FOR IMMEDIATE RELEASE

CAMTEK CLARIFIES ITS POSITION ON 3D PRINTING
Further focus on its two primary markets

MIGDAL HAEMEK, Israel – November 26, 2013 – Camtek Ltd. (NASDAQ and TASE: CAMT) ('The Company') today announced that in light of the high trading volume of the Company's shares and rumors that have been circulating in the media over the course of the past few days, it wishes to clarify that, as reported previously, it is now in the advanced stages of the development of the GreenJet, a digital 3D printing system used for the deposition of solder mask designated for the printed circuit board industry (the "GreenJet System"). The first installation of the GreenJet System for evaluation in a customer's manufacturing environment is expected to take place in the beginning of 2014 and, subject to the results, the Company expects the first commercial sales of the GreenJet System to take place during 2014.

In addition, the Company wishes to inform that it has decided to focus on its two primary markets (products for the printed circuit board industry and inspection products for the semi-conductor market), and will not continue with development of future models of its Xact product line designed for the sample preparation of models for the characterization and failure analysis in the semi-conductor industry. The Company will continue to sell and support the existing Xact products.

Therefore, as a future growth engine, in addition to the existing products lines, the Company will focus its activity in the field of digital 3D printing for the printed circuit board industry, including the GreenJet System.

ABOUT CAMTEK LTD.

Camtek Ltd. provides automated and technologically advanced solutions dedicated to enhancing production processes and increasing yields, enabling and supporting customer's latest technologies in the Semiconductors, Printed Circuit Boards (PCB) and IC Substrates industries.

Camtek addresses the specific needs of these interconnected industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing, adaptive ion milling (AIM) and digital material deposition (DMD). Camtek's solutions range from micro-to-nano by applying its technologies to the industries' specific requirements.

This press release is available at www.camtek.co.il.

This press release may contain projections or other forward-looking statements regarding future events or the future performance of the Company. These statements are only predictions and may change as time passes. We do not assume any obligation to update that information. Actual events or results may differ materially from those projected, including as a result of changing industry and market trends, reduced demand for our products, the timely development of our new products and their adoption by the market, increased competition in the industry, intellectual property litigation, price reductions as well as due to risks identified in the documents filed by the Company with the SEC.
