Table of Contents**HARBOR BANKSHARES CORPORATION AND SUBSIDIARY****EARNINGS PER SHARE**

Note C: Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding for the period. Basic earnings per share does not include the effect of potentially dilutive transactions or conversions. This computation of diluted earnings per share reflects the potential dilution of earnings per share under the treasury stock method which could occur if contracts to issue common stock, such as stock options, were exercised and shared in corporate earnings. At September 30, 2003 and 2002, there were no antidilutive options to purchase common shares.

The following table presents a summary of per share data and amounts for the period indicated:

STOCK OPTION ACCOUNTING

The Company accounts for stock options under the intrinsic value method of recognition and measurement principles of APE Opinion No. 25, Accounting for Stock Issued Employees, and related interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of this underlying common stock on the date of grant. Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure is effective for the interim period beginning after December 15, 2002 and requires pro-forma net income and earnings per share disclosures on a quarterly basis. The following table illustrates the effect on net income and earnings per share as if the company had applied the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure an Amendment of FASB Statement No. 123, which is effective for financial statements for fiscal years ending after December 15, 2002, with early adoption permitted. SFAS No. 148 enables companies that choose to adopt the fair value based method to report the full effect of employee stock options in their financial statements immediately upon adoption, and to make available to investors better and more frequent disclosure about the cost of employee stock options. The Company will continue to apply the disclosure-only provisions of both SFAS No. 123 and SFAS No. 148.

Edgar Filing: HARBOR BANKSHARES CORP - Form 10QSB

In May 2003, FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity. SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). Many of those instruments were previously classified as equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS No. 150 will not have a material impact on the results of operations, financial position, or liquidity of the Company.

Note F:

CONTINGENCIES

In 1999, The Harbor Bank of Maryland entered into an agreement with an unaffiliated company that operated and serviced automated teller machines (ATM s). This agreement called for the Bank to provide cash for use in certain ATM s not located on Bank premises. The Bank has discovered that it has a significant cash shortage in connection with this arrangement. The investigation of the cash shortage is ongoing and the Bank is vigorously pursuing recovery. The Bank cannot yet reasonably estimate the amount of loss it may incur as a result of this cash shortage. Therefore, no accrual for any potential loss has been reflected in the accompanying financial statements. The maximum exposure to the Bank is estimated at approximately \$1.1 million, without consideration of any related tax benefit.

Part I. FINANCIAL INFORMATION

Item II. Managements Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements. This management's discussion and analysis of financial condition and results of operations and other portions of this report include forward-looking statements such as: statements of the Company's goals, intentions, and expectations; estimates of risks and of future costs and benefits; assessments of loan quality, and probable loan losses, liquidity, and interest risk; and statements of the Company's ability to achieve financial and other goals. These forward-looking statements are subject to significant uncertainties because they are based upon: the amount and timing of future changes in interest rates and other economic conditions; future laws and regulations; and a variety of other matters. Because of these uncertainties, the actual future results may be materially different from the results indicated by these forward-looking statements. In addition, the Company's past growth and performance do not necessarily indicate its future results.

Harbor Bankshares Corporation's earnings for the third quarter of 2003 totaled \$466 thousand, an increase of \$113 thousand or 32.0 percent when compared to the third quarter of 2002. Net interest income increased by \$344 thousand or 16.8 percent. Non-interest expense for the quarter decreased by \$1 thousand. The provision for loan losses increased by \$75 thousand or 90.4 percent.

Year to date earnings as of September 30, 2003 were \$1.2 million, reflecting an increase of \$291 thousand or 31.5 percent when compared to the same period of 2002. The continuing re-pricing of liabilities, increased loan demand and cost controls were the major factors for the increase. The annualized return on average assets (ROAA) and average stockholders equity (ROAE) were .76 percent and 8.44 percent respectively, compared to .63 percent and 9.57 percent achieved during the first nine months of 2002.

Year to date net interest income increased by \$974 thousand or 15.9 percent when compared to the same period of 2002. Interest and fees on loans increased by \$841 thousand or 12.4 percent reflecting the increased loan growth. Investment income decreased by \$455 thousand or 27.5 percent and Federal funds income decreased by \$149 thousand or 67.7 percent. The decrease in both of these categories reflect the use of the excess funds and liquidation of securities in order to fund the loan growth. Interest expense decreased by \$735 thousand or 28.1 percent. Interest expense on savings accounts decreased by \$340 thousand or 38.5 percent and interest expense on time deposits decreased by \$365 thousand or 23.1 percent. Continuing rate reductions and re-pricing of deposits were the main reasons for the decreases. Interest expense on transaction accounts decreased by \$13 thousand or 29.5 percent and interest expense on notes payable, decreased by \$17 thousand or 15.9 percent, reflecting the re-payment of some of the principal of the notes payable.

The provision for loan losses was \$523 thousand compared to \$258 thousand for the same period of 2002, an increase of \$265 thousand or 102.7 percent. The increase reflects the amount necessary to bring the allowance for loan losses to the level determined to be appropriate by management under the Company's allowance methodology after charge-offs. Charge-offs year to date totaled \$358 thousand, reflecting an increase of \$110 thousand or 44.3 percent. Consumer loan charge-offs at \$245 thousand, represented 68.4 percent of total charge-offs for the quarter. Recoveries for the period were \$93 thousand, reflecting an increase of \$49 thousand or 111.3 percent when compared to the same period of 2002.

Future provisions for loan losses will continue to be based upon our assessment of the overall loan portfolio and its underlying collateral, the mix of loans within the portfolio, delinquency trends, economic conditions, current and prospective trends in real estate values, and other relevant

factors under our allowance methodology.

Table of Contents

Our allowance for loan loss methodology is a loan classification-based system. We base the required allowance on a percentage of the loan balance for each type of loan classification level. Watch, special mention, substandard and doubtful loans are reserved at 5.0%, 10.0%, 20.0% and 50.0% respectively. Allowance percentages are based on each individual lending program, its loss history and underwriting characteristics including loan value, credit score, debt coverage, collateral, and capacity to service debt.

This analysis is used to validate the loan loss reserve matrix as well as assist in establishing overall lending direction. In Management's opinion, the loan loss allowance as of September 30, 2003 is adequate.

Non-performing assets consist of non-accruing loans, loans past due 90 days or more but still accruing, restructured loans, and foreclosed real estate.

The following table shows the non-performing assets as of September 30, 2003 compared to December 31, 2002.
