interim business report originally issued in Japanese

for the benefit and information of shareholders

of the Company's common stock)

## Message from the Managements

We are pleased to present the outline of operation and financial results for Makita's 100th interim period, ended September 30, 2011.

### €Consolidated Operating Result as Interim Period

During the six months (the period) ended September 30, 2011, the aggravation of fiscal problems and financial instabilities in Europe brought a downturn in South European economies, gradually decelerating even German and U.K. economies which had until then shown a recovery trend. In the United States, individual consumption and capital investments have been slow, adding to such problems as the uncertain employment situation and sluggish housing market. In Asia and Central and South America, economy was in a favorable condition on the whole, while there were signs of economic slowdown caused by austerity measures taken in China and Brazil. In Japan, business outlook remains uncertain with the March 11 earthquake inflicting serious damage on economic activities.

Against the backdrop of this economic climate, demand for power tools showed a robust increase in emerging countries that enjoy continuous economic growth, while demand rose only moderately in such developed economies as Europe and the United States where power tool markets have already matured. Meanwhile, Japan experienced an increased demand resulting from post-quake restoration and reconstruction efforts.

Under these circumstances, in development side, Makita continuously expanded its product lines, including power tools, rechargeable tools and outdoor power equipment (OPE) through the development of smaller and lighter tools or tools with lower noise and vibration. In production side, we strengthened our quality control system to continuously produce high-quality brands, while expanding our overseas production especially at our plant in China. In sales side, we established our 48th overseas subsidiary in Slovenia to strengthen our sales and service structures in the Balkan states. Through these steps, we strove to maintain and improve our sales and after-sales services proximate to the customers, which had already been our forte.

Meanwhile, to further strengthen our development structure for outdoor power equipment (OPE), especially engine-loaded products, we established an OPE R&D Center on the premises of Makita's Nisshin Office at Nisshin City in Aichi Prefecture in October this year. In view of the environmental preservation, engine-loaded products need technological improvements that reduce such products' emissions, noise and energy consumption. To achieve these improvements, Makita strives to increase its development capacity and efficiency through the establishment of the OPE R&D Center equipped with facilities for practical tests.

### €For the interim period, both sales and profit have increased for two consecutive terms

Our consolidated net sales for this period increased by 14.4% to 153,036 million yen compared to the same period of the previous year. This was because of the rollout of attractive new products as well as the success in expanding sales by making the most of our sales and service structures that have always been our strong point, although our overseas sales decreased in value due to the appreciation of the yen against other currencies, combined with the sluggish housing market in such developed countries. In terms of incomes, our operating income increased by 23.4% from the previous year to 26,953 million yen (operating income ratio 17.6%) because of an increase in sales. Meanwhile, income before income taxes showed a modest increase of 12.7% from the previous year to 24,514 million yen (income before income taxes ratio 16.0%) and net income attributable to Makita Corporation increased only by 13.1% from the previous year to 17,104 million yen (net income attributable to Makita Corporation ratio 11.2%).

*English Translation of CHUKAN-KI JIGYOU NO GOHOUKOKU originally issued in Japanese*

**€Outlook for the year ending March 31, 2012 and Issue to be Addressed**

As for the future prospects, the recovery of demands among the developed countries is expected to remain modest, considering the feelings of uncertainties towards the future of the world economy. In the emerging nations, which have been continuing to make rapid growth, slowdown in the economic environment is expected due to the financial crunch, and furthermore, financial instability in the Euro area as well as the trends of the exchange rates make the situation unpredictable; for the foreseeable future, the business environment for Makita is expected to remain severe.

Under these circumstances, Makita aims to establish high brand recognition and become a Strong Company capable of acquiring and maintaining the top market share as an international total supplier of power tools for professional use, pneumatic tools, gardening equipment and other tools in each international region. To achieve these objectives, we will strive to reinforce its R&D and product development activities to deliver more user-friendly, earth-conscious power tools and gardening equipment. We will also strengthen the technical development of compact engines. The global production organizations will be strengthened to respond to changes in demand conditions. In addition, we will put focus on maintaining and strengthening a sales and after-sales service structure that leads the industry both in the domestic and overseas markets.

**€The Interim Cash Dividends of 15 Yen Per Share**

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of at least 30%, with a lower limit on annual cash dividends of 18 yen per share.

For the interim period under review, Makita declared to pay a dividend of 15 yen per share, as announced in April 2011.

Based on its dividend policy, Makita's board of directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2012. Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2011

Masahiko Goto

President, Representative Director &

Chief Executive Officer

## Feature Section

### €**Makita Nederland: held seminar on dust regulations**

On May 26 in Harderwijk, located east of Amsterdam, Netherlands, lecturers were invited from the Labor Inspection Office and Toegepast Natuurwetenschappelijk Onderzoek (TNO: Netherlands Organization for Applied Scientific Research) for the seminar on dust regulations, hosted by the Netherlands sales subsidiary (Makita Nederland). The seminar was participated by many distributors and end-users.

In the recent years, awareness towards labor environment has been rising in the Netherlands and the entire Europe, resulting in increased stringency in dust regulations at construction sites. Since 2010, Makita Nederland has prepared a wide array of TNO-approved power tools with dust aspirators that meet the standards of dust regulations, which are sold coupled with dust collectors. Our products are highly capable in collecting dust while the filters require infrequent cleaning, which are features enjoyed by our customers.

This seminar provided the opportunity for the participants to understand our efforts towards dust regulations and to rediscover the benefits of our TNO-approved products.

### €**OPE R&D Center opened in Nisshin City, Aichi Prefecture**

On October 1, the OPE R&D Center opened within the Nisshin Office, equipped with an environment for operational suitability testing.

The mainstream in the field of Outdoor Power Equipment (OPE, including equipment for agriculture, forestry, etc.) is equipment with engines, and in order to protect the environment, technological improvements to realize low emission, low noise, better fuel efficiency, etc. are priorities. With the opening of this Center, Makita will reinforce the development system for the products with a small-sized 4-stroke engine and the products with a small-sized 2-stroke engine to comply with the restrictions on exhaust gases, and expand the line-up of engine-loaded outdoor power equipment in addition to electric power tools (including rechargeable tools).

### €**North Branch of Makita Vietnam opened**

On April 1, the North Branch of the Vietnam sales subsidiary (Makita Vietnam) opened in the Bac Ninh Province, located close to Hanoi, the capital of Vietnam. Makita Vietnam was established in April 2010 near Ho Chi Minh City, the central city in the southern part of Vietnam. With the addition of this new branch, further enhanced marketing and improved speed and streamlining of logistics and post-sale services to the northern areas will be possible, allowing uniform business activities in this country with a narrow yet vertically long geography.

Within the branch are warehouses with ample storage space, a demo room, etc., and seminars for distributors are also held here.

We hope to continue community-based services and marketing, and aim to establish our status of No. 1 in services in the industry.

## Introduction of our Global Network

### €Company Overview

Company name: Makita U.S.A. Inc.

Description of business: sales and after-sales service of electric power tools

Establishment: July 1970

Headquarters location: Los Angeles, California, USA

Branches: Chicago (Illinois), Atlanta (Georgia)

Factory Service Centers: 12 locations

### €Current U.S. Power Tool Market

The U.S. market continues to be influenced by the popularity of Do-It-Yourself which is being driven, in part, by the convenience of Home Centers. Professionals also utilize the convenience of Home Centers to purchase both building materials and power tools, making Home Centers an increasingly important sales channel. The digital world is beginning to influence the Power Tool market as users increasingly go online for pre-sales and post-sales information. Rechargeable products led by Lithium-Ion continue to gain in popularity and market share, increasing share from approximately one-third of the U.S. market in 2004 to about one-half in recent years.

### €Increase Market Share with Innovative Technology and Enhanced Marketing

In 2005 Makita created the 18 volt lithium-ion category with the LXT Series. Today, Makita is fortifying its leadership position in cordless with more tools and more innovative technology. In 2008 we launched a partnership with The Home Depot, the nation's top home improvement retailer with approximately 2,000 stores across the US, and through this agreement we have been able to increase our product selection for the professional user. We have also increased our brand recognition among distributors and end-users through exclusive sponsorships including Major League Soccer (MLS) and various motor sports initiatives. These activities resulted in a 13% increase y/y in sales for the March 2011 term, and for this interim period, we saw a 26% increase y/y.

### €Strengthen Customer Service and Support

Factors such as the slump in the housing market and strong competition from rival manufacturers have resulted in an increasingly harsh business environment in the U.S. Despite these challenging conditions we are strengthening our relationship with distributors through joint promotional efforts, while actively focusing on implementation of service and sales support programs using IT. We will continue to provide high-quality products and exceptional service in order to further increase the satisfaction of our distributor partners and professional users, and to expand our market share.

Total volume of shares traded: 90,018 thousand shares

**Basic policy regarding profit distribution and to repurchases of its outstanding shares**

Makita's basic policy on the distribution of profits is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on net income attributable to Makita Corporation after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
