Note C: Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding for the period. Basic earnings per share does not include the effect of potentially diluted transactions or conversions. This computation of diluted earnings per share reflects the potential dilution of earnings per share under the treasury stock method which could occur if contracts to issue common stock, such as stock options, were exercised and shared in corporate earnings.

The following table presents a summary of per share data and amounts for the period indicated:

Part I. FINANCIAL INFORMATION

Item II. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements. This management's discussion and analysis of financial condition and results of operations and other portions of this report include forward-looking statements such as: statements of the Company's goals, intentions, and expectations; estimates of risks and of future costs and benefits; assessments of loan quality, and probable loan losses, liquidity, and interest risk; and statements of the Company's ability to achieve financial and other goals. These forward-looking statements are subject to significant uncertainties because they are based upon: the amount and timing of future changes in interest rates and other economic conditions; future laws and regulations; and a variety of other matters. Because of these uncertainties, the actual future results may be materially different from the results indicated by these forward-looking statements. In addition, the Company's past growth and performance do not necessarily indicate its future results.

Harbor Bankshares Corporation's earnings for the second quarter of 2003 totaled \$421 thousand, an increase of \$132 thousand or 45.7 percent when compared to the second quarter of 2002. Net interest income increased by \$325 thousand or 15.4 percent. Non-interest expense for the quarter increased by \$50 thousand or 2.4 percent. The provision for loan losses increased by \$60 thousand or 73.2 percent.

Year to date earnings as of June 30, 2003 were \$750 thousand, reflecting an increase of \$178 thousand or 31.1 percent when compared to the first six months of 2002. The continuing re-pricing of liabilities, increased loan demand and cost controls were the major factors for the increase. The annualized return on average assets (ROAA) and average stockholders equity (ROAE) were .71 percent and 10.5 percent respectively, compared to .59 percent and 9.11 percent achieved during the first six months of 2002.

Net interest income increased by \$630 thousand or 15.5 percent when compared to the first six months of 2002. Interest and fees on loans increased by \$505 thousand or 11.2 percent reflecting the increased loan demand. Investment income decreased by \$183 thousand or 16.9 percent and Federal funds income decreased by \$115 thousand or 67.6 percent. The decrease in both of these categories reflect the use of the excess funds and liquidation of securities in order to fund the loan demand. Interest expense decreased by \$413 thousand or 23.8 percent. Interest expense on savings account decreased by \$188 thousand or 32.7 percent, the interest expense on time deposits decreased by \$220 thousand or 20.7 percent. Continuing rate reductions and re-pricing of deposits were the main reasons for the decreases. The interest expense for transaction accounts and notes payable showed a slight decrease when compared to the prior year. Interest expense on transaction accounts decreased by \$2 thousand or 8.0 percent and interest expense on notes payable, decreased by \$3 thousand or 4.3 percent, reflecting the payment of some of the principal of the note payable.

The provision for possible loan losses was \$365 thousand compared to \$175 thousand for the same period of 2002, an increase of \$190 thousand or 108.6 percent. The increase reflects the amount necessary to bring the allowance for loan losses to the level determined to be appropriate by management under the Company's allowance methodology after charge-offs. Charge-offs year to date totaled \$324 thousand, reflecting an increase of \$136 thousand or 72.3 percent. Consumer loan charge-offs at \$220 thousand, represented 67.9 percent of total charge-offs for the quarter. Recoveries for the period were \$29 thousand, increasing slightly over the \$28 thousand recovered during 2002.

Future provisions for loan losses will continue to be based upon our assessment of the overall loan portfolio and its underlying collateral, the mix of loans within the portfolio, delinquency trends, economic conditions, current and prospective trends in real estate values,

Table of Contents

and other relevant factors under our allowance methodology.

Our allowance for loan loss methodology is a loan classification-based system. We base the required allowance on a percentage of the loan balance for each type of loan classification level. Watch, special mention, substandard and doubtful loans are reserved at 5.0%, 10.0%, 20.0% and 50.0% respectively. Allowance percentages are based on each individual lending program, its loss history and underwriting characteristics including loan value, credit score, debt coverage, collateral, and capacity to service debt.

This analysis is used to validate the loan loss reserve matrix as well as assist in establishing overall lending direction. In Management's opinion, the loan loss reserve as of June 30, 2003 is considered adequate.

Non-performing assets consist of non-accruing loans, loans past due 90 days or more but still accruing, restructured loans, and foreclosed real estate.

The following table shows the non-performing assets as of June 30, 2003 compared to December 31, 2002.

	June 30, 2003	December 31, 2002
Non-accruing Loans	\$ 264	409
Past Due 90 days or more	390	746
Restructured loans		
Total non-performing loans	\$ 654	\$ 1,155
Foreclosed real estate	61	70
Total non-performing assets	\$ 715	\$ 1,225
Non-performing loans to total loans	.50%	.95%
Non-performing assets to total assets	.33%	.58%
Allowance for loan losses to non-performing loans	170.9%	90.8%

Non-interest income increased by \$23 thousand or 2.5 percent. Service charges on deposit accounts decreased by \$30 thousand or 6.7 percent. Other income increased by \$53 thousand or 11.1 percent. Included in other income are \$83 thousand of gains on securities available for sale and \$49 thousand of gains on real estate loans sold. Non-interest expense increased by \$188 thousand or 4.7 percent. Salary and benefits increased by \$65 thousand or 3.2 percent. Occupancy cost increased by \$29 thousand or 7.6 percent due to general rent increases and expansion of the Bank. Equipment expense decreased by \$49 thousand or 19.5 percent as a result of lesser depreciation cost. Data Processing expense increased by \$21 thousand or 4.6 percent resulting also from the Bank's expansion. Amortization of intangible assets at \$40 thousand relates to the acquisition of a branch during the second quarter of 2002. Other expenses increased by \$92 thousand or 10.5 percent.

As of June 30, 2003, total deposits were \$199.6 million, reflecting an increase of \$6.4 million or 3.3 percent when compared to deposits as of December 31, 2002. Non-interest bearing transaction accounts increased by \$4.7 million or 17.1 percent while interest bearing transaction accounts increased by \$3.1 million or 14.4 percent. Savings accounts which include money market accounts decreased by \$2.5 million or 2.8

Edgar Filing: HARBOR BANKSHARES CORP - Form 10QSB

percent. Time deposits decreased by \$1.0 million or 1.8 percent.

Net loans increased by \$23.9 million or 19.8 percent from \$120.5 million to \$144.4 million. The increase was mainly registered in the Commercial and Real Estate loans categories.

Stockholders' equity increased by \$414 thousand or 2.9 percent. Earnings of \$750 thousand, combined with a decrease of unrealized gains on available-for-sale securities of \$157 thousand and cash dividends of \$184 thousand, were the main reason for the increase reflected above. Primary and risk based capital for the Corporation were 5.17 percent and 8.28 percent respectively.

The Corporation stock is traded privately. As of June 30, 2003, a few trades were registered at \$18.00 per share. On June 30, 2003, Bank of America deeded Harbor Bankshares Corporation 32,137 shares of stock, reducing the outstanding number of common voting shares to 670,381 shares from 702,518 shares.
