Table of Contents**PROVIDENT FINANCIAL SERVICES, INC. AND SUBSIDIARY****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****Note 1. Summary of Significant Accounting Policies****A. Basis of Financial Statement Presentation**

The accompanying unaudited consolidated financial statements include the accounts of Provident Financial Services, Inc. and its wholly-owned subsidiary, The Provident Bank (the Bank), together with Provident Financial Services, Inc., the Company).

The interim unaudited consolidated financial statements reflect all normal and recurring adjustments, which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three months ended March 31, 2009 are not necessarily indicative of the results of operations that may be expected for all of 2009.

Certain information and note disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission.

These unaudited consolidated financial statements should be read in conjunction with the December 31, 2008 Annual Report to Stockholders on Form 10-K.

B. (Loss) Earnings Per Share

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share calculations:

	For the three months ended March 31,					
	2009		2008			
	Net (Loss)	Shares	Per Share Amount	Net Income	Shares	Per Share Amount
Net (loss) income	\$ (143,619)			\$ 10,693		
Basic earnings per share:						
(Loss) income available to common stockholders	\$ (143,619)	56,169,573	\$ (2.56)	\$ 10,693	55,924,581	\$ 0.19
Diluted earnings per share:						
(Loss) income available to common stockholders	\$ (143,619)	56,169,573	\$ (2.56)	\$ 10,693	55,924,581	\$ 0.19

Anti-dilutive stock options and awards totaling 4,452,269 shares at March 31, 2009, were excluded from the earnings per share calculations.

Table of Contents**Note 2. Loans and Allowance for Loan Losses**

Loans receivable at March 31, 2009 and December 31, 2008 are summarized as follows (in thousands):

	March 31, 2009	December 31, 2008
Mortgage loans:		
Residential	\$ 1,658,085	\$ 1,793,123
Commercial	1,050,577	1,017,008
Multi-family	96,854	95,498
Construction	220,650	233,727
 Total mortgage loans	 3,026,166	 3,139,356
 Commercial loans	 730,355	 753,173
Consumer loans	610,059	624,282
 Total other loans	 1,340,414	 1,377,455
 Premiums on purchased loans	 9,968	 10,980
Unearned discounts	(430)	(492)
Net deferred (fees) costs	(752)	(551)
	 \$ 4,375,366	 \$ 4,526,748

The activity in the allowance for loan losses for the three months ended March 31, 2009 and 2008 is summarized as follows (in thousands):

	Three months ended March 31,	
	2009	2008
Balance at beginning of period	\$ 47,712	\$ 40,782
Provision charged to operations	5,800	1,300
Recoveries of loans previously charged off	480	517
Loans charged off	(1,642)	(1,742)
 Balance at end of period	 \$ 52,350	 \$ 40,857

Note 3. Deposits

Deposits at March 31, 2009 and December 31, 2008 are summarized as follows (in thousands):

	March 31, 2009	December 31, 2008
Savings	\$ 890,438	\$ 872,388
Money market	820,335	756,793
NOW	646,306	602,280
Non-interest bearing	470,886	462,364
Certificates of deposit	1,688,912	1,532,511

\$ 4,516,877 \$ 4,226,336

Table of Contents**Note 4. Components of Net Periodic Benefit Cost**

The Bank has a noncontributory defined benefit pension plan (the Plan) covering its full-time employees who had attained age 21 with at least one year of service as of April 1, 2003. The Plan was frozen on April 1, 2003. The Plan provides for 100% vesting after five years of service. The Plan's assets are invested in investment funds and group annuity contracts currently managed by the Principal Financial Group and Allmerica Financial.

In addition to pension benefits, certain health care and life insurance benefits are currently made available to certain of the Bank's retired employees. The costs of such benefits are accrued based on actuarial assumptions from the date of hire to the date the employee is fully eligible to receive the benefits. Effective January 1, 2003, eligibility for retiree health care benefits was frozen to new entrants and benefits were eliminated for employees with less than ten years of service as of December 31, 2002. Effective January 1, 2007, eligibility for retiree life insurance benefits was frozen to new entrants and retiree life insurance benefits were eliminated for employees with less than ten years of service as of December 31, 2006.

Net periodic benefit costs for the three months ended March 31, 2009 and 2008 include the following components (in thousands):

	Pension		Other post-retirement	
	Three months ended March 31,			
	2009	2008	2009	2008
Service cost	\$		\$ 48	58
Interest cost	272	227	262	260
Expected return on plan assets	(262)	(390)		
Amortization of unrecognized transitional obligation				
Amortization of prior service cost			(1)	(1)
Amortization of the net loss (gain)	179		(149)	(148)
Net periodic benefit cost (increase)	\$ 189	(163)	\$ 160	169

The Company previously disclosed in its consolidated financial statements for the year ended December 31, 2008, that it does not expect to contribute to its defined benefit pension plan in 2009. As of March 31, 2009, no contributions to the defined benefit pension plan have been made.

The net periodic benefit costs for pension benefits and other post-retirement benefits for the three months ended March 31, 2009 were calculated using the estimated results of the January 1, 2009 Statement of Financial Accounting Standards (SFAS) No. 87 and SFAS No. 106 valuations.

Note 5. Impact of Recent Accounting Pronouncements

In April 2009, the Financial Accounting Standards Board (FASB) issued FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. FSP FAS 157-4 provides additional guidance for estimating fair value in accordance with Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, when the volume and level of activity for the asset or liability have significantly decreased and includes guidance on identifying circumstances that indicate a transaction is not orderly. Under FSP FAS 157-4, if the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, transactions or quoted prices may not be determinative of fair value. Further analysis is required and significant adjustments to the transactions or quoted prices may be necessary. FSP FAS 157-4 is effective for interim and annual reporting periods ending after June

Table of Contents

15, 2009. The Company is currently evaluating the impact, if any, the adoption of FSP FAS 157-4 may have on its financial condition, results of operations and financial statement disclosures.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. FSP FAS 115-2 and FAS 124-2 changes the amount of an other-than-temporary impairment that is recognized in earnings when there are non-credit losses on a debt security which management does not intend to sell, and for which it is more-likely-than-not that the entity will not be required to sell the security prior to the recovery of the non-credit impairment. In those situations, the portion of the total impairment that is attributable to the credit loss would be recognized in earnings, and the remaining difference between the debt security's amortized cost basis and its fair value would be included in other comprehensive income. FSP FAS 115-2 and FAS 124-2 also requires additional disclosures about investments in an unrealized loss position and the methodology and significant inputs used in determining the recognition of other-than-temporary impairment. FSP FAS 115-2 and FAS 124-2 is effective for interim and annual reporting periods ending after June 15, 2009. The Company is currently evaluating the impact, if any, the adoption of FSP FAS 115-2 and FAS 124-2 may have on its financial condition, results of operations and financial statement disclosures.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, requiring disclosures about fair value of financial instruments for interim reporting periods of a publicly traded company, as well as in annual financial statements. The disclosure requirements are effective for interim reporting periods ending after June 15, 2009.

In June 2008, the FASB ratified Emerging Issues Task Force (EITF) Issue No. 08-3, *Accounting by Lessees for Nonrefundable Maintenance Deposits*. EITF Issue No. 08-3 requires that all nonrefundable maintenance deposits be accounted for as a deposit with the deposit expensed or capitalized in accordance with the lessee's maintenance accounting policy when the underlying maintenance is performed. Once it is determined that an amount on deposit is not probable of being used to fund future maintenance expense, it is to be recognized as additional expense at the time such determination is made. EITF Issue No. 08-3 is effective for fiscal years beginning after July 1, 2009. The adoption of EITF Issue No. 08-3 is not expected to have a material impact on the Company's financial condition, results of operations or financial statement disclosures.

In June 2008, FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*, was issued. FSP EITF 03-6-1 requires unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents to be treated as participating securities as defined in EITF Issue No. 03-6, *Participating Securities and the Two-Class Method* under FASB Statement No. 128, and, therefore, included in the earnings allocation in computing earnings per share under the two-class method described in SFAS No. 128, *Earnings Per Share*. FSP EITF 03-6-1 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. Upon adoption, all previously reported earnings per share data must be retroactively adjusted to conform with the requirements of the FSP. The adoption of FSP EITF 03-6-1 did not have a material impact on the Company's calculation of earnings per share for the periods presented.

In March 2008, the FASB issued SFAS No. 161, *Disclosure about Derivative Instruments and Hedging Activities*, an Amendment of FASB Statement No. 133. The new standard establishes enhanced disclosure requirements about: (a) how and why an entity uses derivative instruments; (b) how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations; and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The adoption of SFAS No. 161 did not have a material impact on the Company's financial condition, results of operations or financial statement disclosures.

In February 2008, FSP No. 157-2, *Effective Date of FASB Statement No. 157*, was issued. FSP No. 157-2 delayed the application of SFAS No. 157 for non-financial assets and non-financial liabilities until January

Table of Contents

1, 2009. The adoption of FSP No. 157-2 is reflected in the Company's fair value disclosures appearing in Note 6 to the unaudited consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB Statement No. 51. This standard amends the guidance in Accounting Research Bulletin (ARB) No. 51, Consolidated Financial Statements. The new standard establishes accounting and reporting standards for the non-controlling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS No. 160 clarifies that a non-controlling interest in a subsidiary, which is sometimes referred to as minority interest, is an ownership interest in the consolidated entity that should be reported as a component of equity in the consolidated financial statements. Among other requirements, SFAS No. 160 requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the non-controlling interest. It also requires disclosure, on the face of the consolidated income statement, of the amounts of consolidated net income attributable to the parent and to the non-controlling interest. SFAS No. 160 is effective on January 1, 2009. The adoption of SFAS No. 160 did not have a significant impact on the Company's financial condition, results of operations or financial statement disclosures.

Note 6. Fair Value Measurement of Assets and Liabilities

SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of fair value hierarchy under SFAS No. 157 are as follows:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair values as of March 31, 2009 and December 31, 2008 by level within the fair value hierarchy.

Table of Contents

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	March 31, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale	\$ 885,803	\$ 107,246	\$ 778,557	\$
Measured on a non-recurring basis:				
Loans measured for impairment based on the fair value of the underlying collateral in accordance with SFAS No. 114	30,322			30,322
Foreclosed assets	4,758			4,758
Goodwill	346,289			346,289
	381,369			381,369

(Dollars in thousands)	Fair Value Measurements at Reporting Date Using:			
	December 31, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Measured on a recurring basis:				
Securities available for sale	\$ 820,329	\$ 109,416	\$ 710,913	\$
Measured on a non-recurring basis:				
Loans measured for impairment based on the fair value of the underlying collateral in accordance with SFAS No. 114	\$ 18,642			18,642

The following valuation techniques are based upon the unpaid principal balance only, and exclude any accrued interest or dividends at the measurement date. Interest income and expense and dividend income are recorded within the consolidated statements of income depending on the nature of the instrument using the effective interest method based on acquired discount or premium.

The valuation techniques described below were used to measure fair value of financial instruments in the preceding table on a recurring basis during the three months ended March 31, 2009 and year ended December 31, 2008.

For securities available for sale, fair value was estimated using a market approach. The majority of the Company's securities are fixed income instruments that are not quoted on an exchange, but are traded in active markets. Prices for these instruments are obtained through third party data service providers or dealer market participants with which the Company has historically transacted both purchases and sales of

Table of Contents

securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing, a Level 2 input as defined by SFAS No. 157, is a mathematical technique used principally to value certain securities to benchmark or comparable securities. The Company also holds equity securities and debt instruments issued by the U.S. government and U.S. government agencies that are traded in active markets with readily accessible quoted market prices that are considered Level 1 inputs.

The valuation techniques described below were used to measure fair value of financial instruments in the preceding table on a non-recurring basis during the three months ended March 31, 2009 and year ended December 31, 2008.

For loans measured for impairment based on the fair value of the underlying collateral in accordance with SFAS No. 114, fair value was estimated using a market approach. The Company measures the fair value of collateral underlying impaired loans primarily through obtaining independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are considered Level 3 inputs. The Company recognized an impairment charge of \$3.1 million via specific reserves established through the provision for loan losses in connection with loans measured for impairment based on the fair value of the underlying collateral in accordance with SFAS No. 114 during the three months ended March 31, 2009.

Assets acquired through foreclosure or deed in lieu of foreclosure included in the preceding table are carried at fair value, less estimated costs to sell. Fair value is generally based on independent appraisals that rely upon quoted market prices for similar assets in active markets. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are considered Level 3 inputs. When an asset is acquired, the excess of the loan balance over fair value, less estimated costs to sell, is charged to the allowance for loan losses. A reserve for foreclosed assets may be established to provide for possible write-downs and selling costs that occur subsequent to foreclosure. Foreclosed assets are carried net of the related reserve. Operating results from real estate owned, including rental income, operating expenses, and gains and losses realized from the sales of real estate owned, are recorded as incurred.

The fair value of goodwill is determined in the same manner as goodwill recognized in a business combination and uses standard valuation methodologies. Fair value may be determined using market prices, comparison to similar assets, market multiples, discounted cash flow analysis and other factors. Estimated cash flows may extend far into the future and by their nature are difficult to determine over an extended time frame. Factors that may significantly affect the estimates include specific industry or market sector conditions, changes in revenue growth trends, customer behavior, competitive forces, cost structures and changes in discount rates. The Company recognized a goodwill impairment charge of \$152.5 million during the three months ended March 31, 2009.

There were no changes to the valuation techniques for fair value measurement during the three months ended March 31, 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS. Forward Looking Statements

Certain statements contained herein are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as may, will, believe, expect, estimate, anticipate, continue, or similar

Table of Contents

terms or variations on those terms, or the negative of those terms. Forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to, those related to the economic environment, particularly in the market areas in which the Company operates, competitive products and pricing, fiscal and monetary policies of the U.S. Government, changes in government regulations affecting financial institutions, including regulatory fees and capital requirements, changes in prevailing interest rates, acquisitions and the integration of acquired businesses, credit risk management, asset-liability management, the financial and securities markets and the availability of and costs associated with sources of liquidity.

The Company wishes to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company wishes to advise that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements. The Company does not undertake and specifically declines any obligation to publicly release the result of any revisions, which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

The calculation of the allowance for loan losses is a critical accounting policy of the Company. The allowance for loan losses is a valuation account that reflects management's evaluation of the probable losses in the loan portfolio. The Company maintains the allowance for loan losses through provisions for loan losses that are charged to income. Charge-offs against the allowance for loan losses are taken on loans where management determines that the collection of loan principal is unlikely. Recoveries made on loans that have been charged-off are credited to the allowance for loan losses.

The Company's evaluation of the adequacy of the allowance for loan losses includes a review of all loans on which the collectibility of principal may not be reasonably assured. For residential mortgage and consumer loans, this is determined primarily by delinquency and collateral values. For commercial real estate and commercial loans, an extensive review of financial performance, payment history and collateral values is conducted on a quarterly basis.

As part of the evaluation of the adequacy of the allowance for loan losses, each quarter management prepares a worksheet. This worksheet categorizes the entire loan portfolio by certain risk characteristics such as loan type (residential mortgage, commercial mortgage, construction, commercial, etc.) and loan risk rating.

When assigning a risk rating to a loan, management utilizes a nine-point internal risk rating system. Loans deemed to be of acceptable quality are rated 1 through 4, with a rating of 1 established for loans with minimal risk. Loans deemed to be of questionable quality are rated 5 (watch) or 6 (special mention). Loans with adverse classifications (substandard, doubtful or loss) are rated 7, 8 or 9, respectively. Commercial mortgage, commercial and construction loans are rated individually and each lending officer is responsible for risk rating loans in their portfolio. These risk ratings are then reviewed by the department manager and/or the Chief Lending Officer and the Credit Administration Department. Risk ratings are then confirmed by the Loan Review Department. Loans requiring Credit Committee approval are periodically reviewed by the Credit Committee in the credit renewal or approval process.

Management believes the primary risks inherent in the portfolio are a continued decline in the economy, generally, a continued decline in real estate market values, and possible increases in interest rates. Any one or a combination of these events may adversely affect borrowers' ability to repay the loans, resulting in increased delinquencies, loan losses and future levels of provisions. Accordingly, the Company has provided for loan losses at the current level to address the current risk in its loan portfolio. Management

Table of Contents

considers it important to maintain the ratio of the allowance for loan losses to total loans at an acceptable level given current economic conditions, interest rates and the composition of the portfolio.

Although management believes that the Company has established and maintained the allowance for loan losses at adequate levels, additions may be necessary if future economic and other conditions differ substantially from the current operating environment. Management evaluates its estimates and assumptions on an ongoing basis giving consideration to historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Illiquid credit markets, volatile securities markets, and declines in the housing market and the economy generally have combined to increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods. In addition, various regulatory agencies periodically review the adequacy of the Company's allowance for loan losses as an integral part of their examination process. Such agencies may require the Company to recognize additions to the allowance or additional write-downs based on their judgments about information available to them at the time of their examination. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Additional critical accounting policies relate to judgments about other asset impairments, including goodwill, investment securities and deferred tax assets. Goodwill is evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. The Company engages an independent third party to perform an annual analysis during the fourth quarter as of September 30 to test the aggregate balance of goodwill for impairment. For purposes of goodwill impairment evaluation, the Bank is identified as the reporting unit. The fair value of goodwill is determined in the same manner as goodwill recognized in a business combination and uses standard valuation methodologies. Fair value may be determined using market prices, comparison to similar assets, market multiples, discounted cash flow analysis and other factors. Estimated cash flows may extend far into the future and by their nature are difficult to determine over an extended time frame. Factors that may significantly affect the estimates include specific industry or market sector conditions, changes in revenue growth trends, customer behavior, competitive forces, cost structures and changes in discount rates.

The goodwill impairment test is performed in two steps. The first step compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired. However, if the carrying amount of the reporting unit exceeds its fair value, an additional test must be performed. The second step test compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss would be recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

As previously reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Company performed an annual goodwill impairment test at September 30, 2008, and a subsequent test at December 31, 2008. The results of both analyses indicated that goodwill was not impaired. As a result of the continued decline in the first quarter of 2009 in stock prices in the financial services sector and in the Company's common stock price, the Company initiated a goodwill impairment test as of March 31, 2009. The step one analysis at March 31, 2009, indicated potential impairment. Upon completion of the second step test, it was determined that the carrying amount of the goodwill exceeded its implied fair value and an impairment charge in the amount of \$152.5 million was recognized as of March 31, 2009. No goodwill impairment loss was required to be recognized for the three months ended March 31, 2008.

The Company's available for sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders

Table of Contents

equity. Estimated fair values are based on market quotations or matrix pricing as discussed in Note 6 to the unaudited consolidated financial statements. Securities which the Company has the positive intent and ability to hold to maturity are classified as held to maturity and carried at amortized cost. The Company conducts a periodic review and evaluation of the securities portfolio to determine if any declines in the fair values of securities are other than temporary. If such a decline were deemed other than temporary, the Company would write down the security to fair value through a charge to current period operations. The market value of the securities portfolio is significantly affected by changes in interest rates. In general, as interest rates rise, the market value of fixed-rate securities decreases and as interest rates fall, the market value of fixed-rate securities increases. The current turmoil in the credit markets, primarily as a result of the continued fallout from sub-prime lending, has resulted in a lack of liquidity in the mortgage-backed securities market. Increases in delinquencies and foreclosures, primarily in securities that are backed by sub-prime loans, have resulted in limited trading activity and significant price declines, regardless of favorable movements in interest rates. The Company evaluates its intent and ability to hold securities to maturity or for a sufficient period of time to recover the recorded principal balance. The Company also has investments in common stock issued by several publicly-traded financial institutions, the valuation of which is affected by the institutions' performance and market conditions. No securities impairment loss was required to be recognized for the three months ended March 31, 2009 or 2008.

The determination of whether deferred tax assets will be realizable is predicated on estimates of future taxable income. Such estimates are subject to management's judgment. A valuation allowance is established when management is unable to conclude that it is more likely than not that it will realize deferred tax assets based on the nature and timing of these items.

COMPARISON OF FINANCIAL CONDITION AT MARCH 31, 2009 AND DECEMBER 31, 2008

Total assets at March 31, 2009 decreased \$24.8 million, or 0.4%, to \$6.52 billion, compared to \$6.55 billion at December 31, 2008, primarily as a result of the decrease in intangible assets resulting from the goodwill impairment charge of \$152.5 million, partially offset by an increase in cash and cash equivalents resulting from deposit inflows and sales and repayments of loans. Cash and cash equivalents increased \$235.8 million to \$304.3 million at March 31, 2009, from \$68.5 million at December 31, 2008. At quarter-end, these balances were pending redeployment to fund loan originations, investment purchases and the repayment of maturing borrowings.

Securities available for sale, at fair value, increased \$65.5 million, or 8.0%, to \$885.8 million at March 31, 2009, compared to \$820.3 million at December 31, 2008. The increase in the securities available for sale portfolio included \$84.9 million of residential mortgage loan pools that were securitized by the Company and are now held as securities available for sale. The weighted average life of the Company's available for sale securities portfolio was 2.8 years at March 31, 2009.

Federal Home Loan Bank stock decreased \$7.7 million, or 17.9%, to \$35.2 million at March 31, 2009, compared to \$42.8 million at December 31, 2008. The Company invests in stock of the Federal Home Loan Bank of New York (FHLB-NY) as required under the terms of membership. The level of required stock holdings is dependent, in part, on outstanding borrowings by the Company from the FHLB-NY.

Total net loans at March 31, 2009, decreased \$156.0 million, or 3.5%, to \$4.32 billion, compared to \$4.48 billion at December 31, 2008, largely as a result of the securitization of \$84.9 million of conforming one- to four-family residential mortgage loans. Loan originations totaled \$268.9 million and loan purchases totaled \$12.9 million for the quarter ended March 31, 2009. Net increases of \$34.9 million in commercial and multi-family mortgage loans were more than offset by decreases of \$135.0 million in residential mortgage loans, \$22.8 million in commercial loans, \$14.2 million in consumer loans, and \$13.1 million in construction loans during the first quarter of 2009. Commercial loans, consisting of commercial real estate, construction and commercial loans, totaled \$2.10 billion at March 31, 2009 and December 31, 2008, representing 48.1% of the loan portfolio at March 31, 2009, and 46.5% of the loan portfolio at December 31, 2008. The Company intends to continue to focus on the origination of commercial loans. Retail loans, which consist of

Table of Contents

residential mortgage loans and consumer loans, such as fixed-rate home equity loans and lines of credit, totaled \$2.27 billion and accounted for 51.9% of the loan portfolio at March 31, 2009, compared to \$2.42 billion, or 53.5% of the portfolio at December 31, 2008.

At March 31, 2009, the allowance for loan losses totaled \$52.4 million, or 1.20% of total loans, compared with \$47.7 million, or 1.05% of total loans at December 31, 2008. Total non-performing loans were \$63.8 million, or 1.46% of total loans at March 31, 2009, compared to \$59.1 million, or 1.31% of total loans at December 31, 2008. Non-performing assets totaled \$68.5 million, or 1.05% of total assets at March 31, 2009, compared to \$62.6 million, or 0.96% of total assets at December 31, 2008.

Intangible assets decreased \$153.8 million to \$360.9 million at March 31, 2009, from \$514.7 million at December 31, 2008. At March 31, 2009, the Company had goodwill totaling \$346.3 million, compared to \$498.8 million at December 31, 2008, resulting primarily from acquisitions completed in 2004 and 2007. U.S. generally accepted accounting principles require companies to perform an annual test for goodwill impairment. As previously reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2008, the Company performed an annual goodwill impairment test at September 30, 2008, and a subsequent test at December 31, 2008. The results of both analyses indicated that goodwill was not impaired. As a result of the continued decline in the first quarter of 2009 in stock prices in the financial services sector and in the Company's common stock price, the Company initiated a goodwill impairment test as of March 31, 2009, indicating that goodwill resulting from these acquisitions was impaired. The Company recognized a \$152.5 million goodwill impairment charge for the quarter ended March 31, 2009.

Total deposits increased \$290.5 million, or 6.9%, to \$4.52 billion at March 31, 2009, from \$4.23 billion at December 31, 2008, with core deposits increasing \$134.1 million and time deposits increasing \$156.4 million. Core deposits, consisting of all demand and savings deposits, represented 62.6% of total deposits at March 31, 2009, compared to 63.7% of total deposits at December 31, 2008. Within core deposits, money market account balances increased \$63.5 million, to \$820.3 million at March 31, 2009, NOW checking account balances increased \$44.0 million, to \$646.3 million at March 31, 2009, savings account balances increased \$18.1 million, to \$890.4 million at March 31, 2009 and non-interest bearing demand deposit accounts increased \$8.6 million, to \$470.9 million at March 31, 2009. These increases are primarily due to increases in municipal money market and checking account balances, Smart checking and Platinum relationship checking and money market account balances, and business checking account balances. Time deposit increases were primarily in the 18-month and shorter maturity categories.

Total stockholders' equity decreased \$146.6 million, or 14.4%, to \$872.0 million at March 31, 2009. This decrease was due to a net loss of \$143.6 million, \$6.6 million in cash dividends, and common stock purchases of \$60,000, partially offset by \$2.6 million in other comprehensive income and the allocation of shares to stock-based compensation plans of \$1.1 million. At March 31, 2009, book value per share and tangible book value per share were \$14.57 and \$8.54, respectively, compared with \$17.09 and \$8.45, respectively, at December 31, 2008. Common stock repurchases during the quarter ended March 31, 2009, totaled 5,000 shares at an average cost of \$11.36 per share. At March 31, 2009, 2.1 million shares remained eligible for repurchase under the current stock repurchase program authorized by the Company's Board of Directors.

Liquidity and Capital Resources. The Company's primary sources of funds are deposits, FHLB-NY advances, repurchase agreements, loan repayments, maturities of investments and cash flows from mortgage-backed securities. Scheduled loan amortization is a fairly predictable source of funds, while loan and mortgage-backed securities prepayments and deposit flows are influenced by interest rates, local economic conditions and the competitive marketplace. Additional sources of liquidity that are available to the Company, should the need arise, are a \$100.0 million overnight line of credit and a \$100.0 million one-month overnight repricing line of credit, each with the FHLB-NY. As of March 31, 2009, the Company did not have any outstanding borrowings against these lines of credit.

Table of Contents

Cash needs for the three months ended March 31, 2009, were provided for primarily from deposit inflows, income and principal payments on loans, investments and mortgage-backed securities. The cash was used primarily to fund interest and operating expenses, current loan originations, common stock repurchases and the repayment of borrowings.

As of March 31, 2009, the Bank exceeded all minimum regulatory capital requirements as follows:

	At March 31, 2009			
	Required		Actual	
	Amount	Ratio	Amount	Ratio
Regulatory Tier 1 leverage capital	\$ 246,601	4.00%	\$ 403,452	6.54%
Tier 1 risk-based capital	163,761	4.00	403,452	9.85
Total risk-based capital	327,523	8.00	454,642	11.10

COMPARISON OF OPERATING RESULTS FOR THE THREE MONTHS ENDED MARCH 31, 2009 AND 2008

General. The Company reported a net loss of \$143.6 million for the three months ended March 31, 2009, compared to net income of \$10.7 million for the same period in 2008. Basic and diluted losses per share were \$2.56 for the quarter ended March 31, 2009, compared with basic and diluted earnings per share of \$0.19 for the same quarter in 2008. Due to the continued decline in the first quarter of 2009 in stock prices in the financial services sector and in the Company's common stock price, the Company recognized a \$152.5 million, or \$2.72 per share goodwill impairment charge during the quarter ended March 31, 2009. Compared with the three months ended March 31, 2008, earnings and per share data for the three months ended March 31, 2009 also reflect an increase to the provision for loan losses due to the following: an increase in non-performing loans; growth in the loan portfolio; an increase in commercial loans as a percentage of the loan portfolio; and the impact of current macroeconomic conditions. The provision for loan losses was \$5.8 million for the three months ended March 31, 2009, compared with \$1.3 million for the same period in 2008. Earnings and per share data for the three months ended March 31, 2009 also include severance costs totaling \$320,000, net of tax.

First quarter 2008 results were favorably impacted by a \$180,000 net after-tax gain recorded in connection with the ownership and mandatory redemption of a portion of the Company's Class B Visa, Inc. shares as part of Visa's initial public offering, and a \$175,000 net after-tax gain resulting from the sale of the deposits of a branch office.

Net Interest Income. Total net interest income increased \$4.7 million, or 12.1%, to \$43.9 million for the quarter ended March 31, 2009, compared to \$39.2 million for the quarter ended March 31, 2008. Interest income for the first quarter of 2009 decreased \$3.2 million, or 4.2%, to \$73.5 million, compared to \$76.7 million for the same period in 2008. Interest expense decreased \$7.9 million, or 21.2%, to \$29.5 million for the quarter ended March 31, 2009, compared to \$37.5 million for the quarter ended March 31, 2008.

The Company's net interest margin increased 23 basis points to 3.10% for the quarter ended March 31, 2009, compared to 2.87% for the quarter ended March 31, 2008. The net interest margin for the quarter ended March 31, 2009, decreased 10 basis points from the trailing quarter net interest margin of 3.20%. The net interest spread was 2.82% for the quarter ended March 31, 2009, compared with 2.91% for the trailing quarter and 2.49% for the same period in 2008. The increase in the net interest margin for the three months ended March 31, 2009, versus the same quarter in 2008, was primarily attributable to decreases in market rates on interest-bearing liabilities. The decline in the net interest margin for the three months ended March 31, 2009, versus the trailing quarter was attributable to reductions in earning asset yields, an increase in the average balance of lower-yielding short-term investments and an increase in the average balance of non-performing loans.

Table of Contents

The average yield on interest-earning assets decreased 42 basis points to 5.21% for the quarter ended March 31, 2009, compared to 5.63% for the comparable quarter in 2008. Compared to the trailing quarter, the yield on interest-earning assets decreased 17 basis points from 5.38%.

The average cost of interest-bearing liabilities decreased 75 basis points to 2.39% for the quarter ended March 31, 2009, compared to 3.14% for the quarter ended March 31, 2008. Compared to the trailing quarter, the average cost of interest-bearing liabilities decreased 8 basis points from 2.47%.

The average balance of net loans increased \$125.3 million, or 3.0%, to \$4.36 billion for the quarter ended March 31, 2009, compared to \$4.24 billion for the same period in 2008. Income on all loans secured by real estate decreased \$782,000, or 1.9%, to \$40.6 million for the three months ended March 31, 2009, compared to \$41.4 million for the three months ended March 31, 2008. Interest income on commercial loans decreased \$784,000, or 6.9%, to \$10.5 million for the quarter ended March 31, 2009, compared to \$11.3 million for the quarter ended March 31, 2008. Consumer loan interest income decreased \$1.5 million, or 15.5%, to \$8.2 million for the quarter ended March 31, 2009, compared to \$9.7 million for the quarter ended March 31, 2008. The average loan yield for the three months ended March 31, 2009, was 5.48%, compared with 5.90% for the same period in 2008, reflecting declines in short-term interest rates and the composition of the commercial loan portfolio, which is 48% floating or adjustable rate.

Interest income on investment securities held to maturity decreased \$204,000, or 5.6%, to \$3.4 million for the quarter ended March 31, 2009, compared to \$3.7 million for the quarter ended March 31, 2008. Average investment securities held to maturity totaled \$343.4 million for the quarter ended March 31, 2009, compared with \$355.4 million for the same period last year.

Interest income on securities available for sale increased \$424,000, or 4.1%, to \$10.7 million for the quarter ended March 31, 2009, compared to \$10.3 million for the quarter ended March 31, 2008. Average securities available for sale were \$893.3 million for the three months ended March 31, 2009, compared with \$788.2 million for the same period in 2008. The average yield on all securities was 4.31% for the three months ended March 31, 2009, compared with 4.67% for the same period in 2008. The decrease in the yield on securities available for sale for the three months ended March 31, 2009, compared with the same period in 2008, was attributable to the reinvestment of cash flows from sales, maturities and paydowns at lower market rates than those earned in the first quarter of 2008.

The average balance of interest-bearing core deposit accounts increased \$141.8 million, or 6.7%, to \$2.26 billion for the quarter ended March 31, 2009, compared to \$2.11 billion for the quarter ended March 31, 2008. Average time deposit account balances decreased \$17.4 million, or 1.1%, to \$1.60 billion for the quarter ended March 31, 2009, compared to \$1.61 billion for the same period in 2008. Interest paid on deposit accounts decreased \$7.0 million, or 26.4%, to \$19.6 million for the quarter ended March 31, 2009, compared to \$26.6 million for the quarter ended March 31, 2008. The average cost of interest-bearing deposits was 2.06% for the three months ended March 31, 2009, compared with 2.87% for the three months ended March 31, 2008, reflecting recent interest rate reductions and a shift in deposit composition to lower-costing core deposit accounts.

Average borrowings increased \$84.3 million, or 7.8%, to \$1.16 billion for the quarter ended March 31, 2009, compared to \$1.08 billion for the quarter ended March 31, 2008. Interest paid on borrowed funds decreased \$927,000, or 8.5%, to \$10.0 million for the quarter ended March 31, 2009, from the quarter ended March 31, 2008. The average cost of borrowings was 3.47% for the three months ended March 31, 2009, compared with 4.06% for the three months ended March 31, 2008.

Provision for Loan Losses. Provisions for loan losses are charged to operations in order to maintain the allowance for loan losses at a level management considers appropriate and adequate to absorb probable credit losses in the loan portfolio. In determining the level of the allowance for loan losses, management

Table of Contents

considers past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay the loan and the levels of non-performing and other classified loans. The amount of the allowance is based on estimates, and the ultimate losses may vary from such estimates as more information becomes available or subsequent events change. Management assesses the allowance for loan losses on a quarterly basis and makes provisions for loan losses, if necessary, in order to maintain the adequacy of the allowance. The Company's emphasis on continued diversification of the loan portfolio through the origination of commercial mortgage loans, commercial loans and construction loans has been one of the more significant factors management has considered in evaluating the allowance for loan losses and provision for loan losses. In the event the Company further increases the amount of such types of loans in the portfolio, management may determine that additional or increased provisions for loan losses are necessary, which could adversely affect earnings.

The provision for loan losses was \$5.8 million for the three months ended March 31, 2009, compared with a provision for loan losses of \$1.3 million for the three months ended March 31, 2008. The increase in the provision for loan losses for the three months ended March 31, 2009, compared with the same period in 2008, was primarily attributable to an increase in non-performing loans, downgrades in risk ratings, year-over-year growth in the loan portfolio and an increase in commercial loans as a percentage of the loan portfolio to 48.1% at March 31, 2009, from 46.4% at March 31, 2008. For each of the three-month periods ended March 31, 2009 and 2008, the Company had net charge-offs of \$1.2 million. The allowance for loan losses was \$52.4 million, or 1.20% of total loans at March 31, 2009, compared to \$47.7 million, or 1.05% of total loans at December 31, 2008, and \$40.9 million, or 0.96% of total loans at March 31, 2008.

Non-Interest Income. Non-interest income totaled \$7.0 million for the quarter ended March 31, 2009, a decrease of \$1.8 million, or 20.7%, compared to the same period in 2008. Other income decreased \$886,000 to \$381,000 for the three months ended March 31, 2009, from \$1.3 million for the three months ended March 31, 2008, due to the realization of non-recurring earnings in the first quarter of 2008, including \$660,000 in pre-tax gains associated with the ownership and mandatory redemption of a portion of the Company's Class B Visa, Inc. shares as part of Visa's initial public offering, and \$400,000 in pre-tax gains on the sale of deposits associated with the sale of an under-performing branch. Fee income decreased \$885,000 to \$5.2 million for the three months ended March 31, 2009, from \$6.1 million for the three months ended March 31, 2008, due primarily to lower deposit and loan prepayment fees and reductions in income on funds underlying outstanding official checks as a result of lower short-term interest rates. Income from the appreciation of the cash surrender value of Bank-owned life insurance decreased \$139,000 to \$1.2 million for the quarter ended March 31, 2009, compared with the same period in 2008, primarily as a result of lower carrier crediting rates due to the lower interest rate environment.

Non-Interest Expense. For the three months ended March 31, 2009, non-interest expense increased \$153.8 million, to \$185.8 million, compared to \$32.0 million for the three months ended March 31, 2008. The increase in non-interest expense was primarily due to the goodwill impairment charge of \$152.5 million recorded in the first quarter of 2009. Compensation and benefits expense increased \$764,000 to \$17.5 million for the three months ended March 31, 2009, from \$16.7 million for the three months ended March 31, 2008, due primarily to pre-tax severance costs of \$541,000 recognized in the first quarter of 2009, and increases in pension and healthcare benefits expense. Other operating expenses increased \$476,000 to \$5.8 million for the quarter ended March 31, 2009, from \$5.3 for the same period last year, primarily due to increases in deposit insurance costs and expenses related to foreclosed assets.

Income Tax Expense. For the three months ended March 31, 2009, the Company's income tax expense was \$2.9 million. This compares with \$4.0 million for the same period in 2008. The decrease in income tax expense was attributable to lower pre-tax income and a lower effective tax rate. Excluding the impact of the goodwill impairment charge, which is not tax-deductible, the Company's effective tax rate was 24.7% for the three months ended March 31, 2009, compared with 27.4% for the three months ended March 31, 2008. The reduction in the Company's effective tax rate was a result of a larger proportion of the Company's income being derived from tax-exempt sources.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Qualitative Analysis. Interest rate risk is the exposure of a bank's current and future earnings and capital arising from adverse movements in interest rates. The guidelines of the Company's interest rate risk policy seek to limit the exposure to changes in interest rates that affect the underlying economic value of assets and liabilities, earnings and capital. To minimize interest rate risk, the Company generally sells all 20- and 30-year fixed-rate mortgage loans at origination. Commercial real estate loans generally have interest rates that reset in five years, and other commercial loans such as construction loans and commercial lines of credit reset with changes in the Prime rate, the Federal Funds rate or LIBOR. Investment securities purchases generally have maturities of five years or less, and mortgage-backed securities have weighted average lives between three and five years.

The management Asset/Liability Committee meets on at least a monthly basis to review the impact of interest rate changes on net interest income, net interest margin, net income and the economic value of equity. The Asset/Liability Committee reviews a variety of strategies that project changes in asset or liability mix, various interest rate scenarios and the impact of those changes on projected net interest income and net income.

The Company endeavors to acquire and retain core deposit accounts and expand customer relationships in order to maintain a less interest rate sensitive funding base. The Company's ability to retain maturing certificate of deposit accounts is the result of its strategy to remain competitively priced within its marketplace, typically within the upper quartile of rates offered by its competitors. The Company's pricing strategy may vary depending upon current funding needs and the ability of the Company to fund operations through alternative sources, primarily by accessing short-term lines of credit with the FHLB-NY during periods of pricing dislocation.

Quantitative Analysis. Current and future sensitivity to changes in interest rates are measured through the use of balance sheet and income simulation models. The analyses capture changes in net interest income using flat rates as a base, a most likely rate forecast and rising and declining interest rate forecasts. Changes in net interest income and net income for the forecast period, generally twelve to twenty-four months, are measured and compared to policy limits for acceptable change. The Company periodically reviews historical deposit re-pricing activity and makes modifications to certain assumptions used in its income simulation model regarding the interest rate sensitivity of deposits without maturity dates. These modifications are made to more closely reflect the most likely results under the various interest rate change scenarios. Since it is inherently difficult to predict the sensitivity of interest bearing deposits to changes in interest rates, the changes in net interest income due to changes in interest rates cannot be precisely predicted. There are a variety of reasons that may cause actual results to vary considerably from the predictions presented below which include, but are not limited to, the timing, magnitude, and frequency of changes in interest rates, interest rate spreads, prepayments, and actions taken in response to such changes.

Specific assumptions used in the simulation model include:

Parallel yield curve shifts for market rates;

Current asset and liability spreads to market interest rates are fixed;

Traditional savings and interest bearing demand accounts move at 10% of the rate ramp in either direction;

Money Market accounts move at 5% of the rate ramp in either direction; and

Higher-balance demand deposit tiers and promotional demand accounts move at 50% of the rate ramp in either direction.

Table of Contents

The following table sets forth the results of a twelve-month net interest income projection model as of March 31, 2009 (dollars in thousands):

Change in Interest Rates in Basis Points (Rate Ramp)	Net Interest Income		
	Dollar Amount	Dollar Change	Percent Change
-200	\$ 164,677	\$ (7,217)	(4.2)%
-100	169,184	(2,710)	(1.6)
Static	171,894		
+100	172,163	269	0.2
+200	171,253	(641)	(0.4)

The preceding table indicates that, as of March 31, 2009, in the event of a 200 basis point increase in interest rates, whereby rates ramp up evenly over a twelve-month period, net interest income would decrease 0.4%, or \$641,000. In the event of a 200 basis point decrease in interest rates, net interest income is projected to decrease 4.2%, or \$7.2 million.

Another measure of interest rate sensitivity is to model changes in economic value of equity through the use of immediate and sustained interest rate shocks. The following table illustrates the result of the economic value of equity model as of March 31, 2009 (dollars in thousands):

Change in Interest Rates (Basis Points)	Present Value of Equity			Present Value of Equity as Percent of Present Value of Assets	
	Dollar Amount	Dollar Change	Percent Change	Present Value Ratio	Percent Change
-200	\$ 1,336,404	\$ 53,611	4.2%	18.9%	2.6%
-100	1,309,133	26,340	2.1	18.6	1.2
Flat	1,282,793			18.4	
+100	1,227,546	(55,247)	(4.3)	17.9	(3.0)
+200	1,132,676	(150,117)	(11.7)	16.7	(9.0)

The preceding table indicates that as of March 31, 2009, in the event of an immediate and sustained 200 basis point increase in interest rates, the present value of equity is projected to decrease 11.7%, or \$150.1 million. If rates were to decrease 200 basis points, the model forecasts a 4.2%, or \$53.6 million increase in the present value of equity.

Certain shortcomings are inherent in the methodologies used in the above interest rate risk measurements. Modeling changes in net interest income requires the use of certain assumptions regarding prepayment and deposit decay rates, which may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. While management believes such assumptions are reasonable, there can be no assurance that assumed prepayment rates and decay rates will approximate actual future loan prepayment and deposit withdrawal activity. Moreover, the net interest income table presented assumes that the composition of interest sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and also assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration to maturity or repricing of specific assets and liabilities. Accordingly, although the net interest income table provides an indication of the Company's interest rate risk exposure at a particular point in time, such measurement is not intended to and does not provide a precise forecast of the effect of changes in market interest rates on the Company's net interest income and will differ from actual results.

Table of Contents**Item 4. CONTROLS AND PROCEDURES.**

Under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) were evaluated at the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. There has been no change in the Company's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

The Company is involved in various legal actions and claims arising in the normal course of business. In the opinion of management, these legal actions and claims are not expected to have a material adverse impact on the Company's financial condition and results of operations.

Item 1A. Risk Factors

There have been no material changes to the risk factors that were previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number of Shares that May Yet Be Purchased under the Plans or Programs (1) (2)
January 1, 2009 through January 31, 2009	5,232	\$ 11.36	5,232	2,144,782
February 1, 2009 through February 28, 2009				2,144,782
March 1, 2009 Through March 31, 2009				2,144,782
Total	5,232	\$ 11.36	5,232	

- (1) On October 24, 2007, the Company's Board of Directors approved the purchase of up to 3,107,077 shares of its common stock under a seventh general repurchase program which commenced upon completion of the previous repurchase program. The repurchase program has no expiration date.
