QUALITATIVE INFORMATION AND FINANCIAL STATEMENTS

(Please refer to Summary Results for the Second Quarter (First Half) of Fiscal 2008 (Six months ended September 30, 2008) on page 2-1 for more information)

1. Qualitative Information related to the Consolidated Results of Operations

Looking back over the economic climate during the six months ended September 30, 2008, tension in financial markets has noticeably risen including the spread of a credit crunch on a global scale resulting from a decline in the intermediary function of financial institutions, after some financial institutions experienced a shortfall of capital and severe management difficulties mainly in the U.S. and Europe, reflecting the turmoil in the securitized products markets stemming from the subprime loan problem. Under these circumstances, various measures are being taken in the global financial markets to stabilize the situation, such as large-scale re-organizations of financial institutions and injections of public funds by governments of major economic countries to resolve capital shortfalls.

The turmoil in the financial markets is having a great influence on the actual economy. The U.S. economy has become increasingly severe with, for example, a substantial decline in housing prices and a worsening in the employment situation. Europe has also seen a worsening in business confidence. In addition, economies of developing countries and countries rich in natural resources are also slowing.

As for the Japanese economy, domestic and foreign demand are weak and the risk of economic downside is increasing as the slowing in exports becomes clear and personal consumption stagnates with a decline in real wages and a global slump in share prices over the end of the period.

The global economic downside and the turmoil in the financial markets are likely to continue for the time being. Therefore it is even more important for Mizuho Financial Group to strengthen profitability further by applying management resources flexibly and providing superior financial services that meet our customers needs, while maintaining financial soundness and enhancing corporate governance such as risk management.

With the above economic environment, Net Income for the six months ended September 30, 2008 amounted to ¥94.5 billion, decreasing by ¥232.4 billion from the corresponding period of the previous fiscal year.

Taking segment information by type of business for MHFG and its consolidated subsidiaries categorized under banking business (banking and trust banking business), securities business and other, Ordinary Profits before excluding inter-segment Ordinary Profits was ¥64.2 billion for banking business, ¥(11.5) billion for securities business and ¥8.2 billion for other. Looking at segment information by geographic area categorized under Japan, the Americas, Europe and Asia/Oceania, Ordinary Profits before excluding inter-segment Ordinary Profits was ¥58.8 billion for the Americas, ¥(63.2) billion for Europe and ¥19.6 billion for Asia/Oceania.

2. Qualitative Information related to the Consolidated Financial Conditions

Consolidated total assets as of September 30, 2008 amounted to \$153,222.0 billion, decreasing by \$1,190.0 billion from the end of the previous fiscal year. Net Assets amounted to \$4,968.1 billion, decreasing by \$726.0 billion from the end of the previous fiscal year. Shareholders Equity amounted to \$3,237.1 billion, Valuation and Translation Adjustments amounted to \$72.4 billion and Minority Interests amounted to \$1,658.5 billion.

In Assets, the balance of Loans and Bills Discounted amounted to $\frac{467,590.6}{1000}$ billion, increasing by $\frac{1,981.9}{1,981.9}$ billion from the end of the previous fiscal year while Securities were $\frac{432,537.0}{1000}$ billion, decreasing by $\frac{1,421.4}{1000}$ billion from the end of the previous fiscal year. In Liabilities, Deposits amounted to $\frac{1}{475,480.6}$ billion, decreasing by $\frac{1}{4000}$ billion from the end of the previous fiscal year.

The Consolidated Capital Adequacy Ratio (Basel II BIS Standard) was 11.45% (Preliminary).

3. Qualitative Information related to the Consolidated Earnings Estimates

As for the consolidated earnings estimates for fiscal 2008, there is no revision of the earnings estimates which were announced on October 31, 2008. MHFG estimates Ordinary Income of ¥3,800.0 billion, Ordinary Profits of ¥350.0 billion and Net Income of ¥250.0 billion for fiscal year ending March 31, 2009.

The above estimates constitute forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Please see the forward-looking statements legend on page 1-2 for a description of the factors that could affect our ability to meet these estimates.

4. Others

(1) Changes in Significant Subsidiaries during the Period (changes in specified subsidiaries accompanying changes in scope of consolidation) None.

(2) Changes of Accounting Methods and Presentation of Consolidated Financial Statements (Accounting Standard for Lease Transactions)

As Accounting Standard for Lease Transactions (ASBJ Statement No.13, March 30, 2007) and Guidance on Accounting Standard for Lease Transactions, (ASBJ Guidance No.16) are applied from the fiscal year beginning on or after April 1, 2008, MHFG has applied the new accounting standard and guidance beginning with this interim period.

Although MHFG accounted for finance leases that do not involve transfer of ownership to lessee as operating leases, by this application, MHFG accounts for them as normal trade transactions, including the transactions that started before the end of fiscal 2007.

(7) NOTES

Amounts less than one million yen are rounded down.

I. Standards of Accounting Method

1. Trading Assets & Liabilities and Trading Income & Expenses

Trading transactions intended to take advantage of short-term fluctuations and arbitrage opportunities in interest rates, currency exchange rates, market prices of securities and related indices are recognized on a trade date basis and recorded in Trading Assets or Trading Liabilities on the consolidated balance sheet. Income or expenses generated on the relevant trading transactions are recorded in Trading Income or Trading Expenses on the consolidated statement of income.

Securities and other monetary claims held for trading purposes are stated at fair value at the consolidated balance sheet date. Derivative financial products, such as swaps, futures and option transactions, are stated at fair value, assuming that such transactions are terminated and settled at the consolidated balance sheet date.

Trading Income and Trading Expenses include the interest received and the interest paid during the interim period, the gains or losses resulting from any change in the value of securities and other monetary claims between the beginning and the end of the interim period, and the gains or losses resulting from any change in the value of financial derivatives between the beginning and the end of the interim period, assuming they were settled at the end of the interim period.

2. Securities

(i) Bonds held to maturity are stated at amortized cost (straight-line method) and determined by the moving average method. Investments in non-consolidated subsidiaries and affiliates, which are not under the equity method, are stated at acquisition cost and determined by the moving average method. Other Securities which have readily determinable fair value are stated at fair value. Fair value of Japanese stocks with a quoted market price is determined based on the average quoted market price over the month preceding the consolidated balance sheet date. Fair value of securities other than Japanese stocks is determined at the quoted market price if available, or other reasonable value at the consolidated balance sheet date (cost of securities sold is calculated primarily by the moving average method). Other Securities which do not have readily determinable fair value are stated at acquisition cost or amortized cost and determined by the moving average method.

The net unrealized gains on Other Securities are included directly in Net Assets, net of applicable income taxes after excluding gains and losses as a result of the fair-value hedge method.

(ii) Securities which are held as trust assets in Money Held in Trust accounts are valued in the same way as given in (i) above.

3. Derivative Transactions

Derivative transactions (other than transactions for trading purposes) are valued at fair value.

4. Depreciation

(1) Tangible Fixed Assets (Except for Lease Assets)

Depreciation of buildings is computed mainly by the straight-line method, and that of others is computed mainly by the declining-balance method. The depreciation cost for the period is recorded by the proportional distribution of the estimated annual depreciation costs by the length of the period. The range of useful lives is as follows.

Buildings: 3 years to 50 years Others: 2 years to 20 years

(2) Intangible Fixed Assets (Except for Lease Assets)

Amortization of Intangible Fixed Assets is computed by the straight-line method. Development costs for internally-used software are capitalized and amortized over their estimated useful lives of mainly five years as determined by MHFG and consolidated subsidiaries.

(3) Lease Assets

Depreciation of lease assets booked in Tangible Fixed Assets and Intangible Fixed Assets which are concerned with finance lease transactions that do not transfer ownership is mainly computed by the same method as the one applied to fixed assets owned by themselves.

5. Deferred Assets

(1) Bond issuance costs Bond issuance costs are expensed as incurred.

(2) Debenture issuance costs Debenture issuance costs are expensed as incurred.

(3) Bond discounts

Bonds are stated at amortized costs computed by the straight-line method on the consolidated balance sheet. Bond discounts booked on the consolidated balance sheet as of March 31, 2006 are amortized under the straight-line method over the term of the bond by applying the previous accounting method and the unamortized balance is directly deducted from bonds, based on the tentative measure stipulated in the Tentative Solution on Accounting for Deferred Assets (ASBJ Report No. 19, August 11, 2006).

6. Reserves for Possible Losses on Loans

Reserves for Possible Losses on Loans of major domestic consolidated subsidiaries are maintained in accordance with internally established standards for write-offs and reserve provisions.

For claims extended to obligors that are legally bankrupt under the Bankruptcy Law, Special Liquidation under the Company Law or other similar laws (Bankrupt Obligors), and to obligors that are effectively in similar conditions (Substantially Bankrupt Obligors), reserves are maintained at the amounts of claims net of direct write-offs described below and expected amounts recoverable from the disposition of collateral and the amounts recoverable under guarantees. For claims extended to obligors that are not yet legally or formally bankrupt but are likely to be bankrupt (Intensive Control Obligors), reserves are maintained at the amounts deemed necessary based on overall solvency analyses of the amounts of claims net of expected amounts recoverable from the disposition of collateral and the amounts recoverable under guarantees.

For claims extended to Intensive Control Obligors and Obligors with Restructured Loans and others, if the exposure to an obligor exceeds a certain specific amount, reserves are provided as follows: (i) if future cash flows of the principal and interest can be reasonably estimated, the discounted cash flow method is applied, under which the reserve is determined as the difference between the book value of the loan and its present value of future cash flows discounted using the contractual interest rate before the loan was classified as a Restructured Loan, and (ii) if future cash flows of the principal and interest cannot be reasonably estimated, reserves are provided for the losses estimated for each individual loan.

For claims extended to other obligors, reserves are maintained at rates derived from historical credit loss experience and other factors. Reserve for Possible Losses on Loans to Restructuring Countries is maintained in order to cover possible losses based on analyses of the political and economic climates of the countries.

All claims are assessed by each claim origination department in accordance with the internally established Self-assessment Standard, and the results of the assessments are verified and examined by the independent examination departments. Reserves for Possible Losses on Loans are provided for on the basis of such verified assessments.

In the case of claims to Bankrupt Obligors and Substantially Bankrupt Obligors, which are collateralized or guaranteed by a third party, the amounts deemed uncollectible (calculated by deducting the anticipated proceeds from the sale of collateral pledged against the claims and amounts that are expected to be recovered from guarantors of the claims) are written off against the respective claims balances. The total directly written-off amount was ¥468,518 million.

The claims above include corporate bonds which are issued by private placement (Article 2, Paragraph 3 of the Financial Instruments and Exchange Law) and others.

Other consolidated subsidiaries provide the amount necessary to cover the loan losses based upon past experience and other factors for general claims and the assessment for each individual loan for other claims.

7. Reserve for Possible Losses on Investments

Reserve for Possible Losses on Investments is maintained to provide against possible losses on investments in securities, after taking into consideration the financial condition and other factors concerning the investee company. Except for securitization products which are included as reference assets of another securitization schemes of the Group s domestic banking subsidiary, Reserve for Possible Losses on Investments is provided against unrealized losses on securitization products related with the discontinuation of business regarding credit investments primarily in Europe which was made as an alternative to loans by the Group s domestic banking subsidiary. Since securities are recognized at fair value on the consolidated balance sheet, the balance of Securities is offset against that of Reserve for Possible Losses on Investments by ¥49,717 million.

8. Reserve for Bonus Payments

Reserve for Bonus Payments, which is provided for future bonus payments to employees, is maintained at the amount accrued at the end of the interim period, based on the estimated future payments.

9. Reserve for Employee Retirement Benefits

Reserve for Employee Retirement Benefits (including Prepaid Pension Cost), which is provided for future benefit payments to employees, is recorded at the amount deemed accrued at the end of the interim period, based on the projected benefit obligation and the estimated plan asset amounts at the end of the fiscal year. Unrecognized actuarial differences are recognized as income or expenses from the following fiscal year under the straight-line method over a certain term within the average remaining service period of the employees of the respective fiscal year.

10. Reserve for Director and Corporate Auditor Retirement Benefits

Reserve for Director and Corporate Auditor Retirement Benefits, which is provided for future retirement benefit payments to directors, corporate auditors, and executive officers, is recognized at the amount deemed accrued for this interim period, based on the internally established standards.

11. Reserve for Possible Losses on Sales of Loans

Reserve for Possible Losses on Sales of Loans is provided for possible future losses on sales of loans at the amount deemed necessary based on a reasonable estimate of possible future losses.

12. Reserve for Contingencies

Reserve for Contingencies is maintained to provide against possible losses from contingencies, which are not covered by other specific reserves in off-balance transactions, trust transactions and others. The balance is an amount deemed necessary based on an estimate of possible future loss on each transaction.

13. Reserve for Frequent Users Services

Reserve for Frequent Users Services is provided mainly to meet the future use of points of Mizuho Mileage Club at the amount deemed necessary based on the reasonable estimate of the future usage of points.

14. Reserve for Reimbursement of Deposits

Reserve for Reimbursement of Deposits is provided for the deposits derecognized from the liabilities at the estimated amount of future claims for withdrawal.

15. Reserve under Special Laws

Reserve under Special Laws is Reserve for Contingent Liabilities from Financial Instruments and Exchange. This is the reserve pursuant to Article 46-5, Paragraph 1 and Article 48-3, Paragraph 1 of the Financial Instruments and Exchange Law to indemnify the losses incurred from accidents in the purchase and sale of securities, other transactions or derivative transactions.

16. Assets and Liabilities denominated in foreign currencies

Assets and Liabilities denominated in foreign currencies and accounts of overseas branches of domestic consolidated banking subsidiaries and a domestic consolidated trust banking subsidiary are translated into Japanese yen primarily at the exchange rates in effect at the consolidated balance sheet date, with the exception of the investments in non-consolidated subsidiaries and affiliates not under the equity method, which are translated at historical exchange rates.

Assets and Liabilities denominated in foreign currencies of the consolidated subsidiaries, except for the transactions mentioned above, are translated into Japanese yen primarily at the exchange rates in effect at the respective balance sheet dates.

17. Hedge Accounting

(1) Interest Rate Risk

The deferred method, the fair-value hedge method or the exceptional accrual method for interest rate swaps are applied as hedge accounting methods.

The portfolio hedge transaction for a large volume of small-value monetary claims and liabilities of domestic consolidated banking subsidiaries and domestic consolidated trust banking subsidiaries is accounted for in accordance with the method stipulated in the Accounting and Auditing Treatment relating to Adoption of Accounting Standards for Financial Instruments for Banks (JICPA Industry Audit Committee Report No.24).

The effectiveness of hedging activities for the portfolio hedge transaction for a large volume of small-value monetary claims and liabilities is assessed as follows:

- (i) as for hedging activities to offset market fluctuation risks, the effectiveness is assessed by bracketing both the hedged instruments, such as deposits and loans, and the hedging instruments, such as interest-rate swaps, in the same maturity bucket.
- (ii) as for hedging activities to fix the cash flows, the effectiveness is assessed based on the correlation between a base interest rate index of the hedged instrument and that of the hedging instrument.

The effectiveness of the individual hedge is assessed based on the comparison of the fluctuation in the market or of cash flows of the hedged instruments with that of the hedging instruments.

Among Net Deferred Hedge Losses, net of Taxes recorded on the consolidated balance sheet, those deferred hedge losses are included that are resulted from the application of the macro-hedge method based on the Tentative Accounting and Auditing Treatment relating to Adoption of

Accounting Standards for Financial Instruments for Banks (JICPA Industry Audit Committee Report No.15), under which the overall interest rate risks inherent in loans, deposits and others are controlled on a macro-basis using derivatives transactions. The deferred hedge gains/losses are amortized as interest income or interest expenses over the remaining maturity and average remaining maturity of the respective hedging instruments. The unamortized amounts of gross deferred hedge losses and gross deferred hedge gains on the macro-hedges, before net of applicable income taxes were \$118,112 million and \$110,583 million, respectively.

(2) Foreign Exchange Risk

Domestic consolidated banking subsidiaries and a domestic consolidated trust banking subsidiary apply the deferred method of hedge accounting to hedge foreign exchange risks associated with various financial assets and liabilities denominated in foreign currencies as stipulated in the Accounting and Auditing Treatment relating to Adoption of Accounting Standards for Foreign Currency Transactions for Banks (JICPA Industry Audit Committee Report No.25). The effectiveness of the hedge is assessed by confirming that the amount of the foreign currency position of the hedged monetary claims and liabilities is equal to or larger than that of currency-swap transactions, exchange swap transactions, and similar transactions designated as the hedging instruments of the foreign exchange risk.

In addition to the above methods, these subsidiaries apply the deferred method or the fair-value hedge method to portfolio hedges of the foreign exchange risks associated with investments in subsidiaries and affiliates in foreign currency and Other Securities in foreign currency (except for bonds) identified as hedged items in advance, as long as the amount of foreign currency payables of spot and forward foreign exchange contracts exceeds the amount of acquisition cost of the hedged foreign securities in foreign currency.

(3) Inter-company Transactions

Inter-company interest rate swaps, currency swaps and similar derivatives among consolidated companies or between trading accounts and other accounts, which are designated as hedges, are not eliminated and related gains and losses are recognized in the statement of income or deferred under hedge accounting, because these inter-company derivatives are executed according to the criteria for appropriate outside third-party cover operations which are treated as hedge transactions objectively in accordance with JICPA Industry Audit Committee Reports Nos. 24 and 25.

18. Consumption Taxes and other

With respect to MHFG and its domestic consolidated subsidiaries, Japanese consumption taxes and local consumption taxes are excluded from transaction amounts.

II. Scope of Cash and Cash Equivalents on Consolidated Statements of Cash Flows

III. Changes of fundamental and important matters for the preparation of Interim Consolidated Financial Statements (Accounting Standard for Lease Transactions)

Although MHFG accounted for finance leases that do not involve transfer of ownership to lessee as operating leases, by this application, MHFG accounts for them as normal trade transactions, including the transactions that started before the end of fiscal 2007.

The amount of accumulated impact until the end of fiscal 2007 on Income before Income Taxes and Minority Interests is recorded in Extraordinary Losses.

This change increases Lease Assets in Tangible Fixed Assets by ¥9,394 million, Lease Assets in Intangible Fixed Assets by ¥1,000 million, Lease Obligation in Other Liabilities by ¥19,930 million, Extraordinary Losses by ¥10,804 million, and decreases Income before Income Taxes and Minority Interests by ¥9,349 million.

Non-Accrual Delinquent Loans represent Non-Accrual Loans other than (i) Loans to Bankrupt Obligors and (ii) loans on which interest payments have been deferred in order to assist or facilitate the restructuring of the obligors.

4. Balance of Loans Past Due for Three Months or More: ¥8,282 million

Loans Past Due for Three Months or More are loans on which payments of principal and/or interest have not been made for a period of three months or more since the next day following the last due date for such payments, and which are not included in Loans to Bankrupt Obligors, or Non-Accrual Delinquent Loans.

The unutilized balance of these contracts amounted to ¥56,294,674 million. Of this amount, ¥47,298,851 million relates to contracts of which the original contractual maturity is one year or less, or which are unconditionally cancelable at any time.

Since many of these contracts expire without being exercised, the unutilized balance itself does not necessarily affect future cash flows. A provision is included in many of these contracts that entitles the banking subsidiaries to refuse the execution of loans, or reduce the maximum amount under contracts when there is a change in the financial situation, necessity to preserve a claim or other similar reasons. The banking subsidiaries require collateral such as real estate and securities when deemed necessary at the time the contract is entered into. In addition, they periodically monitor customers business conditions in accordance with internally established standards and take necessary measures to manage credit risks such as amendments to contracts.

<under Japanese GAAP>

Summary Results for the Second Quarter (First Half) of Fiscal 2008

(Six months ended September 30, 2008)

I. Summary of Income Analysis

• Consolidated Net Business Profits (Apr.1-Sep.30, 2008)

Consolidated Gross Profits for the first half of fiscal 2008 decreased to JPY 917.3 billion on a year-on-year basis. It was mainly because of, despite increased income from our business with individual customers, decreases in income related to the business with domestic corporate customers (SMEs), fee and commission income in overseas businesses which were affected by the turmoil in the global financial markets, and income from trust and asset management business of Mizuho Trust & Banking which was affected by the domestic real estate market conditions, in Customer Groups of the banking subsidiaries.

In addition to the above, there was an increase in G&A expenses, mainly those associated with employee retirement benefits. As a result, Consolidated Net Business Profits amounted to JPY 317.4 billion, a year-on-year decrease of JPY 96.5 billion.

Consolidated Net Income (Apr.1-Sep.30, 2008)

Consolidated Net Income for the first half of fiscal 2008 decreased by JPY 232.4 billion from the same period of the previous fiscal year to JPY 94.5 billion. This was mainly due to, together with the aforementioned factors, increased Credit-related Costs primarily associated with an increase in domestic corporate bankruptcies and the collapse of Lehman Brothers*1, devaluation of a portion of our stock portfolio triggered by the declines in the stock markets (devaluation of JPY 95.5 billion for the 3 Banks), and continuously recorded losses on securitization products and others resulting from the global financial market dislocation.

*1: The group s total P&L impact from the collapse of Lehman Brothers was approximately JPY -30.0 billion, including those associated with hedging transactions, market-related transactions by our overseas subsidiaries, and others.

As for the effect from our securitization products and others due to the global market dislocation, the consolidated P&L impact in the first half of fiscal 2008 was a loss of approximately JPY 72.0 billion (of which approximately JPY 45.0 billion arose in the second quarter (from July to September)).

[Breakdown of the P&L impact of JPY 72.0 billion (including overseas subsidiaries)]

3 Banks

Losses on sales of securitization products, etc. (incl. devaluation): approx. JPY -59.0 Bn

Net losses on provision of Reserve for Possible Losses on Sales of Loans*: approx. JPY -7.0 Bn

Profits from hedging by CDS: approx. JPY 7.0 Bn Mizuho Securities

Trading losses on securitization products: approx. JPY -13.0 Bn (of which foreign currency denominated: approx. JPY -9.0 Bn)

* Separately recorded approximately JPY -16.0 billion of Credit-related Costs in the first half due to downgrading of some obligors to the Intensive Control Obligors classification or below.

II. Enhancement of Profitability

Net Interest Income

The average loan balance for the first half of fiscal 2008 increased on a year-on-year basis mainly due to increased overseas lending.

The domestic loan-and-deposit rate margin for the same period slightly decreased from that in the second half of fiscal 2007 against the backdrop of intensified competition among banks and other factors.

Although total Net Interest Income of the 3 Banks for the first half decreased by JPY 9.6 billion on a year-on-year basis, Net Interest Income from our international operations increased by JPY 13.3 billion.

- *1: Aggregate average balance of the 3 Banks for the period, excluding Trust Account and loans to Mizuho Financial Group, Inc. Balance for overseas branches includes foreign exchange translation impact.
- *2: Aggregate figures of domestic operations of Mizuho Bank and Mizuho Corporate Bank after excluding loans to Mizuho Financial Group, Inc., Deposit Insurance Corporation of Japan and the Japanese Government.

Non-Interest Income

Net Fee and Commission Income of the 3 Banks for the first half of fiscal 2008 amounted to JPY 146.3 billion, a year-on-year decrease of JPY 32.8 billion.

As for our business with individual customers, fee income associated with sales of investment trusts and individual annuities decreased from the same period of the previous fiscal year, due to stagnant stock market conditions and other factors.

As for our business with corporate customers, although fee and commission income associated with domestic syndicated loans increased year-on-year, that primarily from solution-related business for SMEs, foreign exchange business, and overseas business decreased. Profits from trust and asset management business of Mizuho Trust & Banking also decreased.

III. Financial Soundness

• Although our Unrealized Gains on Other Securities decreased and Net Deferred Tax Assets increased due primarily to the declines in the stock markets, we maintained our financial soundness at a sufficient level as indicated by our Capital Adequacy Ratio and others.

*3 Figures in brackets are the balances of Mizuho Securities including its overseas subsidiaries (all of which are held in trading accounts). **IV. Disciplined Capital Management**

• Issuance of Non-Dilutive Preferred Securities

In July 2008, we issued JPY 303.0 billion of preferred debt securities through an overseas special purpose subsidiary so as to increase the group s Tier 1 capital to secure the agility and to improve the flexibility of our capital strategy.

Meanwhile, we redeemed in full preferred debt securities (JPY 118.5 billion and USD 2.6 billion) which became redeemable at the issuer s option in June 2008.

On November 13, 2008, our board of directors resolved to establish an overseas special purpose subsidiary and issue preferred debt securities to further strengthen our group s capital base in light of the current financial market turmoil.

• Repurchase and Cancellation of Own Shares (Common Shares) [For the Purpose of Offsetting Potential Dilutive Effect of Convertible Preferred Stock]

In July 2008, we repurchased our own shares (common shares) of JPY 150.0 billion (283,500 shares). As with the repurchases of our common shares which we have conducted since last year (the cumulative amount of repurchases: JPY 299.9 billion), they were made for the purpose of, among other things, offsetting the potential dilutive effect of our common shares from the conversion of the Eleventh Series Class XI Preferred Stock (JPY 943.7 billion in aggregate issue amount).

In September 2008, we cancelled all the common shares repurchased, except the shares to be assigned for the exercise of Stock Compensation-type Stock Options (Stock Acquisition Rights) that we plan to issue in the future (7,000 shares).

While our basic policy to address the potential dilutive effects, based on market conditions, our earnings trend and other factors remains unchanged, considering the importance of capital under the recent circumstances, we will put more priority on strengthening our capital base in this second half of fiscal 2008.

Earnings Estimates for Fiscal 2008

(Figures below are on a consolidated basis)

• We estimate Consolidated Net Business Profits for fiscal 2008 to be JPY 780.0 billion, an increase of JPY 268.8 billion compared with the previous fiscal year.

This is because, amid the ongoing severe environment for earnings including the financial market turmoil and worsening business sentiment, while we have to estimate a decrease in income from our banking subsidiaries Customer Groups and the Trading segment, of which the latter showed a good performance during the previous fiscal year, we assume the performance of Mizuho Securities will move toward recovery from the significant losses in fiscal 2007.

- We estimate Credit-related Costs and Net Gains/Losses related to Stocks to be JPY -250.0 billion and JPY -110.0 billion, respectively, mainly in light of the recent developments of the corporate performance and the stock markets.
- Based on the above, we estimate Consolidated Net Income to be JPY 250.0 billion, a decrease of JPY 61.2 billion year-on-year.
- We plan to make cash dividend payments of JPY 10,000 per share of common stock for the fiscal year ending March 31, 2009, unchanged from our plan announced in May 2008 (the same amount as the previous fiscal year, and JPY 10 per share of common stock after allotment of shares or fractions of a share without consideration in January 2009). We plan to make dividend payments on preferred stock as prescribed.

*1 Except for the securitization products which were the reference assets of our securitization schemes for transferring credit risks to third parties (hedged portion), a Reserve for Possible Losses on Investments has been provided since the end of fiscal 2007 against unrealized losses on securitization products related to the discontinuation of business regarding credit investments primarily in Europe, which had been made as an alternative to loans.

The balance of reserve was approximately JPY 50 billion as of Sep. 30, 2008 (the difference from the March-end balance of approximately JPY 46 billion was included in the above Realized Gains/Losses for the first half of fiscal 2008).

Since securities were recognized at fair value on the consolidated balance sheet, the relevant balances as of Mar. 31, 2008 and Sep. 30, 2008 were those after being offset by the amount of Reserve for Possible Losses on Investments.

*2 The proportions of balances (fair value) of the securitization products, as of Sep. 30, 2008, which were the reference assets of our securitization schemes (with CDS and other means) for transferring credit risks to third parties until maturity

In some of the securitization schemes, a portion of credit risk of the reference assets remained with Mizuho Financial Group through our retaining a small first loss position and a portion of senior tranches.

Financial services subsidiary (A- rating ³) of a multi-line insurance company: approximately JPY 194 billion

Government-affiliated financial institution (AA- rating): approximately JPY 104 billion

- 1: Notional amount basis. Ratings were based on the lowest external ratings as of Sep. 30, 2008.
- 2: The rating was under review for possible downgrade as of Nov. 10, 2008.
- *3 The change in balance from Mar. 31, 2008 (approximately JPY -196 billion) included approximately JPY 22 billion decrease in balance due to foreign exchange translation impact primarily caused by appreciation of Japanese yen against European currencies.
- *4 The proportion of US subprime mortgage loan-related assets to the total underlying assets of this CDO was up to approximately 30%. The entire balance (fair value) consisted of Super Senior tranche.
- *5 The entire balance consisted of securitization products backed by original assets (non-securitized assets).
- *6 Re-classified a part of the securitization products, which had been categorized in line 5 in the above table as of Mar. 31, 2008, to line 11 after a review of the definition of each category since our first quarter disclosure.

- *1 The change in balance from Mar. 31, 2008 (approximately JPY -65 billion) included approximately JPY 4 billion increase in balance due to foreign exchange translation impact primarily caused by depreciation of Japanese yen against US dollars.
- *2 The proportion of US subprime mortgage loan-related assets to the total underlying assets was approximately 10%. Approximately 50% of the balance (fair value) consisted of Super Senior tranche.
- *3 CDO exposures hedged by CDS with a non-investment grade US financial guarantor (monoline), net of allowances. (The hedging transaction was terminated in Aug. 2008.)
 based on external ratings as of Mar. 31, 2008
- *4 The entire balance consisted of securitization products backed by original assets (non-securitized assets).

Realized Gains/Losses for

- *5 Re-classified the securitization products, which had been categorized in line 5 in the above table as of Mar. 31, 2008, to line 14 after a review of the definition of each category since our first quarter disclosure.
- *6 Excluded US government-owned corporation bonds and government-sponsored enterprise bonds (please refer to page 2-8 for the balances of those bonds held by Mizuho Financial Group).

(Reference) Credit Default Swaps related to securitization products (as of Sep. 30, 2008)

The notional amount of credit default swaps (CDS ¹) referring to securitization products at Mizuho Securities was approximately JPY 370 billion (JPY 366 billion as of Mar. 31, 2008), and the fair value of the relevant reference assets (securitization products) was approximately JPY 298 billion (JPY 302 billion as of Mar. 31, 2008). NPV, or the estimated amount claimable for the settlement of the CDS, was approximately JPY 52 billion, which was the difference between the notional amount and the fair value (excluding approximately JPY 21 billion that had already been received in cash from a CDS protection seller). The net estimated amount claimable for the settlement of the CDS after deducting reserves for counterparty risks was approximately JPY 41 billion.

(The above included CDS contracts with a US monoline (external ratings as of Sep. 30, 2008: AAA $\stackrel{2}{}$), of which the notional amount was approximately JPY 85 billion and the fair value of the relevant reference assets was approximately JPY 76 billion.)

- 1 Excluded CDS shown in line 4 and 7 of the above table
- 2 The rating was under review for possible downgrade as of Nov. 10, 2008.

The vast majority of the above CDS contracts were with counterparties with external ratings of AA range or higher (as of Sep. 30, 2008), and the relevant reference assets were securitization products backed mainly by claims against corporations.

2. Other relevant information (September 30, 2008)

(The figures below are rounded to JPY 1 Bn)

Banking Subsidiaries

• Loans held for sale (for which Reserve for Possible Losses on Sales of Loans was recorded)

Approximately JPY 54 billion of Reserve for Possible Losses on Sales of Loans was recorded against approximately JPY 618 billion of loans held for sale associated with overseas LBO and other transactions (Reserve ratio: 8.7%)

(Note) The figures shown above exclude those related to Intensive Control Obligors or below. The reserve ratio would be 10.9%, if including the balances of loans held for sale to such obligors and the amounts of both Reserves for Possible Losses on Loans and Reserve for Contingencies in relation to the relevant balances.

Out of the above-mentioned JPY 618 billion, the LBO/MBO related loans held for sale amounted to approximately JPY 566 billion, and the relevant reserve ratio was 9.1%.

(Note) The figures shown above exclude those related to Intensive Control Obligors or below. The reserve ratio would be 11.4%, if including the balances of loans held for sale to such obligors and the amounts of both Reserves for Possible Losses on Loans and Reserve for Contingencies in relation to the relevant balances.

Overseas ABCP program related

The total assets of approximately JPY 206 billion acquired by overseas ABCP conduits, for which Mizuho Corporate Bank acted as a sponsor, included approximately JPY 97 billion of securitization products that were backed by credit card receivables, auto lease receivables, and others (of which approximately JPY 22 billion was guaranteed by US monolines as described below). No US subprime mortgage loan-related assets were included.

The change in balance of the above-mentioned securitization products from Mar. 31, 2008 (approximately JPY -73 billion) was primarily due to the redemption at maturity of those backed by credit card receivables (of which approximately JPY -8 billion was attributable to the redemption of those guaranteed by US monolines as described below).

• Securitization products and loans guaranteed by US financial guarantors (monolines) Securitization products guaranteed by US monolines

Approximately JPY 22 billion of securitization products backed by auto lease receivables included in the acquired assets of the

above-mentioned overseas ABCP conduits sponsored by Mizuho Corporate Bank.

The change in balance from Mar. 31, 2008 (approximately JPY -8 billion) was due to the redemption at maturity of those backed by credit card receivables. Loans guaranteed by US monolines

Approximately JPY 16 billion of Mizuho Corporate Bank s loan commitments to overseas infrastructure projects (of which approximately JPY 7 billion was drawn down). No US subprime mortgage loan-related exposures were included.

Although some of the monolines which provided the above guarantees were rated non-investment grade (based on external ratings), there were no particular concerns about the credit conditions of the above-mentioned underlying assets or the projects as of Sep. 30, 2008.

- (Note) For the purpose of reference to the Mizuho Financial Group s exposures related to US monolines, page 2-6 describes our securities subsidiaries exposures to such counterparties of credit default swaps (CDS) referring to securitization products, in addition to the above-mentioned transactions of the banking subsidiaries.
- Investments and loans associated with SIVs

All exposures had already been written-off in FY2007.

• Warehousing loan business* related to US subprime mortgage loans

Nil

- * Loans provided to other financial institutions in connection with their structuring of securitization products until such products are sold
- Loans to mortgage lenders in US (working capital, etc.)

Approximately JPY 48 billion (All of the lenders concerned had investment grade ratings, of which approximately 40% had external ratings of A range or higher).

(The figures below are rounded to JPY 1 Bn)

Banking and Securities Subsidiaries

• US government-owned corporation (Ginnie Mae) bonds and GSE (government-sponsored enterprises: Fannie Mae, Freddie Mac) bonds

Banking Subsidiaries (Banking Account)

The total balance of the above bonds held was approximately JPY 871 billion, with approximately JPY 4 billion of unrealized losses. Out of the total balance, approximately JPY 868 billion was RMBS guaranteed by the Government National Mortgage Association (Ginnie Mae), a corporation wholly-owned by the US government.

(Reference) Balance held as of Mar. 31, 2008: approximately JPY 1.2 trillion <u>Securities Subsidiaries (Trading Account)</u>

The total balance of RMBS, which were issued or guaranteed by the US government-owned corporation or GSE, was minimal (a few hundred million JPY).

Approximately JPY 154 billion of the corporate bonds issued by Fannie Mae and Freddie Mac was held for the purpose of, among other things, market-making activities in the US, and all the bonds were subject to mark-to-market accounting so that there were no unrealized losses (the recorded losses in the first half of fiscal 2008 were minimal). There was no holding of stocks of these entities.

2. Estimation of Deferred Tax Assets, etc.

Non-Consolidated

(1) Calculation Policy

Recoverability of Deferred Tax Assets is basically assessed based on future taxable income derived from future profitability, considering that Mizuho Bank, Mizuho Corporate Bank and Mizuho Trust & Banking s fundamental profitability enabled the three banks consistently to report an appropriate level of Net Business Profits in previous periods. Mizuho Bank, Mizuho Corporate Bank and Mizuho Trust & Banking s tax losses carry-forwards and future deductible temporary differences in the past resulted from nonrecurring special causes, e.g. losses from extraordinary and significant waiver of claims due to the crash of the bubble economy, acceleration of disposition of NPLs and stock holdings in accordance with government policy to stabilize promptly the financial system under the long deflationary depression, and the restructuring of businesses to meet the severe management environment. Since the three banks could have reported positive taxable income every year if the losses from these special factors were excluded, the conditions under the provisory clause of 5. (1) of Audit Guideline for Considering Recoverability of Deferred Tax Assets (JICPA Audit Committee Report No. 66) have been fulfilled. Period for future taxable income considered in the assessment is five years.
