

FNB CORP/FL/  
Form 424B3  
December 01, 2011

**Filed pursuant to Rule 424(b)(3)  
Registration No. 333-177050**

**PROSPECTUS SUPPLEMENT NO. 1 to**

**Proxy Statement/Prospectus dated November 7, 2011**

**F.N.B. CORPORATION**

This Prospectus Supplement No. 1 (the Supplement) supplements information contained in the proxy statement/prospectus dated November 7, 2011, which relates to the proposed issuance by F.N.B. Corporation (FNB) of up to 13,629,000 shares of its common stock, par value \$0.01 per share, in connection with the proposed merger of Parkvale Financial Corporation (PFC) with and into FNB pursuant to an Agreement and Plan of Merger, dated as of June 15, 2011, between PFC and FNB.

**Quarterly Report on Form 10-Q**

The purpose of this Supplement is to inform you of certain developments that have occurred since the date of the proxy statement/prospectus. This Supplement includes PFC's attached Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2011, which PFC filed with the Securities and Exchange Commission (SEC) on November 30, 2011. The information contained in such report is dated as of the date of such report.

**Additional Proxy**

If you have not yet voted your shares of common stock of PFC with respect to the proposals to be considered at the special meeting of PFC shareholders to be held on December 15, 2011 or if you wish to change your vote, an additional proxy and postage-paid return envelope are enclosed for your convenience. If your shares are held with a broker or bank, you can also vote by telephone or the internet by following the enclosed instructions.

This Supplement should be read together with the proxy statement/prospectus dated November 7, 2011, which was previously mailed to the PFC shareholders who were shareholders of record on October 20, 2011. The information in this Supplement is qualified by reference to the proxy statement/prospectus, except to the extent that the information in this Supplement updates or supersedes the information contained in the proxy statement/prospectus.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the FNB common stock to be issued pursuant to the proxy statement/prospectus, as supplemented by this Supplement, or determined if the proxy statement/prospectus or this Supplement is accurate or adequate. Any representation to the contrary is a criminal offense.**

The date of this Supplement is December 1, 2011.

**Additional Information About the Merger and Where to Find It**

In connection with the proposed merger, PFC filed a definitive proxy statement with the SEC on November 7, 2011, and FNB filed a registration statement on Form S-4 (Registration No. 333-177050) with the SEC on November 3, 2011 (which contains PFC's definitive proxy statement and FNB's prospectus), and this Supplement on December 1, 2011. INVESTORS ARE URGED TO READ THE DEFINITIVE PROXY STATEMENT, THIS SUPPLEMENT AND ANY OTHER RELEVANT DOCUMENTS FILED OR TO BE FILED WITH THE SEC BY FNB OR PFC, INCLUDING ANY AMENDMENTS AND SUPPLEMENTS, BECAUSE THOSE DOCUMENTS DO AND WILL CONTAIN IMPORTANT INFORMATION.

Those documents, as well as other documents relating to the merger that FNB and/or PFC file with the SEC, may be obtained free of charge from the SEC's website at <http://www.sec.gov>. You may also request copies of those documents at no cost by contacting either FNB or PFC, as the case may be, at the following addresses:

**F.N.B. CORPORATION**  
**One F.N.B. Boulevard**  
**Hermitage, Pennsylvania 16148**  
**Attention: David B. Mogle, Corporate Secretary**  
**Telephone: (724) 983-3431**

**PARKVALE FINANCIAL CORPORATION**  
**Parkvale Bank Building**  
**4220 William Penn Highway**  
**Monroeville, Pennsylvania 15146**  
**Attention: Gilbert A. Riazzi, Vice President and Chief Financial Officer**  
**Telephone (412) 373-4804**

FNB, PFC and their respective directors, executive officers and other members of management and employees may be deemed to be participants in the solicitation of proxies from PFC shareholders in connection with the proposed merger. Information concerning such participants ownership of PFC common stock is set forth in the proxy statement/prospectus dated November 7, 2011.

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

(Dollar amounts in thousands, except share data)

**NOTE 1. STATEMENTS OF OPERATIONS**

The statements of operations for the three months ended September 30, 2011 and 2010 are unaudited, but in the opinion of management reflect all adjustments (consisting of only normal recurring accruals) necessary for a fair presentation of the results of operations for those periods. The results of operations for the three months ended September 30, 2011 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2012. The Annual Report on Form 10-K for the year ended June 30, 2011 contains additional information and should be read in conjunction with this report.

**NOTE 2. RECLASSIFICATION**

Certain amounts in prior periods financial statements have been reclassified to conform to the current period presentation. The reclassifications had no significant effect on Parkvale's financial condition or results of operations.

**NOTE 3. SUBSEQUENT EVENTS**

The Corporation evaluated and disclosed all material subsequent events that provide evidence about conditions that existed as of September 30, 2011 through the date the consolidated financial statements were filed with the Securities and Exchange Commission.

**NOTE 4. LOANS AND THE ALLOWANCE FOR LOAN LOSS**

Loans are summarized as follows:

	September 30, 2011	June 30, 2011
Mortgage loans:		
1-4 family	\$ 603,561	\$ 615,884
Commercial	156,764	162,533
Total mortgage loans	760,325	778,417
Consumer loans:		
Home equity	146,631	146,728
Automobile	24,908	26,684
Other consumer	10,105	9,800
Total consumer loans	181,644	183,212
Commercial business loans	40,940	40,120
Total gross loans	982,909	1,001,749
Less: Loans in process	63	
Allowance for loan losses	18,663	18,626
Unamortized premiums and deferred loan fees	(849)	(873)
Loans, net	\$ 965,032	\$ 983,996

The loans receivable portfolio is segmented into mortgage loans, consumer loans and commercial business loans. The mortgage loan segment has two classes, 1-4 family first lien residential mortgage loans and commercial mortgage loans, which are comprised of commercial real estate, multi-family and acquisition and development loans. The consumer loan segment consists of three classes, home equity loans, automobile loans and other loans. The commercial business loan segment consists of one class, commercial and industrial loans.

---

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

**Portfolio Risk Characteristics:**

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the known circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial business loans and commercial mortgage loans by either the present value of expected future cash flows discounted at the loan's effective interest rate or the fair value of the collateral if the loan is collateral dependent.

An allowance for loan losses is established for an impaired loan if its carrying value exceeds its estimated fair value. The estimated fair values of substantially all of the Corporation's impaired loans are measured based on the estimated fair value of the loan's collateral.

For commercial loans secured by real estate, estimated fair values are determined primarily through third-party appraisals. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the original appraisal and the condition of the property. Appraised values are discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair value. The discounts also include estimated costs to sell the property.

For commercial business loans secured by non-real estate collateral, such as accounts receivable, inventory and equipment, estimated fair values are determined based on the borrower's financial statements, inventory reports, accounts receivable agings or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Corporation does not separately identify individual 1-4 family mortgage loans or consumer loans for impairment disclosures, unless such loans are the subject of a troubled debt restructuring agreement.

Loans whose terms are modified are classified as troubled debt restructurings if the Corporation grants such borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a temporary reduction in interest rate or an extension of a loan's stated maturity date. Non-accrual troubled debt restructurings are restored to accrual status if a pattern of consistent principal and interest payments under the modified terms is demonstrated after modification. Loans classified as troubled debt restructurings are designated as impaired. Loans are considered for removal from troubled debt restructuring status when they have consistently met their modified obligations for an extended period of time, generally more than six months.

The 1-4 family loans include residential first mortgage loans originated by Parkvale Bank in the greater Pittsburgh Metropolitan area, which comprises its primary market area, and loans purchased from other financial institutions in the secondary market, which are geographically diversified. We currently originate fixed-rate, fully amortizing mortgage loans with maturities of 15 to 30 years. We also offer adjustable rate mortgage ( ARM ) loans where the interest rate either adjusts on an annual basis or is fixed for the initial one, three or five years and

---

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

then adjusts annually. We underwrite 1 to 4 family residential mortgage loans with loan-to-value ratios of up to 95%, generally provided that the borrower obtains private mortgage insurance on loans that exceed 80% of the appraised value or sales price, whichever is less, of the secured property. We also require that title insurance, hazard insurance and, if appropriate, flood insurance be maintained on all properties securing real estate loans. We require that a licensed appraiser from our list of approved appraisers perform and submit to us an appraisal on all properties secured by a first mortgage on 1 to 4 family first mortgage loans. In underwriting 1-4 family residential mortgage loans, the Corporation evaluates both the borrower's ability to make monthly payments and the value of the property securing the loan. Real estate loans originated by the Corporation generally contain a due upon sale clause allowing the Corporation to declare the unpaid principal balance due and payable upon the sale of the property. The Corporation has not engaged in sub-prime residential mortgage loan originations. Our single-family residential mortgage loans generally are underwritten on terms and documentation conforming to guidelines issued by Freddie Mac. All of Parkvale's lending activities, including loan purchases, are subject to written underwriting standards and loan origination procedures approved by the Board of Directors.

Commercial mortgage loans include commercial real estate, multi-family and other loans that are secured by non-farm nonresidential properties. Commercial and multi-family real estate loans generally present a higher level of risk than loans secured by 1-4 family residences. This greater risk is due to several factors, including the concentration of principal in a limited number of loans and borrowers, the effect of general economic conditions on income producing properties and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by commercial and multi-family real estate is typically dependent upon the successful operation of the related real estate project. If the cash flow from the project is reduced (for example, if leases are not obtained or renewed, or a bankruptcy court modifies a lease term, or a major tenant is unable to fulfill its lease obligations), the borrower's ability to repay the loan may be impaired.

Consumer loans include home equity loans secured by first or second liens on residential property, automobile loans and other unsecured consumer loans. The Corporation currently originates most of its consumer loans in its primary market area and surrounding areas. The Corporation originates consumer loans primarily on a direct basis. Consumer loans generally have higher interest rates and shorter terms than residential mortgage loans; however, they have additional credit risk due to the type of collateral securing the loan.

Consumer loans may entail greater credit risk than do residential mortgage loans, particularly in the case of consumer loans secured by rapidly depreciable assets, such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount that can be recovered on such loans.

Commercial business loans are primarily short term facilities extended to small businesses and professionals located within the communities served by Parkvale, and are generally secured by business assets of the borrower. The commercial business loans that we originate may be either a revolving line of credit or for a fixed term of generally 10 years or less. Interest rates are adjustable, indexed to a published prime rate of interest, or fixed. Generally, equipment, machinery, real property or other corporate assets secure such loans. Personal guarantees from the business principals are generally obtained as additional collateral.

The following table presents the classes of the loan portfolio summarized by the aggregate pass rating and the classified ratings of special mention, substandard and doubtful within the Corporation's internal risk rating system as of September 30, 2011:

	Pass	Special Mention	Substandard	Doubtful	Total
<b>Mortgage loans:</b>					
1-4 family	\$ 570,036	\$ 6,613	\$ 26,912	\$	\$ 603,561
Commercial	149,685	1,079	6,000		156,764
<b>Consumer loans:</b>					
Home equity	145,369		1,262		146,631
Automobile	24,618		290		24,908
Other consumer	10,053		9	43	10,105
Commercial business loans	37,847	1,158	1,935		40,940
<b>Total</b>	<b>\$ 937,608</b>	<b>\$ 8,850</b>	<b>\$ 36,408</b>	<b>\$ 43</b>	<b>\$ 982,909</b>

The following table presents the classes of the loan portfolio summarized by the aggregate pass rating and the classified ratings of special mention, substandard and doubtful within the Corporation's internal risk rating system as of June 30, 2011:

	Pass	Special Mention	Substandard	Doubtful	Total
<b>Mortgage loans:</b>					
1-4 family	\$ 585,505	\$ 7,673	\$ 22,706	\$	\$ 615,884
Commercial	153,931	1,090	7,512		162,533
<b>Consumer loans:</b>					
Home equity	145,601		1,127		146,728
Automobile	26,378		306		26,684
Other consumer	9,773		26	1	9,800
Commercial business loans	37,014	1,177	1,929		40,120
<b>Total</b>	<b>\$ 958,202</b>	<b>\$ 9,940</b>	<b>\$ 33,606</b>	<b>\$ 1</b>	<b>\$ 1,001,749</b>

Pass-rated loans consist of facilities that do not currently expose the Bank to sufficient risk to warrant classifications. Special mention loans have potential weaknesses requiring management's close attention that, if uncorrected, may result in deterioration of the repayment prospects. Substandard loans have a well-defined weakness that jeopardizes liquidation of the debt, and includes loans that are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Doubtful loans have all the weaknesses inherent with substandard facilities with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable.

At September 30, 2011, modifications have been performed on 168 1-4 family mortgage loans totaling \$29,575. Of the aggregate \$29,575, 129 modifications totaling \$20,441 relate primarily to extension of maturity dates and extension of interest-only payment periods of thirty-six months or less. Of the aggregate \$29,575, 39 modifications totaling \$9,134 were determined to be Troubled Debt Restructurings (TDR). The discounted cash flows related to these TDRs were analyzed and the appropriate reserves have been established at September 30, 2011. Of the 129 loan modifications, 113 loans totaling \$18,286 are performing at September 30, 2011. Of the 39 TDRs, 28 loans totaling \$6,424 are performing at September 30, 2011. At June 30, 2011, modifications were performed on 174 1-4 family mortgage loans totaling \$31,500. Of the aggregate \$31,500 modifications at June 30, 2011, 45 modifications totaling \$11,300 were determined to be Troubled Debt Restructurings. The following is a summary of the composition of total TDRs:

	September 30, 2011	June 30, 2011
<b>Accruing:</b>		
Performing	\$ 6,424	\$ 9,400
<b>Non-performing</b>		
Non-accrual	2,710	1,900
	\$ 9,134	\$ 11,300

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

The recorded loan loss reserves for performing TDRs was \$881 and \$1,136 at September 30, 2011 and June 30, 2011, respectively, and the recorded loan loss reserves for non-accrual TDRs was \$327 and \$508 at September 30, 2011 and June 30, 2011, respectively. All TDRs were classified as substandard at September 30, 2011 and June 30, 2011.

The majority of TDRs are the result of interest rate concessions for periods ranging from 12-36 months, interest-only payments for periods ranging from 12-36 months, reduction in amortizing payments due as a result of temporary rate reductions, and/or capitalization of amounts related to past due interest or escrow payments. The following table summarizes information in regards to troubled debt restructurings at September 30, 2011:

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
<b>Troubled Debt Restructurings</b>			
1-4 family mortgage	39	\$ 9,168	\$ 9,249

	Number of Contracts	Recorded Investment
<b>Troubled Debt Restructurings</b>		
Within Previous 12 Months		
That Subsequently Defaulted		
1-4 family mortgage	11	\$ 2,710

There were no loan modifications during the three months ended September 30, 2011 and as such there was no impact during the quarter on the provision for loan losses. A troubled debt restructuring is considered to be in default when a restructured loan is 90 days or more past due. For the three months ended September 30, 2011, there were no loans restructured within the preceding twelve months that were considered to be in default. There is no additional commitment on part of the Corporation to provide lending to borrowers whose loans have been classified as a troubled debt restructuring.

The performance and credit quality of the loan portfolio is monitored by analyzing the age of the loans receivable as determined by the length of time a recorded payment is past due. The following table presents the classes of the loan portfolio summarized by the past due status as of September 30, 2011:

	30-59 Days Past Due	60-89 Days Past Due	Greater than 90 Days	Total Past Due	Current	Total Loans Receivable	Loans Receivable > 90 Days and Accruing
<b>Mortgage loans:</b>							
1-4 family	\$ 4,675	\$ 4,146	\$ 25,554	\$ 34,375	\$ 569,186	\$ 603,561	\$

The adequacy of the allowance for loan loss is determined by management through evaluation of the loss probable on individual nonperforming, delinquent and high dollar loans, economic and business trends, growth and composition of the loan portfolio and historical loss experience, as well as other relevant factors. The loan portfolio is reviewed on a periodic basis to ensure Parkvale's allowance for loan losses is adequate to absorb potential losses due to inherent risk in the portfolio.

The following table presents the allowance for loan losses and recorded investment in financing receivables at September 30, 2011:

	1-4 family Mortgage	Commercial Mortgage	Home Equity	Automobile	Other Consumer	Commercial Business Loans	Total
<b>Allowance for Loan Losses:</b>

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

The following summarizes the allowance for loan loss activity for the three month period ended September 30, 2010:

Beginning balance	\$ 19,209
Provision for losses mortgage loans	1,002
Provision for losses consumer loans	32
Loans recovered	28
Loans charged off	(647)
Ending balance	\$ 19,624

**NOTE 5. COMPREHENSIVE INCOME**

Sources of comprehensive income (loss) not included in net income are unrealized gains and losses on certain investments in equity securities, mortgage-backed securities, corporate debt and swaps on interest rate contracts. For the three months ended September 30, 2011 and 2010, total comprehensive income amounted to \$1,297 and \$1,031, respectively.

**NOTE 6. FAIR VALUE OF FINANCIAL INSTRUMENTS**

US GAAP requires a hierarchal disclosure framework associated with the level of pricing observations utilized in measuring assets and liabilities at fair value. This hierarchy requires the use of observable market data when available. The three broad levels of hierarchy are as follows:

- Level I Quoted prices are available in the active markets for identical assets or liabilities as of the measurement date.
- Level II Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the measurement date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.
- Level III Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable. Level III valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

The following table presents the assets and liabilities reported on the consolidated statements of financial condition at their fair value as of September 30, 2011 by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Equity securities in the available-for-sale ( AFS ) security portfolio are measured at fair value using quoted market prices and classified within Level I of the valuation hierarchy. Mutual funds in the available-for-sale security portfolio are measured at fair value using Level II valuation hierarchy. Interest rate swaps are priced using other similar financial instruments and are classified as Level II.

## Financial Instruments Measured on a recurring basis

	September 30, 2011				June 30, 2011			
	Level I	Level II	Level III	Total	Level I	Level II	Level III	Total
Available for sale securities:

Total	\$ 1	\$ 5,845	\$	\$ 5,846	\$ 1	\$ 5,783	\$	\$ 5,784
-------	------	----------	----	----------	------	----------	----	----------

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

The following table presents the assets measured on a nonrecurring basis on the consolidated statements of financial condition at their fair value as of September 30, 2011. In cases where valuation techniques included inputs that are unobservable and are based on estimates and assumptions developed by the reporting entity based on the best information available under each circumstance, the asset valuation is classified as Level III inputs. Pooled trust preferred securities and impaired loans are measured using Level III valuation hierarchy. Our pooled trust preferred securities are collateralized by the trust preferred securities of individual banks, thrifts and bank holding companies, and to a lesser extent, insurance companies. There has been little or no active trading in these securities for approximately twenty-four months; therefore it was more appropriate to determine estimated fair value using a discounted cash flow analysis. The discount rate applied to the cash flows is determined by evaluating the current market yields for comparable corporate and structured credit products along with an evaluation of the risks associated with the cash flows of the comparable security. Due to the fact that there is no active market for the pooled trust preferred collateralized debt obligations, one key reference point is the market yield for the single issue trust preferred securities issued by banks and thrifts for which there is more activity than for the pooled securities. Adjustments are then made to reflect the credit and structural differences between these two security types.

The estimated fair value of impaired loans is based upon the estimated fair value of the collateral less estimated selling costs when the loan is collateral dependent, or based upon the present value of expected future cash flows available to pay the loan. Collateral values are generally based upon appraisals from approved, independent state certified appraisers.

The estimated fair value of foreclosed real estate is comprised of commercial and residential real estate properties obtained in partial or total satisfaction of loan obligations. Foreclosed real estate acquired in settlement of indebtedness is recorded at the lower of the carrying amount of the loan or fair value less costs to sell. Subsequently, these assets are carried at the lower of the carrying value or fair value less costs to sell. Accordingly, it may be necessary to record nonrecurring fair value adjustments. Fair value, when recorded, is generally based upon appraisals by licensed or certified appraisers and is classified as Level II.

	Level I	Level II	Level III	Total
<b>Assets Measured on a Nonrecurring Basis:</b>				
OTTI Held to maturity trust preferred securities			\$ 10,204	\$ 10,204
Impaired loans			21,433	21,433
Impaired foreclosed real estate		1,840		1,840

Impaired loans measured or re-measured at fair value on a nonrecurring basis had a carrying amount of \$27,711 and an allocated allowance for loan losses of \$6,278 at September 30, 2011. The allocated allowance is based on a fair value of \$21,433 and considers costs to sell. The carrying value of the foreclosed real estate was \$2,366 with an allowance of \$526 at September 30, 2011, and the charge to earnings during the quarter ended September 30, 2011 related to impaired foreclosed real estate was \$57.

The following table presents the assets measured on a nonrecurring basis on the consolidated statements of financial condition at their fair value as of June 30, 2011.

	Level I	Level II	Level III	Total
<b>Assets Measured on a Nonrecurring Basis:</b>				
OTTI Held to maturity trust preferred securities			\$ 11,363	\$ 11,363
Impaired loans			22,443	22,443
Impaired foreclosed real estate		3,494		3,494

---

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS** (Continued)

(Dollar amounts in thousands, except share data)

Impaired loans measured or re-measured at fair value on a nonrecurring basis had a carrying amount of \$28,925 and an allocated allowance for loan losses of \$6,482 at June 30, 2011. The allocated allowance is based on a fair value of \$22,443 and considers costs to sell. The carrying value of the foreclosed real estate was \$4,216 with an allowance of \$722 at June 30, 2011.

US GAAP requires the determination of fair value for certain assets, liabilities and contingent liabilities. The carrying amount approximates fair value for the following categories:

*Cash and Noninterest-Bearing Deposits, which includes noninterest-bearing demand deposits*

*Federal Funds Sold*

*Interest-Earning Deposits in Other Banks*

*Accrued interest*

*Cash Surrender Value (CSV) of Bank Owned Life Insurance (BOLI)*

*Checking, savings and money market accounts*

The following methods and assumptions were used to estimate the fair value of other classes of financial instruments as of September 30, 2011 and June 30, 2011.

*Investment Securities:* The fair values of investment securities are obtained from the Interactive Data Corporation pricing service and various investment brokers for securities not available from public sources. Prices on certain trust preferred securities were calculated using a discounted cash flow model based upon market spreads for longer term securities as permitted for Level III assets when market quotes are not available. See accompanying notes for additional information on investment securities.

*Loans Receivable:* Fair values were estimated by discounting contractual cash flows using interest rates currently being offered for loans with similar credit quality adjusted for prepayment assumptions.

*Deposit Liabilities:* Fair values of commercial investment agreements and fixed-maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on commercial investment agreements or time deposits of similar remaining maturities.

*Advances from Federal Home Loan Bank:* Fair value is determined by discounting the advances using estimated incremental borrowing rates for similar types of borrowing arrangements.

*Term Debt and Other Debt:* Fair value is determined by discounting the term and other debt using estimated incremental borrowing rates for similar types of borrowing arrangements.

*Off-Balance-Sheet Instruments:* Fair value for off-balance-sheet instruments (primarily loan commitments) are estimated using internal valuation models and are limited to fees charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. Unused consumer and commercial lines of credit are assumed equal to the outstanding commitment amount due to the variable interest rate attached to these lines of credit.

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**NOTE 7. INVESTMENT SECURITIES****Federal Home Loan Bank Stock**

Parkvale, as a member of the Federal Home Loan Bank (FHLB) system, is required to maintain an investment in capital stock of the FHLB. Based on redemption provisions of the FHLB, the stock has no quoted market value and is carried at cost. In December 2008, the FHLB declared a moratorium on the redemption of its stock. At its discretion, the FHLB may declare dividends on the stock. However, since 2009 the FHLB suspended its dividend. Management reviews for impairment based on the ultimate recoverability of the cost basis in the FHLB stock.

Members do not purchase stock in the FHLB for the same reasons that traditional equity investors acquire stock in an investor-owned enterprise. Rather, members purchase stock to obtain access to the low-cost products and services offered by the FHLB. Unlike equity securities of traditional for-profit enterprises, the stock of FHLB does not provide its holders with an opportunity for capital appreciation because, by regulation, FHLB stock can only be purchased, redeemed and transferred at par value.

At September 30, 2011 and June 30, 2011, the Bank's FHLB stock totaled \$11,694 and \$12,310, respectively. The Bank accounts for the stock based on U.S. GAAP, which requires the investment to be carried at cost and evaluated for impairment based on the ultimate recoverability of the par value.

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS** (Continued)

(Dollar amounts in thousands, except share data)

The Bank periodically evaluates its FHLB investment for possible impairment based on, among other things, the capital adequacy of the FHLB and its overall financial condition. The FHLB exceeds all regulatory capital requirements established by the Federal Housing Finance Agency, the regulator of the FHLB. Failure by the FHLB to meet this regulatory capital requirement would require an in-depth analysis of other factors including:

the member's ability to access liquidity from the FHLB;

the member's funding cost advantage with the FHLB compared to alternative sources of funds;

a decline in the market value of FHLB's net assets relative to book value which may or may not affect future financial performance or cash flow;

the FHLB's ability to obtain credit and source liquidity, for which one indicator is the credit rating of the FHLB;

the FHLB's commitment to make payments taking into account its ability to meet statutory and regulatory payment obligations and the level of such payments in relation to the FHLB's operating performance; and

the prospects of amendments to laws that affect the rights and obligations of the FHLB.

In October 2010, the FHLB initiated a repurchase program based on outstanding excess capital stock. The amount of excess capital stock repurchased from any member was the lesser of five percent of the member's total capital stock outstanding or its excess capital stock outstanding. Based on this evaluation, the FHLB repurchased 5% of our capital stock on a quarterly basis since the fourth quarter of 2010. Future repurchases of excess capital stock will be determined on a quarterly basis. After evaluating such factors as the capital adequacy of the FHLB, its overall operating performance and the FHLB's liquidity and funding position, the Corporation concluded that the par value was ultimately recoverable and no impairment charge was recognized at September 30, 2011.

At September 30, 2011 and June 30, 2011, the following comprises Parkvale's investment portfolio:

<i>Available for Sale Investments</i>	September 30, 2011		June 30, 2011	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Mutual Funds	\$ 5,500	\$ 5,257	\$ 5,500	\$ 5,244
ARM mortgages Common equities	1	1	1	1

(Dollar amounts in thousands, except share data)

The amortized cost and fair value of debt securities at September 30, 2011, by contractual maturity, is included in the table below. Expected maturities will differ from contractual maturities because the borrowers may have the right to call or prepay the obligation.

	Amortized Cost	Fair Value
Due in one year or less	\$ 6,291	\$ 6,417
Due after one year through five years	68,614	70,064
Due after five years through ten years	199,236	202,112
Due after ten years	243,672	236,501
<b>Total Debt Securities</b>	<b>\$ 517,813</b>	<b>\$ 515,094</b>

Liquidity concerns in the financial markets have made it difficult to obtain reliable market quotations on some infrequently traded securities that are held to maturity. Corporate debt has been valued using financial models permitted by guidance in ASC 820 for Level III (see Fair Value Note) assets as active markets did not exist at September 30, 2011 and June 30, 2011 to provide reliable market quotes. The assets included in Level III pricing relate to pooled trust preferred securities. The trust preferred market has been severely impacted by the deteriorating economy and the lack of liquidity in the credit markets.

The unrealized losses on investments are primarily the result of volatility in interest rates, changes in spreads over treasuries and certain investments falling out of favor with investors due to illiquidity in the financial markets. Based on the credit-worthiness of the issuers and discounted cash flow analyses, management determined that the remaining investments in debt and equity securities were not other-than-temporarily impaired at September 30, 2011. The following table represents gross unrealized losses and fair value of investments aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2011:

	Less than 12 months		Greater than 12 months		Total	
	Fair Value	Unrealized loss	Fair Value	Unrealized loss	Fair Value	Unrealized loss

*Available for sale investments.*

*Mutual Funds.* Parkvale has investments in two adjustable rate mortgage mutual funds with an aggregate amortized cost of \$5,501 at September 30, 2011. The larger of the two investments, which had a fair value of \$4,722 at September 30, 2011, has had an unrealized loss in excess of one year of \$278 at September 30, 2011 and at June 30, 2011. Parkvale evaluated the near-term prospects of the issuer of the mutual fund in relation to the severity and duration of the impairment. Based on this evaluation and Parkvale's ability to hold the investment for a reasonable period of time sufficient for a forecasted recovery of fair value, Parkvale does not consider the remaining value of this investment to be other-than-temporarily impaired at September 30, 2011.

*Common Equities.* At September 30, 2011, Parkvale had investments in two different common equities, which had an aggregate amortized cost of \$1 and an aggregate fair value of \$1 at September 30, 2011 and at June 30, 2011.

*Held to maturity securities.*

*U.S. Government and Agency Obligations.* At September 30, 2011, the \$167,885 fair value of Parkvale's investments in U.S. Government and Agency obligations was greater than the \$166,857 book value of such investments. Certain of these investments show unrealized losses of less than one year of \$143 at the balance sheet date. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the face value of the investment. Parkvale intends to hold these securities to the contractual maturity of such investments, and it is more likely than not that Parkvale will not be required to sell the investments before recovery of its amortized cost.

*Trust Preferred Securities.* Trust preferred securities are very long-term (usually 30-year maturity) instruments with characteristics of both debt and equity. Most of the Corporation's investments in trust preferred securities are of pooled issues, each made up of 16 or more non-defaulted companies with geographic and size diversification. Unless otherwise noted, the Corporation's pooled trust preferred securities are substantially secured by bank and thrift holding companies (approximately 85% in the aggregate) and by insurance companies

---

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

(approximately 15% in the aggregate). No single company represented more than 5% of any individual pooled offering at the time of purchase. While certain companies are in more than one pool, no single company represents more than a 5% interest in the aggregate pooled investments. The pooled trust preferred investments were all investment grade at purchase with an initial average investment grade rating of A. As a result of the overall credit market and the number of underlying issuers deferring interest payments, as well as issuers defaulting, the rating agencies have downgraded the securities to below investment grade as of September 30, 2011. All of these investments are classified as held to maturity.

Management believes trust preferred valuations have been negatively affected by an inactive market and concerns that the underlying banks and insurance companies may have significant exposure to losses from sub-prime mortgages, defaulted collateralized debt obligations or other concerns. When evaluating these investments, a determination is made of the credit portion and the noncredit portion of impairment. The credit portion is recognized in earnings and represents the expected shortfall in future cash flows. The noncredit portion is recognized in other comprehensive income and represents the difference between the fair value of the security and the amount of credit related impairment, which is discussed in the following paragraphs. A discounted cash flow analysis provides the best estimate of the credit related portion of the impairment for these securities. Parkvale's pooled trust preferred collateralized debt obligations are measured for other than temporary impairment within the scope of US GAAP, by determining whether it is probable that an adverse change in estimated cash flows has occurred. The discounted cash flow analysis is considered to be the primary evidence when determining whether credit related impairment exists.

Management's estimates and results of a discounted cash flow test are significantly affected by other variables such as the estimate of future cash flows, credit worthiness of the underlying banks and insurance companies ( issuer ) and determination of probability of default of the underlying collateral. Changes in the variable assumptions could produce different conclusions for each security. Current available information is evaluated in estimating the future cash flows of these securities and a determination is made regarding whether or not there have been favorable or adverse changes in estimated cash flows from the cash flows previously projected. Consideration is given to the structure and term of the pool and the financial condition of the underlying issuers. Specifically, the evaluation incorporates factors such as over-collateralization and interest coverage tests, interest rates and appropriate risk premiums, the timing and amount of interest and principal payments and the allocation of payments to the various tranches. Current estimates of cash flows are based on the most recent trustee reports, announcements of deferrals or defaults, and assumptions regarding expected future default rates, prepayment and recovery rates and other relevant information. In constructing these assumptions, the following is considered:

that current defaults would have no recovery;

that some individually analyzed deferrals will cure at rates varying from 10% to 90% after the deferral period ends;

recent historical performance metrics, including profitability, capital ratios, loan charge-offs and loan reserve ratios, for the underlying institutions that would indicate a higher probability of default by the institution;

that institutions identified as possessing a higher probability of default would recover at a rate of 10% for banks and 15% for insurance companies;

that financial performance of the financial sector continues to be affected by the economic environment resulting in an expectation of additional deferrals and defaults in the future;

whether the security is currently deferring interest; and

the external rating of the security and recent changes to its external rating.

---

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

In addition to the above factors, the excess subordination levels for each pooled trust preferred security are calculated. The results of this excess subordination allows management to identify those pools that are a greater risk for a future break in cash flows so that issuers in those pools can be monitored more closely for potential deterioration of credit quality.

A significant portion of the Corporation's unrealized losses relate primarily to investments in trust preferred securities, which consist of single issuer and pooled securities. The portfolio of trust preferred collateralized debt obligations consists of 16 pooled issues and 8 single issuer securities. The single issuer securities are primarily from Pennsylvania regional banks. Investments in pooled securities are primarily mezzanine tranches, except for 1 investment in a senior tranche, and are secured by over-collateralization or default protection provided by subordinated tranches.

At September 30, 2011, the 16 pooled trust preferred securities have an amortized cost basis of \$20,901 and an estimated fair value of \$16,039, while the single-issuer trust preferred securities have an amortized cost basis of \$9,351 and an estimated fair value of \$8,500. The net unrealized losses on the trust preferred securities at September 30, 2011, which aggregated \$4,862 on the pooled securities and \$851 on the individual securities, are attributable to temporary illiquidity and the uncertainty affecting these markets, as well as changes in interest rates.

At September 30, 2011, as permitted by the debt instruments, there are 11 pooled trust preferred securities with an amortized cost basis of \$7,982 that have for one reason or another chosen to defer payments. Interest payments aggregating \$465 have been capitalized to the balance of the securities as permitted by the underlying trust agreement, and interest payments aggregating \$2,438 have been deferred since the respective securities began to defer payments. Deferred payments are not included in interest income. Interest payments totaling \$176 were deferred during the quarter ended September 30, 2011, and no payments were capitalized during the quarter.

Contractual terms of the investments do not permit debtors to settle the security at a price less than the face value of the investments and as such, it is expected that the remaining trust preferred securities will not be settled at a price less than the current carrying value of the investments. The Corporation has concluded from detailed cash flow analysis performed as of September 30, 2011 that it is probable that all contractual principal and interest payments will be collected on all of its single-issuer and pooled trust preferred securities, except for those on which OTTI was recognized on the pooled trust preferred securities.

Because Parkvale has the ability and intent to hold the investments until a recovery of fair value, which may be maturity, and it is more likely than not that Parkvale will not be required to sell the investments before recovery of its amortized cost, Parkvale does not consider the remaining value of these assets to be other-than-temporarily impaired at September 30, 2011. However, continued interest deferrals and/or insolvencies by participating issuers could result in a further writedown of one or more of the trust preferred investments in the future.

The above listings do not include 7 trust preferred investments written off in previous quarters.

Notes:

- (1) As a percentage of the total collateral.
- (2) Includes deferrals that have not paid current interest payments as permitted by the debt instruments.
- (3) Expected defaults are determined by an analysis of each security.
- (4) Excess subordination measures the performing collateral coverage of the outstanding liabilities (as a % of performing collateral).

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

*Non agency CMOs.* The non agency CMO securities of \$53,382 at September 30, 2011 are supported by underlying collateral that was originated as follows:

Year originated	Amortized Cost	Fair Value
2003	\$ 16,565	\$ 17,207
2004	24,727	21,488
2005	3,006	3,046
2007	5,350	3,777
2008	3,734	3,446
	\$ 53,382	\$ 48,964

The non agency CMO portfolio at September 30, 2011 contains investments that were all rated AAA at the time of purchase. The amortized cost and fair value by their latest investment rating at September 30, 2011 is as follows:

	Amortized Cost	Fair Value
AAA/Aaa by Moody's, S&P, or Fitch	\$ 9,605	\$ 9,919
AA/Aa by Moody's or S&P	10,329	9,425
A by Moody's or S&P	5,231	5,273
Baa by Moody's	8,352	8,491
BB/Ba Moody's or S&P	14,398	12,063
B by Fitch	2,935	2,296
CCC by Fitch	2,415	1,481
D by S&P	117	16
	\$ 53,382	\$ 48,964

To date, with the exception of one security with an amortized cost of \$117, all such securities have made scheduled payments of principal and interest on a timely basis with additional collateral provided by support tranches in these structured debt obligations. OTTI charges of \$1,800 were recognized in prior periods regarding the security for which scheduled payments were not received.

*General.* At September 30, 2011, Parkvale has unrealized losses that are greater than one year aggregating \$11,793 on held to maturity securities. These unrealized losses over one year relate primarily to investments in pooled and individual trust preferred securities and non-agency CMOs as detailed in the preceding tables. The unrealized losses relate to illiquidity and the uncertainty affecting these markets, interest rate changes, higher spreads to treasuries at September 30, 2011 compared to the purchase dates and concerns of future bank failures. Pooled trust preferred securities with unrealized losses for more than 12 months relate to 3 pooled trust preferred securities aggregating \$12,891, representing \$5,836 of fair value with \$7,055 of unrealized losses. Individual trust preferred securities with unrealized losses for more than 12 months relate to 4 individual securities aggregating \$6,141, representing \$4,784 of fair value with \$1,357 of unrealized losses.

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

***Other-Than-Temporary- Impairment***

Securities with a remaining carrying value as of September 30, 2011 that have incurred OTTI charges are summarized as follows:

Security	Unadjusted Carrying Value	OTTI Charge to Earnings	OTTI Charge to OCI	9/30/11 Carrying Value	9/30/11 Fair Value
Pooled trust preferred security	\$ 48,867	\$ 20,021	\$ 20,836	\$ 8,010	\$ 10,204

The following chart shows the balance of other comprehensive income charges related to fair value:

	Pooled trust preferred securities
Balance at June 30, 2011	\$ 20,836
Total losses realized/unrealized Included as a charge to earnings Change to other comprehensive income	
Balance at September 30, 2011	\$ 20,836

The following table displays the cumulative credit component of OTTI charges recognized in earnings on debt securities for which a portion of an OTTI is recognized in other comprehensive income at September 30, 2011:

	Pooled trust preferred securities
Balance at June 30, 2011	\$ 20,021
Addition for the credit component on debt securities in which OTTI was not previously recognized	
Balance at September 30, 2011	\$ 20,021

There were no OTTI charges recognized during the September 30, 2011 quarter. During the three months ended September 30, 2010, charges of \$3,035 on OTTI investments were recognized, with \$996 recognized as net impairment losses in earnings and \$2,039 as the non-credit portion reflected in other comprehensive income. The September 30, 2010 quarter charges were due to OTTI of four pooled trust preferred securities. The write-downs were based on individual securities credit performance and the issuer's ability to make its contractual principal and interest payments. Based on the credit worthiness of the issuers, management determined that the remaining investments in debt and equity securities were not other-than temporarily impaired at September 30, 2011.

**NOTE 8. GOODWILL AND MARKET VALUATION**

Goodwill of \$25,634 shown on the Statement of Financial Condition relates to acquisitions in fiscal 2002 (Masontown) and 2005 (Advance). The operations of both acquisitions have been fully integrated into Parkvale's operations. All of the offices and business activities of both Masontown and Advance have been retained, remain open and are performing as expected. The market price of Parkvale's common stock was \$18.40 per share at September 30, 2011, which exceeds the book value of \$16.70 at such date. Goodwill is tested on an annual basis as of June 30 of each year in conjunction with the Corporation's fiscal year end but can be tested for impairment at any time if circumstances warrant.

Edgar Filing: FNB CORP/FL/ - Form 424B3

An independent third party was retained for the fiscal year ended June 30, 2011 to assist in determining whether an impairment of goodwill was appropriate. In a report dated July 25, 2011, the third party certified goodwill

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

non-impairment supported by a composite fair value measure based upon the outstanding acquisition offer by F.N.B. Corporation, a discounted cash flow estimate of Parkvale's current fair value, stock market capitalization data, and a deal value to book value of tangible equity ratios observed in recent comparable banking sector merger and acquisition transactions. Anecdotal evidence for goodwill non-impairment is also shown in the strong underlying financial foundations of Parkvale's fair value. Based on their report, management determined that goodwill was not impaired at June 30, 2011 or September 30, 2011.

**NOTE 9. EARNINGS PER SHARE ( EPS )**

The following table sets forth the computation of basic and diluted earnings per share for the three months ended September 30:

	2011	2010
Numerator for basic and diluted EPS:		
Net Income	\$ 1,360	\$ 2,223
Less: Preferred stock dividend	397	397
Net income to common shareholders	963	1,826
Denominator:		
Weighted average shares for basic EPS	5,582,846	5,529,211
Effect of dilutive stock options	133,563	
Weighted average shares for dilutive EPS	5,716,409	5,529,211
Net income per common share:		
Basic	\$ 0.17	\$ 0.33
Diluted	\$ 0.17	\$ 0.33
Dividends per common share	\$ 0.02	\$ 0.02

**NOTE 10. NEW ACCOUNTING PRONOUNCEMENTS**

In September 2011, the FASB issued Accounting Standards Update (ASU) 2011-08, *Testing Goodwill for Impairment*. The purpose of this ASU is to simplify how entities test goodwill for impairment by adding a new first step to the preexisting goodwill impairment test under ASC Topic 350, *Intangibles - Goodwill and other*. This amendment gives the entity the option to first assess a variety of qualitative factors such as economic conditions, cash flows, and competition to determine whether it was more likely than not that the fair value of goodwill has fallen below its carrying value. If the entity determines that it is not likely that the fair value has fallen below its carrying value, then the entity will not have to complete the original two-step test under Topic 350. The amendments in this ASU are effective for impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted. The Corporation is evaluating the impact of this ASU on its consolidated financial statements.

In April 2011, the FASB issued ASU No. 2011-02, *A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*, to address diversity in practice concerning determining whether a restructuring constitutes a troubled debt restructuring. This update specifies that in evaluating whether a restructuring is a troubled debt restructuring (TDR), a creditor must separately conclude both that a concession has been granted by the creditor and that the debtor is experiencing financial difficulties. Also, ASU No. 2011-02 provides clarifying guidance in determining whether a concession has been granted and whether a debtor is experiencing financial difficulties. In addition, the update precludes a creditor from using the effective interest rate test in the debtor's guidance on restructuring of payables when evaluating whether a restructuring is a TDR. These requirements are effective for the first interim or annual period beginning on or after June 15, 2011, and should

**NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(Dollar amounts in thousands, except share data)

be applied retrospectively to restructurings made during the period from the beginning of the annual period of adoption to the date of adoption. Adoption of this standard did not have a material effect on the financial statements, results of operations or liquidity of the Corporation

**NOTE 11. ACQUISITION**

On June 15, 2011, Parkvale Financial Corporation ( Parkvale ), the parent company of Parkvale Savings Bank ( Parkvale Savings ), and F.N.B. Corporation ( FNB ) the parent company of First National Bank of Pennsylvania ( FNB Bank ), entered into an Agreement and Plan of Merger (the Merger Agreement ) pursuant to which Parkvale will merge with and into FNB (the Merger ). Promptly following consummation of the Merger, it is expected that Parkvale Savings will merge with and into FNB Bank (the Bank Merger ).

Under the terms of the Merger Agreement, shareholders of Parkvale will receive 2.178 shares (the Exchange Ratio ) of FNB common stock for each share of common stock they own. The Merger Agreement also provides that all options to purchase Parkvale stock which are outstanding and unexercised immediately prior to the closing ( Continuing Options ) shall be converted into fully vested and exercisable options to purchase shares of FNB common stock, as adjusted for the Exchange Ratio. The transaction is expected to close during the March 31, 2012 quarter.

Item 2.

**PARKVALE FINANCIAL CORPORATION**

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION**

**AND RESULTS OF OPERATIONS**

The following is management's discussion and analysis of the significant changes in the results of operations, capital resources and liquidity presented in the accompanying consolidated financial statements for Parkvale Financial Corporation. The Corporation's consolidated financial condition and results of operations consist almost entirely of Parkvale Bank's financial condition and results of operations. Current performance does not guarantee, and may not be indicative of, similar performance in the future. The financial statements as of and for the quarter ended September 30, 2011 are unaudited and, as such, are subject to year-end audit review.

**Forward-Looking Statements:**

In addition to historical information, this filing may contain forward-looking statements. We have made forward-looking statements in this document that are subject to risks and uncertainties. Forward-looking statements include the information concerning possible or assumed future results of operations of the Corporation and its subsidiaries. When we use words such as believe, expect, anticipate, or similar expressions, we are making forward-looking statements.

The statements in this filing that are not historical fact are forward-looking statements. Forward-looking information should not be construed as guarantees of future performance. Actual results may differ from expectations contained in such forward-looking information as a result of various factors, including but not limited to the interest rate environment, economic policy or conditions, federal and state banking and tax regulations and competitive factors in the marketplace. Each of these factors could affect estimates, assumptions, uncertainties and risks considered in the development of forward-looking information and could cause actual results to differ materially from management's expectations regarding future performance.

Shareholders should note that many factors, some of which are discussed elsewhere in this document, could affect the future financial results of the Corporation and its subsidiaries and could cause those results to differ materially from those expressed in our forward-looking statements contained in this document. These factors include the following: operating, legal and regulatory risks; economic, political and competitive forces affecting our businesses; and the risk that our analyses of these risks and forces could be incorrect and/or that the strategies developed to address them could be unsuccessful.

**Critical Accounting Policies, Judgments and Estimates:**

The accounting and reporting policies of the Corporation and its subsidiaries conform to accounting principles generally accepted in the United States of America (U.S. GAAP) and general practices within the financial services industry. All significant inter-company transactions are eliminated in consolidation, and certain reclassifications are made when necessary to conform the previous year's financial statements to the current year's presentation. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amount of assets and liabilities as of the dates of the balance sheets and revenues and expenditures for the periods presented. Therefore, actual results could differ significantly from those estimates. Accounting policies involving significant judgments and assumptions by management, which have or could have a material impact on the carrying value of certain assets or comprehensive income, are considered critical accounting policies. The Corporation recognizes the following as critical accounting policies: Allowance for Loan Loss, Carrying Value of Investment Securities, Valuation of Foreclosed Real Estate, Carrying Value of Goodwill and Other Intangible Assets and Valuation Allowance of Deferred Tax Asset.

The Corporation's critical accounting policies and judgments disclosures are contained in the Corporation's June 30, 2011 Annual Report on Form 10-K filed on September 27, 2011. Management believes that there have been no material changes since June 30, 2011. The Corporation has not substantively changed its application of the foregoing policies, and there have been no material changes in assumptions or estimation techniques used as compared to prior periods.

Under GAAP (ASC 740), a valuation allowance is required to be recognized if it is more likely than not that all or a portion of our deferred tax assets will not be recognized. The term more likely than not is defined as greater than a 50% probability of occurrence. The determination of the realizability of the deferred tax assets is highly subjective and dependent upon judgment concerning our evaluation of both positive and negative evidence, our forecast of future income, available net operating loss carryback and carryforward, applicable tax planning strategies, and assessment of current and future economic and business conditions. The valuation allowances recorded at September 30, 2011 and 2010 were related to writedowns on equity securities that are unlikely to be offset by future capital gain income.

The Corporation periodically conducts an analysis to determine if an additional valuation allowance is required as a result of the recent losses experienced by the Corporation, and concluded that an additional valuation allowance was not necessary, largely based on our projections of future taxable income and that recent losses are not expected to have a significant long-term impact on our operating profitability. Additional positive evidence considered in our analysis was our long-term history of generating taxable income prior to the recent economic downturn; our current projections of positive taxable income for the 2011 tax year; the fact that the Corporation continued to have solid operational earnings during these loss periods; the fact that recent losses were primarily attributable to impaired investments in trust preferred securities which the Corporation stopped investing in during 2007 (these investment losses were a result of the economic downturn experienced systemically by the financial industry beginning in 2008); and the fact that the Corporation can apply the majority of its tax net operating losses in the available two-year carryback period. We concluded that the aforementioned positive evidence outweighs the negative evidence, and as a result an additional valuation allowance was not necessary at either September 30, 2011 or 2010.

(1) The applicable income and expense figures have been annualized in calculating the percentages.

**Nonperforming Loans and Foreclosed Real Estate:**

A weak national economy and to a lesser extent local housing sector and credit markets contributed towards an increased level of non-performing assets, which peaked at \$40.9 million at September 30, 2009. Nonperforming loans (delinquent 90 days or more) and real estate owned in the aggregate represented 2.02%, 1.73% and 2.00% of total assets at September 30, 2011, June 30, 2011 and September 30, 2010, respectively. Such non-performing assets at September 30, 2011 have increased to \$36.3 million from \$31.2 million at June 30, 2011, and includes \$29.1 million of non-accrual loans. Please refer to the loan charts and analysis in the notes to unaudited interim consolidated financial statements that precede this section.

As of September 30, 2011, single-family mortgage loans delinquent 90 days or more include 51 loans aggregating \$21.8 million purchased from others and serviced by national service providers with a cost basis ranging from \$100,400 to \$999,999 and 43 loans aggregating \$3.8 million in Parkvale's retail market area. Of these total 94 loans, 18 have a cost basis of \$500,000 or greater. Management believes that the delinquent 1-4 family mortgage loans are adequately collateralized with the exception of 38 loans aggregating \$13.8 million, which have the necessary related allowances for losses provided. Loans 180 days or more delinquent are individually evaluated for collateral values in accordance with banking regulations with specific reserves recorded as appropriate.

At September 30, 2011, modifications have been performed on 168 1-4 family mortgage loans totaling \$29.5 million. Of the aggregate \$29.5 million, 129 modifications totaling \$20.4 million relate primarily to extension of maturity dates and extension of interest-only payment periods of thirty-six months or less. Of the aggregate \$29.5 million, 39 modifications totaling \$9.1 million were determined to be Troubled Debt Restructurings (TDR). The discounted cash flows related to these TDRs were analyzed and the appropriate reserves have been established at September 30, 2011. Of the 129 loan modifications, 113 loans totaling \$18.3 million are performing at September 30, 2011. Of the 39 TDRs, 28 loans totaling \$6.4 million are performing at September 30, 2011.

Commercial mortgage loans 90 days or more delinquent of \$5.2 million at September 30, 2011 include a \$3.8 million relationship to a real estate holding company that leases space to an operator of an ice rink that is a controlled entity of the borrower. The commercial relationship is in the process of collection and management believes the facility is adequately collateralized.

Commercial business loans 90 days or more delinquent of \$1.5 million at September 30, 2011 include a \$768,000 relationship to a coal extraction and reclamation entity. The commercial relationship is in the process of collection and management believes the facility is adequately collateralized.

Parkvale has \$36.4 million of loans classified as substandard at September 30, 2011. The substandard loans have exhibited signs of weakness, or have been recently modified or refinanced and are being monitored to assess if new payment terms are followed by the borrowers. These loans have exhibited characteristics that warrant special monitoring. Examples of these concerns include irregular payment histories, questionable collateral values, investment properties having cash flows insufficient to service debt, and other financial inadequacies of the borrower. These loans are regularly monitored with efforts being directed towards resolving the underlying concerns and achieving a performing status classification of such loans.

Foreclosed real estate of \$7.2 million at September 30, 2011 consists of \$4.5 million of single-family dwellings. At September 30, 2011, foreclosed real estate also includes nine commercial real estate properties with an aggregate value of \$2.7 million, including three commercial real estate properties with a net book value of \$1.1 million formerly used as automobile dealerships and a former hospital with a net book value of \$982,000 that has ceased business operations. Foreclosed real estate properties are recorded at the lower of the carrying amount or fair value of the property less costs to sell, with reserves established when deemed necessary.

Loans are placed on nonaccrual status when, in management's judgment, the probability of collection of principal and interest is deemed to be insufficient to warrant further accrual. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is deducted from interest income. As a result, uncollected interest income is not included in earnings for nonaccrual loans. The amount of interest income on nonaccrual loans that had not been recognized in interest income was \$2.0 million at September 30, 2011 and \$1.3 million at September 30, 2010. Parkvale provides an allowance for the loss of accrued but uncollected interest on mortgage, consumer and commercial business loans that are 90 days or more contractually past due.

**Allowance for Loan Losses:**

The allowance for loan losses was \$18.7 million at September 30, 2011, \$18.6 million at June 30, 2011 and \$19.6 million at September 30, 2010 or 1.90%, 1.86% and 1.90% of gross loans, respectively. The adequacy of the allowance for loan loss is determined by management through evaluation of the loss probable on individual nonperforming, delinquent and high dollar loans, economic and business trends, growth and composition of the loan portfolio and historical loss experience, as well as other relevant factors.

Parkvale continually monitors the loan portfolio to identify potential portfolio risks and to detect potential credit deterioration in the early stages. Reserves are then established based upon the evaluation of the inherent risks in the loan portfolio. Changes to the levels of reserves are made quarterly based upon perceived changes in risk. When evaluating the risk elements within the loan portfolio, Parkvale has a substantial portion of the loans secured by real estate as noted in the loan footnote. In addition to the \$603.6 million of 1-4 family mortgage loans, the majority of the consumer loans represent either second mortgages in the form of term loans and home equity lines of credit or first lien positions on home loans. The Bank does not underwrite subprime loans, negative amortization loans or discounted teaser rates on ARM loans. Included in the 1-4 family mortgage portfolio is \$455.4 of amortizing loans and \$148.2 million of interest only loans as of September 30, 2011. The initial interest only period for \$56.9 million of the aggregate \$148.2 million has expired, and the loans are contractually amortizing at September 30, 2011. Originated adjustable 1-4 family mortgage loans are made at competitive market rates in the primary lending areas of the Bank with add-on margins ranging from 250 to 300

basis points to either the constant maturity treasury yields or LIBOR. Adjustable-rate 1-4 family mortgage loans purchased in the secondary market that are serviced by national service providers are prudently underwritten with emphasis placed on loans to value of less than 80% combined with high FICO scores. The purchased loan portfolio is geographically diversified throughout the United States and is generally considered well collateralized. Aside from the states where Parkvale has offices, no other state exceeds 5% of the mortgage loan portfolio. While management believes the allowance is adequate to absorb estimated credit losses in its existing loan portfolio, future adjustments may be necessary in circumstances where economic conditions change and affect the assumptions used in evaluating the adequacy of the allowance for loan losses.

#### **Liquidity and Capital Resources:**

Federal funds sold increased \$31.4 million or 24.8% from June 30, 2011 to September 30, 2011. Investment securities held to maturity decreased \$14.4 million or 2.7% from June 30, 2011 to September 30, 2011, primarily due to the call of certain short-term agency step securities and payments on agency mortgage-backed securities. Interest-earning deposits in other institutions decreased \$100,000 or 2.2%. Loans, net of allowance, decreased \$19.0 million or 1.9% from June 30, 2011 to September 30, 2011. The decrease in the loan portfolio was primarily due to a \$12.3 million or 2.0% decline in 1-4 family residential loans. Deposits increased \$3.2 million or 0.2% from June 30, 2011 to September 30, 2011, FHLB advances decreased \$10.0 million or 6.6% due to the maturity of a \$10 million advance at a cost of 4.45%, escrow for taxes and insurance decreased \$3.3 million or 43.8%, term debt decreased \$625,000 or 2.9%, other debt increased \$1.9 million or 15.2% and other liabilities decreased \$567,000 or 10.8%. Parkvale Bank's FHLB advance available maximum borrowing capacity was \$714.2 million at September 30, 2011. If Parkvale were to experience a deposit decrease in excess of the available cash resources and cash equivalents, the FHLB and Federal Reserve could be utilized to fund a rapid decrease in deposits.

**TARP Capital Purchase Program:** On October 14, 2008, the United States Department of the Treasury (the Treasury) announced a voluntary Capital Purchase Program (the CPP) under which the Treasury will purchase senior preferred shares from qualifying financial institutions. The plan is part of the \$700 billion Emergency Economic Stabilization Act signed into law in October 2008.

On December 23, 2008, pursuant to the CPP established by the Treasury, Parkvale entered into a Letter Agreement, which incorporates by reference the Securities Purchase Agreement Standard Terms, with the Treasury (the Agreement), pursuant to which Parkvale issued and sold to the Treasury for an aggregate purchase price of \$31,762,000 in cash (i) 31,762 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$1.00 per share, having a liquidation preference of \$1,000 per share (the Series A Preferred Stock), and (ii) a ten-year warrant to purchase up to 376,327 shares of common stock, par value \$1.00 per share, of Parkvale (Common Stock), at an initial exercise price of \$12.66 per share, subject to certain anti-dilution and other adjustments (the Warrant).

The Series A Preferred Stock pays cumulative dividends at a rate of 5% per annum on the liquidation preference for the first five years, and thereafter at a rate of 9% per annum. The Series A Preferred Stock has no maturity date and ranks senior to the Common Stock (and pari passu with Parkvale's other authorized shares of preferred stock, of which no shares are currently outstanding) with respect to the payment of dividends and distributions and amounts payable in the unlikely event of any future liquidation or dissolution of Parkvale. Parkvale may redeem the Series A Preferred Stock at a price of \$1,000 per share plus accrued and unpaid dividends, subject to the concurrence of the Treasury and its federal banking regulators. Prior to December 23, 2011, unless the Corporation has redeemed the Series A Preferred Stock or the Treasury has transferred the Series A Preferred Stock to a third party, the consent of the Treasury will be required for the Corporation to increase its Common Stock dividend or repurchase its Common Stock or other equity or capital securities, other than in certain circumstances specified in the Agreement.

The Warrant is immediately exercisable. The Warrant provides for an adjustment of the exercise price and the number of shares of Common Stock issuable upon exercise pursuant to customary anti-dilution provisions, such

as upon stock splits or distributions of securities or other assets to holders of Common Stock, and upon certain issuances of Common Stock at or below a specified price relative to the then-current market price of Common Stock. The Warrant expires ten years from the issuance date. Pursuant to the Agreement, the Treasury has agreed not to exercise voting power with respect to any shares of Common Stock issued upon exercise of the Warrant.

**Term Debt:** On December 30, 2008, the Corporation entered into a Loan Agreement with PNC Bank, National Association ( PNC ) for a term loan in the amount of \$25.0 million (the Loan ). The Loan pays interest at a rate equal to LIBOR plus three hundred and twenty five basis points, payable quarterly. Principal on the Loan is due and payable in fifteen consecutive quarterly payments of \$625,000, commencing on March 31, 2010, with the remaining outstanding balance, which is scheduled to be \$15,625,000, due and payable on December 31, 2013 (the Maturity Date ). The outstanding balance due under the credit facility may be repaid, at any time, in whole or in part at the Corporation's option. In connection with the Loan, the Corporation executed a Term Note, dated December 30, 2008, to evidence the Loan and a Pledge Agreement, dated December 30, 2008, whereby the Corporation granted PNC a security interest in the outstanding capital stock of Parkvale Savings Bank, the wholly owned subsidiary of the Corporation. The Loan Agreement contains customary and standard provisions regarding representations and warranties of the Corporation, covenants and events of default. If the Corporation has an event of default, the interest rate of the loan may increase by 2% during the period of default. As of September 30, 2011, the Corporation did not meet the terms of one of the financial covenants contained in the Loan Agreement, which is considered an event of default. This is expected to increase the interest rate on the \$20.6 million term debt by 2%, which would have the impact of increasing interest expense by \$103,000 per quarter.

On January 7, 2009, the Corporation entered into swap arrangements with PNC to convert portions of the LIBOR floating interest rates to fixed interest rates for three and five years. Under the swap agreements after the effects of the add-on of 325 basis points to LIBOR, \$5.0 million matures on December 31, 2011 at a rate of 4.92% to 6.92% and an additional \$15.0 million matures on December 31, 2013 at a rate of 5.41% to 7.41%.

In January 2009, the Corporation entered into interest rate swap contracts to modify the interest rate characteristics of designated debt instruments from variable to fixed in order to reduce the impact of changes in future cash flows due to interest rate changes. The Corporation hedged its exposure to the variability of future cash flows for all forecasted transactions for a maximum of three to five years for hedges converting an aggregate of \$20.0 million in floating-rate debt to fixed. The fair value of these derivatives, totaling a loss of \$588,000 at September 30, 2011, is reported as a contra account in other liabilities and offset in accumulated other comprehensive income for the effective portion of the derivatives. Ineffectiveness of these swaps, if any, is recognized immediately in earnings. The change in value of these derivatives during the quarter ended September 30, 2011 resulted in no adjustment to current earnings, as the swaps were measured as effective.

Interest rate swap contracts involve the risk of dealing with counterparties and their ability to meet contractual terms. When the fair value of a derivative instrument contract is positive, this generally indicates that the counterparty or customer owes the Corporation, and results in credit risk to the Corporation. When the fair value of a derivative instrument contract is negative, the Corporation owes the customer or counterparty and therefore, has no credit risk.

**Capital:** Of the \$56.8 million of gross proceeds from the sale of the Series A Preferred Stock and the Loan from PNC, the Corporation contributed \$50 million to the Bank as additional Tier 1 capital at the Bank. As noted above, the PNC Loan is repaid quarterly, with a final principal payment of \$15.6 million due on December 31, 2013, and the dividend rate on the Series A Preferred Stock will increase from 5% to 9% per annum after the five-year anniversary date of the issuance of such stock. The Bank may not pay any dividends to the Corporation if such dividends would result in the Bank no longer being well capitalized, unless the Bank receives the prior non-objection of its regulators.

Shareholders' equity was \$125.0 million or 6.95% of total assets at September 30, 2011. During the three months ended September 30, 2011, shareholders' equity increased by \$788,000 due primarily to net income of

\$1.4 million offset by declaration of common and preferred stock dividends of \$509,000. The Corporation is restricted from repurchasing additional shares of its Common Stock prior to December 23, 2011 unless it either redeems the Series A Preferred Stock or receives the written consent of the Treasury.

The Bank is required to maintain Tier 1 (Core) capital equal to at least 4% of the institution's adjusted total assets and Total (Supplementary) Risk-Based capital equal to at least 8% of its risk-weighted assets. At September 30, 2011, Parkvale Bank was in compliance with all applicable regulatory requirements, with Tier 1 Core, Tier 1 Risk-Based and Total Risk-Based ratios of 6.70%, 10.43% and 11.51%, respectively. The regulatory capital ratios for Parkvale Bank at September 30, 2011 are calculated as follows:

(Dollars in 000's)	Tier 1 Core Capital	Tier 1 Risk-Based Capital	Total Risk-Based Capital
Equity capital (1)	\$ 141,633	\$ 141,633	\$ 141,633
Less non-allowable intangible assets	(27,375)	(27,375)	(27,375)
Less non-allowable deferred tax asset	(7,908)	(7,908)	(7,908)
Plus permitted valuation allowances (2)			12,384
Plus accumulated other comprehensive income	13,189	13,189	13,189
<b>Total regulatory capital</b>	<b>119,539</b>	<b>119,539</b>	<b>131,923</b>
<b>Minimum required capital</b>	<b>71,370</b>	<b>45,831</b>	<b>91,662</b>
<b>Excess regulatory capital</b>	<b>\$ 48,169</b>	<b>\$ 73,708</b>	<b>\$ 40,261</b>
<b>Adjusted total assets (1)</b>	<b>\$ 1,784,252</b>	<b>\$ 1,145,779</b>	<b>\$ 1,145,779</b>
Regulatory capital as a percentage	6.70%	10.43%	11.51%
Minimum capital required as a percentage	4.00%	4.00%	8.00%
<b>Excess regulatory capital as a percentage</b>	<b>2.70%</b>	<b>6.43%</b>	<b>3.51%</b>
<b>Well capitalized requirement</b>	<b>5.00%</b>	<b>6.00%</b>	<b>10.00%</b>

(1) Represents amounts for the consolidated Bank as reported to the Pennsylvania Department of Banking and FDIC on Form 041 for the quarter ended September 30, 2011.

(2) Limited to 1.25% of risk adjusted total assets.

**Results of Operations Comparison of Three Months Ended September 30, 2011 and 2010:**

For the three months ended September 30, 2011, net income available to common shareholders was \$963,000 compared to \$1.8 million for the quarter ended September 30, 2010. Net income per common diluted share was \$0.17 for the quarter ended September 30, 2011 and \$0.33 for the quarter ended September 30, 2010. Excluding the preferred stock dividend, net income was \$1.4 million for the three months ended September 30, 2011, compared to \$2.2 million for the three months ended September 30, 2010. The decrease in net income for the September 30, 2011 quarter primarily reflects a \$1.2 million reduction in gain on sale of assets and a \$624,000 decrease in net interest income. These factors were partially offset by a \$996,000 decrease in non-cash debt security impairment charges and a \$219,000 decrease in non-interest expense. The lower non-interest expense was due primarily to a \$365,000 decrease in compensation expense and a \$309,000 decrease in FDIC insurance premium expense as a result of the FDIC's revised deposit insurance rates effective April 1, 2011, offset by \$325,000 of costs related to the pending merger with F.N.B. Corporation.

**Interest Income:**

Parkvale had interest income of \$14.8 million during the three months ended September 30, 2011 versus \$16.8 million during the comparable period in 2010. The \$2.0 million or 11.9% decrease is the result of a \$32.4 million or 1.9% decrease in the average balance of interest-earning assets and a 40 basis point decrease in the average

yield from 3.95% in the September 30, 2010 quarter to 3.55% in the current quarter. Interest income from loans decreased \$1.6 million or 12.5%, resulting from a decrease in the average outstanding loan balances of \$47.8 million or 4.7% and a 42 basis point decrease in the average yield from 5.10% in 2010 to 4.68% in 2011. The decrease in the loan portfolio was primarily due to a decline in single-family residential mortgage loans. Investment interest income decreased by \$346,000 or 9.4% due to a 48 basis point decrease in the average yield from 2.98% in the September 30, 2010 quarter to 2.50% in the current quarter, offset by an increase of \$40.0 million or 8.1% in the average balance. Interest income earned on federal funds sold decreased \$16,000 or 13.1% from the 2010 quarter due to a decrease of \$24.6 million or 12.8% in the average balance during the September 30, 2011 quarter. The current Federal Reserve target rate is 0.25%. The weighted average yield on all interest-earning assets was 3.63% at September 30, 2011 and 3.89% at September 30, 2010.

**Interest Expense:**

Interest expense decreased \$1.4 million or 17.2% from the 2010 to the 2011 quarter. The decrease was due to a 28 basis point decrease in the average rate paid on deposits and borrowings from 1.86% in 2010 to 1.58% in 2011 and a decrease in the average deposits and borrowings of \$47.1 million or 2.7%. At September 30, 2011, the average rate payable on liabilities was 1.17% for deposits, 4.61% for borrowings, 5.19% for term debt and 1.54% for combined deposits, borrowings and debt.

**Net Interest Income:**

Net interest income was \$8.2 million for the quarter ended September 30, 2011 compared to \$8.9 million for the quarter ended September 30, 2010. The \$624,000 or 7.0% decrease is primarily attributable to a 12 basis point decrease in the average interest rate spread from 2.09% in 2010 to 1.97% in 2011, offset by an increase in net average interest-earning assets of \$14.7 million.

**Provision for Loan Losses:**

The provision for loan losses is an amount added to the allowance against which loan losses are charged. The provision for loan losses for the quarter ended September 2011 increased by \$88,000 or 8.5% from the September 2010 quarter based upon an analysis of credit factors related to the Bank's portfolio and related reserve levels as of September 30, 2011. The level of nonperforming loans increased by \$2.0 million or 7.3% at September 30, 2011 compared to September 30, 2010. Aggregate valuation allowances were 1.90%, 1.86% and 1.90% of gross loans at September 30, 2011, June 30, 2011 and September 30, 2010, respectively.

Nonperforming loans and real estate owned aggregated \$36.3 million, \$31.2 million and \$36.5 million at September 30, 2011, June 30, 2011 and September 30, 2010, representing 2.02%, 1.73% and 2.00% of total assets at the respective balance sheet dates. Total loan loss reserves at September 30, 2011 were \$18.7 million, compared to \$18.6 million at June 30, 2011 and \$19.6 million at September 30, 2010. Management considers loan loss reserves sufficient when compared to the value of underlying collateral. See Nonperforming Loans and Foreclosed Real Estate and Allowance for Loan Losses concerning trends experienced. Collateral is considered and evaluated when establishing the provision for loan losses and the sufficiency of the allowance for loan losses. Management believes the allowance for loan losses is adequate to cover the amount of probable loan losses.

**Noninterest Income:**

Total noninterest income for the three months ended September 30, 2011 decreased by \$483,000 due primarily to a \$1.2 million decrease in gain on sale of assets partially offset by a \$996,000 decrease in non-cash debt security impairment charges. The gain on sale of assets recognized during the September 30, 2010 quarter pertains to the disposition of \$49 million of below-investment grade non-agency collateralized mortgage obligations, which were reclassified from held to maturity to available for sale at June 30, 2010 due to existing and projected credit

deterioration at June 30, 2010. The September 30, 2010 quarter writedowns were due to the other than temporary impairment of four pooled trust preferred securities resulting primarily from the deterioration of and payment deferral by issuers during the current quarter. Noninterest income included decreases of \$53,000 or 3.0% of service charges on deposit accounts, \$35,000 or 9.2% of other fees and service charges and \$219,000 or 28.4% of other income. Annuity fee and commission income was \$263,000 in the 2011 quarter compared to \$313,000 in the 2010 quarter.

**Noninterest Expense:**

Total noninterest expense decreased by \$219,000 or 2.7% for the three months ended September 30, 2011 compared to the September 30, 2010 quarter. The lower non-interest expense was due primarily to a \$365,000 or 9.3% decrease in compensation expense due to lower costs associated with certain employee benefit plans and a \$309,000 or 34.6% decrease in FDIC insurance premium expense as a result of the FDIC's revised deposit insurance rates effective April 1, 2011, offset by \$325,000 of costs related to the pending merger with F.N.B. Corporation. Marketing expense increased by \$22,000 or 26.2%. Annualized noninterest expense as a percentage of average assets was 1.73% for the quarter ended September 30, 2011 and 1.74% for the quarter ended September 30, 2010.

**Income Tax Expense:**

Income tax expense for the three months ended September 30, 2011 was \$525,000 compared to \$638,000 for the quarter ended September 30, 2010. The \$113,000 decrease was due to lower levels of pretax income. The overall effective tax rate was 27.8% and 22.3% for the three months ended September 30, 2011 and 2010, respectively. The effective tax rates for both the September 2011 and 2010 quarters are lower than the federal statutory rate of 35% due to the tax benefits primarily resulting from tax-exempt income on loans, investments and bank owned life insurance.

**Impact of Inflation and Changing Prices:**

The financial statements and related data presented herein have been prepared in accordance with U.S. GAAP, which requires the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation. Unlike most industrial companies, substantially all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services as measured by the consumer price index.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Quantitative and qualitative disclosures about market risk are presented at June 30, 2011 in Item 7A of Parkvale Financial Corporation's Form 10-K, filed with the SEC on September 27, 2011.

**Item 4. Controls and Procedures**

Disclosure controls and procedures are monitored and supervised by Parkvale's management, including the CEO and Chief Financial Officer, regarding the effectiveness of the design and operation of Parkvale's disclosure controls and procedures. Parkvale's management, including the CEO and Chief Financial Officer, concluded that Parkvale's disclosure controls and procedures were effective as of September 30, 2011. There have been no changes in Parkvale's internal controls or in other factors that materially affected, or that are reasonably likely to materially affect, Parkvale's internal controls.

**PART II OTHER INFORMATION**

- Item 1. Legal Proceedings  
None
- Item 1A. Risk Factors  
Risk factor disclosures are presented at June 30, 2011 in Item 1A of the Corporation's Form 10-K, filed with the SEC on September 27, 2011. Management believes that there have been no material changes in Parkvale's risk factors since June 30, 2011.
- Item 2. Unregistered Sales of Equity Securities and Use of Proceeds  
(a) Not applicable  
(b) Not applicable  
(c) Not applicable
- Item 3. Defaults Upon Senior Securities  
As of September 30, 2011, the Corporation did not meet the terms of one of the financial covenants contained in the PNC Term Loan Agreement, which is considered an event of default. This is expected to increase the interest rate on the \$20.6 million term debt by 2%, which would have the impact of increasing interest expense by \$103,000 per quarter.
- Item 4. Reserved  
N/A
- Item 5. Other Information  
None
- Item 6. Exhibits. The following exhibits are filed here within:
- 31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 101.1 Interactive data file to be filed by amendment, with the amendment expected to be filed on or before December 14, 2011.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

**CERTIFICATION PURSUANT TO RULE 13a-14(a)/15d-14(a)**  
**OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED, AS ADOPTED**  
**PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Robert J. McCarthy, Jr., President and Chief Executive Officer of Parkvale Financial Corporation, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Parkvale Financial Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a)

Edgar Filing: FNB CORP/FL/ - Form 424B3

all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

- b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
