SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Fiscal Year Ended December 31, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from to Commission File Number: 001-35232

WAGEWORKS, INC.

Edgar Filing: WAGEWORKS, INC. - Form 10-K

(Exact name of Registrant as specified in its charter)

Delaware	94-3351864
(State or other jurisdiction of	(I.R.S. Employer
incorporation or organization)	Identification No.)

1100 Park Place, 4th Floor	
San Mateo, California	94403
(Address of principal executive offices)	(Zip Code)

(650) 577-5200

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.001 par value per share	The New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None.

Edgar Filing: WAGEWORKS, INC. - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted to its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes
No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer
	(Do
	not

	smaller
	reporting
Non-accelerated filer	company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's common stock, \$0.001 par value per share, held by non-affiliates of the registrant on June 30, 2014, the last business day of the registrant's most recently completed second fiscal quarter, was \$1,569,799,789 (based on the closing sales price of the registrant's common stock on that date). This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of February 19, 2015, there were 35,540,372 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for its 2014 Annual Meeting of the Stockholders (the "2014 Proxy Statement"), to be filed with the Securities and Exchange Commission are incorporated by reference into Part III of this Annual Report where indicated.

Forward Looking Statements

This Annual Report on Form 10-K contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. Statements that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements are often identified by the use of words such as, but not limited to, “anticipate,” “believe,” “can,” “continue,” “could,” “estimate,” “expect,” “intend,” “plan,” “project,” “seek,” “should,” “target,” “will,” “would” and similar expressions or variations intended to identify forward-looking statements. Such statements include, but are not limited to, statements concerning tax-advantaged consumer-directed benefits, market opportunity, our future financial and operating results, investment strategy, sales and marketing strategy, management’s plans, beliefs and objectives for future operations, technology and development, economic and industry trends or trend analysis, expectations about seasonality, opportunity for portfolio purchases, channel partnerships, private exchanges, operating expenses, anticipated income tax rates, capital expenditures, cash flows and liquidity. These statements are based on the beliefs and assumptions of our management based on information currently available to us. Such forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. You should not place undue reliance on these forward-looking statements which speak only as of the date of this Annual Report on Form 10-K. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such events.

Item 1. Business

Corporate Information

WageWorks was incorporated as a Delaware corporation in 2000. Our website address is www.wageworks.com. We make available on our website, free of charge, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (“SEC”). Our SEC reports can be accessed through the Investor Relations section of our website. The information found on our website is not part of this or any other report we file with or furnish to the SEC.

Overview

We are a leader in administering Consumer-Directed Benefits, or CDBs, which empower employees to save money on taxes while also providing corporate tax advantages for employers. We are solely dedicated to administering CDBs, including pre-tax spending accounts such as health and dependent care Flexible Spending Accounts, or FSAs, Health Savings Accounts, or HSAs, Health Reimbursement Arrangements, or HRAs, as well as commuter benefit services, including transit and parking programs, wellness programs and other employee spending account benefits, in the United States. We also administer Consolidated Omnibus Budget Reconciliation Act, or COBRA, continuation services to employer clients.

We deliver our CDB programs through a highly scalable delivery model that employer clients and their employee participants may access through a standard web browser on any internet-enabled device, including

computers, smart phones and other mobile devices such as tablet computers. Our on-demand delivery model eliminates the need for our employer clients to install and maintain hardware and software in order to support CDB programs and enables us to rapidly implement product enhancements across our entire user base.

Our CDB programs assist employees and their families in saving money by using pre-tax dollars to pay for certain of their healthcare, dependent care and commuter expenses. Employers financially benefit from our programs through reduced payroll taxes, even after factoring in our fees. Under our FSA, HSA and commuter programs, employee participants contribute funds from their pre-tax income to pay for qualified out-of-pocket healthcare expenses not fully covered by insurance, such as co-pays, deductibles and over-the-counter medical products or for commuting costs.

These employee contributions result in savings to both employees and employers. As an example, based on our average employee participant's annual FSA contribution of approximately \$1,300 and an assumed personal combined federal and state income tax rate of 35%, an employee participant will reduce his or her taxes by approximately \$455 per year by participating in an FSA. Our employer clients also realize payroll tax (i.e., FICA and Medicare) savings on the pre-tax contributions made by their employees. In the above FSA example, an employer client would save approximately \$56 per participant per year, even after the payment of our fees.

Under our HRA programs, employer clients provide their employee participants with a specified amount of available reimbursement funds to help their employee participants defray out-of-pocket medical expenses such as deductibles, co-insurance and co-payments. All amounts paid by the employer into HRAs are deductible by the employer as an ordinary business expense and are tax-free to the employee.

Table of Contents

We administer COBRA continuation services to employer clients to meet the employer's obligation to make available continuation of coverage for participants who are no longer eligible for the employer's COBRA covered benefits. As part of our COBRA program, we offer a direct billing service where former employee participants pay for coverage they elect to continue and we ensure our employer clients meet the challenging aspects of COBRA compliance and administration.

We market and sell our CDB programs through multiple channels, including direct sales to large enterprises, direct sales and through brokers to small-and medium-sized businesses, or SMBs, direct sales to industry purchasing and affiliate groups, through channel partners and within private exchanges. We administer enrollment, eligibility, billing and payment processing services to a customer for purposes of assisting in the administration of their public health insurance exchange business. Our enterprise sales force targets Fortune 1000 companies and generates new large account relationships through employer prospecting, consultant relationships and strategic partnerships. Our SMB distribution channel complements our enterprise sales channel. It consists of third-party advisors and institutional brokers that sell our CDB programs along with their own complementary products to SMBs. Our average sales cycle ranges from approximately two months for SMBs to six to nine months for our large institutional clients.

Our CDB agreements with our larger employer clients, which we refer to as enterprise clients, are typically for three-year terms and provide for monthly fees based on the number of employee participants enrolled in our programs. We price our services based on the estimated number and types of claims, whether payment processing and client support activities will be provided within or outside of the United States, the estimated number of calls to our customer support center and any specific client requirements. Almost all of the healthcare benefit plans we service on behalf of our enterprise clients are subject to contractual minimum monthly billing amounts. Typically, such minimum billing amounts are subject to upward revision on a monthly basis as our employer clients hire new employees who elect to participate in our programs, but generally are not subject to downward revision when employees leave their employers because we continue to administer those former employee participants' accounts for the remainder of the plan year. For our SMB clients, our agreements are typically for one to three year terms and the monthly fee remains constant for the plan year. In some cases, the agreements provide that the monthly fee is subject to upward revision when there is a 10% or greater increase in the number of employee participants during the plan year. In addition, we derive a portion of our revenues from interchange fees that we receive when employee participants use the prepaid debit cards we provide to them for healthcare and commuter expenses.

At January 31, 2015, we had over 4 million employee participants from approximately 45,000 employer clients. Our participant counts do not include our TransitChek Basic program participants, as that fare media is shipped directly to the employers and then the employers distribute the products to their employee base as the demand presents. We believe that January 31 is the most appropriate point-in-time measurement date for annual plan metrics. Although plan changes and the entry and exit of employers and participants from our programs are usually decided late in the calendar year during open enrollment to be effective on January 1, it is not unusual for employers to still be submitting updated files of participants in early January. While updates can be delayed past January, any changes from such late updates are usually minimal. Consequently, we believe the January 31 point-in-time measurement date is the most appropriate date to use as a baseline. In 2014, employee participants used over 4.5 million WageWorks prepaid debit cards.

Part of our growth strategy is the acquisition and integration of TPAs, which we refer to as portfolio purchases. We completed the portfolio purchase of Crosby Benefit Systems, Inc., or CBS, in May 2013 and the acquisition of CONEXIS Benefits Administrators, LP, or CONEXIS, in August 2014.

Our Services

Flexible Spending Accounts

Healthcare

We offer flexible spending accounts, or FSAs, which are employer-sponsored CDBs that enable employees to set aside pre-tax dollars to pay for eligible healthcare expenses that are not generally covered by insurance, such as co-pays, deductibles and over-the-counter medical products, as well as vision expenses, orthodontia, medical devices and autism treatments. Employers benefit from payroll tax savings on the pre-tax FSA contributions from the employee.

Table of Contents

During each annual open enrollment period, an employee elects an amount to be placed into an FSA for the following plan year. The contributed amount is then deducted in equal increments out of each paycheck on a pre-tax basis over the plan year. The entire annual election amount is available to the participant for use starting on the first day of the plan year and cannot be changed except for the occurrence of certain life events such as a birth, death, marriage or divorce. During the course of the plan year, we are able to automatically process a substantial majority of our employee participants' claims for reimbursement. The remaining claims for reimbursement are independently adjudicated by us to ensure that FSA funds are used only for qualified healthcare expenses. If an employer has not elected the new carryover option that became available under Notice 2013-71 issued by the IRS and Treasury on October 31, 2013, any unused funds that remain in the account at the end of the plan year are forfeited by the employee participant and revert to the employer. However, with the modification of the long standing "Use-it-or-Lose-it Rule", employers can amend their FSA plans to allow for a carryover of up to \$500 of unused amounts remaining at the end of a plan year in a health FSA to be paid or reimbursed to plan participants for qualified medical expenses incurred during the following plan year, provided that the health FSA plan does not also incorporate the grace period rule. This change to the "Use-it-or-Lose-it Rule" is a benefit to employers as well as employees as participants no longer risk losing their hard earned money or find themselves spending the money on unnecessary items to avoid forfeiture of any funds and employers get additional FICA and Medicare savings as more employees participate in the health FSA. Employers will still receive certain forfeitures as the carryover is limited to \$500 and participants will still voluntarily or involuntarily terminate employment during a plan year. Forfeited funds are generally used by the employer to defray the administrative expenses of the FSA plans. Forfeitures also reduce excess claims costs that may have been incurred by employee participants who voluntarily or involuntarily leave their employ before the end of a plan year.

The IRS imposes a \$2,500 limit, indexed to inflation, on pre-tax dollar employee contributions made to a healthcare FSA for plan years that begin on or after January 1, 2014. The carryover of up to \$500 does not count against or otherwise affect the indexed \$2,500 salary reduction limit applicable to each plan year. Employers themselves are able to contribute additional amounts in excess of this statutory limit, and may choose to do so in an effort to mitigate the impact of rising healthcare costs on their employees.

Dependent Care

We also offer FSA programs for dependent care plans. These plans allow employees to set aside pre-tax dollars to pay for eligible dependent care expenses, which typically include child care or day care expenses but may also include expenses incurred from adult and elder care. Current laws and regulations limit the amount of pre-tax dollars employees can contribute to dependent care FSAs to \$5,000 per tax year. Like healthcare FSAs, employers can also contribute funds to employees' dependent care FSAs, subject to a statutory \$5,000 annual limit on total contributions. As with healthcare FSAs, employers realize payroll tax savings on the pre-tax dependent care FSA contributions made by their employees.

Health Reimbursement Arrangements

We offer employer-funded health reimbursement arrangements, or HRAs. Under HRAs, employers provide their employees with a specified amount of reimbursement funds that are available to help employees defray their out-of-pocket healthcare expenses, such as deductibles, co-insurance and co-payments. HRAs may only be funded by employers and, while there is no limitation on how much employers may contribute, employers are required to establish the programs in such a way as to prevent discrimination in favor of highly compensated employees. HRAs must either be considered an excepted benefit (for example, a dental-only HRA or a retiree HRA) or be integrated with another group health plan. HRAs can be customized by employers so employers have the freedom to determine

what expenses are eligible for reimbursement under these arrangements. At the end of the plan year, employers have the option to allow all, or a portion, of the unused funds to roll over and accumulate year-to-year if not spent. All amounts paid by employers into HRAs are deductible by the employer and tax-free to the employee.

Health Savings Accounts

We also administer health savings accounts, or HSAs, for employers that allow employee participants to invest funds to be used for qualified healthcare expenses at any time without federal tax liability or penalty. Such funds are also exempt from payroll taxes for employers. Both employees and employers can make contributions to an HSA. HSA funds are held by a custodian, accumulate year-to-year if not spent and are portable if a participant leaves his employer. Our HSA programs are designed to offer employers a choice of third party custodian to hold the funds as well as a variety of investment options within each custodial offering that enables employers the opportunity to explore a broader assortment of funds to offer their employees.

In order to be eligible for an HSA, an employee must be enrolled in a qualified High Deductible Health Plan, or HDHP, that is HSA-compatible and not be covered by any other impermissible coverage. HSAs have annual contribution limits. For 2014, the annual HSA contribution limit was \$3,300 for an individual and \$6,550 for a family, with allowable catch-up annual contributions of \$1,000 for those aged 55 and older so that those individuals can accumulate adequate funds to meet their healthcare expense obligations. Withdrawals for non-medical expenses are treated similarly to those in an individual retirement account. Specifically, such withdrawals may provide tax advantages if taken after retirement age, and may incur penalties if taken earlier.

Table of Contents

Commuter Programs

We also offer qualified transportation fringe benefits. The federal tax code currently permits employers to provide the following commuter benefits to employees on a tax-free basis:

- qualified parking;
- transit passes;
- transportation in a commuter highway vehicle, or vanpooling, if such transportation is in connection with travel between the employee's residence and place of employment; and
- qualified bicycle commuting reimbursement.

For commuter benefits, the maximum monthly amount that employees can exclude from gross income for federal income tax purposes and, in most cases, state income tax purposes is subject to a statutory limit that is periodically adjusted for inflation. For 2014, the monthly maximum is \$130 for transit or vanpooling, \$250 for parking and \$20 for bicycle reimbursement. The Tax Increase Prevention Act of 2014, which was signed into law on December 19, 2014, retroactively adjusted the pretax limit for transit passes and vanpooling for 2014 to \$250.

We offer five variations of pre-tax commuter benefit programs: Commuter Order Model (COM), Commuter Account Model (CAM), Commuter Express, TransitChek Premium and TransitChek Basic. Each of these programs is described below.

While these programs differ in terms of funding, implementation and available services, they include the following common features unless otherwise noted:

- home delivery of transit passes and vouchers (other than TransitChek Basic);
- electronic loading of transit agency smartcards (other than TransitChek Basic);
- an express electronic payment feature for select transit and vanpool operators (other than TransitChek Basic);
- access to transit vouchers;
- a prepaid debit card used to pay for transit purchases or parking expenses;
- a direct monthly payment to parking providers for eligible parking (other than TransitChek Basic);
- Park-n-Ride Support, which provides parking at or near transit stations or stops (other than TransitChek Premium and TransitChek Basic);
- a cash reimbursement process for parking, vanpool, and certain other transit expenses (other than TransitChek Basic);
- employer managed parking, which includes support for employer owned, managed, or leased parking, including customization capability by parking facility (COM only); and
- the employer usually recognizes a financial benefit because it does not pay FICA and Medicare tax on amounts contributed by its employees.

Under our COM, which we target to medium-sized and larger enterprise clients, employees place orders for transit, vanpool or parking benefits through our website or our toll-free customer service center. Employers pay us for transit and parking orders in advance. Employers either provide the benefit as a tax-free employer-paid fringe benefit, or reimburse themselves through payroll deductions from the participants, or a combination of both, all of which are exempt from payroll and federal income taxes and, in most cases, state income taxes as well, up to a statutory monthly cap. In addition to the tax-free pretax payroll deductions, employees may also supplement the amounts in their account with their own personal funds, although such supplemental funds, which may be made through payroll deductions, are contributed on an after-tax basis.

Under our CAM, which we target to medium-sized and larger enterprise clients, and particularly to those clients in the public sector, employees make pretax payroll deduction elections that employers use to fund accounts that we maintain. These deductions are exempt from payroll and federal income taxes and, in most cases, state income taxes as well, up to a statutory monthly cap. Participants use the funds in their accounts either automatically to fund a prepaid debit card that can be used to make transit or parking purchases at eligible locations or to purchase a transit or parking pass directly on our website. In addition to the payroll deductions, employees may also supplement the amounts in their account with their own personal funds, although such supplemental funds are contributed on an after-tax basis.

Under our Commuter Express program, which we target to SMBs, employers create transit and parking accounts on behalf of their employees using a web-based application on our proprietary platform. Employees then designate a monthly election amount, the employer submits the appropriate funds to us and we deposit those funds into a transit or parking account, which can be used to fund a variety of transit and parking options. All such employee elections are exempt from federal income taxes and, in most cases, state income taxes as well, up to a statutory monthly cap. Employees may also supplement the amounts in their account with their own personal funds, although such supplemental funds are contributed on an after-tax basis.

Table of Contents

Under our TransitChek Premium program, which we target primarily to SMBs in the greater New York Metropolitan market, employers offer their employees the ability to enroll for transit, vanpool, parking or bicycle benefits through our TransitChek Account Management (TAMS) website or our toll-free customer service center. Employer clients pay us for the selected benefit in advance. Other than the bicycle benefit, employer clients either provide the benefit as tax-free employer-paid fringe benefit, or reimburse themselves through payroll deductions from the participants, or a combination of both, all of which are exempt from payroll and federal income taxes and, in most cases, state income tax as well, up to a statutory monthly cap. In addition to the tax-free fringe and pretax payroll deductions, employees may also supplement the amounts in their account with their own personal funds, although such supplemental funds, which may be made through payroll deductions, are contributed on an after-tax basis. The bicycle benefit may only be offered as an employer-paid fringe benefit. In all cases, the elections are exempt from federal income taxes and, in most cases, state income taxes as well, up to the statutory monthly cap.

Under our TransitChek Basic program, employee participants enroll through their employers for pre-tax commuter benefit programs. Employers may offer only transit and parking benefits under this program. These benefits may be offered as a monthly pre-tax election deducted from an employee's salary, a tax-free employer-paid fringe benefit, or a combination of both. Employer clients order products in bulk on behalf of their employees and handle the administration and distribution of the benefit to their employee participants. In all cases, the elections are exempt from federal income taxes and, in most cases, state income taxes as well, up to a statutory monthly cap.

Under all our pre-tax commuter benefit programs, employers usually recognize a financial benefit through the reduction of FICA and Medicare tax obligations. Whether the programs are offered as a pre-tax election deducted from an employee's salary, a tax-free employer-paid fringe, or a combination of both, the amount of the benefit, up to the statutory monthly cap, is excluded from the employee's gross taxable pay resulting in lower payroll taxes.

Our commuter programs include a parking catalog with over 4,900 selectable locations and purchasable transit products from over 650 transit operators covering every major metropolitan area, and currently we fulfill over 11.5 million commuter orders each calendar year, including passes, smartcard loads, direct pay loads, parking payments, vanpool vouchers and commuter cards, to commuters and their employers on an annual basis. We sell our commuter program to employers of all sizes and industries.

COBRA

We offer Consolidated Omnibus Budget Reconciliation Act, or COBRA, continuation services to employer clients to meet the employer's obligation to make available continuation of coverage for participants who are no longer eligible for the employer's COBRA covered benefits which includes medical, dental, vision, HRAs and certain healthcare FSAs. COBRA requires employers to make health coverage available for terminated employees for a period of up to 36 months post-termination. As part of our COBRA program, we offer a direct billing service where former employee participants pay for coverage they elect to continue. We handle the accounting and customer service for these separated employees, as well as interfacing with the carrier regarding the employees' eligibility. At January 31, 2015, we provided COBRA services to approximately 15,000 employer clients.

Our Employer Clients

As of January 31, 2015, we had approximately 45,000 employer clients across a broad range of industries with over 4 million participating employees in all 50 states. Our employer clients include many of the Fortune 100 and Fortune 500 companies.

Our Technology Platforms

We run our services on three distinct on-demand technology platforms that have been designed to be highly scalable, and we closely monitor utilization of all aspects of our platforms for capacity planning purposes. Our existing infrastructure has been designed with sufficient capacity to meet our current and planned future needs.

The majority of our accounts run on our integrated and scalable proprietary platform, which we call our v5 platform. We generally use our v5 platform for medium-sized and enterprise clients. Our v5 platform supports all account administrative functions and provides integration with the systems used by employer clients, payment networks, health plans and key suppliers. Our v5 platform offers employer clients and employee participants a variety of payment features, in addition to traditional reimbursement, for our healthcare, commuter and other employee spending plans. Our v5 platform features a flexible, rules-based engine that includes multi-wallet functionality and is highly configurable to accommodate custom client plan designs and service requests. This multi-wallet functionality allows us to include more than one type of healthcare account (FSA, HRA and HSA) on one card, and helps ensure that funds that are otherwise subject to forfeiture at the end of a plan year are used first to pay for eligible expenses. Our v5 platform also allows for automated file interfacing with clients and external vendors, including card processors, custodian banks, health plan providers, claims and payment vendors. We have a daily settlement system and have implemented internal reporting and monitoring systems to ensure quality control on a daily basis.

Table of Contents

In addition to our v5 platform, we also operate a technology platform known as WinFlexOne, which has been specifically designed and enhanced to address the needs of SMBs. While the overall features and capabilities of WinFlexOne are comparable to v5, WinFlexOne utilizes a simpler set of interfaces and product configurations that better accommodate the more limited administrative capabilities and needs of small employers.

Our third primary technology platform, known as Complink, is used to provide COBRA and direct bill services to our SMB and enterprise clients. This feature-rich, integrated platform automates COBRA and direct bill administration activities and operations, and helps to ensure the administration of these programs in compliance with applicable law.

In 2014, we continued to develop and implement new features to enhance the participant and client user experience on our enterprise platform. These efforts touched all areas, including the participant mobile application (mobile app), participant website, client website, reporting, plan design and administration.

We continued our focus on the mobile experience by introducing a new mobile app with an updated look and feel. New app features allow participants to submit commuter and wellness claims, direct payments to healthcare and dependent care providers, and choose between text messages and emails for their account alerts and notifications.

The participant site was enhanced with self-service tools, including a robust search feature for claims and activity and a streamlined online claims experience. HSA enhancements included two new HSA calculators, visibility to incentive funding, and monitoring HSA contributions compared to the IRS maximum. A new web security features page provides an overview of how we protects user data and tips for participants to better protect their information.

Our client-focused enhancements included additional customization features available across the platform, additional carryover and plan design options, more self-service tools and additional reports. We also continued to implement enhancements to our internal applications, consolidate internal platforms, and automate processes to more efficiently implement and serve our users.

Operations

Operation Support Services

We provide operational support services to our clients, including customer support center servicing and claims processing.

Our customer support center servicing team is responsible for handling all incoming calls from our employee participants and is focused on continually improving the participants' customer service experience. Our team is trained to provide support on all our product offerings and is cross trained to support our claims servicing team. The customer support center servicing team is responsible for resolving any issues or problems an employee participant may have, including: education as to how our programs work; to what benefits an employee participant may be entitled; how to submit a claim for reimbursement; and why an employee participant may need to provide additional detail before a particular transaction is approved. We also have an executive escalations team that is trained to respond to any significant service issues that arise. Our customer support center team serviced approximately 4.2 million calls in 2014.

Our claims servicing team is responsible for processing all incoming claims for payment or reimbursement directly to providers or participants. This team reviews and adjudicates claims to ensure they meet all compliance and employer plan requirements and communicates with participants regarding the status of their claims using our in-house claims

center technology tool. Like the customer support center servicing team, the claims servicing team is trained to support the customer support center servicing team when demand dictates. In 2014, the claims servicing team processed approximately 9.9 million claims and card use verification forms.

In an effort to increase our service efficiency and maintain our high-quality high-touch approach, we outsource and train additional resources that we can use to support our customer support center and claims services teams during busy times such as open enrollment. All of these outsourced resources go through the same rigorous training as our own customer support center and claims servicing teams, and we believe that they provide the same level of quality service as our own employees.

Our operations support team is also responsible for processing and coordinating all activities required to support our high volume transaction business, including:

- managing prepaid funds and reimbursement payments from client employers to settle participant transactions;
- monitoring all card spending, authorizations and settlements with the transaction processors;
- delivering electronic and paper statements directly to participants;
- delivering “explanation of benefits” forms directly to participants;
- delivering healthcare and commuter cards and passes directly to participants; and
- managing process improvement projects across our organization.

Table of Contents

Our operations support team utilizes both our v5 and WinFlexOne on-demand platforms to deliver products and services to clients and participants. In addition, we have supporting applications provided by third party vendors, the most significant of which is Fidelity National Information Services, which provides card network switching and settlement services, and Alegeus, which handles fulfillment of our printed healthcare statements, explanation of benefits and payment statements and open enrollment guides.

In 2014, our operations team delivered over 4.5 million healthcare and commuter prepaid debit cards, and we fulfill over 11.5 million commuter orders each calendar year.

We also have a professional services team that is responsible for coordinating all activities related to the implementation, transition and on-board of new employer clients, assisting our existing clients with the addition of new services to their accounts and transitioning clients that we acquire from portfolio purchases to our platforms. This team also coordinates project planning to ensure that the startup of new programs coincide with the employer client's new plan year and acts as a client liaison to keep the client informed of the implementation status. In addition, our professional services team coordinates the completion of requests for proposals in response to new business prospects and works directly with all other functions in our organization to ensure each employer client receives consistent quality service.

Employer Relationship Management

We assign each employer client to a regionally aligned account team with a relationship manager who functions as the client's single point of contact. Our relationship managers are trained on all of our account offerings and receive prompt updates from internal subject matter experts on how regulatory or operational changes may impact a particular program or procedure. Our account consultants, who are responsible for day-to-day management of client data, are subject matter experts on new or specific aspects of our business and work closely with the relationship manager to ensure that our employer clients receive high-quality consultative service.

We provide assistance to our enterprise clients with their open enrollment processes. Our employer clients have an annual open enrollment period during which their employees have the opportunity to enroll, re-enroll or change their benefit elections for the upcoming plan year. We provide our employer clients with tools, such as educational information, calculators, video, webinars and onsite support to help facilitate their open enrollment and help drive employee participation in our programs.

We also provide both pre- and post-enrollment consultation services to employer clients to ensure that they utilize our services in a way that fits with their overall approach to employee benefit plans for the upcoming year. These consultations include providing employer clients with robust data regarding spend patterns, participation and service utilization, such as website usage, online claims submissions and participant feedback, to ensure maximum employee participation in their benefits programs. Our Employer Relationship Management team also ensures that any platform or product changes are properly communicated to and adopted by our clients. Examples of these changes include service enhancements, such as online claims processing, the launch of our mobile application and website process changes.

We have relationships with a significant number of regional transit authorities, and have a large catalog of commuter pass offerings. Our Employer Relationship Management team ensures that our commuter clients' employee participants are kept informed about rate changes, new pricing schemes and the adoption of new technologies, such as smart cards.

Sales and Business Development

We grow our employer client base through our various sales channels and through other business development efforts.

Sales

We sell our CDB programs to our employer clients through five different sales channels, each of which targets a distinct group of clients.

Direct Sales. Our direct sales force targets Enterprise, Mid-market and SMB companies and generates new account relationships through employer prospecting, consultant relationships and strategic partnerships. Our Enterprise team focuses on Fortune 1000 employers while our Mid-market and SMB teams focus on employers with fewer than 10,000 employees. Our sales process includes responding to requests for proposals, making client presentations and providing demonstrations of our v5 platform, and is focused on both securing new accounts as well as cross-selling additional products to existing clients.

SMB Distribution Channel. Our SMB distribution channel complements our direct sales channel and consists of third party advisors, including insurance agents and benefits consultants who typically have two to three enterprise clients and several hundred smaller employer clients, and institutional resellers, including regional and national insurance carriers, health plans, payroll providers, commercial banks and TPAs, who sell our CDB programs to smaller employers along with their own complementary products. We provide CDB programs to our resellers who either rebrand our programs under their own name or co-brand the programs with us.

Table of Contents

Group Purchasing Organizations. We also sell our programs through group purchasing organizations in which we negotiate a standard service contract with group purchasing organizations that are formed by industry specific employers to cover their members. Once the standard contract and pricing have been negotiated, we are able to add additional employers that are members of the group at a low incremental cost.

Channel Partnerships. Channel partnerships involve an existing provider agreeing to transition its CDB clients to us over a defined period of time for an agreed upon purchase price. In these cases, we negotiate a master agreement with the channel partner that outlines the details of transitioning the CDB clients from their platform to ours. In all cases, we negotiate and execute new agreements (including Business Associate Agreements) with the transitioned clients and implement them as new business. These channel partnerships also have a resale and referral component to them so we stand to derive additional opportunities from these arrangements.

Private Exchanges. The private exchange marketplace offers another opportunity for us to sell our programs. There are different private exchange models, some that cater to enterprise businesses and others that focus on mid-market and SMB companies. Depending on the type of exchange at issue, we have an opportunity to offer some or all of our products. With these relationships, which can be exclusive or non-exclusive, we establish a standard master agreement with the private exchange partner and then provide services to companies participating in such exchange that decide to include our products in their defined contribution offering to their employee base.

We also sell our customer service, enrollment, eligibility, billing and payment processing services to a customer for purposes of assisting in the administration of their public health insurance exchange business.

Business Development

In addition to our sales channels, we utilize portfolio purchases as a business development strategy to broaden our employer client base and to acquire new employer clients. Since 2007, we have purchased CDB portfolios of seven TPAs: MHM Resources, or MHM, in September 2007, Creative Benefits, or CB, in September 2008, Planned Benefit Systems, or PBS, in August 2010, the CDB assets of a division of Fringe Benefits Management Company, or FBM, in November 2010, CS in January 2012, BCI in December 2012 and CBS in May 2013. In addition, we have completed two acquisitions, TC in February 2012 and CONEXIS in August 2014. We migrate acquired clients to our proprietary technology platforms over time following the completion of a portfolio purchase. The acquired portfolios often contain a mix of large employer clients and SMB clients. In general, larger clients will be transitioned to our v5 platform and smaller clients will be transitioned to the WinFlexOne platform. This process is usually completed over a 12-to-24-month period. In connection with these portfolio purchases, we have leveraged the ease of integration and efficiencies afforded by our on-demand software platforms and cross-sold additional CDB products and services to many acquired employer clients.

Marketing

We market ourselves as a leader in administering CDBs through three primary channels:

Public Communications

Our public communications efforts include:

- Our public websites, which include information about WageWorks, our CDB programs and developments in the CDB industry;

- Our public social media sites, which include information about our products and company, the industry, and general information about healthcare and commuting designed for general public;
- Our nationwide media campaign to educate the public about CDBs, which includes print, online and broadcast media stories, as well as utilization of social media;
- Participation in trade shows, conferences and other events with the goal to educate employers, employees, brokers, and others in the industry about CDBs and about WageWorks practices;
- Direct outreach to educate employers or employees via promotions, street teams, seat drops, that focus on explaining the nature of CDBs;
- Partnerships with other providers in the industry that share the same goal to educate the public about CDBs; and
- Involvement with various industry organizations, such as the Employers Council on Flexible Compensation, the Special Interest Group for IIAS Standards, the HSA Council and the Society of Human Resource Management.

Client Communications

Our client communications initiatives include:

8

Table of Contents

- Updating the public websites and our owned social media properties to educate clients on the state of the industry and news about WageWorks;
 - Publishing client newsletters and other direct mail or email messages with information about us, our products and the industry;
 - Providing clients with educational programs, such as webinars, case studies, savings examples and white papers via online and offline channels;
 - Creating education and awareness tools for employees to support clients' annual open enrollment processes, including our annual open enrollment webinar series, planning support, materials gallery, and custom marketing plans, where applicable; and
 - In cooperation with our compliance team, providing clients with regulatory updates and guidance as they occur.
- Participant Communications

Our participant communications efforts include:

- Providing online or offline open enrollment materials that are easy for employees to understand and use to make a decision about participation;
- Preparing welcome materials and introductory guides to help new participants get started;
- Providing ongoing educational resources for participants regarding program features, benefits and regulatory changes;
- Ongoing updates on how to make the best use of the benefit via email messaging; and
- Deep product education and help related content for participants featured on all owned websites and designed owned social properties.

Partner/Broker Communications

Our partner and broker communication efforts include:

- Updates about our industry and our offerings to all public websites and our owned social media properties;
- Designated events to educate partners, brokers and channels about us; and
- Email updates or offline updates about WageWorks and the state of the industry.

We also regularly engage in advocacy efforts to educate legislators and regulators about the importance of retaining and expanding the availability of CDBs for employees. For example, we worked closely with regulators to modify the use it or lose it rule resulting in the ability to carryover unused FSA dollars to future plan years. In addition, our agency comment letters improved the mechanical aspects of Health Reimbursement Arrangements by allowing for simplified assessment of when an HRA is integrated and clarifying that certain HRAs can be considered excepted benefits. We continue to work on the legislative front for transit to be included in a tax extenders package and for permanent parity between transit and parking.

Government Regulation

Our business is subject to extensive, complex and rapidly changing federal and state laws and regulations.

IRS Regulations

We are subject to applicable Internal Revenue Service regulations, which lay the foundation for tax savings and eligible expenses under the CDB programs we administer. Each year, the IRS issues guidance regarding employee plans.

ERISA

Certain of our CDB programs are covered by the Employee Retirement Income Security Act of 1974, as amended, or ERISA, which governs the structure of “employee benefits plans.” ERISA does not typically apply to dependent care FSAs, HSAs or any of our commuter programs, or to agreements with churches or governments. ERISA generally imposes extensive reporting requirements on employers, as well as an obligation to provide detailed disclosure to covered individuals, which includes both employees and beneficiaries. The Department of Labor can bring enforcement actions or assess penalties against employers for failing to comply with ERISA’s requirements. Participants may also file lawsuits against employers under ERISA.

Table of Contents

HIPAA, Privacy and Data Security Regulations

In connection with processing data on behalf of our clients and participants, we frequently undertake or are subject to specific compliance obligations under privacy and data security-related laws, including the Health Insurance Portability and Accountability Act of 1996, or HIPAA, the Health Information Technology for Economic and Clinical Health (HITECH) Act, enacted as part of the American Recovery and Reinvestment Act of 2009, and related state laws. We are also subject to federal and state security breach notification laws, as well as state laws regulating the processing of personal information, including laws governing the collection, use and disclosure of social security numbers and related identifiers. As part of the payment-related aspects of our business, we may also undertake security-related obligations arising out of the Gramm-Leach-Bliley Act and the Payment Card Industry guidelines applicable to card systems.

Department of Labor

The Department of Labor, or the DOL, is responsible for issuing guidance under any component plans that are subject to ERISA, including healthcare FSAs and HRAs.

The DOL issues regulations, technical releases and other pieces of guidance that apply to employee benefit plans generally. In addition, in response to a request by an individual or an organization, the DOL's Employee Benefits Security Administration may issue an advisory opinion that interprets and applies ERISA to a specific situation, including issues related to consumer-directed healthcare accounts.

Centers for Medicare and Medicaid Services / Department of Health and Human Services

The Centers for Medicare and Medicaid Services, or CMS, is also involved in the oversight of the group health plans we administer as a division of the Department of Health and Human Services, or HHS. In addition to the IRS, Department of Treasury, and the Department of Labor, CMS has responsibility for enforcement and implementation of many of the requirements of health care reform. HHS has responsibility over enforcement of the HIPAA privacy rules.

Healthcare Reform

In March 2010, the federal government enacted significant reforms to healthcare legislation through the Patient Protection and Affordable Care Act, or PPACA, and the Healthcare and Education Reconciliation Act of 2010, or HCERA. These laws amended various provisions in many federal laws, including the Internal Revenue Code of 1986, as amended, or the Code, and ERISA. These amendments include numerous coverage changes affecting group health plans, which now apply to insurers and governmental plans, as well as employer-sponsored health plans, including self-insured plans. Future provisions of PPACA await regulations and may have an impact on employee health plans, including self-funded CDB accounts, including HSAs. One such proposed regulation includes an excise tax on high-cost health plans, which is scheduled to be enacted in 2018. As currently written, this proposed excise tax would be 40% of the amount over a set threshold, and includes medical plan premiums, employer contributions to CDB accounts and tax-advantaged employee contributions to HSAs and healthcare FSAs.

Competition

The market for CDBs, as well as COBRA and direct bill services is highly competitive, rapidly evolving and fragmented. Key categories of competitors include:

- National CDB specialists, such as TASC, Inc.;
- Health insurance carriers, such as Aetna or UHC;
- Human resources consulting firms, such as Aon Hewitt;
- Payroll providers, such as ADP or Ceridian;
- Small regional TPAs focused on CDBs; and
- With respect to CDBs, commercial banks, such as Bank of America.

Sales opportunities are presented through a number of different channels and often involve direct competition and requests for proposal processes. Many of our competitors, such as health insurance carriers, payroll providers, human resources consulting firms and commercial banks, offer CDB and/or COBRA and direct bill programs as non-core offerings bundled with their main products and services. We also compete against many regional TPAs who often lack sufficient resources to rapidly implement new technologies or to tailor their operations and service offerings in response to evolving rules and regulations. We further compete against the limited number of other specialists for CDB and other benefit programs.

Our ability to compete successfully depends on a number of factors, including:

- our products' performance and cost relative to that of our competitors;

Table of Contents

- the quality of service that we provide to our employer clients and their employee participants;
- our ability to easily identify, acquire and integrate client portfolio purchases; and
- our industry leadership and expertise.

Some of our competitors have longer operating histories and significantly greater financial, technical, marketing and other resources than we do. As a result, some of these competitors may choose to devote greater resources to the development, promotion, sale and support of their products and services. We believe our focus on CDB and benefit continuation programs, our high quality service and our highly scalable delivery model are the principal basis on which we can compete in the market. We cannot assure you that our products will continue to compete favorably or that we will be successful in the face of increasing competition from new products and enhancements introduced by our existing competitors or new companies entering our market.

Intellectual Property

Our success depends in part on our ability to protect our core technology and intellectual property. To accomplish this, we rely on a combination of patent laws, trade secrets, including know-how, employee and third party nondisclosure agreements, copyright laws, trademarks, intellectual property licenses and other contractual rights to establish and protect our proprietary rights in our technology. We have one issued patent which expires in 2022.

Despite our efforts to preserve and protect our proprietary and intellectual property rights, unauthorized third parties may attempt to copy, reverse engineer, or otherwise obtain portions of our products. Competitors may attempt to develop similar products that could compete in the same market as our products. Unauthorized disclosure of our confidential information by our employees or third parties could occur.

Third-party infringement claims are also possible in our industry, especially as software functionality and features expand, evolve, and overlap with other industry segments. Current and future competitors, as well as non-practicing patent holders, could claim at any time that some or all of our products infringe on patents they now hold or might obtain, or be issued in the future.

Employees

At December 31, 2014, we had 1,675 employees, including 1,548 full-time employees, 15 part-time employees and 112 temporary or seasonal employees. There are 116 employees located in our Northern California headquarters and the remainder are located in our various other offices throughout the United States or work remotely from various locations. None of our employees are currently represented by labor unions or are covered by a collective bargaining agreement with respect to his or her employment. To date we have not experienced any work stoppages, and we consider our relationship with our employees to be good.

Legal Proceedings

From time-to-time, we are subject to various legal proceedings that arise in the normal course of our business activities. In addition, from time-to-time, third parties may assert intellectual property infringement claims against us in the form of letters and other forms of communication. As of December 31, 2014, we are not a party to any litigation whereby the outcome of which, if determined adversely to us, would individually or in the aggregate be reasonably expected to have a material adverse effect on our results of operations, prospects, cash flows, financial position or brand.

Item 1A. Risk Factors

RISK FACTORS

You should carefully consider the risks described below together with the other information set forth in this report, which could materially affect our business, financial condition and future results. The risks described below are not the only risks facing our company. Risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and operating results. If any of the following risks is realized, our business, financial condition, results of operations and prospects could be materially and adversely affected. In that event, the trading price of our common stock could decline.

Our business is dependent upon the availability of tax-advantaged consumer-directed benefits to employers and employees and any diminution in, elimination of, or change in the availability of these benefits would materially adversely affect our results of operations, financial condition, business and prospects.

Our business fundamentally depends on employer and employee demand for tax-advantaged Consumer-Directed Benefits, or CDBs. Any diminution in or elimination of the availability of CDBs for employees would materially adversely affect our results of operations, financial condition, business and prospects. In addition, incentives for employers to offer CDBs may also be reduced or eliminated by changes in laws that result in employers no longer realizing financial gain from the implementation of these benefits. If

Table of Contents

employers cease to offer CDB programs or reduce the number of programs they offer to their employees, our results of operations, financial condition, business and prospects would also be materially adversely affected. We are not aware of any reliable statistics on the growth of CDB programs and cannot assure you that participation in CDB programs will grow.

In addition, if the payroll tax savings employers currently realize from their employees' utilization of CDBs become reduced or unavailable, employers may be less inclined to offer these programs to their employees. If the tax savings currently realized by employee participants by utilizing CDBs were reduced or unavailable, we expect employees would correspondingly reduce or eliminate their participation in such CDB plans. Any such reduction in employer or employee incentives would materially adversely affect our results of operations, financial condition, business and prospects.

Future portfolio purchases and acquisitions are an important aspect of our growth strategy, and any failure to successfully identify, acquire or integrate acquisitions or additional portfolio targets could materially adversely affect our ability to grow our business. In addition, costs of integrating acquisitions and portfolio purchases may adversely affect our results of operations in the short term.

Our recent growth has been, and our future growth will be, substantially dependent on our ability to continue to make and integrate acquisitions and complementary portfolio purchases to expand our employer client base and service offerings. Since 2007, we have completed seven portfolio purchases and two acquisitions. Our most recent acquisition of CONEXIS was completed in August 2014. Our successful integration of these portfolio purchases and acquisitions into our operations on a cost-effective basis is critical to our future financial performance. While we believe that there are numerous potential portfolio purchases and acquisitions that would add to our employer client base and service offerings, we cannot assure you that we will be able to successfully make a sufficient number of such portfolio purchases or acquisitions in a timely and effective manner in order to support our growth objectives. In addition, the process of integrating portfolio purchases and acquisitions may create unforeseen difficulties and expenditures. We face various risks in making portfolio purchases and any acquisitions, including:

- our ability to retain acquired employer clients and their associated revenues;
 - diversion of management's time and focus from operating our business to address integration challenges;
- our ability to retain or replace key employees from acquisitions and portfolios we acquire;
- cultural and logistical challenges associated with integrating employees from acquired portfolios into our organization;
- our ability to integrate the combined products, services and technology;
- the migration of acquired employer clients to our technology platforms;
- our ability to cross-sell additional CDB programs to acquired employer clients;
- our ability to realize expected synergies;
-

the need to implement or improve internal controls, procedures and policies appropriate for a public company at businesses that, prior to the portfolio purchase or acquisition, may have lacked effective controls, procedures and policies, including, but not limited to, processes required for the effective and timely reporting of the financial condition and results of operations of the acquired business, both for historical periods prior to the acquisition and on a forward-looking basis following the acquisition;

- possible write-offs or impairment charges that result from acquisitions and portfolio purchases;
- unanticipated or unknown liabilities that relate to purchased businesses;
- the need to implement or improve internal controls relating to privacy, security and data protection;
- the need to integrate purchased businesses' accounting, management information, human resources, and other administrative systems to permit effective management; and
- any change in one of the many complex federal or state laws or regulations that govern any aspect of the financial or business operations of our business and businesses we acquire, such as state escheatment laws.

Portfolio purchases and acquisitions may have a short-term material adverse impact on our results of operations, including a potential material adverse impact on our cost of revenues, as we seek to migrate acquired employer clients to our proprietary technology platforms, typically over the succeeding 12 to 24 months, in order to achieve additional operating efficiencies. Additionally, from time to time, we may incur material costs and charges related to consolidating our operations following our portfolio purchases and acquisitions.

Table of Contents

If we are unable to retain and expand our employer client base and establish new channel partnerships, our results of operations, financial condition, business and prospects would be materially adversely affected.

Most of our revenue is derived from the long term, multi-year agreements that we typically enter into with our employer clients. The initial subscription period is typically three years for our larger employer clients, which we refer to as enterprise clients, and one to three years for our SMB clients. We also derive revenue from our channel partner agreements with American Family Life Assurance Company, or Aflac, and Ceridian. We anticipate in the future establishing new channel partnerships with other companies. Our employer clients, however, have no obligation to renew their agreements with us after the initial term and we cannot assure you that our employer clients will continue to renew their agreements at the same rate, if at all. In addition, employer clients transitioning to us from a channel partner have no obligation to enter into agreements with us and, if they do, there is no guarantee that they will renew their agreements with us after the initial transition period.

Moreover, most of our employer clients have the right to cancel their agreements for convenience, subject to certain notice requirements. While few employer clients have terminated their agreements with us for convenience, some of our employer clients have elected not to renew their agreements with us. Our employer clients' renewal rates may decline or fluctuate as a result of a number of factors, including the prices of competing products or services or reductions in our employer clients' spending levels.

Another important aspect of our growth strategy depends upon our ability to maintain our existing channel partner relationships and develop new relationships. No assurance can be given that new channel partners will be found, that any such new relationships will be successful when they are in place, or that business with our current channel partners will increase at the level necessary to support our growth objectives. If our employer clients do not renew their agreements with us, and we are unable to attract new employer clients or channel partners, our revenue may decline and our results of operations, financial condition, business and prospects may be materially adversely affected.

The market for our services and our business may not grow if our marketing efforts do not successfully raise awareness among employers and employees about the advantages of adopting and participating in CDB programs.

Our revenue model is substantially based on the number of employee participants enrolled in the CDB programs that we administer. We devote significant resources to educating both employers and their employees on the potential cost savings available to them from utilizing CDB programs. We have created various marketing, educational and awareness tools to inform employers about the benefits of offering CDB programs to their employees and how our services allow them to offer these benefits in an efficient and cost effective manner. We also provide marketing information to employees that informs them about the potential tax savings they can achieve by utilizing CDB

programs to pay for their healthcare, commuter and other benefit needs. However, if more employers and employees do not become aware of or understand these potential cost savings and choose to adopt CDB programs, our results of operations, financial condition, business and prospects may be materially adversely affected.

In addition, there is no guarantee that the market for our services will grow as we expect. For example, the value of our services is directly related to the complexity of administering CDB programs and government action that significantly reduces or simplifies these requirements could reduce demand or pricing for our services. Further, employees may not participate in CDB programs because they have insufficient funds to set aside into such programs, find the rules regarding use of such programs too complex, or otherwise. If the market for our services declines or develops more slowly than we expect, or the number of employer clients that select us to provide CDB programs to their employee participants declines or fails to increase as we expect, our results of operations, financial condition, business and prospects could be materially adversely affected.

Our business and prospects may be materially adversely affected if we are unable to cross-sell our products and services.

A significant component of our growth strategy is the increased cross-selling of products and services to current and future employer clients. In particular, many of our employer clients use only one of our products so we expect our ability to cross-sell our commuter programs to our healthcare program clients and our healthcare programs to our commuter employer clients to be an important part of this strategy. We may not be successful in cross-selling our products and services if our employer clients find our additional products and services to be unnecessary or unattractive. Any failure to sell additional products and services to current and future clients could materially adversely affect our results of operations, financial condition, business and prospects.

We may be unable to compete effectively against our current and future competitors.

The market for our products and services is highly competitive, rapidly evolving and fragmented. We have numerous competitors, including health insurance carriers, such as Aetna, human resources consultants and outsourcers, such as Aon Hewitt, payroll providers, such as ADP, national CDB specialists, such as TASC, and regional third party administrators and commercial banks, such as Bank of America. Many of our competitors, including health insurance carriers, have longer operating histories and

Table of Contents

significantly greater financial, technical, marketing and other resources than we have. As a result, some of these competitors may be in a position to devote greater resources to the development, promotion, sale and support of their products and services.

In addition, if one or more of our competitors were to merge or partner with another of our competitors, the change in the competitive landscape could materially adversely affect our ability to compete effectively. Our competitors may also establish or strengthen cooperative relationships with our current or future strategic brokers, insurance carriers, payroll services companies, private exchanges, third party advisors or other parties with which we have relationships, thereby limiting our ability to promote our CDB programs with these parties and limiting the number of brokers available to sell or market our programs. If we are unable to compete effectively with our competitors for any of the foregoing reasons, our results of operations, financial condition, business and prospects could be materially adversely affected.

Changes in healthcare, security and privacy laws and other regulations applicable to our business may constrain our ability to offer our products and services.

Changes in healthcare or other laws and regulations applicable to our business may occur that could increase our compliance and other costs of doing business, require significant systems enhancement, or render our products or services less profitable or obsolete, any of which could have a material adverse effect on our results of operations.

The Patient Protection and Affordable Care Act signed into law on March 23, 2010 and related regulations or regulatory actions could adversely affect our ability to offer certain of our CDBs in the manner that we do today or may make CDBs less attractive to some employers. For example, any new laws that increase reporting and compliance burdens on employers may make them less likely to offer CDBs to their employees and instead offer employees benefit coverage through public exchanges. In addition, it is unclear whether the “Cadillac Tax” set to become effective in 2018 will apply proportionately to an employer’s total health care costs including health related CDBs or if health related CDBs will be exempt from the calculation. If employers are less incentivized to offer our CDB programs to employees because of increased regulatory burdens, costs or otherwise, our results of operations and financial condition could be materially adversely affected.

In addition, the numerous federal and state laws and regulations related to the privacy and security of personal health information, in particular those promulgated pursuant to the Health Insurance Portability and Accountability Act of 1996, or HIPAA, require the implementation of administrative, physical and technological safeguards to ensure the confidentiality and integrity of individually identifiable health information in electronic form. We are required to enter into written agreements with all of our employer clients known as Business Associated Agreements. Pursuant to these

agreements, and as our employer client's "Business Associate" thereunder, we are required to safeguard all individually identifiable health information of their participating employees and are restricted in how we use and disclose such information. These agreements also contain data security breach notification requirements which, in some circumstances, may be more stringent than HIPAA requirements. As we are unable to predict what changes to HIPAA or other privacy and security laws or regulations might be made in the future, we can't be certain how those changes could affect our business or the costs of compliance.

We plan to extend and expand our products and services and introduce new products and services, and we may not accurately estimate the impact of developing and introducing these products and services on our business.

We intend to continue to invest in technology and development to create new and enhanced products and services to offer our employer clients and their participating employees. During this past year, we have added several new features to our participant site and have continued to enhance the site's mobile compatibility. To increase the value we deliver to our clients, we have also updated the look and feel of our client facing website with the addition of a new graphic dashboard providing users access to key metrics. Scalability of our platform also remains an on-going focus as our platform volume increases. We continue to make investments in technology stack upgrades, to ensure stability and performance of our applications for our clients and participants. Our health and wellness offerings continue to be expanded to include online claims for our wellness product and the integration of a Wellness Portal to provide our users with the most up-to-date health and wellness information. We are developing new technology to handle the enrollment, billing, customer service and payment processing matters associated with a health care carrier's offerings on the public health insurance exchanges. Despite quality testing of the technology prior to use, it may contain errors that impact its function and performance and this may result in negative consequences. We have limited experience in these areas and so we may not be able to anticipate or manage new risks and obligations or legal, compliance or other requirements that may arise. The anticipated benefits of such new and improved products and services may not outweigh the costs and resources associated with their development.

Our ability to attract and retain new employer clients and increase revenue from existing employer clients will depend in large part on our ability to enhance and improve our existing products and services and to introduce new products and services. The success of any enhancement or new product or service depends on several factors, including the timely completion, introduction and market acceptance of the enhancement or new product or service. Any new product or service we develop or acquire may not be introduced in a timely or cost-effective manner and may not achieve the broad market acceptance necessary to generate significant revenue. If we

Table of Contents

are unable to successfully develop or acquire new products or services or enhance our existing products or services to meet client requirements, our results of operations, financial condition, business or prospects may be materially adversely affected.

If we fail to manage future growth effectively, we may not be able to market and sell our products and services successfully.

We have expanded our operations significantly in recent years and anticipate that further expansion will be required in order for us to grow our business. If we do not effectively manage our growth, the quality of our services could suffer, which could materially adversely affect our results of operations, financial condition, business and prospects, and damage our brand and reputation among existing and prospective clients. In order to manage our future growth, we will need to hire, integrate and retain highly skilled and motivated employees. We will also be required to continue to improve our existing systems for operational and financial information management, including our reporting systems, procedures and controls and regulatory compliance processes. These improvements may require significant capital expenditures and will place increasing demands on our management. We may not be successful in managing or expanding our operations, or in maintaining adequate operating and financial information systems and controls. If we are not successful in implementing improvements in these areas, our results of operations, financial condition, business and prospects would be materially adversely affected.

General economic and other conditions may adversely affect trends in employment and hiring patterns, which could result in lower employee participation in CDB programs, which would materially adversely affect our results of operations, financial condition, business and prospects.

Our revenue is attributable to the number of employee participants at each of our employer clients, which in turn is influenced by the employment and hiring patterns of our employer clients. To the extent our employer clients freeze or reduce their headcount or wages paid because of general economic or other conditions, demand for our programs may decrease, which could materially adversely affect our results of operations, financial condition, business and prospects.

Failure to effectively develop and expand our direct and indirect sales channels may materially adversely affect our results of operations, financial condition, business and prospects and reduce our growth.

We will need to continue to expand our sales and marketing infrastructure in order to grow our employer client base and our business. We rely on our enterprise sales force to target new Fortune 1000 client accounts and sell into the private exchanges, as well as to cross-sell additional products and services to our existing enterprise clients. Effectively training our sales personnel requires significant time, expense and attention. In addition, we utilize various channel brokers, including insurance agents, benefits consultants, regional and national insurance carriers, health plans, payroll companies, banks and regional third party administrators, to sell and market our programs to SMB employers. If we are unable to develop and expand our direct sales team, these indirect sales channels, or become a partner to more private exchanges, our ability to attract new employer clients, become a private exchange partner and cross-sell our programs may be negatively impacted and our growth opportunities will be reduced, each of which would materially adversely affect our results of operations, financial condition, business and prospects.

If our efforts to develop and expand our direct and indirect sales channels do not generate a corresponding increase in revenue, our business may be materially adversely affected. In particular, if we are unable to effectively train our sales personnel or if our direct sales personnel are unable to achieve expected productivity levels in a reasonable period of time, we may not be able to increase our revenue and grow our business.

Long sales cycles make the timing of our long-term revenues difficult to predict.

Our average sales cycle ranges from approximately two months for SMBs to six to nine months for our large institutional clients, and, in some cases, even longer depending on the size of the potential client. Factors that may influence the length of our sales cycle include:

- the need to educate potential employer clients about the uses and benefits of our CDB programs;
- the relatively long duration of the commitment clients make in their agreements with us or with pre-existing plan administrators;
- the discretionary nature of potential employer clients' purchasing and budget cycles and decisions;
- the competitive nature of potential employer clients' evaluation and purchasing processes;
 - fluctuations in the CDB program needs of potential employer clients; and
- lengthy purchasing approval processes of potential employer clients.

Table of Contents

The fluctuations that result from the length of our sales cycle may be magnified for large- and mid-sized potential employer clients. If we are unable to close an expected significant transaction with one or more of these potential clients in the anticipated period, our operating results for that period, and for any future periods in which revenue from such transaction would otherwise have been recognized, would be harmed.

Our business and operational results are subject to seasonality as a result of open enrollment for CDB programs and decreased use of commuter program offerings during typical vacation months.

The number of accounts that generate revenue is typically greatest during our first calendar quarter. This is primarily due to two factors. First, new employer clients and their employee participants typically begin service on January 1. Second, during the first calendar quarter, we are also servicing the end of plan year activity for existing clients, including assisting our clients with initiating the deduction of healthcare premiums on a tax deferred basis, and employee participants who do not continue participation into the next plan year.

Generally, in comparison to other quarters, our revenue is highest in the first quarter and lowest in the second and third quarters. Thereafter, our revenue generally grows gradually in the fourth quarter as our employer clients hire new employees who then elect to participate in our programs, thereby increasing our monthly minimum billing amount. The minimum billing amount is not, however, generally subject to downward revision when employees leave their employers because we continue to administer those former employee participants' accounts for the remainder of the plan year. Revenue from commuter programs may vary from month-to-month because employees may elect to participate in our commuter programs at any time during the year and may change their election to participate or the amount of their contribution on a monthly basis; however, participation rates in our commuter business typically slow during the summer as people take vacations and do not purchase transit passes or parking passes during that time.

Our operating expenses increase during the fourth quarter because of increased debit card production and because we increase our customer support center capacity to answer questions from employee participants during the open enrollment periods related to their CDB participation decisions. The cost of providing services peaks in the first quarter as new employee participants contact us for information about their CDBs, and as terminating employee participants submit their final claims for reimbursement.

Our operating results can fluctuate from period to period, which could cause our share price to fluctuate.

Fluctuations in our quarterly operating results could cause our stock price to decline rapidly, may lead analysts to change their long-term models for valuing our common stock, could cause short-term liquidity issues, may impact our ability to retain or attract key personnel or cause other unanticipated issues. If our quarterly operating results or guidance fall below the expectations of research analysts or investors, the price of our common stock could decline substantially. Our quarterly operating expenses and operating results may vary significantly in the future and period-to-period comparisons of our operating results may not be meaningful. You should not rely on the results of one quarter as an indication of future performance.

If employee participants do not continue to utilize our prepaid debit cards or choose to use PIN rather than signature enabled prepaid debit cards, our results of operations, business and prospects could be materially adversely affected.

We derive a portion of our revenue from interchange fees that are paid to us when employee participants utilize our prepaid debit cards to pay for certain healthcare and commuter expenses under our CDB programs. These fees represent a percentage of the expenses transacted on each debit card. If our employer clients do not adopt these prepaid debit cards as part of the benefits programs they offer, if the employee participants do not use them at the rate we expect, if employee participants choose to process their transactions over PIN networks rather than signature networks or if other alternatives to prepaid tax-advantaged benefit cards develop, our results of operations, business and prospects could be materially adversely affected.

If we are unable to maintain and enhance our brand and reputation, our ability to sustain and grow our business may be materially adversely affected.

Maintaining and strengthening our brand is critical to attracting new clients and growing our business. Our ability to maintain and strengthen our brand and reputation will depend heavily on our capacity to continue to provide high levels of customer service to our employer clients and their employee participants at cost effective and competitive prices, which we may not do successfully. In addition, our continued success depends, in part, on our reputation as an industry leader in promoting awareness and understanding of the positive impact of CDBs among employers and employees. If we fail to successfully maintain and strengthen our brand, our results of operations, financial condition, business and prospects will be materially adversely affected.

Table of Contents

Some plan providers with which we have relationships also provide, or may provide, competing services.

We face competitive risks in situations where some of our strategic partners are also current or potential competitors. For example, certain of the banks we utilize as custodians of the funds for our HSA employee participants also offer their own HSA products. To the extent that these partners choose to offer competing products and services that they have developed or in which they have an interest to our current or potential clients, our results of operations, business and prospects could be materially adversely affected.

We are subject to complex regulation, and any compliance failures or regulatory action could materially adversely affect our business.

The plans we administer and, as a result, our business are subject to extensive, complex and continually changing federal and state laws and regulations, including the Affordable Care Act, IRS regulations, ERISA, privacy and HIPAA regulations and Department of Labor regulations, all of which are further described in our Annual Report on Form 10-K under the heading “Business — Government Regulation”. If we fail to comply with any applicable law, rule or regulation, we could be subject to fines and penalties, indemnification claims by our clients, or become the subject of a regulatory enforcement action, each of which would materially adversely affect our business and reputation.

We may also become subject to additional regulatory and compliance requirements as a result of changes in laws or regulations, or as a result of any expansion or enhancement of our existing products and services or the development of any new products or services in the future. For example, if we expand our product and service offerings into the health insurance market in the future, we would become subject to state Department of Insurance regulations. Compliance with any new regulatory requirements may divert internal resources and take significant time and effort.

Any claims of noncompliance brought against us, regardless of merit or ultimate outcome, could subject us to investigation by the Department of Labor, the Internal Revenue Service, the Centers for Medicare and Medicaid Services, the Treasury Department or other federal and state regulatory authorities, which could result in substantial costs to us and divert management’s attention and other resources away from our operations. In addition, investor perceptions of us may suffer and could cause a decline in the market price of our common stock. Our compliance processes may not be sufficient to prevent assertions that we failed to comply with any applicable law, rule or regulation.

Failure to ensure and protect the confidentiality and security of participant data could lead to legal liability, adversely affect our reputation and have a material adverse effect on our results of operations, business or financial condition.

We must collect, store and use employee participants' confidential information, including the transmission of that data to third parties, to provide our services. For example, we collect names, addresses, social security numbers and other personally identifiable information from employee participants. In addition, we facilitate the issuance and funding of prepaid debit cards and, in some cases, collect bank routing information, account numbers and personal credit card information for purposes of funding an account or issuing a reimbursement. We have invested significantly in preserving the security of this data.

In addition, we outsource customer support center services and claims processing services to third-party service providers to whom we transmit certain confidential information of our employee participants. We have security measures in place with each of these service providers to help protect this confidential information, including written agreements that outline how protected health information will be handled and shared. However, there are no assurances that these measures, or any additional security measures that our service providers may have in place, will be sufficient to protect this outsourced confidential information from unauthorized security breaches.

We cannot assure you that, despite the implementation of these security measures, we will not be subject to a security incident or other data breach or that this data will not be compromised. We may be required to expend significant capital and other resources to protect against security breaches or to alleviate problems caused by security breaches, or to pay penalties as a result of such breaches. Despite our implementation of security measures, techniques used to obtain unauthorized access or to sabotage systems change frequently. As a result, we may be unable to anticipate these techniques or implement adequate preventative measures to protect this data. In addition, security breaches can also occur as a result of non-technical issues, including intentional or inadvertent breaches by our employees or service providers or by other persons or entities with whom we have commercial relationships. Any compromise or perceived compromise of our security could damage our reputation with our clients, brokers and channel partners, and could subject us to significant liability, as well as regulatory action, including financial penalties, which would materially adversely affect our brand, results of operations, financial condition, business and prospects.

Table of Contents

We have incurred, and expect to continue to incur, significant costs to protect against and respond to security breaches. We may incur significant additional costs in the future to address problems caused by any actual or perceived security breaches.

Breaches of our security measures or those of our third-party service providers or security incidents could result in unauthorized access to our sites, networks and systems; unauthorized access to, misuse or misappropriation of employer client or employee participants' information, including personally identifiable information, or other confidential or proprietary information of ourselves or third parties; viruses, worms, spyware or other malware being served from our sites, networks or systems; deletion or modification of content or the display of unauthorized content on our sites; interruption, disruption or malfunction of operations; costs relating to notification of individuals, or other forms of breach remediation; deployment of additional personnel and protection technologies; response to governmental investigations and media inquiries and coverage; engagement of third party experts and consultants; litigation, regulatory investigations, prosecutions, and other actions, and other potential liabilities. If any of these events occurs, or is believed to occur, our reputation and brand could be damaged, our business may suffer, we could be required to expend significant capital and other resources to alleviate problems caused by such actual or perceived breaches, we could be exposed to a risk of loss, litigation or regulatory action and possible liability, and our ability to operate our business, including our ability to provide access, usage or maintenance and support services to our customers, may be impaired. If current or prospective employer clients or employee participants believe that our systems and solutions do not provide adequate security for the storage of personal or other sensitive information or its transmission over the Internet, our business and our financial results could be harmed. Additionally, actual, potential or anticipated attacks may cause us to incur increasing costs, including costs to deploy additional personnel and protection technologies, train employees and engage third-party experts and consultants.

Although we maintain privacy, data breach and network security liability insurance, we cannot be certain that our coverage will be adequate for liabilities actually incurred or that insurance will continue to be available to us on economically reasonable terms, or at all. Any actual or perceived compromise or breach of our security measures, or those of our service providers, or any unauthorized access to, misuse or misappropriation of consumer information or other confidential business information, could violate applicable laws and regulations, contractual obligations or other legal obligations and cause significant legal and financial exposure, adverse publicity and a loss of confidence in our security measures, any of which could have a material adverse effect on our business, financial condition and operating results.

Our business is subject to a variety of laws and regulations, including those regarding privacy, data protection and information security, and our customers, channel partners and service providers are subject to regulations related to the handling and transfer of certain types of sensitive and confidential information and any failure of our infrastructure, platform or solutions to comply with or enable our customers, channel partners and service providers to comply with applicable laws and regulations would harm our business, financial condition and operating results.

As part of our business, we collect employee participants' personal data for the sole purpose of processing their benefits. Our services and solutions are subject to privacy- and data protection-related laws and regulations that impose obligations in connection with the collection, processing and use of personal data, financial data, health data or other similar data. Among other things, we have access to, and our employer clients and employee participants are able to use our solutions to handle and transfer, personally identifiable information and other data of our current and prospective employee participants and others. The U.S. federal and various state and other jurisdictional governments have adopted or proposed limitations on, or requirements regarding, the collection, distribution, use, security and storage of personally identifiable information and other data, and the Federal Trade Commission and numerous state attorneys general are applying federal and state consumer protection laws to impose standards on the online collection,

use and dissemination of data, and to the security measures applied to such data. In addition, we may find it necessary or desirable to join industry or other self-regulatory bodies or other privacy- or data protection-related organizations that require compliance with their rules pertaining to privacy and data protection. We are also bound by contractual obligations relating to our collection, use and disclosure of personal, financial and other data. Although we are working to comply with applicable laws, regulations, industry standards, contractual obligations and other legal obligations that apply to us, these are evolving and may be modified, may be interpreted and applied in an inconsistent manner from one jurisdiction to another, and may conflict with one another, other requirements or legal obligations or our practices.

In addition, various federal, state and other legislative or regulatory bodies have in place and may enact new or additional laws and regulations mandating certain disclosures, including disclosures of personally identifiable information, to domestic enforcement bodies, which could adversely impact our business, our brand or our reputation with employer clients and employee participants. Despite our efforts to protect customer data, perceptions that the privacy of personal information is not satisfactorily protected in connection with our products or services could inhibit sales of our products or services, could limit adoption of our services by consumers, businesses, and government entities, and could expose us to claims or litigation. Additional privacy- or data security-related measures we may take to address such customer concerns, constraints on our flexibility to determine how to respond to customer expectations or governmental rules or actions, or costs associated with compliance with law enforcement or other regulatory authority demands or requests may adversely affect our business and operating results.

Table of Contents

Any failure or perceived failure by us to comply with applicable laws, regulations, policies, industry standards, contractual obligations or other legal obligations relating to privacy or data security, or any security incident that results in the unauthorized access to, or acquisition, release or transfer of, personally identifiable information or other customer data may result in governmental or regulatory investigations, inquiries, enforcement actions and prosecutions, private litigation, fines and penalties or adverse publicity and could cause our employer clients, employee participants, and others to lose trust in us, which could have an adverse effect on our reputation, business, financial condition and results of operations.

Our services and solutions are subject to numerous laws and regulations related to the privacy and security of personal health information, including those promulgated pursuant to the Health Insurance Portability and Accountability Act of 1996, or HIPAA, as well as the Health Information Technology for Economic and Clinical Health Act, or HITECH, which was enacted as part of the American Recovery and Reinvestment Act of 2009, which require the implementation of administrative, physical and technological safeguards to ensure the confidentiality and integrity of individually identifiable health information in electronic form. Further, our services and solutions are subject to Payment Card Industry, or PCI, data security standards that impose requirements regarding the storage and processing of payment card information. If we cannot comply with, or if we incur a violation of, any of these obligations, we could incur significant liability or our growth could be adversely impacted, either of which could have an adverse effect on our reputation, business, financial condition and operating results.

We expect that there will continue to be new proposed laws, regulations, industry standards, contractual obligations and other obligations concerning privacy, data protection and information security and we cannot yet determine the impact of such future laws, regulations, standards and obligations may have on our business. Future laws, regulations, standards and other obligations, or changed interpretations of the foregoing, could, for example, impair our ability to collect, use or store information that we utilize to provide our services, thereby impairing our ability to maintain and grow our total customer base and increase revenues. New laws, amendments to or re-interpretations of existing laws and regulations, industry standards, contractual obligations and other obligations may impact our business and practices. We may be required to expend significant resources to modify our solutions and otherwise adapt to these changes, which we may be unable to do on commercially reasonable terms or at all, and our ability to develop new solutions and features could be limited. These developments could harm our business, financial condition and results of operations.

Any such new laws, regulations, industry standards, or other legal obligations or any changed interpretation of existing laws, regulations, industry standards, or other obligations may require us to incur additional costs and restrict our business operations. If our privacy or data security measures fail to comply with current or future laws, regulations, policies, legal obligations or industry standards, or any changed interpretations of the foregoing, we may be subject to litigation, regulatory investigations, enforcement actions, inquiries, prosecutions, fines or other liabilities, as well as negative publicity and a potential loss of business. Moreover, if future laws, regulations, industry standards, or other legal obligations, or any changed interpretations of the foregoing, limit the ability of our customers, channel partners or service providers to use and share personally identifiable information or other data or our ability to store, process and share personally identifiable information or other data, demand for our solutions could decrease, our costs could increase and our business, financial condition and operating results could be harmed.

A breach of our IT security, loss of customer data or system disruption could have a material adverse effect on our results of operations, business or financial condition and reputation.

Our business is dependent on our transaction, financial, accounting and other data processing systems, as well instances of third-party service provider systems that we use to provide our services. We rely on these systems to

process, on a daily basis, a large number of complicated transactions. Any security breach in our business processes and/or systems, or those third-party systems that we use, has the potential to impact our customer information and our financial reporting capabilities which could result in the potential loss of business and our ability to accurately report information. If any of these systems fail to operate properly or become disabled even for a brief period of time, we could potentially lose control of customer data and we could suffer financial loss, a disruption of our businesses, liability to clients, regulatory intervention or damage to our reputation. In addition, any issue of data privacy as it relates to unauthorized access to or loss of employer client and/or employee participant information could result in the potential loss of business, damage to our market reputation, litigation and regulatory investigation and penalties. Our continued investment in the security of our IT systems, continued efforts to improve the controls within our IT systems and those of any service providers that we use to provide our services, business processes improvements, and the enhancements to our culture of information security may not successfully prevent attempts to breach our security or unauthorized access to confidential, sensitive or proprietary information.

In addition, we depend on information technology networks and systems to collect, process, transmit and store electronic information and to communicate among our locations and with our channel partners, service providers, employer clients and employee participants. Security breaches could lead to shutdowns or disruptions of our systems and potential unauthorized disclosure of confidential information. We also are required at times to manage, utilize and store sensitive or confidential employer client and employee participant data, as well as our own employee data in the regular course of business. As a result, we are subject to numerous laws and regulations designed to protect this information, including various U.S. federal and state laws governing the protection of health or other individually identifiable information, all of which are further described in our Annual Report on Form 10-K under the

Table of Contents

heading “Business — Government Regulation”. If any person, including any of our personnel, fails to comply with, disregards or intentionally breaches our established controls with respect to such data or otherwise mismanages or misappropriates that data, we could be subject to monetary damages, fines or criminal prosecution. Unauthorized disclosure of sensitive or confidential data, whether through systems failure, accident, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose customers. Similarly, unauthorized access to or through our information systems or those we develop or utilize in connection with our provision of services, whether by our personnel or third parties, could result in significant additional expenses (including expenses relating to notification of data security breaches and costs of credit monitoring services), negative publicity, legal liability and damage to our reputation, as well as require substantial resources and effort of management, thereby diverting management’s focus and resources from business operations.

Our inability to successfully recover should we experience a disaster or other business continuity problem could cause material financial loss, loss of human capital, breach of confidential information, regulatory actions, reputational harm or legal liability.

Should we experience a disaster or other business continuity problem, either natural or man-made, our ability to protect our infrastructure, including customer data, and maintain ongoing operations will depend, in part, on the availability of our personnel, our office facilities, and the proper functioning of our computer, telecommunication and other related systems and operations. In such an event, we could experience near-term operational challenges with regard to particular areas of our operations.

In particular, our ability to recover from any disaster or other business continuity problem will depend on our ability to protect our technology infrastructure against damage from business continuity events that could have a significant disruptive effect on our operations. Our business continuity plan may not be successful in mitigating the effects of a disaster or other business continuity problem. We could potentially lose client data, experience a breach of security or confidential information, or experience material adverse interruptions to our operations or delivery of services to our clients in a disaster.

We will continue to regularly assess and take steps to improve upon our business continuity plans. However, a disaster on a significant scale or affecting certain of our key operating areas within or across regions, or our inability to successfully recover should we experience a disaster or other business continuity problem, could materially interrupt our business operations and cause material financial loss, loss of human capital, breach of confidential information, regulatory actions, reputational harm, damaged client relationships and legal liability.

If we fail to effectively upgrade our information technology systems, our business and operations could be disrupted.

As part of our efforts to continue the improvement of our enterprise resource planning, we plan to upgrade our existing information technology systems in order to automate several controls that are currently performed manually. We may experience difficulties in transitioning to these upgraded systems, including loss of data and decreases in productivity as personnel work to become familiar with these new systems. In addition, our management information systems will require modification and refinement as we grow and as our business needs change, which could prolong

difficulties we experience with systems transitions, and we may not always employ the most effective systems for our purposes. If we experience difficulties in implementing new or upgraded information systems or experience significant system failures, or if we are unable to successfully modify our management information systems or respond to changes in our business needs, we may not be able to effectively manage our business and we may fail to meet our reporting obligations.

Our future success depends on our ability to recruit and retain qualified employees, including our executive officers and directors.

Our success is substantially dependent upon the performance of our senior management, such as our chief executive officer. Our management and employees may terminate their employment at any time, and the loss of the services of any of our executive officers could materially adversely affect our business. Our success is also substantially dependent upon our ability to attract additional personnel for all areas of our organization. Competition for qualified personnel is intense, and we may not be successful in attracting and retaining such personnel on a timely basis, on competitive terms or at all. Additionally, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as our executive officers due to potential liability concerns related to serving on a public company. If we are unable to attract and retain the necessary personnel, our results of operations, financial condition, business and prospects would be materially adversely affected.

Table of Contents

Changes in credit card association or other network rules or standards set by Visa or MasterCard, or changes in card association and debit network fees or products or interchange rates, could materially adversely affect our results of operations, business and financial position.

We, and the banks that issue our prepaid debit cards, are subject to Visa and MasterCard association rules that could subject us to a variety of fines or penalties that may be levied by the card associations or networks for acts or omissions by us or businesses that work with us, including card processors, such as Alegeus. The termination of the card association registrations held by us or any of the banks that issue our cards, or any changes in card association or other debit network rules or standards, including interpretation and implementation of existing rules, participants deciding to use PIN networks, standards or guidance that increase the cost of doing business or limit our ability to provide our products and services, or limit our ability to receive interchange, could have a material adverse effect on our results of operations, financial condition, business and prospects. In addition, from time-to-time, card associations increase the organization or processing fees that they charge, which could increase our operating expenses, reduce our profit margin and materially adversely affect our results of operations, financial condition, business and prospects.

We have entered into outsourcing and other agreements with third parties related to certain of our business operations, and any difficulties experienced in these arrangements could result in additional expense, loss of revenue or an interruption of our services.

We have entered into outsourcing agreements with third parties to provide certain customer service and related support functions to our employer clients and their employee participants. As a result, we rely on third parties over which we have limited control. If these third parties are unable to perform to our requirements or to provide the level of service required or expected by our employer clients, including ensuring the privacy and integrity of individually identifiable health information that they may be privy to as a result of the services they perform for our employer clients and their employee participants, our operating results, financial condition, business, prospects and reputation may be materially harmed. In addition, we may be forced to pursue alternative strategies to provide these services, which could result in delays, interruptions, additional expenses and loss of clients and related revenues.

If our intellectual property and technology are not adequately protected to prevent use or appropriation by our competitors, our business and competitive position could be materially adversely affected.

We rely on a combination of copyright, trademark and trade secret laws, as well as confidentiality procedures and contractual provisions, to establish and protect our intellectual property rights in the United States.

The efforts we have taken to protect our intellectual property may not be sufficient or effective, and our trademarks and copyrights may be held invalid or unenforceable. We may not be effective in policing unauthorized use of our intellectual property, and even if we do detect violations, litigation may be necessary to enforce our intellectual property rights. Any enforcement efforts we undertake, including litigation, could be time consuming and expensive, could divert our management's attention and may result in a court determining that our intellectual property rights are unenforceable. If we are not successful in cost-effectively protecting our intellectual property rights, our results of operations, financial condition, business and prospects could be materially adversely affected.

Our ability to use net operating loss carryforwards to offset future taxable income may be limited.

As of December 31, 2014, we had \$38.5 million of federal and \$47.0 million of state net operating loss carryforwards available to offset future taxable income. The state net operating loss carryforward is on the post-apportionment basis. These net operating loss carryforwards will expire beginning in 2024 through 2033 for U.S. federal income tax purposes and beginning in 2018 through 2033 for state income tax purposes, if not fully utilized. In addition, we have federal and state research and development credit carryforwards of approximately \$4.7 million and \$2.4 million, respectively. The federal research credit carryforwards expire beginning in 2022 through 2034, if not fully utilized. The California research credit carries forward indefinitely. Our ability to utilize net operating loss and tax credit carryforwards are subject to restrictions, including limitations in the event of past or future ownership changes as defined in Section 382 of the Internal Revenue Code ("IRC") of 1986, as amended, and similar state tax law. In general, an ownership change occurs if the aggregate stock ownership of certain stockholders increases by more than 50 percentage points over such stockholders' lowest percentage ownership during the testing period (generally three years). We have considered Section 382 of the IRC and concluded that any ownership change would not diminish our utilization of our net operating loss or our research and development credits during the carryover periods.

Table of Contents

If one or more jurisdictions successfully assert that we should have collected or in the future should collect additional sales and use taxes on our fees, we could be subject to additional liability with respect to past or future sales and the results of our operations could be adversely affected.

Sales and use tax laws and rates vary by jurisdiction and such laws are subject to interpretation. In those jurisdictions where we believe sales taxes are applicable, we collect and file timely sales tax returns. Currently, such taxes are minimal. Jurisdictions in which we do not collect sales and use taxes may assert that such taxes are applicable, which could result in the assessment of such taxes, interest and penalties, and we could be required to collect such taxes in the future. This additional sales and use tax liability could adversely affect our results of operations.

Third parties may assert intellectual property infringement claims against us, or our services may infringe the intellectual property rights of third parties, which may subject us to legal liability and materially adversely affect our reputation.

Assertion of intellectual property infringement claims against us could result in litigation. We might not prevail in any such litigation or be able to obtain a license for the use of any infringed intellectual property from a third party on commercially reasonable terms, or at all. Even if obtained, we may be unable to protect such licenses from infringement or misuse, or prevent infringement claims against us in connection with our licensing efforts. Any such claims, regardless of their merit or ultimate outcome, could result in substantial cost to us, divert management's attention and our resources away from our operations and otherwise adversely affect our reputation. Our process for controlling our own employees' use of third-party proprietary information may not be sufficient to prevent assertions of intellectual property infringement claims against us.

We rely on insurance to mitigate some risks of our business and, to the extent the cost of insurance increases or we maintain insufficient coverage, our results of operations, business and financial condition may be materially adversely affected.

We contract for insurance to cover a portion of our potential business risks and liabilities. In the current environment, insurance companies are increasingly specific about what they will and will not insure. It is possible that we may not be able to obtain sufficient insurance to meet our needs, may have to pay very high prices for the coverage we do obtain or may not acquire any insurance for certain types of business risk including those related to cyber security matters. This could leave us exposed, and to the extent we incur liabilities and expenses for which we are not adequately insured, our results of operations, business and financial condition could be materially adversely affected.

Also, to the extent the cost of maintaining insurance increases, our operating expenses will rise, which could materially adversely affect our results of operations, financial condition, business and prospects.

In the past significant deficiencies in our internal control over financial reporting have been identified. If our internal controls are not effective, there may be errors in our financial information that could require a restatement or delay our SEC filings, and investors may lose confidence in our reported financial information, which could lead to a decline in our stock price.

We have, in the past, experienced issues with our internal control over financial reporting and it is possible that we may discover significant deficiencies or material weaknesses in our internal control over financial reporting in the future. Any failure to maintain or implement required new or improved controls, or any difficulties we encounter in their implementation, could cause us to fail to meet our periodic reporting obligations, or result in material misstatements in our financial information. Any such delays or restatements could cause investors to lose confidence in our reported financial information and lead to a decline in our stock price.

Substantial sales of our common stock by our stockholders could depress the market price of our common stock regardless of our operating results.

Sales of substantial amounts of our common stock in the public market, or the perception that these sales could occur, could adversely affect the market price of our common stock and impair our ability to raise capital through offerings of our common stock. As of December 31, 2014, we had 35,479,360 shares of our common stock outstanding. In addition, as of December 31, 2014, there were outstanding options to purchase 3,206,316 shares of our common stock and 637,436 restricted stock units. Substantially all of our outstanding common stock is eligible for sale, subject to Rule 144 volume limitations for holders affected by such limitations, as are common stock issuable under vested and exercisable options. If our existing stockholders sell a large number of common stock or the public market perceives that existing stockholders might sell our common stock, the market price of our common stock could decline significantly. These sales might also make it more difficult for us to sell equity securities at a time and price that we deem appropriate.

Table of Contents

Our stock price has fluctuated and may continue to do so and may even decline regardless of our financial performance.

The market price of our common stock has fluctuated and may continue to fluctuate significantly in response to numerous factors, many of which are beyond our control, including:

- actual or anticipated fluctuations in our financial results;
- the financial projections we provide to the public, any changes in these projections or our failure to meet these projections;
- failure of securities analysts to initiate or maintain coverage of our company, changes in financial estimates by any securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- ratings changes by any securities analysts who follow our company;
- announcements by us or our competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;
- changes in operating performance and stock market valuations of other newly public companies generally, or those in our industry in particular;
- changes brought about by health care reform and the emergence of federal, state and private exchanges;
- price and volume fluctuations in the overall stock market, including as a result of trends in the global economy;
- any major change in our board of directors or management;
- lawsuits threatened or filed against us; and
- other events or factors, including those resulting from war, incidents of terrorism or responses to these events.

In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against such a company. If securities class action litigation is instituted against us, it could result in substantial costs and a diversion of our management's attention and resources and could materially adversely affect our operating results.

Anti-takeover provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation, amended and restated bylaws and Delaware law contain provisions that could have the effect of delaying, preventing or rendering more difficult an acquisition of us if such acquisition is deemed undesirable by our board of directors. Our corporate governance documents include provisions that:

- create a classified board of directors whose members serve staggered three-year terms;
- authorize "blank check" preferred stock, which could be issued by the board of directors without stockholder approval and may contain voting, liquidation, dividend and other rights superior to our common stock;

- limit the ability of our stockholders to call and bring business before special meetings;
- require advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors;
- control the procedures for the conduct and scheduling of board of directors and stockholder meetings; and
- provide the board of directors with the express power to postpone previously scheduled annual meetings and to cancel previously scheduled special meetings.

These provisions, alone or together, could delay or prevent unsolicited takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation Law, which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock.

Any provision of our amended and restated certificate of incorporation or amended and restated bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock and could also affect the price that some investors are willing to pay for our common stock.

Table of Contents

We do not expect to declare any dividends in the foreseeable future.

We do not anticipate declaring any cash dividends to holders of our common stock in the foreseeable future. In addition, our existing credit facility prohibits us from paying cash dividends, and any future financing agreements may prohibit us from paying any type of dividends. Consequently, investors may need to rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase our common stock.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Facilities

We do not currently own any of our facilities. Our corporate headquarters are located in San Mateo, California where we occupy approximately 38,249 square feet of space under a lease that expires in December 2014. We have additional facilities in Arizona, California, Florida, Massachusetts, New York, Ohio, Rhode Island, Texas, Vermont and Wisconsin under various that will expire between November 2012 and January 2023. We believe that our facilities are adequate for our current needs and that suitable additional or substitute space will be available as needed to accommodate planned expansion of our operations.

Item 3. Legal Proceedings

From time-to-time, we may be subject to various legal proceedings and claims that arise in the normal course of our business activities. As of the filing of this Annual Report on Form 10-K, we are not a party to any litigation whereby the outcome of such litigation, if determined adversely to us, would individually or in the aggregate be reasonably expected to have a material adverse effect on our results of operations, prospects, cash flows, financial position or brand.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Edgar Filing: WAGEWORKS, INC. - Form 10-K

Our common stock has traded on the New York Stock Exchange, or the NYSE, under the symbol “WAGE” since May 2012. The following table sets forth the range of high and low sales prices on the NYSE of our common stock for the periods indicated, as reported by the NYSE.

	Price Range	
	High	Low
Fiscal 2013:		
First Quarter (January 1, 2013 - March 31, 2013)	\$ 26.25	\$ 17.32
Second Quarter (April 1, 2013 - June 30, 2013)	\$ 34.95	\$ 23.91
Third Quarter (July 1, 2013 - September 30, 2013)	\$ 56.97	\$ 32.88
Fourth Quarter (October 1, 2013 - December 31, 2013)	\$ 62.58	\$ 46.59

	Price Range	
	High	Low
Fiscal 2014:		
First Quarter (January 1, 2014 - March 31, 2014)	\$ 68.31	\$ 52.90
Second Quarter (April 1, 2014 - June 30, 2014)	\$ 58.36	\$ 33.04
Third Quarter (July 1, 2014 - September 30, 2014)	\$ 49.95	\$ 39.31
Fourth Quarter (October 1, 2014 - December 31, 2014)	\$ 64.99	\$ 43.44

Table of Contents

Stockholders

As of February 20, 2015, according to the records of our transfer agent, there were 34 holders of record of our common stock. The number of beneficial stockholders is substantially greater than the number of holders of record because a large portion of our common stock is held through brokerage firms.

Dividends

We have never declared nor paid any cash dividend on our common stock. We currently intend to retain any future earnings and do not currently plan to pay any dividends in the immediate future. The payment of future dividends on the common stock and the rate of such dividends, if any and when not restricted, will be determined by our board of directors in light of our results of operations, financial condition, capital requirements, and any other relevant factors.

Stock Performance Graph

This performance graph shall not be deemed “filed” for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

The following graph compares the cumulative total return of our common stock with the total return for the New York Stock Exchange Composite Index (the “NYSE Composite”) and the Russell 3000 Index (the “Russell 3000”) from May 10, 2012 (the date our common stock commenced trading on the NYSE) through December 31, 2014. The chart assumes \$100 was invested on May 10, 2012, in the common stock of WageWorks, Inc., the NYSE Composite and the Russell 3000, and assumes reinvestment of any dividends. The stock price performance on the following graph is not necessarily indicative of future stock price performance.

In fiscal 2012, the revenue growth and associated increase to cost of revenues and other operating expenses were driven by post-purchase revenue from our acquisitions of Choice Strategies and TransitChek which were acquired in January 2012 and February 2012, respectively. The revenue growth and associated increases to cost of revenues and other operating expenses in fiscal 2013, was driven by post-purchase revenue from the acquisitions of Benefit Concepts and Crosby Benefit Systems, which were acquired in December 2012 and May 2013, respectively. Similarly, the revenue growth and associated increase in cost of revenues and other operating expenses in fiscal 2014, was driven by post-purchase revenue from the acquisition of CONEXIS, which was acquired in August 2014. In addition, changes in the estimated fair value of contingent consideration related to our acquisitions are included within the amortization and change in contingent consideration line item in the consolidated statement of income. The nature of these changes are disclosed within Note 1 to our consolidated financial statements under “Fair Value of Financial Instruments” and within our Management’s Discussion and Analysis of this Form 10-K.

Table of Contents

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this Annual Report on Form 10-K. The following discussion and analysis contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. Statements that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements are often identified by the use of words such as, but not limited to, “anticipate,” “believe,” “can,” “continue,” “could,” “estimate,” “expect,” “intend,” “plan,” “project,” “seek,” “should,” “target,” “will,” “would” and similar expressions or variations intended to identify forward-looking statements. Such statements include, but are not limited to, statements concerning market opportunity, our future financial and operating results, investment strategy, sales and marketing strategy, management’s plans, beliefs and objectives for future operations, technology and development, economic and industry trends or trend analysis, expectations about seasonality, opportunity for portfolio purchases, use of non-GAAP financial measures, operating expenses, anticipated income tax rates, capital expenditures, cash flows and liquidity. These statements are based on the beliefs and assumptions of our management based on information currently available to us. Such forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results and the timing of certain events to differ materially from future results expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section titled “Risk Factors” included under Part I, Item 1A above. Furthermore, such forward-looking statements speak only as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statements to reflect events or circumstances after the date of such events.

Overview

We are a leader in administering Consumer-Directed Benefits, or CDBs, which empower employees to save money on taxes while also providing corporate tax advantages for employers. We are solely dedicated to administering CDBs, including pre-tax spending accounts such as health and dependent care Flexible Spending Accounts, or FSAs, Health Savings Accounts, or HSAs, Health Reimbursement Arrangements, or HRAs, as well as commuter benefit services, including transit and parking programs, wellness programs and other employee spending account benefits, in the United States. We also administer Consolidated Omnibus Budget Reconciliation Act, or COBRA, continuation services to employer clients.

We deliver our CDB programs through a highly scalable delivery model that employer clients and their employee participants may access through a standard web browser on any internet-enabled device, including computers, smart phones and other mobile devices such as tablet computers. Our on-demand delivery model eliminates the need for our employer clients to install and maintain hardware and software in order to support CDB programs and enables us to rapidly implement product enhancements across our entire user base.

Our CDB programs assist employees and their families in saving money by using pre-tax dollars to pay for certain of their healthcare, dependent care and commuter expenses. Employers financially benefit from our programs through reduced payroll taxes, even after factoring in our fees. Under our FSA, HSA and commuter programs, employee participants contribute funds from their pre-tax income to pay for qualified out-of-pocket healthcare expenses not fully covered by insurance, such as co-pays, deductibles and over-the-counter medical products or for commuting costs.

These employee contributions result in savings to both employees and employers. As an example, based on our average employee participant's annual FSA contribution of approximately \$1,300 and an assumed personal combined federal and state income tax rate of 35%, an employee participant will reduce his or her taxes by approximately \$455 per year by participating in an FSA. Our employer clients also realize payroll tax (i.e., FICA and Medicare) savings on the pre-tax contributions made by their employees. In the above FSA example, an employer client would save approximately \$56 per participant per year, even after the payment of our fees.

Under our HRA programs, employer clients provide their employee participants with a specified amount of available reimbursement funds to help their employee participants defray out-of-pocket medical expenses such as deductibles, co-insurance and co-payments. All amounts paid by the employer into HRAs are deductible by the employer as an ordinary business expense and are tax-free to the employee.

We administer COBRA continuation services to employer clients to meet the employer's obligation to make available continuation of coverage for participants who are no longer eligible for the employer's COBRA covered benefits. As part of our COBRA program, we offer a direct billing service where former employee participants pay for coverage they elect to continue and we ensure our employer clients meet the challenging aspects of COBRA compliance and administration.

Table of Contents

Benefit plan years customarily run concurrently with the calendar year and have an open enrollment period that typically occurs at benefit plan year-end during the fourth quarter of the calendar year. Most of our healthcare CDB agreements are executed in the last quarter of the calendar year. Because the signing of our contract often coincides with open enrollment, employer clients are able to offer our CDB programs to their employees during open enrollment for the upcoming benefit year. As a result of this timing, we are able to obtain significant visibility into our healthcare-related revenue early on in each plan year because healthcare benefit plans are administered on an annual basis, contractual revenue is based on the number of participants enrolled in our CDB programs on a per month basis and the minimum number of enrolled participants for the plan year is usually established at the close of the open enrollment period. In contrast to healthcare CDB programs, enrollment in commuter programs occurs on a monthly basis. Therefore, there is less visibility and some variability in commuter revenue from month-to-month, particularly during the summer vacation period when employee participants are less likely to participate in commuter programs for those months.

We offer prepaid debit cards for use in conjunction with almost all of the plans that we administer. These prepaid debit cards are offered in coordination with commercial banks and card associations. We receive interchange fees from employee participants' prepaid debit card transactions, which are calculated as a percentage of the expenses transacted on each card. Although the rules do not include an explicit exemption for health benefit cards, these interchange fees are exempt from the Durbin Amendment because there is an exception for general purpose reloadable prepaid cards and some of such cards also fall outside the definitions that establish the scope of coverage. In addition to interchange fees, we also derive revenue through our wholesale card program from fees we charge to assist third party administrators, or TPAs, in issuing our prepaid debit cards to their employee participant groups and in selling their administrative services utilizing our prepaid debit cards to new employee participants. We have historically experienced seasonality in healthcare interchange revenue, which is typically the highest during the first quarter of the year because participants are either using their newly available balances for the current plan year or spending any remaining funds available from the prior plan year during the prior plan year's grace period. A grace period is generally established by employer clients as January 1 through March 15 of the succeeding plan year and is the period during which employee participants can access funds from the prior plan year's FSA account. Healthcare interchange revenue generally declines through the second and third quarters and is subject to a small increase in December as some employee participants strive to use their remaining account balances before the end of the plan year.

We also sell our customer service, enrollment, eligibility, billing and payment processing services to a customer for purposes of assisting in the administration of their public health insurance exchange business.

We also offer transit passes from various transit agencies, which we purchase on behalf of employee participants. Due to our significant volume, we receive commissions on these passes which we recognize as vendor commission revenue.

Our cost of revenues typically varies with our revenue and is, therefore, impacted by the seasonality of our business. We incur higher expenses in the first quarter associated with increased headcount in the form of temporary workers, consultants and other outsourced services that are required to cover the increased call volume and activity associated with the commencement of the new plan year. The need for these resources diminishes in the second and third quarters, but increases again in the fourth quarter when we provide services to our employer clients during their open enrollment periods. We also incur higher debit card production expenses in the fourth quarter.

At the beginning of a plan year, most of our enterprise clients provide us with prefunds for their FSA programs based on a percentage of projected elections by the employee participants for the plan year ahead. This prefunding activity covers our estimate of approximately one week of spending on behalf of the employer client's employee participants.

During the plan year, we process employee participants' FSA claims as they are submitted and typically seek reimbursement from our employer clients within one week after settling the claim. Employer clients generally set a time after the close of a plan year when employee participants in FSA programs are allowed to continue submitting claims for the preceding plan year, which we refer to as a run-out period. At the end of the plan year and following the grace period and run-out period, as applicable, we reconcile all claims paid against the FSA prefund and return any unused funds to the employer. If an employer has adopted the new carryover option instead of the grace period rule for their plan year, then any unused funds, of up to \$500 per participant, will be carried over into the new plan year rather than returned to the employer client. Prior to that point we will have already received an entirely new FSA prefund from a continuing employer client for the new plan year.

Our growth strategy includes acquiring and integrating smaller TPAs to expand our employer client base. Consistent with this acquisition strategy, we have made seven portfolio purchases and two acquisitions since 2007. Our model for these portfolio purchases and acquisitions generally involves a payment at closing of the transaction and contingent payments based on achievement of revenue growth targets. Our most recent acquisition of CONEXIS in August 2014 did not include a contingent consideration payment. Portfolio purchases and acquisitions may have a material adverse impact on our results of operations, including a potential material adverse impact on our cost of revenues in the short term as we migrate acquired clients to our proprietary technology platforms, typically over the succeeding 12 to 24 months, in order to achieve additional operating efficiencies. There are several hundred regional TPA portfolios that we continually monitor and evaluate in order to maintain a robust pipeline of potential candidates for purchase and we intend to continue executing our focused strategy of portfolio purchases to broaden our employer client base.

Table of Contents

Key Components of Our Results of Operations

Revenue

We generate revenue from the following sources: healthcare solutions, commuter solutions, Consolidated Omnibus Budget Reconciliation Act services, or COBRA, and other services.

Healthcare Revenue

We derive our healthcare revenue from the service fees paid by our employer clients for the administration services we provide in connection with their employee participants' healthcare FSA, dependent care FSA, HRA and HSA tax-advantaged accounts. Our fee is generally fixed for the duration of the written agreement with our employer client, which is typically three years for our enterprise clients and one to three years for our small-and medium-sized business, or SMB, clients. These fees are paid to us on a monthly basis by our employer clients, and the related services are made available to employee participants pursuant to written agreements between us and each employer client. Almost all of the healthcare benefit plans we service on behalf of our enterprise employer clients are subject to contractual minimum monthly billing amounts. Generally, such minimum billing amounts are subject to upward revision on a monthly basis as our employer clients hire new employees who elect to participate in our programs, but generally are not subject to downward revision when employees leave their employers because we continue to administer those former employee participants' accounts for the remainder of the plan year. For SMB employer clients, the monthly fee remains constant for the plan year unless there is a 10% or greater increase in the number of employee participants in which case it is subject to upward revision. Revenue is recognized monthly as services are rendered under our written service agreements.

We also earn interchange revenue from debit cards used by employee participants in connection with all of our healthcare programs and through our wholesale card program, which we recognize monthly based on reports received from third parties. We also earn revenue from self-service plan kits called Premium Only Plan kits, or POP revenue.

Commuter Revenue

For our Commuter Order Model, or COM, Commuter Account Model, or CAM and Commuter Express, we derive our commuter revenue from monthly service fees paid by our employer clients, interchange revenue that we receive from debit cards used by employee participants in connection with our commuter solutions and revenue from the sale of transit passes used in our commuter solutions. Our fees from employer clients are normally paid monthly in arrears based on the number of employee participants enrolled for the month. Most agreements have volume tiers that adjust the per participant price based upon the number of participants enrolled during that month. Revenue is recognized monthly as services are rendered under these written service agreements. We earn interchange revenue from the debit cards used by employee participants in connection with our commuter programs, which we recognize monthly based on reports received from third parties. We also receive commissions from transit passes, which we purchase from various transit agencies on behalf of employee participants. Due to our significant volume, we receive commissions on these passes which we recognize as vendor commission revenue. Commission revenue is recognized on a monthly

basis as transactions are placed under written purchase agreements having stipulated terms and conditions, which do not require management to make any significant judgments or assumptions regarding any potential uncertainties.

Revenue from the TransitChek Basic program is based on a percentage of the face value of the transit and parking passes ordered by employer clients and revenue from the TransitChek Premium program is derived from monthly service fees paid by employer clients based on the number of participants. In both programs, revenues also include interchange revenue that we receive from debit cards used by employee participants in connection with our commuter solutions. We also recognize revenue on our estimate of certain passes that will expire unused over the estimated useful life of the passes, as the amounts paid for these passes are nonrefundable to both the employer client and the employee participant.

COBRA Revenue

Our COBRA revenue, is derived from the administration services we provide to employer clients for continuation of coverage for participants who are no longer eligible for the employer's health benefits, such as medical, dental, vision, and for the continued administration of the employee participants' HRAs and certain healthcare FSAs. Our agreements to provide COBRA services are not consistently structured and we receive fees based on a variety of methodologies.

Table of Contents

Other Revenue

Other revenue includes enrollment and eligibility services, employee account administration (i.e., tuition and health club reimbursements) and project-related professional fees. We also derive other revenue from administrative services we provide to a customer to operate their health insurance exchange business which includes enrollment, billing, customer service and payment processing services. Other services revenue is recognized as services are rendered under our written service agreements.

Costs and Expenses

Cost of Revenues (excluding amortization of internal use software)

Cost of revenues includes the costs of providing services to our employer clients' employee participants.

The primary component of cost of revenues is personnel expenses and the expenses related to our claims processing, product support and customer service personnel. Cost of revenues includes outsourced and temporary help costs, check/ACH payment processing services, debit card processing services, shipping and handling costs for cards and passes and employee participant communications costs.

Cost of revenues also includes the losses or gains associated with processing our large volume of transactions, which we refer to as "net processing losses or gains." In the normal course of our business, we make administrative and processing errors that we cannot bill to our employer clients. For example, we may over-reimburse employee participants for claims they submit or incur the cost of replacing commuter passes that are not received by employee participants. Upon identifying such an error, we record the expense as a processing loss. In certain circumstances, we experience recoveries with respect to these amounts which are recorded as processing gains.

Cost of revenues does not include amortization of internal use software or change in contingent consideration, which are included in amortization and change in contingent consideration, or the cost of operating on-demand technology infrastructure, which is included in technology and development expenses.

Technology and Development

Technology and development expenses include personnel and related expenses for our technology operations and development personnel as well as outsourced programming services, the costs of operating our on-demand technology infrastructure, depreciation of equipment and software licensing expenses. During the planning and post-implementation phases of development, we expense, as incurred, all internal use software and website development expenses associated with our proprietary scalable delivery model. During the development phase, costs incurred for internal use software are capitalized and subsequently amortized once the software is available for its intended use. See "Amortization and Change in Contingent Consideration" below. Expenses associated with the platform content or the repair or maintenance of the existing platforms are expensed as incurred.

Sales and Marketing

Sales and marketing expenses consist primarily of personnel and related expenses for our sales, client services and marketing staff, including sales commissions for our direct sales force and external agent/broker commission expense, as well as communication, promotional, public relations and other marketing expenses.

General and Administrative

General and administrative expenses include personnel and related expenses of and professional fees incurred by our executive, finance, legal, human resources and facilities departments.

Amortization and Change in Contingent Consideration

Amortization and change in contingent consideration expense includes amortization of internal use software, amortization of acquired intangible assets and changes in contingent consideration in connection with portfolio purchases and acquisitions.

We capitalize internal use software and website development costs incurred during the development phase and we amortize these costs over the technology's estimated useful life, which is generally four years. These capitalized costs include personnel costs and fees for outsourced programming and consulting services.

We also amortize acquired intangible assets consisting primarily of employer client agreements and relationships and broker relationships. Employer client agreements and relationships and broker relationships are amortized on a straight-line basis over an average estimated life.

Table of Contents

We measure acquired contingent consideration payable each reporting period at fair value and recognize changes in fair value in our consolidated statements of income each period, until the final amount payable is determined. Increases or decreases in the fair value of the contingent consideration payable can result from changes in revenue forecasts, discount rates and risk and probability assumptions. Significant judgment is employed in determining the appropriateness of these assumptions in each period.

Other Income (Expense)

Other income (expense) primarily consists of (i) interest income; (ii) interest expense; and (iii) gain (loss) on settlements and other investments.

Provision for Income Taxes

We are subject to taxation in the United States. Income taxes are computed using the asset and liability method, under which deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to affect taxable income. As of December 31, 2014, we remain in a net deferred tax asset position. Valuation allowances are established when necessary to reduce net deferred tax assets to the amount expected to be realized.

At December 31, 2014, we had federal and state operating loss carryforwards of approximately \$38.5 million and \$47.0 million, respectively, available to offset future regular and alternative minimum taxable income. The state net operating loss carryforward is on the post-apportionment basis. Our federal net operating loss carryforwards expire in the years 2024 through 2033, if not utilized. The state net operating loss carryforwards expire in the years 2018 through 2033. The federal and state net operating loss carryforwards include excess tax deductions related to stock options in the amount of \$21.8 million and \$16.2 million, respectively. When utilized, the related excess tax benefit will be booked to additional paid-in capital. We also have tax deductible goodwill related to asset acquisitions.

We have federal and California research and development credit carryforwards of approximately \$4.7 million and \$2.4 million respectively, available to offset future tax liabilities. The federal research credit carryforwards expire beginning in 2022 through 2034, if not fully utilized. The California tax credit carryforward can be carried forward indefinitely.

Our ability to utilize the net operating losses and tax credit carryforwards are subject to restrictions, including limitations in the event of past or future ownership changes as defined in Section 382 of the Internal Revenue Code ("IRC") of 1986, as amended, and similar state tax law. In general, an ownership change occurs if the aggregate stock ownership of certain stockholders increases by more than 50 percentage points over such stockholders' lowest percentage ownership during the testing period (generally three years). We have considered Section 382 of the IRC and concluded that any ownership change would not diminish our utilization of the net operating loss or research and development credits during the carryover periods.

We make estimates and judgments about our future taxable income that are based on assumptions that are consistent with our plans and estimates. Should the actual amounts differ from our estimates, our provision for income taxes could be materially affected.

Critical Accounting Policies and Significant Management Estimates

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles, or GAAP, in the United States. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances, changes in the accounting estimates are reasonably likely to occur from period-to-period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application, while in other cases, management's judgment is required in selecting among available alternative accounting standards that allow different accounting treatment for similar transactions. We believe that there are several accounting policies that are critical to understanding our business and prospects for future performance, as these policies affect the reported amounts of revenue and other significant areas that involve management's judgment and estimates. These significant policies and our procedures related to these policies are described in detail below. In addition, please refer to the "Notes to Consolidated Financial Statements" for further discussion of our accounting policies.

Revenue Recognition

We report revenue for the following product lines: healthcare, commuter, COBRA and other services.

Table of Contents

We recognize revenue when the following criteria are met: persuasive evidence of an arrangement exists, there is a fixed or determinable fee, delivery has occurred, and collectability is reasonably assured.

Healthcare and commuter programs include revenues generated from benefit service fees based on employee participant levels, fees based on a percentage of the face value of the transit and parking passes, interchange and other commission fees. The criteria above are generally met each month as we deliver services to our employer clients and their employee participants.

Most of our employee participants utilize prepaid debit cards to pay for their qualified healthcare and commuter expenses and we receive fees, known as interchange, that represent a percentage of the expenses transacted on each card. We also receive commissions from transit passes that we purchase from various transit agencies on behalf of employee participants. Due to our significant volume, we receive commissions on these passes which we recognize as vendor commission revenue. In addition, we recognize revenue on our estimate of passes that will expire unused over the estimated useful life of the passes, as the amounts paid for these passes are nonrefundable to both the employer client and the employee participant.

Valuation of Long-Lived Assets and Goodwill

Long-lived assets, such as property, equipment, acquired intangibles and capitalized internal use software subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable such as: (i) a significant adverse change in the extent or manner in which it is being used or in its physical condition, (ii) a significant adverse change in legal factors or in the business climate that could affect its value, or (iii) a current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with its use.

Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset group to estimated undiscounted future cash flows expected to be generated by the asset group. An asset group is the lowest level at which cash flows can be identified that are largely independent of the cash flows of other asset groups. If the carrying amount of an asset group exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset group exceeds the fair value of the asset group. We have determined that the entity level is the lowest level at which cash flows can be identified that are largely independent of the cash flows of other assets and liabilities as our revenue is interdependent on the revenue-producing activities and significant shared operating activities of all long-lived assets. The entity level is the aggregation of our revenue streams arising from the administration of employer client sponsored healthcare programs, commuter programs, COBRA programs and other programs. Management tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets.

We perform an annual goodwill impairment test on December 31st and more frequently if events and circumstances indicate that the asset might be impaired. The impairment tests are performed in accordance with Financial Accounting Standards Board (FASB) ASC 350, Intangibles—Goodwill and Other, or ASC 350. An impairment loss is recognized to the extent that the carrying amount exceeds the reporting unit's fair value. The goodwill impairment analysis is a two-step process: First, the reporting unit's estimated fair value is compared to its carrying value, including goodwill. If we determine that the estimated fair value of the reporting unit is less than its carrying value, we move to the second step to determine the implied fair value of the reporting unit's goodwill. If the carrying amount of the reporting unit's goodwill exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of the reporting unit's goodwill in a manner similar to a purchase price allocation. ASC 350 allows an entity the option to make a qualitative evaluation about the

likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit. If impairment is deemed more likely than not, management would perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. The amendments also expand upon the examples of events and circumstances that an entity should consider between annual impairment tests in determining whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

In assessing the qualitative factors, we assess relevant events and circumstances that may impact the fair value and the carrying amount of the reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit's fair value or carrying amount involve significant judgments and assumptions. The judgment and assumptions include the identification of macroeconomic conditions, industry and market considerations, overall financial performance, our specific events and share price trends and making the assessment on whether each relevant factor will impact the impairment test positively or negatively and the magnitude of any such impact. At December 31, 2014, we completed our annual goodwill impairment assessment and management concluded that no indicators of an impairment were determined to be present.

When reviewing goodwill for impairment, we assess whether goodwill should be allocated to operating levels lower than our single operating segment for which discrete financial information is available and reviewed for decision-making purposes. These lower levels are referred to as reporting units. Currently, our one reporting unit was determined to be our single reportable segment in accordance with FASB ASC 280, Segment Reporting.

To date, we have not made any impairment adjustments to goodwill, as the fair value of our reporting unit in all prior years has always exceeded our carrying value by a significant amount.

Table of Contents

Income Taxes

We are subject to income taxes in the United States. Significant judgments are required in determining the consolidated provision for income taxes.

We use the asset and liability method to account for income taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and net operating loss carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. We record a valuation allowance to reduce deferred tax assets to an amount whose realization is more likely than not.

During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. As a result, we recognize tax liabilities based on estimates of whether additional taxes and interest will be due. These tax liabilities are recognized when, despite the belief that our tax return positions are supportable, we believe that certain positions may not be more likely than not of being sustained upon review by tax authorities. As of December 31, 2014, our unrecognized tax benefits approximated \$4.1 million, and we have no uncertain tax positions that would be reduced as a result of a lapse of the applicable statute of limitations. We believe that our accruals for tax liabilities are adequate for all open audit years based on our assessment of many factors, including past experience and interpretations of tax law. This assessment relies on estimates and assumptions and may involve a series of complex judgments about future events. We do not anticipate any adjustments would result in a material change to our financial position. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact income tax expense in the period in which such determination is made. We recognize accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense.

Management periodically evaluates if it is more likely than not that some or all of the deferred tax assets will be realized. In making such determination, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial performance. In order to support a conclusion that a valuation allowance is not needed, positive evidence of sufficient quantity and quality (objective compared to subjective) is necessary to overcome negative evidence.

In the future, if there is a significant negative change in our operating results or the other factors that were considered in making this determination, we could be required to record a valuation allowance against our deferred tax assets. Any subsequent increases in the valuation allowance will be recognized as an increase in deferred tax expense. Any decreases in the valuation allowance will be recorded either as a reduction of the income tax provision or as a credit to paid-in capital if the associated deferred tax asset relates to windfall stock option deductions on the exercise of stock options.

Stock-Based Compensation

Stock-based compensation for stock awards is estimated at the grant date based on the award's fair value as calculated by the Black-Scholes option pricing model and is recognized as an expense over the requisite service period, which is generally the vesting period. The determination of the fair value of stock-based awards on the date of grant using an option pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include our expected stock price and related volatility over the expected term of

the awards, actual and projected employee stock option exercise behaviors, risk-free interest rate, estimated forfeitures and expected dividends. The following table sets forth the weighted average assumptions used with respect to valuing option awards during 2012, 2013 and 2014.

	Year Ended December 31,		
	2012	2013	2014
Expected volatility	52.79%	51.43%	46.90%
Risk-free interest rate	1.26%	1.09%	1.87%
Expected term (in years)	6.60	6.00	6.09
Dividend yield	—%	—%	—%

We use the “simplified” method as an estimate of expected term due to the lack of option exercise history as a public company. We based the risk-free interest rate on zero-coupon yields implied from U.S. Treasury issues with remaining terms similar to the expected term on the options. We estimate expected volatility based on the historical volatility of comparable companies from a representative peer-group as well as our own historical volatility. We do not anticipate paying any cash dividends in the foreseeable future, and therefore, used an expected dividend yield of zero in the option pricing model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. If we use different assumptions for estimating stock-based compensation expense in future periods, or if actual forfeitures differ materially from our estimated forfeitures, future stock-based compensation expense may differ significantly from what we have recorded in the current period and could materially affect our income from operations, net income and net income per share.

Table of Contents

Results of Operations

Revenue

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
Revenue:	(in thousands)				
Healthcare	\$ 112,905	\$ 135,140	\$ 155,989	20%	15%
Commuter	51,817	59,579	61,776	15%	4%
COBRA	8,157	15,047	31,996	84%	113%
Other	4,403	9,512	18,071	116%	90%
Total revenue	\$ 177,282	\$ 219,278	\$ 267,832	24%	22%

Healthcare Revenue

The \$20.8 million increase in healthcare revenue from 2013 to 2014 was primarily due to an \$18.7 million increase in FSA and HRA revenue. The FSA and HRA revenue increase was primarily driven by growth in new employee participation in our programs of \$9.2 million, post-purchase revenues for CONEXIS, which was acquired in August 2014, of \$5.7 million and an interchange fee revenue increase of \$2.9 million due to increased debit card usage as well as an increase in the number of debit cards issued. FSA and HRA also increased by \$0.9 million in POP revenue, during 2014 compared to 2013. The growth in healthcare revenue was further driven by a \$2.1 million increase in HSA revenue primarily due to growth in participation of our HSA programs.

The \$22.2 million increase in healthcare revenue from 2012 to 2013 was primarily due to a \$17.0 million increase in FSA revenue, which was driven by an increase of \$7.5 million related to the Aflac channel partner arrangement, \$5.4 million in post-purchase revenues for BCI, which was acquired in December 2012, \$1.2 million from the addition of a large employer client in the first quarter of 2013 and \$1.3 million in post-purchase revenues for CBS, which was acquired in May 2013. The growth in healthcare revenue was further driven by a \$4.3 million increase in HRA revenue primarily due to the addition of a large employer client and \$1.0 million increase in HSA revenue due to growth in participation of our HSA programs.

Commuter Revenue

The \$2.2 million increase in commuter revenue from 2013 to 2014 was primarily driven by a \$0.9 million increase in our commuter benefit programs, due to growth in the number of employee participants in these programs. The

remainder of the commuter revenue growth was primarily driven by increased interchange revenue of \$0.8 million as a result of increased debit card usage and a full year of revenue from CBS of \$0.3 million.

The \$7.8 million increase in commuter revenue from 2012 to 2013 was primarily driven by a \$2.3 million increase in TransitCheck Premium revenue and a \$1.2 million increase in Commuter Order Model revenue as the number of employee participants in these programs grew, as well as having a full year of revenue in 2013 for TC, which was acquired in February of 2012. Commuter revenue was further driven by a \$2.1 million increase in TransitCheck Basic revenue due primarily to the increase in the statutory monthly cap increase in the first quarter of 2013, as well as the impact from having a full year of revenue for TC. The remainder of the commuter revenue growth was primarily driven by \$1.1 million in increased interchange revenue as a result of increased debit card usage and \$0.6 million in transit agency commission revenue.

COBRA Revenue

The \$16.9 million increase in COBRA revenue from 2013 to 2014 was primarily driven by \$15.9 million in post-purchase revenues for CONEXIS. The remainder of the COBRA revenue growth was primarily driven by increased participation by employer clients in our COBRA administration services.

The \$6.9 million increase in COBRA revenue from 2012 to 2013 was primarily driven by the inclusion of \$5.7 million in post-purchase COBRA revenues for BCI and \$0.5 million in post-purchase revenues for CBS. The remainder of the COBRA revenue growth was primarily driven by increased participation by employer clients in our COBRA administration services.

Table of Contents

Other Revenue

The \$8.6 million increase in other revenue from 2013 to 2014 was primarily driven by \$8.2 million in post-purchase revenues for CONEXIS, with the remainder of the increase due to increases in our gym and tuition reimbursement programs.

The \$5.1 million increase in other revenue from 2012 to 2013 was primarily driven by the inclusion of \$3.8 million in post-purchase revenues for BCI and \$1.0 million in post-purchase revenues for CBS.

Cost of Revenue

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
	(in thousands)				
Cost of revenues (excluding amortization of internal use software)	\$ 64,647	\$ 81,918	\$ 100,226	27%	22%
Percent of revenue	36%	37%	37%		

The \$18.3 million increase in cost of revenues from 2013 to 2014 was primarily due to the inclusion of post-purchase expense of \$10.3 million for CONEXIS, as well as increases in outsourced services costs of \$4.0 million due to processing and supporting an increased number of employee participants. Cost of revenues was further driven by an increase in salaries and personnel-related costs of \$1.5 million due to an increase in headcount to support employee participant growth and an increase in stock-based compensation expense of \$1.2 million due to new grants of stock options and performance-based restricted stock units. Cost of revenues was also driven by an increase in travel and entertainment of \$0.4 million to support our sales efforts and acquisition related travel as well as an increase in postage and printing costs of \$0.3 million as we transitioned certain COBRA printing costs to an outside vendor. The remainder of the increase in cost of revenues is primarily due to platform losses during 2014 as well as favorable platform loss adjustments in 2013.

The \$17.3 million increase in cost of revenues (excluding amortization of internal use software) from 2012 to 2013 was primarily driven by increases in salaries and personnel-related costs of \$9.0 million, primarily as a result of post-purchase salaries and personnel-related costs from the BCI and CBS portfolio purchases, which increased headcount. Cost of revenues were further driven by the inclusion of approximately \$4.8 million in other post-purchase expenses for BCI and CBS, and \$2.6 million in outsource services costs resulting from processing and supporting an increased number of employee participants. Stock-based compensation expense increased \$0.7 million, primarily due to additional expense from new grants of restricted stock units, performance-based restricted stock units and stock options, as well as adjustments to the vesting terms of performance based stock options as the probability of achieving the performance criteria for early vesting were deemed probable of being met.

As we continue to scale our operations, we expect our cost of revenues to increase in dollar amount to support increased employer client and employee participant levels. Cost of revenues will continue to be affected by our portfolio purchases, acquisitions and channel partner arrangements. Prior to migrating to our proprietary technology platforms, these new portfolios often operate with higher service delivery costs that result in increased cost of revenues until we are able to complete the migration process, which typically occurs over the 12- to 24-month period following closing of the portfolio purchase or acquisition.

Technology and Development

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
	(in thousands)				
Technology and development	\$ 18,849	\$ 21,459	\$ 27,741	14%	29%
Percent of revenue	10%	10%	10%		

Table of Contents

The \$6.3 million increase in technology and development expenses from 2013 to 2014 was primarily due to the inclusion of post-purchase expense of \$6.2 million for CONEXIS as well as a \$0.4 million increase in stock-based compensation expense due to new grants of stock options. These increases were partially offset by higher capitalization of internally developed software projects which reduced the amount of expense recognized year over year, as we had a greater number of software projects in 2014 as compared to 2013, partly driven by new software projects related to our acquisition of CONEXIS.

The \$2.6 million increase in technology and development expenses from 2012 to 2013 was driven by increases in salaries and personnel-related costs of \$2.6 million, primarily as a result of post-purchase salaries and personnel-related costs due to an increase in headcount from the BCI and CBS portfolio purchases and increased headcount to support improvements to our platform in handling the processing of claims. Technology and development expenses were further driven by the inclusion of approximately \$0.7 million in other post-purchase expenses for BCI and CBS and an increase in stock-based compensation expense of \$0.4 million from new grants of restricted stock units, performance-based restricted stock units and stock options. These increases were partially offset by a \$1.1 million decrease in temporary help and consulting services due to consolidation of ongoing projects and contractors becoming full-time employees in 2013.

We intend to continue enhancing the functionality of our software platform as part of our continuous effort to improve our employer client and employee participant experience and to maintain and enhance our control and compliance environment. As a result of our focus on technology development and our acquisition of CONEXIS, we expect our technology and development expenses to increase in dollar amount in future periods. The timing of development and enhancement of projects, including whether they are in phases where costs are capitalized or expensed, could significantly affect our technology and development expense both in dollar amount and as a percentage of revenue.

Sales and Marketing

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
(in thousands)					
Sales and marketing	\$ 30,341	\$ 34,676	\$ 44,940	14%	30%
Percent of revenue	17%	16%	17%		

The \$10.3 million increase in sales and marketing expense from 2013 to 2014 was primarily due to the inclusion of post-purchase expense of \$5.3 million for CONEXIS as well as an increase in salaries and personnel-related costs of \$2.4 million due to hiring sales and marketing personnel to implement various new sales and marketing programs and to a lesser extent a full year of costs related to the CBS portfolio purchase, which was acquired in May 2013. Sales and marketing expenses were further driven by an increase in stock-based compensation expense of \$1.4 million due to new grants of stock options and performance-based restricted stock units. Sales and marketing expense was also driven by an increase of \$0.5 million in ongoing promotional marketing initiatives. Outside sales commissions driven by increased sales volumes through our broker relationships and travel and entertainment increased sales and marketing expense by \$0.4 million.

The \$4.3 million increase in sales and marketing expense from 2012 to 2013 was primarily driven by salaries and personnel-related costs of \$2.9 million as a result of increases in headcount from the BCI and CBS portfolio purchases of \$1.2 million, increased hiring of sales and marketing personnel resulting from the ongoing implementation of various new sales and marketing programs of \$1.1 million and increases in commission expense of \$0.6 million. Sales and marketing expenses were further driven by an increase in stock-based compensation expense of \$0.6 million from new grants of restricted stock, performance-based restricted stock units and stock options. Travel and entertainment expense also increased by \$0.4 million during 2013 when compared to 2012.

Sales and marketing expense as a percentage of revenue decreased in 2013 as compared to 2012 by 1%. This decrease was primarily due to our BCI and CBS acquisitions having lower relative sales and marketing expenses as a percentage of revenue.

We intend to continue to invest in sales, client services and marketing by hiring additional direct sales personnel and continuing to build our broker and channel relationships. We also intend to promote our brand through a variety of marketing and public relations activities. As a result, we expect our sales and marketing expenses to increase in absolute dollars and as a percentage of revenue in future periods.

General and Administrative

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
	(in thousands)				
General and administrative	\$ 28,839	\$ 37,637	\$ 42,884	31%	14%
Percent of revenue	16%	17%	16%		

Table of Contents

The \$5.2 million increase in general and administrative expenses from 2013 to 2014 was primarily driven by the inclusion of post-purchase expense of \$2.8 million for CONEXIS and \$2.3 million in stock-based compensation expense, primarily due to new grants of stock options, restricted stock units and performance-based restricted stock units.

The \$8.8 million increase in general and administration expense from 2012 to 2013 was primarily driven by an increase of \$3.7 million in stock-based compensation expense, primarily due to additional expense from new grants of restricted stock units, performance-based restricted stock units and stock options, as well as adjustments to the vesting terms of performance based stock options as the probability of achieving the performance criteria for early vesting were deemed probable of being met. General and administrative expenses were further driven by salaries and personnel-related costs of \$2.3 million due to an increase in headcount as we continue to expand our operations and from the BCI and CBS portfolio purchases, as well as an increase of \$1.4 million in professional fees, as a result of increased legal fees incurred as part of our follow-on public offering, required Securities and Exchange Commission filings and acquisitions. Professional fees were further driven by fees incurred as part of our efforts to enhance our control environment to meet compliance rules with Section 404 of the Sarbanes-Oxley Act. In fiscal 2012, we also benefited from a \$0.4 million bad debt reserve release, which compares favorably to fiscal 2013. General and administrative expenses also increased by \$0.5 million driven by increased allocation of facilities costs to general and administrative departments as a result of increased headcount, when compared to the same period a year ago and the inclusion of approximately \$0.2 million in other post-purchase expenses for BCI and CBS.

As we continue to grow, we expect our general and administrative expenses to increase in dollar amount as we expand general and administrative headcount to support our continued growth and due to the increased expenses associated with being a public company.

Amortization and Change in Contingent Consideration

	Year Ended December 31,			Change from prior year	
	2012	2013	2014	2013	2014
	(in thousands)				
Amortization and change in contingent consideration	\$ 15,674	\$ 11,612	\$ 20,992	-26%	81%

Our amortization and change in contingent consideration consists of three components: amortization of internal use software, amortization of acquired intangibles and change in contingent consideration. We capitalize our software development costs related to the development and enhancement of our business solution. When the technology is available for its intended use, the capitalized costs are amortized over the technology's estimated useful life, which is

generally four years. Acquired intangibles are also amortized over their estimated useful lives.

The \$9.4 million increase in the amortization and change in contingent consideration line item from 2013 to 2014 was driven by a re-measurement of the contingent consideration related to BCI, which took place in the third quarter of 2013, as the timing of anticipated partnerships and employer clients were deferred until later in 2014 and into 2015, which reduced the forecasted BCI revenues used in the determination of the contingent consideration. Due to the re-measurement, a \$6.0 million gain was recognized in 2013 while no such gains were recognized during 2014. The remaining increase is due primarily to additional amortization expense from acquired intangible assets related to the CONEXIS acquisition and additional amortization of capitalized software development costs.

The \$4.1 million decrease in amortization and change in contingent consideration from 2012 to 2013 was driven by a gain of \$6.0 million related to the re-measurement of the contingent consideration related to BCI, as the timing of anticipated partnerships and certain new employer clients were deferred until later in 2014 and into 2015, as such the forecasted revenue increase in 2014 and 2015 was adjusted downward. The gain related to BCI is partially offset by additional amortization expense from acquired intangible assets, including the BCI portfolio purchase, the Aflac channel partnership arrangement and additional amortization of capitalized software development costs.

Other Income (Expense)

Year Ended December 31,

2012 2013 2014

(in thousands)

Interest income	\$ 36	\$ 17	\$ 5
Interest expense	(1,772)	(1,339)	(1,612)
Other income	48	248	743

Table of Contents

The increase in the other income line item from 2013 to 2014 is due to a gain related to the settlement of a dispute with a third party.

The decrease in interest expense from 2012 to 2013 was due to the repayment of outstanding debt borrowed under our credit facility with Union Bank, N.A. in 2013.

Income Taxes

	Year Ended December 31,		
	2012	2013	2014
	(in thousands)		
Income taxes provision	\$ (7,126)	\$ (9,203)	\$ (11,943)

The change from 2013 to 2014 was primarily the result of an increase in federal income taxes driven by an increase in the overall tax rate for 2014 when compared to 2013. The overall tax rate in 2013 had a reduction as compared to 2014, due to permanent tax items related to non-deductible changes in the fair value of our contingent consideration.

The change from 2012 to 2013 was primarily the result of an increase in federal income taxes, driven by higher taxable income year over year, partially offset by a reduction in overall tax rate due to permanent tax items primarily related to non-deductible changes in the fair value of contingent consideration.

Liquidity and Capital Resources

At December 31, 2014, our principal sources of liquidity were cash and cash equivalents totaling \$413.3 million comprised primarily of prefunds by clients of amounts to be paid on behalf of employee participants as well as, in recent years, other cash flows from operating activities.

We believe that our existing cash and cash equivalents and expected cash flow from operations will be sufficient to meet our operating and capital requirements, as well as anticipated cash requirements for potential future portfolio purchases, over at least the next 12 months. We have historically been able to fulfill our obligations as incurred and expect to continue to fulfill our obligations in the future. Our expectation is based on our current and anticipated client retention rates and our continuing funding model in which the vast majority of our enterprise clients provide us with prefunds as more fully described below under “—Prefunds.”

Prefunds

Under our contracts with the vast majority of our enterprise employer clients, we receive prefunds that have been and are expected to continue to be a significant source of cash flows from operating activities. Each prefund is reflected in cash and cash equivalents on our balance sheet with an equivalent customer obligation recorded as a liability as the prefund is received. Changes in these prefunds and corresponding customer obligations are reflected in our cash flows from operating activities. The substantial majority of our SMB employer clients deposit funds into a separate custodial account, and those funds are neither a source of cash flows from operating activities nor reflected on our balance sheet. These SMB employer clients are responsible for maintaining an adequate balance in those custodial accounts to cover their employee participants' claims. We only pay SMB employee participant claims from amounts in the custodial accounts.

The operation of these prefunds for our enterprise employer clients throughout the year typically is as follows: at the beginning of a plan year, these employer clients provide us with prefunds for their FSA and HRA programs based on a percentage of projected spending by the employee participants for the plan year. In the case of our commuter program, at the beginning of each month we receive prefunds based on the employee participants' monthly elections. These prefunds are typically replenished on a weekly basis by our FSA and HRA employer clients and on a monthly basis by our commuter employer clients, in each case, after we have advanced the funds necessary to process employee participants' FSA and HRA claims as they are submitted to us and to pay vendors relating to our commuter programs. As a result, our cash balances can vary significantly depending upon the timing of invoicing of, and payment by, our employer clients of reimbursement for payments we have made on behalf of employee participants. This prefunding activity covers our estimate of approximately one week of spending on behalf of the employer client's employee participants. We do not require a prefund to administer any of our HSA programs because employee participants in these programs only have access to funds they have previously contributed.

By way of example, a new FSA enterprise employer client with a plan year starting January 1 will provide the projected annual election for its employee participants as a prefund in late December. Once the new plan year starts, the employee participants can immediately access all elected funds of their FSA benefit even before any payroll deductions have commenced. This access to funds differs from our HSA programs where available funds are added to employee participants' accounts only as payroll deductions occur and HRA programs where funds are only available as contributions are made.

Table of Contents

Following the run-out period and grace period, the FSA prefunds from the prior plan year are reconciled and funds are returned to the employer clients, resulting in a substantial decline in our cash position. If an employer has adopted the new carryover option instead of the grace period rule for their plan year, then any unused funds, of up to \$500 per participant, will be carried over into the new plan year rather than returned to the employer client. The cycle then repeats itself in each plan year as participants enroll in programs and prefunds are received in the fourth quarter for the new plan year. In a majority of cases, new FSA prefunds for the succeeding plan year are received prior to a plan year's prefund being fully paid out in the form of benefits for employee participants or being returned to the employer client. Because participant activity in our commuter programs varies monthly, prefunds for these programs fluctuate monthly.

Our enterprise client contracts do not contain restrictions on our use of enterprise client prefunds and, as a result, these prefunds are reflected as cash and cash equivalents on our balance sheet and changes in prefunds are recorded as an element of our cash flow from operating activities. The timing of when employer clients make their prefunds as well as the timing of when we make payments on behalf of employee participants can significantly affect our cash flows.

Union Bank Credit Facility

Debt consists of borrowings under a Credit Agreement, or Revolver, with MUFG Union Bank, N.A. (formerly Union Bank, N.A.), or UB, under which we can borrow an aggregate principal amount of up to \$125.0 million, with a \$15.0 million subfacility for the issuance of letters of credit. At December 31, 2014, we had \$79.6 million principal amount outstanding under the Revolver. The debt under the Revolver is scheduled to mature on July 21, 2017.

Each loan under the Revolver bears interest at a fluctuating rate per annum equal to a prime rate determined in accordance with the terms of the Revolver, plus a spread of 0.00% to 0.25%, or at our option, a LIBOR rate determined in accordance with the Revolver, plus a spread of 1.75% to 2.25%.

As collateral for the Revolver, we granted UB a security interest in substantially all of our assets. All of our material existing and future subsidiaries are required to guaranty our obligations under the Revolver. Such guarantees by existing and future material subsidiaries are and will be secured by substantially all of the property of such material subsidiaries.

The Revolver contains customary affirmative and negative covenants and also has financial covenants relating to a liquidity ratio, a consolidated leverage ratio, a debt service coverage ratio and a minimum consolidated net worth covenant. We are obligated to pay customary commitment fees and letter of credit fees for a facility of this size and type. We are currently in compliance with all financial and non-financial covenants under the Revolver.

The Revolver contains customary events of default, including, among others, payment defaults, covenant defaults, inaccuracy of representations and warranties, cross-defaults to other material indebtedness, judgment defaults, a change of control default and bankruptcy and insolvency defaults. Under certain circumstances, a default interest rate will apply on all obligations during the existence of an event of default under the loan agreement at a per annum rate of interest equal to 2.00% above the applicable interest rate. Upon an event of default, the lenders may terminate the commitments, declare the outstanding obligations payable by us to be immediately due and payable and exercise other rights and remedies provided for under the Revolver.

Cash Flows

The following table presents information regarding our financial position including cash and cash equivalents as of December 31, 2013 and 2014:

	December 31,	
	2013	2014
	(in thousands)	
Cash and cash equivalents, end of period	\$ 359,958	\$ 413,301

The following table presents information regarding our cash flows for the years ended December 2012, 2013 and 2014:

Table of Contents

Year Ended December 31,

	2012	2013	2014
--	------	------	------

(in thousands)

Net cash provided by operating activities	\$ 56,133	\$ 61,705	\$ 54,423
Net cash used in investing activities	(7,554)	(27,555)	(65,535)
Net cash provided by financing activities	102,593	20,015	64,455

Cash Flows from Operating Activities

Year Ended December 31,

	2012	2013	2014
--	------	------	------

(in thousands)

Net cash provided by operating activities	\$ 56,133	\$ 61,705	\$ 54,423
-------------------------------------------	-----------	-----------	-----------

Net cash provided by operating activities decreased in 2014 when compared to 2013 by \$7.3 million, primarily due to an increase in accounts receivable in 2014 when compared to 2013, primarily from the timing and receipt of billing for funds owed by employer clients as well as the timing of our billing and employer client payments of prefunds in our customer obligations account when compared to a year ago.

Net cash provided by operating activities increased in 2013 when compared to 2012, driven by an increase in net income of \$11.2 million in 2013 compared to 2012, and an increase in cash inflow of \$2.7 million from customer obligations primarily due to the timing of our billing and increase in employer client payments of prefunds for 2014. Cash provided by operating activities were further impacted a by \$3.4 million payment of contingent consideration in excess of the initial measurement reflected in operating activities in 2012 while only a \$0.6 million payment related to contingent consideration in excess of the initial measurement was reflected in operating activities in 2013. These increases were partially offset by an increase in accounts receivable in 2013 when compared to 2012, primarily from the timing and receipt of billing for funds owed by employer clients that had a \$2.9 million impact on operating cash.

Net cash provided by operating activities in 2012 resulted primarily from our net income of \$10.5 million being adjusted for the following non-cash items: depreciation, amortization and change in contingent consideration aggregating \$18.6 million, deferred taxes of \$6.7 million and stock-based compensation of \$3.8 million. Cash from operating activities increased by \$23.7 million for customer obligations primarily due to the increase in prefunds and

the timing of our billings and employer client payments. Operating cash flow was further increased by changes in accounts payable and accrued expenses of \$5.1 million primarily from an increase in transit agency payables as a result of the TC acquisition. These cash flows were offset in part by increases in accounts receivable balance of approximately \$5.5 million due to the timing of collections and overall increases from the various 2012 acquisitions, \$3.4 million in charges to the statement of operations for changes in the value of contingent consideration in excess of the initial measurement and \$2.7 million due to net changes in prepaid expenses and other current assets driven by offering costs related to our initial public offering and follow-on offering.

Cash Flows from Investing Activities

	Year Ended December 31,		
	2012	2013	2014
	(in thousands)		
Net cash used in investing activities	\$ (7,554)	\$ (27,555)	\$ (65,535)

Table of Contents

Net cash used in investing activities increased in 2014 compared to 2013, primarily due to cash used in the acquisition of CONEXIS of \$44.3 million, net of cash received, during the third quarter of 2014, partially offset by a payment of \$15.0 million during the third quarter of 2013, in connection with an advanced payment made to Ceridian for the employer clients that are expected to transition to us, while no such payment was made during 2014. Cash used in investing activities was further increased by capitalized internal use software for various new software projects when compared to 2013, as well as an increase in purchased equipment.

Net cash used in investing activities increased in 2013 compared to 2012, primarily due to a payment of \$15.0 million during the third quarter of 2013, in connection with an advanced payment made to Ceridian for the employer clients that are expected to transition to WageWorks, while no such payments was made in 2012. Cash used in investing activities were further impacted by cash received in the acquisition of TransitChek during 2012, which had a positive net cash inflow in investing activities of \$8.9 million for 2012, while the acquisition of Crosby Benefit Systems, Inc., during 2013 had a negative cash outflow of \$0.8 million, causing a negative year-over-year impact of \$9.7 million. These increases in cash used in investing activities were partially offset by the impact of cash paid for the Aflac channel partner arrangement in the amount of \$6.0 million during 2012, while cash paid for the Aflac and Ceridian channel partner arrangement in 2013 was only \$1.6 million, causing a positive year-over-year impact of \$4.4 million.

Net cash used in investing activities in 2012 was primarily the result of \$12.3 million of capitalized internal use software and purchased equipment, which was largely related to further upgrades to our product platform. In connection with the Aflac channel partner arrangement, we also paid Aflac \$6.0 million for the employer clients that have transitioned to us. These outflows were partially offset by cash acquired in connection with our CS and BCI portfolio purchases as well as the TC acquisition exceeding the cash payments made for these acquisitions.

Cash Flows from Financing Activities

Year Ended December 31,

2012 2013 2014

(in thousands)

Net cash provided by financing activities	\$ 102,593	\$ 20,015	\$ 64,455
-------------------------------------------	------------	-----------	-----------

Net cash provided by financing activities increased in 2014 compared to 2013, primarily due to cash received from borrowing on our line of credit with UB, to partially fund the acquisition of CONEXIS. Cash provided by financing activities was further increased by a \$15.0 million repayment of debt in the third quarter of 2013 under our line of credit with UB while no such payment was made in 2014. These increases were partially offset by cash received from our follow-on offering that took place in the first quarter of 2013 of \$11.6 million, while no proceeds for follow-on offerings were received in 2014 as well as decreases in proceeds received from the exercise of stock options and issuance of stock under our employee stock purchase plan totaling in 2014.

Net cash provided by financing activities decreased in 2013 compared to 2012, primarily due to cash received from our initial public offering and drawdowns under the Revolver with UB during 2012 totaling \$92.0 million while we did not have these transactions during 2013. Cash provided by financing activities were further decreased by a \$15.0 million repayment of debt in 2013 under our Revolver with Union Bank. These decreases were partially offset by increases in proceeds received from the exercise of stock options and issuance of stock under our employee stock purchase plan totaling \$12.6 million. The decreases in cash provided by financing activities were further offset by payments of contingent consideration made during 2012 totaling \$14.7 million while payments of contingent consideration made during 2013 only totaled \$6.6 million.

Net cash provided by financing activities in 2012 was due to \$62.6 million and \$16.5 million received in connection with our initial public offering and follow-on offering, respectively, as well as \$29.5 million in draw downs on our credit facility to fund payments for our TC acquisition and CS portfolio purchase that took place in the first quarter of 2012. Financing inflows were further increased by \$7.0 million from cash received from the exercise of warrants, exercise of stock options and the issuance of common stock related to our employee stock purchase plan, partially offset by contingent consideration payments of \$14.7 million related to PBS, CS, TC and FBM transactions.

Recently Issued Accounting Pronouncements

See Note 1 of our accompanying consolidated financial statements for a full description of recent accounting pronouncements and our expectation of their impact, if any, on our results of operations and financial condition.

Contractual Obligations

The following table describes our contractual obligations as of December 31, 2014:

Table of Contents

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt obligations (1)	\$ 79,600	\$ —	\$ 79,600	\$ —	\$ —
Interest on long-term debt obligations (2)	5,244	2,030	3,214	—	—
Lease obligations (3)	41,263	9,493	9,965	9,609	12,196
Acquisition payments (4)	4,610	3,660	950	—	—
CONEXIS holdback obligation (5)	10,000	10,000	—	—	—
Total	\$ 140,717	\$ 25,183	\$ 93,729	\$ 9,609	\$ 12,196

- (1) Credit facility: as of December 31, 2014 is \$125.0 million with a variable interest rate of base rate plus a spread of 0.00% to 0.25% per annum or LIBOR plus a spread of 1.75% to 2.25% per annum, and a maturity date of July 21, 2017. At December 31, 2014, we had \$79.6 million of outstanding principal which is recorded net of debt issuance costs on our balance sheet. The debt issuance costs are not included in the table above.
- (2) Estimated interest payments assume the interest rate applicable as of December 31, 2014 of 2.58% per annum on a \$79.6 million principal amount.
- (3) We lease facilities under non-cancelable operating leases expiring at various dates through 2023 and equipment under non-cancelable capital leases expiring at various dates through 2016.
- (4) Estimated undiscounted contingent consideration for companies acquired in 2012 and 2013.
- (5) Expected payment of holdback amount related to the CONEXIS acquisition, expected to be paid on August 1, 2015.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the risk of loss that may affect our financial position due to adverse changes in financial market prices and rates. We are exposed to market risks related to changes in interest rates.

As of December 31, 2014, we had cash and cash equivalents of \$413.3 million. These amounts consist of cash on deposit with banks and money market funds. The cash and cash equivalents are held for working capital purposes. We do not enter into investments for trading or speculative purposes. Due to the short-term nature of these investments, we do not believe that changes in interest rates would have a material impact on our financial position and results of operations. However, declines in interest rates and cash balances will reduce future investment income.

The primary objective of our investment activities is to preserve principal while maximizing yields without significantly increasing risk. This objective is accomplished by making diversified investments, consisting only of investment grade securities. The decrease in interest income from the effect of a hypothetical decrease in short-term interest rates of 10% would not have a material impact on our net income and cash flows.

Our exposure to market risk also relates to the increase or decrease in the amount of interest expense we must pay on our outstanding debt instruments. As of December 31, 2014, we had outstanding principal of \$79.6 million under our credit facility. Each loan under the credit facility bears interest at a fluctuating rate per annum equal to a prime rate

determined in accordance with the credit agreement, plus a spread of 0.00% to 0.25%, or at our option, a LIBOR rate determined in accordance with the credit agreement, plus a spread of 1.75% to 2.25%, as of December 31, 2014. The increase in interest expense from the effect of a hypothetical change in interest rates of 1% would not have a material impact on our net income and cash flows.

WageWorks, Inc.:

We have audited the accompanying consolidated balance sheets of WageWorks, Inc. and subsidiaries (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of income, stockholders' equity (deficit), and cash flows for each of the years in the three year period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of WageWorks, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), WageWorks, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

WageWorks Inc.:

We have audited WageWorks, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). WageWorks, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, WageWorks, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

The Company acquired CONEXIS Benefits Administrators, LP on August 1, 2014, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2014, CONEXIS Benefits Administrators, LP's internal control over financial reporting which represented 11% and 25%, respectively, of total revenues and total assets of the related consolidated financial statement amounts of the Company as of and for the year ended December 31, 2014. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of CONEXIS Benefits Administrators, LP.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of WageWorks, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of income, stockholders' equity (deficit), and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated February 26, 2015 expressed an unqualified opinion on those consolidated financial statements.

Notes to Consolidated Financial Statements

(1) Summary of Business and Significant Accounting Policies

Business

WageWorks, Inc., or the Company, is a leader in administering Consumer-Directed Benefits, or CDBs, which empower employees to save money on taxes while also providing corporate tax advantages for employers. The Company is solely dedicated to administering CDBs, including pre-tax spending accounts such as health and dependent care Flexible Spending Accounts, or FSAs, Health Savings Accounts, or HSAs, Health Reimbursement Arrangements, or HRAs, as well as commuter benefit services, including transit and parking programs, wellness programs and other employee spending account benefits, in the United States.

The Company delivers its CDB programs through a highly scalable delivery model that employer clients and their employee participants may access through a standard web browser on any internet-enabled device, including computers, smart phones and other mobile devices such as tablet computers. The Company's on-demand delivery model eliminates the need for its employer clients to install and maintain hardware and software in order to support CDB programs and enables the Company to rapidly implement product enhancements across the Company's entire user base.

The Company's CDB programs assist employees and their families in saving money by using pre-tax dollars to pay for certain of their healthcare, dependent care and commuter expenses. Employers financially benefit from the Company's programs through reduced payroll taxes, even after factoring in the Company's fees. Under the Company's FSA, HSA and commuter programs, employee participants contribute funds from their pre-tax income to pay for qualified out-of-pocket healthcare expenses not fully covered by insurance, such as co-pays, deductibles and over-the-counter medical products or for commuting costs. Under the Company's HRA programs, employer clients provide their employee participants with a specified amount of available reimbursement funds to help their employee participants defray out-of-pocket medical expenses such as deductibles, co-insurance and co-payments. All amounts paid by the employer into HRAs are deductible by the employer as an ordinary business expense and are tax-free to the employee.

The Company operates as a single reportable segment on an entity level basis. The Company generates revenue from the administration of healthcare, commuter, COBRA and other employer sponsored tax-advantaged benefit services. The entity level is the aggregation of these four revenue streams.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. Acquisitions of businesses are accounted for as business combinations, and accordingly, the results of operations of acquired businesses are included in the consolidated financial statements from the date of acquisition. All significant intercompany accounts and transactions have been eliminated in consolidation.

Reclassification

Prior period amounts related to our COBRA revenue within our consolidated income statement have been reclassified to conform to current period presentation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Significant estimates in these consolidated financial statements include allowances for doubtful accounts, estimates of future cash flows associated with assets, asset impairments, useful lives for depreciation and amortization, loss contingencies, expired and unredeemed products, deferred tax assets, reserve for income tax uncertainties, the assumptions used for stock-based compensation, the assumptions used for software and web site development cost classification, and the assumptions used to fair value contingent consideration associated with acquisitions and purchase accounting. Actual results could differ from those estimates. In making its estimates, the Company considers the current economic and legislative environment in the estimates and has considered those factors when reviewing the assumptions and estimates.

Cash, Cash Equivalents, and Restricted Cash

The Company considers all highly liquid investments with an original maturity of 90 days or less to be cash equivalents. Cash and cash equivalents, which consist of cash on deposit with banks and money market funds, are stated at cost. To the extent the Company's contracts do not provide for any restrictions on the Company's use of cash that it receives from clients the cash is recorded as cash and cash equivalents.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

In all cases, the Company recognizes a related liability to its customers, classified as customer obligations in the accompanying consolidated balance sheets.

Restricted cash represents cash used to collateralize standby letters of credit.

Fair Value of Financial Instruments

Financial Accounting Standards Board (FASB) ASC 820, Fair Value Measurements and Disclosures, or ASC 820, provides a consistent framework to define, measure, and disclose the fair value of assets and liabilities in financial statements. ASC 820 establishes a three-level hierarchy priority for disclosure of assets and liabilities recorded at fair value. The ordering of priority reflects the degree to which objective prices in external active markets are available to measure fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable.

The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The Company determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date.
- Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

The contingent consideration payable related to the Benefit Concepts, Inc. (BCI) and Crosby Benefit Systems, Inc. (CBS) acquisitions were recorded at fair value on the acquisition date and are adjusted quarterly to fair value. The increases or decreases in the fair value of contingent consideration payable can result from changes in anticipated revenue levels and changes in assumed discount periods and rates. As the fair value measure is based on significant inputs that are not observable in the market, they are categorized as Level 3.

Other financial instruments not measured at fair value on the Company's consolidated balance sheet at December 31, 2014, but which require disclosure of their fair values include: cash and cash equivalents (including restricted cash), accounts receivable, accounts payable and accrued expenses and debt under the line of credit with Union Bank, N.A. The estimated fair value of such instruments at December 31, 2014 approximates their carrying value as reported on the consolidated balance sheet. The fair value of all of these instruments are categorized as Level 2 of the fair value hierarchy, with the exception of cash, which is categorized as Level 1 due to its short term nature.

The following table provides a reconciliation between the beginning and ending balances of items measured at fair value on a recurring basis that used significant unobservable inputs (Level 3) (dollars in thousands):

	Contingent Consideration BCI	Contingent Consideration CBS
Balances at December 31, 2013	5,801	2,266
Gains or losses included in earnings:		
Losses on revaluation of contingent consideration	212	81
Payment of contingent consideration	(3,308)	(1,177)
Balances at December 31, 2014	\$ 2,705	\$ 1,170

The Company measures contingent consideration elements each reporting period at fair value and recognizes changes in fair value in earnings each period in the amortization and change in contingent consideration line item on the consolidated statements of income, until the contingency is resolved.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

The Company recorded a net gain of \$5.4 million for changes in the fair value of contingent considerations during 2013, which was primarily driven by a gain of \$5.9 million related to the BCI contingent consideration, as the timing of anticipated partnerships and certain new employer clients were deferred until later in 2014 and into 2015, as such the forecasted revenue increase in 2014 and 2015 was adjusted downward and a gain of \$0.3 million related to FBM. These gains were partially offset by charges related to the change in fair value of the contingent consideration for CS of \$0.8 million due to increased revenue levels estimated to be achieved, as well as charges related to the change in fair value of the contingent consideration for CBS of \$0.1 million as a result of the passage of time. The net gain was recorded in the amortization and change in contingent consideration line item in the Company's accompanying consolidated statements of income.

The Company recorded a \$0.3 million charge related to the change in fair value of the contingent considerations for BCI and CBS during 2014, as a result of accretion charges due to the passage of time.

Quantitative Information About Level 3 Fair Value Measurements

The significant unobservable inputs used in the fair value measurement of the Company's contingent consideration designated as Level 3 are as follows:

	Fair Value at December 31, 2014 (in thousands)	Valuation Technique	Significant Unobservable Input
Contingent consideration - BCI	\$2,705	Discounted cash flow	Annualized revenue and probability of achievement
Contingent consideration - CBS	\$1,170	Discounted cash flow	Annualized revenue and probability of achievement

Sensitivity To Changes In Significant Unobservable Inputs

As presented in the table above, the significant unobservable inputs used in the fair value measurement of contingent consideration related to the acquisitions are annualized revenue forecasts developed by the Company's management and the probability of achievement of those revenue forecasts. Significant increases (decreases) in these unobservable inputs in isolation would result in a significantly lower (higher) fair value measurement.

Accounts Receivable

Accounts receivable represent both amounts receivable in relation to fees for the Company's services and unpaid amounts by customers for benefit services of participants provided by third-party vendors, such as transit agencies and healthcare providers. The Company provides for an allowance for doubtful accounts by reference to reserves for specific accounts. The Company reviews its allowance for doubtful accounts monthly. Accounts more than 30 days past due are reviewed weekly for collectability. Account balances are written off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. Write-offs for 2012, 2013 and 2014 were not significant.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation on computer and equipment and furniture and fixtures is calculated on a straight-line basis over the estimated useful lives of those assets, ranging from three to five years. Leasehold improvements are amortized on a straight-line basis over the shorter of their estimated useful life or the lease term.

When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from their respective accounts, and any gain or loss on such sale or disposal is reflected in operating expenses.

Maintenance and repairs are expensed as incurred. Expenditures that substantially increase an asset's useful life are capitalized.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

Software and Web Site Development Costs

The Company recognizes internal use software and Website development costs in accordance with FASB ASC Subtopic 350-40, Intangibles — Goodwill and Other — Internal-Use Software, and FASB ASC Subtopic 350-50, Intangibles — Goodwill and Other — Website Development Costs, respectively. As such, the Company expenses all costs incurred that relate to the planning and post implementation phases of development. Costs incurred in the development phase are capitalized and recognized over the technology's estimated useful life, generally four years, as amortization in the accompanying consolidated statements of income. Costs associated with the platform content or the repair or maintenance of the existing platforms is expensed as incurred.

The Company accounts for interest costs related to internal use software and Website development costs in accordance with the provisions of FASB ASC Subtopic 835-20, Interest—Capitalization of Interest, which require capitalization of interest on major construction or acquisition projects where the financial statement effect of capitalization versus current expense recognition is likely to be material. Capitalized interest related to software and development costs was immaterial for all years.

Accounting for Impairment of Long-Lived Assets

In accordance with FASB ASC Subtopic 360-10, Property, Plant and Equipment, the Company evaluates the recoverability of property and equipment and other assets, including identifiable intangible assets with definite lives, whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets held and used is measured by comparison of the carrying amount of an asset or an asset group to estimated undiscounted future net cash flows expected to be generated by the asset or asset group. If the carrying amount of an asset exceeds these estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the assets exceeds the fair value of the asset or asset group, based on discounted cash flows. Assets to be disposed of are reported at the lower of their carrying amount or fair value less cost to sell. Impairment adjustments related to software development costs were not significant for 2012, 2013 or 2014. There were no other significant impairments recorded for the remaining other long-lived assets for 2012, 2013 or 2014.

Acquisitions and Goodwill

The Company has accounted for all of its acquisitions using the purchase method as required under the provisions of FASB ASC 805, Business Combinations, or ASC 805. The cost of acquisition is allocated to the assets acquired and liabilities assumed based on fair values at the date of acquisition. Goodwill represents the excess cost over the fair value of net assets acquired in the acquisition.

The Company performs a goodwill impairment test annually on December 31st and more frequently if events and circumstances indicate that the asset might be impaired. The impairment tests are performed in accordance with FASB ASC 350, Intangibles—Goodwill and Other, or ASC 350. The following are examples of triggering events (none of which occurred in 2012 or 2013) that could indicate that the fair value of a reporting unit has fallen below the unit's carrying amount:

A significant adverse change in legal factors or in the business climate

- An adverse action or assessment by a regulator
- Unanticipated competition
- A loss of key personnel
- A more-likely than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of

An impairment loss is recognized to the extent that the carrying amount exceeds the reporting unit's fair value. When reviewing goodwill for impairment, the Company assesses whether goodwill should be allocated to operating levels lower than the Company's single operating segment for which discrete financial information is available and reviewed for decision-making purposes. These lower levels are referred to as reporting units. The Company's chief operating decision maker, the Chief Executive Officer, does not allocate resources or assess performance at the individual healthcare, commuter, COBRA or other revenue stream level, but rather at the operating segment level. Discrete financial information is therefore not maintained at the revenue stream level. The Company's one reporting unit was determined to be the Company's one operating segment.

The goodwill impairment analysis is a two-step process: first, the reporting unit's estimated fair value is compared to its carrying value, including goodwill. If the Company determines that the estimated fair value of the reporting unit is less than its carrying value, the Company moves to the second step to determine the implied fair value of the reporting unit's goodwill. If the carrying amount of the reporting unit's goodwill exceeds its implied fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of the reporting unit in a manner similar to a purchase price allocation.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

ASC 350 reduces the complexity and costs of goodwill impairment testing by allowing an entity the option to first make a qualitative evaluation about the likelihood of goodwill impairment. If impairment is deemed more likely than not, management would perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. In assessing the qualitative factors, the Company assesses relevant events and circumstances that may impact the fair value and the carrying amount of the reporting unit. The identification of relevant events and circumstances and how these may impact a reporting unit's fair value or carrying amount involve significant judgments and assumptions. The judgment and assumptions include the identification of macroeconomic conditions, industry and market considerations, overall financial performance, Company specific events and share price trends and making the assessment on whether each relevant factor will impact the impairment test positively or negatively and the magnitude of any such impact. At December 31, 2014, we completed our annual goodwill impairment assessment and management concluded that goodwill is not impaired and the two-step goodwill impairment test was not deemed necessary.

To date, the Company has not made any impairment adjustments to goodwill as the fair value of its reporting unit determined as the market capitalization of the Company on the testing date in all prior years has always exceeded its carrying value by a significant amount.

Income Taxes

The Company reports income taxes in accordance with FASB ASC 740, Income Taxes, which requires an asset and liability approach in accounting for income taxes. Deferred tax assets and liabilities arise from the differences between the tax basis of an asset or liability and its reported amount in the consolidated financial statements, as well as from net operating loss and tax credit carryforwards. Deferred tax amounts are determined by using the tax rates expected to be in effect when the taxes will actually be paid or refunds received, as provided under current enacted tax law. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance reduces the deferred tax assets to the amount that is more likely than not to be realized.

The Company uses financial projections to support its net deferred tax assets, which contain significant assumptions and estimates of future operations. If such assumptions were to differ significantly, it may have a material impact on the Company's ability to realize its deferred tax assets. At the end of each period, the Company assesses the ability to realize the deferred tax benefits. If it is more likely than not that the Company would not realize the deferred tax benefits, then the Company would establish a valuation allowance for all or a portion of the deferred tax benefits.

Under ASC Subtopic 740-10, the Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained on examination by the taxing authorities, based on the technical merits of the position. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

The Company records interest and penalties related to uncertain tax positions in income tax expense.

Revenue Recognition

The Company reports revenue based on the following product lines: Healthcare, Commuter, COBRA and Other services. Healthcare and Commuter include revenues generated from benefit service fees based on employee participant participation levels and interchange and other commission revenues. Interchange and other commission revenues are based on a percentage of total healthcare and commuter dollars transacted pursuant to written purchase agreements with certain vendors and banks. COBRA revenue is generated from the administration of continuation of coverage services for participants who are no longer eligible for their employer's health benefits, such as medical, dental, vision and for the continued administration of employee participants' HRAs and certain healthcare FSAs. Other revenue includes services related to enrollment and eligibility, non-healthcare, and employee account administration (i.e., tuition and health club reimbursements) and project-related professional services.

The Company recognizes all revenue streams in accordance with FASB ASC 605, Revenue Recognition. As such, the Company recognizes revenue when collectability is reasonably assured, service has been performed, persuasive evidence of an arrangement exists, and there is a fixed or determinable fee.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

Benefit service fees are recognized on a monthly basis as services are rendered and earned under service arrangements where fees and commissions are fixed or determinable and collectability is reasonably assured. Benefit service fees are based on a fee for service model (e.g., monthly fee per participant) in which revenue is recognized on a monthly basis as services are rendered under price quotations or service agreements having stipulated terms and conditions, which do not require management to make any significant judgments or assumptions regarding any potential uncertainties. Fees received for initial setup of new clients and annual renewal fees are deferred and recognized on a monthly basis as services are rendered over the agreed benefit period. Contracts where initial setup fees are charged have an initial term of one year. The agreed benefit period means the length of the benefit plan year, which is one year. The initial setup fees are not considered separable from the ongoing services provided for which benefit service fees are earned.

Vendor and bank interchange revenues are attributed to revenue sharing arrangements the Company enters into with certain banks and card associations, whereby the Company shares a portion of the transaction fees earned by these financial institutions on debit cards the Company issues to its employee participants based on a percentage of total dollars transacted as reported on third-party reports. Commission revenue entails the Company purchasing passes on behalf of its employee participants from various transit agencies and due to the significant volume of purchases, the Company receives commissions on these passes which the Company records on a net basis. Commission revenue is recognized on a monthly basis as transactions are placed under written purchase agreements having stipulated terms and conditions, which do not require management to make any significant judgments or assumptions regarding any potential uncertainties. In addition, the Company recognizes revenue on its estimate of passes that will expire unused over the estimated useful life of the passes, as the amounts paid for these passes are nonrefundable to both the employer client and the employee participant.

Professional service fees are related to projects provided to the Company's existing employer clients that last up to two months to accommodate their changing reporting and file transfer requirements and recognized upon completion of services and projects. These projects are discrete contracts and are not entered into contemporaneously with any other services the Company provides. The professional services are rendered with written price quotations or service agreements having stipulated terms and conditions, which do not require management to make any significant judgments or assumptions regarding any potential uncertainties and where fees are fixed or determinable and collectability is reasonably assured.

Stock-Based Compensation

The Company accounts for stock-based compensation costs in accordance with FASB ASC 718, Compensation—Stock Compensation, or ASC 718. Under ASC 718, stock-based compensation cost is measured at the grant date, based on the estimated fair value of the award at that date, and is recognized as expense over the employee's requisite service period (generally over the vesting period of the award) on a straight-line basis.

ASC 718 requires the benefits of tax deductions in excess of the compensation cost recognized for those options to be classified as financing cash inflows rather than operating cash inflows. There was approximately \$1.9 million, \$12.3 million and \$10.4 million of excess tax benefits in the years ended December 31, 2012, 2013 and 2014, respectively.

Recently Issued Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board, or FASB, issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, or ASU 2014-09, which clarifies existing accounting literature relating to how and when a company recognizes revenue. Under ASU 2014-09, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services. Additionally, the guidance requires improved disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The new standard allows for either a full retrospective or a modified retrospective transition method and is effective for fiscal years beginning after December 15, 2016, which for the Company is the first quarter of fiscal 2017. Early application is not permitted. The Company is in the process of determining what impact, if any, the adoption of this ASU will have on its consolidated financial statements and related disclosures.

Notes to Consolidated Financial Statements

(2)Net Income Per Share

The following table sets forth the computation of basic and diluted net income per share attributable to common stockholders:

	Year Ended December 31,		
	2012	2013	2014
Numerator (basic and diluted):			
Net income	\$ 10,499	\$ 21,699	\$ 18,242
Less: accretion of redemption premium expense	(2,301)	—	—
Net income attributable to common stockholders for basic EPS	\$ 8,198	\$ 21,699	\$ 18,242
Add back: accretion of redemption premium related to dilutive redeemable preferred stock	(260)	—	—
Net income attributable to common stockholders for diluted EPS	\$ 7,938	\$ 21,699	\$ 18,242
Denominator (basic):			
Weighted average common shares outstanding	18,138	33,626	35,145
Denominator (diluted):			
Weighted average common shares outstanding	18,138	33,626	35,145
Dilutive stock options	1,377	1,651	1,185
Weighted average common shares from stock warrants	403	—	—
Weighted average common shares from preferred stock	4,496	—	—
Diluted weighted average common shares outstanding	24,414	35,277	36,330
Net income per share:			
Basic	\$ 0.45	\$ 0.65	\$ 0.52
Diluted	\$ 0.33	\$ 0.62	\$ 0.50

Diluted net income per share does not include the effect of the following anti-dilutive common equivalent shares (in thousands):

	Year Ended December 31,		
	2012	2013	2014
Stock options outstanding	31	22	1,090
Common shares from convertible preferred stock	2,077	-	-
Total common stock equivalents	2,108	22	1,090

(3)Acquisitions and Channel Partner Arrangements

Crosby Benefit Systems, Inc. Acquisition

On May 1, 2013, the Company acquired Crosby Benefit Systems, Inc., or CBS, a third party administrator of CDBs, such as, flexible spending accounts, health reimbursement arrangements, COBRA continuance services, enrollment and eligibility management and commuter programs, based in Newton, Massachusetts. CBS will continue to operate out of the Newton office as a division of the Company. The Company accounted for the acquisition of CBS as a purchase of a business under ASC 805. This acquisition added new customers and participant relationships and further strengthens the Company's position in the Consumer-Directed Benefits market. The aggregate non-contingent portion of the purchase price was \$5.0 million and was paid in cash on May 1, 2013.

The purchase price also includes a contingent consideration element that requires the Company to pay the former owners of CBS additional amounts in 2014 and 2015 based upon revenue growth rates of CBS for 2014 and 2015, respectively. The fair value of the contingent element is \$1.2 million as of December 31, 2014. The fair value was determined from forecasts developed by management based upon existing business and relationships and projected growth rates. As the fair value measure is based on significant inputs that are not observable in the market, the Company categorizes the inputs as Level 3 inputs under ASC 820.

Notes to Consolidated Financial Statements

Ceridian Channel Partner Arrangement

In July 2013, the Company entered into a channel partner arrangement with Ceridian Corporation, or Ceridian, a global product and services company, pursuant to which the Ceridian's CDB account administration business will be substantially transitioned to the Company between October 2013 and January 2015. In conjunction with the transition, the Company also entered into a separate reseller arrangement with Ceridian.

The final purchase price is calculated as a multiple of the expected annual revenue for each employer client successfully transitioned to the Company. The timing of the transition of revenue to the Company is dependent upon the employer clients executing new agreements with the Company and agreeing to a service conversion, a process whose timing and outcome is ultimately controlled by each employer client. In July 2013, the Company made an initial payment of \$15.0 million to Ceridian, in advance of any employer clients transitioning over to the Company, which is anticipated to cover a substantial portion of the purchase price. The \$15.0 million payment was recorded in other assets in the Company's consolidated balance sheet. As the employer clients transition to the Company, amounts from the other asset category will be reclassified as an intangible asset and amortization will commence. From the inception of the partnership and through the year ended December 31, 2014, the Company has reclassified \$10.3 million from other assets to intangible assets in connection with employer clients that have transitioned to the Company and will amortize the intangible assets over an expected life of 7 years.

CONEXIS Acquisition

On August 1, 2014, the Company entered into an Asset Purchase Agreement with CONEXIS Benefits Administrators, LP ("CONEXIS"), a Texas limited partnership and Word & Brown Insurance Administrator, Inc., a California corporation, pursuant to which the Company acquired substantially all of the assets of CONEXIS. CONEXIS is a leader in employee benefits administration and serves approximately 16,000 organizations of all sizes. This acquisition added a new base of Consumer-Directed Benefits customers and participant relationships. The purchase price was \$118.0 million, adjusted for working capital adjustments, of which \$108.0 million was paid at closing with the remaining balance classified in the consolidated balance sheet in the other current liabilities line item. The remaining balance is expected to be paid on August 1, 2015 after adjustment for any indemnification losses incurred by the Company for which it is entitled to recover.

The Company accounted for the acquisition of CONEXIS as a purchase of a business under ASC 805. The results of operations for CONEXIS have been included in the Company's financial results since the acquisition.

As part of the purchase price allocation, the Company determined that CONEXIS's separately identifiable intangible assets were its customer relationships, developed technology and trade name. The Company used the income approach to value the customer relationships and trade name. This approach calculates fair value by discounting the after-tax cash flows back to a present value. The baseline data for this analysis was the cash flow estimates used to price the transaction. Cash flows were forecasted and then discounted using a discount rate for customer relationships of 15% and trade name of 12%, based on the estimated internal rate of return and weighted average cost of capital, which employs an estimate of the required equity rate of return and after-tax cost of debt. The Company used a replacement cost approach to estimate the fair value of developed technology in which estimates of development time and cost per man month are used to calculate total replacement cost.

Goodwill was calculated as the difference between the acquisition-date fair value of the consideration transferred and the values assigned to the assets acquired and liabilities assumed. The recognized amount of goodwill is provisional and subject to change pending the completion of the allocation of the consideration transferred to the assets acquired and liabilities assumed. Goodwill recognized from the transaction results from the acquired workforce, the opportunity to expand our client base and achieve greater long-term growth opportunities than either company had operating alone. All of the recognized goodwill is expected to be deductible for tax purposes.

The following table summarizes the allocation of the purchase price at the date of acquisition (in millions):

	Amount	Weighted Average Useful Life (in years)
Net tangible assets acquired	\$ 4.7	
Customer relationships	48.1	10
Developed technology	3.9	5
Trade name	1.6	3
Non-compete agreement	0.2	7
Goodwill	59.5	
Total allocation of purchase price	\$ 118.0

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

The valuation of working capital balances are provisional and are based on the information that was available as of the acquisition date to estimate the fair value of the assets acquired. The Company believes that information provides a reasonable basis for estimating the fair value but the Company is waiting for additional information necessary to finalize those amounts. Thus, the provisional measurements of fair value reflected are subject to change. Such changes are not expected to be significant. These adjustments to our tangible assets will have an impact on our overall valuation of CONEXIS and in turn may impact the amounts currently recognized for intangible assets and goodwill. The Company expects to finalize the valuation and complete the purchase price allocation as soon as practicable but no later than one year from the acquisition date.

The following unaudited pro forma financial information presents the consolidated results of operations of the Company and CONEXIS as if the acquisition had occurred at the beginning of fiscal 2013 with pro forma adjustments to give effect to amortization of intangible assets, depreciation of acquired property and equipment, corporate allocation costs and an increase in interest expense due to financing costs in connection with the acquisition. The pro forma financial information is presented for informational purposes only and may not be indicative of the results of operations that would have been achieved if the acquisition had taken place at January 1, 2013.

	Year Ended December 31, 2013 2014	
	(In thousands, except per share data) (Unaudited)	
Total revenue	\$ 270,635	\$ 303,710
Net income	15,379	15,004
Net income per share:		
Basic	\$ 0.46	\$ 0.43
Diluted	\$ 0.44	\$ 0.41

The changes in the carrying amount of goodwill for the years ended December 31, 2013 and 2014 is as follows (dollars in thousands):

Balance at December 31, 2013	\$ 97,636
Additions: CONEXIS acquisition (see Note 3)	59,473
Balance at December 31, 2014	\$ 157,109

Acquired intangible assets at December 31, 2013 and December 31, 2014 were comprised of the following (dollars in thousands):

	December 31, 2013			December 31, 2014		
	Gross carrying amount	Accumulated amortization	Net	Gross carrying amount	Accumulated amortization	Net
Amortizable intangible assets:						
Client contracts and broker relationships	\$ 62,689	\$ 25,313	\$ 37,376	\$ 120,723	\$ 33,885	\$ 86,838
Trade names	2,240	1,120	1,120	3,880	1,657	2,223
Technology	9,946	6,850	3,096	13,846	9,390	4,456

Total	\$ 78,024	\$ 35,238	\$ 42,786	\$ 141,818	\$ 47,042	\$ 94,776

Amortization expense for acquired intangible assets totaled \$6.6 million, \$9.1 million and \$11.8 million in 2012, 2013 and 2014, respectively.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

The estimated expected amortization expense in future periods at December 31, 2014 is as follows (dollars in thousands):

2015	\$ 14,622
2016	13,545
2017	12,991
2018	12,365
2019	11,805
Thereafter	29,448
Total	\$ 94,776

(5)Accounts Receivable

Accounts receivable at December 31, 2013 and 2014 were comprised of the following (dollars in thousands):

	December 31, 2013	December 31, 2014
Trade receivables	\$ 18,398	\$ 35,762
Unpaid amounts for benefit services	14,932	19,458
	33,330	55,220
Less allowance for doubtful accounts	(467)	(767)
Accounts receivable, net	\$ 32,863	\$ 54,453

Allowance for doubtful accounts roll forward is comprised of the following (dollars in thousands):

Allowance for Doubtful Accounts:	Balance at Beginning of Fiscal Year (in thousands)	Charged to Operations	Recoveries (Deductions)	Balance at End of Fiscal Year
Year ended December 31, 2014	\$ 467	\$ 259	\$ 41	\$ 767
Year ended December 31, 2013	403	247	(183)	467
Year ended December 31, 2012	69	539	(205)	403

(6)Property and Equipment

Property and equipment at December 31, 2013 and 2014 were comprised of the following (dollars in thousands):

	December 31, 2013	December 31, 2014
Computers and equipment	\$ 9,960	\$ 13,670
Software and software development costs	64,241	77,104
Furniture and fixtures	2,815	3,306
Leasehold improvements	5,840	8,285
	\$ 82,856	\$ 102,365
Less accumulated depreciation and amortization	(56,324)	(63,228)
Property and equipment, net	\$ 26,532	\$ 39,137

During 2012, 2013 and 2014, the Company capitalized software development costs of \$10.5 million, \$15.3 million and \$16.5 million, respectively. Amortization expense related to capitalized software development costs was \$6.7 million, \$8.0 million, and \$8.8 million for 2012, 2013, and 2014 respectively. These costs are included in

amortization and change in contingent consideration in the accompanying consolidated statements of income. At December 31, 2014, the unamortized software development costs included in property and equipment in the accompanying consolidated balance sheet was \$24.0 million.

Total depreciation expense, including amortization of internal use software, for the years ended December 31, 2012, 2013 and 2014 was \$9.7 million, \$11.4 million and \$13.2 million, respectively.

WAGeworks, INC.

Notes to Consolidated Financial Statements

(7)Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses at December 31, 2013 and 2014 were comprised of the following (dollars in thousands):

	December 31, 2013	December 31, 2014
Accounts payable	\$ 1,859	\$ 1,180
Payable to benefit providers and transit agencies	23,017	19,500
Accrued payables	6,305	11,099
Accrued compensation and related benefits	13,379	16,045
Other accrued expenses	1,616	3,156
Deferred revenue	3,243	3,305
Accounts payable and accrued expenses	\$ 49,419	\$ 54,285

(8)Debt

Debt consists of borrowings under a Commercial Credit Agreement, or Revolver, with MUFG Union Bank, N.A. (formerly Union Bank, N.A.), or UB under which the Company can borrow an aggregate principal amount up to \$125.0 million, with a \$15.0 million subfacility for the issuance of letters of credit and as of December 31, 2014, the Company had \$79.6 million outstanding under the Revolver with UB. As collateral for the Revolver, the Company granted UB a security interest in substantially all of the Company's assets. All of the Company's material existing and future subsidiaries are required to guaranty the Company's obligations under the Revolver. Such guarantees by existing and future material subsidiaries are and will be secured by substantially all of the property of such material subsidiaries.

Each loan under the Revolver bears interest at a fluctuating rate per annum equal to a prime rate determined in accordance with the terms of the Revolver, plus a spread of 0.00% to 0.25%, or, at the Company's option, an interest rate equal to the LIBOR rate determined in accordance with the Revolver, plus a spread of 1.75% to 2.25%. The

interest rate applicable to the remaining loan outstanding at December 31, 2014 is 2.58%. Principal, together with all accrued and unpaid interest, is due and payable on July 21, 2017.

The Revolver contains customary affirmative and negative covenants and also has financial covenants relating to a liquidity ratio, a consolidated leverage ratio, a debt service coverage ratio and a minimum consolidated net worth covenant. The Company is obligated to pay customary commitment fees and letter of credit fees for a facility of this size and type.

The Revolver contains customary events of default, including, among others, payment defaults, covenant defaults, inaccuracy of representations and warranties, cross-defaults to other material indebtedness, judgment defaults, a change of control default and bankruptcy and insolvency defaults. Under certain circumstances, a default interest rate will apply on all obligations during the existence of an event of default under the loan agreement at a per annum rate of interest equal to 2.00% above the applicable interest rate. Upon an event of default, the lenders may terminate the commitment, declare the outstanding obligations payable by the Company to be immediately due and payable and exercise other rights and remedies provided for under the Revolver.

(9)Common Stock

(a) Authorized Shares

On May 15, 2012, the certificate of incorporation was amended to authorize the issuance of 1.1 billion shares of capital stock. The total number of shares of common stock authorized was 1.0 billion shares with a par value of \$0.001 per share.

(b) Follow-On Public Offerings

On March 18, 2013, the Company closed a follow-on public offering and sold 500,000 shares of common stock at a price of \$24.00 per share, which raised \$11.6 million, net of underwriters' discounts and commissions. Certain selling stockholders, including funds affiliated with VantagePoint Capital Partners, or VantagePoint, sold 5,131,115 shares of common stock in the offering. In addition, the underwriters exercised their overallotment option to purchase 844,667 additional shares from the selling stockholders. The Company did not receive any proceeds from the sale of shares by the selling stockholders.

On August 19, 2013, the Company closed a follow-on public offering pursuant to which certain selling stockholders, including VantagePoint, sold 2,968,276 shares of common stock. In addition, the underwriters exercised their overallotment option to purchase 445,241 additional shares from the selling stockholders. The shares were purchased at a price of \$39.54 per share, net of underwriters' discounts and commissions. The Company did not receive any proceeds from the sale of shares by the selling stockholders.

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

(10)Employee Benefit Plans

(a) Employee Stock Option Plan

The Company's stock option program is a long-term retention program that is intended to attract, retain, and provide incentives for talented employees, officers and directors, and to align stockholder and employee interests. The Company considers its option program critical to its operation and productivity.

Currently, the Company grants options from the 2010 Equity Incentive Plan (2010 Plan). The Company's 2010 Plan was adopted on May 26, 2010, and the Company has reserved for issuance under the 2010 Plan a total of 4.3 million common stock shares at December 31, 2014. Under the 2010 Plan, options can be granted to all employees, including executive officers, outside consultants and non-employee directors.

The Company's 2000 Stock Option/Stock Issuance Plan adopted in June 2000, as amended and restated, (2000 Plan), provides for the issuance of options and other stock-based awards. The Company has reserved for issuance under the 2000 Plan a total of 1.0 million common stock shares at December 31, 2014. The Company issues new shares upon the exercise of stock options. Any forfeitures or shares remaining under the plan are canceled and not available for reissue.

Options under the 2000 and the 2010 Plan, or the Plans, are generally for periods not to exceed 10 years and must be issued at prices not less than 85% of the estimated fair value of the shares of Common Stock on the date of grant as determined by the plan administrator. Options become vested and exercisable at such times and under such conditions as determined by the board of directors. Options generally vest over four years with 25% vesting after one year and the balance vesting monthly over the remaining period.

Stock-based compensation is classified in the consolidated statements of income in the same expense line items as cash compensation. Amounts recorded as expense in the consolidated statements of income are as follows (in thousands):

	Year Ended December 31,		
	2012	2013	2014
Cost of revenue	\$ 282	\$ 978	\$ 2,227
Technology and development	323	818	1,209

Edgar Filing: WAGEWORKS, INC. - Form 10-K

Sales and marketing	476	1,079	2,466
General and administrative	2,669	6,331	8,656
Total	\$ 3,750	\$ 9,206	\$ 14,558

As of December 31, 2014, there was \$18.6 million of total unrecognized compensation cost related to unvested stock options that are expected to vest. The cost is expected to be recognized over a weighted average period of approximate 3.00 years, as of December 31, 2014.

The following table summarizes the weighted-average fair value of stock options granted:

	Year Ended December 31,		
	2012	2013	2014
Stock options granted (in thousands)	983	576	1,026
Weighted average fair value at date of grant	\$ 5.83	\$ 12.55	\$ 20.06

Stock option activity for the year ended December 31, 2014 is as follows (shares in thousands):

	Shares	Weighted average exercise price	Remaining contractual term (years)	Aggregate intrinsic value (dollars in thousands)
Outstanding at December 31, 2013	2,989	\$ 11.80	6.55	\$ 142,377
Granted	1,026	42.74		
Exercised	(648)	10.40		
Forfeited	(161)	33.57		
Outstanding as of December 31, 2014	3,206	\$ 20.90	6.75	\$ 140,029
Vested and expected to vest at December 31, 2014	3,099	\$ 20.37	6.68	\$ 136,960
Exercisable at December 31, 2014	1,860	\$ 9.91	5.17	\$ 101,665

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

The total intrinsic value of options exercised during the years ended December 31, 2012, 2013 and 2014, was \$8.1 million, \$55.6 million and \$28.4 million, respectively. Cash received from option exercises under all share-based payment arrangements was \$4.4 million, \$16.0 million and \$6.7 million for the years ended December 31, 2012, 2013 and 2014, respectively. The Company elected to follow the tax law method of determining realization of excess tax benefits for stock-based compensation in accordance with ASC 718. There was approximately \$1.9 million, \$12.3 million and \$10.4 million of excess tax benefits related to stock-based compensation that was recorded to stockholders' equity during the years ended December 31, 2012, 2013 and 2014, respectively.

(b) Valuation Assumptions

The Company calculated the fair value of each option award on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	Year Ended December 31,		
	2012	2013	2014
Expected volatility	52.79%	51.43%	46.90%
Risk-free interest rate	1.26%	1.09%	1.87%
Expected term (in years)	6.60	6.00	6.09
Dividend yield	—%	—%	—%

Stock-based compensation cost is measured at the grant date based on the fair value of the award. The determination of the fair value of stock-based awards on the date of grant using an option pricing model is affected by the Company's stock price as well as assumptions regarding a number of complex and subjective variables. Expected volatility is determined using weighted average volatility of peer publicly traded companies as well as the Company's own historical volatility. The Company expects that it will increase weighting of its own historical data in future periods, as that history grows over time. The risk-free interest rate is determined by using published zero coupon rates on treasury notes for each grant date given the expected term on the options. The dividend yield of zero is based on the fact that the Company expects to invest cash in operations and has never paid cash dividends on its common stock. The Company uses the "simplified" method to estimate expected term as determined under Staff Accounting Bulletin No. 110 due to the lack of option exercise history as a public company. During 2014, the Company assessed the appropriateness of the use of the simplified method and determined that it was appropriate as the Company develops a history of option exercises. The Company will continue to assess the appropriateness of the use of the simplified method.

The fair value of each option grant for performance share options was estimated on the date of grant using the same option valuation model used for options granted under the employee share option plan and assumes that performance

goals will be achieved.

Stock-based compensation expense is recognized in the consolidated statements of income based on awards ultimately expected to vest, it is reduced for estimated pre-vest forfeitures. ASC 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. In addition, ASC 718 requires that compensation cost recognized at any date must be at least equal to the amount attributable to options that are vested at that date. The Company calculates an adjustment of its compensation costs to the vested amounts on a quarterly basis. The pre-vesting of forfeitures is estimated based on weighted average historical forfeiture rates. Under the provisions of ASC 718, the Company will record additional expense if the actual forfeiture rate is lower than estimated, and will record a recovery of prior expense if the actual forfeiture rate is higher than estimated.

(c) Restricted Stock Units

The Company grants restricted stock units to certain employees, officers, and directors under the 2010 Plan. Restricted stock units vest upon either performance-based, market-based or service-based criteria.

Performance-based restricted stock units vest based on the satisfaction of specific performance criteria. At each vesting date, the holder of the award is issued shares of the Company's common stock. Compensation expense from these awards is equal to the fair market value of the Company's common stock on the date of grant and is recognized over the remaining service period based on the probable outcome of achievement of the financial metrics. Management's estimate of the number of shares expected to vest is based on the anticipated achievement of the specified performance criteria.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

Market-based performance restricted stock units are granted such that they vest upon the achievement of certain per share price targets of the Company's common stock during a specified performance period. The fair market values of market-based performance restricted stock units are determined using the Monte Carlo simulation method. The Monte Carlo simulation method is subject to variability as several factors utilized must be estimated including the future daily stock price of the Company's common stock over the specified performance period, the Company's stock price volatility and risk-free interest rate. The amount of compensation expense is equal to the per share fair value calculated under the Monte Carlo simulation multiplied by the number of market-based performance restricted stock units granted, recognized over the specified performance period.

Generally, service-based restricted stock units vest over four years with 25% vesting after one year and the balance vesting monthly over the remaining period.

In fiscal 2013, the Company granted a total of 219,000 performance-based restricted stock units to certain executives and employees and granted a total of 171,500 service-based restricted stock units to certain employees.

Performance-based restricted stock units are typically granted so that they vest upon the achievement of certain revenue growth rates, and other financial metrics, during a specified performance period for which participants have the ability to receive up to 150% of the target number of shares originally granted.

In the first quarter of 2014, the Company granted a total of 106,500 performance-based restricted stock units to certain executive officers and employees. Performance-based restricted stock units are typically granted such that they vest upon the achievement of certain revenue growth rates, and other financial metrics, during a specified performance period for which participants have the ability to receive up to 150% of the target number of shares originally granted.

The restricted stock units will be eligible to vest based on the Company's achievement against an average annual EBITDA margin target equal to or greater than 22% and compound revenue growth target for the specified performance period.

The following table describes the levels of revenue growth target for the specified performance period for the restricted stock units to vest:

Achievement of Revenue Growth Objective	Percentage of RSU Vesting
20% and Greater	150% will vest

Between 15% but less than 20%	Between 100% and 150% will vest
Between 10% but less than 15%	Between 50% and 100% will vest
Below 10%	None will vest

The Company determined that it is probable that the revenue growth rates and other financial metrics, related to the performance-based restricted stock units granted in fiscal 2013, will be achieved and so the Company is recognizing stock-based compensation expense associated with these awards at the 150% target.

In the second quarter of 2014, the Company granted a total of 199,000 market-based performance restricted stock units to certain executive officers. The number of shares to be vested is subject to change based on certain market conditions. In the third quarter of 2014, one of the executives notified the Company he would resign and 33,000 market-based performance restricted stock units were forfeited and canceled.

The market-based performance restricted stock units will be eligible to vest based on the Company's achievement of certain per share price of its common stock as reported on the New York Stock Exchange, or NYSE, for any twenty consecutive trading day period during the specified performance period.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

The following table describes the price per share targets that must be achieved for the specified performance period for the restricted stock units to vest:

WageWorks Per Share Price on NYSE	Payout Percentage
\$100	200%
\$90	100%
\$75	50%
Below \$75	0%

Stock-based compensation expense related to restricted stock units was \$2.7 million and \$6.0 million in 2013 and 2014, respectively. Total unrecorded stock-based compensation cost at December 31, 2014 associated with restricted stock units was \$18.8 million, which is expected to be recognized over a weighted-average period of 1.95 years.

The following table summarizes information about restricted stock units issued to officers, directors, and employees under our 2010 Plan:

	Shares (in thousands)	Weighted Average Grant Date Fair Value
Unvested at December 31, 2013	384	\$ 24.48
Granted	384	50.03
Vested	(41)	24.46
Forfeitures	(90)	37.96
Unvested at December 31, 2014	637	\$ 37.99

(d) Employee Stock Purchase Plan

Concurrent with the closing of our IPO in May 2012, the Company established the 2012 Employee Stock Purchase Plan (ESPP) which is intended to qualify under Section 423 of the Internal Revenue Code of 1986. The ESPP allows eligible Company executives and other employees to purchase shares of the Company's common stock at a discount through payroll deductions. The Company issued 59,535 common stock shares for which it received \$2.1 million from employee contributions during 2014. At December 31, 2014, a total of 927,624 shares of the Company's common stock are available for sale under the ESPP. In addition, the ESPP provides for annual increases in the number of shares available for issuance under the ESPP on the first day of each fiscal year, equal to the least of:

- 500,000 shares of common stock;
- 1% of the outstanding shares of our common stock as of the last day of our immediately preceding fiscal year; or
- such other amount as may be determined by the board.

Under the ESPP, employees are eligible to purchase common stock through payroll deductions of up to 25% of their eligible compensation, subject to any plan limitations. The ESPP has four consecutive offering periods of approximately three months in length during the year and the purchase price of the shares will be 85% of the lower of the fair value of our common stock on the first trading day of the offering period or on the last day of the offering period.

(e) 401(k) Plan

The Company participates in the WageWorks 401(k) Plan, or 401(k) Plan, a tax-deferred savings plan covering all of its employees working more than 1,000 hours per year. Employees become participants in the 401(k) Plan on the first day of any month following the first day of employment. Eligible employees may contribute up to 85% of their compensation to the 401(k) Plan, limited to the maximum allowed under the Internal Revenue Code. The Company, at its discretion, may match up to 25% of the first 6% of employees' contributions and may make additional contributions to the 401(k) Plan. The Company contributed approximately \$0.7 million for 2012 and \$1.0 million for both 2013 and 2014.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

(11)Income Taxes

The Company provides for income taxes using an asset and liability approach, under which deferred income taxes are provided based upon enacted tax laws and rates applicable to periods in which the taxes become payable. The Company is subject to income taxes in the U.S. federal and various state jurisdictions. Presently, there is no income tax examination going on in the jurisdictions where the Company operates.

The components of the provision for income taxes for the years ended December 31, 2012, 2013 and 2014 are as follows (dollars in thousands):

	2012	2013	2014
Current:			
Federal	\$ (1,667)	\$ (10,748)	\$ (9,459)
State	(635)	(1702)	(1,539)

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

Reconciliation of the statutory federal income tax rate to the Company's effective tax rate for the years ended December 31, 2012, 2013 and 2014:

	2012		2013		2014	
Tax provision at U.S. statutory rate	35	%	35	%	35	%
State income taxes, net of federal benefit	3		5		5	
Permanent items - adjustments to contingent consideration	3		(8)		—	
Permanent items - other	1		1		1	
R&D credits	—		(1)		—	
Other	(2)		(2)		(1)	
Provision (benefit) for tax	40	%	30	%	40	%

The Company's accounting for deferred taxes involves the evaluation of a number of factors concerning the realizability of the Company's deferred tax assets. Assessing the realizability of deferred tax assets is dependent upon several factors, including the likelihood and amount, if any, of future taxable income in relevant jurisdictions during the periods in which those temporary differences become deductible. The Company's management forecasts taxable income by considering all available positive and negative evidence including its history of operating income or losses and its financial plans and estimates which are used to manage the business. The Company has concluded there was sufficient positive evidence at the end of 2012, 2013 and 2014 to continue to support the position that the Company does not need to maintain a valuation allowance on deferred tax assets. These assumptions require significant judgment about future taxable income. The amount of deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income are reduced.

At December 31, 2014, unrecognized tax benefits approximated \$4.1 million, which would impact the income tax expense if recognized. Included in the balance at December 31, 2014 is \$0.5 million of current year tax positions, which would affect the Company's income tax expense if recognized. As of December 31, 2014, the Company has no uncertain tax positions that would be reduced as a result of a lapse of the applicable statute of limitations in the following year. The Company does not anticipate that any adjustments would result in a material change to its financial position. For the years ended December 31, 2012, 2013 and 2014, the Company did not recognize interest or penalties related to unrecognized tax benefits.

A reconciliation of the beginning and ending balances of the total amounts of gross unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2012	2013	2014
	(In thousands)		
Balance, beginning of year	\$ 2,321	\$ 2,478	\$ 3,716
Increase in tax positions for prior years	15	515	-
Decrease in tax positions for prior years	-	-	(90)
Increase in tax positions for current year	142	723	483
Balance, end of year	\$ 2,478	\$ 3,716	\$ 4,109

The Company files income tax returns in the U.S. federal jurisdiction and various states jurisdictions. As a result of the Company's net operating loss carryforwards, the 2000 through 2014 tax years are open and may be subject to potential examination in one or more jurisdictions.

At December 31, 2014, the Company had federal and state operating loss carryforwards of approximately \$38.5 million and \$47.0 million, respectively, available to offset future regular and alternative minimum taxable income. The Company's state net operating loss carryforward is on the post-apportionment basis. The Company's federal net operating loss carryforwards expire in the years 2024 through 2033, if not utilized. The state net operating loss carryforwards expire in the years 2018 through 2033. The federal and state net operating loss carryforwards include excess tax deductions related to stock options in the amount of \$21.8 million and \$16.2 million, respectively. When utilized, the related tax benefit will be booked to additional paid-in capital.

The Company also has tax deductible goodwill related to asset acquisitions.

Table of Contents

WAGEWORKS, INC.

Notes to Consolidated Financial Statements

In addition, the Company had federal and California research and development credit carryforwards of approximately \$4.7 million and \$2.4 million respectively, available to offset future tax liabilities. The federal research credit carryforwards expire beginning in the years 2022 through 2034, if not fully utilized. The California tax credit carryforward can be carried forward indefinitely.

The Company's ability to utilize the net operating losses and tax credit carryforwards are subject to limitations in the event of an ownership change as defined in Section 382 of the Internal Revenue Code ("IRC") of 1986, as amended, and similar state tax law. In general, an ownership change occurs if the aggregate stock ownership of certain stockholders increases by more than 50 percentage points over such stockholders' lowest percentage ownership during the testing period (generally three years). The Company has considered Section 382 of the IRC and concluded that any ownership change would not diminish the Company's utilization of its net operating loss or its research and development credits during the carryover periods.

The Company elected to follow the tax law method of determining realization of excess tax benefits for stock-based compensation in accordance with ASC 718. During 2013, the Company recorded approximately \$10.4 million of excess tax benefits related to stock-based compensation that was credited to stockholders' equity during the year.

(12)Commitments and Contingencies

(a) Operating Leases

The Company leases office space and equipment under noncancelable operating leases with various expiration dates through 2023. Future minimum lease payments under noncancelable operating leases are as follows (dollars in thousands):

	Operating leases As of December 31, 2014
2015	\$ 8,154
2016	5,049
2017	4,665

2018	4,759
2019	4,850
Thereafter	12,196
Total future minimum lease payments	\$ 39,673

Rent expense in 2012 was \$4.5 million and \$4.7 million for both 2013 and 2014. Future minimum lease payments under capital leases, not included in the table above, as of December 31, 2014 are \$1.3 million and \$0.3 million for 2015 and 2016, respectively. We have no future minimum lease payments under capital leases extending beyond 2016.

(b) Legal Matters

The Company is involved from time to time in claims that arise in the normal course of its business. The Company is not presently subject to any material litigation nor, to management's knowledge, is any litigation threatened against the Company that collectively is expected to have a material adverse effect on the Company's cash flows, financial condition or results of operations.

(13)Related Party

The National Flex Trust, or the Trust, established by a subsidiary of the Company, is to provide reimbursement of qualified expenses to plan participants under certain employer plans that have contracted with the Company to provide the plan services using a custodial account, or the Trust Account. The client is responsible for maintaining the employer plan for their participants, including the establishment of eligibility and paying all eligible claim amounts owed to their participants. The Company is an independent contractor engaged to perform administration services. As an administrator, the Company does not have the power to direct the activities of the Trust that would most significantly impact the Trust's economic performance.

Under a Management Agreement for Services to the Trust, the Company is to provide services to the Trust, including accounting, treasury, tax, administration, and management. The Trust is to pay the Company monthly for the services provided based on plan participants and/or debit cards administered. For the past several years, the Trust's earnings have been insufficient to cover these costs and, consequently, the Company has not recognized these fees during this period. Amounts due to the Company from the Trust for management services have been fully written off as of December 31, 2012. Trust expenses subsidized by the Company were \$82,000, \$80,000 and \$100,000 in 2012, 2013 and 2014.

Table of Contents

WAGeworks, INC.

Notes to Consolidated Financial Statements

The Company has a long-term receivable due from the Trust totaling \$1.0 million which the Trust holds with its banks, as a security deposit for the settlement of participant claims. The Company has recorded this receivable within Other Assets.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain “disclosure controls and procedures,” as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (“Exchange Act”), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognizes that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures.

Subject to the limitations noted above, based on their evaluation at the end of the period covered by this Annual Report on Form 10-K, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the Company’s disclosure controls and procedures and have concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act. The Company’s internal control over financial reporting is a process designed by, or under the supervision of, our Chief Executive Officer and Chief Financial Officer, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, under the supervision of our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2014 using the criteria

established in Internal Control—Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this assessment and those criteria, management concluded that our internal control over financial reporting was effective as of December 31, 2014.

The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report, which appears in Part II, Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) or the Exchange Act that occurred during the period covered by this Annual Report on Form 10-K that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
