In the first quarter of 2009, China's economy is still experiencing the continuous effects of the global financial crisis and the significant changing industry landscape has shown its initial impact on the Group. However, through effective management and the efforts of all its employees, the Group leveraged on its competitive advantages, overcame various challenges and continued to maintain favorable growth in its financial results. The Group's operating revenue reached RMB101.269 billion, representing an increase of 9.2% compared to the same period of last year. EBITDA reached RMB53.379 billion, representing an increase of 7.7% compared to the same period of last year. Profit attributable to shareholders reached RMB25.201 billion, representing an increase of 5.2% compared to the same period of last year. Margin of profit attributable to shareholders maintained at a relatively high level of 24.9%.

The increasing penetration rate of mobile telecommunications, the restructuring of the telecommunications industry and the issue of 3G licences will change the industry structure and competitive landscape of China's telecommunications industry. Despite the challenges and adversities it faced, the Group continued to sustain healthy business development in the first quarter of 2009. The Group's subscriber growth showed signs of slowing down as a result of the negative impact of the slow down in macro-economic development on the demand for telecommunications services, the increasing penetration rate of mobile telecommunications which lessens potential growth in the number of new subscribers, as well as the restructuring of the industry which intensified competition. Nevertheless, the Group continues its market leadership with the average monthly net additional subscribers for the first quarter reaching 6.638 million. The Group's subscriber base was 477.16 million as at 31 March 2009. However, as the new subscribers are mainly low-end users and new tariffs sales and marketing scheme is gradually rolling out, ARPU and average revenue per minute of usage recorded a decrease, whilst the voice usage volume was stimulated. Total voice usage volume increased by 21.0% compared to

**Table of Contents**

the same period of last year. Value-added business also continued its favorable growth and mature businesses sustained growth despite already having reached a sizeable scale. SMS usage volume increased by 15.8% compared to the same period of last year. Meanwhile, the development of other data businesses also maintained favorable growth. The favorable growth in subscriber base and voice usage volume and the development of value-added business resulted in an increase of 9.2% in operating revenue in the first quarter. The Group will continue to increase its investments in sales channels, customer service, network optimization, support system and R&D in order to enhance the Group's core competitiveness under the new competitive landscape. Furthermore, the Group will strive to maintain a stable growth in its profitability through adhering to its refined cost management and by leveraging economies of scale.

To meet new challenges and opportunities, the Group will build on its strong foundation and comprehensive strengths and leverage its existing competitive advantages so as to adapt rapidly to changes in the business environment and the competitive landscape, and to sustain its favorable business development and financial growth in order to continuously create value for its shareholders.

The Board wishes to remind investors that the above key performance indicators are based on the Group's unaudited management accounts. Investors are cautioned not to unduly rely on such data.

**In the meantime, investors are advised to exercise caution in dealing in the securities of the Company.**
