Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: CALLAWAY GOLF CO - Form 10-K

As of June 30, 2010, the aggregate market value of the Registrant's common stock held by nonaffiliates of the Registrant was \$383,577,182 based on the closing sales price of the Registrant's common stock as reported on the New York Stock Exchange. Such amount was calculated by excluding all shares held by directors and executive officers, shares held in treasury, and shares held by the Company's grantor stock trust without conceding that any of the excluded parties are affiliates of the Registrant for purposes of the federal securities laws.

As of January 31, 2011, the number of shares of the Registrant's common stock and preferred stock outstanding was 64,324,498 and 1,400,000, respectively.

Table of Contents**DOCUMENTS INCORPORATED BY REFERENCE**

Part III incorporates certain information by reference from the Registrant's Definitive Proxy Statement to be filed with the Securities and Exchange Commission (Commission) pursuant to Regulation 14A in connection with the Registrant's 2011 Annual Meeting of Shareholders, which is scheduled to be held on May 18, 2011. Such Definitive Proxy Statement will be filed with the Commission not later than 120 days after the conclusion of the Registrant's fiscal year ended December 31, 2010.

Important Notice to Investors: Statements made in this report that relate to future plans, events, liquidity, financial results, or performance, including statements relating to future economic, market, or golf industry conditions, future benefits from the Company's investments in its business, and improved 2011 operational performance and financial results, future cash flows and liquidity and future cost alignment actions, as well as estimated unrecognized stock compensation expense, unrecognized tax benefits, projected capital expenditures, future contractual obligations, the Company's business outlook for 2011, the realization of deferred tax assets, including loss and credit carryforwards and estimated charges related to the Company's restructuring of its global operations are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. These statements are based upon current information and expectations. Actual results may differ materially from those anticipated if the information on which those estimates was based ultimately proves to be incorrect or as a result of certain risks and uncertainties, including changes in economic conditions, credit markets, or foreign currency exchange rates, the level of promotional activity in the marketplace, consumer acceptance and demand for the Company's products, future consumer discretionary purchasing activity (which can be significantly adversely affected by unfavorable economic or market conditions), delays, difficulties, changed strategies, or unanticipated factors including those affecting the implementation of the Company's cost alignment initiatives or initiatives targeted at improving gross margins, as well as the general risks and uncertainties applicable to the Company and its business. For details concerning these and other risks and uncertainties, see Part I, Item 1A, Risk Factors contained in this report, as well as the Company's other reports on Forms 10-Q and 8-K subsequently filed with the Commission from time to time. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Except as required by law, the Company undertakes no obligation to update forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should also be aware that while the Company from time to time does communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Furthermore, the Company has a policy against distributing or confirming financial forecasts or projections issued by analysts and any reports issued by such analysts are not the responsibility of the Company. Investors should not assume that the Company agrees with any report issued by any analyst or with any statements, projections, forecasts or opinions contained in any such report.

PART I

Item 1. Business

Callaway Golf Company (the Company or Callaway Golf) was incorporated in California in 1982 with the main purpose of designing, manufacturing and selling high quality golf equipment. The Company became a publicly traded corporation in 1992, and in 1997, the Company acquired substantially all of the assets of Odyssey Sports, Inc., which manufactured and marketed the Odyssey brand of putters and wedges. The Company reincorporated in Delaware on July 1, 1999 and in 2000, the Company entered the golf ball business with the release of its first golf ball product. In 2003, the Company acquired through a court-approved sale substantially all of the golf-related assets of the TFGC Estate Inc. (f/k/a The Top-Flite Golf Company, f/k/a Spalding Sports Worldwide, Inc.), which included golf ball manufacturing facilities, the Top-Flite and Ben Hogan brands, and all golf-related patents and trademarks (the Top-Flite Acquisition). In 2008, the Company acquired certain assets and liabilities of uPlay, LLC, a developer and marketer of global positioning system (GPS) range finders.

Today, the Company, together with its subsidiaries, designs, manufactures and sells high quality golf clubs (drivers, fairway woods, hybrids, irons, wedges and putters) and golf balls, and also sells golf accessories (such as GPS range finders, golf bags, gloves, footwear, apparel, headwear, eyewear, towels and umbrellas) under the Callaway Golf, Odyssey, Top-Flite, Ben Hogan, and uPro brand names. The Company generally sells its products to retailers, directly and through its wholly-owned subsidiaries, and to third-party distributors. The Company sells pre-owned golf products through its website, www.callawaygolfpreowned.com. In addition, the Company has an online store where consumers can place an order for Callaway Golf, Top-Flite, Ben Hogan and Odyssey products through its website Shop.CallawayGolf.com. The Company also licenses its trademarks and service marks in exchange for a royalty fee to third parties for use on golf and lifestyle products, including apparel, rangefinders, practice aids and travel gear. The Company's products are sold in the United States and in over 100 countries around the world.

Table of Contents**Financial Information about Segments and Geographic Areas**

Information regarding the Company's segments and geographic areas in which the Company operates is contained in Note 19 to the Company's Consolidated Financial Statements for the years ended December 31, 2010, 2009 and 2008 ("Consolidated Financial Statements"), which note is incorporated herein by this reference and is included as part of Item 8 "Financial Statements and Supplementary Data."

Products

The Company designs, manufactures and sells high quality golf clubs and golf balls, and designs and sells golf accessories. The Company designs its products to be technologically advanced and in this regard invests a considerable amount in research and development each year. The Company's products are designed for golfers of all skill levels, both amateur and professional, and are generally designed to conform to the Rules of Golf as published by the United States Golf Association ("USGA") and the R&A Rules Limited (the "R&A"). For further discussion on certain risks associated with product design and development, see below, "Certain Factors Affecting Callaway Golf Company" contained in Item 1A.

The following table sets forth the contribution to net sales attributable to the principal product groups for the periods indicated:

	2010		Year Ended December 31, 2009 ⁽¹⁾		2008	
	(Dollars in millions)					
Drivers and fairway woods	\$ 225.4	23%	\$ 222.6	23%	\$ 268.3	24%
Irons	223.8	23%	232.9	25%	308.5	28%
Putters	106.2	11%	98.1	10%	101.7	9%
Golf balls	176.5	18%	178.5	19%	223.1	20%
Accessories and other	235.8	25%	218.7	23%	215.6	19%
Net sales	\$ 967.7	100%	\$ 950.8	100%	\$ 1,117.2	100%

(1) Certain costs associated with gift card promotions have been reclassified from accessories and other into the applicable product categories to conform with the current period presentation. The Company's gift card promotions during 2008 did not have a material impact to the Company's results of operations and therefore, the amounts presented for 2008 were not impacted by this reclassification.

For a discussion regarding the changes in net sales for each product group from 2010 to 2009 and from 2009 to 2008, see below, "Management's Discussion and Analysis of Financial Condition and Results of Operations" Results of Operations contained in Item 7.

The Company's current principal products by product group are described below:

Drivers and Fairway Woods. This product category includes sales of the Company's drivers, fairway woods and hybrid products, which are sold under the Callaway Golf, Top-Flite and Ben Hogan brands. These products are generally made of metal (either titanium or steel) or a combination of metal and a composite material. The Company's products compete at various price levels in the drivers and fairway woods category. In general, metal drivers, fairway woods and hybrids that incorporate composite materials sell at higher price points than titanium drivers and fairway woods, and titanium products sell at higher price points than steel products. The Company's drivers, fairway woods and hybrid products are available in a variety of lofts, shafts and other specifications to accommodate the preferences and skill levels of all golfers.

Irons. This product category includes sales of the Company's irons and wedges, which are sold under the Callaway Golf, Top-Flite and Ben Hogan brands. The Company's irons are generally made of metal (either titanium, steel or special alloy) or a composite material (a combination of metal and polymer materials). The

Table of Contents

Company's products compete at various price levels in the irons category. In general, the Company's composite metal, titanium and special alloy irons sell at higher price points than its steel irons. The Company's irons are available in a variety of designs, shafts and other specifications to accommodate the preferences and skill levels of all golfers.

Putters. This product category includes sales of the Company's putters, which are sold under the Odyssey and Top-Flite brands. The Company's products compete at multiple price levels in the putters' category. The Company's putters are available in a variety of styles, shafts and other specifications to accommodate the preferences and skill levels of all golfers.

Golf Balls. This product category includes sales of the Company's golf balls, which are primarily sold under the Callaway Golf and Top-Flite brands. The Company's golf balls are generally either a 2-piece golf ball (consisting of a core and cover) or a multilayer golf ball (consisting of two or more components in addition to the cover). The Company's golf ball products include covers that incorporate a traditional dimple pattern as well as covers that incorporate innovative designs, including the Company's proprietary HEX Aerodynamics (i.e., a lattice of tubes that form hexagons and pentagons), dimple-in-dimple, sub-hex and deep dimple technologies. The Company's products compete at all price levels in the golf ball category. In general, the Company's multilayer golf balls sell at higher price points than its 2-piece golf balls.

Accessories and Other. This product category includes sales of golf bags, golf gloves, golf footwear, GPS on-course range finders, golf and lifestyle apparel, packaged club sets, headwear, towels, umbrellas, eyewear and other accessories, as well as sales of pre-owned products through Callaway Golf Interactive, Inc. Additionally, this product category includes royalties from licensing of the Company's trademarks and service marks on products such as golf and lifestyle apparel, watches, travel gear, rangefinders and practice aids.

Product Design and Development

Product design at the Company is a result of the integrated efforts of its brand management, research and development, manufacturing and sales departments, all of which work together to generate new ideas for golf equipment. The Company has not limited itself in its research efforts by trying to duplicate designs that are traditional or conventional and believes it has created a work environment in which new ideas are valued and explored. In 2010, 2009 and 2008, the Company invested \$36.4 million, \$32.2 million and \$29.4 million, respectively, in research and development. The Company intends to continue to invest substantial amounts in its research and development activities in connection with its development of new products.

The Company has the ability to create and modify product designs by using computer aided design (CAD) software, computer aided manufacturing (CAM) software and computer numerical control milling equipment. CAD software enables designers to develop computer models of new product designs. CAM software is then used by engineers to translate the digital output from CAD computer models so that physical prototypes can be produced. Further, the Company utilizes a variety of testing equipment and computer software, including golf robots, launch monitors, a proprietary virtual test center, a proprietary performance analysis system, an indoor test range and other methods to develop and test its products. Through the use of these technologies, the Company has been able to accelerate and make more efficient the design, development and testing of new golf clubs and golf balls.

For certain risks associated with product design and development, see below, "Certain Factors Affecting Callaway Golf Company" contained in Item 1A.

Table of Contents

Manufacturing

The Company has been actively implementing its global operations strategy targeted at improving the Company's gross margins (the Global Operations Strategy). In connection with this initiative, the Company has moved some of its production capabilities for both golf clubs and golf balls to other locations and to third parties outside the United States in order to meet regional demand and reduce costs. As of December 31, 2010, approximately 60% of the Company's golf club and golf ball production volume was generated at third-party sites outside of the United States. During the third quarter of 2010, the Company announced the restructuring of its golf club and golf ball manufacturing and distribution operations, which resulted in the reorganization of the Company's manufacturing and distribution centers located in Carlsbad, California, Toronto, Canada, and Chicopee, Massachusetts, the use of third-party logistics in Dallas, Texas and Toronto, Canada, as well as the establishment of a new production facility in Monterrey, Mexico. This restructuring is designed to add speed and flexibility to customer service demands, optimize efficiencies, and facilitate long-term gross margin improvements. It is estimated that this restructuring will be substantially complete by the end of 2011. The Company intends to maintain limited golf club and golf ball manufacturing and distribution facilities in Carlsbad, California and Chicopee, Massachusetts, respectively.

In general, the Company's golf clubs are assembled using components obtained from suppliers both internationally and within the United States. Significant progress has been made in automating certain facets of the manufacturing process during the last few years and continued emphasis will be placed on automated manufacturing by the Company. However, the overall golf club assembly process remains fairly labor intensive, and requires extensive global supply chain coordination. With respect to golf balls, although a significant amount of labor is still used, the overall manufacturing process is much more automated than the golf club assembly process.

The Company purchases raw materials from numerous domestic and international suppliers in order to meet scheduled production needs. Raw materials include steel, titanium alloys and carbon fiber for the manufacturing of golf clubs, and rubber, plastic ionomers, zinc stearate, zinc oxide and lime stone for the manufacturing of golf balls. For certain risks associated with golf club and golf ball manufacturing, see below, *Certain Factors Affecting Callaway Golf Company* contained in Item 1A.

Sales and Marketing

Sales in the United States

Approximately 48% of the Company's net sales were derived from sales within the United States in 2010, and approximately 50% of net sales in both 2009 and 2008. The Company primarily sells to both on- and off-course golf retailers and sporting goods retailers who sell quality golf products and provide a level of customer service appropriate for the sale of such products. The Company also sells certain products to mass merchants. On a consolidated basis, no one customer that distributes golf clubs or golf balls in the United States accounted for more than 6% of the Company's consolidated revenues in 2010 and 2009 and 5% in 2008. On a segment basis, the golf ball customer base is more concentrated than the golf club customer base. In 2010, the top five golf ball customers accounted for approximately 22% of the Company's total consolidated golf ball sales. A loss of one or more of these customers could have a significant adverse effect upon the Company's golf ball sales.

Sales of the Company's products in the United States are made and supported by full-time regional field representatives and in-house sales and customer service representatives. Most regions in the United States are covered by both a field representative and a dedicated in-house sales representative who work together to initiate and maintain relationships with customers through frequent telephone calls and in-person visits. In addition to these sales representatives, the Company also has dedicated in-house customer service representatives.

In addition, other dedicated sales representatives provide service to corporate customers who want their corporate logo imprinted on the Company's golf balls, putters or golf bags. The Company imprints the logos on

Table of Contents

the majority of these corporate products, thereby retaining control over the quality of the process and final product. The Company also pays a commission to certain on-and off-course professionals and retailers with whom it has a relationship for corporate sales that originate through such professionals and retailers.

The Company also has a separate team of club fitting specialists who focus on the Company's custom club sales. Custom club sales are generated primarily from the utilization of the Company's club fitting programs such as performance centers, which utilize high speed cameras and precision software to capture relevant swing data. All performance centers are also equipped with custom fitting systems, which enable golfers to experiment with an extensive variety of clubhead and shaft combinations based on the golfers' individual swing in order to find the set of golf clubs that fits their personal specifications. The Optifit Fitting System is also utilized by participating on-and off-course retail stores. In addition, the Company utilizes iron and wood fitting carts as well as tour fitting vans with club fitting and building capabilities. Club fittings are performed by golf professionals who are specifically trained to fit golfers of all abilities into custom-fitted clubs. The Company believes that offering golfers the opportunity to increase performance with custom club specifications increases sales and promotes brand loyalty.

The Company maintains various sales programs including a Preferred Retailer Program. The Preferred Retailer Program offers longer payment terms during the initial sell-in period, as well as potential rebates and discounts, for participating retailers in exchange for providing certain benefits to the Company, including the maintenance of agreed upon inventory levels, prime product placement and retailer staff training.

Sales Outside of the United States

Approximately 52% of the Company's net sales were derived from sales for distribution outside of the United States in 2010, and approximately 50% of net sales in both 2009 and 2008. The Company does business (either directly or through its subsidiaries and distributors) in more than 100 countries around the world. The Company's management believes that controlling the distribution of its products in certain major markets in the world has been and will continue to be an important element in the future growth and success of the Company.

The majority of the Company's international sales are made through its wholly-owned subsidiaries located in Europe, Japan, Canada, Korea, Australia, China, India, Malaysia and Thailand. In addition to sales through its subsidiaries, the Company also sells through distributors in over 60 foreign countries, including Singapore, Indonesia, Hong Kong, Taiwan, the Philippines, South Africa, Argentina and various countries in South America. Prices of golf clubs and balls for sales by distributors outside of the United States generally reflect an export pricing discount to compensate international distributors for selling and distribution costs. A change in the Company's relationship with significant distributors could negatively impact the volume of the Company's international sales.

The Company's sales programs in foreign countries are specifically designed based upon local laws and competitive conditions. Some of the sales programs utilized include the custom club fitting experiences and the Preferred Retailer Program or variations of those programs employed in the United States as described above.

Conducting business outside of the United States subjects the Company to increased risks inherent in international business. These risks include but are not limited to foreign currency risks, increased difficulty in protecting the Company's intellectual property rights and trade secrets, unexpected government action or changes in legal or regulatory requirements, and social, economic or political instability. For a complete discussion of these risk factors, see *Certain Factors Affecting Callaway Golf Company* contained in Item 1A below.

Sales of Pre-Owned/Outlet Golf Clubs and Online Store

The Company sells certified pre-owned golf products in addition to golf and lifestyle apparel and golf-related accessories through its websites, www.callawaygolfpreowned.com and www.callawaygolfoutlet.com. The Company generally acquires the pre-owned products through the Company's Trade In! Trade Up! program,

Table of Contents

which gives golfers the opportunity to trade in their used Callaway Golf clubs and certain competitor golf clubs at authorized Callaway Golf retailers or through the Callaway Golf Pre-Owned website for credit toward the purchase of new or pre-owned Callaway Golf equipment. The website for this program is www.tradeintradeup.com.

The Company also offers the full line of Callaway Golf, Top-Flite and Odyssey products, including drivers, fairway woods, hybrids, irons, putters, golf balls, footwear, eyewear, golf and lifestyle apparel and golf-related accessories, including uPro GPS on-course range finders, through its website Shop.CallawayGolf.com.

Advertising and Promotion

Within the United States, the Company has focused its advertising efforts mainly on a combination of printed advertisements in national magazines, such as *Golf Magazine*, *Sports Illustrated* and *Golf Digest*, and television commercials, primarily on The Golf Channel, ESPN and on network television during golf telecasts, as well as web-based advertising. Advertising of the Company's products outside of the United States is generally handled by the Company's subsidiaries, and while it is based on the Company's global brand principles, the local execution is tailored by each region based on their unique consumer market and lifestyles.

In addition, the Company establishes relationships with professional golfers in order to promote the Company's products. The Company has entered into endorsement arrangements with members of the various professional golf tours to promote the Company's golf club and golf ball products as well as golf bags, golf and lifestyle apparel, golf footwear, GPS on-course devices and various golf accessories. For certain risks associated with such endorsements, see below, "Certain Factors Affecting Callaway Golf Company" contained in Item 1A.

Competition

The golf club markets in which the Company competes are highly competitive and are served by a number of well-established and well-financed companies with recognized brand names. With respect to drivers, fairway woods and irons, the Company's major competitors are TaylorMade, Ping, Acushnet (Titleist brand), Puma (Cobra brand), SRI Sports Limited (Cleveland and Srixon brands), Mizuno, Bridgestone and Nike. For putters, the Company's major competitors are Titleist, Ping and TaylorMade. In addition, the Company also competes with SRI Sports Limited (Dunlop and XXIO brands) and Yamaha among others in Japan and throughout Asia. The Company believes that it is the leader, or one of the leaders, in every golf club market in which it competes.

The golf ball business is also highly competitive. There are a number of well-established and well-financed competitors, including Acushnet (Titleist and Pinnacle brands), SRI Sports Limited (Dunlop and Srixon brands), Bridgestone (Bridgestone and Precept brands), Nike, TaylorMade and others. These competitors compete for market share in the golf ball business, with Acushnet having a market share of over 50% of the golf ball business in the United States and a leading position in certain other regions outside the United States. The Company's golf ball products continue to be well received by both professional and amateur golfers alike, and continue to receive a significant degree of usage on the major professional golf tours and maintained the number two position on the PGA Tour in 2010. In addition, the Company shared the number two position in U.S. golf ball revenue market share with Bridgestone in 2010.

For both golf clubs and golf balls, the Company generally competes on the basis of technology, quality, performance, customer service and price. In order to gauge the effectiveness of the Company's response to such factors, its management receives and evaluates Company-generated market research for U.S. and foreign markets, as well as periodic public and customized market research from *Golf DataTech* for U.S. and U.K. markets, and from *GfK Group* for the market in Japan.

For risks relating to competition, see below, "Certain Factors Affecting Callaway Golf Company" contained in Item 1A.

Table of Contents

Environmental Matters

The Company's operations are subject to federal, state and local environmental laws and regulations that impose limitations on the discharge of pollutants into the environment and establish standards for the handling, generation, emission, release, discharge, treatment, storage and disposal of certain materials, substances and wastes and the remediation of environmental contaminants (Environmental Laws). In the ordinary course of its manufacturing processes, the Company uses paints, chemical solvents and other materials, and generates waste by-products, that are subject to these Environmental Laws. In addition, in connection with the Top-Flite Acquisition, the Company assumed certain monitoring and remediation obligations at its manufacturing facility in Chicopee, Massachusetts.

The Company adheres to all applicable Environmental Laws and takes action as necessary to comply with these laws. The Company maintains an environmental and safety program and employs two full-time senior environmental engineers at its Carlsbad, California facility and an environmental, health and safety manager at its Chicopee, Massachusetts facility as well as at its Monterrey, Mexico facility. The environmental and safety program includes obtaining environmental permits as required, capturing and appropriately disposing of any waste by-products, tracking hazardous waste generation and disposal, air emissions, safety situations, material safety data sheet management, storm water management and recycling, and auditing and reporting on its compliance.

Historically, the costs of environmental compliance have not had a material adverse effect upon the Company's business. Furthermore, the Company believes that the monitoring and remedial obligations it assumed in connection with the Top-Flite Acquisition did not have and are not expected to have a material adverse effect upon the Company's business. The Company believes that its operations are in substantial compliance with all applicable Environmental Laws.

Sustainability

The Company believes it is important to conduct its business in an environmentally, economically, and socially sustainable manner. In this regard, the Company has implemented an environmental sustainability initiative which focuses on key performance indicators and business objectives, including reductions of volatile organic compound (VOC) emissions, reductions of hazardous waste, reductions in water usage, improved recycling and expansion of its Green Chemistry initiative which involves the elimination or reduction of undesirable chemicals and solvents in favor of chemically similar functional alternatives. These efforts cross divisional lines and are visible in the following areas within the Company. These programs are routinely monitored through metrics reporting and reviewed by senior management.

Facilities through the Cool Planet Project (a partnership with the Company's local utility company designed to encourage large industrial customers to install energy efficiency projects in return for cost effective, user-friendly assistance to measure and further reduce greenhouse gas emissions);

Manufacturing through automation and waste minimization;

Product development through design efficiency and specification of environmentally preferred substances;

Logistics improvements and packaging minimization; and

Supply chain management through Social, Safety, and Environmental Responsibility audits of suppliers.

The Company also has two existing programs focusing on the community, the Callaway Golf Company Foundation and the Callaway Golf Company Employee Community Giving Department. Through these programs the Company and its employees are able to give back to the community through monetary donations and by providing community services. Information on both of these programs is available on the Company's website at www.callawaygolf.com. By being active and visible in the community and by embracing the tenets of environmental stewardship, the Company believes it is acting in an economically sustainable manner.

Table of Contents

Intellectual Property

The Company is the owner of approximately 3,200 U.S. and foreign trademark registrations and over 2,500 U.S. and foreign patents relating to the Company's products, product designs, manufacturing processes and research and development concepts. Other patent and trademark applications are pending and await registration. In addition, the Company owns various other protectable rights under copyright, trade dress and other statutory and common laws. The Company's intellectual property rights are very important to the Company and the Company seeks to protect such rights through the registration of trademarks and utility and design patents, the maintenance of trade secrets and the creation of trade dress. When necessary and appropriate, the Company enforces its rights through litigation. Information regarding current litigation matters in connection with intellectual property is contained in Item 3 "Legal Proceedings" below and in Note 17 to the Company's Consolidated Financial Statements, "Commitments and Contingencies - Legal Matters."

The Company's patents are generally in effect for up to 20 years from the date of the filing of the patent application. The Company's trademarks are generally valid as long as they are in use and their registrations are properly maintained and have not been found to become generic. See below, "Certain Factors Affecting Callaway Golf Company" contained in Item 1A.

Licensing

The Company from time to time, in exchange for a royalty fee, licenses its trademarks and service marks to third parties for use on products such as golf and lifestyle apparel, watches, travel gear, rangefinders and practice aids. With respect to its line of golf and lifestyle apparel, the Company has current licensing arrangements with Sanei International Co., Ltd. for a complete line of men's and women's apparel for distribution in Japan, Korea, China and other Asian Pacific countries, and Perry Ellis International for a complete line of men's and women's apparel for distribution in the United States, Canada and Mexico.

In addition to apparel, the Company has also licensed its trademarks to, among others, (i) IZZO Golf for practice aids, (ii) TRG Accessories, LLC for a collection primarily consisting of travel gear, (iii) Nikon Vision Co., Ltd. for rangefinders, (iv) Sweda Company, LLC for a collection of padfolios, pens and other gift items for the corporate market, and (v) Walman Optical, for a line of prescription Callaway eyewear. In addition, the Company designs and sells its own line of footwear and eyewear, and has entered into buying service agreements with Advanced Manufacturing Group Ltd. for footwear and MicroVision Optical Inc. for eyewear.

Employees

As of December 31, 2010, the Company and its subsidiaries had approximately 2,100 full-time and part-time employees. This number was reduced from 2,300 full-time and part-time employees as of December 31, 2009, in part due to the Company's restructuring of its golf club and golf ball manufacturing and distribution operations, which was announced during the third quarter of 2010, as well as cost reduction initiatives intended to mitigate the negative impacts of the economy on the Company's results of operations. These reductions were offset by an increase in personnel as a result of the Company's efforts to expand operations in regions outside the United States. The Company also employs temporary workers as the business requires.

The Company's golf ball manufacturing employees in Chicopee, Massachusetts, are unionized and are covered under a collective bargaining agreement, which expires on September 30, 2011. In addition, certain of the Company's production employees in Canada and Australia are also unionized. The Company considers its employee relations to be good.

Table of Contents**Executive Officers of the Registrant**

Biographical information concerning the Company's executive officers is set forth below.

Name	Age	Position(s) Held
George Fellows	68	President and Chief Executive Officer, Director
Steven C. McCracken	60	Senior Executive Vice President and Chief Administrative Officer
Bradley J. Holiday	57	Senior Executive Vice President and Chief Financial Officer
David A. Laverty	53	Senior Vice President, Operations
Thomas T. Yang	58	Senior Vice President, International
Jeffrey M. Colton	38	Senior Vice President, U.S.

George Fellows is President and Chief Executive Officer of the Company as well as one of its Directors. He has served in such capacities since joining the Company in August 2005. Prior to joining the Company, during the period from 2000 through July 2005, he served as President and Chief Executive Officer of GF Consulting, a management consulting firm, and served as Senior Advisor to Investcorp International, Inc. and J.P. Morgan Partners, LLC. Previously, Mr. Fellows was a member of senior management of Revlon, Inc. from 1993 to 1999, including his terms as President, which commenced in 1995, and Chief Executive Officer, which began in 1997. He is a member of the board of directors of VF Corporation (a global apparel company) and the California Governor's Council on Physical Fitness and Sports. Mr. Fellows is also chair of the Audit Committee and a member of the Nominating and Governance Committee of VF Corporation. Mr. Fellows graduated with a B.S. degree from City College of New York, received an MBA from Columbia University and completed the Harvard Advanced Management Program.

Steven C. McCracken is Senior Executive Vice President and Chief Administrative Officer of the Company and has served in such capacity since October 2005. He previously served as Senior Executive Vice President, Chief Legal Officer and Secretary from August 2000 until October 2005. He served as Executive Vice President, Licensing and Chief Legal Officer from April 1997 to August 2000. He has served as an Executive Vice President since April 1996 and served as General Counsel from April 1994 to April 1997. He served as Vice President from April 1994 to April 1996. He served as Secretary from April 1994 to December 2008. Prior to joining the Company, Mr. McCracken was a partner at Gibson, Dunn & Crutcher LLP for 11 years, and had been in the private practice of law for over 18 years. During a portion of that period, he provided legal services to the Company. Mr. McCracken serves on the boards of Pro Kids Golf Academy and Learning Center (First Tee of San Diego) and Top Golf International, Inc. (in which the Company has a minority interest investment) and is Chair of the U.S. Golf Manufacturers Council. Mr. McCracken received a B.A., magna cum laude, from the University of California at Irvine and a J.D. from the University of Virginia.

Bradley J. Holiday is Senior Executive Vice President and Chief Financial Officer of the Company and has served in such capacity since September 2003. Mr. Holiday previously served as Executive Vice President and Chief Financial Officer beginning in August 2000. Before joining the Company, Mr. Holiday served as Vice President Finance for Gateway, Inc. Prior to Gateway, Inc., Mr. Holiday was with Nike, Inc. in various capacities beginning in April 1993, including Chief Financial Officer Golf Company, where he directed all global financial initiatives and strategic planning for Nike, Inc.'s golf business. Prior to Nike, Inc., Mr. Holiday served in various financial positions with Pizza Hut, Inc. and General Mills, Inc. Mr. Holiday has an M.B.A. in Finance from the University of St. Thomas and a B.S. in Accounting from Iowa State University.

David A. Laverty is Senior Vice President, Global Operations of the Company and has served in such capacity since August 2006. Prior to joining the Company, Mr. Laverty was a Senior Vice President with Vertis Inc., in Baltimore, Maryland. Previously, until April 2005, he had spent 25 years at Revlon in numerous operations management posts. He has a B.A. in Economics from Temple University.

Table of Contents

Thomas T. Yang is Senior Vice President, International and has served in such capacity since joining the Company in July 2006. Until July 2006, Mr. Yang served as Senior Vice President of Global Consumer Products, International for Starbucks Corporation, a position he held for the last 16 months of the nearly five years he worked for Starbucks. He also previously served in international roles for Coca Cola, Proctor & Gamble and the Clorox Company. Mr. Yang serves on the University of San Diego Business School Board of Advisors and Gemological Institute of America Board of Governors. He graduated from the University of Colorado with a B.S. in Marketing and has a Masters of International Management from the American Graduate School of International Management (Thunderbird) in Arizona.

Jeffrey M. Colton is Senior Vice President, U.S. and has served in such capacity since August 2009. Until August 2009, Mr. Colton held the position of Senior Vice President, Research and Development for the Company, overseeing the innovation and advanced design process for the Callaway Golf, Odyssey, Top-Flite and Ben Hogan brands. He began his career at the Company as a research assistant in 1994 and advanced through positions of increasing responsibility in both R&D and Marketing. Mr. Colton earned a Bachelor of Science degree in Applied Physics from Harvey Mudd College in Claremont, California.

Information with respect to the Company's employment agreements with its Chief Executive Officer, Chief Financial Officer and other three most highly compensated executive officers will be contained in the Company's definitive Proxy Statement in connection with the 2011 Annual Meeting of Shareholders. In addition, copies of the employment agreements are included as exhibits to this report.

Access to SEC Filings through Company Website

Interested readers can access the Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act) through the Investor Relations section of the Company's website at www.callawaygolf.com. These reports can be accessed free of charge from the Company's website as soon as reasonably practicable after the Company electronically files such materials with, or furnishes them to, the Commission. In addition, the Company's Corporate Governance Guidelines, Code of Conduct and the written charters of the committees of the Board of Directors are available in the Corporate Governance portion of the Investor Relations section of the Company's website and are available in print to any shareholder who requests a copy. The information contained on the Company's website shall not be deemed to be incorporated into this report.

Item 1A. Risk Factors

Certain Factors Affecting Callaway Golf Company

The Company's business, operations and financial condition are subject to various risks and uncertainties. We urge you to carefully consider the risks and uncertainties described below, together with all of the other information in this Annual Report on Form 10-K, including those risks set forth under the heading entitled Important Notice to Investors, and in other documents that the Company files with the U.S. Securities and Exchange Commission, before making any investment decision with respect to the Company's securities. If any of the risks or uncertainties actually occur or develop, the Company's business, financial condition, results of operations and future growth prospects could be adversely affected. Under these circumstances, the trading prices of the Company's securities could decline, and you could lose all or part of your investment in the Company's securities.

Unfavorable economic conditions could have a negative impact on consumer discretionary spending and therefore reduce sales of the Company's products.

The Company sells golf clubs, golf balls and golf accessories. These products are recreational in nature and are therefore discretionary purchases for consumers. Consumers are generally more willing to make discretionary purchases of golf products during favorable economic conditions and when consumers are feeling confident and

Table of Contents

prosperous. Discretionary spending is also affected by many other factors, including general business conditions, interest rates, the availability of consumer credit, taxes, and consumer confidence in future economic conditions. Purchases of the Company's products could decline during periods when disposable income is lower, or during periods of actual or perceived unfavorable economic conditions. A significant or prolonged decline in general economic conditions or uncertainties regarding future economic prospects that adversely affect consumer discretionary spending, whether in the United States or in the Company's international markets, could result in reduced sales of the Company's products, which could have a negative impact on the Company's results of operations, financial condition and cash flows.

A severe or prolonged economic downturn could adversely affect our customers' financial condition, their levels of business activity and their ability to pay trade obligations.

The Company primarily sells its products to golf equipment retailers directly and through wholly-owned domestic and foreign subsidiaries, and to foreign distributors. The Company performs ongoing credit evaluations of its customers' financial condition and generally requires no collateral from these customers. Historically, the Company's bad debt expense has been low. However, a prolonged downturn in the general economy could adversely affect the retail golf equipment market which in turn, would negatively impact the liquidity and cash flows of our customers, including the ability of our customers to obtain credit to finance purchases of our products and to pay their trade obligations. This could result in increased delinquent or uncollectible accounts for some of the Company's significant customers. A failure by the Company's customers to pay on a timely basis a significant portion of outstanding account receivable balances would adversely impact the Company's results of operations, financial condition and cash flows.

The Company has significant international sales and purchases, and unfavorable changes in foreign currency exchange rates could significantly affect the Company's results of operations.

A significant portion of the Company's purchases and sales are international purchases and sales, and the Company conducts transactions in approximately 14 currencies worldwide. Conducting business in such various currencies exposes the Company to fluctuations in foreign currency exchange rates relative to the U.S. dollar.

The Company's financial results are reported in U.S. dollars. As a result, transactions conducted in foreign currencies must be translated into U.S. dollars for reporting purposes based upon the applicable foreign currency exchange rates. Fluctuations in these foreign currency exchange rates therefore may positively or negatively affect the Company's reported financial results and can significantly affect period-over-period comparisons.

The effect of the translation of foreign currencies on the Company's financial results can be significant. The Company therefore from time to time engages in certain hedging activities to mitigate over time the impact of the translation of foreign currencies on the Company's financial results. The Company's hedging activities can reduce, but will not eliminate, the effects of foreign currency fluctuations. The extent to which the Company's hedging activities mitigate the effects of foreign currency translation varies based upon many factors, including the amount of transactions being hedged. The Company generally only hedges a limited portion of its international transactions. Other factors that could affect the effectiveness of the Company's hedging activities include accuracy of sales forecasts, volatility of currency markets and the availability of hedging instruments. Since the hedging activities are designed to reduce volatility, they not only reduce the negative impact of a stronger U.S. dollar but also reduce the positive impact of a weaker U.S. dollar. The Company's future financial results could be significantly affected by the value of the U.S. dollar in relation to the foreign currencies in which the Company conducts business.

Foreign currency fluctuations can also affect the prices at which products are sold in the Company's international markets. The Company therefore adjusts its pricing based in part upon fluctuations in foreign currency exchange rates. Significant unanticipated changes in foreign currency exchange rates make it more difficult for the Company to manage pricing in its international markets. If the Company is unable to adjust its

Table of Contents

pricing in a timely manner to counteract the effects of foreign currency fluctuations, the Company's pricing may not be competitive in the marketplace and the Company's financial results in its international markets could be adversely affected.

The Company's obligations and certain financial covenants contained under the existing Line of Credit expose it to risks that could adversely affect its business, operating results and financial condition.

The Company's primary credit facility is comprised of a \$250.0 million Line of Credit with a syndicate of eight banks under the terms of the November 5, 2004, Amended and Restated Credit Agreement (as subsequently amended, the Line of Credit). The Line of Credit expires on February 15, 2012 and provides for revolving loans of up to \$250.0 million, although actual borrowing availability can be effectively limited by the financial covenants contained therein, including a maximum consolidated leverage ratio and a minimum interest coverage ratio. Both the maximum consolidated leverage ratio and minimum interest coverage ratio are based in part upon the Company's trailing four quarters' earnings before interest, income taxes, depreciation and amortization, as well as other non-cash expense and income items as defined in the agreement governing the Line of Credit (adjusted EBITDA).

If the Company experiences a decline in revenues or adjusted EBITDA, the Company may have difficulty paying interest and principal amounts due on our Line of Credit or other indebtedness and meeting certain of the financial covenants contained in the Line of Credit. If the Company is unable to make required payments under the Line of Credit, or if the Company fails to comply with the various covenants and other requirements of the Line of Credit or other indebtedness, the Company would be in default thereunder, which would permit the holders of the indebtedness to accelerate the maturity thereof and increase the interest rate thereon. Any default under the Line of Credit or other indebtedness could have a significant adverse effect on the Company's liquidity, business, operating results and financial condition and ability to make any dividend or other payments on the Company's capital stock.

The Company relies on its Line of Credit to provide additional liquidity and if the Company could not replace its Line of Credit upon expiration, the Company's liquidity would be significantly adversely affected.

The Company's Line of Credit expires on February 15, 2012. The Company expects to be able to replace its Line of Credit on or before its expiration. If due to the economic environment, the Company's performance or financial condition, or other factors the Company is unable to obtain replacement financing at a reasonable cost and in a timely manner, the Company's liquidity would be significantly adversely affected and the Company's business, operating results, financial condition and ability to make any dividend or other payments on the Company's capital stock, would be significantly adversely affected.

If the Company is unable to successfully manage the frequent introduction of new products that satisfy changing consumer preferences, it could adversely impact its financial performance and prospects for future growth.

The Company's main products, like those of its competitors, generally have life cycles of two years or less, with sales occurring at a much higher rate in the first year than in the second. Factors driving these short product life cycles include the rapid introduction of competitive products and quickly changing consumer preferences. In this marketplace, a substantial portion of the Company's annual revenues is generated each year by products that are in their first year of life.

These marketplace conditions raise a number of issues that the Company must successfully manage. For example, the Company must properly anticipate consumer preferences and design products that meet those preferences while also complying with significant restrictions imposed by the Rules of Golf (see further discussion of the Rules of Golf below) or its new products will not achieve sufficient market success to compensate for the usual decline in sales experienced by products already in the market. Second, the Company's R&D and supply chain groups face constant pressures to design, develop, source and supply new products that

Table of Contents

perform better than their predecessors many of which incorporate new or otherwise untested technology, suppliers or inputs. Third, for new products to generate equivalent or greater revenues than their predecessors, they must either maintain the same or higher sales levels with the same or higher pricing, or exceed the performance of their predecessors in one or both of those areas. Fourth, the relatively short window of opportunity for launching and selling new products requires great precision in forecasting demand and assuring that supplies are ready and delivered during the critical selling periods. Finally, the rapid changeover in products creates a need to monitor and manage the closeout of older products both at retail and in the Company's own inventory. Should the Company not successfully manage all of the risks associated with this rapidly moving marketplace, the Company's results of operations, financial condition and cash flows could be significantly adversely affected.

A reduction in the number of rounds of golf played or in the number of golf participants could adversely affect the Company's sales.

The Company generates substantially all of its revenues from the sale of golf-related products, including golf clubs, golf balls and golf accessories. The demand for golf-related products in general, and golf balls in particular, is directly related to the number of golf participants and the number of rounds of golf being played by these participants. If golf participation or the number of rounds of golf played decreases, sales of the Company's products may be adversely affected. In the future, the overall dollar volume of the market for golf-related products may not grow or may decline.

In addition, the demand for golf products is also directly related to the popularity of magazines, cable channels and other media dedicated to golf, television coverage of golf tournaments and attendance at golf events. The Company depends on the exposure of its products through advertising and the media or at golf tournaments and events. Any significant reduction in television coverage of, or attendance at, golf tournaments and events or any significant reduction in the popularity of golf magazines or golf channels, could reduce the visibility of the Company's brand and could adversely affect the Company's sales.

The Company may have limited opportunities for future growth in sales of golf clubs and golf balls.

In order for the Company to significantly grow its sales of golf clubs or golf balls, the Company must either increase its share of the market for golf clubs or balls, or the market for golf clubs or balls must grow. The Company already has a significant share of worldwide sales of golf clubs and golf balls. Therefore, opportunities for additional market share may be limited. The Company also believes that overall dollar volume of the worldwide market for golf equipment sales has declined over the past two years. In the future, the overall dollar volume of worldwide sales of golf clubs or golf balls may not grow or may continue to decline.

If the Company inaccurately forecasts demand for its products, it may manufacture either insufficient or excess quantities, which, in either case, could adversely affect its financial performance.

The Company plans its manufacturing capacity based upon the forecasted demand for its products. The nature of the Company's business makes it difficult to quickly adjust its manufacturing capacity if actual demand for its products exceeds or is less than forecasted demand. If actual demand for its products exceeds the forecasted demand, the Company may not be able to produce sufficient quantities of new products in time to fulfill actual demand, which could limit the Company's sales and adversely affect its financial performance. On the other hand, if actual demand is less than the forecasted demand for its products, the Company could produce excess quantities, resulting in excess inventories and related obsolescence charges that could adversely affect the Company's financial performance.

The Company depends on single source or a limited number of suppliers for some of its products, and the loss of any of these suppliers could harm its business.

The Company is dependent on a limited number of suppliers for its clubheads and shafts, some of which are single sourced. Furthermore, some of the Company's products require specially developed manufacturing

Table of Contents

techniques and processes which make it difficult to identify and utilize alternative suppliers quickly. In addition, many of the Company's suppliers are not well capitalized and prolonged unfavorable economic conditions could increase the risk that they will go out of business. If current suppliers are unable to deliver clubheads, shafts or other components, or if the Company is required to transition to other suppliers, the Company could experience significant production delays or disruption to its business. The Company also depends on a single or a limited number of suppliers for the materials it uses to make its golf balls. Many of these materials are customized for the Company. Any delay or interruption in such supplies could have a material adverse impact upon the Company's golf ball business. If the Company did experience any such delays or interruptions, the Company may not be able to find adequate alternative suppliers at a reasonable cost or without significant disruption to its business.

A significant disruption in the operations of the Company's golf club assembly and golf ball manufacturing and assembly facilities could have a material adverse effect on the Company's sales, profitability and results of operations.

A significant amount of the Company's golf club products are assembled at and shipped from its facilities in Carlsbad, California and a significant amount of the Company's golf ball products are manufactured at and shipped from its facilities in Chicopee, Massachusetts. During the third quarter of 2010, the Company announced its plans to move most of the golf club assembly and golf ball manufacturing and assembly operations to its new facilities in Mexico. This transition could result in a significant disruption to the operation of these facilities, which could substantially disrupt the Company's global supply chain coordination for the relevant golf club or golf ball business segment, including damage to inventory at the respective facilities. In addition, the Company could incur significantly higher costs and longer delivery times associated with fulfilling orders and distributing product. As a result, a significant disruption at any of the Company's golf club or golf ball manufacturing facilities as a result of the transition of the facilities to Mexico or otherwise could adversely affect the Company's sales, profitability and results of operations.

If the Company is unable to obtain at reasonable costs materials or electricity necessary for the manufacture of its products, its business could be adversely affected.

The Company's size has made it a large consumer of certain materials, including steel, titanium alloys, carbon fiber and rubber. The Company does not produce these materials itself, and must rely on its ability to obtain adequate supplies in the world marketplace in competition with other users of such materials. In the future, the Company may not be able to obtain its requirements for such materials at a reasonable price or at all. An interruption in the supply of the materials used by the Company or a significant change in costs could have a material adverse effect on the Company's business.

The Company's golf club and golf ball manufacturing facilities use, among other resources, significant quantities of electricity to operate. An interruption in the supply of electricity or a significant increase in the cost of electricity could have a significant adverse effect upon the Company's results of operations.

A disruption in the service or a significant increase in the cost of the Company's primary delivery and shipping services for its products and component parts could have a material adverse effect on the Company's business.

The Company uses United Parcel Service (UPS) for substantially all ground shipments of products to its U.S. customers. The Company uses air carriers and ocean shipping services for most of its international shipments of products. Furthermore, many of the components the Company uses to build its golf clubs, including clubheads and shafts, are shipped to the Company via air carrier and ship services. The Company's inbound and outbound shipments are particularly dependent upon air carrier facilities at Los Angeles International Airport and ship service facilities at the Port of Los Angeles (Long Beach). If there is any significant interruption in service by such providers or at other significant airports or shipping ports, the Company may be unable to engage

Table of Contents

alternative suppliers or to receive or ship goods through alternate sites in order to deliver its products or components in a timely and cost-efficient manner. As a result, the Company could experience manufacturing delays, increased manufacturing and shipping costs, and lost sales as a result of missed delivery deadlines and product demand cycles. Any significant interruption in UPS services, air carrier services or ship services could have a material adverse effect upon the Company's business. Furthermore, if the cost of delivery or shipping services were to increase significantly and the additional costs could not be covered by product pricing, the Company's operating results could be significantly adversely affected.

The Company faces intense competition in each of its markets and if it is unable to maintain a competitive advantage, loss of market share, revenue, or profitability may result.

Golf Clubs. The golf club business is highly competitive, and is served by a number of well-established and well-financed companies with recognized brand names. New product introductions, price reductions, consignment sales, extended payment terms, closeouts, including closeouts of products that were recently commercially successful, and significant tour and advertising spending by competitors continue to generate intense market competition. Furthermore, continued downward pressure on pricing in the market for new clubs could have a significant adverse effect on the Company's pre-owned club business as the gap narrows between the cost of a new club and a pre-owned club. Successful marketing activities, discounted pricing, consignment sales, extended payment terms or new product introductions by competitors could negatively impact the Company's future sales.

Golf Balls. The golf ball business is also highly competitive. There are a number of well-established and well-financed competitors, including one competitor with an estimated U.S. market share of approximately 50%. As the Company's competitors continue to incur significant costs in the areas of advertising, tour and other promotional support, the Company will continue to incur significant expenses in both tour and advertising support and product development. Unless there is a change in competitive conditions, these competitive pressures and increased costs will continue to adversely affect the profitability of the Company's golf ball business.

Accessories. The Company's accessories include golf bags, golf gloves, golf footwear, golf and lifestyle apparel and other items. The Company faces significant competition in every region with respect to each of these product categories. In most cases, the Company is not the market leader with respect to its accessory markets.

The Company's golf ball business has a concentrated customer base. The loss of one or more of the Company's top customers could have a significant negative impact on this business.

On a consolidated basis, no one customer that distributes golf clubs or golf balls in the United States accounted for more than 6% of the Company's consolidated revenues in 2010 and 2009 and 5% in 2008. On a segment basis, the golf ball customer base is much more concentrated than the golf club customer base. In 2010, the top five golf ball customers accounted for approximately 22% of the Company's total consolidated golf ball sales. A loss of one or more of these customers could have a significant adverse effect upon the Company's golf ball sales.

International political instability and terrorist activities may decrease demand for the Company's products and disrupt its business.

Terrorist activities and armed conflicts could have an adverse effect upon the United States or worldwide economy and could cause decreased demand for the Company's products as consumers' attention and interest are diverted from golf and become focused on issues relating to these events. If such events disrupt domestic or international air, ground or sea shipments, or the operation of the Company's manufacturing facilities, the Company's ability to obtain the materials necessary to produce its products, to manufacture its products, and to deliver customer orders would be harmed, which would have a significant adverse effect on the Company's results of operations, financial condition and cash flows. Furthermore, such events can negatively impact tourism, which could adversely affect the Company's sales to retailers at resorts and other vacation destinations.

Table of Contents

The Company's business could be harmed by the occurrence of natural disasters or pandemic diseases.

The occurrence of a natural disaster, such as an earthquake, fire, flood or hurricane, or the outbreak of a pandemic disease, could significantly adversely affect the Company's business. A natural disaster or a pandemic disease could significantly adversely affect both the demand for the Company's products as well as the supply of the components used to make the Company's products. Demand for golf products also could be negatively affected as consumers in the affected regions restrict their recreational activities and as tourism to those areas declines. If the Company's suppliers experienced a significant disruption in their business as a result of a natural disaster or pandemic disease, the Company's ability to obtain the necessary components to make its products could be significantly adversely affected. In addition, the occurrence of a natural disaster or the outbreak of a pandemic disease generally restricts the travel to and from the affected areas, making it more difficult in general to manage the Company's international operations.

The Company's business and operating results are subject to seasonal fluctuations, which could result in fluctuations in its operating results and stock price.

The Company's business is subject to seasonal fluctuations. The Company's first quarter sales generally represent the Company's sell-in to the golf retail channel of its golf club products for the new golf season. Orders for many of these sales are received during the fourth quarter of the prior year. The Company's second and third quarter sales generally represent reorder business for golf clubs. Sales of golf clubs during the second and third quarters are significantly affected not only by the sell-through of the Company's products that were sold into the channel during the first quarter but also by the sell-through of products by the Company's competitors. Retailers are sometimes reluctant to reorder the Company's products in significant quantity when they already have excess inventory of products of the Company or its competitors. The Company's sales of golf balls are generally associated with the level of rounds played in the areas where the Company's products are sold. Therefore, golf ball sales tend to be greater in the second and third quarters, when the weather is good in most of the Company's key markets and rounds played are up. Golf ball sales are also stimulated by product introductions as the retail channel takes on initial supplies. Like golf clubs, reorders of golf balls depend on the rate of sell-through. The Company's sales during the fourth quarter are generally significantly less than the other quarters because in many of the Company's principal markets fewer people are playing golf during that time of year due to cold weather. Furthermore, the Company generally announces its new product line in the fourth quarter to allow retailers to plan for the new golf season. Such early announcements of new products could cause golfers, and therefore the Company's customers, to defer purchasing additional golf equipment until the Company's new products are available. Such deferments could have a material adverse effect upon sales of the Company's current products or result in closeout sales at reduced prices.

The seasonality of the Company's business could exacerbate the adverse effects of unusual or severe weather conditions on the Company's business.

Due to the seasonality of the Company's business, the Company's business can be significantly adversely affected by unusual or severe weather conditions. Unfavorable weather conditions generally result in fewer golf rounds played, which generally results in reduced demand for all golf products, and in particular, golf balls. Furthermore, catastrophic storms can negatively affect golf rounds played both during the storms and afterward, as storm damaged golf courses are repaired and golfers focus on repairing the damage to their homes, businesses and communities. Consequently, sustained adverse weather conditions, especially during the warm weather months, could materially affect the Company's sales.

Goodwill and intangible assets represent a significant portion of our total assets and any impairment of these assets could negatively impact our results of operations and shareholders' equity.

The Company's goodwill and intangible assets consist of goodwill from acquisitions, trade names, trademarks, service marks, trade dress, patents, and other intangible assets.

Table of Contents

Accounting rules require that the Company's goodwill and intangible assets with indefinite lives be evaluated for impairment at least annually. In addition, accounting rules require that the Company's goodwill and intangible assets, including intangible assets with definite lives, be evaluated for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Such indicators include a sustained decline in the Company's stock price or market capitalization, adverse changes in economic or market conditions or prospects, and changes in the Company's operations.

An asset is considered to be impaired when its carrying value exceeds its fair value. The Company determines the fair value of an asset based upon the discounted cash flows expected to be realized from the use and ultimate disposition of the asset. If in conducting an impairment evaluation the Company were to determine that the carrying value of an asset exceeded its fair value, the Company would be required to record a non-cash impairment charge for the difference between the carrying value and the fair value of the asset. If a significant amount of the Company's goodwill and intangible assets were deemed to be impaired, the Company's results of operations and shareholders' equity would be significantly adversely affected.

The Company's ability to utilize all or a portion of its U.S. deferred tax assets may be limited significantly if the Company experiences an ownership change.

The Company has a significant amount of U.S. federal and state deferred tax assets, which include net operating loss carryforwards (NOLs) and other losses. The Company's ability to utilize the losses to offset future taxable income may be limited significantly if the Company were to experience an ownership change as defined in section 382 of the Internal Revenue Code of 1986, as amended (the Code). In general, an ownership change will occur if there is a cumulative increase in ownership of the Company's stock by 5-percent shareholders (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period. The determination of whether an ownership change has occurred for purposes of Section 382 is complex and requires significant judgment. The extent to which the Company's ability to utilize the losses is limited as a result of such an ownership change depends on many variables, including the value of the Company's stock at the time of the ownership change. Although the Company's ownership has changed significantly during the three-year period ended December 31, 2010 (due in significant part to the Company's June 2009 preferred stock offering), the Company does not believe there has been a cumulative increase in ownership in excess of 50 percentage points during that period. The Company continues to monitor changes in ownership. If such a cumulative increase did occur in any three year period and the Company were limited in the amount of losses it could use to offset taxable income, the Company's results of operations and cash flows would be adversely impacted.

Changes in equipment standards under applicable Rules of Golf could adversely affect the Company's business.

The Company seeks to have its new golf club and golf ball products satisfy the standards published by the USGA and the R&A in the Rules of Golf because these standards are generally followed by golfers, both professional and amateur, within their respective jurisdictions. The USGA publishes rules that are generally followed in the United States, Canada and Mexico, and the R&A publishes rules that are generally followed in most other countries throughout the world. However, the Rules of Golf as published by the R&A and the USGA are virtually the same, and are intended to be so pursuant to a Joint Statement of Principles issued in 2001.

In the future, existing USGA and/or R&A standards may be altered in ways that adversely affect the sales of the Company's current or future products. If a change in rules were adopted and caused one or more of the Company's current or future products to be nonconforming, the Company's sales of such products would be adversely affected.

The Company's sales could decline if professional golfers do not endorse or use the Company's products.

The Company establishes relationships with professional golfers in order to evaluate and promote Callaway Golf, Odyssey, Top-Flite and Ben Hogan branded products. The Company has entered into endorsement

Table of Contents

arrangements with members of the various professional tours, including the Champions Tour, the PGA Tour, the LPGA Tour, the PGA European Tour, the Japan Golf Tour and the Nationwide Tour. While most professional golfers fulfill their contractual obligations, some have been known to stop using a sponsor's products despite contractual commitments. If certain of the Company's professional endorsers were to stop using the Company's products contrary to their endorsement agreements, the Company's business could be adversely affected in a material way by the negative publicity or lack of endorsement.

The Company believes that professional usage of its golf clubs and golf balls contributes to retail sales. The Company therefore spends a significant amount of money to secure professional usage of its products. Many other companies, however, also aggressively seek the patronage of these professionals and offer many inducements, including significant cash incentives and specially designed products. There is a great deal of competition to secure the representation of tour professionals. As a result, it is generally becoming increasingly difficult and more expensive to attract and retain such tour professionals. The inducements offered by other companies could result in a decrease in usage of the Company's products by professional golfers or limit the Company's ability to attract other tour professionals. A decline in the level of professional usage of the Company's products could have a material adverse effect on the Company's sales and business.

Failure to adequately enforce the Company's intellectual property rights could adversely affect its business.

The golf club industry, in general, has been characterized by widespread imitation of popular club designs. The Company has an active program of monitoring, investigating and enforcing its proprietary rights against companies and individuals who market or manufacture counterfeits and knockoff products. The Company asserts its rights against infringers of its copyrights, patents, trademarks, and trade dress. However, these efforts may not be successful in reducing sales of golf products by these infringers. Additionally, other golf club manufacturers may be able to produce successful golf clubs which imitate the Company's designs without infringing any of the Company's copyrights, patents, trademarks, or trade dress. The failure to prevent or limit such infringers or imitators could adversely affect the Company's reputation and sales.

The Company may become subject to intellectual property suits that could cause it to incur significant costs or pay significant damages or that could prohibit it from selling its products.

The Company's competitors also seek to obtain patent, trademark, copyright or other protection of their proprietary rights and designs for golf clubs and golf balls. From time to time, third parties have claimed or may claim in the future that the Company's products infringe upon their proprietary rights. The Company evaluates any such claims and, where appropriate, has obtained or sought to obtain licenses or other business arrangements. To date, there have been no significant interruptions in the Company's business as a result of any claims of infringement. However, in the future, intellectual property claims could force the Company to alter its existing products or withdraw them from the market or could delay the introduction of new products.

Various patents have been issued to the Company's competitors in the golf industry and these competitors may assert that the Company's golf products infringe their patent or other proprietary rights. If the Company's golf products are found to infringe third-party intellectual property rights, the Company may be unable to obtain a license to use such technology, and it could incur substantial costs to redesign its products or to defend legal actions.

The Company's brands may be damaged by the actions of its licensees.

The Company licenses its trademarks to third-party licensees who produce, market and sell their products bearing the Company's trademarks. The Company chooses its licensees carefully and imposes upon such licensees various restrictions on the products, and on the manner, on which such trademarks may be used. In addition, the Company requires its licensees to abide by certain standards of conduct and the laws and regulations of the jurisdictions in which they do business. However, if a licensee fails to adhere to these requirements, the

Table of Contents

Company's brands could be damaged. The Company's brands could also be damaged if a licensee becomes insolvent or by any negative publicity concerning a licensee or if the licensee does not maintain good relationships with its customers or consumers, many of which are also the Company's customers and consumers.

Sales of the Company's products by unauthorized retailers or distributors could adversely affect the Company's authorized distribution channels and harm the Company's reputation.

Some of the Company's products find their way to unauthorized outlets or distribution channels. This gray market for the Company's products can undermine authorized retailers and foreign wholesale distributors who promote and support the Company's products, and can injure the Company's image in the minds of its customers and consumers. On the other hand, stopping such commerce could result in a potential decrease in sales to those customers who are selling the Company's products to unauthorized distributors or an increase in sales returns over historical levels. While the Company has taken some lawful steps to limit commerce of its products in the gray market in both the United States and abroad, it has not stopped such commerce.

The Company has significant international operations and is exposed to risks associated with doing business globally.

The Company's management believes that controlling the distribution of its products in certain major markets in the world has been and will be an element in the future growth and success of the Company. The Company sells and distributes its products directly in many key international markets in Europe, Asia, North America and elsewhere around the world. These activities have resulted and will continue to result in investments in inventory, accounts receivable, employees, corporate infrastructure and facilities. In addition, there are a limited number of suppliers of golf club components in the United States, and the Company has increasingly become more reliant on suppliers and vendors located outside of the United States. The operation of foreign distribution in the Company's international markets, as well as the management of relationships with international suppliers and vendors, will continue to require the dedication of management and other Company resources. The Company also manufactures a substantial amount of its products outside of the United States.

As a result of this international business, the Company is exposed to increased risks inherent in conducting business outside of the United States. In addition to foreign currency risks, these risks include:

Increased difficulty in protecting the Company's intellectual property rights and trade secrets;

Unexpected government action or changes in legal or regulatory requirements;

Social, economic or political instability;

The effects of any anti-American sentiments on the Company's brands or sales of the Company's products;

Increased difficulty in ensuring compliance by employees, agents and contractors with the Company's policies as well as with the laws of multiple jurisdictions, including but not limited to the U.S. Foreign Corrupt Practices Act, local international environmental, health and safety laws, and increasingly complex regulations relating to the conduct of international commerce;

Increased difficulty in controlling and monitoring foreign operations from the United States, including increased difficulty in identifying and recruiting qualified personnel for its foreign operations; and

Increased exposure to interruptions in air carrier or ship services.

Any significant adverse change in circumstances or conditions could have a significant adverse effect upon the Company's operations, financial performance and condition.

Table of Contents

Changes in tax laws and unanticipated tax liabilities could adversely affect our effective income tax rate and profitability.

We are subject to income taxes in the United States and numerous foreign jurisdictions. Our effective income tax rate in the future could be adversely affected by a number of factors, including: changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in tax laws, the outcome of income tax audits in various jurisdictions around the world, and any repatriation of non-US earnings for which we have not previously provided for U.S. taxes. We regularly assess all of these matters to determine the adequacy of our tax provision, which is subject to significant discretion. Recently proposed legislation in the United States would change how U.S. multinational corporations are taxed on their foreign income. If such legislation is enacted, it may have a material adverse impact to our tax rate and in turn, our profitability.

The Company relies on increasingly complex information systems for management of its manufacturing, distribution, sales and other functions. If the Company's information systems fail to perform these functions adequately or if the Company experiences an interruption in their operation, its business and results of operations could suffer.

All of the Company's major operations, including manufacturing, distribution, sales and accounting, are dependent upon the Company's complex information systems. The Company's information systems are vulnerable to damage or interruption from:

Earthquake, fire, flood, hurricane and other natural disasters;

Power loss, computer systems failure, Internet and telecommunications or data network failure; and

Hackers, computer viruses, software bugs or glitches.

Any damage or significant disruption in the operation of such systems or the failure of the Company's information systems to perform as expected could disrupt the Company's business, result in decreased sales, increased overhead costs, excess inventory and product shortages and otherwise adversely affect the Company's operations, financial performance and condition.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

The Company and its subsidiaries conduct operations in both owned and leased properties. The Company's principal executive offices and domestic operations are located in Carlsbad, California. The Company occupies six buildings that are utilized in its Carlsbad operations, which are comprised of corporate offices and the Company's performance center, as well as manufacturing, research and development, warehousing and distribution facilities. These buildings comprise approximately 666,000 square feet of space. The Company owns five of these buildings, representing approximately 516,000 square feet of space, and leases a property representing approximately 150,000 square feet of space. The lease term expires in November 2017.

The Company also owns a manufacturing plant, warehouse and offices that encompass approximately 869,000 square feet in Chicopee, Massachusetts in addition to a property in Gloversville, New York of approximately 77,000 square feet, representing a former golf ball manufacturing facility. The Company has been actively marketing its property in Gloversville, New York for sale as a result of the Company's decision to consolidate its golf ball operations into other existing locations within and outside the U.S.

During the third quarter of 2010, the Company announced the restructuring of its golf club and golf ball manufacturing and distribution operations, which includes the reorganization of the Company's manufacturing

Table of Contents

and distribution centers located in Carlsbad, California, Toronto, Canada, and Chicopee, Massachusetts, the creation of third-party logistics sites in Dallas, Texas and Toronto, Canada, as well as the establishment of a new production facility in Monterrey, Mexico. In connection with the new production facility in Monterrey, Mexico, the Company leases a property of approximately 180,000 square feet. The Company intends to maintain limited manufacturing and distribution facilities in Carlsbad, California and Chicopee, Massachusetts.

The Company owns and leases additional properties domestically and internationally, including properties in Australia, Canada, Japan, Korea, the United Kingdom, China, Thailand, Malaysia and India. The Company's operations at each of these properties are used to some extent for both the golf club and golf ball businesses. The Company believes that its facilities currently are adequate to meet its requirements.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities**

The Company's common stock is listed, and principally traded, on the New York Stock Exchange (NYSE). The Company's symbol for its common stock is ELY. As of January 31, 2011, the approximate number of holders of record of the Company's common stock was 8,400. The following table sets forth the range of high and low per share sales prices of the Company's common stock and per share dividends for the periods indicated.

Period:	Year Ended December 31,					
	High	2010 Low	Dividend	High	2009 Low	Dividend
First Quarter	\$ 9.50	\$ 7.37	\$ 0.01	\$ 10.31	\$ 5.69	\$ 0.07
Second Quarter	\$ 10.19	\$ 6.00	\$ 0.01	\$ 8.89	\$ 5.01	\$ 0.01
Third Quarter	\$ 7.34	\$ 5.80	\$ 0.01	\$ 8.25	\$ 4.66	\$ 0.01
Fourth Quarter	\$ 8.48	\$ 6.64	\$ 0.01	\$ 9.05	\$ 6.48	\$ 0.01

The Company intends to continue to pay quarterly dividends subject to capital availability and quarterly determinations that cash dividends are in the best interests of its stockholders. Future dividends may be affected by, among other items, the Company's views on potential future capital requirements, projected cash flows and needs, changes to our business model and certain restrictions limiting dividends imposed by the Company's Line of Credit (see Item 7 Sources of Liquidity below).

Table of Contents**Performance Graph**

The following graph presents a comparison of the cumulative total shareholder return of the Company's common stock since December 31, 2005 to three indices: the Standard & Poor's 500 Index (S&P 500), the Standard & Poor's 400 Midcap Index (S&P 400) and the Standard & Poor's 600 Smallcap Index (S&P 600). The S&P 500 tracks the aggregate price performance of equity securities of 500 large-cap companies that are actively traded in the U.S., and is considered to be a leading indicator of U.S. equity securities. The S&P 400 is a market value-weighted index that tracks the aggregate price performance of equity securities of companies with a market capitalization of \$750.0 million to \$3.0 billion from all major industries, including energy, technology, healthcare, financial and manufacturing. The S&P 600 is a market value-weighted index that tracks the aggregate price performance of equity securities from a broad range of small-cap stocks traded in the U.S. The Company believes that the S&P 600 is a more representative peer group than the S&P 400 as it is more aligned with the Company's market capitalization. As such, the Company has elected to change its peer group from the S&P 400 to the S&P 600 as of January 1, 2010. The graph below presents both the S&P 400 and S&P 600 for comparative purposes. The graph assumes an initial investment of \$100 at December 31, 2005 and reinvestment of all dividends.

	2005	2006	2007	2008	2009	2010
Callaway Golf (NYSE: ELY)	\$ 100.00	\$ 106.14	\$ 130.41	\$ 71.53	\$ 58.78	\$ 63.20
S&P 500	\$ 100.00	\$ 113.62	\$ 117.63	\$ 72.36	\$ 89.33	\$ 100.75
S&P 400 Midcap	\$ 100.00	\$ 108.99	\$ 116.28	\$ 72.93	\$ 98.46	\$ 122.93
S&P 600 Smallcap	\$ 100.00	\$ 114.07	\$ 112.68	\$ 76.63	\$ 94.86	\$ 118.55

Table of Contents

The Callaway Golf Company index is based upon the closing prices of Callaway Golf Company common stock on December 31, 2005, 2006, 2007, 2008, 2009 and 2010 of \$13.84, \$14.41, \$17.43, \$9.29, \$7.54 and \$8.07, respectively.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

In November 2007, the Board of Directors authorized a repurchase program (the November 2007 repurchase program) for the Company to repurchase shares of its common stock up to a maximum cost to the Company of \$100.0 million, which will remain in effect until completed or otherwise terminated by the Board of Directors.

During the three months ended December 31, 2010, the Company repurchased a nominal number of shares of its common stock at a weighted average cost per share of \$7.68 under the November 2007 repurchase program. The Company acquired these shares to satisfy the Company's tax withholding obligations in connection with the vesting and settlement of employee restricted stock unit awards. As of December 31, 2010, the Company remained authorized to repurchase up to an additional \$75.2 million of its common stock under this program.

The following table summarizes the purchases by the Company under its repurchase programs during the fourth quarter of 2010 (in thousands, except per share data):

		Three Months Ended December 31, 2010			
		Total Number of Shares Purchased	Weighted Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Maximum Dollar Value that May Yet Be Purchased Under the Programs
October 1, 2010	October 31, 2010		\$		\$ 75,176
November 1, 2010	November 30, 2010	1	\$ 7.68	1	\$ 75,165
December 1, 2010	December 31, 2010		\$		\$ 75,165
Total		1	\$ 7.68	1	\$ 75,165

Table of Contents**Item 6. Selected Financial Data**

The following statements of operations data and balance sheet data for the five years ended December 31, 2010 were derived from the Company's audited consolidated financial statements. Consolidated balance sheets at December 31, 2010 and 2009 and the related consolidated statements of operations and cash flows for each of the three years in the period ended December 31, 2010 and notes thereto appear elsewhere in this report. The following data should be read in conjunction with the annual consolidated financial statements, related notes and other financial information appearing elsewhere in this report.

	Year Ended December 31,				
	2010 ^{(1),(2),(3),(4)}	2009 ^{(2),(3),(4)}	2008 ⁽⁵⁾	2007	2006
	(In thousands, except per share data)
