(3) Reasons for Revision

During the first half of fiscal 2004, the Japanese economy steadily improved, with increased private-sector investment and export. In addition, increased demand for digital media and consumer products and IT-related equipment, particularly in the U.S., bolstered the global economy.

Against this backdrop, Hitachi's core businesses, such as devices and materials for IT and digital media related products, and manufacturing equipment achieved strong growth, and overseas operations recorded steady growth. As a result, Hitachi expects its first half results to be better than the previous forecast*. Also, all segments of the company's business are expected to be improved from the first half results ended September 30, 2003.

About Hitachi

Hitachi, Ltd. (NYSE: HIT), headquartered in Tokyo, Japan, is a leading global electronics company, with approximately 326,000 employees worldwide. Fiscal 2003 (ended March 31, 2004) consolidated sales totaled 8,632.4 billion yen (\$81.4 billion). Cautionary Statement

Certain statements found in this document may constitute forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements reflect management's current views with respect to certain future events and financial performance and include any statement that does not directly relate to any historical or current fact. Words such as anticipate, believe, expect, estimate, forecast, intend, plan, project and similar expressions which indicate future events and trends may identify forward-looking statements. Such statements are based on currently available information and are subject to various risks and uncertainties that could cause actual results to differ materially from those projected or implied in the forward-looking statements and from historical trends. Certain forward-looking statements are based upon current assumptions of future events which may not prove to be accurate. Undue reliance should not be placed on forward-looking statements, as such statements speak only as of the date of this document.

Table of Contents

-3-

Factors that could cause actual results to differ materially from those projected or implied in any forward-looking statement and from historical trends include, but are not limited to:

rapid technological change, particularly in the Information & Telecommunication Systems segment and Electronic Devices segment;

uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technology on a timely and cost-effective basis and to achieve market acceptance for such products;

fluctuations in product demand and industry capacity, particularly in the Information & Telecommunication Systems segment, Electronic Devices segment and Digital Media & Consumer Products segment;

increasing commoditization of information technology products, and intensifying price competition in the market for such products;

fluctuations in rates of exchange for the yen and other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated, particularly between the yen and the U.S. dollar;

uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing;

uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in product demand and/or exchange rates;

general economic conditions and the regulatory and trade environment of Hitachi's major markets, particularly, the United States, Japan and elsewhere in Asia, including, without limitation, a return to stagnation or deterioration of the Japanese economy, or direct or indirect restriction by other nations on imports;

uncertainty as to Hitachi's access to, or ability to protect, certain intellectual property rights, particularly those related to electronics and data processing technologies;

uncertainty as to the success of alliances upon which Hitachi depends, some of which Hitachi may not control, with other corporations in the design and development of certain key products; and

uncertainty as to general market price levels for equity securities in Japan, declines in which may require Hitachi to write-down equity securities it holds.

The factors listed above are not all-inclusive and are in addition to other factors contained in Hitachi's periodic filings with the U.S. Securities and Exchange Commission and in other materials published by Hitachi.
