Anglo Swiss Resources Commences Drilling Program Fry Inlet Diamond Property

VANCOUVER, BRITISH COLUMBIA, September 19, 2007 -- Anglo Swiss Resources Inc. (TSX VENTURE: ASW) (OTCBB: ASWRF) (BERLIN: AMO) is pleased to announce that it has initiated the 2007 drill program on the Fry Inlet Diamond property in the Lac de Gras region of the NWT.

Drilling is underway on a cluster of seven high-priority targets inclusive of the significantly diamondiferous LI 201 kimberlite. The LI 201 kimberlite produced 14 macrodiamonds and 46 microdiamonds from a previous drill program under the direction of Kennecott in the 1990s from 281 kg. of kimberlite. The LI 201 will be re-drilled and tested using existing sampling standards within the industry. The company anticipates that the 2007 drill program will produce an improved diamond count over the previous drill program.

The Fry Inlet diamond property is located approximately 25 kilometres north of BHP Billiton's Ekati diamond mine property and Aber/Rio Tinto's Diavik diamond mine property, Canada's first two diamond mines. This claim group totals 91,856 acres.
