan. Certain terms of the Retirement Savings Plan were amended effective January 1, 2011. The following table presents information regarding plan terms in effect as of December 31, 2010 and the related January 1, 2011 revisions:

	As of December 31, 2010	Effective January 1, 2011
SICA match	65% of participant contributions up to 7% of defined compensation	100% of participant contributions up to the first 3% of defined compensation and 50% up to the next 3%
Enhanced match/non-elective contribution ¹	100% match up to 2% of defined compensation and non-elective contributions equal to 2% of defined compensation	Enhanced match eliminated and non-elective contributions increased to 4%
Vesting of match/non-elective contribution	Vesting period of six years for SICA match and three years for SICA non-elective contribution	Immediately vested
HCE contributions	Limited	No longer subject to previous limitation

⁽¹⁾ Effective January 1, 2006, the Retirement Savings Plan was amended to include additional enhanced matching contributions and non-elective contributions for otherwise eligible employees who, because of their date of hire after December 31, 2005, are not eligible to participate in the Retirement Income Plan for Selective Insurance Company of America (“Retirement Income Plan”).

Employer contributions to the Retirement Savings Plan amounted to \$7.0 million in 2011, \$6.3 million in 2010, and \$6.0 million in 2009.

The Retirement Savings Plan allows employees to make voluntary contributions to a number of diversified investment options on a before and/or after-tax basis. Until March 10, 2009, the Parent’s common stock fund had been an investment option, but on such date, this fund was closed to new contributions. Shares of the Parent’s common stock issued under this plan were 13,983 during 2009.

(b) Deferred Compensation Plan

SICA offers a nonqualified deferred compensation plan ("Deferred Compensation Plan") to a group of management or highly compensated employees (the "Participants") as a method of recognizing and retaining such employees. The Deferred Compensation Plan provides the Participants the opportunity to elect to defer receipt of specified portions of compensation and to have such deferred amounts deemed to be invested in specified investment options. A Participant in the Deferred Compensation Plan may elect to defer compensation or awards to be received, including up to: (i) 50% of annual base salary; (ii) 90% of annual bonus; and/or (iii) a percentage of other compensation as otherwise designated by the administrator of the Deferred Compensation Plan.

In addition to the deferrals elected by the Participants, SICA may also choose to make matching contributions to the deferral accounts of some or all Participants to the extent a Participant did not receive the maximum matching contribution permissible under the Retirement Savings Plan due to limitations under the Internal Revenue Code or the Retirement Savings Plan. The Deferred Compensation Plan was amended effective January 1, 2010 to add a non-elective contribution of 4% of eligible compensation to the extent a participant could not receive the maximum non-elective contribution in the Retirement Savings Plan due to the limitations of the Retirement Savings Plan and the Internal Revenue Code. SICA may also choose at any time to make discretionary contributions to the deferral account of any Participant in our sole discretion. No discretionary contributions were made in 2011, 2010, or 2009. SICA contributed \$0.1 million in 2011, \$0.2 million in 2010, and \$0.1 million in 2009 to the Deferred Compensation Plan.

(c) Retirement Income Plan and Post-retirement Plan

The Retirement Income Plan is a noncontributory defined benefit plan covering all SICA employees who met eligibility requirements prior to January 1, 2006. As of such date, the plan was amended to eliminate eligibility for plan participation by employees first hired on or after January 1, 2006. If otherwise qualified, these employees will, however, be eligible for non-elective contributions from SICA under the Retirement Savings Plan as discussed above.

The funding policy provides that payments to the pension trust shall be equal to the minimum funding requirements of the Employee Retirement Income Security Act, plus additional amounts that the Board of the plan sponsor, may approve from time to time.

The Retirement Income Plan was amended as of July 1, 2002 to provide for different calculations based on service with the company as of that date. Monthly benefits payable under the Retirement Income Plan and Supplemental Excess Retirement Plan at normal retirement age are computed under the terms of those agreements. The earliest retirement age is age 55 with 10 years of service or the attainment of 70 points (age plus years of service). If a participant chooses to begin receiving benefits before their 65th birthday, the amount of their monthly benefit would be reduced in accordance with the provisions of the plan. At retirement, participants receive monthly pension payments and may choose among five payment options, including joint and survivor options.

Prior to April 1, 2009, SICA provided a life insurance benefit (“Retirement Life Plan”) for employees who terminated employment and met the age and service requirements to otherwise be eligible for a benefit under the Retirement Income Plan (“Retirees”). Retirees who terminated employment with SICA on or prior to March 31, 2009 are eligible for a maximum life insurance benefit, depending upon the Retiree’s date of termination ranging from \$10,000 to \$100,000. On April 1, 2009, SICA eliminated the benefits under the Retirement Life Plan to active employees. This elimination resulted in a curtailment to the plan, the benefit of which was \$4.2 million in 2009 and was composed of: (i) a \$2.8 million reversal of the Retirement Life Plan liability; and (ii) a \$1.4 million reversal of prior service credits and net actuarial losses included in AOCI.

The funded status of the Retirement Income Plan and Retirement Life Plan was recognized on the Consolidated Balance Sheets for 2011 and 2010, the details of which are as follows:

December 31, (\$ in thousands)	Retirement Income Plan		Retirement Life Plan				
	2011	2010	2011	2010			
Change in Benefit Obligation:							
Benefit obligation, beginning of year	\$ 230,642	200,041	5,700	5,503

Rate of compensation increase	4.00	%	4.00	%	-	%	-

(\$ in thousands)	Retirement Income Plan			Retirement Life Plan		
	2011	2010	2009	2011	2010	2009
Components of Net Periodic Benefit Cost and Other Amounts Recognized in Other Comprehensive (Income) Loss:						

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Net Periodic Benefit Cost:						
Service cost	\$7,575	7,626	7,078	-	-	32
Interest cost	12,349	11,914	10,944	306	316	361
Expected return on plan assets	(13,924)	(11,247)	(9,214)	-	-	-
Amortization of unrecognized prior service cost (credit)	150	150	150	-	-	(44)
Amortization of unrecognized actuarial loss	4,154	4,128	4,660	18	6	-
Curtailement income	-	-	-	-	-	(4,217)
Total net periodic cost/(income)	10,304	12,571	13,618	324	322	(3,868)
Other Changes in Plan Assets and Benefit Obligations						
Recognized in Other Comprehensive (Income) Loss:						
Net actuarial loss (gain)	\$16,575	11,844	(3,470)	224	201	646
Reversal of amortization of net actuarial loss	(4,154)	(4,128)	(4,660)	(18)	(6)	(614)
Reversal of amortization of prior service (cost) credit	(150)	(150)	(150)	-	-	2,045
Total recognized in other comprehensive (income) loss	12,271	7,566	(8,280)	206	195	2,077
Total recognized in net periodic benefit cost and other comprehensive (income) loss	\$22,575	20,137	5,338	530	517	(1,791)

The amortization of prior service cost related to the Retirement Income Plan and Retirement Life Plan is determined using a straight-line amortization of the cost over the average remaining service period of employees expected to receive benefits under the Plans.

The estimated net actuarial loss and prior service cost for the Retirement Income Plan that will be amortized from AOCI into net periodic benefit cost during the 2012 fiscal year are \$5.5 million and \$0.2 million, respectively.

(\$ in thousands)	Retirement Income Plan			Retirement Life Plan		
	2011	2010	2009	2011	2010	2009
Weighted-Average Expense Assumptions for the years ended December 31:						
Discount rate	5.55%	5.93%	6.24	5.55	5.93	6.24
Expected return on plan assets	8.00%	8.00%	8.00	-	-	-
Rate of compensation increase	4.00%	4.00%	4.00	-	-	4.00

Our measurement date was December 31, 2011 and our expected return on plan assets was 7.75%, which was based primarily on the Retirement Income Plan's long-term historical returns. In addition to the plan's historical returns, we consider long-term historical rates of return on the respective asset classes. Our expected return, after examining recent market conditions and trends, approximates our actual 8.0% annualized return achieved since plan inception for all plan assets.

Our 2011 discount rate used to value the liability was 5.16% for both the Retirement Income Plan and the Retirement Life Plan. When determining the most appropriate discount rate to be used in the valuation, we consider, among other factors, our expected pay out patterns of the plans' obligations as well as our investment strategy and we ultimately select the rate that we believe best represents our estimate of the inherent interest rate at which our pension benefits can be effectively settled.

Plan Assets

Assets of the Retirement Income Plan are invested to ensure that principal is preserved and enhanced over time. In addition, the Retirement Income Plan is expected to perform above average relative to comparable funds without assuming undue risk, and to add value through active management. Our return objective is to exceed the returns of the plan's policy benchmark, which is the return the plan would have earned if the assets were invested according to the target asset class weightings and earned index returns. The Retirement Income Plan's exposure to a concentration of credit risk is limited by the diversification of investments across varied financial instruments, including common stocks, mutual funds, non-publicly traded stocks, investments in limited partnerships, fixed income securities, and short-term investments. Allocations to these instruments may vary from time to time. In 2012, we will continue to phase in adjustments to the asset allocation of the Retirement Income Plan to a more liability driven investment

strategy.

The Retirement Income Plan's equity investments may not contain investments in any one security greater than 8% of the portfolio value, nor have more than 5% of the outstanding shares of any one corporation. The use of derivative instruments is permitted under certain circumstances, but shall not be used for unrelated speculative hedging or to apply leverage to portfolio positions. Within the alternative investments portfolio, some leverage is permitted as defined and limited by the partnership agreements.

134

The plan's allocated target and ranges, as well as the actual weighted average asset allocation by investment categories, at December 31 was as follows:

	2011 Target Percentage	Range Percentage	Actual Percentage	2010 Actual Percentage
Equity				
Large capitalization	24	17 - 31	18	19
Small and mid capitalization	10	6 - 14	8	9
International	10	6 - 14	7	8
Alternative investments	15	20 -34	9	11
Fixed income				
Domestic core	16	0 - 21	17	15
Global emerging markets	13	0 - 18	14	12
Liability driven investments	12	0 - 45	20	16
Cash and short-term investments	0	0 - 5	7	10
Total			100	100

The Retirement Income Plan had no investments in the Parent's common stock as of December 31, 2011 and 2010.

The fair value of our Retirement Income Plan investments is generated using various valuation techniques. We follow the methodology discussed in Note 2. "Summary of Significant Accounting Policies," regarding pricing and valuation techniques, as well as the fair value hierarchy, for equity and fixed maturity securities and short-term investments held in the Retirement Income Plan.

The techniques used to determine the fair value the Retirement Income Plan's remaining invested assets are as follows:

For valuations of the mutual funds, we utilize a market approach wherein the quoted prices in the active market for identical assets are used. All of the mutual funds are traded in active markets at their net asset value per share. There are no restrictions as to the redemption of these investments nor do we have any contractual obligations to further invest in any of the individual mutual funds. These investments are classified as Level 1 in the fair value hierarchy.

The deposit administration contract is carried at cost, which approximates fair value. Given the liquid nature of the underlying investments in overnight cash deposits and other short term duration products, we have determined that a correlation exists between the deposit administration contract and other short-term investments such as money market funds. As such, this investment is classified as Level 2 in the fair value hierarchy.

For valuations of the investments in limited partnerships, fair value is based on the Retirement Income Plan's ownership interest in the reported net asset values as a practical expedient. The majority of the net asset values are reported to us on a one quarter lag. We assess whether these reported net asset values are indicative of market activity that has occurred since the date of their valuation by the investees: (i) by reviewing the overall market fluctuation and whether a material impact to our investments' valuation could have occurred; and (ii) through routine conversations with the underlying funds' general partners/managers discussing, among other things, conditions or events having significant impacts to their portfolio assets that have occurred subsequent to the reported date, if any. The majority of the limited partnership investments cannot be redeemed with the investees as our partnership agreements require our commitment for the duration of the underlying funds' lives. In the fourth quarter of 2010, we sold three of our limited partnership interests in the secondary market. As of December 31, 2011, there is no active plan to sell any of our remaining interests in the limited partnership investments; however, given the volatility in these investments over the recent past, we may continue to entertain potential opportunities to limit our exposure to these investments through the use of the secondary market. These limited partnerships have been fair valued using Level 3 inputs. The Retirement Income Plan has one limited partnership investment in a hedge fund that can be redeemed semi-annually subject to a 30 day notification of intent to redeem. Therefore, we are unable to redeem this investment at the net asset value reported to the plan at December 31, 2011 and 2010. However, we have determined that we have the ability to redeem this investment in the near term and the time between the redemption date and the valuation date is not significant enough to allow for a significant change in fair value. As a result of this determination, this fund has been fair valued using Level 2 inputs as of December 31, 2011 and 2010 using the net asset value of our ownership interest in partners' capital.

The following tables provide quantitative disclosures of the Retirement Income Plan's invested assets that are measured at fair value on a recurring basis:

Transfers in and/or out of Level 3	-
Fair value, December 31, 2010	\$ 17,179

The following table outlines a summary of our alternative investment portfolio by strategy and the remaining commitment amount associated with each strategy:

Alternative Investments (\$ in millions)	Carrying Value		2011 Remaining Amount
	December 31, 2011	December 31, 2010	
Equity long/short hedge	\$ 1.8	1.8	-
Private equity	12.6	14.5	4.2
Real estate	2.6	2.7	0.6
Total alternative investments	\$ 17.0	19.0	4.8

For a description of our private equity and real estate strategies, refer to Note 5. "Investments." Our Equity long/short hedge strategy invests opportunistically in equities and equity-related instruments in companies generally in the financial services sector. Investments within this strategy are permitted to be sold short in order to: (i) prospectively benefit from a correction in overvalued equities; and (ii) partially hedge portfolio assets due to the strategy's heavy weighting toward the financial sector.

At December 31, 2011, the Retirement Income Plan had contractual obligations that expire at various dates through 2022 to further invest up to \$4.8 million in alternative investments. There is no certainty that any such additional investment will be required. The Retirement Income Plan currently receives distributions from these alternative investments through the realization of the underlying investments in the limited partnerships. We anticipate that the general partners of these alternative investments will liquidate their underlying investment portfolios through 2022.

Contributions

We presently anticipate contributing \$8.4 million to the Retirement Income Plan in 2012, none of which represents minimum required contribution amounts.

Benefit Payments

(\$ in thousands)	Retirement Income Plan	Retirement Life Plan
Benefits Expected to be Paid in Future Fiscal Years:		
2012	\$ 7,291	342
2013	8,038	352
2014	8,740	360
2015	9,514	369
2016	10,467	377
2017-2021	69,022	1,980

Note 17. Share-Based Payments

The following is a brief description of each of our share-based compensation plans:

2005 Omnibus Stock Plan

The Parent's 2005 Omnibus Stock Plan ("Stock Plan") was approved effective as of April 1, 2005 by stockholders on April 27, 2005. With the Stock Plan's approval, no further grants were available under the: (i) Parent's Stock Option Plan III, as amended ("Stock Option Plan III"); (ii) Parent's Stock Option Plan for Directors, as amended ("Stock Option Plan for Directors"); or (iii) Parent's Stock Compensation Plan for Non-employee Directors, as amended ("Stock Compensation Plan for Non-employee Directors"), but awards outstanding under these plans and the Parent's Stock Option Plan II, as amended ("Stock Option Plan II"), under which future grants ceased being available on May 22, 2002, shall continue in effect according to the terms of those plans and any applicable award agreements.

Stockholders approved the amendment and restatement of the Stock Plan effective as of May 1, 2010 (the "Amended Stock Plan") on April 28, 2010. Under the Amended Stock Plan, the Board's Salary and Employee Benefits Committee ("SEBC") may grant stock options, stock appreciation rights ("SARs"), restricted stock, restricted stock units ("RSUs"), phantom stock, stock bonuses, and other awards in such amounts and with such terms and conditions as it shall determine, subject to the provisions of the Amended Stock Plan. Each award granted under the Amended Stock Plan (except unconditional stock bonuses and the cash component of Director compensation) shall be evidenced by an agreement containing such restrictions as the SEBC may, in its sole discretion, deem necessary or desirable and which are not in conflict with the terms of the Amended Stock Plan. The maximum exercise period for an option grant under this plan is ten years from the date of the grant. During 2011, we granted, net of forfeitures, 402,925 RSUs. During 2010, we granted, net of forfeitures, 374,153 RSUs, and experienced net restricted stock forfeitures of 820 shares. During 2009, we granted, net of forfeitures, 520,011 RSUs, and experienced net restricted stock forfeitures of 7,168 shares. We also granted options to purchase 238,790 shares during 2010, and 313,811 shares during 2009. No options were granted in 2011. As of December 31, 2011, 5,300,110 shares of the Parent's common stock remained available for issuance pursuant to outstanding stock options and restricted stock units granted under the Stock Plan and the Amended Stock Plan.

During the vesting period, dividend equivalent units ("DEUs") are earned on RSUs. The DEUs are reinvested in the Parent's common stock at fair value on each dividend payment date. We accrued 41,469 DEUs during 2011; 38,392 DEUs during 2010; and 32,088 DEUs in 2009. In addition, 33,532 DEUs were issued in 2011. The DEUs are subject to the same vesting period and conditions set forth in the award agreements for the RSUs.

Cash Incentive Plan

The Parent's Cash Incentive Plan ("Cash Incentive Plan") was approved effective April 1, 2005 by stockholders on April 27, 2005. Stockholders approved the amendment and restatement of the Cash Incentive Plan effective as of May 1, 2010 (the "Amended Cash Incentive Plan") on April 28, 2010. Under the Amended Cash Incentive Plan, the SEBC may

grant cash incentive units in such amounts and with such terms and conditions as it shall determine, subject to the provisions of the Amended Cash Incentive Plan. The initial dollar value of these grants will be adjusted to reflect the percentage increase or decrease in the total shareholder return on the Parent's common stock over a specified performance period. In addition, for certain grants, the number of units granted will be adjusted to reflect our performance on specified indicators as compared to targeted peer companies. Each award granted under the Amended Cash Incentive Plan shall be evidenced by an agreement containing such restrictions as the SEBC may, in its sole discretion, deem necessary or desirable and which are not in conflict with the terms of the Amended Cash Incentive Plan. We granted, net of forfeitures, 46,879 cash incentive units during 2011, 45,082 cash incentive units during 2010, and 46,349 cash incentive units during 2009.

Stock Option Plan II

As of December 31, 2011, 302,680 shares of the Parent's common stock remained available in the reserve for Stock Option Plan II, under which future grants ceased being available on May 22, 2002. Under Stock Option Plan II, employees were granted qualified and nonqualified stock options, with or without SARs, and restricted or unrestricted stock: (i) at not less than fair value on the date of grant; and (ii) subject to certain vesting periods as determined by the SEBC. Restricted stock awards also could be subject to the achievement of performance objectives as determined by the SEBC. The maximum exercise period for an option grant under this plan was ten years from the date of the grant.

During the vesting period, dividends are earned on the restricted stock and held in escrow subject to the same vesting period and conditions set forth in the award agreements. Effective September 3, 1996, dividends earned on the restricted shares were reinvested in the Parent's common stock at fair value. In connection with restricted stock awards granted under Stock Option Plan II, we issued, net of forfeitures, 97 restricted shares from the Dividend Reinvestment Plan ("DRP") reserves during 2010. We experienced net forfeitures of 679 restricted shares from DRP reserves during 2009.

Stock Option Plan III

As of December 31, 2011, there were 397,212 shares of the Parent's common stock in the reserve for Stock Option Plan III, under which future grants ceased being available with the approval of the Stock Plan. Under Stock Option Plan III, employees were granted qualified and nonqualified stock options, with or without SARs, and restricted or unrestricted stock: (i) at not less than fair value on the date of grant, and (ii) subject to certain vesting restrictions determined by the SEBC. Restricted stock awards also could be subject to achievement of performance objectives as determined by the SEBC. The maximum exercise period for an option grant under this plan was ten years from the date of the grant.

In connection with unvested restricted stock awards granted under Stock Option Plan III, we experienced restricted stock forfeitures of 1,924 shares during 2009. During the vesting period, dividends earned on restricted shares were reinvested in the Parent's common stock at fair value. We experienced net forfeitures of 23,285 restricted shares from the DRP reserve during 2009.

Stock Option Plan for Directors

As of December 31, 2011, 210,000 shares of the Parent's common stock remained in the reserve for the Stock Option Plan for Directors, under which future grants ceased being available with the approval of the Stock Plan. Non-employee directors participated in this plan and automatically received an annual nonqualified option to purchase 6,000 shares of the Parent's common stock at not less than fair value on the date of grant, which was on March 1. Options under this plan vested on the first anniversary of the grant and must be exercised by the tenth anniversary of the grant.

Stock Compensation Plan for Non-employee Directors

As of December 31, 2011 there were 94,290 shares of the Parent's common stock available for issuance pursuant to outstanding stock option awards under the Stock Compensation Plan for Non-employee Directors, under which future grants ceased being available with the approval of the Stock Plan. Under the Stock Compensation Plan for Non-employee Directors, Directors could elect to receive a portion of their annual compensation in shares of the Parent's common stock. There were no issuances under this plan in 2011 and 2010. We issued 960 shares under this plan during 2009.

Employee Stock Purchase Plan

On April 29, 2009, the Parent's stockholders approved the Parent's Employee Stock Purchase Plan (2009) ("ESPP"). This plan replaced the previous employee stock purchase savings plan under which no further purchases could be made as of July 1, 2009. Under the ESPP, there were 1,122,962 shares of the Parent's common stock available for purchase as of December 31, 2011. The ESPP is available to all employees who meet the plan's eligibility requirements. The ESPP provides for the issuance of options to purchase shares of common stock. The purchase price is the lower of: (i) 85% of the closing market price at the time the option is granted; or (ii) 85% of the closing price at the time the option is exercised. Shares are generally issued on June 30 and December 31 of each year. Under the current plan, we issued 131,705 shares to employees during 2011, 149,258 shares during 2010, and 190,845 shares during 2009.

Agent Stock Purchase Plan

On July 27, 2010, the SEBC approved the Parent's Amended and Restated Stock Purchase Plan for Independent Insurance Agencies ("Agent Plan") which made immaterial amendments to the plan approved by stockholders on April 26, 2006. Under the Agent Plan, there were 2,274,131 shares of the Parent's common stock available for purchase as of December 31, 2011. The Agent Plan provides for quarterly offerings in which our independent insurance agencies, and certain eligible persons associated with the agencies, with contracts with the Insurance Subsidiaries can purchase the Parent's common stock at a 10% discount with a one year restricted period during which the shares purchased cannot be sold or transferred. Under the Agent Plan, we issued 111,427 shares in 2011, 109,343 shares in 2010, and 146,570 shares in 2009, and charged to expense \$0.2 million in each year, with a corresponding income tax benefit of \$0.1 million in each year.

A summary of the stock option transactions under our share-based payment plans is as follows:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life in Years	Aggregate Intrinsic Value (\$ in thousands)
Outstanding at December 31, 2010	1,402,256	\$ 18.08		
Granted 2011	-	-		
Exercised 2011	135,196	11.26		
Forfeited or expired 2011	27,373	20.58		
Outstanding at December 31, 2011	1,239,687	\$ 18.78	5.20	\$ 2,381
Exercisable at December 31, 2011	1,130,901	\$ 19.08	4.95	\$ 2,135

The total intrinsic value of options exercised was \$0.8 million during 2011 and 2010, and \$0.4 million during 2009.

A summary of the restricted stock and RSU transactions under our share-based payment plans is as follows:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested restricted stock and RSU awards at December 31, 2010	1,241,900	\$ 16.85
Granted 2011	429,420	17.17
Vested 2011	361,305	22.45
Forfeited 2011	26,495	14.74

Unvested RSU awards at December 31, 2011 1,283,520 \$ 15.45

As of December 31, 2011, total unrecognized compensation cost related to unvested RSU awards granted under our stock plans was \$4.4 million. That cost is expected to be recognized over a weighted-average period of 1.8 years. The total intrinsic value of restricted stock and RSU vested was \$6.6 million for 2011, \$3.9 million for 2010, and \$7.9 million for 2009.

At December 31, 2011, the liability recorded in connection with our Cash Incentive Plan was \$8.8 million. The fair value of the liability is re-measured at each reporting period through the settlement date of the awards, which is three years from the date of grant based on an amount expected to be paid. A Monte Carlo simulation is performed to approximate the projected fair value of the cash incentive units that, in accordance with the Cash Incentive Plan, are adjusted to reflect our performance on specified indicators as compared to targeted peer companies. The remaining cost associated with the cash incentive units is expected to be recognized over a weighted average period of 1.1 years. The cash incentive unit payments made were \$3.0 million in 2011, \$1.8 million in 2010 and \$7.0 million in 2009.

In determining expense to be recorded for stock options granted under our share-based compensation plans, the fair value of each option award is estimated on the date of grant using the Black Scholes option valuation model ("Black Scholes"). The following are the significant assumptions used in applying Black Scholes: (i) the risk-free interest rate, which is the implied yield currently available on U.S. Treasury zero-coupon issues with an equal remaining term; (ii) the expected term, which is based on historical experience of similar awards; (iii) the dividend yield, which is determined by dividing the expected per share dividend during the coming year by the grant date stock price; and (iv) the expected volatility, which is based on the volatility of the Parent's stock price over a historical period comparable to the expected term. In applying Black Scholes, we use the weighted average assumptions illustrated in the following table:

	ESPP			All Other Option Plans		
	2011	2010	2009	2011	2010	2009
Risk-free interest rate	0.13	% 0.20	0.31	-	2.30	1.85
Expected term	6 months	6 months	6 months	-	5 years	5 years
Dividend yield	3.0	% 3.3	3.4	-	3.3	3.9
Expected volatility	19	% 28	64	-	34	32

The grant date fair value of RSUs is based on the market price of our common stock on the grant date, adjusted for the present value of the our expected dividend payments. The expense recognized for share-based awards is based on the number of shares or units expected to be issued at the end of the performance period and the grant date fair value, and is amortized over the requisite service period.

The weighted-average fair value of options and stock per share, including restricted stock and RSUs granted for the Parent's stock plans, during 2011, 2010, and 2009 is as follows:

	2011	2010	2009
Stock options	\$-	3.83	2.68
Restricted stock and RSUs	17.17	14.69	14.22
Directors' stock compensation plan	-	16.09	15.11
ESPP:			
Six month option	0.76	1.03	2.51
15% of grant date market value	2.62	2.35	2.49
Total ESPP	3.38	3.38	5.00
Agent Plan:			
Discount of grant date market value	1.62	1.59	1.39

The decrease in the six month option value of our ESPP shares in 2011 and 2010, compared to their respective prior years, is driven primarily by a reduction in the volatility of the Parent's common stock price. During 2009, as a result of the economic crisis and its impact on the global markets, particularly in the financial sector, the Parent's common stock prices experienced unprecedented volatility, whereas the volatility in 2010 and 2011 returned to more

normalized levels.

Share-based compensation expense charged against net income before tax was \$10.1 million for the year ended December 31, 2011 with a corresponding income tax benefit of \$3.5 million. Share-based compensation expense that was charged against net income before tax was \$12.2 million for the year ended December 31, 2010 and \$10.8 million for the year ended December 31, 2009 with corresponding income tax benefits of \$4.0 million and \$3.4 million, respectively.

Note 18. Related Party Transactions

William M. Rue, a Director of the Parent, is President of, and owns more than 10% of the equity of, Chas. E. Rue & Son, Inc., t/a Rue Insurance, a general independent insurance agency ("Rue Insurance"). Rue Insurance is an appointed independent agent of the Insurance Subsidiaries and of the discontinued operations of Selective HR, on terms and conditions similar to those of our other agents. Rue Insurance also places insurance for our business operations. Our relationship with Rue Insurance has existed since 1928.

The following is a summary of transactions with Rue Insurance:

Rue Insurance placed insurance policies with the Insurance Subsidiaries. Direct premiums written associated with these policies were \$7.8 million in 2011, \$7.2 million in 2010, and \$7.6 million in 2009. In return, the Insurance Subsidiaries paid commissions to Rue Insurance of \$1.2 million in 2011, \$1.3 million in 2010, and \$1.4 million in 2009.

Rue Insurance placed insurance coverage for us with other insurance companies for which Rue Insurance was paid commission pursuant to its agreements with those carriers. We paid premiums for such insurance coverage of \$0.2 million in 2011, \$0.3 million in 2010, and \$0.5 million in 2009.

Rue Insurance placed human resource outsourcing contracts with Selective HR resulting in revenues to Selective HR of approximately \$77,000 in 2009. In return, Selective HR paid commissions to Rue Insurance of approximately \$10,000 in 2009. These revenues are reflected in "Loss from discontinued operations, net of tax" in the Consolidated Statements of Income.

In 2005, we established a private foundation, The Selective Group Foundation (the "Foundation"), under Section 501(c)(3) of the Internal Revenue Code. The Board of Directors of the Foundation is comprised of some of the Parent's officers. We made contributions to the Foundation in the amount of \$0.4 million in 2011, 2010, and 2009.

Note 19. Commitments and Contingencies

(a) We purchase annuities from life insurance companies to fulfill obligations under claim settlements that provide for periodic future payments to claimants. As of December 31, 2011, we had purchased such annuities in the amount of \$8.4 million for settlement of claims on a structured basis for which we are contingently liable. To our knowledge, none of the issuers of such annuities have defaulted in their obligations thereunder.

(b) We have various operating leases for office space and equipment. Such lease agreements, which expire at various times, are generally renewed or replaced by similar leases. Rental expense under these leases amounted to \$11.6 million in 2011, \$11.4 million in 2010, and \$11.5 million in 2009. See Note 2(q) for information on our accounting policy regarding leases.

In addition, certain leases for rented premises and equipment are non-cancelable, and liability for payment will continue even though the space or equipment may no longer be in use. At December 31, 2011, the total future minimum rental commitments under non-cancelable leases were \$25.4 million and such yearly amounts are as follows:

(\$ in millions)

2012	\$9.0
2013	6.0
2014	4.0

2015	2.6
2016	2.0
After 2016	1.8
Total minimum payment required	\$25.4

(c) At December 31, 2011, we have contractual obligations that expire at various dates through 2022 to invest up to an additional \$56.9 million in alternative and other investments. There is no certainty that any such additional investment will be required. For additional information regarding these investments, see item (f) of Note 5. "Investments."

Note 20. Litigation

In the ordinary course of conducting business, we are named as defendants in various legal proceedings. Most of these proceedings are claims litigation involving our Insurance Subsidiaries as either: (a) liability insurers defending or providing indemnity for third-party claims brought against insureds; or (b) insurers defending first-party coverage claims brought against them. We account for such activity through the establishment of unpaid loss and loss adjustment expense reserves. We expect that the ultimate liability, if any, with respect to such ordinary course claims litigation, after consideration of provisions made for potential losses and costs of defense, will not be material to our consolidated financial condition, results of operations, or cash flows.

Our Insurance Subsidiaries are also from time-to-time involved in other legal actions, some of which assert claims for substantial amounts. These actions include, among others, putative class actions seeking certification of a state or national class. Such putative class actions have alleged, for example, improper reimbursement of medical providers paid under workers compensation and personal and commercial automobile insurance policies. Our Insurance Subsidiaries also are involved from time-to-time in individual actions in which extra-contractual damages, punitive damages, or penalties are sought, such as claims alleging bad faith in the handling of insurance claims. We believe that we have valid defenses to these cases. We expect that the ultimate liability, if any, with respect to such lawsuits, after consideration of provisions made for estimated losses, will not be material to our consolidated financial condition. Nonetheless, given the large or indeterminate amounts sought in certain of these actions, and the inherent unpredictability of litigation, an adverse outcome in certain matters could, from time-to-time, have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

Note 21. Statutory Financial Information

The Insurance Subsidiaries prepare their statutory financial statements in accordance with accounting principles prescribed or permitted by the various state insurance departments of domicile. Prescribed statutory accounting principles include state laws, regulations, and general administrative rules, as well as a variety of publications of the National Association of Insurance Commissioners ("NAIC"). Permitted statutory accounting principles encompass all accounting principles that are not prescribed; such principles differ from state to state, may differ from company to company within a state and may change in the future. The Insurance Subsidiaries do not utilize any permitted statutory accounting principles that materially affect the determination of statutory surplus, statutory net income, or risk-based capital ("RBC"). As of December 31, 2011, the various state insurance departments of domicile have adopted the March 2011 version of the NAIC Accounting Practices and Procedures manual in its entirety, as a component of prescribed or permitted practices.

The combined statutory capital and surplus of the Insurance Subsidiaries was \$1.1 billion (unaudited) in 2011 and in 2010. Excluding the recently-acquired MUSIC entity, the combined statutory net income of the Insurance Subsidiaries was \$26.5 million (unaudited) in 2011, \$86.9 million in 2010, and \$69.8 million in 2009.

The Insurance Subsidiaries are required to maintain certain minimum amounts of statutory surplus to satisfy their various state insurance departments of domicile. RBC requirements for property and casualty insurance companies are designed to assess capital adequacy and to raise the level of protection that statutory surplus provides for policyholders. Excluding MUSIC, the Insurance Subsidiaries combined total adjusted capital exceeded the authorized control level RBC, as defined by the NAIC, by 4.4:1 based on their 2011 unaudited statutory financial statements. MUSIC, based on its 2011 unaudited statutory financial statements, exceeded the authorized control level by 7.7:1.

² See Note 10. "Indebtedness" for a discussion of dividend restrictions.

³ These ranges of high and low prices of the Parent's common stock, as reported by the NASDAQ Global Select Market, represent actual transactions. Price quotations do not include retail markups, markdowns, and commissions. The range of high and low prices for common stock for the period beginning January 3, 2012 and ending February 17, 2012 was \$19.00 to \$17.25.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this report. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, our disclosure controls and procedures are: (i) effective in recording, processing, summarizing, and reporting information on a timely basis that we are required to disclose in the reports that we file or submit under the Exchange Act; and (ii) effective in ensuring that information that we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) is a process designed by, or under the supervision of, a company's principal executive and principal financial officers and effected by the Board, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework*.

Based on its assessment, our management believes that, as of December 31, 2011, our internal control over financial reporting is effective.

No changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) of the Exchange Act) occurred during the fourth quarter of 2011 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Attestation Report of the Independent Registered Public Accounting Firm

Our independent registered public accounting firm, KPMG, LLP has issued their attestation report on our internal control over financial reporting which is set forth below.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Selective Insurance Group, Inc.:

We have audited Selective Insurance Group, Inc.'s and subsidiaries' ("the Company") internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Selective Insurance Group, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on Selective Insurance Group, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Selective Insurance Group, Inc. and its subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Selective Insurance Group, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated February 24, 2012 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

New York, New York

February 24, 2012

Item 9B. Other Information.

There is no other information that was required to be disclosed in a report on Form 8-K during the fourth quarter of 2011 that we did not report.

PART III

Because we will file a Proxy Statement within 120 days after the end of the fiscal year ending December 31, 2011, this Annual Report on Form 10-K omits certain information required by Part III and incorporates by reference certain information included in the Proxy Statement.

Item 10. Directors, Executive Officers and Corporate Governance.

Information regarding our executive officers appears in Item 1. "Business." of this Form 10-K under "Executive Officers of the Registrant." Information about the Board and all other matters required to be disclosed in Item 10. "Directors, Executive Officers and Corporate Governance." appears under "Information About Proposal 1, Election of Directors" in the Proxy Statement. That portion of the Proxy Statement is hereby incorporated by reference.

Section 16(a) Beneficial Ownership Reporting Compliance

Information about compliance with Section 16(a) of the Exchange Act appears under "Section 16(a) Beneficial Ownership Reporting Compliance" in the "Information About Proposal 1, Election of Directors" section of the Proxy Statement and is hereby incorporated by reference.

Item 11. Executive Compensation.

Information about compensation of our named executive officers appears under "Executive Compensation" in the "Election of Directors" section of the Proxy Statement and is hereby incorporated by reference. Information about compensation of the Board appears under "Director Compensation" in the "Information About Proposal 1, Election of Directors" section of the Proxy Statement and is hereby incorporated by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information about security ownership of certain beneficial owners and management appears under "Security Ownership of Management and Certain Beneficial Owners" in the "Information About Proposal 1, Election of Directors" section of the Proxy Statement and is hereby incorporated by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Information about certain relationships and related transactions, and director independence appears under "Transactions with Related Persons" in the "Information About Proposal 1, Election of Directors" section of the Proxy Statement and is hereby incorporated by reference.

Item 14. Principal Accounting Fees and Services.

Information about the fees and services of our principal accountants appears under "Audit Committee Report" and "Fees of Independent Registered Public Accounting Firm" in the "Ratification of Appointment of Independent Registered Public Accounting Firm" section of the Proxy Statement and is hereby incorporated by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a) The following documents are filed as part of this report:

(1) Financial Statements:

The consolidated financial statements listed below are included in Item 8. "Financial Statements and Supplementary Data."

	Form 10-K Page
Consolidated Balance Sheets as of December 31, 2011 and 2010	90
Consolidated Statements of Income for the Years ended December 31, 2011, 2010, and 2009	91
Consolidated Statements of Stockholders' Equity for the Years ended December 31, 2011, 2010, and 2009	92
Consolidated Statements of Cash Flows for the Years ended December 31, 2011, 2010, and 2009	93
Notes to Consolidated Financial Statements, December 31, 2011, 2010, and 2009	94

(2) Financial Statement Schedules:

The financial statement schedules, with Independent Auditors' Report thereon, required to be filed are listed below by page number as filed in this report. All other schedules are omitted as the information required is inapplicable, immaterial, or the information is presented in the consolidated financial statements or related notes.

Schedule I	Form 10-K Page 152
------------	-----------------------------

Edgar Filing: SELECTIVE INSURANCE GROUP INC - Form 10-K

Condensed Financial Information of Registrant at December 31, 2011 and 2010 and for the years ended December 31, 2011, 2010, and 2009

Schedule II	Allowance for Uncollectible Premiums and Other Receivables for the years ended December 31, 2011, 2010, and 2009	155
Schedule III	Summary of Investments – Other than Investments in Related Parties at December 31, 2011	156
Schedule IV	Supplementary Insurance Information for the years ended December 31, 2011, 2010, and 2009	157
Schedule V	Reinsurance for the years ended December 31, 2011, 2010, and 2009	159

(3) Exhibits:

The exhibits required by Item 601 of Regulation S-K are listed in the Exhibit Index, which is incorporated by reference and immediately precedes the exhibits filed with or incorporated by reference in this Form 10-K.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.
