Registrant's telephone number, including area code: (732) 240-4500

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, par value \$0.01 per share

(Title of class)

The Nasdaq Stock Market LLC

(Name of each exchange on which registered)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒.

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐.

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of the Form 10-K or any amendment to this Form 10-K. ☐.

Indicate by checkmark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. (Check one):

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒.

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, i.e., persons other than the directors and executive officers of the registrant, was \$254,256,750, based upon the closing price of such common equity as of the last business day of the registrant's most recently completed second fiscal quarter.

The number of shares outstanding of the registrant's Common Stock as of March 27, 2007 was 12,318,370.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Annual Report to Stockholders for the year ended December 31, 2006, are incorporated by reference into Part II of this Form 10-K.

Portions of the Proxy Statement for the 2007 Annual Meeting of Shareholders are incorporated by reference into Part III of this Form 10-K.

PART I

Item 1. Business

General

OceanFirst Financial Corp. (the "Company") was organized by the Board of Directors of OceanFirst Bank (the "Bank") for the purpose of acquiring all of the capital stock of the Bank issued in connection with the Bank's conversion from mutual to stock form, which was completed on July 2, 1996. On August 18, 2000 the Bank acquired Columbia Home Loans, LLC ("Columbia"), a mortgage banking company based in Westchester County, New York in a transaction accounted for as a purchase. At December 31, 2006, the Company had consolidated total assets of \$2.1 billion and total stockholders' equity of \$132.3 million. The Company was incorporated under Delaware law and is a savings and loan holding company subject to regulation by the Office of Thrift Supervision ("OTS"), the Federal Deposit Insurance Corporation ("FDIC") and the Securities and Exchange Commission ("SEC"). Currently, the Company does not transact any material business other than through its subsidiary, the Bank.

The Bank was originally founded as a state-chartered building and loan association in 1902, and converted to a federal savings and loan association in 1945. The Bank became a Federally-chartered mutual savings bank in 1989. The Bank's principal business has been and continues to be attracting retail deposits from the general public in the communities surrounding its branch offices and investing those deposits, together with funds generated from operations and borrowings, primarily in single-family, owner-occupied residential mortgage loans. To a lesser extent, the Bank invests in other types of loans including commercial real estate, multi-family, construction, consumer and commercial loans. The Bank also invests in mortgage-backed securities, securities issued by the U.S. Government and agencies thereof, corporate securities and other investments permitted by applicable law and regulations. As a mortgage banking subsidiary of the Bank, Columbia originates, sells and services a full product line of residential mortgage loans. Columbia sells virtually all loan production into the secondary market, except that the Bank will often purchase adjustable-rate and fixed-rate mortgage loans originated by Columbia for inclusion in its loan portfolio. The Bank also periodically sells part of its mortgage loan production in order to manage interest rate risk and liquidity. Presently, servicing rights are retained in connection with most loan sales. The Bank's revenues are derived principally from interest on its loans, and to a lesser extent, interest on its investment and mortgage-backed securities. The Bank also receives income from fees and service charges on loan and deposit products, including reverse mortgage loans, and from the sale of trust and asset management services and alternative investment products, e.g., mutual funds, annuities and life insurance. The Bank's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities ("MBS"), proceeds from the sale of loans, Federal Home Loan Bank ("FHLB") advances and other borrowings and to a lesser extent, investment maturities.

The Company's Internet website address is www.oceanfirst.com. The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are available free of charge through its website, as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. The Company's Internet website and the information contained therein or connected thereto are not intended to be incorporated into this Annual Report on Form 10-K.

In addition to historical information, this Form 10-K contains certain forward-looking statements which are based on certain assumptions and describes future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words believe, expect, intend, anticipate, estimate, project, or similar expressions. The Company's ability to predict results or the actual future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, changes in interest rates, general economic conditions, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government, including policies of the U.S. Treasury and the Board of Governors of the Federal Reserve System, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the

Table of Contents

Company's market area and accounting principles and guidelines. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. The Company does not undertake and specifically disclaims any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Market Area and Competition

The Bank is a community-oriented financial institution, offering a wide variety of financial services to meet the needs of the communities it serves. The Bank conducts its business through an administrative and branch office located in Toms River, New Jersey, and twenty additional branch offices. Seventeen of the twenty-one branch offices are located in Ocean County with three located in Monmouth County and one located in Middlesex County, New Jersey. One of the branches opened in 2006 was to relocate an existing facility to a preferred location. To complete the relocation, the older branch is expected to close in 2007. The Bank's deposit gathering base is concentrated in the communities surrounding its offices. While the Bank's lending activities are concentrated in the sub markets served by its branch office network, lending activities extend throughout New Jersey, and to a lesser extent, adjacent markets served by Columbia. Lending activities are supported by loan production offices in Red Bank and Kenilworth, New Jersey. Columbia's loan volume is primarily derived from the tri-state area around New York City. Columbia conducts business through an administrative and production office in Valhalla, New York and satellite production offices in adjacent markets.

The Bank is the oldest and largest community-based financial institution headquartered in Ocean County, New Jersey, which is located along the central New Jersey shore. Ocean County is among the fastest growing population areas in New Jersey and has a significant number of retired residents who have traditionally provided the Bank with a stable source of deposit funds. The economy in the Bank's primary market area is based upon a mixture of service and retail trade. Other employment is provided by a variety of wholesale trade, manufacturing, Federal, state and local government, hospitals and utilities. The area is also home to commuters working in New Jersey suburban areas around New York and Philadelphia.

The Bank faces significant competition both in making loans and in attracting deposits. The State of New Jersey has a high density of financial institutions, many of which are branches of significantly larger institutions headquartered out-of-market which have greater financial resources than the Bank, all of which are competitors of the Bank to varying degrees. The Bank's competition for loans comes principally from commercial banks, savings banks, savings and loan associations, credit unions, mortgage banking companies and insurance companies. Its most direct competition for deposits has historically come from commercial banks, savings banks, savings and loan associations and credit unions although the Bank also faces increasing competition for deposits from short-term money market funds, other corporate and government securities funds, Internet only providers and from other financial service institutions such as brokerage firms and insurance companies.

Lending Activities

Loan Portfolio Composition. The Bank's loan portfolio consists primarily of conventional first mortgage loans secured by one-to-four family residences. At December 31, 2006, the Bank had total loans outstanding of \$1.791 billion, of which \$1.232 billion or 68.8% of total loans were one-to-four family, residential mortgage loans. The remainder of the portfolio consisted of \$306.3 million of commercial real estate, multi-family and land loans, or 17.1% of total loans; \$13.5 million of real estate construction loans, or 0.7% of total loans; \$190.0 million of consumer loans, primarily home equity loans and lines of credit, or 10.6% of total loans; and \$49.7 million of commercial loans, or 2.8% of total loans. Included in total loans are \$82.9 million in loans held for sale at December 31, 2006. At that same date, 49.4% of the Bank's total loans had adjustable interest rates.

Table of Contents

The types of loans that the Bank may originate are subject to federal and state law and regulations. Interest rates charged by the Bank on loans are affected by the demand for such loans and the supply of money available for lending purposes and the rates offered by competitors. These factors are, in turn, affected by, among other things, economic conditions, monetary policies of the Federal government, including the Federal Reserve Board, and legislative tax policies.

The following table sets forth the composition of the Bank's loan portfolio in dollar amounts and as a percentage of the portfolio at the dates indicated.

Total loans receivable	\$ 813,270	\$ 870,929	\$ 1,684,199

Origination, Sale, Servicing and Purchase of Loans. The Bank's residential mortgage lending activities are conducted primarily by commissioned loan representatives in the exclusive employment of the Bank. The Bank originates both adjustable-rate and fixed-rate loans. The type of loan originated is dependent upon the relative customer demand for fixed-rate or adjustable-rate mortgage (ARM) loans, which is affected by the current and expected future level of interest rates. Columbia, as a mortgage banker, sells virtually all loan production except that the Bank may purchase adjustable-rate and fixed-rate mortgage loans originated by Columbia for inclusion in its loan portfolio. Based upon availability and best execution Columbia sells its loan production on both a servicing released and servicing retained basis.

Columbia has entered into loan sale agreements with investors in the normal course of business. The loan sale agreements may require Columbia to repurchase certain loans previously sold in the event of an Early Payment Default, generally defined as the failure by the borrower to make a payment within a designated period early in the loan term. Columbia may also be required to repurchase loans in the event of a breach of a representation or warranty or a misrepresentation during the loan origination process. A portion of Columbia's loan production consists of subprime mortgage loans which are made to individuals whose borrowing needs are generally not fulfilled by traditional financial institutions because they do not satisfy the credit documentation or other underwriting standards prescribed by conventional mortgage lenders and loan buyers. These mortgage loans are generally underwritten to investor specifications, subjected to investor due diligence and subsequently sold to investors. Despite these procedures, the risk of an Early Payment Default and subsequent repurchase of these loans is significantly greater than conventional mortgage loans. For the year ended December 31, 2006, Columbia originated \$728.3 million in total loans, of which \$299.8 million was in subprime loans, representing 41.2% of the total loans it originated. Included in this amount is \$148.2 million of a new subprime loan product which Columbia began offering in 2006. This product provided the borrower with 100% financing relative to the value of the underlying property. During the first quarter of 2007, Columbia discontinued the origination of subprime loans.

For the year ended December 31, 2006 the Company established a reserve for repurchased loans of \$9.6 million related to potential losses on loans sold which may have to be repurchased due to an Early Payment Default or a violation of a misrepresentation or warranty. Provisions for losses are charged to gain on sale of loans and credited to the reserve while actual losses are charged to the reserve. In order to estimate an appropriate reserve for repurchased loans, the Company considers recent and historical experience, product type and volume of recent whole loan sales and the general economic environment. Management believes that the Company has established and maintained the reserve for repurchased loans at adequate levels, however, future adjustments to the reserve may be necessary due to economic, operating or other conditions beyond the Company's control.

Table of Contents

The Bank also periodically sells part of its mortgage production in order to manage interest rate risk and liquidity. See **Loan Servicing**. At December 31, 2006 there were \$82.9 million in loans categorized as held for sale.

The following table sets forth the Bank's loan originations, purchases, sales, principal repayments and loan activity, including loans held for sale, for the periods indicated.

Total loans	\$ 1,791,201	\$ 1,700,098	\$ 1,549,642

One-to-Four Family Mortgage Lending. The Bank offers both fixed-rate, regular amortizing adjustable-rate and interest-only mortgage loans secured by one-to-four family residences with maturities up to 30 years. The majority of such loans are secured by property located in the Bank's primary market area. Loan originations are typically generated by commissioned loan representatives and their contacts within the local real estate industry, members of the local communities and the Bank's existing or past customers.

At December 31, 2006, the Bank's total loans outstanding were \$1.791 billion, of which \$1.232 billion, or 68.8%, were one-to-four family residential mortgage loans, primarily single-family and owner-occupied. To a lesser extent and included in this activity are residential mortgage loans secured by seasonal second homes and non-owner occupied investment properties. The average size of the Bank's one-to-four family mortgage loan was approximately \$184,000 at December 31, 2006. The Bank currently offers a number of ARM loan programs with interest rates which adjust every one-, three-, five- or ten-years. The Bank's ARM loans generally provide for periodic (not less than 2%) and overall (not more than 6%) caps on the increase or decrease in the interest rate at any adjustment date and over the life of the loan. The interest rate on these loans is indexed to the applicable one-, three-, five- or ten-year U.S. Treasury constant maturity yield, with a repricing margin which ranges generally from 2.50% to 3.25% above the index. The Bank also offers three-, five-, seven- and ten-year ARM loans which operate as fixed-rate loans for three, five, seven or ten years and then convert to one-year ARM loans for the remainder of the term. The ARM loans are then indexed to a margin of generally 2.50% to 3.25% above the one-year U.S. Treasury constant maturity yield.

Table of Contents

Generally, ARM loans pose credit risks different than risks inherent in fixed-rate loans, primarily because as interest rates rise, the payments of the borrower rise, thereby increasing the potential for delinquency and default. At the same time, the marketability of the underlying property may be adversely affected by higher interest rates. In order to minimize risks, borrowers of one-year ARM loans with a loan-to-value ratio of 75% or less are qualified at the fully-indexed rate (the applicable U.S. Treasury index plus the margin, rounded to the nearest one-eighth of one percent), and borrowers of one-year ARM loans with a loan-to-value ratio over 75% are qualified at the higher of the fully indexed rate or the initial rate plus the 2% annual interest rate cap. The Bank does not originate ARM loans which provide for negative amortization. The Bank does offer interest-only ARM loans in which the borrower makes only interest payments for the first five, seven or ten years of the mortgage loan term and then convert to a fully amortizing loan until maturity. Borrowers for interest-only ARM loans originated for portfolio are qualified at the fully indexed rate when the loan reprices in less than five years and are qualified at the fully amortized payment when the loan reprices in more than five years. The interest-only feature will result in future increases in the borrower's loan repayment when the contractually required payments increase due to the required amortization of the principal amount. These payment increases could affect a borrower's ability to repay the loan. The amount of interest-only one-to-four family mortgage loans at December 31, 2006 was \$227.0 million.

The Bank's fixed-rate mortgage loans currently are made for terms from 10 to 30 years. The normal terms for fixed-rate loan commitments provide for a maximum of 60 days rate lock upon receipt of a 0.5% to 1.0% fee charged on the mortgage amount which typically becomes non-refundable in the event the loan does not close prior to expiration of the rate lock. The Bank may periodically sell part of the fixed-rate residential mortgage loans that it originates. The Bank retains the servicing on all loans sold. The Bank generally retains for its portfolio shorter term, fixed-rate loans and certain longer term fixed-rate loans, generally consisting of loans to facilitate the sale of Real Estate Owned (REO) and loans to officers, directors or employees of the Bank. The Bank may retain a portion of its longer term fixed-rate loans after considering volume and yield and after evaluating interest rate risk and capital management considerations. The retention of fixed-rate mortgage loans may increase the level of interest rate risk exposure of the Bank, as the rates on these loans will not adjust during periods of rising interest rates and the loans can be subject to substantial increases in prepayments during periods of falling interest rates.

The Bank's policy is to originate one-to-four family residential mortgage loans in amounts up to 80% of the lower of the appraised value or the selling price of the property securing the loan and up to 97% of the appraised value or selling price if private mortgage insurance is obtained (up to 100% for certain Community Reinvestment Act related programs covered by private mortgage insurance). Generally, independent appraisals are obtained for loans secured by real property, however, as allowed by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), under certain defined circumstances, a real estate collateral analysis is obtained instead. The average loan-to-value ratio of the Bank's one-to-four family mortgage loans was 62% at December 31, 2006. Title insurance is required for all first mortgage loans. Mortgage loans originated by the Bank include due-on-sale clauses which provide the Bank with the contractual right to declare the loan immediately due and payable in the event the borrower transfers ownership of the property without the Bank's consent. Due-on-sale clauses are an important means of adjusting the rates on the Bank's fixed-rate mortgage loan portfolio and the Bank has generally exercised its rights under these clauses.

Commercial Real Estate, Multi-Family and Land Lending. The Bank originates commercial real estate loans that are secured by properties, or properties under construction, generally used for business purposes such as small office buildings or retail facilities, the majority of which are located in the Bank's primary market area. The Bank's underwriting procedures provide that commercial real estate loans may

Table of Contents

be made in amounts up to 80% of the appraised value of the property. The Bank currently originates commercial real estate loans with terms of up to twenty five years with fixed or adjustable rates which are indexed to a margin above the corresponding U.S. Treasury constant maturity yield. The loans typically contain prepayment penalties over the initial three to five years. In reaching its decision on whether to make a commercial real estate loan, the Bank considers the net operating income of the property and the borrower's expertise, credit history, profitability and the term and quantity of leases. The Bank has generally required that the properties securing commercial real estate loans have debt service coverage ratios of at least 130%. The Bank typically requires the personal guarantee of the principal borrowers for all commercial real estate loans. The Bank's commercial real estate loan portfolio at December 31, 2006 was \$306.3 million, or 17.1% of total loans. The largest commercial real estate loan in the Bank's portfolio at December 31, 2006 was a performing loan for which the Bank had an outstanding carrying balance of \$8.6 million, secured by a first mortgage on commercial real estate used as a health care facility. The average size of the Bank's commercial real estate loans at December 31, 2006 was approximately \$522,000.

The commercial real estate portfolio includes loans for the construction of commercial properties. Typically, these loans are underwritten based upon commercial leases in place prior to funding. In many cases, commercial construction loans are extended to owners that intend to occupy the property for business operations, in which case the loan is based upon the financial capacity of the related business and the owner of the business. At December 31, 2006, the Bank had an outstanding balance in commercial construction loans of \$20.8 million.

The Bank also originates multi-family mortgage loans and land loans on a limited and highly selective basis. The Bank's multi-family loans and land loans at December 31, 2006, totaled \$3.0 million and \$4.4 million, respectively.

Loans secured by multi-family residential properties are generally larger and involve a greater degree of risk than one-to-four family residential mortgage loans. Because payments on loans secured by multi-family properties are often dependent on successful operation or management of the properties, repayment of such loans may be subject to a greater extent to adverse conditions in the real estate market or the economy. The Bank seeks to minimize these risks through its underwriting policies, which require such loans to be qualified at origination on the basis of the property's income and debt coverage ratio.

Residential Construction Lending. At December 31, 2006, residential construction loans totaled \$13.5 million, or 0.7%, of the Bank's total loans outstanding. The Bank originates residential construction loans primarily on a construction/permanent basis with such loans converting to an amortizing loan following the completion of the construction phase. Most of the Bank's construction loans are made to individuals building their primary residence, while, to a lesser extent, loans are made to finance a second home or to developers known to the Bank in order to build single-family houses for sale, which loans become due and payable over terms generally not exceeding 18 months. The current policy of the Bank is to charge interest rates on its construction loans which float at margins which are generally 0.5% to 2.0% above the prime rate (as published in the *Wall Street Journal*). The Bank's construction loans increase the interest rate sensitivity of its earning assets. At December 31, 2006, the Bank had 21 residential construction loans, with the largest exposure relating to a \$3.5 million performing loan. The Bank may originate construction loans to individuals and contractors on approved building lots in amounts typically no greater than 75% of the appraised value of the land and the building. Once construction is complete, the loans are either paid in full or converted to permanent amortizing loans with maturities similar to the Bank's other one-to-four family mortgage products. The Bank requires an appraisal of the property, credit reports, and financial statements on all principals and guarantors, among other items, for all construction loans.

Table of Contents

Construction lending, by its nature, entails additional risks compared to one-to-four family mortgage lending, attributable primarily to the fact that funds are advanced based upon a security interest in a project which is not yet complete. As a result, construction lending often involves the disbursement of substantial funds with repayment dependent on the success of the ultimate project and the ability of the borrower or guarantor to repay the loan. Because of these factors, the analysis of prospective construction loan projects requires an expertise that is different in significant respects from that which is required for residential mortgage lending. The Bank seeks to address these risks through its underwriting procedures.

Consumer Loans. The Bank also offers consumer loans. At December 31, 2006, the Bank's consumer loans totaled \$190.0 million, or 10.6% of the Bank's total loan portfolio. Of that amount, home equity loans comprised \$116.4 million, or 61.3%; home equity lines of credit comprised \$73.1 million, or 38.5%; loans on savings accounts totaled \$201,000, or 0.1%; and automobile and overdraft line of credit loans totaled \$240,000 or 0.1%.

The Bank originates home equity loans typically secured by second liens on one-to-four family residences. These loans are originated as either adjustable-rate or fixed-rate loans with terms ranging from 5 to 20 years. Home equity loans are typically made on owner-occupied, one-to-four family residences and generally to Bank customers. Generally, these loans are subject to a 80% loan-to-value limitation, including any other outstanding mortgages or liens, although the Bank will also originate loans with loan-to-value limitations of up to 90%, subject to more restrictive underwriting requirements.

The Bank also offers a variable-rate home equity line of credit which extends a credit line based on the applicant's income and equity in the home. Generally, the credit line, when combined with the balance of the first mortgage lien, may not exceed 80% of the appraised value of the property at the time of the loan commitment, although the Bank will also originate loans with loan-to-value limitations of up to 90%, subject to more restrictive underwriting requirements. Home equity lines of credit are secured by a mortgage on the underlying real estate. The Bank presently charges no origination fees for these loans, but may in the future charge origination fees for its home equity lines of credit. The Bank does, however, charge early termination fees should a line of credit be closed within three years of origination. A borrower is required to make monthly payments of principal and interest, at a minimum of \$50, based upon a 10, 15 or 20 year amortization period. The Bank also offers home equity lines of credit which require the payment of interest only during the first five years with fully amortizing payments thereafter. Generally, the adjustable rate of interest charged is based upon the prime rate of interest (as published in the *Wall Street Journal*), although the range of interest rates charged may vary from 1.0% below prime to 1.5% over prime. The loans have an 18% lifetime cap on interest rate adjustments.

Commercial Lending. At December 31, 2006, commercial loans totaled \$49.7 million, or 2.8% of the Bank's total loans outstanding. The Commercial Lending group's primary function is to service the business communities' banking and financing needs in the Bank's primary market area. The Commercial Lending group originates both commercial real estate loans and commercial loans (including loans for working capital; fixed asset purchases; and acquisition, receivable and inventory financing). Credit facilities such as lines of credit and term loans will be used to facilitate these requests. In all cases, the Bank will review and analyze financial history and capacity, collateral value, strength and character of the principals, and general payment history of the borrower and principals in coming to a credit decision. The Bank typically requires the personal guarantee of the principal borrowers for all commercial loans.

A well-defined credit policy has been approved by the Bank's Board of Directors. This policy discourages high risk credits, while focusing on quality underwriting, sound financial strength and close

Table of Contents

monitoring. Commercial business lending, both secured and unsecured, is generally considered to involve a higher degree of risk than secured residential real estate lending. Risk of loss on a commercial business loan is dependent largely on the borrower's ability to remain financially able to repay the loan from ongoing operations. If the Bank's estimate of the borrower's financial ability is inaccurate, the Bank may be confronted with a loss of principal on the loan. The Bank's largest commercial loan at December 31, 2006 was a performing loan with an outstanding balance of \$2.6 million which was secured by a first lien on all corporate assets. The average size of the Bank's commercial loans at December 31, 2006 was approximately \$140,000.

Loan Approval Procedures and Authority. The Board of Directors establishes the loan approval policies of the Bank based on total exposure to the individual borrower. The Board of Directors has authorized the approval of loans with a total exposure of up to \$7.0 million by various officers of the Bank or a management credit committee, on a scale which requires approval by personnel with progressively higher levels of responsibility as the loan amount increases. A minimum of two employees' signatures are required to approve residential loans over conforming loan limits. Loans with a total exposure in excess of \$3.0 million require approval by the Management Credit Committee. Loans with a total exposure in excess of \$7.0 million require approval by the Board of Directors. The Bank's loan approval policies also apply to loans originated by Columbia except as may be otherwise specified by individual investor guidelines with respect to loans originated for sale. The Bank's loan approval policies also delegate approval authority to specified employees at Columbia within assigned exposure limits for loans originated for the Bank's portfolio. Columbia maintains a Credit Policy that establishes the delegated authority levels for loans originated for sale. Pursuant to OTS regulations, loans to one borrower generally cannot exceed 15% of the Bank's unimpaired capital, which at December 31, 2006 amounted to \$19.7 million. At December 31, 2006, the Bank's maximum loan exposure to a single borrower was \$10.7 million, net of participations sold. This relationship consists of nine separate credit facilities and several of the notes have separate and distinct guarantors.

Loan Servicing. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, making inspections as required of mortgaged premises, contacting delinquent borrowers, supervising foreclosures and property dispositions in the event of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. The Bank also services mortgage loans for others. All of the loans currently being serviced for others are loans which have been sold by the Bank. At December 31, 2006, the Bank was servicing \$992.7 million of loans for others. For the years ended December 31, 2006, 2005 and 2004, loan servicing income, net of related amortization and write down of the loan servicing asset, totaled \$515,000, \$280,000 and \$328,000, respectively. The Bank evaluates mortgage servicing rights for impairment on a quarterly basis. The valuation of mortgage servicing rights is determined through a discounted analysis of future cash flows, incorporating numerous assumptions which are subject to significant change in the near term. Generally, a decline in market interest rates will cause expected repayment speeds to increase resulting in a lower valuation for mortgage servicing rights and ultimately lower future servicing fee income.

Delinquencies and Classified Assets. The Board of Directors performs a monthly review of all delinquent loan totals which includes loans sixty days or more past due, and the detail of each loan thirty days or more past due that was originated within the past year. In addition, the Chief Risk Officer compiles a quarterly list of all classified loans and a narrative report of classified commercial, commercial real estate, multi-family, land and construction loans. The steps taken by the Bank with respect to delinquencies vary depending on the nature of the loan and period of delinquency. When a borrower fails to make a required payment on a loan, the Bank takes a number of steps to have the borrower cure the delinquency and restore the loan to current status. The Bank generally sends the borrower a written notice of non-payment after the loan is first past due. In the event payment is not then

Table of Contents

received, additional letters and phone calls generally are made. If the loan is still not brought current and it becomes necessary for the Bank to take legal action, which typically occurs after a loan is delinquent at least 90 days or more, the Bank will commence foreclosure proceedings against any real property that secures the loan. If a foreclosure action is instituted and the loan is not brought current, paid in full, or an acceptable workout accommodation is not agreed upon before the foreclosure sale, the real property securing the loan generally is sold at foreclosure.

The Bank's Internal Asset Classification Committee, which is chaired by the Chief Risk Officer who reports directly to the Audit Committee of the Board of Directors, reviews and classifies the Bank's assets quarterly and reports the results of its review to the Board of Directors. The Bank classifies assets in accordance with certain regulatory guidelines established by the OTS which are applicable to all savings institutions. At December 31, 2006, the Bank had \$8.2 million of assets, including all REO, classified as Substandard, \$185,000 of assets classified as Doubtful and no assets classified as Loss. Loans and other assets may also be placed on a watch list as Special Mention assets. Assets which do not currently expose the insured institution to sufficient risk to warrant classification in one of the aforementioned categories but possess weaknesses are required to be designated Special Mention. Special Mention assets totaled \$18.2 million at December 31, 2006. Loans are classified as Special Mention due to past delinquencies or other identifiable weaknesses. The Substandard classification includes \$4.6 million of commercial loans, the largest being a \$2.6 million relationship for the construction of townhouses. The loans in the relationship are delinquent from 60 to 90 days and the project has experienced construction delays. The loans are secured by residential real estate. The Special Mention classification includes one relationship for \$7.8 million which was fully repaid in January 2007. The second largest Special Mention relationship was a \$4.5 million credit to a real estate agency which was current as to payments, but classified due to declining revenue and net income of the borrower. The loan is secured by commercial real estate, corporate assets and the personal guarantees of the principals.

Non-Accrual Loans and REO

The following table sets forth information regarding non-accrual loans and REO. The Bank had no troubled-debt restructured loans and one REO property at December 31, 2006. It is the policy of the Bank to cease accruing interest on loans 90 days or more past due or in the process of foreclosure. For the years ended December 31, 2006, 2005, 2004, 2003 and 2002, respectively, the amount of interest income that would have been recognized on non-accrual loans if such loans had continued to perform in accordance with their contractual terms was \$189,000, \$115,000, \$128,000, \$96,000, and \$87,000.

Table of Contents

	2006	2005	December 31, 2004	2003	2002
	(Dollars in thousands)				
Non-accrual loans:					
Real estate:

Total non-performing assets	\$ 4,813	\$ 1,873	\$ 3,776	\$ 2,414	\$ 2,829
Allowance for loan losses as a percent of total loans receivable (2)	.57%	.62%	.69%	.75%	.71%
Allowance for loan losses as a percent of total non-performing loans (3)	226.25	655.80	306.42	499.63	374.78
Non-performing loans as a percent of total loans receivable (2)(3)	.25	.09	.23	.15	.19
Non-performing assets as a percent of total assets (3)	.23	.09	.20	.14	.16

(1) REO balances are shown net of related loss allowances.

(2) Total loans includes loans receivable and mortgage loans held for sale.

(3) Non-performing assets consist of non-performing loans and REO. Non-performing loans consist of all loans 90 days or more past due and other loans in the process of foreclosure.

Allowance for Loan Losses. The allowance for loan losses is a valuation account that reflects probable incurred losses in the loan portfolio based on management's evaluation of the risks inherent in its loan portfolio and the general economy. The Bank maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.

The allowance for loan losses is maintained at an amount management considers sufficient to provide for probable losses based on evaluating known and inherent risks in the loan portfolio resulting from management's continuing analysis of the factors underlying the quality of the loan portfolio. These factors include changes in the size and composition of the loan portfolio, actual loan loss experience, current economic conditions, detailed analysis of individual loans for which full collectibility may not be assured, and the determination of the existence and realizable value of the collateral and guarantees securing the loan.

The Bank's allowance for loan losses consists of a specific allowance and a general allowance, each updated on a quarterly basis. A specific allowance is determined for all assets classified as Substandard,

Table of Contents

Doubtful or Loss where the value of the underlying collateral can reasonably be evaluated; generally those loans secured by real estate. The Bank obtains an updated appraisal whenever a loan secured by real estate becomes 90 days delinquent. The specific allowance represents the difference between the Bank's recorded investment in the loan and the fair value of the collateral, less estimated disposal costs. A general allowance is determined for all other classified and non-classified loans. In determining the level of the general allowance, the Bank segments the loan portfolio into various risk tranches based on type of loan (mortgage, consumer and commercial); and certain underwriting characteristics. An estimated loss factor is then applied to each risk tranche. The loss factors are determined based upon historical loan loss experience, current economic conditions, underwriting standards, internal loan review results and other factors.

An overwhelming percentage of the Bank's loan portfolio, whether one-to-four family, consumer or commercial, is secured by real estate. Additionally, most of the Bank's borrowers are located in Ocean and Monmouth Counties, New Jersey and the surrounding area. These concentrations may adversely affect the Bank's loan loss experience should local real estate values decline or should the markets served experience an adverse economic shock.

Management believes the primary risks inherent in the portfolio are possible increases in interest rates, a decline in the economy, generally, and a decline in real estate market values. Any one or a combination of these events may adversely affect the borrowers' ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Bank has provided for loan losses at the current level to address the current risk in the loan portfolio.

Although management believes that the Bank has established and maintained the allowance for loan losses at adequate levels to reserve for inherent losses probable in its loan portfolio, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance for loan losses. Such agencies may require the Bank to make additional provisions for loan losses based upon information available to them at the time of their examination. Although management uses the best information available, future adjustments to the allowance for loan losses may be necessary due to economic, operating, regulatory and other conditions beyond the Bank's control.

As of December 31, 2006 and 2005, the Bank's allowance for loan losses was .57% and .62%, respectively, of total loans. The Bank had non-accrual loans of \$4.5 million and \$1.6 million at December 31, 2006 and 2005, respectively. The Bank will continue to monitor and modify its allowance for loan losses as conditions dictate.

Table of Contents

The following table sets forth activity in the Bank's allowance for loan losses for the periods set forth in the table.

	2006	2005	At or for the Year Ended 2004	2003	2002
			(Dollars in thousands)

Investment Activities

Federally-chartered savings institutions have the authority to invest in various types of liquid assets, including United States Treasury obligations, securities of various Federal agencies, certificates of deposit of insured banks and savings institutions, bankers' acceptances, repurchase agreements and Federal funds. Subject to various restrictions, Federally-chartered savings institutions may also invest in commercial paper, investment-grade corporate debt securities and mutual funds whose assets conform to the investments that a Federally-chartered savings institution is otherwise authorized to make directly.

The investment policy of the Bank as established by the Board of Directors attempts to provide and maintain liquidity, generate a favorable return on investments without incurring undue interest rate and credit risk, and complement the Bank's lending activities. Specifically, the Bank's policies generally limit investments to government and Federal agency-backed securities and other non-government guaranteed securities, including corporate debt obligations, that are investment grade. The Bank's policies provide that all investment purchases must be approved by two officers (either the Vice President/Treasurer, Executive Vice President/Chief Financial Officer or the President/Chief Executive Officer) and must be ratified by the Board of Directors.

Investment and mortgage-backed securities identified as held to maturity are carried at cost, adjusted for amortization of premium and accretion of discount, which are recognized as adjustments to interest income. Management determines the appropriate classification of securities at the time of purchase. If the Bank has the intent and the ability at the time of purchase to hold securities until maturity, they are classified as held to maturity. Securities to be held for indefinite periods of time, but not necessarily to maturity are classified as available for sale. Securities available for sale include securities that management intends to use as part of its asset/liability management strategy. Such securities are carried at fair value and unrealized gains and losses, net of related tax effect, are excluded from earnings, but are included as a separate component of stockholders' equity. At December 31, 2006, all of the Bank's investment and mortgage-backed securities were classified as available for sale.

Mortgage-backed Securities. Mortgage-backed securities represent a participation interest in a pool of single-family or multi-family mortgages, the principal and interest payments on which, in general, are passed from the mortgage originators, through intermediaries that pool and repackage the participation interests in the form of securities, to investors such as the Bank. Such intermediaries may be private issuers, or agencies including FHLMC, FNMA and the Government National Mortgage Association (GNMA) that guarantee the payment of principal and interest to investors. Mortgage-backed securities typically are issued with stated principal amounts, and the securities are backed by pools of mortgages that have loans with interest rates that are within a certain range and with varying maturities. The underlying pool of mortgages can be composed of either fixed-rate or ARM loans.

The actual maturity of a mortgage-backed security varies, depending on when the mortgagors repay or prepay the underlying mortgages. Prepayments of the underlying mortgages may shorten the life of the security, thereby affecting its yield to maturity and the related market value of the mortgage-backed security. The prepayments of the underlying mortgages depend on many factors, including the type of mortgages, the coupon rates, the age of mortgages, the geographical location of the underlying real estate collateralizing the mortgages, the general levels of market interest rates, and general economic conditions. GNMA mortgage-backed securities that are backed by assumable Federal Housing Authority (FHA) or Department of Veterans Affairs (VA) loans generally have a longer life than conventional non-assumable loans underlying FHLMC and FNMA mortgage-backed securities. During periods of falling mortgage interest rates, prepayments generally increase, as opposed to periods of increasing

Table of Contents

interest rates when prepayments generally decrease. If the interest rate of underlying mortgages significantly exceeds the prevailing market interest rates offered for mortgage loans, refinancing generally increases and accelerates the prepayment of the underlying mortgages. Prepayment experience is more difficult to estimate for adjustable-rate mortgage-backed securities.

The Bank has investments in mortgage-backed securities and has utilized such investments to complement its lending activities. The Bank invests in a large variety of mortgage-backed securities, including ARM, balloon and fixed-rate mortgage-backed securities, the majority of which are directly insured or guaranteed by FHLMC, FNMA and GNMA. At December 31, 2006, mortgage-backed securities totaled \$68.4 million, or 3.3% of total assets.

The following table sets forth the Bank's mortgage-backed securities activities for the periods indicated.

	For the Year Ended December 31,		
	2006	2005	2004
	(In thousands)		
Beginning balance	\$ 85,025	\$ 124,478	\$ 86,938
Mortgage-backed securities purchased	6,439	7,704	82,844

Table of Contents

The table below sets forth certain information regarding the amortized cost, weighted average yields and contractual maturities, excluding scheduled principal amortization, of the Bank's investment and mortgage-backed securities, excluding equity securities, as of December 31, 2006. Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	At December 31, 2006					Total
	More than One		More than Five	More than Ten		
	One Year or Less	Year to Five Years	Years to Ten Years	Years		
	Amortized Cost	Amortized Cost	Amortized Cost	Amortized Cost	Amortized Cost	Estimated Market Value
			(Dollars in thousands)			
Investment securities:						
U.S. agency obligations		\$ 290		\$	\$ 290	\$ 289
State and municipal obligations (1)				1,747	1,747	1,768
Corporate debt securities (2)				75,655	75,655	74,060
Total investment securities		\$ 290		\$ 77,402	\$ 77,692	\$ 76,117
Weighted average yield		4.91%		6.19%	6.19%

(1) State and municipal obligations are reported at tax equivalent yield.

(2) All of the Bank's corporate debt securities with maturities over one year carry interest rates which adjust to a spread over LIBOR on a quarterly basis.

Table of Contents**Sources of Funds**

General. Deposits, loan and mortgage-backed securities repayments and prepayments, proceeds from sales of loans, investment maturities, cash flows generated from operations and FHLB advances and other borrowings are the primary sources of the Bank's funds for use in lending, investing and for other general purposes.

Deposits. The Bank offers a variety of deposit accounts with a range of interest rates and terms. The Bank's deposits consist of money market accounts, savings accounts, interest-bearing checking accounts, non-interest bearing accounts and time deposits. For the year ended December 31, 2006, time deposits constituted 38.9% of total average deposits. The flow of deposits is influenced significantly by general economic conditions, changes in money market rates, prevailing interest rates and competition. The Bank's deposits are obtained predominantly from the areas in which its branch offices are located. The Bank relies on its community-banking focus stressing customer service and long-standing relationships with customers to attract and retain these deposits; however, market interest rates and rates offered by competing financial institutions significantly affect the Bank's ability to attract and retain deposits. The Bank does not currently use brokers to obtain deposits.

The following table presents the deposit activity of the Bank for the periods indicated:

	For the Year Ended December 31,		
	2006	2005	2004
	(In thousands)		
Net (withdrawals) deposits	\$ (16,844)	\$ 63,919	\$ 111,765
Interest credited on deposit accounts	32,604	22,114	14,565
Total increase in deposit accounts	\$ 15,760	\$ 86,033	\$ 126,330

At December 31, 2006, the Bank had \$143.1 million in time deposits in amounts of \$100,000 or more maturing as follows:

Maturity Period	Weighted	
	Amount	Average Rate
	(Dollars in thousands)	
Three months or less	\$ 78,085	4.92%
Over three through six months	24,052	4.67
Over six through 12 months	23,138	4.85
Over 12 months	17,833	4.12
Total	\$ 143,108	4.77

The following table sets forth the distribution of the Bank's average deposit accounts and the average rate paid on those deposits for the periods indicated.

	For the Years Ended December 31,

Table of Contents

Borrowings. From time-to-time the Bank has obtained term advances from the Federal Home Loan Bank of New York (FHLB-NY) as an alternative to retail deposit funds and may do so in the future as part of its operating strategy. FHLB-NY term advances may also be used to acquire certain other assets as may be deemed appropriate for investment purposes. These term advances are collateralized primarily by certain of the Bank's mortgage loans and investment and mortgage-backed securities and secondarily by the Bank's investment in capital stock of the FHLB-NY. In addition, the Bank has an available overnight line of credit with the FHLB-NY for \$100 million which expires July 31, 2007. The Bank also has available from the FHLB-NY a one-month, overnight repricing line of credit for \$100 million which also expires on July 31, 2007. The Bank expects both lines to be renewed upon expiration. When utilized, both lines carry a floating interest rate of 10-15 basis points over the current Federal funds rate and are secured by the Bank's mortgage loans, mortgage-backed securities, U.S. Government and agency securities and FHLB-NY stock. The maximum amount that the FHLB-NY will advance to member institutions, including the Bank, fluctuates from time to time in accordance with the policies of the OTS and the FHLB-NY. At December 31, 2006, the Bank had \$42.5 million borrowed under the FHLB-NY lines of credit and \$388.0 million under various term advances.

The Bank also borrows funds using securities sold under agreements to repurchase. Under this form of borrowing specific U.S. Government agency, corporates and/or mortgage-backed securities are pledged as collateral to secure the borrowing. These pledged securities are held by a third party custodian. At December 31, 2006, the Bank had borrowed \$85.0 million through securities sold under agreements to repurchase.

Subsidiary Activities

At December 31, 2006 the Bank owned three subsidiaries Columbia Home Loans, LLC, OceanFirst Services, LLC and OceanFirst REIT Holdings, Inc.

Columbia Home Loans, LLC was acquired by the Bank on August 18, 2000 and operates as a mortgage banking subsidiary based in Westchester County, New York. Columbia originates, sells and services a full product line of residential mortgage loans primarily in New York and New Jersey. Loans are originated through retail branches and a network of independent mortgage brokers and, to a lesser extent direct Internet sales. Columbia sells virtually all loan production in the secondary market or, to a lesser extent, the Bank.

OceanFirst Services, LLC was originally organized in 1982 under the name Dome Financial Services, Inc., to engage in the sale of all-savers life insurance. Prior to 1998 the subsidiary was inactive, however, in 1998, the Bank began to sell non-deposit investment products (annuities, mutual funds and insurance) through a third-party marketing firm to Bank customers through this subsidiary, recognizing fee income from such sales. OFB Reinsurance, Ltd., was established in 2002 as a subsidiary of OceanFirst Services, LLC to reinsure a percentage of the private mortgage insurance risks on one-to-four family residential mortgages originated by the Bank and Columbia.

OceanFirst REIT Holdings, Inc., was established in 2001 and acts as the holding company for OceanFirst Realty Corp. OceanFirst Realty Corp. was established in 1997 and is intended to qualify as a real estate investment trust, which may, among other things, be utilized by the Company to raise capital in the future. Upon formation of OceanFirst Realty Corp., the Bank transferred \$668 million of mortgage loans to this subsidiary.

Table of Contents

Personnel

As of December 31, 2006, the Bank had 445 full-time employees and 68 part-time employees. The employees are not represented by a collective bargaining unit and the Bank considers its relationship with its employees to be good.

REGULATION AND SUPERVISION

General

As a savings and loan holding company, the Company is required by Federal law to file reports with, and otherwise comply with, the rules and regulations of the OTS. The Bank is subject to extensive regulation, examination and supervision by the OTS, as its primary Federal regulator, and the FDIC, as the deposit insurer. The Bank is a member of the Federal Home Loan Bank System and, with respect to deposit insurance, of the Deposit Insurance Fund managed by the FDIC. The Bank must file reports with the OTS and the FDIC concerning its activities and financial condition in addition to obtaining regulatory approvals prior to entering into certain transactions such as mergers with, or acquisitions of, other savings institutions. The OTS and/or the FDIC conduct periodic examinations to test the Bank's safety and soundness and compliance with various regulatory requirements. This regulation and supervision establishes a comprehensive framework of activities in which an institution can engage and is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such regulatory requirements and policies, whether by the OTS, the FDIC or the Congress, could have a material adverse impact on the Company, the Bank and their operations. Certain of the regulatory requirements applicable to the Bank and to the Company are referred to below or elsewhere herein. The description of statutory provisions and regulations applicable to savings institutions and their holding companies set forth in this Form 10-K does not purport to be a complete description of such statutes and regulations and their effects on the Bank and the Company and is qualified in its entirety by reference to the actual laws and regulations involved.

Holding Company Regulation

The Company is a nondiversified unitary savings and loan holding company within the meaning of Federal law. Under prior law, a unitary savings and loan holding company, such as the Company, was not generally restricted as to the types of business activities in which it may engage, provided that the Bank continued to be a qualified thrift lender (QTL). See Federal Savings Institution Regulation - QTL Test. The Gramm-Leach-Bliley Act of 1999 provides that no company may acquire control of a savings association after May 4, 1999 unless it engages only in the financial activities permitted for financial holding companies under the law or for multiple savings and loan holding companies as described below. Further, the Gramm-Leach-Bliley Act specifies that existing savings and loan holding companies may only engage in such activities. The Gramm-Leach-Bliley Act, however, grandfathered the unrestricted authority for activities with respect to unitary savings and loan holding companies existing prior to May 4, 1999, such as the Company, so long as the Bank continues to comply with the QTL test. The Company qualifies for the grandfather provision. Upon any non-supervisory acquisition by the Company of another savings institution or savings bank that meets the QTL test and is deemed to be a savings institution by the OTS, the Company would become a multiple savings and loan holding company (if the acquired institution is held as a separate subsidiary) and would generally be limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the OTS, and certain activities authorized by OTS regulation. However, the OTS has issued an interpretation concluding that multiple savings and loan holding companies may also engage in activities permitted for financial holding companies.

A savings and loan holding company is prohibited from, directly or indirectly, acquiring more than 5% of

Table of Contents

the voting stock of another savings institution or savings and loan holding company without prior written approval of the OTS and from acquiring or retaining control of a depository institution that is not insured by the FDIC. In evaluating applications by holding companies to acquire savings institutions, the OTS considers the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the deposit insurance funds, the convenience and needs of the community and competitive factors.

The OTS may not approve any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions: (i) the approval of interstate supervisory acquisitions by savings and loan holding companies and (ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Although savings and loan holding companies are not subject to specific capital requirements or specific restrictions on the payment of dividends or other capital distributions, Federal regulations do prescribe such restrictions on subsidiary savings institutions as described below. The Bank must notify the OTS 30 days before declaring any dividend to the Company. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the OTS which has the authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution.

Acquisition of the Company. Under the Federal Change in Bank Control Act (CBCA) and OTS regulations, a notice must be submitted to the OTS if any person (including a company), or group acting in concert, seeks to acquire 10% or more of the Company's outstanding voting stock, unless the OTS has found that the acquisition will not result in a change of control of the Company. Under CBCA, the OTS has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that so acquires control would then be subject to regulation as a savings and loan holding company.

Federal Savings Institution Regulation

Business Activities. The activities of Federal savings institutions are governed by Federal law and regulations. These laws and regulations delineate the nature and extent of the activities in which Federal savings banks may engage. In particular, many types of lending authority for Federal savings banks, e.g., commercial, non-residential real property loans and consumer loans, are limited to a specified percentage of the institution's capital or assets.

Capital Requirements. The OTS capital regulations require savings institutions to meet three minimum capital standards: a 1.5% tangible capital ratio, a 4% leverage ratio (3% for institutions receiving the highest rating on the CAMELS examination rating system) and an 8% risk-based capital ratio. In addition, the prompt corrective action standards discussed below also establish, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio (3% for institutions receiving the highest rating on the CAMELS examination rating system), and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. The OTS regulations also require that, in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

The risk-based capital standard for savings institutions requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet activities, are multiplied by a risk-weight factor of 0% to 100%, assigned by the OTS capital regulation based on the risks believed inherent in the type of asset. Core (Tier 1) capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual

Table of Contents

preferred stock and related surplus, and minority interests in equity accounts of consolidated subsidiaries less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and up to 45% of unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital. The OTS has authority to establish individual minimum capital requirements in cases where it is determined that a particular institution's capital level is, or may, become inadequate in light of the circumstances involved.

The following table presents the Bank's capital position at December 31, 2006. The Bank met each of its capital requirements at that date.

	Actual	Required	Excess	Actual	Capital Required
	Capital	Capital	Amount	Percent	Percent
	(Dollars in thousands)				
Tangible	\$ 131,643	\$ 31,109	\$ 100,534	6.35%	1.50%
Core (Leverage)	131,643	62,218	69,425	6.35	3.00
Risk-based	141,416	107,939	33,477	10.48	8.00

Prompt Corrective Regulatory Action. The OTS is required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, a savings institution that has a ratio of total capital to risk-weighted assets of less than 8%, a ratio of Tier 1 (core) capital to risk-weighted assets of less than 4% or a ratio of core capital to total assets of less than 4% (3% or less for institutions with the highest examination rating) is considered to be undercapitalized. A savings institution that has a total risk-based capital ratio less than 6%, a Tier 1 capital ratio of less than 3% or a leverage ratio that is less than 3% is considered to be significantly undercapitalized and a savings institution that has a tangible capital to assets ratio equal to or less than 2% is deemed to be critically undercapitalized. Subject to a narrow exception, the OTS is required to appoint a receiver or conservator for an institution that is critically undercapitalized. The regulation also provides that a capital restoration plan must be filed with the OTS within 45 days of the date a savings institution receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Compliance with the plan must be guaranteed by any parent holding company. In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. The OTS could also take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors. Significantly and critically undercapitalized institutions are subject to additional mandatory and discretionary measures.

Insurance of Deposit Accounts. The Bank is a member of the Deposit Insurance Fund. The FDIC maintains a risk-based assessment system by which institutions are assigned to one of three categories based on their capitalization and one of three subcategories based on examination ratings and other supervisory information. An institution's assessment rate depends upon the categories to which it is assigned. Assessment rates for member institutions are determined semiannually by the FDIC and currently range from zero basis points of assessable deposits for the healthiest institutions to 27 basis points for the riskiest.

Table of Contents

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation (FICO) to recapitalize the predecessor to the Savings Association Insurance Fund. During 2006, FICO payments approximated 1.28 basis points.

The Bank's assessment rate for fiscal 2006 was zero basis points and the total assessments paid for this period (including the FICO assessment) was \$177,000. The FDIC has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OTS. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Federal Deposit Insurance Reform Act of 2005. As a result of the Federal Deposit Insurance Reform Act of 2005, the Bank Insurance Fund and Savings Association Insurance Fund have been merged into a new combined fund, called the Deposit Insurance Fund. The Federal Deposit Insurance Reform Act also (i) increases deposit insurance coverage for retirement accounts to \$250,000, (ii) indexes the current \$100,000 insurance coverage limit for standard accounts and the new \$250,000 limit for retirement accounts to reflect inflation (with adjustments for inflation every five years, commencing January 1, 2011, (iii) requires the Federal Deposit Insurance Corporation to assess annual deposit insurance premiums on all banks and savings institutions, (iv) gives a one-time insurance assessment credit totaling \$4.7 billion to banks and savings institutions in existence on December 31, 1996 that can be used to offset premiums otherwise due, (v) imposes a cap on the level of the Deposit Insurance Fund and provides for dividends or rebates when the fund grows beyond a specified threshold, (vi) adopts a historical basis concept for distributing the aforementioned one-time credit and dividends (with each institution's historical basis to be determined by a formula that looks back to the institution's assessment base in 1996 and adds premiums paid since that time) and (vii) authorizes revisions to the current risk-based system for assessing premiums, including replacing the current fixed reserve ratio requirement of 1.25% with a range of between 1.15% and 1.5% of insured deposits. Because of assessment credits the Federal Deposit Insurance Reform Act is not expected to have a significant impact on the Bank's operations during 2007, although insurance premiums may increase in future periods.

Loans to One Borrower. Federal law provides that savings institutions are generally subject to the limits on loans to one borrower applicable to national banks. Subject to certain exceptions, a savings institution may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of its unimpaired capital and surplus. An additional amount may be lent, equal to 10% of unimpaired capital and surplus, if secured by specified readily-marketable collateral. At December 31, 2006, the Bank's limit on loans to one borrower was \$19.7 million, and the Bank's largest aggregate outstanding balance of loans to one borrower was \$10.7 million.

OTL Test. The Home Owners Loan Act requires savings institutions to meet a qualified thrift lender test. Under the test, a savings association is required to either qualify as a domestic building and loan association under the Internal Revenue Code or maintain at least 65% of its portfolio assets (total assets less: (1) specified liquid assets up to 20% of total assets; (2) intangibles, including goodwill; and (3) the value of property used to conduct business) in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed securities) in at least nine months out of each 12 month period. Additionally, education loans, credit card loans and small business loans may be considered qualified thrift investments.

A savings institution that fails the qualified thrift lender test is subject to certain operating restrictions and may be required to convert to a bank charter. As of December 31, 2006, the Bank met the qualified thrift lender test.

Table of Contents

Limitation on Capital Distributions. OTS regulations impose limitations upon all capital distributions by a savings institution, including cash dividends, payments to repurchase its shares and payments to shareholders of another institution in a cash-out merger. Under the regulations, an application to and the approval of the OTS is required prior to any capital distribution if the institution does not meet the criteria for expedited treatment of applications under OTS regulations (*i.e.*, generally, examination ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the institution would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the OTS. If an application is not required, the institution must still provide prior notice to the OTS of the capital distribution if, like the Bank, it is a subsidiary of a holding company. In the event the Bank's capital fell below its regulatory requirements or the OTS notified it that it was in need of more than normal supervision, the Bank's ability to make capital distributions could be restricted. In addition, the OTS could prohibit a proposed capital distribution by any institution, which would otherwise be permitted by the regulation, if the OTS determines that such distribution would constitute an unsafe or unsound practice. The OTS has notified the Bank that it does not object to the payment of capital dividends, so long as the Bank remains well capitalized after each capital distribution, and also maintains a tier one core leverage ratio above 6.0% and a total risk-based capital ratio above 10.5% after each capital distribution.

Assessments. Savings institutions are required to pay assessments to the OTS to fund the agency's operations. The assessments, paid on a semi-annual basis, are based upon the institution's total assets, including consolidated subsidiaries as reported in the Bank's latest quarterly thrift financial report. The assessments paid by the Bank for the fiscal year ended December 31, 2006 totaled \$364,000.

Transactions with Related Parties. The Bank's authority to engage in transactions with affiliates (*e.g.*, any company that controls or is under common control with an institution, including the Company and its non-savings institution subsidiaries) is limited by Federal law. The aggregate amount of covered transactions with any individual affiliate is limited to 10% of the capital and surplus of the savings institution. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings institution's capital and surplus. Certain transactions with affiliates are required to be secured by collateral in an amount and of a type described in Federal law. The purchase of low quality assets from affiliates is generally prohibited. The transactions with affiliates must be on terms and under circumstances, that are at least as favorable to the institution as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings institution may purchase the securities of any affiliate other than a subsidiary.

The Sarbanes-Oxley Act of 2002, generally prohibits loans by the Company to its executive officers and directors. However, the Act contains a specific exemption for loans from the Bank to its executive officers and directors in compliance with Federal banking laws. Under such laws, the Bank's authority to extend credit to executive officers, directors and 10% shareholders (insiders), as well as entities such persons control, is limited. The law limits both the individual and aggregate amount of loans the Bank may make to insiders based, in part, on the Bank's capital position and requires certain board approval procedures to be followed. Such loans must not involve more than the normal risk of repayment and are required to be made on terms substantially the same as those offered to unaffiliated individuals, except for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. Loans to executive officers are subject to additional restrictions.

Enforcement. The OTS has primary enforcement responsibility over savings institutions and has the authority to bring actions against the institution and all institution-affiliated parties, including stockholders, and any attorneys, appraisers and accountants who knowingly or recklessly participate in

Table of Contents

wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order to removal of officers and/or directors to the institution of receivership, conservatorship or termination of deposit insurance. Civil penalties cover a wide range of violations and can amount to \$25,000 per day, or even \$1 million per day in especially egregious cases. The FDIC has the authority to recommend to the Director of the OTS that enforcement action be taken with respect to a particular savings institution. If action is not taken by the Director, the FDIC has authority to take such action under certain circumstances. Federal law also establishes criminal penalties for certain violations.

Standards for Safety and Soundness. The Federal banking agencies have adopted Interagency Guidelines prescribing Standards for Safety and Soundness. The guidelines set forth the safety and soundness standards that the Federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the OTS determines that a savings institution fails to meet any standard prescribed by the guidelines, the OTS may require the institution to submit an acceptable plan to achieve compliance with the standard.

Federal Home Loan Bank System

The Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional FHLBs. Each FHLB provides member institutions with a central credit facility. The Bank, as a member of the FHLB-NY is required to acquire and hold shares of capital stock in that FHLB in an amount at least equal to .20% of mortgage related assets and 4.5% of the specified value of certain transactions with the FHLB. The Bank was in compliance with this requirement with an investment in FHLB-NY stock at December 31, 2006 of \$25.3 million.

The FHLBs are required to provide funds for the previous resolution of insolvent thrifts and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the FHLBs pay to their members and could also result in the FHLB imposing a higher rate of interest on advances to their members. If dividends were reduced, or interest on future FHLB advances increased, the Bank's net interest income would likely also be reduced.

Federal Reserve System

The Federal Reserve Board regulations require savings institutions to maintain non-interest earning reserves against their transaction accounts (primarily interest-bearing checking and regular checking accounts). The regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$45.8 million; a 10% reserve ratio is applied above \$45.8 million. The first \$8.5 million of otherwise reservable balances (subject to adjustments by the Federal Reserve Board) are exempt from the reserve requirements. The amounts are adjusted annually. The Bank complies with the foregoing requirements.

FEDERAL AND STATE TAXATION

Federal Taxation

General. The Company and the Bank report their income on a calendar year basis using the accrual method of accounting, and are subject to Federal income taxation in the same manner as other corporations with some exceptions, including particularly the Bank's reserve for bad debts discussed below. The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to the Bank or the Company. The Bank has not been audited by the IRS in over 10 years. For its 2006 taxable year, the Bank is subject to a maximum Federal income tax rate of 35.0%.

Table of Contents

Distributions. Under the 1996 Act, if the Bank makes non-dividend distributions to the Company, such distributions will be considered to have been made from the Bank's unrecaptured tax bad debt reserves (including the balance of its reserves as of December 31, 1987) to the extent thereof, and then from the Bank's supplemental reserve for losses on loans, to the extent thereof, and an amount based on the amount distributed (but not in excess of the amount of such reserves) will be included in the Bank's income. Non-dividend distributions include distributions in excess of the Bank's current and accumulated earnings and profits, as calculated for Federal income tax purposes, distributions in redemption of stock, and distributions in partial or complete liquidation. Dividends paid out of the Bank's current or accumulated earnings and profits will not be so included in the Bank's income.

The amount of additional taxable income triggered by a non-dividend is an amount that, when reduced by the tax attributable to the income, is equal to the amount of the distribution. Thus, if the Bank makes a non-dividend distribution to the Company, approximately one and one-half times the amount of such distribution (but not in excess of the amount of such reserves) would be includable in income for Federal income tax purposes, assuming a 35% Federal corporate income tax rate. The Bank does not intend to pay dividends that would result in a recapture of any portion of its bad debt reserves.

Corporate Alternative Minimum Tax. The Internal Revenue Code of 1986, as amended (the Code) imposes a tax on alternative minimum taxable income (AMTI) at a rate of 20%. The excess of the bad debt reserve deduction using the percentage of taxable income method over the deduction that would have been allowable under the experience method is treated as a preference item for purposes of computing the AMTI. Only 90% of AMTI can be offset by net operating loss carryovers of which the Bank currently has none. AMTI is increased by an amount equal to 75% of the amount by which the Bank's adjusted current earnings exceeds its AMTI (determined without regard to this preference and prior to reduction for net operating losses). The Bank does not expect to be subject to the AMTI.

Dividends Received Deduction and Other Matters. The Company may exclude from its income 100% of dividends received from the Bank as a member of the same affiliated group of corporations. The corporate dividends received deduction is generally 70% in the case of dividends received from unaffiliated corporations with which the Company and the Bank will not file a consolidated tax return, except that if the Company or the Bank own more than 20% of the stock of a corporation distributing a dividend then 80% of any dividends received may be deducted.

State and Local Taxation

New Jersey Taxation. The Bank files New Jersey income tax returns. For New Jersey income tax purposes, savings institutions were previously taxed at a rate equal to 3% of taxable income. On July 2, 2002, the New Jersey legislature passed the New Jersey Business Tax Reform Act (the Tax Reform Act). The legislation increased the tax rate on savings institutions, such as the Bank, from 3% to 9% of taxable income. The legislation was retroactive to January 1, 2002. For this purpose, taxable income generally means Federal taxable income, subject to certain adjustments (including addition of interest income on State and municipal obligations).

The Tax Reform Act also provided for an Alternative Minimum Assessment (AMA) tax based on the larger of gross receipts or gross profits, as defined.

The Company is required to file a New Jersey income tax return because it does business in New Jersey. For New Jersey tax purposes, regular corporations are presently taxed at a rate equal to 9% of taxable income. However, if the Company meets certain requirements, it may be eligible to elect to be taxed as a New Jersey Investment Company at a tax rate presently equal to 3.60% (40% of 9%) of taxable income.

On February 6, 2006, the State of New Jersey published regulations to disallow the dividends received deduction for the direct receipt of a dividend from a Real Estate Investment Trust (REIT) to its corporate parent. The regulation will apply to dividends paid on and after February 6, 2006. The

Table of Contents

regulation may cause the Company's effective state tax rate to increase by approximately 3.6% (2.34% after federal benefit), however, the Company may be able to employ alternative tax planning strategies to mitigate this increase.

New York Taxation. The Bank is subject to New York State income tax. The tax is measured by the entire net income which is Federal taxable income with adjustments.

Delaware Taxation. As a Delaware holding company not earning income in Delaware, the Company is exempted from Delaware corporate income tax but is required to file an annual report with and pay an annual franchise tax to the State of Delaware.

Item 1A. Risk Factors

Rising interest rates may hurt profits. Interest rates were recently at historically low levels. However, from mid 2004 through mid 2006, the Federal Reserve has increased its target for the Federal funds rate seventeen times. If short-term interest rates continue to rise or if the yield curve remains flat or inverted, and if rates on deposits and borrowings reprice upwards faster than the rates on loans and investments, the Company would experience compression of its interest rate spread and net interest margin, which would have a negative effect on profitability.

Increased emphasis on commercial lending may expose the Bank to increased lending risks. At December 31, 2006, \$356.0 million, or 19.9%, of the Bank's total loans consisted of commercial, multi-family and land real estate loans, and commercial business loans. This portfolio has grown in recent years and the Bank intends to continue to emphasize these types of lending. These types of loans generally expose a lender to greater risk of non-payment and loss than one-to-four family residential mortgage loans because repayment of the loans often depends on the successful operation of the property and the income stream of the borrowers. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one-to-four family residential mortgage loans. Also, many of the Bank's commercial borrowers have more than one loan outstanding. Consequently, an adverse development with respect to one loan or one credit relationship can expose the Bank to a significantly greater risk of loss compared to an adverse development with respect to a one-to-four family residential mortgage loan.

A downturn in the local economy or a decline in real estate values could hurt profits. Most of the Bank's loans are secured by real estate or are made to businesses in Ocean and Monmouth Counties, New Jersey and the surrounding area. As a result of this concentration, a downturn in the local economy could cause significant increases in nonperforming loans, which would hurt profits. In recent years there has been a significant increase in real estate values in the Bank's market area. As a result of rising home prices, loans have been well collateralized. A decline in real estate values could cause some mortgage loans to become inadequately collateralized, which would expose the Bank to a greater risk of loss.

The Bank operates in a highly regulated environment and may be adversely affected by changes in laws and regulations. The Bank is subject to extensive regulation, supervision and examination by the Office of Thrift Supervision, the Bank's chartering authority, and by the Federal Deposit Insurance Corporation, as insurer of deposits. The Company and the Bank are subject to regulation and supervision by the Office of Thrift Supervision. Such regulation and supervision governs the activities in which an institution and its holding company may engage, and are intended primarily for the protection of the insurance fund and depositors. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on operations, the classification of assets and determination of the level of the allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory action, may have a material impact on operations.

Table of Contents

The Company's allowance for loan losses may be inadequate, which could hurt the Company's earnings. The Company's allowance for loan losses may prove to be inadequate to cover actual loan losses and if the Company is required to increase its allowance, current earnings may be reduced. When borrowers default and do not repay the loans that the Bank makes to them, the Company may lose money. The Company's experience shows that some borrowers either will not pay on time or will not pay at all, which will require the Company to cancel or charge-off the defaulted loan or loans. The Company provides for losses by reserving what it believes to be an adequate amount to absorb any probable inherent losses. A charge-off reduces the Company's reserve for possible loan losses. If the Company's reserves were insufficient, it would be required to record a larger reserve, which would reduce earnings for that period.

The Company's subsidiary may be required to repurchase mortgage loans for an Early Payment Default or a breach of representations and warranties, which could harm the Company's earnings. The Company's subsidiary, Columbia, has entered into loan sale agreements with investors in the normal course of business. The loan sale agreements generally require the repurchase of certain loans previously sold in the event of an Early Payment Default or a violation of various representations and warranties customary to the mortgage banking industry. The repurchased mortgage loans could typically only be resold at a significant discount to the unpaid principal balance. Columbia maintains a reserve for repurchased loans, however, if repurchase activity is significant, the reserve may prove to be inadequate to cover actual losses which could harm future earnings.

In addition, \$299.8 million or 41.2% of the total loans originated by Columbia in 2006 are considered subprime loans, which are loans made to individuals whose borrowing needs are generally not fulfilled by traditional loan products because they do not satisfy the credit documentation or other underwriting standards prescribed by conventional mortgage lenders and loan buyers. In the event Columbia is required to repurchase a significant amount of subprime loans, Columbia may be required to hold such loans in portfolio for an extended period of time or to maturity, if such loans cannot be later resold. Subprime loans generally have a higher incidence of delinquency, foreclosure and bankruptcy, which may be substantially higher than that experienced by mortgage loans underwritten in a more traditional manner. Such risk associated with subprime loans may be increased during periods of economic slow-downs, increasing interest rates, and events that affect specifically the geographic areas in which the loans are made. Moreover, as most of the subprime loans made by Columbia have loan-to-value ratios of 100%, there would be little, if any, equity to fully recover the net carrying value of the loan in the event of default and foreclosure. In such event, the Company may be required to substantially increase its allowance for loan losses which would reduce earnings for that period.

The Company's mortgage servicing rights may become impaired which could hurt profits. Mortgage servicing rights are carried at the lower of cost or fair value. Any impairment is recognized as a reduction to servicing fee income. In the event that loan prepayments increase due to increased loan refinancing, the fair value of mortgage servicing rights would likely decline.

The Company's inability to achieve profitability on new branches may negatively affect earnings. The Bank continues to expand its presence within the market area through de novo branching. The profitability of this expansion strategy will depend on whether the income from the new branches will offset the increased expenses resulting from operating these branches. It is expected to take a period of time before these branches can become profitable. During this period, the expense of operating these branches may negatively affect net income.

Item 1B. Unresolved Staff Comments

None

Table of Contents

Item 2. Properties

The Bank conducts its business through its administrative office, which includes a branch office, and 20 other full service offices located in Ocean, Monmouth and Middlesex Counties, through loan production offices and through the administrative and loan production offices of Columbia.

Item 3. Legal Proceedings

The Company and the Bank are not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business. Such other routine legal proceedings in the aggregate are believed by management to be immaterial to the Company's financial condition or results of operations.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were not effective due to the material weakness discussed below. Disclosure controls and procedures are the controls and other procedures that are designed to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) Management Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. The Company's internal control over financial reporting was designed to provide reasonable assurance regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the Company's internal control over financial reporting as of December 31, 2006. This assessment was based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concluded that the Company's internal control over financial reporting was not effective as of December 31, 2006 due to the existence of the following material weakness identified by management: The Company's policies and procedures were not effective to provide for the proper evaluation and assessment of the adequacy of its reserve for repurchased loans at its mortgage banking subsidiary. Specifically, the Company lacked an effective process to ensure that the exercise of loan repurchase requests by purchasers of its loans were timely identified and incorporated properly in the analysis of its reserve for repurchased loans. This deficiency resulted in material misstatements in the Company's reserve for repurchased loans and amounts recorded as a gain on sales of loans, and resulted in more than a remote likelihood that a material misstatement of the Company's annual or interim consolidated financial statements would not be prevented or detected. These misstatements have been corrected in the consolidated financial statements included elsewhere in this Form 10-K.

Table of Contents

The Company's independent registered public accounting firm has issued an audit report on management's assessment of the Company's internal control over financial reporting. This report is included in Item 9A(d) below.

(c) Changes in Internal Control over Financial Reporting and Management's Remediation Initiatives

There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2006 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

To address the material weakness identified in Item 9A(b), during the first quarter of 2007, the Company enhanced its policies and procedures related to the quarterly evaluation of the adequacy of the reserve for repurchased loans. All repurchase requests received must be reported to the President of the mortgage banking subsidiary for evaluation and incorporation into the analysis of the reserve for repurchased loans. Additionally, the Company's mortgage banking subsidiary modified its mortgage loan product menu to eliminate the origination of subprime loans. Furthermore, the Company has taken disciplinary action against certain officers of the mortgage banking subsidiary responsible for not following established policies and procedures.

(d) Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

OceanFirst Financial Corp.:

We have audited management's assessment, included in the accompanying Management Report on Internal Control Over Financial Reporting (Item 9A(b)), that OceanFirst Financial Corp. and subsidiary (the "Company") did not maintain effective internal control over financial reporting as of December 31, 2006, because of the effect of the material weakness identified in management's assessment, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Management of the Company is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's assessment as of December 31, 2006: The Company's policies and procedures were not effective to provide for the proper evaluation and assessment of the adequacy of its reserve for repurchased loans at its mortgage banking subsidiary. Specifically, the Company lacked an effective process to ensure that the exercise of loan repurchase requests by purchasers of its loans were timely identified and incorporated properly in the analysis of its reserve for repurchased loans. This deficiency resulted in material misstatements in the Company's reserve for repurchased loans and amounts recorded as a gain on sales of loans, and resulted in more than a remote likelihood that a material misstatement of the Company's annual or interim consolidated financial statements would not be prevented or detected.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of OceanFirst Financial Corp. and subsidiary as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2006. The aforementioned material weakness was considered in determining the nature, timing and extent of audit tests applied in our audit of the 2006 consolidated financial statements, and this report does not affect our report dated March 26, 2007, which expressed an unqualified opinion on those consolidated financial statements.

In our opinion, management's assessment that OceanFirst Financial Corp. and subsidiary did not maintain effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also, in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.
