Forward-Looking Information

The information included in this Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to Popular, Inc. (the Corporation, Popular, we, us, our) financial condition, results of operations, plans, objectives, future performance and business, including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes, capital markets conditions, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Corporation's financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words anticipate, believe, continues, expect, estimate, intend, project and similar expressions and future or conditional verbs such as will, would, should, could, may, or similar expressions are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict.

Various factors, some of which are beyond Popular's control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

the rate of growth in the economy and employment levels, as well as general business and economic conditions;

changes in interest rates, as well as the magnitude of such changes;

the fiscal and monetary policies of the federal government and its agencies;

changes in federal bank regulatory and supervisory policies, including required levels of capital and the impact of proposed capital standards on our capital ratios;

the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) on our businesses, business practices and cost of operations;

regulatory approvals that may be necessary to undertake certain actions or consummate strategic transactions such as acquisitions and dispositions;

the relative strength or weakness of the consumer and commercial credit sectors and of the real estate markets in Puerto Rico and the other markets in which borrowers are located;

the performance of the stock and bond markets;

competition in the financial services industry;

additional Federal Deposit Insurance Corporation (FDIC) assessments; and

Edgar Filing: POPULAR INC - Form 10-Q

possible legislative, tax or regulatory changes.

Other possible events or factors that could cause results or performance to differ materially from those expressed in these forward-looking statements include the following: negative economic conditions that adversely affect the general economy, housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of non-performing assets, charge-offs and provision expense; changes in interest rates and market liquidity which may reduce interest margins, impact funding sources and affect our ability to originate and distribute financial products in the primary and secondary markets; adverse movements and volatility in debt and equity capital markets; changes in market rates and prices which may adversely impact the value of financial assets and liabilities; liabilities resulting from litigation and regulatory investigations; changes in accounting standards, rules and interpretations; increased competition; our ability to grow our core businesses; decisions to downsize, sell or close units or otherwise change our business mix; and management's ability to identify and manage these and other risks. Moreover, the outcome of legal proceedings, as discussed in Part II, Item I. Legal Proceedings, is inherently uncertain and depends on judicial interpretations of law and the findings of regulators, judges and juries. Investors should refer to the Corporation's Annual Report on Form 10-K for the year ended December 31, 2012 as well as Part II, Item 1A of this Form 10-Q for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

All forward-looking statements included in this document are based upon information available to the Corporation as of the date of this document, and other than as required by law, including the requirements of applicable securities laws, we assume no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

Note 1 Organization, consolidation and basis of presentation

Nature of Operations

Popular, Inc. (the Corporation) is a diversified, publicly-owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation has operations in Puerto Rico, the United States, the Caribbean and Latin America. In Puerto Rico, the Corporation provides mortgage, retail and commercial banking services through its principal banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as investment banking, broker-dealer, auto and equipment leasing and financing, and insurance services through specialized subsidiaries. In the U.S. mainland, the Corporation operates Banco Popular North America (BPNA), including its wholly-owned subsidiary E-LOAN. BPNA focuses efforts and resources on the core community banking business. BPNA operates branches in New York, California, Illinois, New Jersey and Florida. E-LOAN markets deposit accounts under its name for the benefit of BPNA. The BPNA branches operate under the name of Popular Community Bank. Note 33 to the consolidated financial statements presents information about the Corporation's business segments.

Effective December 31, 2012, Popular Mortgage, which was a wholly-owned subsidiary of BPPR prior to that date, was merged with and into BPPR as part of an internal reorganization. Popular Mortgage currently operates as a division of BPPR.

Principles of Consolidation and Basis of Presentation

The consolidated interim financial statements have been prepared without audit. The consolidated statement of financial condition data at December 31, 2012 was derived from audited financial statements. The unaudited interim financial statements are, in the opinion of management, a fair statement of the results for the periods reported and include all necessary adjustments, all of a normal recurring nature, for a fair statement of such results.

Certain reclassifications have been made to the 2012 consolidated financial statements and notes to the financial statements to conform with the 2013 presentation. During the second quarter of 2013, the Corporation discontinued the elimination of its proportionate ownership share of intercompany transactions with EVERTEC from their respective revenue and expense categories to reflect them as an equity pick-up adjustment in other operating income. Refer to Note 23 Related party transactions with affiliated company / joint venture for additional information.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted from the unaudited financial statements pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, these financial statements should be read in conjunction with the audited consolidated financial statements of the Corporation for the year ended December 31, 2012, included in the Corporation's 2012 Annual Report (the 2012 Annual Report). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2 New accounting pronouncements

FASB Accounting Standards Update 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11)

The FASB issued ASU 2013-11 in July 2013 which requires that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. When a net operating loss, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purposes, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. Currently, there is no explicit guidance under U.S. GAAP on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendment of this guidance does not require new recurring disclosures.

ASU 2013-11 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The amendments of this ASU should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2013-10, Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes (ASU 2013-10)

The FASB issued ASU 2013-10 in July 2013 which permits the use of the Overnight Index Swap Rate (OIS), also referred to as the Fed Funds Effective Swap Rate as a U.S. GAAP benchmark interest rate for hedge accounting purposes under Topic 815. Currently, only the interest rates on direct Treasury obligations of the U.S. government (UST) and the London Interbank Offered Rate (LIBOR) swap rate are considered benchmark interest rates in the United States. This update also removes the restriction on using different benchmark rates for similar hedges. Including the Fed Funds Effective Swap Rate as an acceptable U.S. benchmark interest rate in addition to UST and LIBOR will provide risk managers with a more comprehensive spectrum of interest rate resets to utilize as the designated interest risk component under the hedge accounting guidance in Topic 815.

The amendments of this ASU are effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2013-05, Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment Upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity (ASU 2013-05)

The FASB issued ASU 2013-05 in March 2013 which clarifies the applicable guidance for the release of the cumulative translation adjustment. When a reporting entity ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in ASC 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets has resided.

For an equity method investment that is a foreign entity, the partial sale guidance in ASC 830-30-40 still applies. As such, a pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of such equity method investment. However, this treatment does not apply to an equity method investment that is not a foreign entity. In those instances, the cumulative translation adjustment is released into net income only if the partial sale represents a complete or substantially complete liquidation of the foreign entity that contains the equity method investment.

Edgar Filing: POPULAR INC - Form 10-Q

Additionally, the amendments in this ASU clarify that the sale of an investment in a foreign entity includes both: (1) events that result in the loss of a controlling financial interest in a foreign entity and (2) events that result in an acquirer obtaining control of an acquiree in which it held an equity interest immediately before the acquisition date. Accordingly, the cumulative translation adjustment should be released into net income upon the occurrence of those events.

Table of Contents

ASU 2013-05 is effective for fiscal years and interim periods within those years, beginning on or after December 15, 2013. The amendments should be applied prospectively to derecognition events occurring after the effective date. Prior periods should not be adjusted. Early adoption is permitted. If an entity elects to early adopt the amendments of this ASU it should apply them as of the beginning of the entity's fiscal year of adoption.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU 2013-02)

The FASB issued ASU 2013-02 in February 2013. ASU 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. The amendments of ASU 2013-02 do not change the current requirements for reporting net income or other comprehensive income in financial statements.

ASU 2013-02 is effective for fiscal years and interim periods within those years, beginning on or after December 15, 2012.

The Corporation adopted the provisions of this guidance in the first quarter of 2013 and elected to present these disclosures on the notes to the financial statements. Refer to note 19 to the consolidated financial statements for the related disclosures. The adoption of this ASU does not have an impact on the Corporation's consolidated financial statements.

FASB Accounting Standards Update 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities (ASU 2013-01)

The FASB issued ASU 2013-01 in January 2013. ASU 2013-01 clarifies that the scope of FASB Accounting Standard Update 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities (ASU 2011-11), applies only to derivatives accounted for under ASC 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with ASC 210-20-45 or ASC 815-10-45 or subject to an enforceable master netting arrangement or similar agreement.

ASU 2013-01 is effective for fiscal years and interim periods within those years, beginning on or after January 1, 2013. Entities should provide the required disclosures retrospectively for all comparative periods presented. The effective date is the same as the effective date of ASU 2011-11.

The Corporation adopted this guidance on the first quarter of 2013 which impacts presentation disclosures only and does not have an impact on the Corporation's consolidated financial statements. Refer to note 16 to the consolidated financial statements for the related disclosures.

FASB Accounting Standards Update 2012-06, Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution (ASU 2012-06)

The FASB issued ASU 2012-06 in October 2012. ASU 2012-06 addresses the diversity in practice about how to interpret the terms "on the same basis" and "contractual limitations" when subsequently measuring an indemnification asset recognized in a government-assisted (Federal Deposit Insurance Corporation) acquisition of a financial institution that includes a loss-sharing agreement (indemnification agreement). When a reporting entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently the cash flows expected to be collected on the indemnification asset changes, as a result of a change in cash flows expected to be collected on the assets subject to indemnification, the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement, that is, the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets.

Table of Contents

ASU 2012-06 is effective for fiscal years and interim periods within those years, beginning on or after December 15, 2012.

The Corporation adopted the provisions of this guidance on the first quarter of 2013, and has not had a material effect on the Corporation's consolidated financial statements as of June 30, 2013.

FASB Accounting Standards Update 2012-02, Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment (ASU 2012-02)

The FASB issued ASU 2012-02 in July 2012. ASU 2012-02 is intended to simplify how entities test indefinite-lived intangible assets, other than goodwill, for impairment. ASU 2012-02 permits an entity the option to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC Subtopic 350-30, *Intangibles-Goodwill and Other-General Intangibles Other than Goodwill*. The more-likely-than-not threshold is defined as having a likelihood of more than 50%. This guidance results in guidance that is similar to the goodwill impairment testing guidance in ASU 2011-08. The previous guidance under ASC Subtopic 350-30 required an entity to test indefinite-lived intangible assets for impairment on at least an annual basis by comparing an asset's fair value with its carrying amount and recording an impairment loss for an amount equal to the excess of the asset's carrying amount over its fair value. Under the amendments in this ASU, an entity is not required to calculate the fair value of an indefinite-lived intangible asset if the entity determines that it is not more likely than not that the asset is impaired. In addition the new qualitative indicators replace those currently used to determine whether indefinite-lived intangible assets should be tested for impairment on an interim basis.

ASU 2012-02 is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012.

The provisions of this guidance simplify how entities test for indefinite-lived assets impairment and have not had an impact on the Corporation's consolidated financial statements as of June 30, 2013.

FASB Accounting Standards Update 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities (ASU 2011-11)

The FASB issued ASU 2011-11 in December 2011. The amendments in this ASU require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. To meet this objective, entities with financial instruments and derivatives that are either offset on the balance sheet or subject to a master netting arrangement or similar arrangement shall disclose the following quantitative information separately for assets and liabilities in tabular format: a) gross amounts of recognized assets and liabilities; b) amounts offset to determine the net amount presented in the balance sheet; c) net amounts presented in the balance sheet; d) amounts subject to an enforceable master netting agreement or similar arrangement not otherwise included in (b), including: amounts related to recognized financial instruments and other derivatives instruments if either management makes an accounting election not to offset or the amounts do not meet the guidance in ASC Section 210-20-45 or ASC Section 815-10-45, and also amounts related to financial collateral (including cash collateral); and e) the net amount after deducting the amounts in (d) from the amounts in (c).

In addition to these tabular disclosures, entities are required to provide a description of the setoff rights associated with assets and liabilities subject to an enforceable master netting arrangement.

An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented.

The provisions of this guidance which impacts presentation disclosure only was adopted in the first quarter of 2013 and did not have an impact on the Corporation's statements of financial condition or results of operations. Refer to note 16 to the consolidated financial statements for the related disclosures.

Table of Contents

Note 3 Restrictions on cash and due from banks and certain securities

The Corporation's banking subsidiaries, BPPR and BPNA, are required by federal and state regulatory agencies to maintain average reserve balances with the Federal Reserve Bank of New York (the "Fed") or other banks. Those required average reserve balances amounted to \$957 million at June 30, 2013 (December 31, 2012 - \$952 million). Cash and due from banks, as well as other short-term, highly liquid securities, are used to cover the required average reserve balances.

At June 30, 2013 the Corporation held \$42 million in restricted assets in the form of funds deposited in money market accounts, trading account securities and investment securities available for sale (December 31, 2012 - \$41 million). The amounts held in trading account securities and investment securities available for sale consist primarily of restricted assets held for the Corporation's non-qualified retirement plans and fund deposits guaranteeing possible liens or encumbrances over the title of insured properties.

Table of Contents**Note 4 Pledged assets**

Certain securities and loans were pledged to secure public and trust deposits, assets sold under agreements to repurchase, other borrowings and credit facilities available, derivative positions, and loan servicing agreements. The classification and carrying amount of the Corporation's pledged assets, in which the secured parties are not permitted to sell or repledge the collateral, were as follows:

(In thousands)	June 30, 2013	December 31, 2012
Investment securities available-for-sale, at fair value	\$ 1,836,714	\$ 1,606,683
Investment securities held-to-maturity, at amortized cost	35,000	25,000
Loans held-for-sale measured at lower of cost or fair value	8,556	132
Loans held-in-portfolio covered under loss sharing agreements with the FDIC	407,334	452,631
Loans held-in-portfolio not covered under loss sharing agreements with the FDIC	8,787,654	8,358,456
Total pledged assets	\$ 11,075,258	\$ 10,442,902

Pledged securities that the creditor has the right by custom or contract to repledge are presented separately on the consolidated statements of financial condition.

At June 30, 2013, the Corporation had \$ 1.4 billion in investment securities available-for-sale and \$ 0.3 billion in loans that served as collateral to secure public funds (December 31, 2012 \$ 1.2 billion and \$ 0.3 billion, respectively).

At June 30, 2013, the Corporation's banking subsidiaries had short-term and long-term credit facilities authorized with the Federal Home Loan Bank system (the FHLB) aggregating to \$2.8 billion (December 31, 2012 \$2.8 billion). Refer to Note 15 to the consolidated financial statements for borrowings outstanding under these credit facilities. At June 30, 2013, the credit facilities authorized with the FHLB were collateralized by \$ 3.9 billion in loans held-in-portfolio (December 31, 2012 \$ 3.8 billion). Also, at June 30, 2013, the Corporation's banking subsidiaries had a borrowing capacity at the Federal Reserve (Fed) discount window of \$3.5 billion, which remained unused as of such date (December 31, 2012 \$3.1 billion). The amount available under these credit facilities with the Fed is dependent upon the balance of loans and securities pledged as collateral. At June 30, 2013, the credit facilities with the Fed discount window were collateralized by \$ 5.0 billion in loans held-in-portfolio (December 31, 2012 \$ 4.7 billion). These pledged assets are included in the above table and were not reclassified and separately reported in the consolidated statements of financial condition.

In addition, at June 30, 2013 trades receivables from brokers and counterparties amounting to \$142 million were pledged to secure repurchase agreements (December 31, 2012 \$133 million).

Edgar Filing: POPULAR INC - Form 10-Q

The weighted average yield on investment securities available-for-sale is based on amortized cost; therefore, it does not give effect to changes in fair value.

Securities not due on a single contractual maturity date, such as mortgage-backed securities and collateralized mortgage obligations, are classified in the period of final contractual maturity. The expected maturities of collateralized mortgage obligations, mortgage-backed securities and certain other securities may differ from their contractual maturities because they may be subject to prepayments or may be called by the issuer.

The slight increase in investment securities available-for-sale is mainly due to purchases of CMOs and agencies during this quarter, partially offset by portfolio declines in market value in line with underlying market conditions, US Agency maturities, mortgage backed securities prepayments and the prepayment of \$22.8 million of EVERTEC's debenture as part of their IPO and debt repayment of \$5.8 million during the quarter.

There were no sales of investment securities available-for-sale during the six months ended June 30, 2013. At the end of the second quarter of 2012, the Corporation sold investment securities with settlement date in July 2012. The proceeds received in July 2012 from these transactions were \$8.0 million.

Table of Contents

Gross realized gains and losses on the sale of investment securities available-for-sale were as follows:

(In thousands)	For the quarter ended June 30,		Six months ended June 30,

Management evaluates investment securities for other-than-temporary (OTTI) declines in fair value on a quarterly basis. Once a decline in value is determined to be other-than-temporary, the value of a debt security is reduced and a corresponding charge to earnings is recognized for anticipated credit losses. Also, for equity securities that are considered other-than-temporarily impaired, the excess of the security's carrying value over its fair value at the evaluation date is accounted for as a loss in the results of operations. The OTTI analysis requires management to consider various factors, which include, but are not limited to: (1) the length of time and the extent to which fair value has been less than the amortized cost basis, (2) the financial condition of the issuer or issuers, (3) actual collateral attributes, (4) the payment structure of the debt security and the likelihood of the issuer being able to make payments, (5) any rating changes by a rating agency, (6) adverse conditions specifically related to the security, industry, or a geographic area, and (7) management's intent to sell the debt security or whether it is more

likely than not that the Corporation would be required to sell the debt security before a forecasted recovery occurs.

Table of Contents

At June 30, 2013, management performed its quarterly analysis of all debt securities in an unrealized loss position. Based on the analyses performed, management concluded that no individual debt security was other-than-temporarily impaired as of such date. At June 30, 2013, the Corporation did not have the intent to sell debt securities in an unrealized loss position and it is not more likely than not that the Corporation will have to sell the investment securities prior to recovery of their amortized cost basis. Also, management evaluated the Corporation's portfolio of equity securities at June 30, 2013. No other-than-temporary impairment losses on equity securities were recorded during the quarters ended June 30, 2013 and June 30, 2012. Management has the intent and ability to hold the investments in equity securities that are at a loss position at June 30, 2013, for a reasonable period of time for a forecasted recovery of fair value up to (or beyond) the cost of these investments.

The following table states the name of issuers, and the aggregate amortized cost and fair value of the securities of such issuer (includes available-for-sale and held-to-maturity securities), in which the aggregate amortized cost of such securities exceeds 10% of stockholders' equity. This information excludes securities backed by the full faith and credit of the U.S. Government. Investments in obligations issued by a state of the U.S. and its political subdivisions and agencies, which are payable and secured by the same source of revenue or taxing authority, other than the U.S. Government, are considered securities of a single issuer.

(In thousands)	June 30, 2013		December 31, 2012

Total investment securities held-to-maturity in an unrealized loss position	\$ 2,365	\$ 35	\$ 19,118	\$ 427	\$ 21,483	\$ 462

As indicated in Note 5 to these consolidated financial statements, management evaluates investment securities for OTTI declines in fair value on a quarterly basis.

The Obligations of Puerto Rico, States and political subdivisions classified as held-to-maturity at June 30, 2013 are primarily associated with securities issued by municipalities of Puerto Rico and are generally not rated by a credit rating agency. The Corporation performs periodic credit quality reviews on these issuers. The Corporation does not have the intent to sell securities held-to-maturity and it is not more likely than not that the Corporation will have to sell these investment securities prior to recovery of their amortized cost basis.

Table of Contents**Note 7 Loans**

Covered loans acquired in the Westernbank FDIC-assisted transaction, except for lines of credit with revolving privileges, are accounted for by the Corporation in accordance with ASC Subtopic 310-30. Under ASC Subtopic 310-30, the acquired loans were aggregated into pools based on similar characteristics. Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. The covered loans which are accounted for under ASC Subtopic 310-30 by the Corporation are not considered non-performing and will continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The Corporation measures additional losses for this portfolio when it is probable the Corporation will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition. Lines of credit with revolving privileges that were acquired as part of the Westernbank FDIC-assisted transaction are accounted for under the guidance of ASC Subtopic 310-20, which requires that any differences between the contractually required loan payment receivable in excess of the Corporation's initial investment in the loans be accreted into interest income. Loans accounted for under ASC Subtopic 310-20 are placed in non-accrual status when past due in accordance with the Corporation's non-accruing policy and any accretion of discount is discontinued.

The risks on loans acquired in the FDIC-assisted transaction are significantly different from the risks on loans not covered under the FDIC loss sharing agreements because of the loss protection provided by the FDIC. Accordingly, the Corporation presents loans subject to the loss sharing agreements as covered loans in the information below and loans that are not subject to the FDIC loss sharing agreements as non-covered loans.

For a summary of the accounting policy related to loans, interest recognition and allowance for loan losses refer to the summary of significant accounting policies included in Note 2 to the consolidated financial statements included in 2012 Annual Report.

The following table presents the composition of non-covered loans held-in-portfolio (HIP), net of unearned income, at June 30, 2013 and December 31, 2012.

(In thousands)	June 30, 2013	December 31, 2012

The following table provides a breakdown of loans held-for-sale (LHFS) at June 30, 2013 and December 31, 2012 by main categories.

(In thousands)	June 30, 2013	December 31, 2012
Commercial	\$ 2,594	\$ 16,047
Construction		78,140
Legacy	1,680	2,080
Mortgage	186,578	258,201
 Total loans held-for-sale	 \$ 190,852	 \$ 354,468

During the quarter and six months ended June 30, 2013, the Corporation recorded purchases (including repurchases) of mortgage loans amounting to \$0.4 billion and \$1.5 billion, respectively (June 30, 2012 \$336 million and \$551 million, respectively). Also, the Corporation recorded purchases of \$42 million in consumer loans during the quarter and six months ended June 30, 2013 (June 30, 2012 \$230 million). In addition, during the quarter and six months ended June 30, 2013, the Corporation recorded purchases of commercial loans amounting to \$3 million and there were no purchases during the quarter and six months ended June 30, 2012. There were no purchases of construction loans during the quarter and six months ended June 30, 2013 and 2012.

The Corporation performed whole-loan sales involving approximately \$503 million and \$553 million of residential mortgage loans during the quarter and six months ended June 30, 2013, respectively (June 30, 2012- \$80 million and \$130 million, respectively). These sales included \$435 million from the bulk sale of non-performing mortgage loans, completed during the quarter ended June 30, 2013. Also, the Corporation securitized approximately \$ 282 million and \$ 568 million of mortgage loans into Government National Mortgage Association (GNMA) mortgage-backed securities during the quarter and six months ended June 30, 2013, respectively (June 30, 2012 \$ 205 million and \$ 395 million, respectively). Furthermore, the Corporation securitized approximately \$ 124 million and \$ 252 million of mortgage loans into Federal National Mortgage Association (FNMA) mortgage-backed securities during the quarter and six months ended June 30, 2013, respectively (June 30, 2012- \$ 71 million and \$ 131 million, respectively). Also, the Corporation securitized approximately \$ 27 million of mortgage loans into Federal Home Loan Mortgage Corporation (FHLMC) mortgage-backed securities during the quarter and six months ended June 30, 2013. There were no securitizations into FHLMC for the quarter and six months ended June 30, 2012. The Corporation sold commercial and construction loans with a book value of approximately \$6 million and \$407 million during the quarter and six months ended June 30, 2013, respectively (June 30, 2012- \$19 million and \$39 million, respectively). These sales included \$401 million from the bulk sale of non-performing commercial and construction loans during the quarter ended March 31, 2013.

Table of Contents*Non-covered loans*

The following tables present non-covered loans held-in-portfolio by loan class that are in non-performing status or are accruing interest but are past due 90 days or more at June 30, 2013 and December 31, 2012. Accruing loans past due 90 days or more consist primarily of credit cards, FHA / VA and other insured mortgage loans, and delinquent mortgage loans which are included in the Corporation's financial statements pursuant to GNMA's buy-back option program. Servicers of loans underlying GNMA mortgage-backed securities must report as their own assets the defaulted loans that they have the option (but not the obligation) to repurchase, even when they elect not to exercise that option. Also, accruing loans past due 90 days or more include residential conventional loans purchased from another financial institution that, although delinquent, the Corporation has received timely payment from the seller / servicer, and, in some instances, have partial guarantees under recourse agreements. However, residential conventional loans purchased from another financial institution, which are in the process of foreclosure, are classified as non-performing mortgage loans.

Edgar Filing: POPULAR INC - Form 10-Q

The outstanding principal balance of non-covered loans accounted pursuant to ASC Subtopic 310-30, including amounts charged off by the Corporation, amounted to \$156 million at June 30, 2013. At June 30, 2013, none of the acquired non-covered loans accounted under ASC Subtopic 310-30 were considered non-performing loans. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans.

Table of Contents

Changes in the carrying amount and the accretable yield for the non-covered loans accounted pursuant to the ASC Subtopic 310-30, for the quarter and six months ended June 30, 2013 were as follows:

(In thousands)	Activity in the accretable discount	
	Non-covered loans ASC 310-30 For the quarter ended June 30, 2013	For the six months ended June 30, 2013

The outstanding principal balance of covered loans accounted pursuant to ASC Subtopic 310-30, including amounts charged off by the Corporation, amounted to \$4.1 billion at June 30, 2013 (December 31, 2012 \$4.8 billion). At June 30, 2013, none of the acquired loans from the Westernbank FDIC-assisted transaction accounted for under ASC Subtopic 310-30 were considered non-performing loans. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all

acquired loans.

The Corporation accounts for lines of credit with revolving privileges under the accounting guidance of ASC Subtopic 310-20, which requires that any differences between the contractually required loans payment receivable in excess of the initial investment in the loans be accreted into interest income over the life of the loans, if the loan is accruing interest. Covered loans accounted for under ASC Subtopic 310-20 amounted to \$0.2 billion at June 30, 2013 (June 30, 2012 \$0.3 billion).

Note 8 Allowance for loan losses

The Corporation's assessment of the allowance for loan losses is determined in accordance with accounting guidance, specifically loss contingencies guidance in ASC Subtopic 450-20 and loan impairment guidance in ASC Section 310-10-35.

The accounting guidance provides for the recognition of a loss allowance for groups of homogeneous loans. The determination for general reserves of the allowance for loan losses includes the following principal factors:

Base net loss rates, which are based on the moving average of annualized net loss rates computed over a 3-year historical loss period for the commercial and construction loan portfolios, and an 18-month period for the consumer and mortgage loan portfolios. The base net loss rates are applied by loan type and by legal entity.

Recent loss trend adjustment, which replaces the base loss rate with a 12-month average loss rate for the commercial, construction and legacy loan portfolios and 6-month average loss rate for the consumer and mortgage loan portfolios, when these trends are higher than the respective base loss rates, up to a determined cap in the case of consumer and mortgage loan portfolios. The objective of this adjustment is to include information about recent increases in loss rates in a timely and prudent manner.

Environmental factors, which include credit and macroeconomic indicators such as unemployment rate, economic activity index and delinquency rates, were adopted to account for current market conditions that are likely to cause estimated credit losses to differ from historical losses. The Corporation reflects the effect of these environmental factors on each loan group as an adjustment that, as appropriate, increases or decreases the historical loss rate applied to each group. Environmental factors provide updated perspective on credit and economic conditions. Regression analysis was used to select these indicators and quantify the effect on the general reserve of the allowance for loan losses.

During the second quarter of 2013, management revised the estimation process for evaluating the adequacy of the general reserve component of the allowance for loan losses. The enhancements to the ALLL methodology, which is described in the paragraphs below, was implemented as of June 30, 2013 and resulted in a net increase to the allowance for loan losses of \$11.8 million for the non-covered portfolio and \$7.5 million for the covered portfolio.

Table of Contents

Management made the following principal changes to the methodology during the second quarter of 2013:

Incorporated risk ratings to establish a more granular stratification of the commercial, construction and legacy loan portfolios to enhance the homogeneity of the loan classes. Prior to the second quarter enhancements, the Corporation's loan segmentation was based on product type, line of business and legal entity. During the second quarter of 2013, lines of business were simplified and a regulatory classification level was added. These changes increase the homogeneity of each portfolio and capture the higher potential for loan loss in the criticized and substandard accruing categories.

These refinements resulted in a decrease to the allowance for loan losses of \$42.9 million at June 30, 2013, which consisted of a \$35.7 million decrease in the non-covered BPPR segment and a \$7.2 million reduction in the BPNA segment.

Recalibration and enhancements of the environmental factors adjustment. The environmental factor adjustments are developed by performing regression analyses on selected credit and economic indicators for each applicable loan segment. Prior to the second quarter enhancements, these adjustments were applied in the form of a set of multipliers and weights assigned to credit and economic indicators. During the second quarter of 2013, the environmental factor models used to account for changes in current credit and macroeconomic conditions, were enhanced and recalibrated based on the latest applicable trends. Also, as part of these enhancements, environmental factors are directly applied to the adjusted base loss rates using regression models based on particular credit data for the segment and relevant economic factors. These enhancements result in a more precise adjustment by having recalibrated models with improved statistical analysis and eliminating the multiplier concept that ensures that environmental factors are sufficiently sensitive to changing economic conditions.

The combined effect of the aforementioned changes to the environmental factors adjustment resulted in an increase to the allowance for loan losses of \$52.5 million at June 30, 2013, of which \$56.1 million relate to the non-covered BPPR segment, offset in part by a \$3.6 million reduction in the BPNA segment.

There were additional enhancements to the allowance for loan losses methodology which accounted for an increase of \$9.7 million at June 30, 2013 at the BPPR segment. These enhancements included the elimination of the use of a cap for the commercial recent loss adjustment (12-month average), the incorporation of a minimum general reserve assumption for the commercial, construction and legacy portfolios with minimal or zero loss history, and the application of the enhanced ALLL framework to the covered loan portfolio.

The following tables present the changes in the allowance for loan losses for the quarters and six months ended June 30, 2013 and 2012.

Modifications

Troubled debt restructurings related to non-covered loan portfolios amounted to \$0.9 billion at June 30, 2013 (December 31, 2012 \$1.2 billion). The amount of outstanding commitments to lend additional funds to debtors owing receivables whose terms have been modified in troubled debt restructurings amounted \$4 million related to the commercial loan portfolio and none related to the construction loan portfolio at June 30, 2013 (December 31, 2012 \$4 million and \$120 thousand, respectively).

A modification of a loan constitutes a troubled debt restructuring (TDR) when a borrower is experiencing financial difficulty and the modification constitutes a concession.

Commercial and industrial loans modified in a TDR often involve temporary interest-only payments, term extensions, and converting evergreen revolving credit lines to long-term loans. Commercial real estate (CRE), which includes multifamily, owner-occupied and non-owner occupied CRE, and construction loans modified in a TDR often involve reducing the interest rate for a limited period of time or the remaining term of the loan, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, or reductions in the payment plan. Construction loans modified in a TDR may also involve extending the interest-only payment period.

Residential mortgage loans modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers financial needs for a period of time, normally five years to ten years. After the lowered monthly payment period ends, the borrower reverts back to paying principal and interest per the original terms with the maturity date adjusted accordingly.

Home equity loans modifications are made infrequently and are not offered if the Corporation also holds the first mortgage. Home equity loans modifications are uniquely designed to meet the specific needs of each borrower. Automobile loans modified in a TDR are primarily comprised of loans where the Corporation has lowered monthly payments by extending the term. Credit cards modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers financial needs for a period of time, normally up to 24 months.

As part of its NPL reduction strategy and in order to expedite the resolution of delinquent construction and commercial loans, commencing in 2012, the Corporation routinely enters into liquidation agreements with borrowers and guarantors through the regular legal process, bankruptcy procedures and in certain occasions, out of Court transactions. These liquidation agreements, in general, contemplate the following conditions: (1) consent to judgment by the borrowers and guarantors; (2) acknowledgement by the borrower of the debt, its liquidity and maturity; (3) acknowledgment of the default in payments. The contractual interest rate is not reduced and continues to accrue during the term of the agreement. At the end of the period, borrower is obligated to remit all amounts due or be subject to the Corporation s exercise of its foreclosure rights and further collection efforts. Likewise, the borrower s failure to make stipulated payments will grant the Corporation the ability to exercise its foreclosure rights. This strategy procures to expedite the foreclosure process, resulting in a more effective and efficient collection process. Although in general, these liquidation agreements do not contemplate the forgiveness of principal or interest as debtor is required to cover all outstanding amounts when the agreement becomes due, it could be construed that the Corporation has granted a concession by temporarily accepting a payment schedule that is different from the contractual payment schedule. Accordingly, loans under these program agreements are considered TDRs.

Loans modified in a TDR that are not accounted pursuant to ASC 310-30 are typically already in non-accrual status at the time of the modification and partial charge-offs have in some cases already been taken against the outstanding loan balance. The TDR loan continues in non-accrual status until the borrower has demonstrated a willingness and ability to make the restructured loan payments (generally at least six months of sustained performance after the modification (or one year for loans providing for quarterly or semi-annual payments)) and management has concluded that it is probable that the borrower would not be in payment default in the foreseeable future.

Loans modified in a TDR may have the financial effect to the Corporation of increasing the specific allowance for loan losses associated with the loan. Consumer and residential mortgage loans modified under the Corporation s loss mitigation programs that are determined to be TDRs are individually evaluated for impairment based on an analysis of discounted cash flows.

For consumer and mortgage loans that are modified with regard to payment terms and which constitute TDRs, the discounted cash flow value method is used as the impairment valuation is more appropriately calculated based on the ongoing cash flow from the individuals rather than the liquidation of the asset. The computations give consideration to probability of defaults and loss-given-foreclosure on the related estimated cash flows.

Table of Contents

Commercial and construction loans that have been modified as part of loss mitigation efforts are evaluated individually for impairment. The vast majority of the Corporation's modified commercial loans are measured for impairment using the estimated fair value of the collateral, as these are normally considered as collateral dependent loans. In very few instances, the Corporation measures modified commercial loans at their estimated realizable values determined by discounting the expected future cash flows. Construction loans that have been modified are also accounted for as collateral dependent loans. The Corporation determines the fair value measurement dependent upon its exit strategy for the particular asset(s) acquired in foreclosure.

The following tables present the non-covered and covered loans classified as TDRs according to their accruing status at June 30, 2013 and December 31, 2012.

During the six months ended June 30, 2013 and 2012, two loan comprising a recorded investment of approximately \$2.9 million and four loans of \$7 million, respectively, was restructured into multiple notes (Note A / B split). The Corporation recorded approximately \$1.3 million and \$1.4 million in loan charge-offs as part of the loan restructuring during the six months ended June 30, 2013 and 2012, respectively. The renegotiations of this loan were made after analyzing the borrowers capacity to repay the debt, collateral and ability to perform under the modified terms. The recorded investment on these commercial TDRs amounted to approximately \$1.6 million at June 30, 2013 (June 30, 2012 \$6 million) with a related allowance for loan losses amounting to approximately \$21 thousand (June 30, 2012 \$94 thousand).

The following tables present by class, TDRs that were subject to payment default and that had been modified as a TDR during the twelve months preceding the default date. Payment default is defined as a restructured loan becoming 90 days past due after being modified, foreclosed or charged-off, whichever occurs first. The recorded investment at June 30, 2013 is inclusive of all partial paydowns and charge-offs since the modification date. Loans modified as a TDR that were fully paid down, charged-off or foreclosed upon by period end are not reported.

Commercial, consumer and mortgage loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, the Corporation evaluates the loan for possible further impairment. The allowance for loan losses may be increased or partial charge-offs may be taken to further write-down the carrying value of the loan.

Credit Quality

The following table presents the outstanding balance, net of unearned income, of non-covered loans held-in-portfolio based on the Corporation's assignment of obligor risk ratings as defined at June 30, 2013 and December 31, 2012.

[1] Excludes covered loans acquired in the Westernbank FDIC-assisted transaction.

Table of Contents**Note 9 FDIC loss share asset and true-up payment obligation**

In connection with the Westernbank FDIC-assisted transaction, BPPR entered into loss share agreements with the FDIC with respect to the covered loans and other real estate owned. Pursuant to the terms of the loss share agreements, the FDIC's obligation to reimburse BPPR for losses with respect to covered assets begins with the first dollar of loss incurred. The FDIC reimburses BPPR for 80% of losses with respect to covered assets, and BPPR reimburses the FDIC for 80% of recoveries with respect to losses for which the FDIC paid 80% reimbursement under loss share agreements. The loss share agreement applicable to single-family residential mortgage loans provides for FDIC loss and recoveries sharing for ten years expiring at the end of the quarter ending June 30, 2020. The loss share agreement applicable to commercial (including construction) and consumer loans provides for FDIC loss sharing for five years expiring at the end of the quarter ending June 30, 2015 and BPPR reimbursement to the FDIC for eight years expiring at the end of the quarter ending June 30, 2018, in each case, on the same terms and conditions as described above.

The following table sets forth the activity in the FDIC loss share asset for the periods presented.

(In thousands)	Six months ended June 30,	
	2013	2012
Balance at beginning of year	\$ 1,399,098	\$ 1,915,128
Amortization of loss share indemnification asset	(78,761)	(66,788)
Credit impairment losses to be covered under loss sharing agreements	39,383	42,848
Decrease due to reciprocal accounting on amortization of contingent liability on unfunded commitments	(386)	(496)
Reimbursable expenses	19,914	13,042
Net payments to (from) FDIC under loss sharing agreements	107	(262,807)
Other adjustments attributable to FDIC loss sharing agreements	(13)	(9,333)
Balance at end of period	\$ 1,379,342	\$ 1,631,594

As part of the loss share agreements, BPPR has agreed to make a true-up payment to the FDIC on the date that is 45 days following the last day (such day, the true-up measurement date) of the final shared-loss month, or upon the final disposition of all covered assets under the loss share agreements, in the event losses on the loss share agreements fail to reach expected levels. The estimated fair value of such true-up payment obligation is recorded as contingent consideration, which is included in the caption of other liabilities in the consolidated statements of financial condition. Under the loss sharing agreements, BPPR will pay to the FDIC 50% of the excess, if any, of: (i) 20% of the intrinsic loss estimate of \$4.6 billion (or \$925 million) (as determined by the FDIC) less (ii) the sum of: (A) 25% of the asset discount (per bid) (or \$1.1 billion); plus (B) 25% of the cumulative shared-loss payments (defined as the aggregate of all of the payments made or payable to BPPR minus the aggregate of all of the payments made or payable to the FDIC); plus (C) the sum of the period servicing amounts for every consecutive twelve-month period prior to and ending on the true-up measurement date in respect of each of the loss sharing agreements during which the loss sharing provisions of the applicable loss sharing agreement is in effect (defined as the product of the simple average of the principal amount of shared loss loans and shared loss assets at the beginning and end of such period times 1%).

The following table provides the fair value and the undiscounted amount of the true-up payment obligation at June 30, 2013 and December 31, 2012.

(In thousands)	June 30, 2013	December 31, 2012
Carrying amount (fair value)	\$ 118,770	\$ 111,519
Undiscounted amount	\$ 183,108	\$ 178,522

The loss share agreements contain specific terms and conditions regarding the management of the covered assets that BPPR must follow in order to receive reimbursement on losses from the FDIC. Under the loss share agreements, BPPR must:

manage and administer the covered assets and collect and effect charge-offs and recoveries with respect to such covered assets in a manner consistent with its usual and prudent business and banking practices and, with respect to single family shared-loss loans, the

Edgar Filing: POPULAR INC - Form 10-Q

procedures (including collection procedures) customarily employed by BPPR in servicing and administering mortgage loans for its own account and the servicing procedures established by FNMA or the Federal Home Loan Mortgage Corporation (FHLMC), as in effect from time to time, and in accordance with accepted mortgage servicing practices of prudent lending institutions;

Table of Contents

exercise its best judgment in managing, administering and collecting amounts on covered assets and effecting charge-offs with respect to the covered assets;

use commercially reasonable efforts to maximize recoveries with respect to losses on single family shared-loss assets and best efforts to maximize collections with respect to commercial shared-loss assets;

retain sufficient staff to perform the duties under the loss share agreements;

adopt and implement accounting, reporting, record-keeping and similar systems with respect to the commercial shared-loss assets;

comply with the terms of the modification guidelines approved by the FDIC or another federal agency for any single-family shared-loss loan;

provide notice with respect to proposed transactions pursuant to which a third party or affiliate will manage, administer or collect any commercial shared-loss assets;

file monthly and quarterly certificates with the FDIC specifying the amount of losses, charge-offs and recoveries; and

maintain books and records sufficient to ensure and document compliance with the terms of the loss share agreements.

Table of Contents**Note 10 Transfers of financial assets and mortgage servicing assets**

The Corporation typically transfers conforming residential mortgage loans in conjunction with GNMA, FNMA and FHLMC securitization transactions whereby the loans are exchanged for cash or securities and servicing rights. The securities issued through these transactions are guaranteed by the corresponding agency and, as such, under seller/service agreements the Corporation is required to service the loans in accordance with the agencies' servicing guidelines and standards. Substantially all mortgage loans securitized by the Corporation in GNMA, FNMA and FHLMC securities have fixed rates and represent conforming loans. As seller, the Corporation has made certain representations and warranties with respect to the originally transferred loans and, in some instances, has sold loans with credit recourse to a government-sponsored entity, namely FNMA. Refer to Note 20 to the consolidated financial statements for a description of such arrangements.

No liabilities were incurred as a result of these securitizations during the quarters and six months ended June 30, 2013 and 2012 because they did not contain any credit recourse arrangements. During the quarter ended June 30, 2013, the Corporation recorded a net gain \$8.8 million (June 30, 2012 \$13.9 million) related to the residential mortgage loans securitized. During the six months ended June 30, 2013, the Corporation recorded a net gain \$26.5 million (June 30, 2012 \$27.6 million) related to the residential mortgage loans securitized.

The following tables present the initial fair value of the assets obtained as proceeds from residential mortgage loans securitized during the quarters and six months ended June 30, 2013 and 2012:

(In thousands)	Proceeds Obtained During the Quarter Ended June 30, 2013			Initial Fair Value

Total		\$ 525,800	\$ 7,021	\$ 532,821

During the six months ended June 30, 2013, the Corporation retained servicing rights on whole loan sales involving approximately \$40 million in principal balance outstanding (June 30, 2012 \$118 million), with realized gains of approximately \$1.5 million (June 30, 2012 gains of \$4.6 million). All loan sales performed during the six months ended June 30, 2013 and 2012 were without credit recourse agreements.

The Corporation recognizes as assets the rights to service loans for others, whether these rights are purchased or result from asset transfers such as sales and securitizations. These mortgage servicing rights (MSRs) are measured at fair value. Fair value determination is performed on a subsidiary basis.

The Corporation uses a discounted cash flow model to estimate the fair value of MSRs. The discounted cash flow model incorporates assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, cost to service, escrow account earnings, contractual servicing fee income, prepayment and late fees, among other considerations. Prepayment speeds are adjusted for the Corporation's loan characteristics and portfolio behavior.

Table of Contents

The following table presents the changes in MSRMs measured using the fair value method for the six months ended June 30, 2013 and 2012.

(In thousands)	Residential MSRMs	
	June 30, 2013	June 30, 2012
Fair value at beginning of period	\$ 154,430	\$ 151,323
Purchases	45	1,018
Servicing from securitizations or asset transfers	10,152	8,206
Changes due to payments on loans ^[1]	(12,721)	(8,950)
Reduction due to loan repurchases	(2,033)	(1,360)
Changes in fair value due to changes in valuation model inputs or assumptions	4,013	5,519
Other disposals	(442)	(45)
Fair value at end of period	\$ 153,444	\$ 155,711

[1] Represents the change due to collection / realization of expected cash flow over time.

Residential mortgage loans serviced for others were \$16.6 billion at June 30, 2013 (December 31, 2012 \$16.7 billion).

Net mortgage servicing fees, a component of other service fees in the consolidated statements of operations, include the changes from period to period in the fair value of the MSRMs, including changes due to collection / realization of expected cash flows. Mortgage servicing fees, excluding fair value adjustments, for the quarter and six months ended June 30, 2013 amounted to \$11.3 million and \$22.6 million, respectively (June 30, 2012 \$11.9 million and \$24.1 million, respectively). The banking subsidiaries receive servicing fees based on a percentage of the outstanding loan balance. At June 30, 2013, those weighted average mortgage servicing fees were 0.27% (June 30, 2012 0.28%). Under these servicing agreements, the banking subsidiaries do not generally earn significant prepayment penalty fees on the underlying loans serviced.

The section below includes information on assumptions used in the valuation model of the MSRMs, originated and purchased.

Key economic assumptions used in measuring the servicing rights derived from loans securitized or sold by the Corporation during the quarters and six months ended June 30, 2013 and 2012 were as follows:

	Quarter ended		Six months ended	
	June 30, 2013	June 30, 2012	June 30, 2013	June 30, 2012
Prepayment speed	7.3 %	6.5 %	7.7 %	6.1 %
Weighted average life	13.7 years	15.4 years	12.9 years	16.4 years
Discount rate (annual rate)	11.1 %	11.5 %	11.1 %	11.5 %

Table of Contents

Key economic assumptions used to estimate the fair value of MSR's derived from sales and securitizations of mortgage loans performed by the banking subsidiaries and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

(In thousands)	Originated MSR's	
	June 30, 2013	December 31, 2012
Fair value of servicing rights	\$ 106,198	\$ 102,727
Weighted average life	11.4 years	10.2 years
Weighted average prepayment speed (annual rate)	8.8%	9.8%
Impact on fair value of 10% adverse change	\$ (3,139)	\$ (3,226)
Impact on fair value of 20% adverse change	\$ (6,752)	\$ (7,018)
Weighted average discount rate (annual rate)	12.2%	12.3%
Impact on fair value of 10% adverse change	\$ (3,891)	\$ (3,518)
Impact on fair value of 20% adverse change	\$ (8,108)	\$ (7,505)

The banking subsidiaries also own servicing rights purchased from other financial institutions. The fair value of purchased MSR's, their related valuation assumptions and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

(In thousands)	Purchased MSR's	
	June 30, 2013	December 31, 2012
Fair value of servicing rights	\$ 47,246	\$ 51,703
Weighted average life	10.9 years	11.0 years
Weighted average prepayment speed (annual rate)	9.2%	9.1%
Impact on fair value of 10% adverse change	\$ (2,149)	\$ (2,350)
Impact on fair value of 20% adverse change	\$ (3,671)	\$ (4,024)
Weighted average discount rate (annual rate)	11.3%	11.4%
Impact on fair value of 10% adverse change	\$ (2,315)	\$ (2,516)
Impact on fair value of 20% adverse change	\$ (3,966)	\$ (4,317)

The sensitivity analyses presented in the tables above for servicing rights are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10 and 20 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the sensitivity tables included herein, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

At June 30, 2013, the Corporation serviced \$2.7 billion (December 31, 2012 \$2.9 billion) in residential mortgage loans with credit recourse to the Corporation.

Under the GNMA securitizations, the Corporation, as servicer, has the right to repurchase (but not the obligation), at its option and without GNMA's prior authorization, any loan that is collateral for a GNMA guaranteed mortgage-backed security when certain delinquency criteria are met. At the time that individual loans meet GNMA's specified delinquency criteria and are eligible for repurchase, the Corporation is deemed to have regained effective control over these loans if the Corporation was the pool issuer. At June 30, 2013, the Corporation had recorded \$53 million in mortgage loans on its consolidated statements of financial condition related to this buy-back option program (December 31, 2012 \$56 million). As long as the Corporation continues to service the loans that continue to be collateral in a GNMA guaranteed mortgage-backed security, the MSR is recognized by the Corporation. During the six months ended June 30, 2013, the Corporation repurchased approximately \$56 million (December 31, 2012 \$255 million) of mortgage loans under the GNMA buy-back option program. The determination to repurchase these loans was based on the economic benefits of the transaction, which results in a reduction of the servicing costs for these severely delinquent loans, mostly related to principal and interest advances. Furthermore, due to their guaranteed nature, the risk associated with the loans is minimal. The Corporation places these loans under its loss mitigation programs and once brought back to current status, these may be either retained in portfolio or re-sold in the secondary market.

Table of Contents**Note 11 Other assets**

The caption of other assets in the consolidated statements of financial condition consists of the following major categories:

(In thousands)	June 30, 2013	December 31, 2012
Net deferred tax assets (net of valuation allowance)	\$ 864,284	\$ 541,499
Investments under the equity method	265,524	246,776
Bank-owned life insurance program	227,213	233,475
Prepaid FDIC insurance assessment	396	27,533
Prepaid taxes	107,253	88,360
Other prepaid expenses	60,852	60,626
Derivative assets	37,697	41,925
Trades receivables from brokers and counterparties	158,141	137,542
Others	214,066	191,842
Total other assets	\$ 1,935,426	\$ 1,569,578

Note 12 Investments in equity investees

During the quarter and six months ended June 30, 2013, the Corporation recorded pre-tax earnings of \$24.6 million and \$34.2 million, respectively, from its equity investments, compared to \$6.3 million and \$21.9 million for the quarter and six months ended June 30, 2012, respectively. This includes \$19.1 million and \$18.5 million from its investment in EVERTEC for the quarter and six months ended June 30, 2013, compared to a loss of \$45 thousand and earnings of \$1.7 million, for the corresponding periods in 2012. The carrying value of the Corporation's equity method investments was \$266 million and \$247 million at June 30, 2013 and December 31, 2012, respectively. The carrying value of the Corporation's investment in EVERTEC was \$64 million and \$74 million before intra-entity eliminations at June 30, 2013 and December 31, 2012, respectively. Refer to Note 23 for additional information on intra-entity eliminations.

The following table presents summarized financial information of EVERTEC:

(in thousands)	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Operating results:				
Total revenues	\$ 79,825	\$ 71,702	\$ 152,221	\$ 143,197
Total expenses	149,772	74,535	216,645	141,445
Income tax benefit	(5,012)	(88,526)	(4,961)	(87,472)
Net (loss) income	\$ (64,935)	\$ 85,693	\$ (59,463)	\$ 89,224

(in thousands)	June 30, 2013	December 31, 2012

Total liabilities	\$ 780,604	\$ 855,290

Table of Contents

Note 13 Goodwill and other intangible assets

The changes in the carrying amount of goodwill for the six months ended June 30, 2013 and 2012, allocated by reportable segments, were as follows (refer to Note 33 for the definition of the Corporation's reportable segments):

(In thousands)	2013				
	Balance at January 1, 2013	Goodwill on acquisition	Purchase accounting adjustments	Other	Balance at June 30, 2013
Banco Popular de Puerto Rico	\$ 245,679	\$	\$	\$	\$ 245,679
Banco Popular North America	402,078				402,078
Total Popular, Inc.	\$ 647,757	\$	\$	\$	\$ 647,757

(In thousands)	2012				
	Balance at January 1, 2012	Goodwill on acquisition	Purchase accounting adjustments	Other	Balance at June 30, 2012
Banco Popular de Puerto Rico	\$ 246,272	\$	\$ (439)	\$ (154)	\$ 245,679
Banco Popular North America	402,078				402,078
Total Popular, Inc.	\$ 648,350	\$	\$ (439)	\$ (154)	\$ 647,757

Purchase accounting adjustments consists of adjustments to the value of the assets acquired and liabilities assumed resulting from the completion of appraisals or other valuations, adjustments to initial estimates recorded for transaction costs, if any, and contingent consideration paid during a contractual contingency period.

The following table presents the gross amount of goodwill and accumulated impairment losses by reportable segments.

(In thousands)	June 30, 2013					
	Balance at January 1, 2013 (gross amounts)	Accumulated impairment losses	Balance at January 1, 2013 (net amounts)	Balance at June 30, 2013 (gross amounts)	Accumulated impairment losses	Balance at June 30, 2013 (net amounts)

Edgar Filing: POPULAR INC - Form 10-Q

At June 30, 2013 and December 31, 2012, the Corporation had \$ 6 million of identifiable intangible assets, with indefinite useful lives, mostly associated with E-LOAN s trademark.

Table of Contents

The following table reflects the components of other intangible assets subject to amortization:

(In thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
June 30, 2013			
Core deposits	\$ 77,885	\$ 47,682	\$ 30,203
Other customer relationships	16,835	3,837	12,998
Other intangibles	135	90	45
Total other intangible assets	\$ 94,855	\$ 51,609	\$ 43,246
December 31, 2012			
Core deposits	\$ 77,885	\$ 43,627	\$ 34,258
Other customer relationships	16,835	2,974	13,861
Other intangibles	135	73	62
Total other intangible assets	\$ 94,855	\$ 46,674	\$ 48,181

During the quarter ended June 30, 2013, the Corporation recognized \$ 2.5 million in amortization expense related to other intangible assets with definite useful lives (June 30, 2012 \$ 2.5 million). During the six months ended June 30, 2013, the Corporation recognized \$ 4.9 million in amortization related to other intangible assets with definite useful lives (June 30, 2012 \$ 5.1 million).

The following table presents the estimated amortization of the intangible assets with definite useful lives for each of the following periods:

(In thousands)	
Remaining 2013	\$ 4,935
Year 2014	9,227
Year 2015	7,084
Year 2016	6,799
Year 2017	4,050
Year 2018	3,970

Table of Contents**Note 14 Deposits**

Total interest bearing deposits as of the end of the periods presented consisted of:

(In thousands)	June 30, 2013	December 31, 2012
Savings accounts	\$ 6,742,296	\$ 6,694,014
NOW, money market and other interest bearing demand deposits	5,820,655	5,601,261
Total savings, NOW, money market and other interest bearing demand deposits	12,562,951	12,295,275
Certificates of deposit:		
Under \$100,000	5,287,481	5,666,973
\$100,000 and over	3,052,930	3,243,736
Total certificates of deposit	8,340,411	8,910,709
Total interest bearing deposits	\$ 20,903,362	\$ 21,205,984

A summary of certificates of deposit by maturity at June 30, 2013 follows:

(In thousands)	
2013	\$ 3,743,573
2014	1,913,288
2015	1,172,807
2016	651,948
2017	462,990
2018 and thereafter	395,805
Total certificates of deposit	\$ 8,340,411

At June 30, 2013, the Corporation had brokered deposits amounting to \$ 2.6 billion (December 31, 2012 \$ 2.8 billion).

The aggregate amount of overdrafts in demand deposit accounts that were reclassified to loans was \$11 million at June 30, 2013 (December 31, 2012 \$17 million).

Table of Contents**Note 15 Borrowings**

Assets sold under agreements to repurchase as of the end of the periods presented were as follows:

(In thousands)	June 30, 2013	December 31, 2012
Assets sold under agreements to repurchase	\$ 1,672,705	\$ 2,016,752

The repurchase agreements outstanding at June 30, 2013 were collateralized by \$ 1.2 billion (December 31, 2012 \$ 1.6 billion) in investment securities available-for-sale, \$ 256 million (December 31, 2012 \$ 272 million) in trading securities and \$ 142 million (December 31, 2012 \$ 133 million) in securities sold not yet delivered in other assets. It is the Corporation's policy to maintain effective control over assets sold under agreements to repurchase; accordingly, such securities continue to be carried on the consolidated statements of financial condition.

In addition, there were repurchase agreements outstanding collateralized by \$ 235 million in securities purchased under agreements to resell to which the Corporation has the right to repledge the securities (December 31, 2012 \$ 227 million). It is the Corporation's policy to take possession of securities purchased under agreements to resell. However, the counterparties to such agreements maintain effective control over such securities; accordingly, these securities are not reflected in the Corporation's consolidated statements of financial condition.

Other short-term borrowings as of the end of the periods presented consisted of:

(In thousands)	June 30, 2013	December 31, 2012
Advances with the FHLB paying interest at maturity, at fixed rates ranging from 0.37% to 0.46%	\$ 1,225,000	\$ 635,000
Others	1,200	1,200
Total other short-term borrowings	\$ 1,226,200	\$ 636,200

Note: Refer to the Corporation's 2012 Annual Report for rates information corresponding to the short-term borrowings outstanding at December 31, 2012.

Table of Contents

Notes payable as of the end of the periods reported consisted of:

(In thousands)	June 30, 2013	December 31, 2012
Advances with the FHLB with maturities ranging from 2013 through 2021 paying interest at monthly fixed rates ranging from 0.63% to 4.50%	\$ 582,364	\$ 577,490
Term notes with maturities ranging from 2014 to 2016 paying interest semiannually at fixed rates ranging from 7.47% to 7.86%	233,658	236,620
Term notes with maturities ranging from 2013 to 2014 paying interest monthly at a floating rate of 3.00% over the 10-year U.S. Treasury note rate ^[1]	22	133
Junior subordinated deferrable interest debentures (related to trust preferred securities) with maturities ranging from 2027 to 2034 with fixed interest rates ranging from 6.125% to 8.327% (Refer to Note 17)	439,800	439,800
Junior subordinated deferrable interest debentures (related to trust preferred securities) (\$936,000 less discount of \$419,939 at June 30, 2013 and \$436,530 at December 31, 2012), with no stated maturity and a fixed interest rate of 5.00% until, but excluding December 5, 2013 and 9.00% thereafter (Refer to Note 17) ^[2]	516,061	499,470
Others	23,861	24,208
Total notes payable	\$ 1,795,766	\$ 1,777,721

Note: Refer to the Corporation's 2012 Annual Report for rates information corresponding to the long-term borrowings outstanding at December 31, 2012.

[1] The 10-year U.S. Treasury note key index rate at June 30, 2013 and December 31, 2012 was 2.49% and 1.76%, respectively.

[2] The debentures are perpetual and may be redeemed by the Corporation at any time, subject to the consent of the Board of Governors of the Federal Reserve System. The discount on the debentures is being amortized over an estimated 30-year term that started in August 2009.

The effective interest rate, including the discount accretion, was approximately 16% at June 30, 2013 and December 31, 2012.

A breakdown of borrowings by contractual maturities at June 30, 2013 is included in the table below.

(In thousands)	Assets sold under agreements to repurchase	Short-term borrowings	Notes payable	Total
Year				
2013	\$ 930,508	\$ 1,226,200	\$ 50,380	\$ 2,207,088
2014			189,450	189,450
2015	174,135		46,112	220,247
2016	453,062		316,516	769,578
2017	115,000		74,033	189,033
Later years			603,214	603,214
No stated maturity			936,000	936,000
Subtotal	1,672,705	1,226,200	2,215,705	5,114,610
Less: Discount			419,939	419,939
Total borrowings	\$ 1,672,705	\$ 1,226,200	\$ 1,795,766	\$ 4,694,671

Table of Contents**Note 16 Offsetting of financial assets and liabilities**

The Corporation's derivatives are subject to agreements which allow a right of set-off with each respective counterparty. In addition, the Corporation's Repurchase Agreements and Reverse Repurchase Agreements have a right of set-off with the respective counterparty under the supplemental terms of the Master Repurchase Agreements. In an event of default each party has a right of set-off against the other party for amounts owed in the related agreement and any other amount or obligation owed in respect of any other agreement or transaction between them.

Table of Contents

Note 17 Trust preferred securities

At June 30, 2013 and December 31, 2012, four statutory trusts established by the Corporation (BanPonce Trust I, Popular Capital Trust I, Popular North America Capital Trust I and Popular Capital Trust II) had issued trust preferred securities (also referred to as capital securities) to the public. The proceeds from such issuances, together with the proceeds of the related issuances of common securities of the trusts (the common securities), were used by the trusts to purchase junior subordinated deferrable interest debentures (the junior subordinated debentures) issued by the Corporation. In August 2009, the Corporation established the Popular Capital Trust III for the purpose of exchanging the shares of Series C preferred stock held by the U.S. Treasury at the time for trust preferred securities issued by this trust. In connection with this exchange, the trust used the Series C preferred stock, together with the proceeds of issuance and sale of common securities of the trust, to purchase junior subordinated debentures issued by the Corporation.

The sole assets of the five trusts consisted of the junior subordinated debentures of the Corporation and the related accrued interest receivable. These trusts are not consolidated by the Corporation pursuant to accounting principles generally accepted in the United States of America.

The junior subordinated debentures are included by the Corporation as notes payable in the consolidated statements of financial condition, while the common securities issued by the issuer trusts are included as other investment securities. The common securities of each trust are wholly-owned, or indirectly wholly-owned, by the Corporation.

The following table presents financial data pertaining to the different trusts at June 30, 2013 and December 31, 2012.

(Dollars in thousands)

Issuer	BanPonce Trust I	Popular Capital Trust I	Popular North America Capital Trust I	Popular Capital Trust II	Popular Capital Trust III

- [1] Statutory business trust that is wholly-owned by Popular North America and indirectly wholly-owned by the Corporation.
- [2] Statutory business trust that is wholly-owned by the Corporation.
- [3] The obligations of PNA under the junior subordinated debentures and its guarantees of the capital securities under the trust are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.
- [4] These capital securities are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.
- [5] The Corporation has the right, subject to any required prior approval from the Federal Reserve, to redeem after certain dates or upon the occurrence of certain events mentioned below, the junior subordinated debentures at a redemption price equal to 100% of the principal amount, plus accrued and unpaid interest to the date of redemption. The maturity of the junior subordinated debentures may be shortened at the option of the Corporation prior to their stated maturity dates (i) on or after the stated optional redemption dates stipulated in the agreements, in whole at any time or in part from time to time, or (ii) in whole, but not in part, at any time within 90 days following the occurrence and during the continuation of a tax event, an investment company event or a capital treatment event as set forth in the indentures relating to the capital securities, in each case subject to regulatory approval.
- [6] Same as [5] above, except that the investment company event does not apply for early redemption.

Edgar Filing: POPULAR INC - Form 10-Q

- [7] The debentures are perpetual and may be redeemed by Popular at any time, subject to the consent of the Board of Governors of the Federal Reserve System.
- [8] Carrying value of junior subordinated debentures of \$ 516 million at June 30, 2013 (\$ 936 million aggregate liquidation amount, net of \$ 420 million discount) and \$ 499 million at December 31, 2012 (\$ 936 million aggregate liquidation amount, net of \$ 437 million discount).

Table of Contents

In accordance with the Federal Reserve Board guidance, the trust preferred securities represent restricted core capital elements and currently qualify as Tier 1 capital, subject to certain quantitative limits. The aggregate amount of restricted core capital elements that may be included in the Tier 1 capital of a banking organization must not exceed 25% of the sum of all core capital elements (including cumulative perpetual preferred stock and trust preferred securities). At June 30, 2013 and December 31, 2012, the Corporation's restricted core capital elements did not exceed the 25% limitation. Thus, all trust preferred securities were allowed as Tier 1 capital. Amounts of restricted core capital elements in excess of this limit generally may be included in Tier 2 capital, subject to further limitations.

In July 2013, the Board of Governors of the Federal Reserve System approved final rules (New Capital Rules) to establish a new comprehensive regulatory capital framework for all U.S. banking organizations. The New Capital Rules generally implement the Basel Committee on Banking Supervision's (the Basel Committee) December 2010 final capital framework referred to as Basel III for strengthening international capital standards and several changes to the U.S. regulatory capital regime required by the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank). The New Capital Rules require that capital instruments such as trust preferred securities be phased-out of Tier 1 capital. The Corporation's Tier I capital level at June 30, 2013, included \$ 427 million of trust preferred securities that are subject to the phase-out provisions of the New Capital Rules. The Corporation would be allowed to include only 25 percent of such trust preferred securities in Tier I capital as of January 1, 2015 and 0 percent as of January 1, 2016 and thereafter. The New Capital Rules also permanently grandfather as Tier 2 capital such trust preferred securities. The trust preferred securities issued to the U.S. Treasury pursuant to the Emergency Economic Stabilization Act of 2008 are exempt from the phase-out provision.

Table of Contents

Note 18 Stockholders equity

Reverse stock split

On May 29, 2012, the Corporation effected a 1-for-10 reverse split of its common stock previously approved by the Corporation's stockholders on April 27, 2012. Upon the effectiveness of the reverse split, each 10 shares of authorized and outstanding common stock were reclassified and combined into one new share of common stock. Popular, Inc.'s common stock began trading on a split-adjusted basis on May 30, 2012. All share and per share information in the consolidated financial statements and accompanying notes were retroactively adjusted to reflect the 1-for-10 reverse stock split.

In connection with the reverse stock split, the Corporation amended its Restated Certificate of Incorporation to reduce the number of shares of its authorized common stock from 1,700,000,000 to 170,000,000.

The reverse stock split did not affect the par value of a share of the Corporation's common stock.

At the effective date of the reverse stock split, the stated capital attributable to common stock on the Corporation's consolidated statement of financial condition was reduced by dividing the amount of the stated capital prior to the reverse stock split by 10, and the additional paid-in capital (surplus) was credited with the amount by which the stated capital was reduced. This was also reflected retroactively for prior periods presented in the financial statements.

BPPR statutory reserve

The Banking Act of the Commonwealth of Puerto Rico requires that a minimum of 10% of BPPR's net income for the year be transferred to a statutory reserve account until such statutory reserve equals the total of paid-in capital on common and preferred stock. Any losses incurred by a bank must first be charged to retained earnings and then to the reserve fund. Amounts credited to the reserve fund may not be used to pay dividends without the prior consent of the Puerto Rico Commissioner of Financial Institutions. The failure to maintain sufficient statutory reserves would preclude BPPR from paying dividends. BPPR's statutory reserve fund amounted to \$432 million at June 30, 2013 (December 31, 2012 \$432 million). There were no transfers between the statutory reserve account and the retained earnings account during the quarters and six months ended June 30, 2013 and June 30, 2012.

Table of Contents**Note 19 Other comprehensive loss**

Table of Contents**Note 20 Guarantees**

At June 30, 2013 the Corporation recorded a liability of \$0.8 million (December 31, 2012 \$0.6 million), which represents the unamortized balance of the obligations undertaken in issuing the guarantees under the standby letters of credit. Management does not anticipate any material losses related to these instruments.

From time to time, the Corporation securitized mortgage loans into guaranteed mortgage-backed securities subject to limited, and in certain instances, lifetime credit recourse on the loans that serve as collateral for the mortgage-backed securities. The Corporation has not sold any mortgage loans subject to credit recourse since 2009. At June 30, 2013 the Corporation serviced \$ 2.7 billion (December 31, 2012 \$ 2.9 billion) in residential mortgage loans subject to credit recourse provisions, principally loans associated with FNMA and FHLMC residential mortgage loan securitization programs. In the event of any customer default, pursuant to the credit recourse provided, the Corporation is required to repurchase the loan or reimburse the third party investor for the incurred loss. The maximum potential amount of future payments that the Corporation would be required to make under the recourse arrangements in the event of nonperformance by the borrowers is equivalent to the total outstanding balance of the residential mortgage loans serviced with recourse and interest, if applicable. During the quarter and six months ended June 30, 2013, the Corporation repurchased approximately \$ 36 million and \$ 66 million, respectively, of unpaid principal balance in mortgage loans subject to the credit recourse provisions (June 30, 2012 \$ 32 million for the quarter and \$ 82 million for six-months period). In the event of nonperformance by the borrower, the Corporation has rights to the underlying collateral securing the mortgage loan. The Corporation suffers ultimate losses on these loans when the proceeds from a foreclosure sale of the property underlying a defaulted mortgage loan are less than the outstanding principal balance of the loan plus any uncollected interest advanced and the costs of holding and disposing the related property. At June 30, 2013 the Corporation's liability established to cover the estimated credit loss exposure related to loans sold or serviced with credit recourse amounted to \$ 46 million (December 31, 2012 \$ 52 million).

The following table shows the changes in the Corporation's liability of estimated losses related to loans serviced with credit recourse provisions during the quarters and six-month periods ended June 30, 2013 and 2012.

(In thousands)	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Balance as of beginning of period	\$ 47,983	\$ 56,115	\$ 51,673	\$ 58,659
Additions for new sales				
Provision for recourse liability	6,688	5,330	10,785	9,562
Net charge-offs / terminations	(8,779)	(5,662)	(16,566)	(12,438)
Balance as of end of period	\$ 45,892	\$ 55,783	\$ 45,892	\$ 55,783

The estimated losses to be absorbed under the credit recourse arrangements are recorded as a liability when the loans are sold or credit recourse is assumed as part of acquired servicing rights, and are updated by accruing or reversing expense (categorized in the line item adjustments (expense) to indemnity reserves on loans sold in the consolidated statements of operations) throughout the life of the loan, as necessary, when additional relevant information becomes available. The methodology used to estimate the recourse liability is a function of the recourse arrangements given and considers a variety of factors, which include actual defaults and historical loss experience, foreclosure rate, estimated future defaults and the probability that a loan would be delinquent. Statistical methods are used to estimate the recourse liability. Expected loss rates are applied to different loan segmentations. The expected loss, which represents the amount expected to be lost on a given loan, considers the probability of default and loss severity. The probability of default represents the probability that a loan in good standing would become 90 days delinquent within the following twelve-month period. Regression analysis quantifies the relationship between the default event and loan-specific characteristics, including credit scores, loan-to-value ratios, and loan aging, among others.

When the Corporation sells or securitizes mortgage loans, it generally makes customary representations and warranties regarding the characteristics of the loans sold. The Corporation's mortgage operations in Puerto Rico group conforming mortgage loans into pools which are exchanged for FNMA and GNMA mortgage-backed securities, which are generally sold to private investors, or are sold directly to FNMA or other private investors for cash. As required under the government agency programs, quality review procedures are performed by the Corporation to ensure that asset guideline qualifications are met. To the extent the loans do not meet specified characteristics, the Corporation may be required to repurchase such loans or indemnify for losses and bear any subsequent loss related to the loans. Repurchases under BPPR's representation and warranty arrangements approximated \$ 1.0

Table of Contents

million and \$ 3.0 million, in unpaid principal balance, respectively, with losses amounting to \$ 0.1 million and \$ 0.5 million, respectively, during the quarter and six months period ended June 30, 2013 (June 30, 2012 \$ 2.1 million and \$ 2.5 million, and \$ 0.4 million and \$ 0.5 million, respectively). A substantial amount of these loans reinstate to performing status or have mortgage insurance, and thus the ultimate losses on the loans are not deemed significant.

During the quarter ended June 30, 2013, the Corporation established a reserve for certain specific representation and warranties made in connection with BPPR's sale of non-performing mortgage loans. The purchaser's sole remedy under the indemnity clause is to seek monetary damages from BPPR, for a maximum of \$16.3 million. BPPR recognized a reserve of approximately \$3.0 million, representing its best estimate of the loss that would be incurred in connection with this indemnification. BPPR's obligations under this clause end one year after the closing except to any claim asserted prior to such termination date.

During the quarter ended March 31, 2013, the Corporation established a reserve for certain specific representation and warranties made in connection with BPPR's sale of commercial and construction loans, and commercial and single family real estate owned. The purchaser's sole remedy under the indemnity clause is to seek monetary damages from BPPR, for a maximum of \$18.0 million. BPPR is not required to repurchase any of the assets. BPPR recognized a reserve of approximately \$10.7 million, representing its best estimate of the loss that would be incurred in connection with this indemnification. BPPR's obligations under this clause end one year after the closing except to any claim asserted prior to such termination date.

Also, during the quarter ended June 30, 2011, the Corporation's banking subsidiary, BPPR, reached an agreement (the June 2011 agreement) with the FDIC, as receiver for a local Puerto Rico institution, and the financial institution with respect to a loan servicing portfolio that BPPR services since 2008, related to FHLMC and GNMA pools. The loans were originated and sold by the financial institution and the servicing rights were transferred to BPPR in 2008. As part of the 2008 servicing agreement, the financial institution was required to repurchase from BPPR any loans that BPPR, as servicer, was required to repurchase from the investors under representation and warranty obligations. As part of the June 2011 agreement, the Corporation received cash to discharge the financial institution from any repurchase obligation and other claims over the serviced portfolio. At June 30, 2013, the related representation and warranty reserve amounted to \$ 7.2 million, and the related serviced portfolio approximated \$2.7 billion (December 31, 2012 \$ 7.6 million and \$2.9 billion, respectively).

The following table presents the changes in the Corporation's liability for estimated losses associated with indemnifications and representations and warranties related to loans sold by BPPR for the quarters and six months ended June 30, 2013 and 2012.

(In thousands)	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Balance as of beginning of period	\$ 17,603	\$ 8,562	\$ 7,587	\$ 8,522
Additions for new sales	3,047		13,747	
Provision for representation and warranties	415	(51)	125	246
Net charge-offs / terminations	(106)	(332)	(500)	(589)
Balance as of end of period	\$ 20,959	\$ 8,179	\$ 20,959	\$ 8,179

In addition, at June 30, 2013, the Corporation has reserves for customary representation and warranties related to loans sold by its U.S. subsidiary E-LOAN prior to 2009. These loans were sold to investors on a servicing released basis subject to certain representation and warranties. Although the risk of loss or default was generally assumed by the investors, the Corporation made certain representations relating to borrower creditworthiness, loan documentation and collateral, which if not correct, may result in requiring the Corporation to repurchase the loans or indemnify investors for any related losses associated with these loans. At June 30, 2013, the Corporation's reserve for estimated losses from such representation and warranty arrangements amounted to \$ 9 million, which was included as part of other liabilities in the consolidated statement of financial condition (December 31, 2012 \$ 8 million). E-LOAN is no longer originating and selling loans since the subsidiary ceased these activities in 2008 and most of the outstanding agreements with major counterparties were settled during 2010 and 2011. On a quarterly basis, the Corporation reassesses its estimate for expected losses associated with E-LOAN's customary representation and warranty arrangements. The analysis incorporates expectations on future disbursements based on quarterly repurchases and make-whole events. The analysis also considers factors such as the average length-time between the loan's funding date and the loan repurchase date, as observed in the historical loan data. Make-whole events are typically defaulted cases in which the investor attempts to recover by collateral or guarantees, and the seller is obligated to cover any impaired or unrecovered portion of the loan. Claims have been predominantly

Table of Contents

for first mortgage agency loans and principally consist of underwriting errors related to undisclosed debt or missing documentation. The following table presents the changes in the Corporation's liability for estimated losses associated with customary representations and warranties related to loans sold by E-LOAN for the quarters and six months periods ended June 30, 2013 and 2012.

(In thousands)	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Balance as of beginning of period	\$ 8,852	\$ 10,625	\$ 7,740	\$ 10,625
Additions for new sales

Net charge-offs / terminations	(851)	(494)	(1,004)	(494)
Balance as of end of period	\$ 8,760	\$ 10,131	\$ 8,760	\$ 10,131

Servicing agreements relating to the mortgage-backed securities programs of FNMA and GNMA, and to mortgage loans sold or serviced to certain other investors, including FHLMC, require the Corporation to advance funds to make scheduled payments of principal, interest, taxes and insurance, if such payments have not been received from the borrowers. At June 30, 2013, the Corporation serviced \$ 16.6 billion in mortgage loans for third-parties, including the loans serviced with credit recourse (December 31, 2012 \$ 16.7 billion). The Corporation generally recovers funds advanced pursuant to these arrangements from the mortgage owner, from liquidation proceeds when the mortgage loan is foreclosed or, in the case of FHA/VA loans, under the applicable FHA and VA insurance and guarantees programs. However, in the meantime, the Corporation must absorb the cost of the funds it advances during the time the advance is outstanding. The Corporation must also bear the costs of attempting to collect on delinquent and defaulted mortgage loans. In addition, if a defaulted loan is not cured, the mortgage loan would be canceled as part of the foreclosure proceedings and the Corporation would not receive any future servicing income with respect to that loan. At June 30, 2013, the outstanding balance of funds advanced by the Corporation under such mortgage loan servicing agreements was approximately \$30 million (December 31, 2012 \$19 million). To the extent the mortgage loans underlying the Corporation's servicing portfolio experience increased delinquencies, the Corporation would be required to dedicate additional cash resources to comply with its obligation to advance funds as well as incur additional administrative costs related to increases in collection efforts.

Popular, Inc. Holding Company (PIHC) fully and unconditionally guarantees certain borrowing obligations issued by certain of its wholly-owned consolidated subsidiaries amounting to \$ 0.5 billion at June 30, 2013 (December 31, 2012 \$ 0.5 billion). In addition, at June 30, 2013 and December 31, 2012, PIHC fully and unconditionally guaranteed on a subordinated basis \$ 1.4 billion of capital securities (trust preferred securities) issued by wholly-owned issuing trust entities to the extent set forth in the applicable guarantee agreement. Refer to Note 17 to the consolidated financial statements for further information on the trust preferred securities.

Table of Contents**Note 21 Commitments and contingencies***Off-balance sheet risk*

The Corporation is a party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financial needs of its customers. These financial instruments include loan commitments, letters of credit, and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, standby letters of credit and financial guarantees written is represented by the contractual notional amounts of those instruments. The Corporation uses the same credit policies in making these commitments and conditional obligations as it does for those reflected on the consolidated statements of financial condition.

Financial instruments with off-balance sheet credit risk, whose contract amounts represent potential credit risk as of the end of the periods presented were as follows:

(In thousands)	June 30, 2013	December 31, 2012
Commitments to extend credit:		
Credit card lines	\$ 4,635,095	\$ 4,379,071
Commercial lines of credit	2,289,485	2,044,382
Other unused credit commitments	358,041	351,537
Commercial letters of credit	10,140	20,634
Standby letters of credit	123,247	127,519
Commitments to originate mortgage loans	52,006	41,187

At June 30, 2013, the Corporation maintained a reserve of approximately \$5 million for potential losses associated with unfunded loan commitments related to commercial and consumer lines of credit (December 31, 2012 \$5 million).

Other commitments

At June 30, 2013, the Corporation also maintained other non-credit commitments for \$10 million, primarily for the acquisition of other investments (December 31, 2012 \$10 million).

Business concentration

Since the Corporation's business activities are currently concentrated primarily in Puerto Rico, its results of operations and financial condition are dependent upon the general trends of the Puerto Rico economy and, in particular, the residential and commercial real estate markets. The concentration of the Corporation's operations in Puerto Rico exposes it to greater risk than other banking companies with a wider geographic base. Its asset and revenue composition by geographical area is presented in Note 33 to the consolidated financial statements.

The Corporation's loan portfolio is diversified by loan category. However, approximately \$14.3 billion, or 66% of the Corporation's loan portfolio not covered under the FDIC loss sharing agreements, excluding loans held-for-sale, at June 30, 2013, consisted of real estate related loans, including residential mortgage loans, construction loans and commercial loans secured by commercial real estate (December 31, 2012 \$13.3 billion, or 64%).

Except for the Corporation's exposure to the Puerto Rico Government sector, no individual or single group of related accounts is considered material in relation to our total assets or deposits, or in relation to our overall business. At June 30, 2013, the Corporation had approximately \$0.9 billion of credit facilities granted to the Puerto Rico Government, its municipalities and public corporations, of which \$215 million were uncommitted lines of credit (December 31, 2012 \$0.8 billion and \$75 million, respectively). Of the total credit facilities granted, \$623 million was outstanding at June 30, 2013, of which \$2.2 million were uncommitted lines of credit (December 31, 2012 \$681 billion and \$61 million respectively). As part of its investment securities portfolio, the Corporation had \$201 million in obligations issued or guaranteed by the Puerto Rico Government, its municipalities and public corporations (December 31, 2012 \$217 million).

Edgar Filing: POPULAR INC - Form 10-Q

Additionally, the Corporation holds consumer mortgage loans with an outstanding balance of \$259 million at June 30, 2013 that are guaranteed by the Puerto Rico Housing Authority (December 31, 2012 \$294 million). These mortgage loans are secured by the underlying properties and the guarantees serve to cover shortfalls in collateral in the event of a borrower default.

Table of Contents

Other contingencies

As indicated in Note 9 to the consolidated financial statements, as part of the loss sharing agreements related to the Westernbank FDIC-assisted transaction, the Corporation agreed to make a true-up payment to the FDIC on the date that is 45 days following the last day of the final shared loss month, or upon the final disposition of all covered assets under the loss sharing agreements in the event losses on the loss sharing agreements fail to reach expected levels. The fair value of the true-up payment obligation was estimated at \$119 million at June 30, 2013 (December 31, 2012 \$112 million).

Legal Proceedings

The nature of Popular's business ordinarily results in a certain number of claims, litigation, investigations, and legal and administrative cases and proceedings. When the Corporation determines it has meritorious defenses to the claims asserted, it vigorously defends itself. The Corporation will consider the settlement of cases (including cases where it has meritorious defenses) when, in management's judgment, it is in the best interest of both the Corporation and its shareholders to do so.

On at least a quarterly basis, Popular assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. For matters where it is probable that the Corporation will incur a material loss and the amount can be reasonably estimated, the Corporation establishes an accrual for the loss. Once established, the accrual is adjusted on at least a quarterly basis as appropriate to reflect any relevant developments. For matters where a material loss is not probable or the amount of the loss cannot be estimated, no accrual is established.

In certain cases, exposure to loss exists in excess of the accrual to the extent such loss is reasonably possible, but not probable. Management believes and estimates that the aggregate range of reasonably possible losses (with respect to those matters where such limits may be determined, in excess of amounts accrued), for current legal proceedings ranges from \$0 to approximately \$12.4 million as of June 30, 2013. For certain other cases, management cannot reasonably estimate the possible loss at this time. Any estimate involves significant judgment, given the varying stages of the proceedings (including the fact that many of them are currently in preliminary stages), the existence of multiple defendants in several of the current proceedings whose share of liability has yet to be determined, the numerous unresolved issues in many of the proceedings, and the inherent uncertainty of the various potential outcomes of such proceedings. Accordingly, management's estimate will change from time-to-time, and actual losses may be more or less than the current estimate.

While the final outcome of legal proceedings is inherently uncertain, based on information currently available, advice of counsel, and available insurance coverage, management believes that the amount it has already accrued is adequate and any incremental liability arising from the Corporation's legal proceedings will not have a material adverse effect on the Corporation's consolidated financial position as a whole. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Corporation's consolidated financial position in a particular period.

Ongoing Class Action Litigation

Banco Popular North America is currently a defendant in one class action lawsuit arising from its consumer banking activity:

On November 21, 2012, BPNA was served with a class action complaint captioned *Valle v. Popular Community Bank* filed in the New York State Supreme Court (New York County), whereby plaintiffs (existing BPNA customers) allege, among other things, that BPNA engages in unfair and deceptive acts and trade practices relative to the assessment of overdraft fees and payment processing on consumer deposit accounts. The complaint further alleges that BPNA improperly disclosed its consumer overdraft policies and, additionally, that the overdraft rates and fees assessed by BPNA violate New York's usury laws. The complaint seeks unspecified damages, including punitive damages, interest, disbursements, and attorneys' fees and costs.

BPNA removed the case to federal court (S.D.N.Y.), and plaintiffs subsequently filed a motion to remand the action to state court which the Court has granted on August 6, 2013.

Table of Contents**Other Significant Proceedings**

As described under Note 9 "FDIC loss share asset and true-up payment obligation", in connection with the Westernbank FDIC-assisted transaction, on April 30, 2010 BPPR entered into loss share agreements with the FDIC with respect to the covered loans and other real estate owned that it acquired in the transaction. Pursuant to the terms of the loss share agreements, the FDIC's obligation to reimburse BPPR for losses with respect to covered assets begins with the first dollar of loss incurred. The FDIC reimburses BPPR for 80% of losses with respect to covered assets, and BPPR reimburses the FDIC for 80% of recoveries with respect to losses for which the FDIC paid 80% reimbursement under loss share agreements. The loss share agreement applicable to the late stage real-estate-collateral-dependent loans described below provides for FDIC loss sharing through the quarter ending June 30, 2015 and BPPR reimbursement to the FDIC through the quarter ending June 30, 2018. The loss share agreements contain specific terms and conditions regarding the management of the covered assets that BPPR must follow in order to receive reimbursement of losses from the FDIC. BPPR believes that it has complied with the terms and conditions regarding the management of the covered assets.

For the quarters ended June 30, 2010 through March 31, 2012, BPPR received reimbursement for loss-share claims submitted to the FDIC, including for charge-offs for certain late stage real-estate-collateral-dependent loans calculated in accordance with BPPR's charge-off policy for non-covered assets. When BPPR submitted its shared-loss claims related to the June 30, 2012 quarter, however, the FDIC refused to reimburse BPPR for \$71.1 million of loss-share claims because of a difference of approximately \$26.2 million related to the methodology for the computation of charge-offs for certain late stage real-estate-collateral-dependent loans. In accordance with the terms of the loss share agreements, BPPR applied a methodology for charge-offs for late stage real-estate-collateral-dependent loans that conforms with its regulatory supervisory criteria and is calculated in accordance with BPPR's charge-off policy for non-covered assets. The FDIC has stated that it believes that BPPR should use a different methodology for those charge-offs.

Subsequent to June 30, 2012, the FDIC has not accepted for reimbursement any shared-loss claims, whether or not they related to late stage real-estate-collateral-dependent loans. As a result, as of June 30, 2013, BPPR had unreimbursed shared-loss claims of \$451.1 million under the commercial loss share agreement with the FDIC relating to periods subsequent to June 30, 2012, including unreimbursed claims of approximately \$287.1 million related to late stage real-estate-collateral-dependent loans, determined in accordance with BPPR's regulatory supervisory criteria and BPPR's charge-off policy for non-covered assets, as described above. If the reimbursement amount for these claims for periods from June 30, 2012 through June 30, 2013 were calculated in accordance with the FDIC's preferred methodology for late stage real-estate-collateral-dependent loans, the amount of such claims would be reduced by approximately \$102.6 million.

BPPR's loss share agreements with the FDIC specify that disputes be submitted to arbitration before a review board under the commercial arbitration rules of the American Arbitration Association. On July 31, 2013, BPPR filed a statement of claim with the American Arbitration Association requesting that the review board determine certain matters relating to the loss-share claims under the commercial loss share agreement with the FDIC, including that the review board award BPPR the amounts owed under its unpaid quarterly certificates. The statement of claim also requests reimbursement of certain valuation adjustments for costs to sell troubled assets. The review board, which will be comprised of one arbitrator appointed by BPPR, one arbitrator appointed by the FDIC and a third arbitrator selected either by those arbitrators or by the American Arbitration Association, will be selected to consider BPPR's statement of claim and the statement of the FDIC.

To the extent we are not able to successfully resolve this matter through the arbitration process described above, a material difference could result in the timing and amount of charge-offs recorded by us and the amount of charge-offs reimbursed by the FDIC under the commercial loss share agreement. No assurance can be given that we would be able to claim reimbursement from the FDIC for such difference prior to the expiration, in the quarter ending June 30, 2015, of the FDIC's obligation to reimburse BPPR under commercial loss share agreement, which could require us to make a material adjustment to the value of our loss share asset and the related true up payment obligation to the FDIC and could have a material adverse effect on our financial results for the period in which such adjustment is taken.

Table of Contents**Note 22 Non-consolidated variable interest entities**

The Corporation is involved with four statutory trusts which it established to issue trust preferred securities to the public. Also, it established Popular Capital Trust III for the purpose of exchanging Series C preferred stock shares held by the U.S. Treasury for trust preferred securities issued by this trust. These trusts are deemed to be variable interest entities (VIEs) since the equity investors at risk have no substantial decision-making rights. The Corporation does not hold any variable interest in the trusts, and therefore, cannot be the trusts' primary beneficiary. Furthermore, the Corporation concluded that it did not hold a controlling financial interest in these trusts since the decisions of the trusts are predetermined through the trust documents and the guarantee of the trust preferred securities is irrelevant since in substance the sponsor is guaranteeing its own debt.

Also, the Corporation is involved with various special purpose entities mainly in guaranteed mortgage securitization transactions, including GNMA, FNMA and FHLMC. These special purpose entities are deemed to be VIEs since they lack equity investments at risk. The Corporation's continuing involvement in these guaranteed loan securitizations includes owning certain beneficial interests in the form of securities as well as the servicing rights retained. The Corporation is not required to provide additional financial support to any of the variable interest entities to which it has transferred the financial assets. The mortgage-backed securities, to the extent retained, are classified in the Corporation's consolidated statements of financial condition as available-for-sale or trading securities. The Corporation concluded that, essentially, these entities (FNMA, GNMA, and FHLMC) control the design of their respective VIEs, dictate the quality and nature of the collateral, require the underlying insurance, set the servicing standards via the servicing guides and can change them at will, and can remove a primary servicer with cause, and without cause in the case of FNMA and FHLMC. Moreover, through their guarantee obligations, agencies (FNMA, GNMA, and FHLMC) have the obligation to absorb losses that could be potentially significant to the VIE.

ASU 2009-17 requires that an ongoing primary beneficiary assessment should be made to determine whether the Corporation is the primary beneficiary of any of the VIEs it is involved with. The conclusion on the assessment of these trusts and guaranteed mortgage securitization transactions has not changed since their initial evaluation. The Corporation concluded that it is still not the primary beneficiary of these VIEs, and therefore, these VIEs are not required to be consolidated in the Corporation's financial statements at June 30, 2013.

The Corporation holds variable interests in these VIEs in the form of agency mortgage-backed securities and collateralized mortgage obligations, including those securities originated by the Corporation and those acquired from third parties. Additionally, the Corporation holds agency mortgage-backed securities, agency collateralized mortgage obligations and private label collateralized mortgage obligations issued by third party VIEs in which it has no other form of continuing involvement. Refer to Note 24 to the consolidated financial statements for additional information on the debt securities outstanding at June 30, 2013 and December 31, 2012, which are classified as available-for-sale and trading securities in the Corporation's consolidated statements of financial condition. In addition, the Corporation may retain the right to service the transferred loans in those government-sponsored special purpose entities (SPEs) and may also purchase the right to service loans in other government-sponsored SPEs that were transferred to those SPEs by a third-party. Pursuant to ASC Subtopic 810-10, the servicing fees that the Corporation receives for its servicing role are considered variable interests in the VIEs since the servicing fees are subordinated to the principal and interest that first needs to be paid to the mortgage-backed securities' investors and to the guaranty fees that need to be paid to the federal agencies.

The following table presents the carrying amount and classification of the assets related to the Corporation's variable interests in non-consolidated VIEs and the maximum exposure to loss as a result of the Corporation's involvement as servicer with non-consolidated VIEs at June 30, 2013 and December 31, 2012.

(In thousands)	June 30, 2013	December 31, 2012
Assets		
Servicing assets:		
Mortgage servicing rights	\$ 105,568	\$ 105,246
Total servicing assets	\$ 105,568	\$ 105,246

Edgar Filing: POPULAR INC - Form 10-Q

Total assets	\$ 106,732	\$ 106,352
Maximum exposure to loss	\$ 106,732	\$ 106,352

Table of Contents

The size of the non-consolidated VIEs, in which the Corporation has a variable interest in the form of servicing fees, measured as the total unpaid principal balance of the loans, amounted to \$9.2 billion at June 30, 2013 (December 31, 2012 \$9.2 billion).

Maximum exposure to loss represents the maximum loss, under a worst case scenario, that would be incurred by the Corporation, as servicer for the VIEs, assuming all loans serviced are delinquent and that the value of the Corporation's interests and any associated collateral declines to zero, without any consideration of recovery. The Corporation determined that the maximum exposure to loss includes the fair value of the MSRs and the assumption that the servicing advances at June 30, 2013 and December 31, 2012, will not be recovered. The agency debt securities are not included as part of the maximum exposure to loss since they are guaranteed by the related agencies.

In September of 2011, BPPR sold construction and commercial real estate loans with a fair value of \$148 million, and most of which were non-performing, to a newly created joint venture, PRLP 2011 Holdings, LLC. The joint venture is majority owned by Caribbean Property Group (CPG), Goldman Sachs & Co. and East Rock Capital LLC. The joint venture was created for the limited purpose of acquiring the loans from BPPR; servicing the loans through a third-party servicer; ultimately working out, resolving and/or foreclosing the loans; and indirectly owning, operating, constructing, developing, leasing and selling any real properties acquired by the joint venture through deed in lieu of foreclosure, foreclosure, or by resolution of any loan.

BPPR provided financing to the joint venture for the acquisition of the loans in an amount equal to the sum of 57% of the purchase price of the loans, or \$84 million, and \$2 million of closing costs, for a total acquisition loan of \$86 million (the acquisition loan). The acquisition loan has a 5-year maturity and bears a variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity's assets. In addition, BPPR provided the joint venture with a non-revolving advance facility (the advance facility) of \$68.5 million to cover unfunded commitments and costs-to-complete related to certain construction projects, and a revolving working capital line (the working capital line) of \$20 million to fund certain operating expenses of the joint venture. Cash proceeds received by the joint venture are first used to cover debt service payments for the acquisition loan, advance facility, and the working capital line described above which must be paid in full before proceeds can be used for other purposes. The distributable cash proceeds are determined based on a pro-rata basis in accordance with the respective equity ownership percentages. BPPR's equity interest in the joint venture ranks pari-passu with those of other parties involved. As part of the transaction executed in September 2011, BPPR received \$48 million in cash and a 24.9% equity interest in the joint venture. The Corporation is not required to provide any other financial support to the joint venture.

BPPR accounted for this transaction as a true sale pursuant to ASC Subtopic 860-10 and thus recognized the cash received, its equity investment in the joint venture, and the acquisition loan provided to the joint venture and derecognized the loans sold.

The Corporation has determined that PRLP 2011 Holdings, LLC is a VIE but the Corporation is not the primary beneficiary. All decisions are made by CPG (or an affiliate thereof) (the Manager), except for certain limited material decisions which would require the unanimous consent of all members. The Manager is authorized to execute and deliver on behalf of the joint venture any and all documents, contracts, certificates, agreements and instruments, and to take any action deemed necessary in the benefit of the joint venture. Also, the Manager delegates the day-to-day management and servicing of the loans to CPG Island Servicing, LLC, an affiliate of CPG, which contracted Archon, an affiliate of Goldman Sachs, to act as subservicer, but it has the responsibility to oversee such servicing responsibilities.

The Corporation holds variable interests in this VIE in the form of the 24.9% equity interest (the Investment in PRLP 2011 Holdings, LLC) and the financing provided to the joint venture. The equity interest is accounted for under the equity method of accounting pursuant to ASC Subtopic 323-10.

Table of Contents

The following table presents the carrying amount and classification of the assets and liabilities, net of eliminations, related to the Corporation's variable interests in the non-consolidated VIE, PRLP 2011 Holdings, LLC, and its maximum exposure to loss at June 30, 2013 and December 31, 2012. Refer to Note 23 for information on eliminations.

(In thousands)	June 30, 2013	December 31, 2012

Total assets	\$ 56,881	\$ 81,181
Deposits	\$ (3,178)	\$ (5,334)
Total liabilities	\$ (3,178)	\$ (5,334)
Total net assets	\$ 53,703	\$ 75,847
Maximum exposure to loss	\$ 53,703	\$ 75,847

The Corporation determined that the maximum exposure to loss under a worst case scenario at June 30, 2013 would be not recovering the carrying amount of the acquisition loan, the advances on the advance facility and working capital line, if any, and the equity interest held by the Corporation, net of the deposits.

On March 25, 2013, BPPR completed a sale of assets with a book value of \$509.0 million, of which \$500.6 million were in non-performing status, comprised of commercial and construction loans, and commercial and single family real estate owned, with a combined unpaid principal balance on loans and appraised value of other real estate owned of approximately \$987.0 million to a newly created joint venture, PR Asset Portfolio 2013-1 International, LLC. The joint venture is majority owned by Caribbean Property Group LLC (CPG) and certain affiliates of Perella Weinberg Partners Asset Based Value Strategy. The joint venture was created for the limited purpose of acquiring the loans from BPPR; servicing the loans through a third-party servicer; ultimately working out, resolving and/or foreclosing the loans; and indirectly owning, operating, constructing, developing, leasing and selling any real properties acquired by the joint venture through deed in lieu of foreclosure, foreclosure, or by resolution of any loan.

BPPR provided financing to the joint venture for the acquisition of the assets in an amount equal to the sum of 57% of the purchase price of the assets, and closing costs, for a total acquisition loan of \$182.4 million (the acquisition loan). The acquisition loan has a 5-year maturity and bears a variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity's assets. In addition, BPPR provided the joint venture with a non-revolving advance facility (the advance facility) of \$35.0 million to cover unfunded commitments and costs-to-complete related to certain construction projects, and a revolving working capital line (the working capital line) of \$30.0 million to fund certain operating expenses of the joint venture. Cash proceeds received by the joint venture are first used to cover debt service payments for the acquisition loan, advance facility, and the working capital line described above which must be paid in full before proceeds can be used for other purposes. The distributable cash proceeds are determined based on a pro-rata basis in accordance with the respective equity ownership percentages. BPPR's equity interest in the joint venture ranks pari-passu with those of other parties involved. As part of the transaction executed in March 2013, BPPR received \$92.3 million in cash and a 24.9% equity interest in the joint venture. The Corporation is not required to provide

Edgar Filing: POPULAR INC - Form 10-Q

any other financial support to the joint venture.

BPPR accounted for this transaction as a true sale pursuant to ASC Subtopic 860-10 and thus recognized the cash received, its equity investment in the joint venture, and the acquisition loan provided to the joint venture and derecognized the loans and real estate owned sold.

The Corporation has determined that PR Asset Portfolio 2013-1 International, LLC is a VIE but the Corporation is not the primary beneficiary. All decisions are made by CPG (or an affiliate thereof) (the Manager), except for certain limited material decisions

Table of Contents

which would require the unanimous consent of all members. The Manager is authorized to execute and deliver on behalf of the joint venture any and all documents, contracts, certificates, agreements and instruments, and to take any action deemed necessary in the benefit of the joint venture. Also, the Manager delegates the day-to-day management and servicing of the loans to PR Asset Portfolio Servicing International, LLC, an affiliate of CPG.

The initial fair value of the Corporation's equity interest in the joint venture was determined based on the fair value of the loans and real estate owned transferred to the joint venture of \$306 million which represented the purchase price of the loans agreed by the parties and was an arm's-length transaction between market participants in accordance with ASC Topic 820, reduced by the acquisition loan provided by BPPR to the joint venture, for a total net equity of \$124 million. Accordingly, the 24.9% equity interest held by the Corporation was valued at \$31 million. Thus, the fair value of the equity interest is considered a Level 2 fair value measurement since the inputs were based on observable market inputs.

The Corporation holds variable interests in this VIE in the form of the 24.9% equity interest (the Investment in PR Asset Portfolio 2013-1 International, LLC) and the financing provided to the joint venture. The equity interest is accounted for under the equity method of accounting pursuant to ASC Subtopic 323-10.

The following table presents the carrying amount and classification of the assets and liabilities, net of eliminations, related to the Corporation's variable interests in the non-consolidated VIE, PR Asset Portfolio 2013-1 International, LLC, and its maximum exposure to loss at June 30, 2013. Refer to Note 23 for information on eliminations.

(In thousands)	June 30, 2013
Assets	
Loans held-in-portfolio:	
Acquisition loan	\$ 136,997
Advances under the working capital line	795
Total loans held-in-portfolio	\$ 137,792

The Corporation determined that the maximum exposure to loss under a worst case scenario at June 30, 2013 would be not recovering the carrying amount of the acquisition loan, the advances on the advance facility and working capital line, if any, and the equity interest held by the Corporation, net of the deposits.

Table of Contents**Note 23 Related party transactions with affiliated company / joint venture****EVERTEC**

On September 30, 2010, the Corporation completed the sale of a 51% majority interest in EVERTEC, Inc. (EVERTEC) to an unrelated third-party, including the Corporation's merchant acquiring and processing and technology businesses (the EVERTEC transaction), and retained a 49% ownership interest in Carib Holdings, the holding company of EVERTEC. EVERTEC continues to provide various processing and information technology services to the Corporation and its subsidiaries and gives BPPR access to the ATH network owned and operated by EVERTEC. The investment in EVERTEC is accounted for under the equity method and is evaluated for impairment if events or circumstances indicate that a decrease in value of the investment has occurred that is other than temporary. Refer to Note 30 Related party transactions to the consolidated financial statements included in the Corporation's 2012 Annual Report for details on this sale to an unrelated third-party.

On April 12, 2013, EVERTEC, Inc. completed an initial public offering (IPO) of 28.8 million shares of common stock, generating proceeds of approximately \$575.8 million. In connection with the IPO, EVERTEC sold 6.3 million shares of newly issued common stock and Apollo Global Management LLC (Apollo) and Popular sold 13.7 million and 8.8 million shares of EVERTEC retaining stakes of 29.1% and 33.5%, respectively. As of quarter-end, Popular's stake in EVERTEC was reduced to 32.4% due to exercise by EVERTEC's management of certain stock options that became fully vested as a result of the IPO. A portion of the proceeds received by EVERTEC from the IPO was used to repay and refinance its outstanding debt. In connection with the refinancing, Popular received payment in full for its portion of the EVERTEC debt held by it at that time. As a result of these transactions, Popular recognized an after-tax gain of approximately \$156.6 million during the second quarter of 2013. As of June 30, 2013, Popular's investment in EVERTEC has a book value of \$63.6 million, before intra-company eliminations.

The Corporation did not receive any capital distribution during the six months ended June 30, 2013 from its investments in EVERTEC's holding company. During the six months ended June 30, 2012, the Corporation received net capital distributions of \$131 million from its investments in EVERTEC's holding company, which included \$1.4 million in dividend distributions. The Corporation's equity in EVERTEC, including the impact of intra-company eliminations, is presented in the table which follows and is included as part of other assets in the consolidated statements of financial condition.

(In thousands)	June 30, 2013	December 31, 2012
Equity investment in EVERTEC	\$ 63,598	\$ 73,916
Intra-company eliminations (detailed in next table)	(13,443)	27,209
Equity investment in EVERTEC, net of eliminations	\$ 50,155	\$ 101,125

The Corporation had the following financial condition accounts outstanding with EVERTEC at June 30, 2013 and December 31, 2012. Items that represent liabilities to the Corporation are presented with parenthesis. The 67.6% majority interest represents the share of transactions with the affiliate that is not eliminated in the consolidation of the Corporation's statements of financial condition at June 30, 2013 (December 31, 2012 51.5%).

Table of Contents

At December 31, 2012, EVERTEC had certain performance bonds outstanding, which were guaranteed by the Corporation under a general indemnity agreement between the Corporation and the insurance companies issuing the bonds. EVERTEC's performance bonds guaranteed by the Corporation amounted to approximately \$ 1.0 million at December 31, 2012 and expired during the quarter ended June 30, 2013. Also, EVERTEC has a letter of credit issued by BPPR, for an amount of \$3.6 million at June 30, 2013 (December 31, 2012 \$2.9 million). As part of the merger agreement, the Corporation also agreed to maintain outstanding this letter of credit for a 5-year period. EVERTEC and the Corporation entered into a Reimbursement Agreement, in which EVERTEC will reimburse the Corporation for any losses incurred by the Corporation in connection with the performance bonds and the letter of credit. Possible losses resulting from these agreements are considered insignificant.

During the second quarter of 2013, the Corporation discontinued the elimination of its proportionate ownership share of intercompany transactions with EVERTEC from their respective revenue and expense categories to reflect them as an equity pick-up adjustment in other operating income. The consolidated statements of operations for all periods presented have been adjusted to reflect this change. This change had no impact on the Corporation's net income and did not have a material effect on its consolidated financial statements. The following tables present the impact of the change in the Corporation's results for all comparative prior period presented.

(In thousands)	Quarter ended June 30, 2013	Six months ended June 30, 2013

Table of Contents**Note 24 Fair value measurement**

ASC Subtopic 820-10 Fair Value Measurements and Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels in order to increase consistency and comparability in fair value measurements and disclosures. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date. Valuation on these instruments does not necessitate a significant degree of judgment since valuations are based on quoted prices that are readily available in an active market.

Level 2 Quoted prices other than those included in Level 1 that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or that can be corroborated by observable market data for substantially the full term of the financial instrument.

Level 3 Inputs are unobservable and significant to the fair value measurement. Unobservable inputs reflect the Corporation's own assumptions about assumptions that market participants would use in pricing the asset or liability.

The Corporation maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Fair value is based upon quoted market prices when available. If listed prices or quotes are not available, the Corporation employs internally-developed models that primarily use market-based inputs including yield curves, interest rates, volatilities, and credit curves, among others. Valuation adjustments are limited to those necessary to ensure that the financial instrument's fair value is adequately representative of the price that would be received or paid in the marketplace. These adjustments include amounts that reflect counterparty credit quality, the Corporation's credit standing, constraints on liquidity and unobservable parameters that are applied consistently. There have been no changes in the Corporation's methodologies used to estimate the fair value of assets and liabilities since December 31, 2012. Refer to the Critical Accounting Policies / Estimates in the 2012 Annual Report for additional information on the accounting guidance and the Corporation's policies or procedures related to fair value measurements.

The estimated fair value may be subjective in nature and may involve uncertainties and matters of significant judgment for certain financial instruments. Changes in the underlying assumptions used in calculating fair value could significantly affect the results.

Fair Value on a Recurring and Nonrecurring Basis

The following fair value hierarchy tables present information about the Corporation's assets and liabilities measured at fair value on a recurring basis at June 30, 2013 and December 31, 2012 and on a nonrecurring basis in periods subsequent to initial recognition for the six months ended June 30, 2013 and 2012:

- [1] Relates mostly to certain impaired collateral dependent loans. The impairment was measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC Section 310-10-35.
- [2] Relates to lower of cost or fair value adjustments on loans held-for-sale and loans transferred from loans held-in-portfolio to loans held-for-sale.
- [3] Represents the fair value of foreclosed real estate and other collateral owned that were written down to their fair value. Costs to sell excluded from the reported fair value amount were \$5 million at June 30, 2012.
- [4] Represents the fair value of long-lived assets held-for-sale that were written down to their fair value.

Table of Contents

The following tables present the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the quarters and six months ended June 30, 2013 and 2012.

(In thousands)	Quarter ended June 30, 2013				Mortgage servicing rights	Total assets	Contingent consideration	Total liabilities
	MBS classified as investment securities available-for-sale	CMOs classified as trading account securities	MBS classified as trading account securities	Other securities classified as trading account securities

There were no transfers in and / or out of Level 1, Level 2, or Level 3 for financial instruments measured at fair value on a recurring basis during the quarters ended June 30, 2013 and 2012, and six months ended June 30, 2013. There were no transfers in and / or out of Level 1 for financial instruments measured at fair value on a recurring basis during the six months ended June 30, 2012. There were \$ 2 million in transfers from Level 2 to Level 3 and \$ 8 million in transfers from Level 3 to Level 2 for financial instruments measured at fair value on a recurring basis during the six months ended June 30, 2012. The transfers from Level 2 to Level 3 of trading mortgage-backed securities were the result of a change in valuation technique to a matrix pricing model, based on indicative prices provided by brokers. The transfers from Level 3 to Level 2 of trading mortgage-backed securities resulted from observable market data becoming available for these securities. The Corporation's policy is to recognize transfers as of the end of the reporting period.

Gains and losses (realized and unrealized) included in earnings for the quarter and six months ended June 30, 2013 and 2012 for Level 3 assets and liabilities included in the previous tables are reported in the consolidated statement of operations as follows:

(In thousands)	Quarter ended June 30, 2013		Six months ended June 30, 2013	
	Total gains (losses) included in earnings	Changes in unrealized gains (losses) relating to assets still held at reporting date	Total gains (losses) included in earnings	Changes in unrealized gains (losses) relating to assets still held at reporting date

The following table includes quantitative information about significant unobservable inputs used to derive the fair value of Level 3 instruments, excluding those instruments for which the unobservable inputs were not developed by the Corporation such as prices of prior transactions and/or unadjusted third-party pricing sources.

(In thousands)	Fair Value at June 30, 2013	Valuation Technique	Unobservable Inputs	Weighted Average (Range)
Collateralized mortgage obligations trading	\$ 1,653	Discounted cash flow model	Weighted average life Yield Constant prepayment rate	2.4 years (0.1 5.3 years) 4.1% (0.4% 4.7%) 26.3% (23.0% 27.6%)
Other trading	\$ 1,006	Discounted cash flow model	Weighted average life Yield Constant prepayment rate	5.6 years 12.2% 10.8%
Mortgage servicing rights	\$ 153,444	Discounted cash flow model	Prepayment speed Weighted average life Discount rate	8.9% (5.4% 25.1%) 11.2 years (4.0 18.7 years) 11.9% (10.0% 15.5%)
Contingent consideration	\$ (119,253)	Discounted cash flow model	Credit loss rate on covered loans Risk premium component of discount rate	17.7% (0.0% 100.0%) 4.4%
Loans held-in-portfolio	\$ 36,330 [1]	External Appraisal	Haircut applied on external appraisals	20.5% (10.0% 38.3%)
Other real estate owned	\$ 30,406 [2]	External Appraisal	Haircut applied on external appraisals	28.4% (12.0% 40.0%)

[1] Loans held-in-portfolio in which haircuts were not applied to external appraisals were excluded from this table.

[2] Other real estate owned in which haircuts were not applied to external appraisals were excluded from this table.

The significant unobservable inputs used in the fair value measurement of the Corporation's collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as other), which are classified in the trading category, are yield, constant prepayment rate, and weighted average life. Significant increases (decreases) in any of those inputs in isolation would result in significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the constant prepayment rate will generate a directionally opposite change in the weighted average life. For example, as the average life is reduced by a higher constant prepayment rate, a lower yield will be realized, and when there is a reduction in the constant prepayment rate, the average life of these collateralized mortgage obligations will extend, thus resulting in a higher yield. These particular financial instruments are valued internally by the Corporation's investment banking and broker-dealer unit utilizing internal valuation techniques. The unobservable inputs incorporated into the internal discounted cash flow models used to derive the fair value of collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as other), which are classified in the trading category, are reviewed by the Corporation's Corporate Treasury unit on a quarterly basis. In the case of Level 3 financial instruments which fair value is based on broker quotes, the Corporation's Corporate Treasury unit reviews the inputs used by the broker-dealers for reasonableness utilizing information available from other published sources and validates that the fair value measurements were developed in accordance with ASC Topic 820. The Corporate Treasury unit also substantiates the inputs used by validating the prices with other broker-dealers, whenever possible.

Table of Contents

The significant unobservable inputs used in the fair value measurement of the Corporation's mortgage servicing rights are constant prepayment rates and discount rates. Increases in interest rates may result in lower prepayments. Discount rates vary according to products and / or portfolios depending on the perceived risk. Increases in discount rates result in a lower fair value measurement. The Corporation's Corporate Comptroller's unit is responsible for determining the fair value of MSR's, which is based on discounted cash flow methods based on assumptions developed by an external service provider, except for prepayment speeds, which are adjusted internally for the local market based on historical experience. The Corporation's Corporate Treasury unit validates the economic assumptions developed by the external service provider on a quarterly basis. In addition, an analytical review of prepayment speeds is performed quarterly by the Corporate Comptroller's unit. Significant variances in prepayment speeds are investigated by the Corporate Treasury unit. The Corporation's MSR Committee analyzes changes in fair value measurements of MSR's and approves the valuation assumptions at each reporting period. Changes in valuation assumptions must also be approved by the MSR Committee. The fair value of MSR's are compared with those of the external service provider on a quarterly basis in order to validate if the fair values are within the materiality thresholds established by management to monitor and investigate material deviations. Back-testing is performed to compare projected cash flows with actual historical data to ascertain the reasonability of the projected net cash flow results.

Table of Contents**Note 25 Fair value of financial instruments**

The fair value of financial instruments is the amount at which an asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on the type of financial instrument and relevant market information. Many of these estimates involve various assumptions and may vary significantly from amounts that could be realized in actual transactions.

The information about the estimated fair values of financial instruments presented hereunder excludes all nonfinancial instruments and certain other specific items.

For those financial instruments with no quoted market prices available, fair values have been estimated using present value calculations or other valuation techniques, as well as management's best judgment with respect to current economic conditions, including discount rates, estimates of future cash flows, and prepayment assumptions.

The fair values reflected herein have been determined based on the prevailing interest rate environment at June 30, 2013 and December 31, 2012, as applicable. In different interest rate environments, fair value estimates can differ significantly, especially for certain fixed rate financial instruments. In addition, the fair values presented do not attempt to estimate the value of the Corporation's fee generating businesses and anticipated future business activities, that is, they do not represent the Corporation's value as a going concern. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Corporation.

Following is a description of the Corporation's valuation methodologies and inputs used to estimate the fair values for each class of financial assets and liabilities not measured at fair value, but for which the fair value is disclosed. The disclosure requirements exclude certain financial instruments and all non-financial instruments. Accordingly, the aggregate fair value amounts of the financial instruments disclosed do not represent management's estimate of the underlying value of the Corporation. For a description of the valuation methodologies and inputs used to estimate the fair value for each class of financial assets and liabilities measured at fair value, refer to the Critical Accounting Policies / Estimates in the 2012 Annual Report.

Cash and due from banks

Cash and due from banks include cash on hand, cash items in process of collection, and non-interest bearing deposits due from other financial institutions. The carrying amount of cash and due from banks is a reasonable estimate of its fair value. Cash and due from banks are classified as Level 1.

Money market investments

Investments in money market instruments include highly liquid instruments with an average maturity of three months or less. For this reason, they carry a low risk of changes in value as a result of changes in interest rates, and the carrying amount approximates their fair value. Money market investments include federal funds sold, securities purchased under agreements to resell, time deposits with other banks, and cash balances, including those held at the Federal Reserve. These money market investments are classified as Level 2, except for cash balances which generate interest, including those held at the Federal Reserve, which are classified as Level 1.

Investment securities held-to-maturity

Obligations of Puerto Rico, States and political subdivisions: Municipal bonds include Puerto Rico public municipalities debt and bonds collateralized by second mortgages under the Home Purchase Stimulus Program. Puerto Rico public municipalities debt was valued internally based on benchmark treasury notes and a credit spread derived from comparable Puerto Rico government trades and recent issuances. Puerto Rico public municipalities debt is classified as Level 3. Given that the fair value of municipal bonds collateralized by second mortgages was based on internal yield and prepayment speed assumptions, these municipal bonds are classified as Level 3.

Agency collateralized mortgage obligation: The fair value of the agency collateralized mortgage obligation (CMO), which is guaranteed by GNMA, was based on internal yield and prepayment speed assumptions. This agency CMO is classified as Level 3.

Edgar Filing: POPULAR INC - Form 10-Q

Other: Other securities include foreign and corporate debt. Given that the fair value was based on quoted prices for similar instruments, foreign debt is classified as Level 2. The fair value of corporate debt, which is collateralized by municipal bonds of Puerto Rico, was internally derived from benchmark treasury notes and a credit spread based on comparable Puerto Rico government trades, similar securities, and/or recent issuances. Corporate debt is classified as Level 3.

Table of Contents*Other investment securities*

Federal Home Loan Bank capital stock: Federal Home Loan Bank (FHLB) capital stock represents an equity interest in the FHLB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the excess stock is repurchased by the FHLB at its par value, the carrying amount of FHLB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Federal Reserve Bank capital stock: Federal Reserve Bank (FRB) capital stock represents an equity interest in the FRB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the canceled stock is repurchased by the FRB for the amount of the cash subscription paid, the carrying amount of FRB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Trust preferred securities: These securities represent the equity-method investment in the common stock of these trusts. Book value is the same as fair value for these securities since the fair value of the junior subordinated debentures is the same amount as the fair value of the trust preferred securities issued to the public. The equity-method investment in the common stock of these trusts is classified as Level 2, except for that of Popular Capital Trust III (Troubled Asset Relief Program) which is classified as Level 3. Refer to Note 17 for additional information on these trust preferred securities.

Other investments: Other investments include private equity method investments and Visa Class B common stock held by the Corporation. Since there are no observable market values, private equity method investments are classified as Level 3. The Visa Class B common stock was priced by applying the quoted price of Visa Class A common stock, net of a liquidity adjustment, to the as converted number of Class A common shares since these Class B common shares are restricted and not convertible to Class A common shares until pending litigation is resolved. Thus, these stocks are classified as Level 3.

Loans held-for-sale

The fair value of certain impaired loans held-for-sale was based on a discounted cash flow model that assumes that no principal payments are received prior to the effective average maturity date, that the outstanding unpaid principal balance is reduced by a monthly net loss rate, and that the remaining unpaid principal balance is received as a lump sum principal payment at the effective average maturity date. The remaining unpaid principal balance expected to be received, which is based on the prior 12-month cash payment experience of these loans and their expected collateral recovery, was discounted using the interest rate currently offered to clients for the origination of comparable loans. These loans were classified as Level 3. As of June 30, 2013, no loans were valued under this methodology. For loans held-for-sale originated with the intent to sell in the secondary market, its fair value was determined using similar characteristics of loans and secondary market prices assuming the conversion to mortgage-backed securities. Given that the valuation methodology uses internal assumptions based on loan level data, these loans are classified as Level 3. The fair value of certain other loans held-for-sale is based on bids received from potential buyers; binding offers; or external appraisals, net of internal adjustments and estimated costs to sell. Loans held-for-sale based on binding offers are classified as Level 2. Loans held-for-sale based on indicative offers and/or external appraisals are classified as Level 3.

Loans held-in-portfolio

The fair values of the loans held-in-portfolio have been determined for groups of loans with similar characteristics. Loans were segregated by type such as commercial, construction, residential mortgage, consumer, and credit cards. Each loan category was further segmented based on loan characteristics, including interest rate terms, credit quality and vintage. Generally, fair values were estimated based on an exit price by discounting expected cash flows for the segmented groups of loans using a discount rate that considers interest, credit and expected return by market participant under current market conditions. Additionally, prepayment, default and recovery assumptions have been applied in the mortgage loan portfolio valuations. Generally accepted accounting principles do not require a fair valuation of the lease financing portfolio, therefore it is included in the loans total at its carrying amount. Loans held-in-portfolio are classified as Level 3.

Table of Contents

FDIC loss share asset

Fair value of the FDIC loss share asset was estimated using projected net losses related to the loss sharing agreements, which are expected to be reimbursed by the FDIC. The projected net losses were discounted using the U.S. Government agency curve. The loss share asset is classified as Level 3.

Deposits

Demand deposits: The fair value of demand deposits, which have no stated maturity, was calculated based on the amount payable on demand as of the respective dates. These demand deposits include non-interest bearing demand deposits, savings, NOW, and money market accounts. Thus, these deposits are classified as Level 2.

Time deposits: The fair value of time deposits was calculated based on the discounted value of contractual cash flows using interest rates being offered on time deposits with similar maturities. The non-performance risk was determined using internally-developed models that consider, where applicable, the collateral held, amounts insured, the remaining term, and the credit premium of the institution. For certain 5-year certificates of deposit in which customers may withdraw their money anytime with no penalties or charges, the fair value of these certificates of deposit incorporate an early cancellation estimate based on historical experience. Time deposits are classified as Level 2.

Assets sold under agreements to repurchase

Securities sold under agreements to repurchase (structured and non-structured): Securities sold under agreements to repurchase with short-term maturities approximate fair value because of the short-term nature of those instruments. Resell and repurchase agreements with long-term maturities were valued using discounted cash flows based on the three-month LIBOR. In determining the non-performance credit risk valuation adjustment, the collateralization levels of these long-term securities sold under agreements to repurchase were considered. In the case of callable structured repurchase agreements, the callable feature is not considered when determining the fair value of those repurchase agreements, since there is a remote possibility, based on forward rates, that the investor will call back these agreements before maturity since it is not expected that the interest rates would rise more than the specified interest rate of these agreements. Securities sold under agreements to repurchase (structured and non-structured) are classified as Level 2.

Other short-term borrowings

The carrying amount of other short-term borrowings approximate fair value because of the short-term maturity of those instruments or because they carry interest rates which approximate market. Thus, these other short-term borrowings are classified as Level 2.

Notes payable

FHLB advances: The fair value of FHLB advances was based on the discounted value of contractual cash flows over their contractual term. In determining the non-performance credit risk valuation adjustment, the collateralization levels of these advances were considered. These advances are classified as Level 2.

Medium-term notes: The fair value of publicly-traded medium-term notes was determined using recent trades of similar transactions. Publicly-traded medium-term notes are classified as Level 2. The fair value of non-publicly traded debt was based on remaining contractual cash outflows, discounted at a rate commensurate with the non-performance credit risk of the Corporation, which is subjective in nature. Non-publicly traded debt is classified as Level 3.

Edgar Filing: POPULAR INC - Form 10-Q

Junior subordinated deferrable interest debentures (related to trust preferred securities): The fair value of junior subordinated interest debentures was determined using recent trades of similar transactions. Thus, these junior subordinated deferrable interest debentures are classified as Level 2.

Junior subordinated deferrable interest debentures (Troubled Asset Relief Program): The fair value of junior subordinated deferrable interest debentures was based on the discounted value of contractual cash flows over their contractual term. The discount rate was based on the rate at which a similar security was priced in the open market. Thus, these junior subordinated deferrable interest debentures are classified as Level 3.

Others: The other category includes capital lease obligations. Generally accepted accounting principles do not require a fair valuation of capital lease obligations, therefore; it is included at its carrying amount. Capital lease obligations are classified as Level 3.

Table of Contents*Commitments to extend credit and letters of credit*

Commitments to extend credit were valued using the fees currently charged to enter into similar agreements. For those commitments where a future stream of fees is charged, the fair value was estimated by discounting the projected cash flows of fees on commitments. Since the fair value of commitments to extend credit varies depending on the undrawn amount of the credit facility, fees are subject to constant change, and cash flows are dependent on the creditworthiness of borrowers, commitments to extend credit are classified as Level 3. The fair value of letters of credit was based on fees currently charged on similar agreements. Given that the fair value of letters of credit constantly vary due to fees being subject to constant change and whether the fees are received depends on the creditworthiness of the account parties, letters of credit are classified as Level 3.

The following tables present the carrying or notional amounts, as applicable, and estimated fair values for financial instruments with their corresponding level in the fair value hierarchy.

(In thousands)	Carrying amount	June 30, 2013			Fair value
		Level 1	Level 2	Level 3

Table of Contents**Note 26 Net income per common share**

The following table sets forth the computation of net income per common share (EPS), basic and diluted, for the quarters and six months ended June 30, 2013 and 2012:

(In thousands, except per share information)	Quarter ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Net income	\$ 327,468	\$ 65,739	\$ 207,161	\$ 114,147
Preferred stock dividends	(931)	(930)	(1,861)	(1,861)
Net income applicable to common stock	\$ 326,537	\$ 64,809	\$ 205,300	\$ 112,286
Average common shares outstanding	102,620,295	102,295,113	102,642,329	102,318,459
Average potential dilutive common shares	297,052	115,505	315,407	161,071
Average common shares outstanding assuming dilution	102,917,347	102,410,618	102,957,736	102,479,530
Basic EPS	\$ 3.18	\$ 0.63	\$ 2.00	\$ 1.10
Diluted EPS	\$ 3.17	\$ 0.63	\$ 1.99	\$ 1.10

Potential common shares consist of common stock issuable under the assumed exercise of stock options and restricted stock awards using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from exercise, in addition to the amount of compensation cost attributed to future services, are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Warrants, stock options, and restricted stock awards that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect in earnings per common share.

For the quarter and six months ended June 30, 2013, there were 103,291 and 104,266 weighted average antidilutive stock options outstanding, respectively (June 30, 2012 166,215 and 167,215). Additionally, the Corporation has outstanding a warrant issued to the U.S. Treasury to purchase 2,093,284 shares of common stock, which had an antidilutive effect at June 30, 2013.

Table of Contents**Note 27 Other service fees**

Sale and administration of investment products	10,243	9,645	18,960	18,534
Mortgage servicing fees, net of fair value adjustments	6,191	6,335	11,822	19,266
Trust fees	4,154	4,069	8,612	8,150
Processing fees		1,639		3,413
Other fees	4,878	4,597	9,641	8,847
Total other services fees	\$ 65,073	\$ 64,987	\$ 126,797	\$ 133,894

Note 28 FDIC loss share (expense) income

The caption of FDIC loss share (expense) income in the consolidated statements of operations consists of the following major categories:

(In thousands)	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Amortization of loss share indemnification asset	\$ (38,557)	\$ (37,413)	\$ (78,761)	\$ (66,788)
80% mirror accounting on credit impairment losses ^[1]	25,338	29,426	39,383	42,848
80% mirror accounting on reimbursable expenses	12,131	10,775	19,914	13,042
80% mirror accounting on amortization of contingent liability on unfunded commitments	(193)	(248)	(386)	(496)
Change in true-up payment obligation	(476)	(236)	(7,251)	(1,858)
Other	(1,998)	271	(2,920)	572
Total FDIC loss share (expense) income	\$ (3,755)	\$ 2,575	\$ (30,021)	\$ (12,680)

- [1] Reductions in expected cash flows for ASC 310-30 loans, which may impact the provision for loan losses, may consider reductions in both principal and interest cash flow expectations. The amount covered under the FDIC loss sharing agreements for interest not collected from borrowers is limited under the agreements (approximately 90 days); accordingly, these amounts are not subject fully to the 80% mirror accounting.

Table of Contents**Note 29 Pension and postretirement benefits**

The Corporation has a non-contributory defined benefit pension plan and supplementary pension benefit restoration plans for regular employees of certain of its subsidiaries. The accrual of benefits under the plans is frozen to all participants.

The components of net periodic pension cost for the periods presented were as follows:

(In thousands)	Pension Plan		Benefit Restoration Plans	
	Quarters ended June 30,		Quarters ended June 30,	
	2013	2012	2013	2012
Interest Cost	\$ 6,966	\$ 7,495	\$ 373	\$ 393
Expected return on plan assets	(10,804)	(9,810)	(542)	(526)
Amortization of net loss	5,363	5,426	333	323
Total net periodic pension cost (benefit)	\$ 1,525	\$ 3,111	\$ 164	\$ 190

(In thousands)	Pension Plans		Benefit Restoration Plans	
	Six months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Interest Cost	\$ 13,932	\$ 14,990	\$ 746	\$ 786
Expected return on plan assets	(21,608)	(19,620)	(1,083)	(1,052)
Amortization of net loss	10,726	10,852	666	646
Total net periodic pension cost (benefit)	\$ 3,050	\$ 6,222	\$ 329	\$ 380

The Corporation did not make any contributions to the pension and benefit restoration plans during the quarter ended June 30, 2013. The total contributions expected to be paid during the year 2013 for the pension and benefit restoration plans amount to approximately \$51 thousand.

The Corporation also provides certain postretirement health care benefits for retired employees of certain subsidiaries. The table that follows presents the components of net periodic postretirement benefit cost.

(In thousands)	Postretirement Benefit Plan			
	Quarters ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Service cost	\$ 564	\$ 548	\$ 1,128	\$ 1,096
Interest cost	1,712	1,950	3,424	3,900
Amortization of prior service cost		(50)		(100)
Amortization of net loss	473	540	946	1,080
Total net periodic postretirement benefit cost	\$ 2,749	\$ 2,988	\$ 5,498	\$ 5,976

Contributions made to the postretirement benefit plan for the quarter ended June 30, 2013 amounted to approximately \$1.8 million. The total contributions expected to be paid during the year 2013 for the postretirement benefit plan amount to approximately \$6.8 million.

Table of Contents**Note 30 Stock-based compensation**

The Corporation maintained a Stock Option Plan (the "Stock Option Plan"), which permitted the granting of incentive awards in the form of qualified stock options, incentive stock options, or non-statutory stock options of the Corporation. In April 2004, the Corporation's shareholders adopted the Popular, Inc. 2004 Omnibus Incentive Plan (the "Incentive Plan"), which replaced and superseded the Stock Option Plan. The adoption of the Incentive Plan did not alter the original terms of the grants made under the Stock Option Plan prior to the adoption of the Incentive Plan.

Stock Option Plan

Employees and directors of the Corporation or any of its subsidiaries were eligible to participate in the Stock Option Plan. The Board of Directors or the Compensation Committee of the Board had the absolute discretion to determine the individuals that were eligible to participate in the Stock Option Plan. This plan provided for the issuance of Popular, Inc.'s common stock at a price equal to its fair market value at the grant date, subject to certain plan provisions. The shares are to be made available from authorized but unissued shares of common stock or treasury stock. The Corporation's policy has been to use authorized but unissued shares of common stock to cover each grant. The maximum option term is ten years from the date of grant. Unless an option agreement provides otherwise, all options granted are 20% exercisable after the first year and an additional 20% is exercisable after each subsequent year, subject to an acceleration clause at termination of employment due to retirement.

(Not in thousands)

Exercise price range per share	Options outstanding	Weighted-average exercise price of options outstanding	Weighted-average remaining life of options outstanding in years	Options exercisable (fully vested)	Weighted-average exercise price of options exercisable
\$185.00 \$ 185.00	1,536	\$ 185.00	0.11	1,536	\$ 185.00
\$201.75 \$ 272.00	101,755	\$ 253.34	1.02	101,755	\$ 253.34
\$185.00 \$ 272.00	103,291	\$ 252.32	1.01	103,291	\$ 252.32

There was no intrinsic value of options outstanding and exercisable at June 30, 2013 and 2012.

The following table summarizes the stock option activity and related information:

(Not in thousands)	Options Outstanding	Weighted-Average Exercise Price
Outstanding at December 31, 2011	206,946	\$ 207.83
Granted		
Exercised		
Forfeited		
Expired	(45,960)	155.68
Outstanding at December 31, 2012	160,986	\$ 222.71
Granted		
Exercised		
Forfeited		
Expired	(57,695)	169.70
Outstanding at June 30, 2013	103,291	\$ 252.32

There was no stock option expense recognized for the quarters and six months ended June 30, 2013 and 2012.

Incentive Plan

Edgar Filing: POPULAR INC - Form 10-Q

The Incentive Plan permits the granting of incentive awards in the form of Annual Incentive Awards, Long-term Performance Unit Awards, Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Units or Performance Shares. Participants in the Incentive Plan are designated by the Compensation Committee of the Board of Directors (or its delegate as determined by the Board). Employees and directors of the Corporation and/or any of its subsidiaries are eligible to participate in the Incentive Plan.

Table of Contents

Under the Incentive Plan, the Corporation has issued restricted shares, which become vested based on the employees' continued service with Popular. Unless otherwise stated in an agreement, the compensation cost associated with the shares of restricted stock is determined based on a two-prong vesting schedule. The first part is vested ratably over five years commencing at the date of grant and the second part is vested at termination of employment after attainment of 55 years of age and 10 years of service. The five-year vesting part is accelerated at termination of employment after attaining 55 years of age and 10 years of service. The restricted shares granted consistent with the requirements of the Troubled Asset Relief Program (TARP) Interim Final Rule vest in two years from grant date.

The following table summarizes the restricted stock activity under the Incentive Plan for members of management.

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2011	241,934	\$ 31.98
Granted	359,427	17.72
Vested	(96,353)	37.61
Forfeited	(13,785)	26.59
Non-vested at December 31, 2012	491,223	\$ 20.59
Granted	229,131	28.20
Vested	(130,129)	31.22
Forfeited	(804)	18.40
Non-vested at June 30, 2013	589,421	\$ 21.21

During the quarter ended June 30, 2013, 125,072 shares of restricted stock (June 30, 2012 207,237) were awarded to management under the Incentive Plan, from which 61,245 shares (June 30, 2012 100,980) were awarded consistent with the requirements of the TARP Interim Final Rule. For the six-month period ended June 30, 2013, 229,131 shares of restricted stock (June 30, 2012 359,427) were awarded to management under the Incentive Plan, from which 165,304 shares (June 30, 2012 253,170) were awarded to management consistent with the requirements of the TARP Interim Final Rule.

During the quarter ended June 30, 2013, the Corporation recognized \$ 1.3 million of restricted stock expense related to management incentive awards, with a tax benefit of \$ 0.4 million (June 30, 2012 \$ 1.2 million, with a tax benefit of \$ 0.3 million). For the six-month period ended June 30, 2013, the Corporation recognized \$ 2.5 million of restricted stock expense related to management incentive awards, with a tax benefit of \$ 0.8 million (June 30, 2012 \$ 2.1 million, with a tax benefit of \$ 0.5 million). For the six-month period ended June 30, 2013, the fair market value of the restricted stock vested was \$4.0 million at grant date and \$3.6 million at vesting date. This triggers a shortfall, net of windfalls, of \$0.1 million that was recorded as an additional income tax expense at the applicable income tax rate. No income tax expense was recorded for the U.S. employees due to the valuation allowance of the deferred tax asset. The total unrecognized compensation cost related to non-vested restricted stock awards and performance shares to members of management at June 30, 2013 was \$ 9.3 million and is expected to be recognized over a weighted-average period of 2 years.

Table of Contents

The following table summarizes the restricted stock activity under the Incentive Plan for members of the Board of Directors:

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2011		
Granted	41,174	\$ 16.37
Vested	(41,174)	16.37
Forfeited		
Non-vested at December 31, 2012		
Granted	17,186	\$ 29.33
Vested	(17,186)	29.33
Forfeited		
Non-vested at June 30, 2013		

During the quarter ended June 30, 2013, the Corporation granted 14,782 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (June 30, 2012 = 29,103). During this period, the Corporation recognized \$0.1 million of restricted stock expense related to these restricted stock grants, with a tax benefit of \$46 thousand (June 30, 2012 = \$0.1 million, with a tax benefit of \$33 thousand). For the six-month period ended June 30, 2013, the Corporation granted 17,186 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (June 30, 2012 = 34,478). During this period, the Corporation recognized \$0.2 million of restricted stock expense related to these restricted stock grants, with a tax benefit of \$91 thousand (June 30, 2012 = \$0.2 million, with a tax benefit of \$70 thousand). The fair value at vesting date of the restricted stock vested during the six months ended June 30, 2013 for directors was \$ 0.5 million.

Table of Contents**Note 31 Income taxes**

The reason for the difference between the income tax (benefit) expense applicable to income before provision for income taxes and the amount computed by applying the statutory tax rate in Puerto Rico, were as follows:

(In thousands)	Quarters ended			
	June 30, 2013		June 30, 2012	
	Amount	% of pre-tax income	Amount	% of pre-tax income
Computed income tax at statutory rates	\$ 35,135	39%	\$ (3,646)	30%
Net benefit of net tax exempt interest income	(10,325)	(11)	(3,739)	31
Deferred tax asset valuation allowance	(8,312)	(9)	(48)	
Non-deductible expenses	7,946	9	5,726	(47)
Difference in tax rates due to multiple jurisdictions	(3,201)	(4)	(1,149)	9
Adjustment in deferred tax due to change in tax rate	(215,600)	(239)		
Effect of income subject to preferential tax rate ^[1]	(47,322)	(53)	(73,298)	603
Others	4,299	5	(1,739)	14
Income tax (benefit) expense	\$ (237,380)	(263)%	\$ (77,893)	640%

[1] For 2012, includes the impact of the Closing Agreement with the P.R. Treasury signed in June 2012.

(In thousands)	Six months ended			
	June 30, 2013		June 30, 2012	
	Amount	% of pre-tax income	Amount	% of pre-tax income
Computed income tax at statutory rates	\$ (33,967)	39%	\$ 15,734	30%

Others	5,294	(6)	(541)	(1)
Income tax (benefit) expense	\$ (294,257)	338%	\$ (61,701)	(118)%

[1] For 2012, includes the impact of the Closing Agreement with the P.R. Treasury signed in June 2012.

The results for the second quarter of 2013 reflect a tax benefit of \$215.6 million with a corresponding increase in the Corporation's net deferred tax asset as a result of the increase in the Puerto Rico marginal tax rate from 30% to 39%. On June 30, 2013, the Governor of Puerto Rico signed Act Number 40 which includes among the most significant changes to the Puerto Rico Internal Revenue Code an increase in the marginal tax rate from 30% to 39% effective for taxable years beginning after December 31, 2012.

During the second quarter of 2013 Popular, Inc. recognized a gain on the sale of a portion of Evertec's common stock as part of Evertec, Inc.'s initial public offering (IPO) which was taxable at a preferential tax rate according to Act Number 73 of May 28, 2008, known as Economic Incentives Act for the Development of Puerto Rico. This gain was offset by the loss generated on the bulk sale of non-performing mortgage loans. The results for the second quarter of 2012 reflect the tax benefit of \$72.9 million related to the tax treatment of the loans acquired in the Westernbank FDIC-assisted transaction. In June 2012, the Puerto Rico Department of the Treasury and the Corporation entered into a Closing Agreement to clarify that those Acquired Loans are capital assets and any gain resulting from such loans would be taxed at the capital gain tax

rate of 15% instead of the ordinary income tax rate.

Table of Contents

The increase in income tax benefit for the six months ended June 30, 2013, compared to the same period of 2012 was mainly due to the recognition during the year 2013 of a tax benefit and a corresponding increase in the net deferred tax assets of the Puerto Rico operations as a result of the increase in the marginal tax rate from 30% to 39% as mention above. In addition, income tax benefit increase due to the loss generated on the Puerto Rico operations by the sale of non-performing assets that took place during the first and second quarter of 2013 net of the gain realized on the sale of Evertec's common stock.

The following table presents the components of the Corporation's deferred tax assets and liabilities.

(In thousands)	June 30, 2013	December 31, 2012
Deferred tax assets:		
Tax credits available for carryforward	\$ 6,200	\$ 2,666
Net operating loss and other carryforward available	1,345,667	1,201,174
Postretirement and pension benefits	133,279	97,276
Deferred loan origination fees	7,740	6,579
Allowance for loan losses	721,114	592,664
Deferred gains	9,910	10,528
Accelerated depreciation	6,901	6,699
Intercompany deferred gains	3,326	3,891
Other temporary differences	39,576	31,864
Total gross deferred tax assets	2,273,713	1,953,341
Deferred tax liabilities:		
Differences between the assigned values and the tax basis of assets and liabilities recognized in purchase business combinations	38,737	37,281
Difference in outside basis between financial and tax reporting on sale of a business	2,795	6,400
FDIC-assisted transaction	72,537	53,351
Unrealized net gain on trading and available-for-sale securities	20,784	51,002
Deferred loan origination costs		3,459
Other temporary differences	10,402	10,142
Total gross deferred tax liabilities	145,255	161,635
Valuation allowance	1,268,954	1,260,542
Net deferred tax asset	\$ 859,504	\$ 531,164

The net deferred tax asset shown in the table above at June 30, 2013 is reflected in the consolidated statements of financial condition as \$864 million in net deferred tax assets in the Other assets caption (December 31, 2012 \$541 million) and \$5 million in deferred tax liabilities in the Other liabilities caption (December 31, 2012 \$10 million), reflecting the aggregate deferred tax assets or liabilities of individual tax-paying subsidiaries of the Corporation.

A deferred tax asset should be reduced by a valuation allowance if based on the weight of all available evidence, it is more likely than not (a likelihood of more than 50%) that some portion or the entire deferred tax asset will not be realized. The valuation allowance should be sufficient to reduce the deferred tax asset to the amount that is more likely than not to be realized. The determination of whether a deferred tax asset is realizable is based on weighting all available evidence, including both positive and negative evidence. The realization of deferred tax assets, including carryforwards and deductible temporary differences, depends upon the existence of sufficient taxable income of the same character during the carryback or carryforward period. The analysis considers all sources of taxable income available to realize the deferred tax asset, including the future reversal of existing taxable temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years and tax-planning strategies.

Edgar Filing: POPULAR INC - Form 10-Q

At June 30, 2013, the Corporation's net deferred tax assets related to its Puerto Rico operations amounted to \$888 million. The Corporation's Puerto Rico banking operation is in a cumulative loss position for the three-year period ended June 30, 2013 taking into account taxable income exclusive of reversing temporary differences (adjusted taxable income). This cumulative loss position

Table of Contents

was mainly due to the sale of assets, most of which were in non-performing status, comprised of commercial and construction loans and commercial and single family real estate owned generated during the first quarter of 2013 and mortgage loans generated during the second quarter of 2013. The Corporation weights all available positive and negative evidence to assess the realization of the deferred tax asset. Positive evidence assessed included (i) the Corporation's Puerto Rico banking operations very strong earnings history; (ii) consideration that the event causing the cumulative loss position is not a continuing condition of the operations; (iii) new legislation extending the period of carryover of net operating losses to twelve years for losses incurred during taxable years 2005 thru 2012 and ten years for losses incurred after 2012. Accordingly, there is enough positive evidence to outweigh the negative evidence of the cumulative loss. Based on this evidence, the Corporation has concluded that it is more-likely-than-not that such net deferred tax asset will be realized.

The Corporation's U.S. mainland operations are in a cumulative loss position for the three-year period ended June 30, 2013. For purposes of assessing the realization of the deferred tax assets in the U.S. mainland, this cumulative taxable loss position is considered significant negative evidence and has caused management to conclude that it is more likely than not that the Corporation will not be able to realize the associated deferred tax assets in the future. At June 30, 2013, the Corporation recorded a valuation allowance of approximately \$ 1.3 billion on the deferred tax assets of its U.S. operations (December 31, 2012 \$ 1.3 billion).

The reconciliation of unrecognized tax benefits was as follows:

(In millions)	2013	2012
Balance at January 1	\$ 13.4	\$ 19.5
Additions for tax positions January through March	0.2	0.7
Balance at March 31	\$ 13.6	\$ 20.2
Additions for tax positions April through June	0.3	
Reductions for tax positions April through June		(0.2)
Reductions for tax positions taken in prior years April through June		(0.7)
Balance at June 30	\$ 13.9	\$ 19.3

The accrued interest related to uncertain tax positions approximated \$5.0 million at June 30, 2013 (December 31, 2012 \$4.3 million). Management determined that at June 30, 2013 and December 31, 2012, there was no need to accrue for the payment of penalties.

After consideration of the effect on U.S. federal tax of unrecognized U.S. state tax benefits, the total amount of unrecognized tax benefits, including U.S. and Puerto Rico, that if recognized, would affect the Corporation's effective tax rate, was approximately \$18.0 million at June 30, 2013 (December 31, 2012 \$16.9 million).

The amount of unrecognized tax benefits may increase or decrease in the future for various reasons including adding amounts for current tax year positions, expiration of open income tax returns due to the statutes of limitation, changes in management's judgment about the level of uncertainty, status of examinations, litigation and legislative activity and the addition or elimination of uncertain tax positions.

The Corporation and its subsidiaries file income tax returns in Puerto Rico, the U.S. federal jurisdiction, various U.S. states and political subdivisions, and foreign jurisdictions. At June 30, 2013, the following years remain subject to examination in the U.S. Federal jurisdiction: 2009 and thereafter; and in the Puerto Rico jurisdiction, 2008 and thereafter. The Corporation anticipates a reduction in the total amount of unrecognized tax benefits within the next 12 months, which could amount to approximately \$11 million.

Table of Contents**Note 32 Supplemental disclosure on the consolidated statements of cash flows**

Additional disclosures on cash flow information and non-cash activities for the six months ended June 30, 2013 and June 30, 2012 are listed in the following table:

(In thousands)	June 30, 2013	June 30, 2012
Non-cash activities:		
Loans transferred to other real estate	\$ 143,159	\$ 151,891
Loans transferred to other property	16,009	11,636
Total loans transferred to foreclosed assets	159,168	163,527
Transfers from loans held-in-portfolio to loans held-for-sale	438,640	48,564
Transfers from loans held-for-sale to loans held-in-portfolio	21,580	6,633
Loans securitized into investment securities ^[1]	846,327	525,800
Trades receivables from brokers and counterparties	158,141	87,774
Trades payables to brokers and counterparties	72,007	8,587
Recognition of mortgage servicing rights on securitizations or asset transfers	10,152	8,206
Payables due to counterparties related to early extinguishment of debt		376,058
Loans sold to a joint venture in exchange for an acquisition loan and an equity interest in the joint venture	194,514	

[1] Includes loans securitized into trading securities and subsequently sold before quarter end.

Table of Contents

Note 33 Segment reporting

The Corporation's corporate structure consists of two reportable segments – Banco Popular de Puerto Rico and Banco Popular North America.

Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. The segments were determined based on the organizational structure, which focuses primarily on the markets the segments serve, as well as on the products and services offered by the segments.

Banco Popular de Puerto Rico:

Given that Banco Popular de Puerto Rico constitutes a significant portion of the Corporation's results of operations and total assets at June 30, 2013, additional disclosures are provided for the business areas included in this reportable segment, as described below:

Commercial banking represents the Corporation's banking operations conducted at BPPR, which are targeted mainly to corporate, small and middle size businesses. It includes aspects of the lending and depository businesses, as well as other finance and advisory services. BPPR allocates funds across business areas based on duration matched transfer pricing at market rates. This area also incorporates income related with the investment of excess funds, as well as a proportionate share of the investment function of BPPR.

Consumer and retail banking represents the branch banking operations of BPPR which focus on retail clients. It includes the consumer lending business operations of BPPR, as well as the lending operations of Popular Auto and Popular Mortgage. Popular Auto focuses on auto and lease financing, while Popular Mortgage focuses principally on residential mortgage loan originations. The consumer and retail banking area also incorporates income related with the investment of excess funds from the branch network, as well as a proportionate share of the investment function of BPPR.

Other financial services include the trust and asset management service units of BPPR, the brokerage and investment banking operations of Popular Securities, and the insurance agency and reinsurance businesses of Popular Insurance, Popular Insurance V.I., Popular Risk Services, and Popular Life Re. Most of the services that are provided by these subsidiaries generate profits based on fee income.

Banco Popular North America:

Banco Popular North America's reportable segment consists of the banking operations of BPNA, E-LOAN, Popular Equipment Finance, Inc. and Popular Insurance Agency, U.S.A. BPNA operates through a retail branch network in the U.S. mainland, while E-LOAN supports BPNA's deposit gathering through its online platform. All direct lending activities at E-LOAN were ceased during the fourth quarter of 2008. Popular Equipment Finance, Inc. also holds a running-off loan portfolio as this subsidiary ceased originating loans during 2009. Popular Insurance Agency, U.S.A. offers investment and insurance services across the BPNA branch network.

The Corporate group consists primarily of the holding companies: Popular, Inc., Popular North America, Popular International Bank and certain of the Corporation's investments accounted for under the equity method, including EVERTEC and Centro Financiero BHD, S.A. The Corporate group also includes the expenses of certain corporate areas that are identified as critical to the organization: Finance, Risk Management and Legal.

The accounting policies of the individual operating segments are the same as those of the Corporation. Transactions between reportable segments are primarily conducted at market rates, resulting in profits that are eliminated for reporting consolidated results of operations.

Note 34 Condensed consolidating financial information of guarantor and issuers of registered guaranteed securities

The following condensed consolidating financial information presents the financial position of Popular, Inc. Holding Company (PIHC) (parent only), Popular North America, Inc. (PNA) and all other subsidiaries of the Corporation at June 30, 2013 and December 31, 2012, and the results of their operations and cash flows for periods ended June 30, 2013 and 2012.

PNA is an operating, wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries: Equity One, Inc. and Banco Popular North America (BPNA), including BPNA 's wholly-owned subsidiaries Popular Equipment Finance, Inc., Popular Insurance Agency, U.S.A., and E-LOAN, Inc.

PIHC fully and unconditionally guarantees all registered debt securities issued by PNA.

Popular International Bank, Inc. (PIBI) is a wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries Popular Insurance V.I., Inc. and Tarjetas y Transacciones en Red Tranred, C.A. Effective January 1, 2012, PNA, which was a wholly-owned subsidiary of PIBI prior to that date, became a direct wholly-owned subsidiary of PIHC after an internal reorganization. Since the internal reorganization, PIBI is no longer a bank holding company and is no longer a potential issuer of the Corporation 's debt securities. PIBI has no outstanding registered debt securities that would also be guaranteed by PIHC.

A potential source of income for PIHC consists of dividends from BPPR and BPNA. Under existing federal banking regulations any dividend from BPPR or BPNA to the PIHC could be made if the total of all dividends declared by each entity during the calendar year would not exceed the total of its net income for that year, as defined by the Federal Reserve Board, combined with its retained net income for the preceding two years, less any required transfers to surplus or to a fund for the retirement of any preferred stock. At June 30, 2013, BPPR could have declared a dividend of approximately \$418 million (December 31, 2012 \$404 million). However, on July 25, 2011, PIHC and BPPR entered into a Memorandum of Understanding with the Federal Reserve Bank of New York and the Office of the Commissioner of Financial Institutions of Puerto Rico that requires the approval of these entities prior to the payment of any dividends by BPPR to PIHC. BPNA could not declare any dividends without the approval of the Federal Reserve Board.
