Chief Executive Officer

"We have delivered another quarter of robust volume growth with improved volume market shares in all of our regions. This is an encouraging result given the challenging economic and competitive environment and reflects

the continuing investment behind our brands, better in-market execution, successful innovations and the extension of our brands into new markets. The consistent strong performance of our personal care business means that it became, in the quarter, our largest category.

We continue to operate under the assumption of slow economic growth, particularly in developed markets where consumer confidence remains fragile. We do not expect competitive pressures to ease and our ability to increase prices will remain constrained despite rising commodity costs in the second half. We still expect underlying price growth to turn positive towards the end of the year.

Notwithstanding this difficult environment and comparators which get tougher as the year progresses, the results confirm again that our strategy to focus on the consumer and to accelerate growth is working. Our priority remains to drive profitable volume growth and strong cash flow along with steady and sustainable improvement in operating margin for the year as a whole."
