FORWARD-LOOKING STATEMENTS

This Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbors created by those laws. These forward-looking statements reflect our current expectations and projections about future events and include information about possible or assumed future results of our operations. All statements, other than statements of historical facts, included or incorporated by reference in this Report that address activities, events or developments that we expect or anticipate may occur in the future, including such things as growth of our business and operations, business strategy, competitive strengths, goals, plans, future capital expenditures and references to future successes may be considered forward-looking statements. Generally, words such as anticipate, believe, estimate, expect, intend, plan, probably or similar expressions indicate forward-looking statements.

Many risks and uncertainties may have an impact on the matters addressed in these forward-looking statements, which could affect our future financial results and performance, including, among other things:

the effects of catastrophe losses,

the cyclical nature of the insurance business,

inherent uncertainties in the loss estimation process, which can adversely impact the adequacy of loss reserves,

the impact of past and future potential credit market downturns, including any potential additional ratings downgrade and/or impairment or perceived impairment of the debt securities of sovereign issuers, including the United States of America,

the effects of emerging claim and coverage issues,

the effects of extensive governmental regulation of the insurance industry,

changes to the country's health care delivery system,

the effects, if any, of climate change, on the risks we insure,

potential credit risk with brokers,

the effects of industry consolidations,

our assessment of underwriting risk,

our retention of risk, which could expose us to potential losses,

the adequacy of reinsurance protection,

the ability and willingness of reinsurers to pay balances due us,

the occurrence of terrorist activities,

our ability to maintain our competitive position,

fluctuations in securities markets, including defaults, which may reduce the value of our investment assets, reduce investment income or generate realized investment losses,

changes in our assigned financial strength ratings,

our ability to raise capital and funds for liquidity in the future,

attraction and retention of qualified employees,

our ability to successfully expand our business through the acquisition of insurance-related companies,

impairment of goodwill,

the ability of our insurance company subsidiaries to pay dividends in needed amounts,

fluctuations in foreign exchange rates,

failure of, or loss of security related to, our information technology systems,

difficulties with outsourcing relationships, and

change of control.

We describe these risks and uncertainties in greater detail in Item 1A, Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011.

These events or factors could cause our results or performance to differ materially from those we express in our forward-looking statements. Although we believe that the assumptions underlying our forward-looking statements are reasonable, any of these assumptions, and, therefore, the forward-looking statements based on these assumptions, could themselves prove to be inaccurate. In light of the significant uncertainties inherent in the forward-looking statements that are included in this Report, our inclusion of this information is not a representation by us or any other person that our objectives or plans will be achieved.

Our forward-looking statements speak only at the date made, and we will not update these forward-looking statements unless the securities laws require us to do so. In light of these risks, uncertainties and assumptions, any forward-looking events discussed in this Report may not occur.

Notes to Consolidated Financial Statements

(unaudited, tables in thousands except per share data)

(1) General Information

HCC Insurance Holdings, Inc. (HCC) and its subsidiaries (collectively we, us or our) include domestic and foreign property and casualty and life insurance companies and underwriting agencies with offices in the United States, the United Kingdom, Spain and Ireland. We underwrite a variety of non-correlated specialty insurance products, including property and casualty, accident and health, surety, credit, and aviation product lines, in approximately 180 countries. We market our products through a network of independent agents and brokers, producers, managing general agents and directly to customers.

Basis of Presentation

Our unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and include the accounts of HCC and its subsidiaries. We have made all adjustments that, in our opinion, are necessary for a fair statement of results of the interim periods, and all such adjustments are of a normal recurring nature. All significant intercompany balances and transactions have been eliminated in consolidation. The consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2011. The consolidated balance sheet at December 31, 2011 was derived from the audited financial statements but does not include all disclosures required by GAAP.

Management must make estimates and assumptions that affect amounts reported in our consolidated financial statements and in disclosures of contingent assets and liabilities. Ultimate results could differ from those estimates. We have reclassified certain amounts in our 2011 consolidated financial statements to conform to the 2012 presentation. None of our reclassifications had an effect on our consolidated net earnings, shareholders' equity or cash flows.

Accounting Guidance Adopted in 2012

Deferred Policy Acquisition Costs

A new accounting standard clarifies the definition of acquisition costs incurred by an insurance company and limits capitalization to such costs directly related to renewing or acquiring new insurance contracts. Under the new standard, we expense all costs incurred for unsuccessful marketing or underwriting efforts, along with indirect costs, as incurred. We adopted this guidance on January 1, 2012 through retrospective adjustment of the capitalized deferred policy acquisition costs, deferred income taxes and consolidated shareholders' equity in our prior years consolidated financial statements. We also reclassified expenses in our prior years' consolidated income statements to reflect the new definition of policy acquisition costs. Application of the new guidance did not impact our reported consolidated net earnings or cash flows in prior years. The following line items in our consolidated financial statements were affected by this change in accounting guidance:

	\$XXXXXXXX	\$XXXXXXXX	\$XXXXXXXX

Goodwill Impairment

A new accounting standard simplifies how entities test goodwill for impairment. The new standard permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, as a basis for determining whether it is necessary to perform a two-step goodwill impairment test. Previous guidance required an entity to test goodwill for impairment, at least on an annual basis, by first comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value of a reporting unit was less than its carrying amount, then the second step of the test must be performed to measure the amount of the impairment loss, if any. Under the new rules, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that the reporting unit's fair value is less than its carrying amount. The new rules were effective for us on January 1, 2012. We do not expect application of the new guidance to have a material impact on our consolidated financial position, results of operations or cash flows.

(2) Investments

On March 31, 2012, we reclassified our entire portfolio of fixed income securities classified as held to maturity, which consisted of corporate fixed income, U.S. government and foreign government securities, to fixed income securities classified as available for sale. Financial markets recently have been disrupted by several events, including the European debt crisis and the August 2011 downgrade of U.S. government debt by Standard & Poor's Corporation. Due to these market disruptions and our desire to maintain greater flexibility in managing our entire investment portfolio in an uncertain economy, we changed our prior intent to hold these securities to maturity. On the date of transfer, these securities had a fair value of \$139.1 million and an amortized cost of \$136.0 million. The securities' net unrealized appreciation, net of tax, increased our accumulated other comprehensive income and shareholders' equity by \$2.0 million as of March 31, 2012.

The cost or amortized cost, gross unrealized gain or loss, and fair value of our fixed income securities were as follows:

A security has an impairment loss when its fair value is less than its cost or amortized cost at the balance sheet date. We evaluate our securities for possible other-than-temporary impairment losses at each quarter end. Our reviews cover all impaired securities where the loss exceeds \$0.5 million and the loss either exceeds 10% of cost or the security had been in a loss position for longer than twelve consecutive months. We recognized no other-than-temporary impairment losses in the first quarter of 2012 and \$3.1 million, all of which were recognized in earnings, in the first quarter of 2011.

We have recognized credit losses on certain impaired fixed income securities, for which each security also had an impairment loss recorded in other comprehensive income. The rollforward of these credit losses was as follows:

	Three months ended March 31,	
	2012	2011
Balance at beginning of year	\$ 5,047	\$ 4,273
Credit losses recognized in earnings	-	-
Securities previously impaired	-	1,247
Securities not previously impaired	-	1,838
Securities sold	-	(673)
Balance at March 31	\$ 5,047	\$ 6,685

We had \$0.6 million after-tax other-than-temporary impairment losses, related to mortgage-backed securities, included in accumulated other comprehensive income within shareholders' equity at March 31, 2012. This amount includes the after-tax unrealized gains and losses on these impaired securities resulting from changes in their fair value subsequent to their initial other-than-temporary impairment measurement dates.

We do not consider the \$4.5 million of gross unrealized losses on fixed income securities in our portfolio at March 31, 2012 to be other-than-temporary impairments because: 1) as of March 31, 2012, we have received substantially all contractual interest and principal payments on these securities, 2) we do not intend to sell these securities, 3) it is more likely than not that we will not be required to sell the securities before recovery of their amortized cost bases and 4) the unrealized loss relates to non-credit factors, such as interest rate changes and market conditions.

The amortized cost and fair value of our fixed income securities at March 31, 2012, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The weighted-average life of our mortgage-backed and asset-backed securities was 4.4 years at March 31, 2012.

(3) Fair Value Measurements

Our financial instruments include assets and liabilities carried at fair value, as well as assets and liabilities carried at cost or amortized cost but disclosed at fair value in our financial statements. In determining fair value, we generally apply the market approach, which uses prices and other relevant data based on market transactions involving identical or comparable assets and liabilities. We classify our financial instruments into the following three-level hierarchy:

Level 1 Inputs are based on quoted prices in active markets for identical instruments.

Level 2 Inputs are based on observable market data (other than quoted prices), or are derived from or corroborated by observable market data.

Level 3 Inputs are unobservable and not corroborated by market data.

Our Level 1 investments consist of U.S. Treasuries, money market funds, and equity securities traded in an active exchange market. We use unadjusted quoted prices for identical instruments to measure fair value.

Our Level 2 investments include most of our fixed income securities, which consist of U.S. government agency securities, municipal bonds, corporate debt securities, bank loans, and mortgage-backed and asset-backed securities. Level 2 also includes certificates of deposit and other interest-bearing deposits at banks, which we report as short-term investments. We measure fair value for the majority of our Level 2 investments using quoted prices of securities with similar characteristics. The remaining investments are valued using pricing models or matrix pricing. The fair value measurements consider observable assumptions, including benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, default rates, loss severity and other economic measures.

We use independent pricing services to assist us in determining fair value for approximately 99% of our Level 2 investments. The pricing services provide a single price or quote per security. We use data provided by our third party investment managers to value the remaining Level 2 investments. To validate that these quoted and modeled prices are reasonable estimates of fair value, we perform various quantitative and qualitative procedures, including: 1) evaluation of the underlying methodologies, 2) analysis of recent sales activity, 3) analytical review of our fair values against current market prices and 4) comparison of the pricing services' fair value to other pricing services' fair value for the same investment. No markets for our investments were judged to be inactive at period end. Based on these procedures, we did not adjust the prices or quotes provided by our independent pricing services or third party investment managers as of March 31, 2012 or December 31, 2011.

Our Level 2 financial instruments also include our notes payable. We determine the fair value of our 6.30% Senior Notes based on quoted prices, but the market is inactive. The fair value of borrowings under our Revolving Loan Facility approximates the carrying amount because interest is based on 30-day LIBOR plus a margin.

Our Level 3 securities include certain fixed income securities and an insurance contract that we account for as a derivative and classify in other assets. We determine fair value of our Level 3 securities based on internally developed models that use assumptions or other data that are not readily observable from objective sources.

We transferred an investment from Level 3 to Level 2 in the first quarter of 2012 because we were able to determine its fair value using inputs based on observable market data in the period transferred. There were no transfers between Level 1, Level 2 or Level 3 in the first quarter of 2011.

(4) Reinsurance

In the normal course of business, our insurance companies cede a portion of their premium to domestic and foreign reinsurers through treaty and facultative reinsurance agreements. Although reinsurance does not discharge the direct insurer from liability to its policyholder, our insurance companies participate in such agreements in order to limit their loss exposure, protect them against catastrophic losses and diversify their business. The following tables present the effect of such reinsurance transactions on our premium, loss and loss adjustment expense and policy acquisition costs.

We have a \$90.0 million Standby Letter of Credit Facility that is used to guarantee our performance in our Lloyd's of London Syndicate 4141. There have been no changes to the terms and conditions related to our Senior Notes, the \$600.0 million Revolving Loan Facility (the Facility) and the Standby Letter of Credit Facility from those described in Note 7, Notes Payable to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2011.

The weighted-average interest rate on borrowings under the Facility at March 31, 2012 was 1.62%. The borrowings and letters of credit issued under the Facility reduced our available borrowing capacity on the Facility to \$325.0 million at March 31, 2012.

We were in compliance with debt covenants related to our Senior Notes, the Facility and the Standby Letter of Credit Facility at March 31, 2012.

In 2012, we granted the following shares of restricted stock awards, restricted stock units and stock options for the purchase of shares of our common stock. For all grants except stock options, we measure fair value based on the closing stock price of our common stock on the grant date. For stock options, we use the Black-Scholes single option pricing model to determine the fair value of an option on its grant date. The fair value of the restricted stock awards, restricted stock units and stock options will be expensed over the vesting period.

	Number of shares	Weighted-average grant date fair value	Aggregate fair value	Vesting period

(8) Segments

We report HCC's results in six operating segments. Our insurance underwriting segments consist of the following:

U.S. Property & Casualty

Professional Liability

Accident & Health

U.S. Surety & Credit

International

The Investing segment includes our consolidated investment portfolio, as well as all investment income, investment related expenses, realized investment gains and losses, and other-than-temporary impairment credit losses on investments. All investment activity is reported as revenue, consistent with our consolidated presentation.

In addition to our segments, we include a Corporate & Other category to reconcile segment results to consolidated totals. The Corporate & Other category includes corporate operating expenses not allocable to the segments, interest expense on long-term debt, foreign currency expense (benefit), and underwriting results of our Exited Lines. Our Exited Lines include product lines that we no longer write and do not expect to write in the future.

(9) Commitments and Contingencies

Catastrophe and Large Loss Exposure

We have exposure to catastrophic losses caused by natural perils (such as hurricanes, earthquakes, floods, tsunamis and tornados), as well as from man-made events (such as terrorist attacks). The incidence, timing and severity of catastrophe losses are unpredictable. We assess our exposures in areas most vulnerable to natural catastrophes and apply procedures to ascertain our probable maximum loss from a single event. We maintain reinsurance protection that we believe is sufficient to limit our exposure to a foreseeable event. In the first quarter of 2012, we recognized \$7.6 million of net losses from catastrophic events. In the first quarter of 2011, we recognized gross losses of \$105.2 million from catastrophic events in Japan, New Zealand and Australia. After reinsurance and reinstatement premium, our pretax loss was \$51.5 million.

Litigation

We are a party to lawsuits, arbitrations and other proceedings that arise in the normal course of our business. Many of such lawsuits, arbitrations and other proceedings involve claims under policies that we underwrite as an insurer or reinsurer, the liabilities for which, we believe, have been adequately included in our loss reserves. Also, from time to time, we are a party to lawsuits, arbitrations and other proceedings that relate to disputes with third parties, or that involve alleged errors and omissions on the part of our subsidiaries. We have provided accruals for these items to the extent we deem the losses probable and reasonably estimable. Although the ultimate outcome of these matters cannot be determined at this time, based on present information, the availability of insurance coverage and advice received from our outside legal counsel, we believe the resolution of any such matters will not, individually or in the aggregate, have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Indemnifications

In conjunction with the sales of business assets and subsidiaries, we have provided indemnifications to the buyers. Certain indemnifications cover typical representations and warranties related to our responsibilities to perform under the sales contracts. Under other indemnifications, we agree to reimburse the purchasers for taxes or ERISA-related amounts, if any, assessed after the sale date but related to pre-sale activities. We cannot quantify the maximum potential exposure covered by all of our indemnifications because the indemnifications cover a variety of matters, operations and scenarios. Certain of these indemnifications have no time limit. For those with a time limit, the longest such indemnification expires in 2025. We accrue a loss when a valid claim is made by a purchaser and we believe we have potential exposure. At March 31, 2012, we have an accrued liability of \$11.6 million, as well as \$6.3 million in escrow and \$3.2 million of letters of credit, to cover our obligations or anticipated payments under these indemnifications.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis should be read in conjunction with the Consolidated Financial Statements and the related Notes as of December 31, 2011 and March 31, 2012.

Overview

We are a specialty insurance group with offices in the United States, the United Kingdom, Spain and Ireland, transacting business in approximately 180 countries. Our shares trade on the New York Stock Exchange and closed at \$31.87 on April 27, 2012, resulting in market capitalization of \$3.2 billion.

We underwrite a variety of relatively non-correlated specialty insurance products, including property and casualty, accident and health, surety and credit product lines. We market our insurance products through a network of independent agents and brokers, managing general agents and directly to consumers. In addition, we assume insurance written by other insurance companies. We manage our businesses through five insurance underwriting segments and our Investing segment. Our insurance underwriting segments are U.S. Property & Casualty, Professional Liability, Accident & Health, U.S. Surety & Credit and International.

Our business philosophy is to maximize underwriting profit while managing risk. We concentrate our insurance writings in selected specialty lines of business in which we believe we can achieve meaningful underwriting profit. We also rely on our experienced underwriting personnel and our access to and expertise in the reinsurance marketplace to limit or reduce risk. Our business plan is shaped by our underlying business philosophy. As a result, our primary objective is to maximize net earnings and grow book value per share, rather than to grow gross written premium or our market share.

Our major domestic and international insurance companies have financial strength ratings of AA (Very Strong) from Standard & Poor's Corporation, A+ (Superior) from A.M. Best Company, Inc., AA (Very Strong) from Fitch Ratings and A1 (Good Security) from Moody's Investors Service, Inc.

Key facts about our consolidated group as of and for the quarter ended March 31, 2012 were as follows:

We had consolidated shareholders' equity of \$3.3 billion, with a book value per share of \$32.23.

We generated net earnings of \$82.6 million, or \$0.79 per diluted share.

We produced total revenue of \$609.5 million, of which 90% related to net earned premium and 9% related to net investment income.

We recognized \$7.6 million of net catastrophe losses—\$4.0 million in our U.S. Property & Casualty segment from storms in the United States and \$3.6 million in our International segment from other small catastrophes.

Our net loss ratio was 60.1% and our combined ratio was 85.2%.

Our debt to capital ratio was 14.6%.

We purchased \$66.9 million, or 2.2 million shares, of our common stock at an average cost of \$30.64 per share.

We declared dividends of \$0.155 per share and paid \$16.1 million of dividends.

Comparisons in the following sections refer to the first quarter of 2012 compared to the same period of 2011, unless otherwise noted. Certain 2011 amounts have been adjusted to reflect our adoption of a new accounting standard as of January 1, 2012. See Note 1, General Information Accounting Guidance Adopted in 2012 to the Consolidated Financial Statements for a description of this guidance and the impact of our retrospective adoption on prior year results. Amounts in tables are in thousands, except for earnings per share, percentages, ratios and number of employees.

Results of Operations

Our results and key metrics for the first quarter of 2012 and 2011 were as follows:

	Three months ended March 31,	
	2012	2011
Net earnings	\$ 82,584	\$ 46,990
Earnings per diluted share	\$ 0.79	\$ 0.41
Net loss ratio	60.1 %	68.4 %
Expense ratio	25.1	26.3
Combined ratio	85.2 %	94.7 %

In the first quarter of 2012, we recognized \$7.6 million of net losses resulting from United States storms, primarily in our public risk line of business within our U.S. Property and Casualty segment and from other small catastrophes in our Property Treaty line of business within our International segment. The 2012 catastrophe losses increased both our net loss ratio and combined ratio by 1.3 percentage points, and decreased net earnings by \$0.05 per diluted share. In the first quarter of 2011, we recognized gross losses of \$105.2 million from catastrophic events in Japan, New Zealand and Australia. After reinsurance and reinstatement premium, our pretax loss was \$51.5 million. The 2011 catastrophe losses increased our net loss ratio by 9.6 percentage points and our combined ratio by 9.9 percentage points, and decreased net earnings by \$0.29 per diluted share.

Revenue

Total revenue increased \$45.8 million in the first quarter of 2012, compared to the same period in 2011, primarily due to additional net earned premium and higher net investment income.

Gross written premium, net written premium and net earned premium are detailed below by segment.

	Three months ended March 31,	
	2012	2011
U.S. Property & Casualty	\$ 153,147	\$ 129,550

International	91,284	77,447
Exited Lines	5	125
Total net earned premium	\$ 547,141	\$ 508,480

Growth in premium occurred in the U.S. Property & Casualty segment from our new business lines added in 2011 and increased title reinsurance premium; the Accident & Health segment from higher writings of our medical stop-loss product; and the International segment from pricing increases in our energy line of business. Related to the 2011 catastrophe losses, we recorded \$7.1 million of reinstatement premium for continued reinsurance coverage, which reduced the International segment's 2011 net written and net earned premium. See the Segment Operations section below for further discussion of the relationship and changes in premium revenue within each segment.

Net investment income, which is included in our Investing segment, increased 10% year-over-year primarily due to higher income from fixed income securities, generated from an increased amount of investments. Our fixed income securities portfolio increased 9% from \$5.5 billion at March 31, 2011 to \$6.0 billion at March 31, 2012. The growth in fixed income securities resulted primarily from cash flow from operations and a \$235.8 million increase in net unrealized gain on the portfolio.

The following table details the components of our other operating income. The fee and commission income relates to third party agency and broker commissions.

Loss development represents an increase or decrease in estimates of ultimate losses related to prior accident years. Deficiencies and redundancies in ultimate loss estimates occur as we review our loss exposure with our actuaries, increasing or reducing estimates of our ultimate losses as a result of such reviews and as losses are finally settled or claims exposures change. The excess of total recorded net reserves over the actuarial point estimate approximated 4.8% of our recorded net reserves at March 31, 2012, compared to 4.2% at December 31, 2011. We recognized no development in the first quarter of 2012, compared to adverse development of \$9.0 million in the first quarter of 2011, primarily in our Professional Liability segment. Our consolidated accident year net loss ratio was lower in the first quarter of 2012, compared to the same period in 2011, primarily due to higher catastrophe losses in 2011. See the Segment Operations section below for additional discussion of the changes in our net loss and loss adjustment expense and net loss ratios for each segment.

The table below provides a reconciliation of our consolidated reserves for loss and loss adjustment expense payable, net of reinsurance ceded, the amount of our paid claims, and our net paid loss ratio.

	Three months ended March 31, 2012	2011
Net reserves for loss and loss adjustment expense payable at beginning of period	\$ 2,683,483	\$ 2,537,772
Net reserve additions from acquired businesses	14,705	645
Foreign currency adjustment	17,123	22,216
Net loss and loss adjustment expense	328,928	347,586
Net loss and loss adjustment expense payments	(344,522)	(297,123)
Net reserves for loss and loss adjustment expense payable at end of period	\$ 2,699,717	\$ 2,611,096
Net paid loss ratio	63.0 %	58.4 %

The net paid loss ratio was higher in 2012 primarily due to our payment of \$27.5 million to commute a large contract in our Exited Lines. The commutation had no material effect on net earnings but increased our net paid loss ratio by 5.1 percentage points. The amount of claims paid fluctuates period to period due to our mix of business and the timing of claims settlement and catastrophic events.

Policy Acquisition Costs

Our policy acquisition cost percentage was 12.7% and 13.7% in the first quarter of 2012 and 2011, respectively. The lower percentage primarily relates to a change in the mix of business in 2012, where we wrote more premium in lines that have lower commission rates than in our other lines of business. The 2011 policy acquisition cost percentage was increased 0.2 percentage points due to \$7.1 million of reinstatement premium (recorded as a reduction of net earned premium).

Other Operating Expense

For the first quarter of 2012, 59% of our other operating expense related to compensation and benefits for our 1,864 employees. Other operating expense increased 12% in 2012, primarily due to higher compensation and benefits costs and technology-related expenses, as well as a change in foreign currency expense. We recognized foreign currency expense of \$2.8 million in the first quarter of 2012, compared to a benefit of \$1.2 million in the first quarter of 2011, directly related to the strengthening of the British pound sterling in 2012. Other operating expense included stock-based compensation expense of \$2.4 million in 2012 and \$3.1 million in 2011. At March 31, 2012, there was approximately \$28.1 million of total unrecognized compensation expense related to unvested options and restricted stock awards and units that is expected to be recognized over a weighted-average period of 3.0 years.

Interest Expense

Interest expense on debt and short-term borrowings was \$6.9 million and \$5.6 million in the first quarter of 2012 and 2011, respectively. Our interest expense increased in 2012 due to a higher amount of outstanding borrowings on our \$600.0 million Revolving Loan Facility. Our 2012 and 2011 interest expense included \$4.8 million for our Senior Notes.

Income Tax Expense

Our effective income tax rate was 29.4% for the first quarter of 2012, compared to 25.3% for the first quarter of 2011. The higher effective rate in 2012 is due to the relationship of pretax income and tax-exempt investment income in the two quarters. Our pretax income was substantially lower in 2011 due to \$51.5 million of net catastrophe losses, whereas our tax-exempt investment income was essentially flat during the quarters.

Segment Operations

Each of our insurance segments bears risk for insurance coverage written within its portfolio of insurance products. Each segment generates income from premium written by our underwriting agencies, through third party agents and brokers, or on a direct basis. The insurance segments also write facultative or individual account reinsurance, as well as treaty reinsurance business. In some cases, we purchase reinsurance to limit the segments' net losses from both individual policy losses and multiple policy losses from catastrophic risks. Our segments maintain disciplined expense management and a streamlined management structure, which results in favorable expense ratios. The following provides operational information about our five insurance underwriting segments and our Investing segment.

Our U.S. Property & Casualty segment pretax earnings increased 34% year-over-year due to higher net earned premium from a change in the mix of products in this segment and a lower net loss ratio. In the first quarter of 2012, our three new underwriting teams for technical property, primary casualty and excess casualty products wrote \$5.2 million of net premium. In addition, an increase in title reinsurance premium more than offset lower writings in our E&O line of business.

Segment earnings were impacted by \$4.0 million of net catastrophe losses in the first quarter of 2012, primarily in our public risk line of business. The 2011 segment earnings and net loss ratio reflect the impact of \$2.0 million of net catastrophe losses related to our event cancellation product line (included in Other), as well as \$1.5 million in adverse loss development.

Professional Liability Segment

Our Professional Liability segment pretax earnings decreased and the net loss ratio increased in the first quarter of 2012, compared to the same period of 2011, primarily due to the results of our diversified financial products (DFP) line of business in U.S. D&O. We increased the 2011 ultimate loss ratio for DFP in the third quarter of 2011 and continued to use that same ultimate loss ratio in 2012. The segment recorded adverse

loss development of \$6.2 million in the first quarter of 2011 related to the DFP business.

The Accident & Health segment pretax earnings increased 7% in the first quarter of 2012, compared to the same period of 2011. This increase is directly related to higher net earned premium in our medical stop-loss product line due to writing new business and rate increases, which were in line with medical loss cost trends, on renewal business.

U.S. Surety & Credit Segment

The following tables summarize the operations of the U.S. Surety & Credit segment.

Our U.S. Surety & Credit segment pretax earnings increased 6% year-over-year. Net earned premium in our surety line of business decreased in 2012 due to lower production of commercial bonds and new quota share reinsurance on certain products. In the first quarter of 2012, we had a

Edgar Filing: HCC INSURANCE HOLDINGS INC/DE/ - Form 10-Q

large loss in our credit line of business, which, because of its size, had significant reinsurance recoveries. Our losses net of these reinsurance recoveries were limited, resulting in a lower loss ratio than in the first quarter of 2011. The benefit related to the lower loss ratio was offset by a reduction of net written premium and net earned premium due to \$4.3 million of reinstatement premium related to this large loss.

Our International segment pretax earnings were impacted by net catastrophe losses of \$3.6 million in the first quarter of 2012 and \$49.5 million in the first quarter of 2011. The 2012 losses related to small catastrophes in our property treaty business. In 2011, we recognized gross losses of \$85.2 million for catastrophes in Japan, New Zealand and Australia. After reinsurance, our 2011 net losses were \$42.4 million and we incurred \$7.1 million of reinstatement premium for continued reinsurance coverage. The 2011 catastrophic events impacted our energy and property treaty product lines, as well as our property (direct and facultative) and accident and health product lines (both included in Other). These catastrophe losses increased the International segment's net loss ratio by 3.5 percentage points in 2012 and 58.2 percentage points in 2011.

The segment's increase in net earned premium in 2012 primarily related to reinstatement premium in 2011 (recorded as a reduction of net earned premium) related to catastrophe losses in our energy and property treaty businesses. The energy, property treaty and Other net loss ratios reflect the catastrophe losses in the first quarter of 2011. The effect of the reinstatement premium in 2011 increased the segment's 2011 expense ratio by 3.4 percentage points.

Investing Segment

We invest the majority of our funds in highly-rated fixed income securities, which are designated as available for sale securities. We held \$6.0 billion of fixed income securities at March 31, 2012. Substantially all of our fixed income securities were investment grade and 78% were rated AAA or AA. At March 31, 2012, the portfolio's average long-term tax equivalent yield was 5.0%, the weighted-average life was 7.7 years, and the weighted-average duration was 4.8 years.

On March 31, 2012, we reclassified our entire portfolio of fixed income securities classified as held to maturity, which consisted of corporate fixed income, U.S. government and foreign government securities, to fixed income securities classified as available for sale. Financial markets have been disrupted recently by several events, including the European debt crisis and the August 2011 downgrade of U.S. government debt by Standard & Poor's Corporation. Due to these market disruptions and our desire to maintain greater flexibility in managing our entire investment portfolio in an uncertain economy, we changed our prior intent to hold these securities to maturity. On the date of transfer, these securities had a fair value of \$139.1 million and an amortized cost of \$136.0 million. The transferred securities' net unrealized appreciation, net of tax, increased our accumulated other comprehensive income and shareholders' equity by \$2.0 million as of March 31, 2012.

Edgar Filing: HCC INSURANCE HOLDINGS INC/DE/ - Form 10-Q

This table summarizes our investments by type, substantially all of which were reported at fair value, at March 31, 2012 and December 31, 2011.

Other investments	38,571	1	35,897	1
Total investments	\$ 6,252,485	100 %	\$ 6,049,750	100 %

Our total investments increased \$202.7 million in 2012, principally from: 1) operating cash flow, 2) consolidation of our Lloyd's of London Syndicate 4040 upon its merger into Syndicate 4141 as of January 1, 2012 and 3) an \$18.8 million increase in the pretax net unrealized gain associated with our available for sale fixed income securities during the first quarter of 2012. During 2011, we substantially reduced our short-term investments and re-invested the funds in long-term fixed income securities in order to maximize our investment return.

The ratings of our individual securities within our available for sale portfolio at March 31, 2012 were as follows:

	\$849,503000	\$849,503000
	Amount	%
AAA	\$ 849,503	14 %
AA	3,847,230	64
A	1,043,436	18
BBB	204,530	3
BB and below	48,128	1
Total fixed income securities	\$ 5,992,827	100 %

At March 31, 2012, we held \$1.9 billion of special purpose revenue bonds, as well as \$1.1 billion of general obligation bonds, which are issued by states, municipalities and political subdivisions and collectively referred to, in the investment market, as municipal bonds. The overall rating of our municipal bonds was AA at March 31, 2012. Within our municipal bond portfolio, we held \$276.7 million of pre-refunded bonds, which are supported by U.S. government debt obligations. Our special purpose revenue bonds are secured by revenue sources specific to each security. At March 31, 2012, the percentages of our special purpose revenue bond portfolio supported by these major revenue sources were as follows: 1) water and sewer 24%, 2) education 21%, 3) transportation 19%, 4) leasing 8% and 5) electric 7%.

Many of our special purpose revenue bonds are insured by mono-line insurance companies or supported by credit enhancement programs of various states and municipalities. We view bond insurance as credit enhancement and not credit substitution. We base our investment decision on the strength of the issuer. A credit review is performed on each issuer and on the sustainability of the revenue source before we acquire a special purpose revenue bond and periodically, on an ongoing basis, thereafter. The underlying average credit rating of our special purpose revenue bond issuers, excluding any bond insurance, was AA at March 31, 2012. Although recent economic conditions in the United States may reduce the source of revenue to support certain of these securities, the majority are supported by revenue from essential sources, as indicated above, which we believe generate a stable source of revenue.

At March 31, 2012, we held corporate fixed income securities issued by foreign corporations with an aggregate fair value of \$434.1 million. In addition, we held securities issued by foreign governments, agencies or supranational entities with an aggregate fair value of \$287.4 million. At March 31, 2012, our holdings of foreign debt were relatively unchanged from our holdings of foreign debt at December 31, 2011.

At March 31, 2012, we held a commercial mortgage-backed securities portfolio with a fair value of \$278.7 million, an average rating of AA+ and an average loan-to-value ratio of 69%. We owned no collateralized debt obligations (CDOs) or collateralized loan obligations (CLOs), and we are not counterparty to any credit default swap transactions.

The methodologies used to determine the fair value of our investments are described in Note 3, Fair Value Measurements to the Consolidated Financial Statements. The accounting policies and procedures that we use to determine our other-than-temporary impairment losses are described in Note 2, Investments to the Consolidated Financial Statements and Critical Accounting Policies Other-than-temporary Impairments in Investments in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2011.

Corporate & Other

The following table summarizes activity in the Corporate & Other category.

	Three months ended March 31,	
	2012	2011
Net earned premium	\$ 5	\$ 125
Other revenue	(42)	(29)
Total revenue	(37)	96
Loss and loss adjustment expense, net	(1)	(230)
Other expense - Exited Lines	645	1,067
Other expense - Corporate	14,579	12,124
Interest expense	6,802	5,429
Foreign currency expense (benefit)	2,765	(1,225)
Total expense	24,790	17,165
Pretax loss	\$ (24,827)	\$ (17,069)

Our Corporate expenses not allocable to the segments increased \$2.5 million in 2012, primarily due to higher employee compensation and benefit costs and information technology expense related to our new technology systems. Our interest expense increased due to a higher amount of outstanding borrowings on our \$600.0 million Revolving Loan Facility in 2012.

Foreign currency expense increased quarter-over-quarter due to our increased level of available for sale securities denominated in foreign currencies and strengthening of the British pound sterling relative to the U.S. dollar in 2012. We hold available for sale securities denominated in foreign currencies to economically hedge the currency exchange risk on our foreign-denominated loss reserves. The foreign currency gain or loss related to loss reserves is recorded through the income statement, while the foreign currency gain or loss related to available for sale securities is recorded through other comprehensive income within shareholders' equity. This mismatch may cause fluctuations in our reported foreign currency benefit or expense in future periods.

Liquidity and Capital Resources

Credit market disruptions in recent years have resulted in a tightening of available sources of credit and significant liquidity concerns for many companies. We believe we have sufficient sources of liquidity at a reasonable cost at the present time, based on the following:

We held \$312.0 million of cash and liquid short-term investments at March 31, 2012.

Our available for sale bond portfolio (including our previous held to maturity bonds) had a fair value of \$6.0 billion at March 31, 2012, of which \$226.4 million of bonds were held directly by the parent company. We generally intend to hold these securities until their maturity, but we would be able to sell securities to generate cash if the need arises.

We have a four-year \$600.0 million Revolving Loan Facility that expires on March 8, 2015. We had \$325.0 million of borrowing capacity available at March 31, 2012.

Our long-term debt consists of \$300.0 million principal amount of unsecured 6.30% Senior Notes due November 15, 2019. Our debt to total capital ratio was 14.6% at March 31, 2012 and 12.8% at December 31, 2011, with the increase related to our borrowings under the Revolving Loan Facility.

We have a \$90.0 million Standby Letter of Credit Facility that expires on December 31, 2015, which is used to guarantee our performance in our Lloyd's of London syndicate.

Our domestic insurance subsidiaries have the ability to pay \$255.1 million in dividends in 2012 to the parent company without obtaining special permission from state regulatory authorities. HCC can utilize these dividends for any purpose, including to pay down debt, pay dividends to shareholders, fund acquisitions, purchase our common stock and pay operating expenses.

We have a new Universal Shelf registration statement, which was filed and became effective in March 2012 and expires in March 2015. The current shelf registration statement provides for the issuance of an aggregate of \$1.0 billion of securities. These securities may be debt securities, equity securities, or a combination thereof. The shelf registration statement provides us the means to access the debt and equity markets relatively quickly, if we are satisfied with the current pricing in the financial market.

Capital Management

Notes Payable

There have been no changes to the terms and conditions related to our Senior Notes, the \$600.0 million Revolving Loan Facility (the Facility) and the Standby Letter of Credit Facility from those described in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources in our Annual Report on Form 10-K for the year ended December 31, 2011.

As of March 31, 2012, we had borrowed \$265.0 million under the Facility, primarily to fund purchases of our common stock. The weighted-average interest rate on borrowings under the Facility at March 31, 2012 was 1.62%. The borrowings and letters of credit issued under the Facility reduced our available borrowing capacity on the Facility to \$325.0 million at March 31, 2012.

We were in compliance with debt covenants related to our Senior Notes, the Facility, and the Standby Letter of Credit Facility at March 31, 2012.

Share Repurchases

On September 23, 2011, the Board approved the purchase of up to \$300.0 million of our common stock (the Plan). Purchases under the Plan may be made in the open market or in privately negotiated transactions from time-to-time in compliance with applicable laws, rules and regulations, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended. Purchases under the Plan will be made opportunistically from time-to-time, subject to market and business conditions, the level of cash generated from our operations, cash required for acquisitions, our debt covenant compliance, and other relevant factors. The Plan does not obligate us to purchase any particular number of shares, has no expiration date, and may be suspended or discontinued at any time at the Board's discretion.

In the first quarter of 2012, we purchased \$66.9 million, or 2.2 million shares, at an average cost of \$30.64 per share. As of April 27, 2012, \$128.8 million of repurchase authority remains under the Plan.

Cash Flow

We receive substantial cash from premiums, reinsurance recoverables, surety collateral, outward commutations, proceeds from sales and redemptions of investments, and investment income. Our principal cash outflows are for the payment of claims and loss adjustment expenses, premium payments to reinsurers, return of surety collateral, inward commutations, purchases of investments, debt service, policy acquisition costs, operating expenses, taxes, dividends, and common stock purchases. Cash provided by operating activities can fluctuate due to timing differences in the collection of premium receivables, reinsurance recoverables and surety collateral; the payment of losses, premium payables, return of surety collateral; and the completion of commutations.

The components of our net operating cash flows are summarized in the following table.

	Three months ended March 31,	
	2012	2011
Net earnings	\$ 82,584	\$ 46,990
Change in premium, claims and other receivables, net of reinsurance, premium and claims payables and excluding restricted cash	33,891	(37,996)
Change in unearned premium, net	1,658	16,372
Change in loss and loss adjustment expense payable, net of reinsurance recoverables	16,098	60,970
Other, net	(59,261)	(4,278)
Cash provided by operating activities	\$ 74,970	\$ 82,058

In the first quarter of 2012, we generated operating cash flow of \$75.0 million, compared to \$82.1 million in the same period of 2011. Our 2012 operating cash was reduced by \$27.5 million that we paid to commute a large contract in our assumed accident and health reinsurance business reported in Exited Lines. Receipt and repayment of collateral funds related to surety bonds decreased the first quarter operating cash flow by \$22.7 million in 2012 and increased it by \$1.7 million in 2011. Our operating cash flow in 2012 benefitted from increased premium collections.

Accounting Guidance Adopted in 2012

See Note 1, General Information Accounting Guidance Adopted in 2012 to the Consolidated Financial Statements for a description of recently adopted accounting guidance related to deferred policy acquisition costs and its retrospective impact on our prior year consolidated financial statements.

Critical Accounting Policies

We provided information about our critical accounting policies in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies, in our Annual Report on Form 10-K for the year ended December 31, 2011. We have made no changes in the identification or methods of application of these policies.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K for the year ended December 31, 2011.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Act)) that are designed to ensure that required information is recorded, processed, summarized and reported within the required timeframe, as specified in rules set forth by the Securities and Exchange Commission. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed is accumulated and communicated to management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), to allow timely decisions regarding required disclosures.

Our management, with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2012. Based on this evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of March 31, 2012.

(b) Changes in Internal Control over Financial Reporting

During the first quarter of 2012, we identified no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings

We are a party to lawsuits, arbitrations and other proceedings that arise in the normal course of our business. Many of such lawsuits, arbitrations and other proceedings involve claims under policies that we underwrite as an insurer or reinsurer, the liabilities for which, we believe, have been adequately included in our loss reserves. Also, from time to time, we are a party to lawsuits, arbitrations and other proceedings that relate to disputes with third parties, or that involve alleged errors and omissions on the part of our subsidiaries. We have provided accruals for these items to the extent we deem the losses probable and reasonably estimable. Although the ultimate outcome of these matters cannot be determined at this time, based on present information, the availability of insurance coverage and advice received from our outside legal counsel, we believe the resolution of any such matters will not, individually or in the aggregate, have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes in the risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On September 23, 2011, the Board approved the purchase of up to \$300.0 million of our common stock (the Plan). Purchases under the Plan may be made in the open market or in privately negotiated transactions from time-to-time in compliance with applicable laws, rules and regulations, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended. Purchases under the Plan will be made opportunistically, subject to market and business conditions, the level of cash generated from our operations, cash required for acquisitions, our debt covenant compliance, and other relevant factors. The Plan does not obligate us to purchase any particular number of shares, has no expiration date, and may be suspended or discontinued at any time at the Board's discretion. During the first quarter of 2012, we purchased our common stock, as follows:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Approximate dollar value of shares that may yet be purchased under the plans or programs
January	152,265	\$27.81	152,265	\$222,171,566
February	318,374	\$30.43	318,374	\$212,483,856
March	1,714,484	\$30.93	1,714,484	\$159,457,013

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information
