SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

þ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the fiscal year ended December 31, 2013

OR

· TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-26486

Auburn National Bancorporation, Inc.

(Exact name of registrant as specified in charter)

Delaware
(State or other jurisdiction)

63-0885779
(I.R.S. Employer

of incorporation)

Identification No.)

100 N. Gay Street, Auburn, Alabama
(Address of principal executive offices)

36830
(Zip Code)

Registrant's telephone number, including area code: (334) 821-9200

Securities registered pursuant to Section 12 (b) of the Act:

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

Title of Each Class	Name of Exchange on which Registered
Common Stock, par value \$0.01	Nasdaq Global Market

Securities registered to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity as of the last business day of the registrant's most recently completed second fiscal quarter: \$50,893,590 as of June 30, 2013.

APPLICABLE ONLY TO CORPORATE REGISTRANTS

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date: 3,643,173 shares of common stock as of March 14, 2014.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Annual Meeting of Shareholders, scheduled to be held May 13, 2014, are incorporated by reference into Part II, Item 5 and Part III of this Form 10-K.

SPECIAL CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Various of the statements made herein under the captions Management's Discussion and Analysis of Financial Condition and Results of Operations, Quantitative and Qualitative Disclosures about Market Risk, Risk Factors and elsewhere, are forward-looking statements within the meaning and protections of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act).

Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause the actual results, performance, achievements or financial condition of the Company to be materially different from future results, performance, achievements or financial condition expressed or implied by such forward-looking statements. You should not expect us to update any forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as may, will, anticipate, assume, should, indicate, would, believe, could, expect, estimate, continue, plan, point to, project, could, intend, target and other similar words and expressions of the future. The forward-looking statements may not be realized due to a variety of factors, including, without limitation:

the effects of future economic, business and market conditions and changes, domestic and foreign, including seasonality;

governmental monetary and fiscal policies;

legislative and regulatory changes, including changes in banking, securities and tax laws, regulations and rules and their application by our regulators, including capital and liquidity requirements, and changes in the scope and cost of FDIC insurance;

changes in accounting policies, rules and practices;

the risks of changes in interest rates on the levels, composition and costs of deposits, loan demand, and the values and liquidity of loan collateral, securities, and interest sensitive assets and liabilities, and the risks and uncertainty of the amounts realizable and the timing of dispositions of assets by the FDIC where we may have a participation or other interest;

changes in borrower credit risks and payment behaviors;

changes in the availability and cost of credit and capital in the financial markets, and the types of instruments that may be included as capital for regulatory purposes;

changes in the prices, values and sales volumes of residential and commercial real estate;

the effects of competition from a wide variety of local, regional, national and other providers of financial, investment and insurance services;

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

the failure of assumptions and estimates underlying the establishment of reserves for possible loan losses and other estimates;

the risks of mergers, acquisitions and divestitures, including, without limitation, the related time and costs of implementing such transactions, integrating operations as part of these transactions and possible failures to achieve expected gains, revenue growth and/or expense savings from such transactions;

changes in technology or products that may be more difficult, costly, or less effective than anticipated;

Table of Contents

the effects of war or other conflicts, acts of terrorism or other catastrophic events that may affect general economic conditions;

the failure of assumptions and estimates, as well as differences in, and changes to, economic, market and credit conditions, including changes in borrowers' credit risks and payment behaviors from those used in our loan portfolio stress test;

the risks that our deferred tax assets could be reduced if estimates of future taxable income from our operations and tax planning strategies are less than currently estimated, and sales of our capital stock could trigger a reduction in the amount of net operating loss carry-forwards that we may be able to utilize for income tax purposes; and

other factors and risks described under "Risk Factors" herein and in any of our subsequent reports that we make with the Securities and Exchange Commission (the "Commission" or "SEC") under the Exchange Act.

All written or oral forward-looking statements that are made by us or are attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made.

ITEM 1. BUSINESS

Auburn National Bancorporation, Inc. (the "Company") is a bank holding company registered with the Board of Governors of the Federal Reserve System (the "Federal Reserve") under the Bank Holding Company Act of 1956, as amended (the "BHC Act"). The Company was incorporated in Delaware in 1990, and in 1994 it succeeded its Alabama predecessor as the bank holding company controlling AuburnBank, an Alabama state member bank with its principal office in Auburn, Alabama (the "Bank"). The Company and its predecessor have controlled the Bank since 1984. As a bank holding company, the Company may diversify into a broader range of financial services and other business activities than currently are permitted to the Bank under applicable laws, regulations and rules. The holding company structure also provides greater financial and operating flexibility than is presently permitted to the Bank.

The Bank has operated continuously since 1907 and currently conducts its business primarily in East Alabama, including Lee County and surrounding areas. The Bank has been a member of the Federal Reserve System since April 1995 (the "Charter Conversion"). The Bank's primary regulators are the Federal Reserve and the Alabama Superintendent of Banks (the "Alabama Superintendent"). The Bank has been a member of the Federal Home Loan Bank of Atlanta (the "FHLB") since 1991.

General

The Company's business is conducted primarily through the Bank and its subsidiaries. Although it has no immediate plans to conduct any other business, the Company may engage directly or indirectly in a number of activities that the Federal Reserve has determined to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

The Company's principal executive offices are located at 100 N. Gay Street, Auburn, Alabama 36830, and its telephone number at such address is (334) 821-9200. The Company maintains an Internet website at www.auburnbank.com. The Company's website and the information appearing on the website are not included or incorporated in, and are not part of, this report. The Company files annual, quarterly and current reports, proxy statements, and other information with the SEC. You may read and copy any document we file with the SEC at the SEC's public reference room at 100 F Street, N.E., Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for more information on the operation of the public reference rooms. The SEC maintains an Internet site that contains reports, proxy, and other information. Our SEC filings are also available to the public free of charge from the SEC's web site at www.sec.gov.

The Company directly owns all the common equity in one statutory trust, Auburn National Bancorporation Capital Trust I, a Delaware statutory trust, which was formed in 2003 for the purpose of issuing \$7.0 million of floating rate capital securities, which are included in our Tier 1 capital.

Table of Contents

Services

The Bank offers checking, savings, transaction deposit accounts and certificates of deposit, and is an active residential mortgage lender in its primary service area. The Bank's primary service area includes the cities of Auburn and Opelika, Alabama and nearby surrounding areas in East Alabama, primarily in Lee County. The Bank also offers commercial, financial, agricultural, real estate construction and consumer loan products and other financial services. The Bank is one of the largest providers of automated teller services in East Alabama and operates ATM machines in 14 locations in its primary service area. The Bank offers Visa® Checkcards, which are debit cards with the Visa logo that work like checks but can be used anywhere Visa is accepted, including ATMs. The Bank's Visa Checkcards can be used internationally through the Cirrus® network. The Bank offers online banking and bill payment services through its Internet website, www.auburnbank.com

The Bank also has commercial loan production offices in Montgomery, Alabama and in Phenix City, Alabama.

Competition

The banking business in East Alabama, including Lee County, is highly competitive with respect to loans, deposits, and other financial services. The area is dominated by a number of regional and national banks and bank holding companies that have substantially greater resources, and numerous offices and affiliates operating over wide geographic areas. The Bank competes for deposits, loans and other business with these banks, as well as with credit unions, mortgage companies, insurance companies, and other local and nonlocal financial institutions, including institutions offering services through the mail, by telephone and over the Internet. As more and different kinds of businesses enter the market for financial services, competition from nonbank financial institutions may be expected to intensify further.

Among the advantages that larger financial institutions have over the Bank are their ability to finance extensive advertising campaigns, to diversify their funding sources, and to allocate and diversify their assets among loans and securities of the highest yield in locations with the greatest demand. Many of the major commercial banks or their affiliates operating in the Bank's service area offer services which are not presently offered directly by the Bank and they typically have substantially higher lending limits than the Bank.

Banks also have experienced significant competition for deposits from mutual funds, insurance companies and other investment companies and from money center banks' offerings of high-yield investments and deposits. Certain of these competitors are not subject to the same regulatory restrictions as the Bank.

Selected Economic Data

Lee County's population was estimated to be 147,468 in 2012, and has increased approximately 5.0% from 2010 to 2012. The largest employers in the area are Auburn University, East Alabama Medical Center, a Wal-Mart Distribution Center, Mando America Corporation, and Briggs & Stratton. Auto manufacturing is of increasing importance along Interstate Highway 85 to the east and west of Auburn. Kia Motors has a large automobile factory in nearby LaGrange, Georgia, and Hyundai Motors has a large automobile factory in Montgomery, Alabama.

Loans and Loan Concentrations

The Bank makes loans for commercial, financial and agricultural purposes, as well as for real estate mortgages, real estate acquisition, construction and development and consumer purposes. While there are certain risks unique to each type of lending, management believes that there is more risk associated with commercial, real estate acquisition, construction and development, agricultural and consumer lending than with residential real estate mortgage loans. To help manage these risks, the Bank has established underwriting standards used in evaluating each extension of credit on an individual basis, which are substantially similar for each type of loan. These standards include a review of the economic conditions affecting the borrower, the borrower's financial strength and capacity to repay the debt, the underlying collateral and the borrower's past credit performance. We apply these standards at the time a loan is made and monitor them periodically throughout the life of the loan. See "Legislative and Regulatory Changes" for a discussion of regulatory guidance on commercial real estate lending.

Table of Contents

The Bank has loans outstanding to borrowers in all industries within its primary service area. Any adverse economic or other conditions affecting these industries would also likely have an adverse effect on the local workforce, other local businesses, and individuals in the community that have entered into loans with the Bank. The auto manufacturing business and its suppliers have positively affected our local economy, but automobile manufacturing is cyclical and adversely affected by increases in interest rates. Decreases in automobile sales, including adverse changes due to interest rate increases, could adversely affect the Kia and Hyundai plants and their suppliers' local spending and employment, and could adversely affect economic conditions in the markets we serve. However, management believes that due to the diversified mix of industries located within the Bank's primary service area, adverse changes in one industry may not necessarily affect other area industries to the same degree or within the same time frame. The Bank's primary service area also is subject to both local and national economic conditions and fluctuations. While most loans are made within our primary service area, some residential mortgage loans are originated outside the primary service area, and the Bank from time to time has purchased loan participations from outside its primary service area.

Employees

At December 31, 2013, the Company and its subsidiaries had 155 full-time equivalent employees, including 35 officers.

Statistical Information

Certain statistical information is included in response to Item 7 of this Annual Report on Form 10-K. Certain statistical information is also included in response to Item 6, Item 7A and Item 8 of this Annual Report on Form 10-K.

SUPERVISION AND REGULATION

The Company and the Bank are extensively regulated under federal and state laws applicable to financial institutions. The supervision, regulation and examination of the Company and the Bank and their respective subsidiaries by the bank regulatory agencies are intended primarily for the maintenance of the safety and soundness of financial institutions and the federal deposit insurance system, as well as protection of depositors, rather than holders of Company capital stock and other securities. Any change in applicable law or regulation may have a material effect on the Company's business. The following discussion is qualified in its entirety by reference to the particular statutory and regulatory provisions referred to below.

Bank Holding Company Regulation

The Company, as a bank holding company, is subject to supervision, regulation and examination by the Federal Reserve under the BHC Act. Bank holding companies are generally limited to the business of banking, managing or controlling banks, and other activities that the Federal Reserve determines to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. The Company is required to file with the Federal Reserve periodic reports and such other information as the Federal Reserve may request. The Federal Reserve examines the Company, and may examine its subsidiaries. The State of Alabama currently does not regulate bank holding companies.

The BHC Act requires prior Federal Reserve approval for, among other things, the acquisition by a bank holding company of direct or indirect ownership or control of more than 5% of the voting shares or substantially all the assets of any bank, or for a merger or consolidation of a bank holding company with another bank holding company. With certain exceptions, the BHC Act prohibits a bank holding company from acquiring direct or indirect ownership or control of voting shares of any company that is not a bank or bank holding company and from engaging directly or indirectly in any activity other than banking or managing or controlling banks or performing services for its authorized subsidiary. A bank holding company may, however, engage in or acquire an interest in a company that engages in activities that the Federal Reserve has determined by regulation or order to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

Bank holding companies are and remain well-capitalized and well-managed, as defined in Federal Reserve Regulation Y, and have and maintain satisfactory or better ratings under the Community Reinvestment Act of 1977, as amended (the CRA), may elect to become financial holding companies. Financial holding companies and their subsidiaries are permitted to acquire or engage in previously impermissible activities such as insurance underwriting, securities underwriting, travel agency activities, broad insurance agency activities, merchant banking and other activities that the Federal Reserve determines to be financial in nature or complementary thereto. In addition, under the BHC's merchant banking authority and Federal Reserve regulations, financial holding companies are authorized to invest in

Table of Contents

companies that engage in activities that are not financial in nature, as long as the financial holding company makes its investment with the intention of limiting the terms of its investment, does not manage the company on a day-to-day basis, and the investee company does not cross-market with any depository institutions controlled by the financial holding company. Financial holding companies continue to be subject to Federal Reserve supervision, regulation and examination, but the Gramm-Leach-Bliley Act of 1999 (the GLB Act) applies the concept of functional regulation to the activities conducted by subsidiaries. For example, insurance activities would be subject to supervision and regulation by state insurance authorities. While the Company has not elected to become a financial holding company, in order to exercise the broader activity powers provided by the GLB Act, it may elect to do so in the future.

The BHC Act permits acquisitions of banks by bank holding companies, subject to various restrictions, including deposit share limits, and that the acquirer be well capitalized and well managed . Under the Alabama Banking Code, with the prior approval of the Alabama Superintendent, an Alabama bank may acquire and operate one or more banks in other states pursuant to a transaction in which the Alabama bank is the surviving bank. In addition, one or more Alabama banks may enter into a merger transaction with one or more out-of-state banks, and an out-of-state bank resulting from such transaction may continue to operate the acquired branches in Alabama. As a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Dodd-Frank Act), banks, including Alabama banks, may branch anywhere in the United States.

The Company is a legal entity separate and distinct from the Bank. Various legal limitations restrict the Bank from lending or otherwise supplying funds to the Company. The Company and the Bank are subject to Section 23A of the Federal Reserve Act and Federal Reserve Regulation W thereunder. Section 23A defines covered transactions, which include extensions of credit, and limits a bank s covered transactions with any affiliate to 10% of such bank s capital and surplus. All covered and exempt transactions between a bank and its affiliates must be on terms and conditions consistent with safe and sound banking practices, and banks and their subsidiaries are prohibited from purchasing low-quality assets from the bank s affiliates. Finally, Section 23A requires that all of a bank s extensions of credit to its affiliates be appropriately secured by permissible collateral, generally United States government or agency securities. The Company and the Bank also are subject to Section 23B of the Federal Reserve Act, which generally requires covered and other transactions among affiliates to be on terms and under circumstances, including credit standards, that are substantially the same as or at least as favorable to the bank or its subsidiary as those prevailing at the time for similar transactions with unaffiliated companies.

Federal Reserve policy, as well as the Federal Deposit Insurance Act, as amended by the Dodd-Frank Act, requires a bank holding company to act as a source of financial and managerial strength to its bank subsidiaries and to take measures to preserve and protect its bank subsidiaries in situations where additional investments in a bank subsidiary may not otherwise be warranted. In the event an FDIC-insured subsidiary becomes subject to a capital restoration plan with its regulators, the parent bank holding company is required to guarantee performance of such plan up to 5% of the bank s assets, and such guarantee is give priority in bankruptcy of the bank holding company. In addition, where a bank holding company has more than one bank or thrift subsidiary, each of the bank holding company s subsidiary depository institutions are responsible for any losses to the FDIC s Deposit Insurance Fund (DIF) as a result of an affiliated depository institution s failure. As a result, a bank holding company may be required to loan money to a bank subsidiary in the form of subordinate capital notes or other instruments which qualify as capital under bank regulatory rules. However, any loans from the holding company to such subsidiary banks likely will be unsecured and subordinated to such bank s depositors and to other creditors of the bank. See Capital.

Bank Regulation

The Bank is subject to supervision, regulation and examination by the Federal Reserve and the Alabama Superintendent, which monitor all areas of the operations of the Bank, including reserves, loans, mortgages, issuances and redemption of capital securities, payment of dividends, establishment of branches, capital adequacy and compliance with laws. The Bank is a member of the FDIC and, as such, its deposits are insured by the FDIC to the maximum extent provided by law. See FDIC Insurance Assessments.

Alabama law permits statewide branching by banks. The powers granted to Alabama-chartered banks by state law include certain provisions designed to provide such banks with competitive equality to the powers of national banks.

In 2007, the Alabama legislature amended the Alabama Banking Code to, among other things; strengthen the regulatory and enforcement authority of the Alabama State Banking Department and the Alabama Superintendent of Banks.

Table of Contents

The Federal Reserve has adopted the Federal Financial Institutions Examination Council's (FFIEC) updated rating system, which assigns each financial institution a confidential composite CAMELS rating based on an evaluation and rating of six essential components of an institution's financial condition and operations: Capital Adequacy, Asset Quality, Management, Earnings, Liquidity and Sensitivity to market risk, as well as the quality of risk management practices. For most institutions, the FFIEC has indicated that market risk primarily reflects exposures to changes in interest rates. When regulators evaluate this component, consideration is expected to be given to: management's ability to identify, measure, monitor and control market risk; the institution's size; the nature and complexity of its activities and its risk profile; and the adequacy of its capital and earnings in relation to its level of market risk exposure. Market risk is rated based upon, but not limited to, an assessment of the sensitivity of the financial institution's earnings or the economic value of its capital to adverse changes in interest rates, foreign exchange rates, commodity prices or equity prices management's ability to identify, measure, monitor and control exposure to market risk; and the nature and complexity of interest rate risk exposure arising from non-trading positions.

The GLB Act and related regulations require banks and their affiliated companies to adopt and disclose privacy policies, including policies regarding the sharing of personal information they obtain from customers with third parties. The GLB Act also permits bank subsidiaries to engage in financial activities similar to those permitted to financial holding companies.

The federal bank regulators have updated their guidance several times on overdrafts, including overdrafts incurred at automated teller machines and point of sale terminals, and overdrafts have become a focus of the federal Consumer Financial Protection Bureau (CFPB). Among other things, the federal regulators require banks to monitor accounts and to limit the use of overdrafts by customers as a form of short-term, high-cost credit, including, for example, giving customers who overdraw their accounts on more than six occasions where a fee is charged in a rolling 12 month period a reasonable opportunity to choose a less costly alternative and decide whether to continue with fee-based overdraft coverage. It also encourages placing appropriate daily limits on overdraft fees, and asks banks to consider eliminating overdraft fees for transactions that overdraw an account by a *de minimis* amount. Overdraft policies, processes, fees and disclosures are frequently the subject of litigation against banks in various jurisdictions.

Community Reinvestment Act and Consumer Laws

The Bank is subject to the provisions of the CRA and the Federal Reserve's regulations thereunder. Under the CRA, all banks and thrifts have a continuing and affirmative obligation, consistent with their safe and sound operation, to help meet the credit needs for their entire communities, including low- and moderate-income neighborhoods. The CRA requires a depository institution's primary federal regulator, in connection with its examination of the institution, to assess the institution's record of assessing and meeting the credit needs of the community served by that institution, including low- and moderate-income neighborhoods. The bank regulatory agency's assessment of the institution's record is made available to the public. Further, such assessment is required of any institution which has applied to: (i) charter a national bank; (ii) obtain deposit insurance coverage for a newly-chartered institution; (iii) establish a new branch office that accepts deposits; (iv) relocate an office; or (v) merge or consolidate with, or acquire the assets or assume the liabilities of, a federally regulated financial institution. In the case of a bank holding company applying for approval to acquire a bank or other bank holding company, the Federal Reserve will assess the records of each subsidiary depository institution of the applicant bank holding company, and such records may be the basis for denying the application. A less than satisfactory CRA rating will slow, if not preclude branch expansion activities and may prevent a company from becoming a financial holding company.

As a result of the GLB Act, CRA agreements with private parties must be disclosed and annual CRA reports must be made to a bank's primary federal regulator. No new activities authorized under the GLB Act may be commenced by a bank holding company or by a bank financial subsidiary if any of its bank subsidiaries received less than a satisfactory CRA rating in its latest CRA examination. The federal CRA regulations require that evidence of discriminatory, illegal or abusive lending practices be considered in the CRA evaluation.

The Bank is also subject to, among other things, the provisions of the Equal Credit Opportunity Act (the ECOA) and the Fair Housing Act (the FHA), both of which prohibit discrimination based on race or color, religion, national origin, sex and familial status in any aspect of a consumer or commercial credit or residential real estate transaction. The Department of Justice (the DOJ), and the federal bank regulatory agencies have issued an Interagency Policy Statement on Discrimination in Lending in order to provide guidance to financial institutions in determining whether discrimination exists, how the agencies will respond to lending discrimination, and what steps lenders might take to prevent discriminatory lending practices. The DOJ has increased its efforts to prosecute what it regards as violations of the ECOA and FHA.

Table of Contents

The Dodd-Frank Act established the CFPB, which began exercising its regulatory authority upon the recess appointment of its director on January 4, 2012. The CFPB has the authority, previously exercised by the federal bank regulators to adopt regulations and enforce various laws, including the ECOA, and other fair lending laws, the Truth in Lending Act, the Electronic Funds Transfer Act, mortgage lending rules, Truth in Savings, Fair Credit Reporting and Privacy of Consumer Financial Privacy. Although the CFPB does not examine or supervise banks with less than \$10 billion in assets, it exercises broad authority that affects bank regulation in these areas and bank regulators' consumer examination and enforcement. Banks of all sizes will be subject to changes as the CFPB reviews and revises the regulations it administers. The CFPB has focused on various practices to date, including revising mortgage lending rules, credit card add-on products, indirect automobile lending, student lending, and payday and similar lending, and has a broad mandate to regulate consumer financial products, whether or not offered by banks or their affiliates.

Residential Mortgages

The CFPB's final regulations implementing the Dodd-Frank Act requirement that lenders determine whether a consumer has the ability to repay a mortgage loan became effective January 10, 2014. These establish certain minimum requirements for creditors when making ability to pay determinations, and provide certain safe harbors from liability for mortgages that are qualified mortgages and are not higher-priced. Generally, these CFPB regulations apply to all consumer, closed-end loans secured by a dwelling including home-purchase loans, refinances and home equity loans whether first or subordinate lien. Qualified mortgages must generally satisfy detailed requirements related to product features, underwriting standards, and a points and fees requirement whereby the total points and fees on a mortgage loan cannot exceed specified amounts or percentages of the total loan amount. Qualified mortgages must have: (1) a term not exceeding 30 years; (2) regular periodic payments that do not result in negative amortization, deferral of principal repayment, or a balloon payment; (3) and be supported with documentation of the borrower and its credit. We anticipate focusing our residential mortgage origination on qualified mortgages and those that meet our investors requirements, but we may make loans that do not meet the safe harbor requirements for qualified mortgages. Our residential mortgage strategy, product offerings, and profitability may change as these regulations are interpreted and applied in practice.

The bank generally services the loans it originates, including those it sells. The CFPB adopted new mortgage servicing standards, effective in January 2014. These include new requirements regarding force-placed insurance, certain notices prior to rate adjustments on adjustable rate mortgages, and periodic disclosures to borrowers. Servicers will be prohibited from processing foreclosures when a loan modification is pending, and must wait until a loan is more than 120 days delinquent before initiating a foreclosure action. Servicers must provide direct and ongoing access to its personnel, and provide prompt review of any loss mitigation application. Servicers must maintain accurate and accessible mortgage records for the life of a loan and until one year after the loan is paid off or transferred. These new standards are expected to increase the cost and compliance risks of servicing mortgage loans, and the mandatory delays in foreclosures could result in loss of value on collateral or the proceeds we may realize from a sale of foreclosed property.

Our residential mortgage strategy, product offerings, and profitability may change as these regulations are interpreted and applied in practice, and may also change due to the restructuring of Fannie Mae and Freddie Mac as part of the resolution of their conservatorships.

Other Laws and Regulations

The International Money Laundering Abatement and Anti-Terrorism Funding Act of 2001 specifies new know your customer requirements that obligate financial institutions to take actions to verify the identity of the account holders in connection with opening an account at any U.S. financial institution. Bank regulators are required to consider compliance with this Act's money laundering provisions in acting upon acquisition and merger proposals, and sanctions for violations of this Act can be imposed in an amount equal to twice the sum involved in the violating transaction, up to \$1 million.

Under the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the USA PATRIOT Act), financial institutions are subject to prohibitions against specified financial transactions and account relationships as well as to enhanced due diligence and know your customer standards in their dealings with foreign financial institutions and foreign customers.

Table of Contents

The USA PATRIOT Act requires financial institutions to establish anti-money laundering programs, and sets forth minimum standards for these programs, including:

the development of internal policies, procedures, and controls;

the designation of a compliance officer;

an ongoing employee training program; and

an independent audit function to test the programs.

The Company is also required to comply with various corporate governance and financial reporting requirements under the Sarbanes-Oxley Act of 2002, as well as new rules and regulations adopted by the SEC, the Public Company Accounting Oversight Board and Nasdaq. In particular, the Company is required to report on internal controls as part of its annual report for the year ended December 31, 2013 pursuant to Section 404 of the Sarbanes-Oxley Act. The Company has evaluated its controls, including compliance with the SEC rules on internal controls, and has and expects to continue to spend significant amounts of time and money on compliance with these rules. If the Company fails to comply with these internal control rules in the future, it may materially adversely affect its reputation, its ability to obtain the necessary certifications to its financial statements, its relations with its regulators and other financial institutions with which it deals, and its ability to access the capital markets and offer and sell Company securities on terms and conditions acceptable to the Company. The Company's assessment of its financial reporting controls as of December 31, 2013 are included elsewhere in this report with no material weaknesses reported.

Payment of Dividends

The Company is a legal entity separate and distinct from the Bank. The Company's primary source of cash is dividends from the Bank. Prior regulatory approval is required if the total of all dividends declared by a state member bank (such as the Bank) in any calendar year will exceed the sum of such bank's net profits for the year and its retained net profits for the preceding two calendar years, less any required transfers to surplus. During 2013, the Bank paid cash dividends of approximately \$3.3 million to the Company. At December 31, 2013, the Bank could have declared additional dividends of approximately \$9.8 million without prior approval of regulatory authorities.

In addition, the Company and the Bank are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain capital above regulatory minimums. The appropriate federal and state regulatory authorities are authorized to determine when the payment of dividends would be an unsafe or unsound practice, and may prohibit such dividends. The Federal Reserve has indicated that paying dividends that deplete a state member bank's capital base to an inadequate level would be an unsafe and unsound banking practice. The Federal Reserve has indicated that depository institutions and their holding companies should generally pay dividends only out of current year's operating earnings.

Under a Federal Reserve policy adopted in 2010, the board of directors of a bank holding company must consider different factors to ensure that its dividend level is prudent relative to maintaining a strong financial position, and is not based on overly optimistic earnings scenarios, such as potential events that could affect its ability to pay, while still maintaining a strong financial position. As a general matter, the Federal Reserve has indicated that the board of directors of a bank holding company should consult with the Federal Reserve and eliminate, defer or significantly reduce the bank holding company's dividends if:

its net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends;

its prospective rate of earnings retention is not consistent with its capital needs and overall current and prospective financial condition;
or

It will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. When fully-phased in by 2019, the Basel III capital rules will further limit permissible dividends, stock repurchases and discretionary bonuses by the Company and the Bank, respectively, unless the Company and the Bank meet the full capital conservation buffer requirement. See Basel III Capital Rules.

Table of Contents

Capital

The Federal Reserve has risk-based capital guidelines for bank holding companies and state member banks, respectively. These guidelines required at year end 2013 a minimum ratio of capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) of 8%. At least half of the total capital must consist of common equity, retained earnings and a limited amount of qualifying preferred stock, less goodwill and certain core deposit intangibles (Tier 1 capital). Voting common equity must be the predominant form of capital. The remainder may consist of non qualifying preferred stock, qualifying subordinated, perpetual, and/or mandatory convertible debt, term subordinated debt and intermediate term preferred stock, up to 45% of pretax unrealized holding gains on available for sale equity securities with readily determinable market values that are prudently valued, and a limited amount of general loan loss allowance (Tier 2 capital and, together with Tier 1 capital, Total Capital).

In addition, the Federal Reserve has established minimum leverage ratio guidelines for bank holding companies and state member banks, which provide for a minimum leverage ratio of Tier 1 capital to adjusted average quarterly assets (leverage ratio) equal to 3%, plus an additional cushion of 1.0% to 2.0%, if the institution has less than the highest regulatory rating. The minimum capital ratios sought by the regulators are increasing, and a 5% leverage ratio is the minimum for the largest institutions. The guidelines also provide that institutions experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Higher capital may be required in individual cases and depending upon a bank holding company s risk profile. All bank holding companies and banks are expected to hold capital commensurate with the level and nature of their risks including the volume and severity of their problem loans. Lastly, the Federal Reserve s guidelines indicate that the Federal Reserve will continue to consider a tangible Tier 1 leverage ratio (deducting all intangibles) in evaluating proposals for expansion or new activity. The level of Tier 1 capital to risk-adjusted assets is becoming more widely used by the bank regulators to measure capital adequacy. The Federal Reserve has not advised the Company or the Bank of any specific minimum leverage ratio or tangible Tier 1 leverage ratio applicable to them. Under Federal Reserve policies, bank holding companies are generally expected to operate with capital positions well above the minimum ratios. The Federal Reserve believes the risk-based ratios do not take into account the quality of capital and interest rate, liquidity, market and operational risks. Accordingly, supervisory assessments of capital adequacy may differ significantly from conclusions based solely on the level of an organization s risk-based capital ratio.

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), among other things, requires the federal banking agencies to take prompt corrective action regarding depository institutions that do not meet minimum capital requirements. FDICIA establishes five capital tiers: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized. A depository institution s capital tier will depend upon how its capital levels compare to various relevant capital measures and certain other factors, as established by regulation.

All of the federal bank regulatory agencies have regulations establishing risk-adjusted measures and relevant capital levels implementing the prompt corrective action standards. The relevant capital measures are the total capital ratio, Tier 1 risk-based capital ratio, as well as, the leverage capital ratio. Under the regulations, a state member bank will be: (i) well capitalized if it has a total risk-based capital ratio of 10% or greater, a Tier 1 risk-based capital ratio of 6% or greater, a leverage capital ratio of 5% or greater and is not subject to any written agreement, order, capital directive or prompt corrective action directive by a federal bank regulatory agency to maintain a specific capital level for any capital measure; (ii) adequately capitalized if it has a total risk-based capital ratio of 8% or greater, a Tier 1 risk-based capital ratio of 4% or greater, and generally has a leverage capital ratio of 4% or greater; (iii) undercapitalized if it has a total risk-based capital ratio of less than 8%, a Tier 1 risk-based capital ratio of less than 4% or generally has a leverage capital ratio of less than 2%; (iv) significantly undercapitalized if it has a total risk-based capital ratio of less than 6%, a Tier 1 risk-based capital ratio of less than 3% or a leverage capital ratio of less than 3%; or (v) critically undercapitalized if its tangible equity is equal to or less than 2% to total assets. The federal bank regulatory agencies have authority to require additional capital, and have been indicating that higher capital levels may be required in light of current market conditions and risk.

Table of Contents

The Dodd-Frank Act significantly modified the capital rules applicable to the Company and calls for increased capital, generally.

The generally applicable prompt corrective action leverage and risk-based capital standards (the generally applicable standards), including the types of instruments that may be counted as Tier 1 capital, will be applicable on a consolidated basis to depository institution holding companies, as well as their bank and thrift subsidiaries.

The generally applicable standards in effect prior to the Dodd-Frank Act will be floors for the standards to be set by the regulators.

Bank and thrift holding companies with assets of less than \$15 billion as of December 31, 2009, will be permitted to include trust preferred securities that were issued before May 19, 2010, as Tier 1 capital, but trust preferred securities issued by a bank holding company (other than those with assets of less than \$500 million) after May 19, 2010, will no longer count as Tier 1 capital.

The Dodd-Frank Act also requires studies of the use of hybrid instruments as capital, and of smaller (consolidated assets of \$5 billion or less) financial companies' access to the capital markets.

Information concerning the Company's and the Bank's regulatory capital ratios at December 31, 2013 is included in Note 19 of the consolidated financial statements that accompany this report.

Depository institutions that are no longer well capitalized for bank regulatory purposes must receive a waiver from the FDIC prior to accepting or renewing brokered deposits. FDICIA generally prohibits a depository institution from making any capital distribution (including paying dividends) or paying any management fee to its holding company, if the depository institution would thereafter be undercapitalized. Institutions that are undercapitalized are subject to growth limitations and are required to submit a capital restoration plan for approval. A depository institution's parent holding company must guarantee that the institution will comply with such capital restoration plan. The aggregate liability of the parent holding company is limited to the lesser of 5% of the depository institution's total assets at the time it became undercapitalized and the amount necessary to bring the institution into compliance with applicable capital standards. If a depository institution fails to submit an acceptable plan, it is treated as if it is significantly undercapitalized. If the controlling holding company fails to fulfill its obligations under FDICIA and files (or has filed against it) a petition under the federal Bankruptcy Code, the claim against the holding company's capital restoration obligation would be entitled to a priority in such bankruptcy proceeding over third party creditors of the bank holding company. Significantly undercapitalized depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. Critically undercapitalized institutions are subject to the appointment of a receiver or conservator. Because the Company and the Bank exceed applicable capital requirements, the respective managements of the Company and the Bank do not believe that the provisions of FDICIA have had or will have any material impact on the Company and the Bank or their respective operations.

Basel III Capital Rules

The Federal Reserve and the other bank regulators adopted in June 2013 final capital rules for bank holding companies and banks implementing the Basel Committee on Banking Supervision's Basel III: A Global Regulatory Framework for more Resilient Banks and Banking Systems. These new U.S. capital rules are called the Basel III Rules.

The Basel III Rules limits Tier 1 capital to common stock and noncumulative perpetual preferred stock, as well as trust preferred securities and cumulative perpetual preferred stock issued before May 19, 2010, each of which are permanently grandfathered in Tier 1 capital for bank holding companies with less than \$15 billion in assets. A new capital measure, Common Equity Tier I Capital or CET1, is introduced. CET1 includes common stock and related surplus, retained earnings and, subject to certain adjustments, minority common equity interests in subsidiaries. CET1 is reduced by deductions for:

Goodwill and other intangibles, other than mortgage servicing assets (MSAs), which are treated separately, net of associated deferred tax liabilities (DTLs);

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

Deferred tax assets (DTAs) arising from operating losses and tax credit carryforwards net of allowances and DTLs;

Gains on sale from any securitization exposure; and

Defined benefit pension fund net assets (i.e., excess plan assets), net of associated DTLs.

The Company intends to make a one-time election in its first regulatory report in 2015 and, as a result, CET1 would not be further adjusted for certain accumulated other comprehensive income (AOCI).

Table of Contents

Additional threshold deductions of the following that are individually greater than 10% of CET1 or collectively greater than 15% of CET1 (after above deductions):

MSAs, net of associated DTLs;

DTAs arising from temporary differences that could not be realized through net operating loss carryback, net of any valuation allowances and DTLs; and

Significant common stock investments in unconsolidated financial institutions, net of associated DTLs.
 Noncumulative perpetual preferred stock, Tier 1 minority interest not included in CET1, subject to limits, and current Tier 1 capital instruments issued to the U.S. Treasury, including shares issued pursuant to the TARP or SBLF programs, will qualify as additional Tier I capital. All other qualifying preferred stock, subordinated debt and qualifying minority interests will be included in Tier 2 capital.

In addition to the minimum risk-based capital requirements, a new capital conservation buffer of CET1 capital of at least 2.5% of total risk weighted assets, will be required. The capital conservation buffer will be calculated as the *lowest* of:

the banking organization's CET1 capital ratio minus 4.5%;

the banking organization's tier 1 capital ratio minus 6.0%; and

the banking organization's total capital ratio minus 8.0%.

When fully-phased in by 2019, permissible dividends, stock repurchases and discretionary bonuses will be limited to the following percentages based on the capital conservation buffer as calculated above, subject to any further regulatory limitations, including those based on risk assessments and enforcement actions:

Buffer %	Buffer % Limit
More than 2.50%	None
> 1.875% - 2.50%	60.0%
> 1.250% - 1.875%	40.0
> 0.625% - 1.250%	20.0
£ 0.625	- 0 -

The various capital elements and total capital under the Basel III Rules, when fully phased by January 1, 2019 will be:

	Existing	January 1, 2015	Fully Phased In January 1, 2019
Minimum CET1		3.50%	4.5%
CET1 Conservation Buffer			2.5%
Total CET1		4.50%	7.0%

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

Deductions and threshold deductions		40%	100%
Minimum Tier 1 Capital	4.0%	6.0%	6.0%
Minimum Total Capital	8.0%	8.0%	8.0%
Minimum Total Capital <i>plus</i> conservation buffer	8.0%	8.0%	10.5%

Table of Contents*Changes in Risk-Weightings*

The Basel III Rules also change some of the risk weightings used to determine risk-weighted capital adequacy. Among other things, the Basel III Rules:

Assign a 250% risk weight to MSAs;

Assign up to a 1,250% risk weight to structured securities, including private label mortgage securities, trust preferred CDOs and asset back securities;

Retain existing risk weights for residential mortgages, but assign a 100% risk weight to most commercial real estate loans and a 150% risk-weight for high volatility commercial real estate loans;

Assign a 150% risk weight to past due exposures (other than sovereign exposures and residential mortgages);

Assign a 250% risk weight to DTAs, to the extent not deducted from capital (subject to certain maximums);

Retain the existing 100% risk weight for corporate and retail loans; and

Increase the risk weight for exposures to qualifying securities firms from 20% to 100%.

Changes to Prompt Corrective Action Rules

Under the Basel III Rules, the prompt corrective action rules and categories change as of January 1, 2015. The following illustrates the range of the changes from well capitalized, to undercapitalized to critically undercapitalized categories. The adequately capitalized and significantly undercapitalized categories also would be retained with appropriate changes, but are not included in the following illustration.

	Current	<u>Minimums</u>	<u>Basel III</u>
Well capitalized			
CET1			6.5%
Tier 1 risk-based capital	6.0%		8.0%
Total risk-based capital	10.0%		10.0%
Tier 1 leverage ratio	5.0%		5.0%
Undercapitalized			
CET1			< 4.5%
Tier 1 risk-based capital	< 4.0%		≤ 6.0%
Total risk-based capital	< 8.0%		< 8.0%
Tier 1 leverage ratio	< 5.0%		< 4.0%

Critically undercapitalized

Tangible equity to total
assets $\leq 2.0\%$

Tier 1 capital plus non-Tier 1
perpetual preferred stock to
total assets $\leq 2.0\%$

Table of Contents

FDICIA

FDICIA directs that each federal bank regulatory agency prescribe standards for depository institutions and depository institution holding companies relating to internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth composition, a maximum ratio of classified assets to capital, minimum earnings sufficient to absorb losses, a minimum ratio of market value to book value for publicly traded shares, safety and soundness, and such other standards as the federal bank regulatory agencies deem appropriate.

Enforcement Policies and Actions

The Federal Reserve and the Alabama Superintendent monitor compliance with laws and regulations. Violations of laws and regulations, or other unsafe and unsound practices, may result in these agencies imposing fines or penalties, cease and desist orders, or taking other enforcement actions. Under certain circumstances, these agencies may enforce these remedies directly against officers, directors, employees and others participating in the affairs of a bank or bank holding company.

Fiscal and Monetary Policy

Banking is a business that depends on interest rate differentials. In general, the difference between the interest paid by a bank on its deposits and its other borrowings, and the interest received by a bank on its loans and securities holdings, constitutes the major portion of a bank's earnings. Thus, the earnings and growth of the Company and the Bank, as well as the values of, and earnings on, its assets and the costs of its deposits and other liabilities are subject to the influence of economic conditions generally, both domestic and foreign, and also to the monetary and fiscal policies of the United States and its agencies, particularly the Federal Reserve. The Federal Reserve regulates the supply of money through various means, including open market dealings in United States government securities, the discount rate at which banks may borrow from the Federal Reserve, and the reserve requirements on deposits.

The Federal Reserve lowered its target federal funds rate from 5.25% per annum on August 7, 2007 to 3.00% on January 30, 2008, and finally to 0-0.25% on December 16, 2008, where it remains today, and which the Federal Reserve has announced it intends to maintain through 2014. The Federal Reserve's discount rate, at 5.57% per annum on September 17, 2007, was steadily lowered to 4.75% on January 2, 2008, to 1.25% on October 28, 2008, and to 0.50% on December 16, 2008, where it remained until an increase on February 19, 2010 to 0.75%.

On April 30, 2010, the Federal Reserve Board amended Regulation D (Reserve Requirements of Depository Institutions) authorizing the Reserve Banks to offer term deposits to certain institutions. Term deposits, which are deposits with specified maturity dates, will be offered through a Term Deposit Facility (TDF). Term deposits will be one of several tools that the Federal Reserve could employ to drain reserves when policymakers judge that it is appropriate to begin moving to a less accommodative stance of monetary policy.

Beginning October 6, 2008, the Federal Reserve has been paying interest on depository institutions' required and excess reserve balances. The payment of interest on excess reserve balances was expected to give the Federal Reserve greater scope to use its lending programs to address conditions in credit markets while also maintaining the federal funds rate close to the target rate established by the Federal Open Market Committee. The Federal Reserve has indicated that it may use this authority to implement a mandatory policy to reduce excess liquidity, in the event of inflation or the threat of inflation.

In 2011, the Federal Reserve repealed Regulation Q to permit banks to pay interest on demand deposits. The Federal Reserve has also engaged in several rounds of quantitative easing (QE) to reduce interest rates by buying bonds, and Operation Twist to reduce long term interest rates by buying long term bonds, while selling intermediate term securities. In 2013, the Federal Reserve began to taper its bond purchases under QE.

Table of Contents

The nature and timing of any changes in such policies and their effect on the Company and the Bank cannot be predicted.

FDIC Insurance Assessments

The Bank's deposits are insured by the FDIC's DIF, and the Bank is subject to FDIC assessments for its deposit insurance, as well as assessments by the FDIC to pay interest on Financing Corporation (FICO) bonds.

The FDIC issued a final rule effective April 1, 2009 that changed the way that the FDIC's assessment system differentiates for risk, made corresponding changes to assessment rates beginning with the second quarter of 2009, and made other changes to the deposit insurance assessment rules. These rules included a decrease for long-term unsecured debt, including senior and subordinated debt and, for small institutions with assets under \$10 billion, a portion of Tier 1 capital; (2) an increase for secured liabilities above a threshold amount; and (3) an increase for brokered deposits above a threshold amount. These assessment rules increased assessments for banks that use brokered deposits above a threshold level to fund rapid asset growth.

In 2009, the Bank paid \$1.2 million in FDIC insurance premiums, including \$0.4 million for a special industry-wide FDIC deposit insurance assessment of five basis points of an institution's assets minus Tier 1 capital as of June 30, 2009. In addition, to restore the FDIC's Deposit Insurance Fund, all FDIC-insured institutions were required to prepay their deposit premiums for the next 3 years on December 30, 2009. The FDIC ruling also provided for maintaining the assessment rates at their current levels through the end of 2010, with a uniform increase of \$0.03 per \$100 of covered deposits effective January 1, 2011. On December 30, 2009, the Bank prepaid \$3.5 million of FDIC insurance premiums for the calendar quarters ending December 31, 2009 through December 31, 2012.

Effective April 1, 2011, and as discussed above under Recent Regulatory Developments, the FDIC began calculating assessments based on an institution's average consolidated total assets less its average tangible equity in accordance with changes mandated by the Dodd-Frank Act. The FDIC changed its assessment rates which shifted part of the burden of deposit insurance premiums toward depository institutions relying on funding sources other than U.S. deposits. Initial base assessment rates applicable to second quarter 2011 assessments (and prospectively until the DIF reserve ratio reaches 1.15 percent) are as follows:

Deposit Insurance	
Risk Category	Assessment Rate
I	5 to 9 basis points
II	14 basis points
III	23 basis points
IV	35 basis points

An institution's overall rate may be higher by as much as 10 basis points or lower by as much as 5 basis points depending on adjustments to the base rate for unsecured debt and/or brokered deposits. Furthermore, under the new system, different rate schedules will take effect when the DIF reserve ratio reaches certain levels. For example, for banks in risk category II, the initial base assessment rate will be 14 basis points when the DIF reserve ratio is below 1.15 percent, 12 basis points when the DIF reserve ratio is between 1.15 percent and 2 percent, 10 basis points when the DIF reserve ratio is between 2 percent and 2.5 percent and 9 basis points when the DIF reserve ratio is 2.5 percent or higher.

Since inception of the new schedule, the Bank's overall rate for assessment calculations has been 9 basis points or less, which is within the range of assessment rates for Risk Category I. The new methodology has reduced our expense related to FDIC insurance premiums in 2013, 2012 and 2011 compared to 2010. In 2010, the Company recorded \$1.0 million to expense for FDIC insurance premiums. In 2011, the Company recorded \$0.7 million in expense for FDIC insurance premiums, comprised of expense recognized for the first quarter of 2011 (under the old FDIC assessment rules), and expense recognized for the second, third and fourth quarters of 2011, respectively (under the new rules). In 2012 and 2013, the Company recorded \$0.6 million and \$0.5 million, respectively in expense for FDIC insurance premiums.

Table of Contents

In addition, all FDIC-insured institutions are required to pay a pro rata portion of the interest due on FICO bonds. FICO assessments are set by the FDIC quarterly and ranged from 1.02 basis points in the first quarter of 2011 to 0.68 basis points in the last quarter of 2011, 0.66 basis points in all four quarters in 2012 and 0.64 basis points in all four quarters of 2013. The FICO assessment rate for the first quarter of 2014 is 0.62 basis points. FICO assessments of approximately \$55,000, \$45,000, and \$44,000 were paid to the FDIC in 2011, 2012, and 2013, respectively.

TARP Capital Purchase Program and Small Business Lending Fund

The Company elected not to participate in the TARP Capital Purchase Program (CPP) or any other TARP Program, or under the Small Business Lending Fund (the SBLF), under the Small Business Jobs Act of 2010. We believed that we did not need funding under these programs.

Lending Practices

The federal bank regulatory agencies released guidance in 2006 on Concentrations in Commercial Real Estate Lending (the Guidance). The Guidance defines commercial real estate (CRE) loans as exposures secured by raw land, land development and construction (including 1-4 family residential construction), multi-family property, and non-farm nonresidential property where the primary or a significant source of repayment is derived from rental income associated with the property (that is, loans for which 50% or more of the source of repayment comes from third party, non-affiliated, rental income) or the proceeds of the sale, refinancing, or permanent financing of this property. Loans to REITs and unsecured loans to developers that closely correlate to the inherent risks in CRE markets would also be considered CRE loans under the Guidance. Loans on owner occupied CRE are generally excluded.

The Guidance requires that appropriate processes be in place to identify, monitor and control risks associated with real estate lending concentrations. This could include enhanced strategic planning, CRE underwriting policies, risk management, internal controls, portfolio stress testing and risk exposure limits as well as appropriately designed compensation and incentive programs. Higher allowances for loan losses and capital levels may also be required. The Guidance is triggered when either:

Total reported loans for construction, land development, and other land of 100% or more of a bank s total capital; or

Total reported loans secured by multifamily and nonfarm nonresidential properties and loans for construction, land development, and other land are 300% or more of a bank s total risk-based capital.

The Guidance also applies when a bank has a sharp increase in CRE loans or has significant concentrations of CRE secured by a particular property type.

The Guidance did not apply to the Bank s CRE lending activities at year-end 2013. At December 31, 2013, the Bank had outstanding \$36.5 million in construction and land development loans and \$154.0 million in total CRE loans (excluding owner occupied), which represent approximately 45.6% and 192.4%, respectively, of the Bank s total risk-based capital at December 31, 2013. The Company has always had significant exposures to loans secured by commercial real estate due to the nature of its markets and the loan needs of both its retail and commercial customers. The Company believes its long term experience in CRE lending, underwriting policies, internal controls, and other policies currently in place, as well as its loan and credit monitoring and administration procedures, are generally appropriate to managing its concentrations as required under the Guidance. The federal bank regulators continue to look at the risks of various assets and asset categories and risk management.

Other Dodd-Frank Act Provisions

The Dodd-Frank Act was signed into law on July 21, 2011. In addition to the capital, liquidity and FDIC deposit insurance changes discussed above, some of the provisions of the Dodd-Frank Act we believe may affect us are set forth below.

Financial Stability Oversight Council

The Dodd-Frank Act creates the Financial Stability Oversight Council or FSOC , which is chaired by the Secretary of the Treasury and composed of expertise from various financial services regulators. The FSOC has responsibility for identifying risks and responding to emerging threats to financial stability.

Table of Contents

Executive Compensation

The Dodd-Frank Act provides for a say on pay for shareholders of all public companies. Under the Dodd-Frank Act, each company must give its shareholders the opportunity to vote on the compensation of its executives at least once every three years. The Dodd-Frank Act also adds disclosure and voting requirements for golden parachute compensation that is payable to named executive officers in connection with sale transactions.

The SEC is required under the Dodd-Frank Act to issue rules obligating companies to disclose in proxy materials for annual meetings of shareholders information that shows the relationship between executive compensation actually paid to their named executive officers and their financial performance, taking into account any change in the value of the shares of a company's stock and dividends or distributions. The Dodd-Frank Act also provides that a company's compensation committee may only select a compensation consultant, legal counsel or other advisor after taking into consideration factors to be identified by the SEC that affect the independence of a compensation consultant, legal counsel or other advisor.

Section 954 of the Dodd-Frank Act added section 10D to the Exchange Act. Section 10D directs the SEC to adopt rules prohibiting a national securities exchange or association from listing a company unless it develops, implements, and discloses a policy regarding the recovery of executive compensation in certain circumstances. The policy must require that, in the event an accounting restatement due to material noncompliance with a financial reporting requirement under the federal securities laws, the company will recover from any current or former executive officer any incentive-based compensation (including stock options) received during the three year period preceding the date of the restatement, which is in excess of what would have been paid based on the restated financial statements. There is no requirement of wrongdoing by the executive, and the claw-back is mandatory and applies to all executive officers. Section 954 augments section 304 of the Sarbanes-Oxley Act of 2002 (SOX), which requires the CEO and CFO to return any bonus or other incentive or equity-based compensation received during the 12 months following the date of similarly inaccurate financial statements, as well as any profit received from the sale of employer securities during the period, if the restatement was due to misconduct. Unlike section 304, under which only the SEC may seek recoupment, the Dodd-Frank Act requires the company to seek the return of compensation. The SEC has yet to issue proposed rules under Section 954.

The Dodd-Frank Act requires the SEC, by rule, to require that each company disclose in the proxy materials for its annual meetings whether an employee or board member is permitted to purchase financial instruments designed to hedge or offset decreases in the market value of equity securities granted as compensation or otherwise held by the employee or board member.

Section 956 of the Dodd-Frank Act prohibits incentive-based compensation arrangements that encourage inappropriate risk taking by covered financial institutions and are deemed to be excessive, or that may lead to material losses. On June 21, 2010, the federal bank regulators adopted *Guidance on Sound Incentive Compensation Policies*, which, though targeted to larger, more complex organizations than the Company, includes principles that have been applied to smaller organizations similar to the Company. This Guidance applies to incentive compensation to executives as well as employees, who, individually or a part of a group, have the ability to expose the relevant banking organization to material amounts of risk. Incentive compensation should:

- Provide employees incentives that appropriately balance risk and reward;
- Be compatible with effective controls and risk-management;
- Be supported by strong corporate governance, including active and effective oversight by the organization's board of directors.

The federal bank regulators, the SEC and other regulators proposed regulations implementing Section 956 in April 2011, but no regulations have been adopted.

Other

The Dodd-Frank Act requires approximately 240-300 rulemakings and an estimated 130 studies. Many of the rules have not yet been proposed or adopted, and many are complex and require consultation among a variety of agencies, and their effects upon us, whether directly, or indirectly on the regulation and cost imposed on the markets and on others with whom we do business cannot be predicted.

Table of Contents

Corporate Governance

The Dodd-Frank Act clarifies that the SEC may, but is not required to promulgate rules that would require that a company's proxy materials include a nominee for the board of directors submitted by a shareholder.

The Dodd-Frank Act requires stock exchanges to have rules prohibiting their members from voting securities that they do not beneficially own (unless they have received voting instructions from the beneficial owner) with respect to the election of a member of the board of directors (other than an uncontested election of directors of an investment company registered under the Investment Company Act of 1940), executive compensation or any other significant matter, as determined by the SEC by rule.

Credit Ratings

The Dodd-Frank Act includes a number of provisions that are targeted at improving the reliability of credit ratings. The federal bank regulators and the SEC have adopted rules to implement the Act's requirement to delete references to rating agency ratings for various purposes, including investment securities, which are permissible bank investments.

Debit Card Interchange Fees

The Durbin Amendment to the Dodd-Frank Act provides for a set of new rules requiring that interchange transaction fees for electric debit transactions be reasonable and proportional to certain costs associated with processing the transactions. The Federal Reserve has established standards for assessing whether interchange fees are reasonable and proportional, which a Federal District Court has ruled were improperly adopted. The Federal Reserve is appealing, and the district court's ruling has been stayed. Since it has under \$10 billion in assets, the interchange rules do not apply to the Bank.

Derivatives

The Dodd-Frank Act requires a new regulatory system for the U.S. market for swaps and other over-the-counter derivatives, which includes strict capital and margin requirements, central clearing of standardized over-the-counter derivatives, and heightened supervision of over-the-counter derivatives dealers and major market participants. These rules could increase the costs and collateral required to utilize derivatives that we could find useful to reduce our interest rate and other risks.

Other Legislative and Regulatory Changes

Various legislative and regulatory proposals, in addition to those mandated by the Dodd-Frank Act, regarding substantial changes in banking, and the regulation of banks, thrifts and other financial institutions, compensation, and the regulation of financial markets and their participants and financial instruments, and the regulators of all of these, as well as the taxation of these entities, are being considered by the executive branch of the federal government, Congress and various state governments, including Alabama. Certain of these proposals, if adopted, could significantly change the regulation or operations of banks and the financial services industry. New regulations and statutes are regularly proposed that contain wide-ranging proposals for altering the structures, regulations and competitive relationships of the nation's financial institutions.

Table of Contents

ITEM 1A. RISK FACTORS

Any of the following risks could harm our business, results of operations and financial condition and an investment in our stock. The risks discussed below also include forward-looking statements, and our actual results may differ substantially from those discussed in these forward-looking statements.

There can be no assurance that recent legislation and administrative actions will improve the long term stability of the U.S. financial system.

Numerous actions by the U.S. Congress, the Federal Reserve, the Treasury, the FDIC, the SEC and other governmental authorities have been taken to address the liquidity and credit crisis that commenced in 2007. These measures include various laws regulations and other actions, including, but not limited to, those described under Supervision and Regulation.

We cannot predict the actual effects of the Dodd-Frank Act and the numerous rules already thereunder that have been adopted, proposed or which are required to be adopted but that have not been proposed or adopted yet, or various governmental, regulatory, and fiscal and monetary initiatives, studies and rulemakings which have been and may be enacted, adopted or proposed will have on the financial markets, our competitors, counterparties and customers and on us. The terms and costs of these activities, or the failure of these actions to continue to stabilize the financial markets, asset prices, market liquidity or a worsening of current financial market and economic conditions could materially and adversely affect our business, financial condition, results of operations, and the trading prices of our common stock.

Difficult market conditions have adversely affected our industry.

We are exposed to downturns in the U.S. economy, although the local markets in which we operate in East Alabama have not been as adversely affected as various other areas of the country. Although declines in the housing market appear to be stabilizing to improving, the declines in home prices and high levels of foreclosures, unemployment and under-employment since 2007, have negatively affected the credit performance of mortgage loans and resulted in significant write-downs of asset values by various financial institutions, including government-sponsored entities as well as major commercial and investment banks. This market turmoil and the tightening of available credit have led to increased levels of commercial and consumer delinquencies, reduced consumer confidence, increased market volatility and reductions in business activity, although signs of stabilization and some recovery are beginning to evolve. Failures have increased among financial services companies, and various companies, weakened by market conditions, have merged with other institutions. We believe the following, among other things, may affect us in 2014:

We expect to face further increased regulation of our industry as a result of Dodd-Frank Act rulemaking and other initiatives by the U.S. government and its regulatory agencies, including the CFPB. Compliance with such regulations may increase our costs, reduce our profitability, and limit our ability to pursue business opportunities and serve customers' needs.

Market developments, including employment and price levels, as well as personal income and after tax income in light of changes in federal taxes in January 2013, may affect consumer confidence levels from time to time in different directions, and may cause adverse changes in payment behaviors and payment rates, causing increases in delinquencies and default rates, which could affect our charge-offs and provisions for credit losses.

Our ability to assess the creditworthiness of our customers and those we do business with, and to estimate the values of our assets and collateral for loans may be impaired if the models and approaches we use become less predictive of future behaviors, valuations, assumptions or estimates. The process we use to estimate losses inherent in our credit exposure or estimate the value of certain assets requires difficult, subjective, and complex judgments, including forecasts of economic conditions and how these economic predictions might affect the ability of our borrowers to repay their loans or the value of assets.

Our ability to borrow from and engage in other business with other financial institutions on favorable terms or at all could be adversely affected by disruptions in the capital markets or other events, including, among other things, deteriorating investor expectations and changes in regulations.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

We have invested previously in trust preferred securities issued by various financial institutions, and purchased loan participations from other financial institutions. At year end 2013, we owned approximately \$1.1 million in FHLB-Atlanta stock and approximately \$0.4 million of stock in a correspondent bank. We sold our remaining investments in trust preferred securities in the fourth quarter of 2013 and at December 31, 2013 had only approximately \$1.4 million of loan participations purchased from others. We may

Table of Contents

purchase loans and loan participations or similar interests in the future, and our results of operations and financial condition could be adversely affected in the event the originating institutions or their borrowers experience financial difficulties or fail.

Failures of other depository institutions in our markets and increasing consolidation of financial services companies as a result of current market conditions could increase our deposits and assets and necessitate additional capital, and could have unexpected adverse effects upon us and our business.

The Volcker Rule, including final regulations adopted on December 10, 2013, may affect us adversely by reducing securities inventories at those institutions where we buy and sell securities for our portfolio and increasing the bid-ask spreads on securities we purchase or sell. These rules may decrease the range of permissible investments, such as collateral loan obligations (CLOs), which we could use to diversify our assets and for asset/liability management.

The soundness of other financial institutions could adversely affect us.

Our ability to engage in routine investment and banking transactions, as well as the quality and values of our investments in equity securities and obligations of other financial institutions, could be adversely affected by the actions, financial condition, and profitability of such other financial institutions with which we deal, including, without limitation, the FHLB and our correspondent banks. At December 31, 2013, the amortized cost of the Bank's investments in FHLB and our correspondent bank's common stock was approximately \$1.5 million. Financial services institutions are interrelated as a result of shared credits, trading, clearing, counterparty and other relationships. As a result, defaults by, or even rumors or questions about, one or more financial institutions, or the financial services industry generally, have led to market-wide liquidity problems, losses of depositor, creditor or counterparty confidence in certain institutions and could lead to losses or defaults by other institutions, and in some cases, failure of such institutions. Any losses, defaults by, or failures of, the institutions we do business with could adversely affect our holdings of the debt of and equity in, such other institutions, our participation interests in loans originated by other institutions, and our business, including our liquidity, financial condition and earnings.

Nonperforming and similar assets take significant time to resolve and may adversely affect our results of operations and financial condition.

At December 31, 2013, our nonaccrual loans totaled \$4.3 million, or 1.11% of total loans. In addition, we had approximately \$3.9 million of other real estate owned at December 31, 2013. Our non-performing assets may adversely affect our net income in various ways. We do not record interest income on nonaccrual loans or OREO and these assets require higher loan administration and other costs, thereby adversely affecting our income. Decreases in the value of these assets, or the underlying collateral, or in the related borrowers' performance or financial condition, whether or not due to economic and market conditions beyond our control, could adversely affect our business, results of operations and financial condition. In addition, the resolution of nonperforming assets requires commitments of time from management, which can be detrimental to the performance of their other responsibilities. There can be no assurance that we will not experience increases in nonperforming loans in the future.

Our allowance for loan losses may prove inadequate or we may be negatively affected by credit risk exposures.

Our business depends on the creditworthiness of our customers. We periodically review our allowance for loan losses for adequacy considering economic conditions and trends, collateral values and credit quality indicators, including past charge-off experience and levels of past due loans and nonperforming assets. We cannot be certain that our allowance for loan losses will be adequate over time to cover credit losses in our portfolio because of unanticipated adverse changes in the economy, market conditions or events adversely affecting specific customers, industries or markets, and changes in borrower behaviors. If the credit quality of our customer base materially decreases, if the risk profile of a market, industry or group of customers changes materially or weaknesses in the real estate markets persist or worsen, borrower payment behaviors change, or if our allowance for loan losses is not adequate, our business, financial condition, including our liquidity and capital, and results of operations could be materially adversely affected.

Weaknesses in the real estate markets, including the secondary market for residential mortgage loans, may continue to adversely affect us.

The effects of the CFPB changes to mortgage rules effective at the beginning of 2014, the effects of CFPB mortgage servicing rules that became effective in January 2014, enforcement actions, reviews and settlements, proposed changes in the securitization rules under the Dodd-Frank Act, and the Basel III Rules, combined with the continuing conservatorships of Fannie Mae and Freddie Mac, the levels of risky assets at the FHA and its relatively low reserves for losses, current

Table of Contents

levels of home sales, and the risks of interest rates increasing from historically low levels, could have serious adverse effects on the mortgage markets and our mortgage operations. Such effects could include, among other things, price reductions in single family home values, further adversely affecting the liquidity and value of collateral securing commercial loans for residential acquisition, construction and development, as well as residential mortgage loans that we hold, mortgage loan originations and gains on sale of mortgage loans. In March 2014, Senate Banking Committee leaders announced bipartisan legislation to substantially restructure Fannie Mae and Freddie Mac and their manner of operating. It is unknown whether this legislation will be adopted, and if adopted, what its effects may be.

Declining real estate prices and higher interest rates charged on mortgage loans have caused higher delinquencies and losses on certain mortgage loans, generally, particularly second lien mortgages and home equity lines of credit. Significant ongoing disruptions in the secondary market for residential mortgage loans have limited the market for and liquidity of most mortgage loans other than conforming Fannie Mae, Freddie Mac, and FHA loans. Declines in real estate values, low home sales volumes, financial stress on borrowers as a result of job losses or reduced incomes, interest rate increases, generally, including resets on adjustable rate mortgage loans, maturities of second lien mortgages or other factors could have further adverse effects on borrowers and changes in mortgage loan rules, could result in fewer mortgage originations, higher delinquencies and greater charge-offs in future periods, as well as increased regulation capital requirement which would adversely affect our financial condition, including capital and liquidity, and our results of operations. In the event our allowance for loan losses is insufficient to cover such losses, if any, our earnings, capital and liquidity could be adversely affected. Fannie Mae and Freddie Mac, the largest purchasers of residential mortgage loans, remain in federal conservatorship and the timing and effects of their resolution cannot be predicted.

Weaknesses in real estate markets may adversely affect the length of time and costs required to manage and dispose of, and the values realized from the sale of our OREO.

New CFPB residential mortgage origination rules may change our business and costs.

The CFPB's final regulations implementing the Dodd-Frank Act requirement that lenders determine whether a consumer has the ability to repay a mortgage loan became effective in January 2014. These encourage the origination of residential mortgages that meet the new requirements for qualified mortgages. These may adversely affect our product offerings, reduce our mortgage origination volume and increase our costs to originate residential mortgage loans, which could adversely affect our results of operation and financial condition, especially where residential mortgage origination volume is declining, generally.

We may be contractually obligated to repurchase mortgage loans we sold to third parties on terms unfavorable to us.

As a routine part of its business, the Company originates mortgage loans that it subsequently sells in the secondary market, including to governmental agencies and government sponsored entities, such as Fannie Mae. In connection with the sale of these loans, the Company makes customary representations and warranties, the breach of which could result in the Company being required to repurchase the loan or loans. Furthermore, the amount paid may be greater than the fair value of the loan or loans at the time of the repurchase. Requests for mortgage loan repurchases have increased generally in recent years, although we have received no such requests in 2013. Such requests, if these increased, could require the establishment of reserves for possible repurchases and adversely affect our results of operation and financial condition.

Servicing requirements may change and require us to incur additional costs and risks.

On February 9, 2012, the DOJ and various state attorneys general announced a \$25 billion agreement with the nation's five largest mortgage servicers to address mortgage loan servicing and foreclosure abuses. While we were not a party to the settlement or a subject of the joint governmental investigation, we cannot be assured that the settlement may ultimately affect mortgage servicing standards generally, which could increase compliance and other costs of servicing residential mortgage loans. The CFPB continues to bring enforcement actions and develop proposals and rules that could increase the costs of providing mortgage servicing. This could reduce our income from servicing these types of loans and make it more difficult and costly to timely realize the value of collateral securing such loans upon a borrower default.

Changes in residential servicing regulations may have adverse effects on our resales and servicing of residential mortgage loans.

The CFPB adopted new residential mortgage servicing standards in January 2014 that add additional servicing requirements and that will increase our required servicer activities and delay foreclosures, among other things. These may adversely affect our costs to service residential mortgage loans, and together with the Basel III Rules, may decrease the returns on our MSRs.

Table of Contents

Fannie Mae and Freddie Mac restructuring may adversely affect the mortgage markets and our sales of mortgages we originated

Fannie Mae and Freddie Mac remain in conservatorship. Recently, bi-partisan legislation was introduced in the U.S. Senate to restructure Fannie Mae and Freddie Mac to take them out of conservatorship and substantially change the way they conduct business in the future. Since these two entities dominate the residential mortgage markets, any changes could adversely affect our residential mortgage origination and servicing businesses and our results of operation and the returns on capital deployed in these businesses.

Our concentration of commercial real estate loans could result in further increased loan losses, and adversely affect our business, earnings, and financial condition.

Commercial real estate, or CRE, is cyclical and poses risks of possible loss due to concentration levels and risks of the assets being financed, which include loans for the acquisition and development of land and residential construction. We had 54.7 % of our portfolio in CRE loans, as defined by the Federal Reserve, at year-end 2013 compared to 55.1 % at year-end 2012. The banking regulators continue to give CRE lending greater scrutiny, and require banks with higher levels of CRE loans to implement improved underwriting, internal controls, risk management policies and portfolio stress testing, as well as higher levels of allowances for possible losses and capital levels as a result of CRE lending growth and exposures. Continued low demand for CRE, reduced availability of, and higher costs for, CRE lending could adversely affect our CRE loans and sales of our OREO, and therefore our earnings and financial condition, including our capital and liquidity.

We have experienced high levels of market volatility.

The capital and credit markets have experienced volatility and disruption since 2007. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial condition or performance. Although market disruptions and volatility appear more stable currently, there can be no assurance that we will not experience future market conditions and volatility, which may have material adverse effects on our ability to access capital and on our business, financial condition (including liquidity) and results of operations.

Our ability to realize our deferred tax assets may be reduced in the future if our estimates of future taxable income from our operations and tax planning strategies do not support this amount, and the amount of net operating loss carry-forwards realizable for income tax purposes may be reduced under Section 382 of the Internal Revenue Code by sales of our capital securities.

We are allowed to carry-back losses for five years for Federal income tax purposes as otherwise permitted generally under the Worker, Homeownership, and Business Assistance Act of 2009 which was signed into law on November 6, 2009. As of December 31, 2013, we had net deferred tax assets of \$5.4 million. These and future deferred tax assets may be further reduced in the future if our estimates of future taxable income from our operations and tax planning strategies do not support the amount of the deferred tax asset. The amount of net operating loss carry-forwards realizable for income tax purposes potentially could be further reduced under Section 382 of the Internal Revenue Code by a significant offering and/or other sales of our capital securities. The Basel III Rules reduce the regulatory capital benefits of deferred tax assets, also.

Our future success is dependent on our ability to compete effectively in highly competitive markets.

The East Alabama banking markets in which we do business are highly competitive and our future growth and success will depend on our ability to compete effectively in these markets. We compete for loans, deposits and other financial services in our markets with other local, regional and national commercial banks, thrifts, credit unions, mortgage lenders, and securities and insurance brokerage firms. Many of our competitors offer products and services different from us, and have substantially greater resources, name recognition and market presence than we do, which benefits them in attracting business. In addition, larger competitors may be able to price loans and deposits more aggressively than we are able to and have broader and more diverse customer and geographic bases to draw upon. The Dodd-Frank Act allows others to branch into our markets more easily from other states. Failures of other banks with offices in our markets could also lead to the entrance of new, stronger competitors in our markets.

Table of Contents

Our success depends on local economic conditions where we operate.

Our success depends on the general economic conditions in the geographic markets we serve in Alabama. The local economic conditions in our markets have a significant effect on our commercial, real estate and construction loans, the ability of borrowers to repay these loans and the value of the collateral securing these loans. Adverse changes in the economic conditions of the Southeastern United States in general, or in one or more of our local markets could negatively affect our results of operations and our profitability.

Our cost of funds may increase as a result of general economic conditions, interest rates, inflation and competitive pressures.

The Federal Reserve has taken aggressive actions to reduce interest rates generally, and the federal government continues large deficit spending. Our cost of funds may increase as a result of general economic conditions, interest rates and competitive pressures, and potential inflation resulting from government deficit spending and monetary policies. Traditionally, we have obtained funds principally through local deposits and borrowings from other institutional lenders. Generally, we believe local deposits are a cheaper and more stable source of funds than borrowings because interest rates paid for local deposits are typically lower than interest rates charged for borrowings from other institutional lenders. Increases in interest rates could also change consumers to shift their funds to more interest bearing instruments and to increase the competition for funds. The effects of the tapering of Federal Reserve bond purchases under QE are unpredictable and while the Federal Reserve has indicated it will seek to maintain low interest rates, interest rates could increase more than anticipated. See Fiscal and Monetary Policy .

The Federal Reserve has acknowledged the possibility of further recession and deflation. Should this occur, the financial services industry and our business could be adversely affected.

The recovery of the U.S. economy continues to progress slowly; national unemployment remains high at 6.7% in February 2014, and despite recent improvements, the housing market remains an important downside risk, subject to the risks of increases in interest rates and declining origination volumes. The restructuring of Fannie Mae and Freddie Mac, which dominate the residential mortgage markets, could adversely affect housing and the mortgage markets. Given the concerns about the U.S. economy and the costs of complying with new healthcare laws, U.S. employers continue to approach hiring with caution, and as a result unemployment may continue at high levels. Monetary and fiscal policy measures, including federal income tax changes at the beginning of 2013, may adversely affect the recovery, unemployment levels, and long-term stability in the financial markets. Any shift from fiscal stimulus efforts to fiscal restraint, and higher income and other taxes and government-imposed increased costs, such as those under the Affordable Care Act, could adversely affect disposable income, the economy, and cause instability in the financial markets. Various governments in Europe have announced budget reductions and/or austerity measures as a means to limit fiscal budget deficits as a result of the economic crisis. Additionally, many state and local governments in the U.S. have also implemented budget reductions. Such economic factors could affect us in a variety of substantial and unpredictable ways, as well as affect our borrowers' ability and willingness to meet their repayment obligations. These factors could have a material adverse effect on our results of operation and financial condition, liquidity and earnings.

Our profitability and liquidity may be affected by changes in interest rates and interest rate levels, the shape of the yield curve and economic conditions.

Our profitability depends upon net interest income, which is the difference between interest earned on assets, and interest expense on interest-bearing liabilities, such as deposits and borrowings. Net interest income will be adversely affected if market interest rates change where the interest we pay on deposits and borrowings increases faster than the interest earned on loans and investments. Interest rates, and consequently our results of operations, are affected by general economic conditions (domestic and foreign) and fiscal and monetary policies, as well as expectations of these rates and policies and the shape of the yield curve. Decreases in interest rates generally increase the market values of fixed-rate, interest-bearing investments and loans held, and increase the values of loan sales and mortgage loan activities. However, the production of mortgages and other loans and the value of collateral securing our loans, are dependent on demand within the markets we serve, as well as interest rates. While stabilizing to increasing, the levels of sales, as well as the values of real estate in our markets generally remain below the levels of several years ago. Declining interest rates reflect efforts by the Federal Reserve to stimulate the economy, but such efforts may not be effective, and otherwise adversely affect our net interest margin and thus may negatively affect our results of operations and financial condition, liquidity and earnings. Tapering of QE by the Federal Reserve, especially reductions in the Federal Reserve's purchases of residential mortgage-backed securities, could increase mortgage rates and decrease origination volumes, which have been declining generally in the second half of 2013.

Table of Contents

Increases in interest rates generally decrease the market values of fixed-rate, interest-bearing investments and loans held and the production of mortgage and other loans and the value of collateral securing our loans, and therefore may adversely affect our liquidity and earnings, to the extent not offset by potential increases in our net interest margin.

Liquidity risks could affect operations and jeopardize our financial condition.

Liquidity is essential to our business. An inability to raise funds through deposits, borrowings, the repayment or sale of loans and other sources could have a substantial negative effect on our liquidity. Our funding sources include federal funds purchased securities sold under repurchase agreements, core and non-core deposits, and short- and long-term debt. We are also members of the FHLB and the Federal Reserve Bank of Atlanta, where we can obtain advances collateralized with eligible assets. We maintain a portfolio of securities that can be used as a source of liquidity. There are other sources of liquidity available to the Company or the Bank should they be needed, including our ability to acquire additional non-core deposits. We may be able, depending upon market conditions, to issue and sell debt securities, and preferred or common securities in public or private transactions. Our access to funding sources in amounts adequate to finance or capitalize our activities or on terms which are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy in general. Our ability to borrow or obtain funding, if needed, could also be impaired by factors that are not specific to us, such as further disruption in the financial markets or negative views and expectations about the prospects for the financial services industry in light of the recent turmoil faced by banking organizations and the continued deterioration in credit markets, as well as the financial condition, liquidity and profitability of the financial institutions we deal with.

We are subject to extensive regulation that could limit or restrict our activities and adversely affect our earnings.

We and our subsidiaries are regulated by several regulators, including the Federal Reserve, the Alabama Superintendent, the SEC and the FDIC. Our success is affected by state and federal regulations affecting banks and bank holding companies, and the securities markets, and our costs of compliance could adversely affect our earnings. Banking regulations are primarily intended to protect depositors, not shareholders. The financial services industry also is subject to frequent legislative and regulatory changes and proposed changes, and a large number of required Dodd-Frank Act rules have yet to be proposed or finalized, and the effects of all these cannot be predicted. Federal bank regulatory agencies and the Treasury, as well as the Congress and the President, are evaluating the regulation of banks, other financial services providers and the financial markets and such changes, if any, could require us to maintain more capital and liquidity, and restrict our activities, which could adversely affect our growth, profitability and financial condition. Our consumer finance products, including residential mortgage loans, are subject to CFPB regulations and evolving standards reflecting CFPB releases, rule-making and enforcement actions.

Changes in accounting and tax rules applicable to banks could adversely affect our financial conditions and results of operations.

From time to time, the Financial Accounting Standards Board (the FASB) and the SEC change the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in us restating prior period financial statements. FASB has proposed for comment significant changes to the manner in which banks' allowance for loan losses would be calculated.

We are subject to internal control reporting requirements that increase compliance costs and failure to comply timely could adversely affect our reputation and the value of our securities.

We are required to comply with various corporate governance and financial reporting requirements under the Sarbanes-Oxley Act of 2002, as well as rules and regulations adopted by the SEC, the Public Company Accounting Oversight Board and Nasdaq. In particular, we are required to report on internal controls as part of our annual report on Form 10-K pursuant to Section 404 of the Sarbanes-Oxley Act. We expect to continue to spend significant amounts of time and money on compliance with these rules. Our failure to comply with these internal control rules may materially adversely affect our reputation, ability to obtain the necessary certifications to financial statements, and the value of our securities.

Table of Contents

We are required to maintain capital to meet regulatory requirements, and if we fail to maintain sufficient capital, our financial condition, liquidity and results of operations would be adversely affected.

We and the Bank must meet regulatory capital requirements and maintain sufficient liquidity, including liquidity at the Company, as well as the Bank. If we fail to meet these capital and other regulatory requirements, including more rigorous requirements arising from our regulators implementation of Basel III, our financial condition, liquidity and results of operations would be materially and adversely affected. Our failure to remain well capitalized and well managed, including meeting the Basel III capital conservation buffers, for bank regulatory purposes could affect customer confidence, our ability to grow, our costs of funds and FDIC insurance, our ability to raise brokered deposits, our ability to pay dividends on our common stock and our ability to make acquisitions, and we would no longer meet the requirements for becoming a financial holding company. These could also affect our ability to use discretionary bonuses to attract and retain quality people.

The Dodd-Frank Act restricts our future issuance of trust preferred securities and cumulative preferred securities as eligible Tier 1 risk-based capital for purposes of the regulatory capital guidelines for bank holding companies.

Under the Dodd-Frank Act, banks and thrift holding companies with assets of less than \$15 billion as of December 31, 2009 will be permitted to include trust preferred securities that were issued before May 19, 2010 as Tier 1 capital, only bank holding companies with assets of less than \$500 million will be permitted to continue to issue trust preferred securities and have them count as Tier 1 capital. Accordingly, should we determine it is advisable, or should our regulators require us, based upon new capital or liquidity regulations or otherwise, to raise additional Tier 1 risk-based capital, we would not be able to issue additional trust preferred securities, and would instead have to issue preferred stock or common equity. To the extent we issue new equity, it could result in dilution to our shareholders. To the extent we issue preferred stock, dividends on the preferred stock, unlike distributions paid on trust preferred securities, would not be tax deductible, and the preferred stock would have a preference in liquidation and in dividends to our common stock.

We may need to raise additional capital in the future, but that capital may not be available when it is needed or on favorable terms.

We anticipate that our current capital resources will satisfy our capital requirements for the foreseeable future under currently effective rules. We may, however, need to raise additional capital to support our growth or currently unanticipated losses, or to meet the needs of our communities, resulting from failures or cutbacks by our competitors, and the Basel III Rules. Our ability to raise additional capital, if needed, will depend, among other things, on conditions in the capital markets at that time, which are currently disrupted and limited by events outside our control, and on our financial performance. If we cannot raise additional capital on acceptable terms when needed, our ability to further expand our operations through internal growth and acquisitions could be limited.

Future acquisitions and expansion activities may disrupt our business, dilute shareholder value and adversely affect our operating results.

We regularly evaluate potential acquisitions and expansion opportunities, including new branches and other offices. To the extent that we grow through acquisitions, we cannot assure you that we will be able to adequately or profitably manage this growth. Acquiring other banks, branches, or businesses, as well as other geographic and product expansion activities, involve various risks including:

risks of unknown or contingent liabilities;

unanticipated costs and delays;

risks that acquired new businesses will not perform consistent with our growth and profitability expectations;

risks of entering new markets or product areas where we have limited experience;

risks that growth will strain our infrastructure, staff, internal controls and management, which may require additional personnel, time and expenditures;

exposure to potential asset quality issues with acquired institutions;

difficulties, expenses and delays of integrating the operations and personnel of acquired institutions;

Table of Contents

potential disruptions to our business;

possible loss of key employees and customers of acquired institutions;

potential short-term decreases in profitability; and

diversion of our management's time and attention from our existing operations and business.

Attractive acquisition opportunities may not be available to us in the future.

While we seek continued organic growth, we also may consider the acquisition of other businesses. We expect that other banking and financial companies, many of which have significantly greater resources, will compete with us to acquire financial services businesses. This competition could increase prices for potential acquisitions that we believe are attractive. Also, acquisitions are subject to various regulatory approvals. If we fail to receive the appropriate regulatory approvals, we will not be able to consummate an acquisition that we believe is in our best interests, and regulatory approvals could contain conditions that reduce the anticipated benefits of any transaction. Among other things, our regulators consider our capital, liquidity, profitability, regulatory compliance and levels of goodwill and intangibles when considering acquisition and expansion proposals. Any acquisition could be dilutive to our earnings and shareholders' equity per share of our common stock.

Technological changes affect our business, and we may have fewer resources than many competitors to invest in technological improvements.

The financial services industry is undergoing rapid technological changes with frequent introductions of new technology-driven products and services. In addition to serving clients better, the effective use of technology may increase efficiency and may enable financial institutions to reduce costs. Our future success will depend, in part, upon our ability to use technology to provide products and services that provide convenience to customers and to create additional efficiencies in operations. We may need to make significant additional capital investments in technology in the future, and we may not be able to effectively implement new technology-driven products and services. Many competitors have substantially greater resources to invest in technological improvements.

Our information systems may experience an interruption or security breach.

We rely heavily on communications and information systems, including those provided by third-party service providers, to conduct our business. Any failure, interruption, or security breach of these systems could result in failures or disruptions which could affect our customers' privacy and our customer relationships, generally. While we have policies and procedures designed to prevent or limit the effect of the possible failure, interruption, cyber-attack, or security breaches, there is no assurance that these events will not occur and, if they do occur, that they will be adequately addressed without undue effects on our business, including loss of customers and added costs. In addition to the immediate costs of any failure, interruption or security breach, including those at our third-party service providers, these events could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our financial condition and results of operations. Cyber attacks are increasing in general, and are a regulatory and business focus, as is vendor management for third parties who supply us with services, including information technology and customer products.

Severe weather, natural disasters, acts of war or terrorism or other external events could have significant effects on our business.

Severe weather and natural disasters, including hurricanes, tornados, drought and floods, acts of war or terrorism or other external events could have a significant effect on our ability to conduct business. Such events could affect the stability of our deposit base; impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. Although management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

Table of Contents

Our ability to continue to pay dividends to shareholders in the future is subject to profitability, capital, liquidity and regulatory requirements and these limitations may prevent us from paying dividends in the future.

Cash available to pay dividends to our shareholders is derived primarily from dividends paid to the Company by the Bank. The ability of the Bank to pay dividends, as well as our ability to pay dividends to our shareholders, will continue to be subject to and limited by the results of operations of our subsidiaries and our need to maintain appropriate liquidity and capital at all levels of our business consistent with regulatory requirements and the needs of our businesses. *See* Supervision and Regulation .

A limited trading market exists for our common shares, which could lead to price volatility.

Your ability to sell or purchase common shares depends upon the existence of an active trading market for our common stock. Although our common stock is quoted on the Nasdaq Global Market, the volume of trades on any given day has been limited historically. As a result, you may be unable to sell or purchase shares of our common stock at the volume, price and time that you desire. Additionally, whether the purchase or sales prices of our common stock reflects a reasonable valuation of our common stock also is affected by an active trading market, and thus the price you receive for a thinly-traded stock such as common stock, may not reflect its true or intrinsic value. The limited trading market for our common stock may cause fluctuations in the market value of our common stock to be exaggerated, leading to price volatility in excess of that which would occur in a more active trading market.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. DESCRIPTION OF PROPERTY

The Bank conducts its business from its main office and nine full-service branches. The Bank also operates commercial loan production offices in Montgomery and Phenix City, Alabama. The bank owns its main office building, which is located in downtown Auburn, Alabama, and has approximately 16,150 square feet of space. The original building was constructed in 1964, and an addition was completed in 1981. Portions of the building have been renovated to accommodate growth and changes in the Bank's operational structure and to adapt to technological changes. The main office offers the full line of the Bank's services and has one ATM. The Bank completed construction on a new drive-through facility located on the main office campus in October 2012. This drive-through facility has five drive-through lanes, including an ATM, and a walk-up teller window.

The Bank also owns a commercial office building, the AuburnBank Center (the Center), which is located next to the Bank's main office. The Center has approximately 23,000 square feet of space. The Bank's mortgage division, data processing activities, as well as other operations, are located in the Center. In total, the main office and Center parking lots provide parking for approximately 196 vehicles.

The Bank's Auburn Kroger branch was opened in August 1988 and is located in the Kroger supermarket in the Corner Village Shopping Center in Auburn, Alabama. The bank leases approximately 500 square feet of space for this branch. In September 2008, the Bank entered into a new lease agreement with the Kroger Corporation for five years with options for two 5-year extensions. In September 2013, the Bank exercised its option to extend the lease for another five years. This branch offers the full line of the Bank's deposit and other services including an ATM, except safe deposit boxes.

The Opelika branch is located in Opelika, Alabama. This branch, built in 1991, is owned by the Bank and has approximately 4,000 square feet of space. This branch offers the full line of the Bank's services and has drive-through windows and an ATM. This branch offers parking for approximately 36 vehicles.

The Bank's Hurtsboro branch was opened in June 1999. This branch is located in Hurtsboro, Alabama, about 35 miles south of Auburn, Alabama. The Bank owns this branch, which has approximately 1,000 square feet of space. The Bank leases the land for this branch from a third party. In June 2009, the Bank exercised its option to extend the lease for another five years. This branch offers the full line of the Bank's services including safe deposit boxes, a drive-through window and an ATM. This branch offers parking for approximately 12 vehicles, including a handicapped ramp.

The Bank's Auburn Wal-Mart Supercenter branch was opened in September 2000 inside the Wal-Mart shopping center on the south side of Auburn, Alabama. The lease is for approximately 700 square feet of space in the Wal-Mart. In September 2010, the Bank exercised its option to extend the lease for another five years. This branch offers the full line of the Bank's deposit and other services, including an ATM, except safe deposit boxes.

Table of Contents

The Bank's Notasulga branch was opened in August 2001. This branch is located in Notasulga, Alabama, about 15 miles south of Auburn, Alabama. This branch is owned by the Bank and has approximately 1,344 square feet of space. The Bank leased the land for this branch from a third party. In May 2012, the Bank's land lease renewed for another three year term. This branch offers the full line of the Bank's services including safe deposit boxes and a drive-through window. This branch offers parking for approximately 11 vehicles, including a handicapped ramp.

In July 2002, the Bank's Opelika Wal-Mart Supercenter branch was opened inside the Wal-Mart shopping center in Opelika, Alabama. In June 2012, the Bank exercised its option to extend the lease for another five years. The lease is for approximately 700 square feet of space in the Wal-Mart. This branch offers the full line of the Bank's deposits and other services including an ATM, except safe deposit boxes.

In November 2002, the Bank opened a loan production office in Phenix City, Alabama, about 35 miles south of Auburn, Alabama. In November 2013, the Bank renewed its lease for another year.

In July 2007, the Bank opened a new branch located in the Kroger supermarket in the TigerTown retail center in Opelika, Alabama. The Bank entered into a lease agreement with the Kroger Corporation for five years with options for two 5-year extensions. In July 2012, the Bank exercised its option to extend the lease for another five years. The Branch offers the full line of bank deposit and other services including an ATM, except for safe deposit boxes.

In February 2009, the Bank opened a branch located on Bent Creek Road in Auburn, Alabama. This branch is owned by the Bank and has approximately 4,000 square feet of space. This branch offers the full line of the Bank's services and has drive-through windows and a drive-up ATM. This branch offers parking for approximately 29 vehicles.

In September 2011, the Bank opened a loan production office in Montgomery, Alabama, about 50 miles west of Auburn, Alabama. In August 2013, the Bank renewed its lease for another two years.

In December 2011, the Bank opened a branch located on Fob James Drive in Valley, Alabama, about 30 miles northeast of Auburn, Alabama. This branch is owned by the Bank and has approximately 5,000 square feet of space. This branch offers the full line of the Bank's services and has drive-through windows and a drive-up ATM. This branch offers parking for approximately 35 vehicles. Prior to December 2011, the Bank leased office space for a loan production office in Valley, Alabama. The loan production office was originally opened in September 2004.

ITEM 3 LEGAL PROCEEDINGS

In the normal course of its business, the Company and the Bank from time to time are involved in legal proceedings. The Company's management believe there are no pending or threatened legal proceedings that, upon resolution, are expected to have a material adverse effect upon the Company's or the Bank's financial condition or results of operations.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's Common Stock is listed on the Nasdaq Global Market, under the symbol AUBN. As of March 14, 2014, there were approximately 3,643,173 shares of the Company's Common Stock issued and outstanding, which were held by approximately 442 shareholders of record. The following table sets forth, for the indicated periods, the high and low closing sale prices for the Company's Common Stock as reported on the Nasdaq Global Market, and the cash dividends declared to shareholders during the indicated periods.

	Closing Price Per Share (1)		Cash Dividends Declared
	High	Low	
2013			
First Quarter	\$ 22.60	\$ 20.80	\$ 0.21
Second Quarter	22.33	21.54	0.21
Third Quarter	24.71	22.00	0.21
Fourth Quarter	25.75	23.93	0.21
2012			
First Quarter	\$ 21.99	\$ 18.23	\$ 0.205
Second Quarter	26.65	21.50	0.205
Third Quarter	23.20	21.00	0.205
Fourth Quarter	24.87	20.85	0.205

(1) The price information represents actual transactions.

The Company has paid cash dividends on its capital stock since 1985. Prior to this time, the Bank paid cash dividends since its organization in 1907, except during the Depression years of 1932 and 1933. Holders of Common Stock are entitled to receive such dividends as may be declared by the Company's Board of Directors. The amount and frequency of cash dividends will be determined in the judgment of the Board based upon a number of factors, including the Company's earnings, financial condition, capital requirements and other relevant factors. The Board currently intends to continue its present dividend policies.

Federal Reserve policy could restrict future dividends on our Common Stock, depending on our earnings and capital position and likely needs. See SUPERVISION AND REGULATION Payment of Dividends and MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS CAPITAL ADEQUACY.

The amount of dividends payable by the Bank is limited by law and regulation. The need to maintain adequate capital in the Bank also limits dividends that may be paid to the Company.

Table of Contents**Performance Graph**

The following performance graph compares the cumulative, total return on the Company's Common Stock from December 31, 2008 to December 31, 2013, with that of the Nasdaq Composite Index and SNL Southeast Bank Index (assuming a \$100 investment on December 31, 2008). Cumulative total return represents the change in stock price and the amount of dividends received over the indicated period, assuming the reinvestment of dividends.

ITEM 6. SELECTED FINANCIAL DATA

See Table 2 Selected Financial Data and general discussion in Item 7, MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is a discussion of our financial condition at December 31, 2013 and 2012 and our results of operations for the years ended December 31, 2013, 2012, and 2011. The purpose of this discussion is to provide information about our financial condition and results of operations which is not otherwise apparent from the consolidated financial statements. The following discussion and analysis should be read along with our consolidated financial statements and the related notes included elsewhere herein. In addition, this discussion and analysis contains forward-looking statements, so you should refer to Item 1A, Risk Factors and Special Cautionary Notice Regarding Forward-Looking Statements.

OVERVIEW

The Company was incorporated in 1990 under the laws of the State of Delaware and became a bank holding company after it acquired its Alabama predecessor, which was a bank holding company established in 1984. The Bank, the Company's principal subsidiary, is an Alabama state-chartered bank that is a member of the Federal Reserve System and has operated continuously since 1907. Both the Company and the Bank are headquartered in Auburn, Alabama. The Bank conducts its business primarily in East Alabama, including Lee County and surrounding areas. The Bank operates full-service branches in Auburn, Opelika, Hurtsboro, Notasulga and Valley, Alabama. In-store branches are located in the Kroger and Wal-Mart SuperCenter stores in both Auburn and Opelika. The Bank also operates commercial loan production offices in Montgomery and Phenix City, Alabama.

Summary of Results of Operations

	Year ended December 31		
	2013	2012	2011
<i>(Dollars in thousands, except per share data)</i>			
Net interest income (a)	\$ 22,362	\$ 22,539	\$ 20,944
Less: tax-equivalent adjustment	1,440	1,642	1,719
Net interest income (GAAP)	20,922	20,897	19,225
Noninterest income	7,298	10,483	5,177
Total revenue	28,220	31,380	24,402
Provision for loan losses	400	3,815	2,450
Noninterest expense	18,412	19,383	16,357
Income tax expense	2,290	1,419	57
Net earnings	\$ 7,118	\$ 6,763	\$ 5,538
Basic and diluted earnings per share	\$ 1.95	\$ 1.86	\$ 1.52

(a) Tax-equivalent. See Table 1 - Explanation of Non-GAAP Financial Measures.

Financial Summary

The Company's net earnings were \$7.1 million, or \$1.95 per share, for the full year 2013, compared to \$6.8 million, or \$1.86 per share, for the full year 2012.

Net interest income (tax-equivalent) was \$22.4 million for the full year 2013, compared to \$22.5 million for the full year 2012. Although net interest income (tax-equivalent) declined slightly, continued improvement in the Company's funding mix and cost of funds largely offset declining yields on earning assets.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

The provision for loan losses was \$0.4 million for the full year 2013, compared to \$3.8 million for the full year 2012. The decrease in the provision for loan losses was primarily due to a decline in net charge-offs and improvement in the overall credit quality of the loan portfolio, including lower levels of adversely classified and nonperforming loans. Net charge-offs were \$1.9 million, or 0.48% of average loans, for the full year 2013, compared to \$4.0 million, or 1.03% of average loans, for the full year 2012. This decrease was primarily due to a decline in net charge-offs for commercial real estate loans. In 2012, net charge-offs were impacted by a few individually significant charge-offs, including \$3.1 million related to three borrowing relationships.

Table of Contents

Noninterest income was \$7.3 million in 2013, compared to \$10.5 million in 2012. The decrease was primarily due to a non-recurring gain of \$3.3 million realized in 2012 when the Company sold its interests in three affordable housing limited partnerships and a decrease in mortgage lending income of \$0.6 million as rising rates negatively impacted refinance activity. These decreases were partially offset by a \$1.0 million gain on sale of premises and equipment realized in 2013 when the Company sold certain real property in downtown Auburn that was no longer used for Company operations and was fully leased to third party tenants.

Noninterest expense was \$18.4 million in 2013, compared to \$19.4 million in 2012. The decrease was primarily due to a decrease in prepayment penalties on long-term debt of \$0.7 million. During 2013, the Company repaid \$35.0 million long-term debt with a weighted average interest rate of 3.46% and incurred prepayment penalties of \$3.0 million. During 2012, the Company repaid \$38.0 million of long-term debt with a weighted average interest rate of 4.26% and incurred prepayment penalties of \$3.7 million.

Income tax expense for the full year 2013 was \$2.3 million, compared to \$1.4 million for the full year 2012. The Company's effective income tax rate was 24.34% for the full year 2013, compared to 17.34% for the full year 2012. In addition to a 15% increase in the level of earnings before taxes, the Company's effective tax rate increased because the Company's annualized effective tax rate for 2012 was reduced by the reversal of a \$0.5 million deferred tax valuation allowance related to capital loss carry-forwards.

In 2013, the Company paid cash dividends of \$3.1 million, or \$0.84 per share. The Company remains well capitalized under current regulatory guidelines with a total risk-based capital ratio of 18.40%, a tier one risk-based capital ratio of 17.19%, and a tier one leverage capital ratio of 10.10% at December 31, 2013.

CRITICAL ACCOUNTING POLICIES

The accounting and financial reporting policies of the Company conform with U.S. generally accepted accounting principles and with general practices within the banking industry. In connection with the application of those principles, we have made judgments and estimates which, in the case of the determination of our allowance for loan losses, our assessment of other-than-temporary impairment, recurring and non-recurring fair value measurements, the valuation of other real estate owned, and the valuation of deferred tax assets, were critical to the determination of our financial position and results of operations. Other policies also require subjective judgment and assumptions and may accordingly impact our financial position and results of operations.

Allowance for Loan Losses

The Company assesses the adequacy of its allowance for loan losses prior to the end of each calendar quarter. The level of the allowance is based upon management's evaluation of the loan portfolio, past loan loss experience, current asset quality trends, known and inherent risks in the portfolio, adverse situations that may affect a borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan loss rates and other pertinent factors, including regulatory recommendations. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Loans are charged off, in whole or in part, when management believes that the full collectability of the loan is unlikely. A loan may be partially charged-off after a confirming event has occurred which serves to validate that full repayment pursuant to the terms of the loan is unlikely.

The Company deems loans impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Collection of all amounts due according to the contractual terms means that both the interest and principal payments of a loan will be collected as scheduled in the loan agreement.

An impairment allowance is recognized if the fair value of the loan is less than the recorded investment in the loan. The impairment is recognized through the allowance. Loans that are impaired are recorded at the present value of expected future cash flows discounted at the loan's effective interest rate, or if the loan is collateral dependent, impairment measurement is based on the fair value of the collateral, less estimated disposal costs.

The level of allowance maintained is believed by management to be adequate to absorb probable losses inherent in the portfolio at the balance sheet date. The allowance is increased by provisions charged to expense and decreased by charge-offs, net of recoveries of amounts previously charged-off.

Table of Contents

In assessing the adequacy of the allowance, the Company also considers the results of its ongoing internal and independent loan review processes. The Company's loan review process assists in determining whether there are loans in the portfolio whose credit quality has weakened over time and evaluating the risk characteristics of the entire loan portfolio. The Company's loan review process includes the judgment of management, the input from our independent loan reviewers, and reviews that may have been conducted by bank regulatory agencies as part of their examination process. The Company incorporates loan review results in the determination of whether or not it is probable that it will be able to collect all amounts due according to the contractual terms of a loan.

As part of the Company's quarterly assessment of the allowance, management divides the loan portfolio into five segments: commercial and industrial, construction and land development, commercial real estate, residential real estate, and consumer installment loans. The Company analyzes each segment and estimates an allowance allocation for each loan segment.

The allocation of the allowance for loan losses begins with a process of estimating the probable losses inherent for these types of loans. The estimates for these loans are established by category and based on the Company's internal system of credit risk ratings and historical loss data. The estimated loan loss allocation rate for the Company's internal system of credit risk grades is based on its experience with similarly graded loans. For loan segments where the Company believes it does not have sufficient historical loss data, the Company may make adjustments based, in part, on loss rates of peer bank groups. At December 31, 2013 and 2012, and for the years then ended, the Company adjusted its historical loss rates for the commercial real estate portfolio segment based, in part, on loss rates of peer bank groups.

The estimated loan loss allocation for all five loan portfolio segments is then adjusted for management's estimate of probable losses for several qualitative and environmental factors. The allocation for qualitative and environmental factors is particularly subjective and does not lend itself to exact mathematical calculation. This amount represents estimated probable inherent credit losses which exist, but have not yet been identified, as of the balance sheet date, and are based upon quarterly trend assessments in delinquent and nonaccrual loans, credit concentration changes, prevailing economic conditions, changes in lending personnel experience, changes in lending policies or procedures and other influencing factors. These qualitative and environmental factors are considered for each of the five loan segments and the allowance allocation, as determined by the processes noted above, is increased or decreased based on the incremental assessment of these factors.

The Company regularly re-evaluates its practices in determining the allowance for loan losses. During 2013, the Company implemented certain refinements to its allowance for loan losses methodology, specifically the way that historical loss factors are calculated. Prior to June 30, 2013, the Company calculated average losses for all loan segments using a rolling 6 quarter historical period. Beginning with the quarter ended June 30, 2013, the Company calculated average losses for all loan segments (except for the commercial real estate loan segment) using a rolling 8 quarter historical period in order to better capture the effects of the current economic cycle on the Company's loan loss experience and continued this methodology through December 31, 2013. Based upon management's review of charge-off trends for each loan segment, the Company continues to calculate average losses for the commercial real estate loan segment using a rolling 6 quarter historical period. Other than the changes discussed above, the Company has not made any changes to its calculation of historical loss periods that would impact the calculation of the allowance for loan losses or provision for loan losses for the periods included in the accompanying consolidated balance sheets and statements of earnings.

Assessment for Other-Than-Temporary Impairment of Securities

On a quarterly basis, management makes an assessment to determine whether there have been events or economic circumstances to indicate that a security on which there is an unrealized loss is other-than-temporarily impaired. For equity securities with an unrealized loss, the Company considers many factors including the severity and duration of the impairment; the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value; and recent events specific to the issuer or industry. Equity securities for which there is an unrealized loss that is deemed to be other-than-temporary are written down to fair value with the write-down recorded as a realized loss in securities gains (losses).

For debt securities with an unrealized loss, an other-than-temporary impairment write-down is triggered when (1) the Company has the intent to sell a debt security, (2) it is more likely than not that the Company will be required to sell the debt security before recovery of its amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the debt security. If the Company has the intent to sell a debt security or if it is more likely than not that it will be required to sell the debt security before recovery, the other-than-temporary write-down is equal to the entire difference between the debt security's amortized cost and its fair value. If the Company does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the other-than-temporary impairment write-down is separated into the amount that is credit related (credit loss component) and the amount due to all

Table of Contents

other factors. The credit loss component is recognized in earnings and is the difference between the security's amortized cost basis and the present value of its expected future cash flows. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and is recognized in other comprehensive income, net of applicable taxes.

Fair Value Determination

U.S. GAAP requires management to value and disclose certain of the Company's assets and liabilities at fair value, including investments classified as available-for-sale and derivatives. ASC 820, *Fair Value Measurements and Disclosures*, which defines fair value, establishes a framework for measuring fair value in accordance with U.S. GAAP and expands disclosures about fair value measurements. For more information regarding fair value measurements and disclosures, please refer to Note 17, Fair Value, of the consolidated financial statements that accompany this report.

Fair values are based on active market prices of identical assets or liabilities when available. Comparable assets or liabilities or a composite of comparable assets in active markets are used when identical assets or liabilities do not have readily available active market pricing. However, some of the Company's assets or liabilities may lack an available or comparable trading market characterized by frequent transactions between willing buyers and sellers. In these cases, fair value is estimated using pricing models that use discounted cash flows and other pricing techniques. Pricing models and their underlying assumptions are based upon management's best estimates for appropriate discount rates, default rates, prepayments, market volatility and other factors, taking into account current observable market data and experience.

These assumptions may have a significant effect on the reported fair values of assets and liabilities and the related income and expense. As such, the use of different models and assumptions, as well as changes in market conditions, could result in materially different net earnings and retained earnings results.

Other Real Estate Owned

Other real estate owned (OREO), consists of properties obtained through foreclosure or in satisfaction of loans and is reported at the lower of cost or fair value, less estimated costs to sell at the date acquired with any loss recognized as a charge-off through the allowance for loan losses. Additional OREO losses for subsequent valuation adjustments are determined on a specific property basis and are included as a component of other noninterest expense along with holding costs. Any gains or losses on disposal of OREO are also reflected in noninterest expense. Significant judgments and complex estimates are required in estimating the fair value of OREO, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility. As a result, the net proceeds realized from sales transactions could differ significantly from appraisals, comparable sales, and other estimates used to determine the fair value of other OREO.

Deferred Tax Asset Valuation

A valuation allowance is recognized for a deferred tax asset if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire deferred tax asset will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based upon the level of taxable income over the last three years and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that we will realize the benefits of these deductible differences at December 31, 2013. The amount of the deferred tax assets considered realizable, however, could be reduced if estimates of future taxable income are reduced.

Total interest-bearing liabilities	568,194	1.15%	575,271	1.42%	614,047	1.87%
Net interest income and margin (a)	\$ 22,362	3.16%	\$ 22,539	3.21%	\$ 20,944	2.95%

(a) Tax-equivalent. See Table 1 - Explanation of Non-GAAP Financial Measures .

RESULTS OF OPERATIONS**Net Interest Income and Margin**2013 vs. 2012 comparison

Net interest income (tax-equivalent) was \$22.4 million in 2013, compared to \$22.5 million in 2012. Although net interest income (tax-equivalent) declined slightly, management continues to seek to increase earnings by growing the Company's loan portfolio (in total and as a percentage of earning assets), focusing on deposit pricing, and repaying higher-cost wholesale funding sources. These efforts to increase earnings were offset by management's decision to reduce the Company's securities portfolio as a percentage of total interest earning assets and carry higher levels of short-term interest earning assets (e.g. federal funds sold) during 2013. As a result, the Company's net interest margin (tax-equivalent) declined to 3.16% in 2013, compared to 3.21% in 2012.

The tax-equivalent yield on total interest-earning assets decreased by 30 basis points in 2013 from 2012 to 4.08%. The decrease was primarily due to the shift in our asset mix described above and increased pricing competition for quality loan opportunities in our markets, which has limited the Company's ability to increase loans, generally, and to increase the yields on new and renewed loans, over the last several quarters.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

The cost of total interest-bearing liabilities decreased 27 basis points in 2013 from 2012 to 1.15%. The net decrease was largely the result of the continued shift in our deposit mix, as we increased our lower-cost noninterest-bearing demand deposits, interest bearing demand deposits (NOW accounts), and savings and money market accounts and concurrently reduced balances of higher-cost certificates of deposit and other higher-cost time deposits and long-term debt (i.e. wholesale funding).

The Company continues to deploy various asset liability management strategies to manage its risk to interest rate fluctuations. The Company's net interest margin could experience pressure due to lower reinvestment yields in the securities portfolio given the current interest rate environment, increased pricing competition for quality loan opportunities, and fewer opportunities to further reduce our cost of funds due to the already low level of deposit rates currently.

Table of Contents2012 vs. 2011 comparison

Net interest income (tax-equivalent) was \$22.5 million in 2012, compared to \$20.9 million in 2011, as net interest margin improvement offset a decline in average interest-earning assets of 1%. Net interest margin (tax-equivalent) was 3.21% in 2012, compared to 2.95% in 2011. The improved net interest margin reflected management's efforts to increase earnings by shifting the Company's asset mix through loan growth, focusing on deposit pricing, and repaying higher-cost wholesale funding sources. The cost of total interest-bearing liabilities decreased 45 basis points in 2012 from 2011 to 1.42%. The net decrease was largely the result of the continued shift in our deposit mix, as we increased our lower-cost noninterest-bearing demand deposits, interest bearing demand deposits (NOW accounts), and savings and money market accounts and concurrently reduced balances of higher-cost certificates of deposit and other higher-cost time deposits and long-term debt (i.e. wholesale funding).

The tax-equivalent yield on total interest-earning assets decreased by 19 basis points in 2012 from 2011 to 4.38%. This decrease was primarily driven by a 51 basis point reduction in the tax-equivalent yield on total securities to 3.14% as reinvestment yields in the securities portfolio declined due to the continued low interest rate environment. Also, loan pricing for creditworthy borrowers continues to be competitive in our markets and has limited the Company's ability to increase yields on new and renewed loans.

Provision for Loan Losses

The provision for loan losses represents a charge to earnings necessary to provide an allowance for loan losses that, in management's evaluation, should be adequate to provide coverage for the probable losses on outstanding loans. The provision for loan losses amounted to \$0.4 million, \$3.8 million, and \$2.5 million for the years ended December 31, 2013, 2012, and 2011, respectively.

The provision for loan losses decreased in 2013 compared to 2012 primarily due to a decline in net charge-offs and improvement in the overall credit quality of the loan portfolio, including lower levels of adversely classified and nonperforming loans. Net charge-offs were \$1.9 million, or 0.48% of average loans, in 2013, compared to \$4.0 million, or 1.03% of average loans, in 2012. This decrease was primarily due to a decline in net charge-offs for commercial real estate loans. In 2012, net charge-offs were impacted by a few individually significant charge-offs, including \$3.1 million related to three borrowing relationships.

The provision for losses increased in 2012 compared to 2011 due to an increase in net charge-offs and loan portfolio growth. Net charge-offs were \$4.0 million for 2012, compared to \$3.2 million in 2011. This increase was primarily due to an increase in net charge-offs in the commercial real estate loan portfolio of \$2.7 million, which was partially offset by declines in net charge-offs of \$1.6 million and \$0.4 million, respectively, in the construction and land development and commercial and industrial loan portfolios.

Based upon its assessment of the loan portfolio, management adjusts the allowance for loan losses to an amount it believes to be appropriate to adequately cover probable losses in the loan portfolio. The Company's allowance for loan losses to total loans decreased to 1.37% at December 31, 2013 from 1.69% at December 31, 2012. Based upon our evaluation of the loan portfolio, management believes the allowance for loan losses to be adequate to absorb our estimate of probable losses existing in the loan portfolio at December 31, 2013. While our policies and procedures used to estimate the allowance for loan losses, as well as the resultant provision for loan losses charged to operations, are believed adequate by management and are reviewed from time to time by our regulators, they are based on estimates and judgment and are therefore approximate and imprecise. Factors beyond our control, such as conditions in the local and national economy, a local real estate market or particular industry conditions exist which may negatively and materially affect our asset quality and the adequacy of our allowance for loan losses and, thus, the resulting provision for loan losses.

Table of Contents**Noninterest Income**

<i>(Dollars in thousands)</i>	2013	Year ended December 31	
		2012	2011
Service charges on deposit accounts	\$ 930	\$ 1,111	\$ 1,167
Mortgage lending	2,895	3,445	1,922
Bank-owned life insurance	427	445	460
Gain on sale of affordable housing investments		3,268	
Affordable housing investment losses			(646)
Gain on sale of premises and equipment	1,018		
Securities gains, net	651	679	878
Other	1,377	1,535	1,396
Total noninterest income	\$ 7,298	\$ 10,483	\$ 5,177

The Company's income from mortgage lending is primarily attributable to the (1) origination and sale of new mortgage loans and (2) servicing of mortgage loans. Origination income, net, is comprised of gains or losses from the sale of the mortgage loans originated, origination fees, underwriting fees and other fees associated with the origination of loans, which are netted against the commission expense associated with these originations. The Company's normal practice is to originate mortgage loans for sale in the secondary market and to either sell or retain the associated mortgage servicing rights (MSRs) when the loan is sold.

MSRs are recognized based on the fair value of the servicing right on the date the corresponding mortgage loan is sold. Subsequent to the date of transfer, the Company has elected to measure its MSRs under the amortization method. Servicing fee income is reported net of any related amortization expense.

MSRs are also evaluated for impairment periodically. Impairment is determined by grouping MSRs by common predominant characteristics, such as interest rate and loan type. If the aggregate carrying amount of a particular group of MSRs exceeds the group's aggregate fair value, a valuation allowance for that group is established. The valuation allowance is adjusted as the fair value changes. An increase in mortgage interest rates typically results in an increase in the fair value of the MSRs while a decrease in mortgage interest rates typically results in a decrease in the fair value of MSRs.

The following table presents a breakdown of the Company's mortgage lending income for 2013, 2012, and 2011.

<i>(Dollars in thousands)</i>	2013	Year ended December 31	
		2012	2011
Origination income	\$ 2,030	\$ 3,430	\$ 1,680
Servicing fees, net	479	284	359
Decrease (increase) in MSR valuation allowance	386	(269)	(117)
Total mortgage lending income	\$ 2,895	\$ 3,445	\$ 1,922

2013 vs. 2012 comparison

The decrease in service charges on deposit accounts was primarily due to a decline in insufficient funds charges, reflecting changes in customer behavior and spending patterns.

The decrease in mortgage lending income was primarily due to a decline in origination income as refinance activity slowed. This decline was partially offset by a decrease in the valuation allowance for amortized MSRs and an increase in net servicing fees. Changes in the valuation allowance for amortized MSRs are recognized in earnings as a component of mortgage lending income. The decrease in the valuation allowance

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

was primarily due to a slowing of prepayment speeds, which increased the value of our amortized MSRs.

The Company recognized a gain on sale of \$3.3 million related to the sale of its interests in three affordable housing limited partnerships in January 2012. There were no such transactions in 2013.

In 2013, the Company recognized a \$1.0 million gain on sale of premises and equipment when the Company sold certain real property in downtown Auburn that was no longer used for Company operations and was fully leased to third party tenants.

Table of Contents

Net securities gains consist of realized gains and losses on the sale of securities and other-than-temporary impairment charges. Net securities gains were \$0.7 million in both 2013 and 2012. Gross realized gains of \$0.8 million in 2013 were reduced by gross realized losses of \$0.1 million. Gross realized gains of \$1.0 million in 2012 were reduced by gross realized losses of \$0.2 million and \$0.1 million in other-than-temporary impairment charges related to trust preferred securities. In December 2013, the Company sold all remaining trust preferred securities held by the Company for a net loss of \$0.1 million.

2012 vs. 2011 comparison

Service charges on deposit accounts were \$1.1 million in 2012, compared to \$1.2 million in 2011. The decrease was primarily due to a decline in insufficient funds charges, reflecting changes in customer behavior and spending patterns.

Mortgage lending income was \$3.4 million in 2012, compared to \$1.9 million in 2011. A increase in the level of mortgage refinance activity during 2012 when compared to the levels experienced during 2011 contributed to the increase in mortgage lending income. The Company's income from mortgage lending typically fluctuates as mortgage interest rates change and is primarily attributable to origination and sale of new mortgage loans.

The Company recognized a gain on sale of \$3.3 million related to the sale of its interests in three affordable housing limited partnerships in January 2012. Accordingly, the Company did not receive any federal tax credits related to affordable housing partnership investments in 2012. Prior to the sale of these interests, the Company accrued its pro-rata share of partnership losses in noninterest income. In 2011, the Company accrued approximately \$0.6 million related to affordable housing investment losses.

The net gain on securities was \$0.7 million in 2012, compared to a net gain of \$0.9 million in 2011. Gross realized gains of \$1.0 million in 2012 were reduced by gross realized losses of \$0.2 million and other-than-temporary impairment charges of \$0.1 million related to trust preferred securities. Gross realized gains of \$1.7 million in 2011 were reduced by gross realized losses of \$0.5 million and \$0.3 million in other-than-temporary impairment charges related to trust preferred securities.

Noninterest Expense

<i>(Dollars in thousands)</i>	Year ended December 31		
	2013	2012	2011
Salaries and benefits	\$ 8,788	\$ 8,691	\$ 8,167
Net occupancy and equipment	1,335	1,332	1,404
Professional fees	774	704	735
FDIC and other regulatory assessments	512	686	792
Other real estate owned, net	570	323	2,007
Prepayment penalties on long-term debt	3,028	3,720	
Other	3,405	3,927	3,252
 Total noninterest expense	 \$ 18,412	 \$ 19,383	 \$ 16,357

2013 vs. 2012 comparison

Salaries and benefits expense increased primarily due to routine increases in salaries and wages. This increase was largely offset by a decrease in group health insurance costs. Beginning in 2013, the Company returned to a fully insured group health plan and was able to lower its benefits costs compared to 2012. Previously, the Company's group health plan was self insured.

The decrease in FDIC and other regulatory assessments expense was primarily due to a decrease in the Bank's quarterly assessment rate as several variables utilized by the FDIC in calculating our deposit insurance assessments improved.

Other real estate owned expense, net was \$0.6 million in 2013, compared to \$0.3 million in 2012. The increase was primarily due to realized holding losses or write-downs on the valuations of certain OREO properties. These properties could also be subject to future valuation adjustments as a result of updated appraisal information and further deterioration in real estate values, thus causing additional fluctuations in

other real estate owned expense, net. Also, the Company will continue to incur expenses associated with maintenance costs and property taxes associated with these assets.

Table of Contents

During 2013, the Company repaid \$35.0 million long-term debt with a weighted average interest rate of 3.46% and incurred prepayment penalties of \$3.0 million. During 2012, the Company repaid \$38.0 million of long-term debt with a weighted average interest rate of 4.26% and incurred prepayment penalties of \$3.7 million.

2012 vs. 2011 comparison

Salaries and benefits expense was \$8.7 million in 2012, compared to \$8.2 million in 2011. The increase in 2012 when compared to 2011 reflected routine increases coupled with an increase in the number of full-time equivalent employees due to the opening of a new branch during December 2011 in Valley, Alabama.

FDIC and other regulatory assessments expense was \$0.7 million in 2012, compared to \$0.8 million in 2011. The decrease in 2012 when compared to 2011 was primarily due to the FDIC redefining the deposit insurance assessment base effective April 1, 2011. As a result, most FDIC insured institutions with less than \$10 billion in assets experienced a reduction in their FDIC deposit insurance assessments.

Other real estate owned expense, net was \$0.3 million in 2012, compared to \$2.0 million in 2011. The decrease was primarily due to a decline in realized holding losses or write-downs on the valuations of certain OREO properties. Despite the improvement in net expenses related to OREO, these properties could also be subject to future valuation adjustments as a result of updated appraisal information and further deterioration in real estate values, thus causing additional fluctuations in other real estate owned expense, net. Also, the Company will continue to incur expenses associated with maintenance costs and property taxes associated with these assets.

On January 19, 2012, the Company restructured its balance sheet by paying off \$38.0 million of FHLB advances with a weighted average interest rate of 4.26% and a weighted average duration of 2.6 years. In connection with repaying the FHLB advances, the Company incurred a \$3.7 million prepayment penalty in 2012, compared to none in 2011.

Income Tax Expense

2013 vs. 2012 comparison

Income tax expense for 2013 was \$2.3 million, compared to \$1.4 million in 2012. The Company's effective income tax rate was 24.34% in 2013, compared to 17.34% in 2012. In addition to a 15% increase in the level of earnings before taxes, the Company's effective tax rate increased because the Company's annualized effective tax rate for 2012 was reduced by the reversal of a \$0.5 million deferred tax valuation allowance related to capital loss carry-forwards.

2012 vs. 2011 comparison

Income tax expense for 2012 was \$1.4 million, compared to \$0.1 million in 2011. The Company's effective income tax rate was 17.34% in 2012, compared to 1.02% in 2011. The increase in the Company's effective tax rate was due to a 46% increase in the level of earnings before taxes and a decrease in federal tax credits related to the Company's investments in affordable housing limited partnerships, which were sold in January 2012. The impact of these changes on the Company's effective tax rate for the full year 2012 was partially reduced by the reversal of a previously established deferred tax asset valuation allowance of \$0.5 million related to capital loss carry-forwards. Excluding the reversal of the valuation allowance, the Company's effective tax rate for 2012 would have been approximately 23.51%.

Table of Contents**BALANCE SHEET ANALYSIS****Securities**

Securities available-for-sale, were \$271.2 million at December 31, 2013, an increase of \$11.8 million, or 4%, compared to \$259.5 million as of December 31, 2012. This increase reflects an increase in the amortized cost basis of securities available-for-sale of \$27.1 million, which was partially offset by a decline in the fair value of securities-available-for sale of \$15.4 million. The increase in the amortized cost basis of securities available-for-sale was primarily attributable to management allocating more funding to the investment portfolio as the loan portfolio declined and investment yields improved in 2013. The decrease in the fair value of securities was primarily due to an increase in long-term interest rates. The average tax-equivalent yields earned on total securities were 3.09% in 2013 and 3.14% in 2012.

The following table shows the carrying value and weighted average yield of securities available-for-sale as of December 31, 2013 according to contractual maturity. Actual maturities may differ from contractual maturities of residential mortgage-backed securities (RMBS) because the mortgages underlying the securities may be called or prepaid with or without penalty.

<i>(Dollars in thousands)</i>	December 31, 2013				
	1 year or less	1 to 5 years	5 to 10 years	After 10 years	Total Fair Value

Loans

	<i>(In thousands)</i>	December 31				
		2013	2012	2011	2010	2009
Commercial and industrial	\$	57,780	59,334	54,988	53,288	53,884
Construction and land development		36,479	37,631	39,814	47,850	56,820
Commercial real estate		174,920	183,611	162,435	166,241	156,928
Residential real estate		101,706	105,631	101,725	96,241	97,407
Consumer installment		12,893	12,219	11,454	10,676	11,236
Total loans		383,778	398,426	370,416	374,296	376,275
Less: unearned income		(439)	(233)	(153)	(81)	(172)
Loans, net of unearned income	\$	383,339	398,193	370,263	374,215	376,103

Total loans, net of unearned income, were \$383.3 million at December 31, 2013, a decrease of \$14.9 million, or 4%, from \$398.2 million at December 31, 2012. The decrease was primarily attributable to reduced loan demand and increased competition for quality loan opportunities in our markets and management's efforts to resolve problem loans as nonaccrual loans declined by \$6.3 million in 2013. Four loan categories represented the majority of the loan portfolio as December 31, 2013: commercial real estate mortgage loans (46%), residential real estate mortgage loans (27%), commercial and industrial loans (15%) and construction and land development loans (10%).

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

Within its residential real estate mortgage portfolio, the Company had junior lien mortgages of approximately \$15.8 million, or 4%, of total loans, net of unearned income at both December 31, 2013 and 2012. For residential real estate mortgage loans with a consumer purpose, approximately \$1.2 million and \$1.3 million required interest-only payments at December 31, 2013 and 2012, respectively. The Company's residential real estate mortgage portfolio does not include any option ARM loans, subprime loans, or any material amount of other high-risk consumer mortgage products.

Table of Contents

Purchased loan participations included in the Company's loan portfolio were approximately \$1.4 million and \$3.1 million as of December 31, 2013 and 2012, respectively. All purchased loan participations are underwritten by the Company independent of the selling bank. In addition, all loans, including purchased participations, are evaluated for collectability during the course of the Company's normal loan review procedures. If the Company deems a participation loan impaired, it applies the same accounting policies and procedures as described in **CRITICAL ACCOUNTING POLICIES**.

The average yield earned on loans and loans held for sale was 5.28% in 2013 and 5.54% in 2012.

The specific economic and credit risks associated with our loan portfolio include, but are not limited to, the effects of current economic conditions on our borrowers' cash flows, real estate market sales volumes, valuations, and availability and cost of financing for properties, real estate industry concentrations, deterioration in certain credits, interest rate fluctuations, reduced collateral values or non-existent collateral, title defects, inaccurate appraisals, financial deterioration of borrowers, fraud, and any violation of applicable laws and regulations.

The Company attempts to reduce these economic and credit risks by adhering to loan to value guidelines for collateralized loans, investigating the creditworthiness of borrowers and monitoring borrowers' financial position. Also, we establish and periodically review our lending policies and procedures. Banking regulations limit a bank's credit exposure by prohibiting unsecured loan relationships that exceed 10% of its capital accounts; or 20% of capital accounts, if loans in excess of 10% are fully secured. Under these regulations, we are prohibited from having unsecured loan relationships in excess of approximately \$16.0 million. Furthermore, we have an internal limit for aggregate credit exposure (loans outstanding plus unfunded commitments) to a single borrower of \$14.4 million. Our loan policy requires that the Loan Committee of the Board of Directors approve any loan relationships that exceed this internal limit. At December 31, 2013, the Bank had no loan relationships exceeding these limits.

We periodically analyze our commercial loan portfolio to determine if a concentration of credit risk exists in any one or more industries. We use classification systems broadly accepted by the financial services industry in order to categorize our commercial borrowers. Loan concentrations to borrowers in the following classes exceeded 25% of the Bank's total risk-based capital at December 31, 2013 (and related balances at December 31, 2012).

	<i>(In thousands)</i>	December 31 2013	December 31 2012
Lessors of 1-4 family residential properties	\$	43,835	\$ 47,544
Multi-family residential properties		27,673	30,392
Shopping centers		29,953	20,760

Allowance for Loan Losses

The Company maintains the allowance for loan losses at a level that management believes appropriate to adequately cover the Company's estimate of probable losses in the loan portfolio. As of December 31, 2013 and 2012, respectively, the allowance for loan losses was \$5.3 million and \$6.7 million, respectively, which management believed to be adequate at each of the respective dates. The judgments and estimates associated with the determination of the allowance for loan losses are described under **CRITICAL ACCOUNTING POLICIES**.

Table of Contents

A summary of the changes in the allowance for loan losses and certain asset quality ratios for each of the five years in the five year period ended December 31, 2013 is presented below.

		Year ended December 31				
		2013	2012	2011	2010	2009
	<i>(Dollars in thousands)</i>					
Allowance for loan losses:						
Balance at beginning of period	\$	6,723	6,919	7,676	6,495	4,398
Charge-offs:						
Commercial and industrial		(514)	(289)	(679)	(537)	(495)
Construction and land development		(39)	(231)	(1,758)	(1,487)	(2,088)
Commercial real estate		(262)	(3,184)	(422)		
Residential real estate		(808)	(545)	(533)	(552)	(704)
Consumer installment		(397)	(85)	(21)	(111)	(61)
Total charge-offs		(2,020)	(4,334)	(3,413)	(2,687)	(3,348)
Recoveries:						
Commercial and industrial		48	54	34	63	47
Construction and land development		6	46	2	54	50
Commercial real estate		4	71			
Residential real estate		88	134	155	151	92
Consumer installment		19	18	15	20	6
Total recoveries		165	323	206	288	195
Net charge-offs		(1,855)	(4,011)	(3,207)	(2,399)	(3,153)
Provision for loan losses		400	3,815	2,450	3,580	5,250
Ending balance	\$	5,268	6,723	6,919	7,676	6,495
as a % of loans		1.37%	1.69	1.87	2.05	1.73
as a % of nonperforming loans		124%	64	67	65	69
Net charge-offs as a % of average loans		0.48%	1.03	0.86	0.64	0.84

As noted under **CRITICAL ACCOUNTING POLICIES**, management assesses the adequacy of the allowance prior to the end of each calendar quarter. The level of the allowance is based upon management's evaluation of the loan portfolios, past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payment), the estimated value of any underlying collateral, composition of the loan portfolio, economic conditions, industry and peer bank loan quality indications and other pertinent factors. This evaluation is inherently subjective as it requires various material estimates and judgments including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The ratio of our allowance for loan losses to total loans outstanding was 1.37% at December 31, 2013, compared to 1.69% at December 31, 2012. In the future, the allowance to total loans outstanding ratio will increase or decrease to the extent the factors that influence our quarterly allowance assessment in their entirety either improve or weaken.

Net charge-offs were \$1.9 million, or 0.48% of average loans, in 2013, compared to net charge-offs of \$4.0 million, or 1.03%, in 2012. In 2012, net charge-offs were affected by a few individually significant charge-offs in the commercial real estate portfolio segment, including \$3.1 million related to three borrowing relationships.

At December 31, 2013 and 2012, the ratio of our allowance for loan losses as a percentage of nonperforming loans was 124% and 64%, respectively. The increase was primarily due to payoffs received on three nonperforming commercial real estate loans during 2013 with a total recorded investment of \$5.9 million and no related allowance for loan losses at December 31, 2012. Excluding these nonperforming loans, the ratio of our allowance for loan losses as a percentage of nonperforming loans was 144% at December 31, 2012.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

At December 31, 2013 and 2012, the Company's recorded investment in loans considered impaired was \$5.6 million and \$10.5 million, respectively, with corresponding valuation allowances (included in the allowance for loan losses) at each respective date of \$0.3 million.

Our regulators, as an integral part of their examination process, periodically review the Company's allowance for loan losses, and may require the Company to make additional provisions to the allowance for loan losses based on their judgment about information available to them at the time of their examinations.

Table of Contents**Nonperforming Assets**

At December 31, 2013 the Company had \$8.1 million in nonperforming assets compared to \$15.5 million at December 31, 2012. Nonperforming assets decreased during 2013 due to continued efforts by management to reduce and resolve problem assets. The majority of the balance in nonperforming assets at December 31, 2013 related to deterioration in the commercial real estate and construction and land development loan portfolios.

The table below provides information concerning total nonperforming assets and certain asset quality ratios.

	December 31				
<i>(Dollars in thousands)</i>	2013	2012	2011	2010	2009
Nonperforming assets:					
Nonperforming (nonaccrual) loans	\$ 4,261	10,535	10,354	11,833	9,352
Other real estate owned	3,884	4,919	7,898	8,125	7,292
Total nonperforming assets	\$ 8,145	15,454	18,252	19,958	16,644
as a % of loans and foreclosed properties	2.10%	3.83	4.83	5.22	4.34
as a % of total assets	1.08%	2.03	2.35	2.61	2.15
Nonperforming loans as a % of total loans	1.11%	2.65	2.80	3.16	2.49
Accruing loans 90 days or more past due	\$ 73	58			5

The table below provides information concerning the composition of nonaccrual loans at December 31, 2013 and 2012, respectively.

	December 31	
<i>(In thousands)</i>	2013	2012
Nonaccrual loans:		
Commercial and industrial	\$ 55	60
Construction and land development	1,582	1,706
Commercial real estate	1,456	6,714
Residential real estate	1,168	2,055
Total nonaccrual loans / nonperforming loans	\$ 4,261	10,535

The Company discontinues the accrual of interest income when (1) there is a significant deterioration in the financial condition of the borrower and full repayment of principal and interest is not expected or (2) the principal or interest is more than 90 days past due, unless the loan is both well-secured and in the process of collection. At December 31, 2013, the Company had \$4.3 million in loans on nonaccrual, compared to \$10.5 million at December 31, 2012. The decrease was primarily attributable to a decrease of \$5.3 million and \$0.9 million in nonaccrual loans for the commercial real estate and residential real estate loan portfolio segments, respectively.

Due to the weakening credit status of a borrower, the Company may elect to formally restructure certain loans to facilitate a repayment plan that minimizes the potential losses that we might incur. Restructured loans, or troubled debt restructurings (TDRs), are classified as impaired loans,

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

and if the loans are on nonaccrual status as of the date of restructuring, the loans are included in the nonaccrual loan balances noted above. Nonaccrual loan balances do not include loans that have been restructured that were performing as of the restructure date. At December 31, 2013 and 2012, the Company had \$1.6 million and \$1.1 million, respectively, in accruing TDRs.

At December 31, 2013 there were \$73,000 in loans 90 days past due and still accruing interest compared to \$58,000 at December 31, 2012.

Table of Contents

The table below provides information concerning the composition of OREO at December 31, 2013 and 2012, respectively.

	December 31	
<i>(In thousands)</i>	2013	2012
Other real estate owned:		
Commercial:		
Building	\$ 1,772	608
Developed lots	1,260	1,275
Residential:		
Condominiums		425
Undeveloped land	113	1,464
Other	739	1,147
Total other real estate owned	\$ 3,884	4,919

At December 31, 2013, the Company held \$3.8 million in OREO, which we acquired from borrowers, a decrease of \$1.0 million, or 21%, compared to December 31, 2012. At December 31, 2013, approximately 82%, of the total balance in OREO related to properties acquired from three borrowers.

Potential Problem Loans

Potential problem loans represent those loans with a well-defined weakness and where information about possible credit problems of borrowers has caused management to have serious doubts about the borrower's ability to comply with present repayment terms. This definition is believed to be substantially consistent with the standards established by the Federal Reserve, the Company's primary regulator, for loans classified as substandard, excluding nonaccrual loans. Potential problem loans, which are not included in nonperforming assets, amounted to \$10.6 million, or 2.7% of total loans at December 31, 2013, compared to \$12.6 million, or 3.2% of total loans at December 31, 2012.

The table below provides information concerning the composition of potential problem loans at December 31, 2013 and 2012, respectively.

	December 31	
<i>(In thousands)</i>	2013	2012
Potential problem loans:		
Commercial and industrial	\$ 482	563
Construction and land development	1,101	1,125
Commercial real estate	1,683	2,727
Residential real estate	7,182	7,978
Consumer installment	146	214
Total potential problem loans	\$ 10,594	12,607

At December 31, 2013, approximately \$0.8 million or 7.6% of total potential problem loans were past due at least 30 but less than 90 days. At December 31, 2013, the remaining balance of potential problem loans were current or past due less than 30 days.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

The following table is a summary of the Company's performing loans that were past due at least 30 days but less than 90 days as of December 31, 2013 and 2012, respectively.

	December 31	
<i>(In thousands)</i>	2013	2012
Performing loans past due 30 to 89 days:		
Commercial and industrial	\$ 167	173
Construction and land development	14	8
Commercial real estate	861	230
Residential real estate	1,343	1,537
Consumer installment	100	62
Total performing loans past due 30 to 89 days	\$ 2,485	2,010

Table of Contents**Deposits**

	December 31	
<i>(In thousands)</i>	2013	2012
Noninterest bearing demand	\$ 125,740	118,014
NOW	99,406	96,332
Money market	147,116	124,676
Savings	35,383	34,600
Certificates of deposit under \$100,000	104,964	106,371
Certificates of deposit and other time deposits of \$100,000 or more	139,721	134,591
Brokered certificates of deposit	16,514	22,233
 Total deposits	 \$ 668,844	 636,817

Total deposits were \$668.9 million and \$636.8 million at December 31, 2013 and 2012, respectively. The increase in total deposits of \$32.0 million reflects market share growth in Chambers County due to the business development efforts of the Bank's full-service branch in Valley, Alabama which opened in December 2011 and changes in customer preferences for short-term instruments in a low interest rate environment.

The average rates paid on total interest-bearing deposits were 1.01% in 2013 and 1.21% in 2012. Noninterest bearing deposits were 19% of total deposits at both December 31, 2013 and 2012.

Other Borrowings

Other borrowings consist of short-term borrowings and long-term debt. Short-term borrowings consist of federal funds purchased and securities sold under agreements to repurchase with an original maturity of one year or less. The Bank had available federal fund lines totaling \$41.0 million with none outstanding at December 31, 2013, compared to \$40.0 million with none outstanding at and December 31, 2012. Securities sold under agreements to repurchase totaled \$3.4 million and \$2.7 million at December 31, 2013 and 2012, respectively.

The average rates paid on short-term borrowings were 0.50% in 2013 and 0.54% in 2012. Information concerning the average balances, weighted average rates, and maximum amounts outstanding for short-term borrowings during the three-year period ended December 31, 2013 is included in Note 10 to the accompanying consolidated financial statements included in this annual report.

Long-term debt includes FHLB advances with an original maturity greater than one year, securities sold under agreements to repurchase with an original maturity greater than one year, and subordinated debentures related to trust preferred securities. The Bank had \$5.0 million in long-term FHLB advances at December 31, 2013, compared to \$25.0 million at December 31, 2012. During 2013, the Company repaid \$20.0 million of FHLB advances with a weighted average interest rate of 3.38%. At December 31, 2013, the Bank had no securities sold under agreements to repurchase with an original maturity greater than one year, compared to \$15.0 million at December 31, 2012. During 2013, the Company repaid \$15.0 million of securities sold under agreements to repurchase with an interest rate of 3.58%. At both December 31, 2013 and 2012, the Company had \$7.2 million in junior subordinated debentures related to trust preferred securities outstanding.

The average rates paid on long-term debt were 3.59% in 2013 and 3.73% in 2012.

CAPITAL ADEQUACY

The Company's consolidated stockholders' equity was \$64.5 million and \$70.1 million as of December 31, 2013 and 2012, respectively. The change from December 31, 2012 was primarily driven by an other comprehensive loss due to the change in unrealized gains (losses) on securities available-for-sale of \$9.7 million and cash dividends paid of \$3.1 million, partially offset by net earnings of \$7.1 million.

The Company's tier 1 leverage ratio was 10.10%, tier 1 risk-based capital ratio was 17.19% and total risk-based capital ratio was 18.40% at December 31, 2013. These ratios exceed the minimum regulatory capital percentages of 4.0% for Tier 1 leverage ratio, 4.0% for Tier 1

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

risk-based capital ratio and 8.0% for Total risk-based capital ratio. Based on current regulatory standards, the Company is classified as well capitalized.

Table of Contents**MARKET AND LIQUIDITY RISK MANAGEMENT**

Management's objective is to manage assets and liabilities to provide a satisfactory, consistent level of profitability within the framework of established liquidity, loan, investment, borrowing, and capital policies. The Bank's Asset Liability Management Committee (ALCO) is charged with the responsibility of monitoring these policies, which are designed to ensure acceptable composition of asset/liability mix. Two critical areas of focus for ALCO are interest rate risk and liquidity risk management.

Interest Rate Risk Management

In the normal course of business, the Company is exposed to market risk arising from fluctuations in interest rates. The Company is subject to interest rate risk because assets and liabilities may mature or reprice at different times. For example, if liabilities reprice faster than assets, and interest rates are generally rising, earnings will initially decline. In addition, assets and liabilities may reprice at the same time but by different amounts. For example, when the general level of interest rates is rising, the Company may increase rates paid on interest bearing demand deposit accounts and savings deposit accounts by an amount that is less than the general increase in market interest rates. Also, short-term and long-term market interest rates may change by different amounts. For example, a flattening yield curve may reduce the interest spread between new loan yields and funding costs. Further, the remaining maturity of various assets and liabilities may shorten or lengthen as interest rates change. For example, if long-term mortgage interest rates decline sharply, mortgage-backed securities in the securities portfolio may prepay significantly earlier than anticipated, which could reduce earnings. Interest rates may also have a direct or indirect effect on loan demand, loan losses, mortgage origination volume, the fair value of MSRs and other items affecting earnings.

ALCO measures and evaluates the interest rate risk so that we can meet customer demands for various types of loans and deposits. ALCO determines the most appropriate amounts of on-balance sheet and off-balance sheet items. Measurements used to help manage interest rate sensitivity include an earnings simulation and an economic value of equity model.

Earnings simulation. Management believes that interest rate risk is best estimated by our earnings simulation modeling. On at least a quarterly basis, the following 12 month time period is simulated to determine a baseline net interest income forecast and the sensitivity of this forecast to changes in interest rates. The baseline forecast assumes an unchanged or flat interest rate environment. Forecasted levels of earning assets, interest-bearing liabilities, and off-balance sheet financial instruments are combined with ALCO forecasts of market interest rates for the next 12 months and other factors in order to produce various earnings simulations and estimates.

To limit interest rate risk, we have guidelines for earnings at risk which seek to limit the variance of net interest income to less than a 10 percent decline for a 200 basis point gradual change up or down in rates from management's baseline net interest income forecast over the next 12 months. The following table reports the variance of net interest income over the next 12 months assuming a gradual change in interest rates of 200 basis points when compared to the baseline net interest income forecast at December 31, 2013.

Changes in Interest Rates	Net Interest Income % Variance
200 basis points	1.35%
(200) basis points	NM
NM=not meaningful	

At December 31, 2013, our earnings simulation model indicated a slightly asset-sensitive position over the next 12 months, which could serve to improve net interest income during that time period if interest rates increased by 200 basis points. The actual realized change in net interest income would depend upon several factors, which could also serve to diminish, or eliminate the asset sensitivity noted above. The impact of rate scenarios assuming a gradual downward 200 basis point change in interest rates was not considered meaningful because of the historically low interest rate environment.

Economic Value of Equity. Economic value of equity (EVE) measures the extent that estimated economic values of our assets, liabilities and off-balance sheet items will change as a result of interest rate changes. Economic values are estimated by discounting expected cash flows from assets, liabilities and off-balance sheet items, which establishes a base case EVE. In contrast with our earnings simulation model which evaluates interest rate risk over a 12 month timeframe, EVE uses a terminal horizon which allows for the re-pricing of all assets, liabilities, and off-balance sheet items. Further, EVE is measured using values as of a point in time and does not reflect any actions that ALCO might take in responding to or anticipating changes in interest rates, or market and competitive conditions.

Table of Contents

To help limit interest rate risk, we have a guideline stating that for a 200 basis point instantaneous change in interest rates up or down, EVE should not decrease by more than 25 percent. The following table reports the variance of EVE assuming an immediate change in interest rates of 200 basis points when compared to the base case EVE at December 31, 2013.

Changes in Interest Rates	EVE % Variance
200 basis points	(16.16) %
(200) basis points	NM
NM=not meaningful	

At December 31, 2013, the results of our EVE model would indicate that we are in compliance with our guidelines. The actual realized change in the economic value of equity would depend upon several factors, which could also serve to diminish, or eliminate the interest sensitivity noted above. The impact of rate shock scenarios assuming a downward 200 basis point change in interest rates was not considered meaningful because of the historically low interest rate environment.

Earnings simulation and EVE are both modeling analyses, which change quarterly and consist of hypothetical estimates based upon numerous assumptions, including the interest rate levels, shape of the yield curve, prepayments on loans and securities, rates on loans and deposits, reinvestments of paydowns and maturities of loans, investments and deposits, and others. While assumptions are developed based on the current economic and market conditions, management cannot make any assurances as to the predictive nature of these assumptions, including how these estimates may be affected by customer preferences, competitors, or competitive conditions, or that the predictions will be realized.

In addition, each of the preceding analyses may not, on its own, be an accurate indicator of how our net interest income will be affected by changes in interest rates. Income associated with interest-earning assets and costs associated with interest-bearing liabilities may not be affected uniformly by changes in interest rates. In addition, the magnitude and duration of changes in interest rates may have a significant impact on net interest income. For example, although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market interest rates, and other economic and market factors. Interest rates on certain types of assets and liabilities fluctuate in advance of changes in general market rates, while interest rates on other types may lag behind changes in general market rates. In addition, certain assets, such as adjustable rate mortgage loans, have features (generally referred to as interest rate caps and floors) which limit changes in interest rates. Prepayment and early withdrawal levels also could deviate significantly from those assumed in calculating the maturity of certain instruments. The ability of many borrowers to service their debts also may decrease during periods of rising interest rates or economic stress, which may differ across industries and economic sectors. Depositor and borrower behaviors also affect those relationships and results. ALCO reviews each of the above interest rate sensitivity analyses along with several different interest rate scenarios in seeking satisfactory, consistent levels of profitability within the framework of the Company's established liquidity, loan, investment, borrowing, and capital policies.

The Company may also use derivative financial instruments to improve the balance between interest-sensitive assets and interest-sensitive liabilities and as one tool to manage interest rate sensitivity while continuing to meet the credit and deposit needs of our customers. From time to time, the Company may enter into interest rate swaps (swaps) to facilitate customer transactions and meet their financing needs. These swaps qualify as derivatives, but are not designated as hedging instruments. At December 31, 2013 and 2012, the Company had no derivative contracts to assist in managing interest rate sensitivity.

Liquidity Risk Management

Liquidity is the Company's ability to convert assets into cash equivalents in order to meet daily cash flow requirements, primarily for deposit withdrawals, loan demand and maturing obligations. Without proper management of its liquidity, the Company could experience higher costs of obtaining funds due to insufficient liquidity, while excessive liquidity can lead to a decline in earnings due to the opportunity cost of foregoing alternative higher-yielding investment opportunities.

Liquidity is managed at two levels: at the Company and at the Bank. The management of liquidity at both levels is essential, because the Company and the Bank have different funding needs and sources, are separate legal entities, and each are subject to regulatory guidelines and requirements.

Table of Contents

The primary source of funding and the primary source of liquidity for the Company includes dividends received from the Bank, and secondarily proceeds from the issuance of common stock or other securities. Primary uses of funds for the Company include dividends paid to shareholders, stock repurchases, and interest payments on junior subordinated debentures issued by the Company in connection with trust preferred securities. The junior subordinated debentures are presented as long-term debt in the accompanying consolidated balance sheets and the related trust preferred securities are includible in Tier 1 Capital for regulatory capital purposes.

Primary sources of funding for the Bank include customer deposits, other borrowings, repayment and maturity of securities, and sale and repayment of loans. The Bank has access to federal funds lines from various banks and borrowings from the Federal Reserve discount window. In addition to these sources, the Bank has participated in the FHLB's advance program to obtain funding for its growth. Advances include both fixed and variable terms and are taken out with varying maturities. As of December 31, 2013, the Bank had a remaining available line of credit with the FHLB totaling \$212.4 million. As of December 31, 2013, the Bank also had \$41.0 million of federal funds lines, with none outstanding. Primary uses of funds include repayment of maturing obligations and growing the loan portfolio.

The following table presents additional information about our contractual obligations as of December 31, 2013, which by their terms had contractual maturity and termination dates subsequent to December 31, 2013:

	Payments due by period				
	Total	1 year or less	1 to 3 years	3 to 5 years	More than 5 years
<i>(Dollars in thousands)</i>					
Contractual obligations:					
Deposit maturities (1)	\$ 668,844	536,260	75,784	46,369	10,431
Long-term debt	12,217			5,000	7,217
Operating lease obligations	617	287	285	45	
Total	\$ 681,678	\$ 536,547	\$ 76,069	\$ 51,414	\$ 17,648

(1) Deposits with no stated maturity (demand, NOW, money market, and savings deposits) are presented in the 1 year or less column. Management believes that the Company and the Bank have adequate sources of liquidity to meet all known contractual obligations and unfunded commitments, including loan commitments and reasonable borrower, depositor, and creditor requirements over the next 12 months.

Off-Balance Sheet Arrangements

At December 31, 2013, the Bank had outstanding standby letters of credit of \$8.6 million and unfunded loan commitments outstanding of \$38.9 million. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Bank has the ability to liquidate federal funds sold or securities available-for-sale, or on a short-term basis to borrow and purchase federal funds from other financial institutions.

Mortgage lending activities

Since 2009, we have primarily sold residential mortgage loans in the secondary market to Fannie Mae while retaining the servicing of these loans. The sale agreements for these residential mortgage loans with Fannie Mae and other investors include various representations and warranties regarding the origination and characteristics of the residential mortgage loans. Although the representations and warranties vary among investors, they typically cover ownership of the loan, validity of the lien securing the loan, the absence of delinquent taxes or liens against the property securing the loan, compliance with loan criteria set forth in the applicable agreement, compliance with applicable federal, state, and local laws, among other matters.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

As of December 31, 2013, the unpaid principal balance of the residential mortgage loans, which we have originated and sold, but retained the servicing rights was \$356.3 million. Although these loans are generally sold on a non-recourse basis, except for breaches of customary seller representations and warranties, we may have to repurchase residential mortgage loans in cases where we breach such representations or warranties or the other terms of the sale, such as where we fail to deliver required documents or the documents we deliver are defective. Investors also may require the repurchase of a mortgage loan when an early payment default underwriting review reveals significant underwriting deficiencies, even if the mortgage loan has subsequently been brought current. Repurchase demands are typically reviewed on an individual loan by loan basis to validate the claims made by the investor and to determine if a contractually required repurchase event has occurred. We seek to reduce and manage the risks of potential repurchases or other claims by mortgage loan investors through our underwriting, quality assurance and servicing practices, including good communications with our residential mortgage investors.

Table of Contents

We were not required to repurchase any residential mortgage loans in 2013 or 2011. In 2012, we repurchased one residential mortgage loan with an unpaid principal balance of \$0.3 million. This loan was current as to principal and interest at the time of repurchase, and we incurred no losses upon repurchase.

We service all residential mortgage loans originated and sold by us to Fannie Mae. As servicer, our primary duties are to: (1) collect payments due from borrowers; (2) advance certain delinquent payments of principal and interest; (3) maintain and administer any hazard, title, or primary mortgage insurance policies relating to the mortgage loans; (4) maintain any required escrow accounts for payment of taxes and insurance and administer escrow payments; and (5) foreclose on defaulted mortgage loans or take other actions to mitigate the potential losses to investors consistent with the agreements governing our rights and duties as servicer.

The agreement under which we act as servicer generally specifies a standard of responsibility for actions taken by us in such capacity and provides protection against expenses and liabilities incurred by us when acting in compliance with the respective servicing agreements. However, if we commit a material breach of our obligations as servicer, we may be subject to termination if the breach is not cured within a specified period following notice. The standards governing servicing and the possible remedies for violations of such standards are determined by servicing guides issued by Fannie Mae as well as the contract provisions established between Fannie Mae and the Bank. Remedies could include repurchase of an affected loan.

Although to date repurchase requests related to representation and warranty provisions, and servicing activities have been limited, it is possible that requests to repurchase mortgage loans may increase in frequency if investors more aggressively pursue all means of recovering losses on their purchased loans. As of December 31, 2013, we believe that this exposure is not material due to the historical level of repurchase requests and loss trends, in addition to the fact that 99.5% of our residential mortgage loans serviced for Fannie Mae were current as of such date. We maintain ongoing communications with our investors and will continue to evaluate this exposure by monitoring the level and number of repurchase requests as well as the delinquency rates in our investor portfolios.

Effects of Inflation and Changing Prices

The consolidated financial statements and related consolidated financial data presented herein have been prepared in accordance with GAAP and practices within the banking industry which require the measurement of financial position and operating results in terms of historical dollars without considering the changes in the relative purchasing power of money over time due to inflation. Unlike most industrial companies, virtually all the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the effects of general levels of inflation.

CURRENT ACCOUNTING DEVELOPMENTS

The following Accounting Standards Updates (Updates or ASUs) have been issued by the FASB but are not yet effective.

ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists;

ASU 2014-01, Accounting for Investments in Qualified Affordable Housing Projects; and

ASU 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure.
Information about these pronouncements is described in more detail below.

ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, is expected to eliminate diversity in practice as it provides guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss (NOL) carryforward, a similar tax loss, or a tax credit carryforward exists. These changes are effective for the Company in the first quarter of 2014 with prospective application applied to all unrecognized tax benefits that exist at the effective date. Early adoption and retrospective application are permitted. Adoption of this ASU will not have a significant impact on the financial statements of the Company.

Table of Contents

ASU 2014-01, *Accounting for Investments in Qualified Affordable Housing Projects*, amends the criteria a company must meet to elect to account for investments in qualified affordable housing projects using a method other than the cost or equity methods. If the criteria are met, a company is permitted to amortize the initial investment cost in proportion to and over the same period as the total tax benefits the company expects to receive. The amortization of the initial investment cost and tax benefits are to be recorded in the income tax expense line. The Update also requires new disclosures about all investments in qualified affordable housing projects regardless of the accounting method used. These changes are effective for the Company in the first quarter of 2015 with retrospective application. Early adoption is permitted. The Company is evaluating the impact this ASU will have on our consolidated financial statements.

ASU 2014-04, *Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*, clarifies the timing of when a creditor is considered to have taken physical possession of residential real estate collateral for a consumer mortgage loan, resulting in the reclassification of the loan receivable to real estate owned. A creditor has taken physical possession of the property when either (1) the creditor obtains legal title through foreclosure, or (2) the borrower transfers all interests in the property to the creditor via a deed in lieu of foreclosure or a similar legal agreement. The Update also requires disclosure of the amount of foreclosed residential real estate property held by the creditor and the recorded investment in residential real estate mortgage loans that are in process of foreclosure. These changes are effective for the Company in the first quarter of 2015 with retrospective application. Early adoption is permitted. Adoption of this ASU will not have a significant impact on the financial statements of the Company.

Table of Contents**Table 1 Explanation of Non-GAAP Financial Measures**

In addition to results presented in accordance with GAAP, this annual report on Form 10-K includes certain designated net interest income amounts presented on a tax-equivalent basis, a non-GAAP financial measure, including the presentation of total revenue and the calculation of the efficiency ratio.

The Company believes the presentation of net interest income on a tax-equivalent basis provides comparability of net interest income from both taxable and tax-exempt sources and facilitates comparability within the industry. Although the Company believes these non-GAAP financial measures enhance investors' understanding of its business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The reconciliation of these non-GAAP financial measures from GAAP to non-GAAP are presented below.

	2013				2012			
	Fourth Quarter	Third Quarter	Second Quarter	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
<i>(in thousands)</i>								
Net interest income (GAAP)	\$ 5,279	5,270	5,232	5,141	5,325	5,259	5,312	5,001
Tax-equivalent adjustment	342	351	365	382	396	416	416	414
Net interest income (Tax-equivalent)	\$ 5,621	5,621	5,597	5,523	5,721	5,675	5,728	5,415

	Year ended December 31

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by ITEM 7A is set forth in ITEM 7 under the caption MARKET AND LIQUIDITY RISK MANAGEMENT and is incorporated herein by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See Financial Statements and Supplementary Data contained within this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act), the Company's management, under the supervision and with the participation of its principal executive and principal financial officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Rule 13a-15(e) under the Exchange Act. Based on that evaluation, and the results of the audit process described below, the Chief Executive Officer and Principal Financial and Accounting Officer concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Principal Financial and Accounting Officer, as appropriate, to allow timely decisions regarding disclosure.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Under the direction of the Company's Chief Executive Officer and Principal Financial and Accounting Officer, management has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2013 in accordance with the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has concluded that such internal control over financial reporting was effective as of December 31, 2013.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to the final rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Changes in Internal Control Over Financial Reporting

During the period covered by this report, there has not been any change in the Company's internal controls over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION
None.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Auburn National Bancorporation, Inc.:

We have audited the accompanying consolidated balance sheets of Auburn National Bancorporation, Inc. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of earnings, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Auburn National Bancorporation, Inc. and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013 in conformity with U.S. generally accepted accounting principles.

Table of Contents

AUBURN NATIONAL BANCORPORATION, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

Auburn National Bancorporation, Inc. (the Company) is a bank holding company whose primary business is conducted by its wholly-owned subsidiary, AuburnBank (the Bank). AuburnBank is a commercial bank located in Auburn, Alabama. The Bank provides a full range of banking services in its primary market area, Lee County, which includes the Auburn-Opelika Metropolitan Statistical Area.

Basis of Presentation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Auburn National Bancorporation Capital Trust I is an affiliate of the Company and was included in these consolidated financial statements pursuant to the equity method of accounting. Significant intercompany transactions and accounts are eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the balance sheet date and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term include the determination of the allowance for loan losses, fair value measurements, valuation of other real estate owned, and valuation of deferred tax assets.

In the first quarter of 2013, the Company adopted new guidance related to the following Accounting Standards Updates (Updates or ASUs):

ASU 2011-11, *Disclosures about Offsetting Assets and Liabilities*;

ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*; and

ASU 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*.

In the third quarter of 2013, the Company adopted new guidance related to the following Update:

ASU 2013-10, *Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes*.

Information about these pronouncements is described in more detail below.

ASU 2011-11, *Disclosures about Offsetting Assets and Liabilities*, expands the disclosure requirements for financial instruments and derivatives that may be offset in accordance with enforceable master netting agreements or similar arrangements. The disclosures are required regardless of whether the instruments have been offset (or netted) in the statement of financial position. Under ASU 2011-11, companies must describe the nature of offsetting arrangements and provide quantitative information about those agreements, including the gross and net amounts of financial instruments that are recognized in the statement of financial position. In January 2013, the FASB issued ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, which clarifies the scope of the offsetting disclosures and addresses any unintended consequences due to feedback from stakeholders that standard commercial provisions of many contracts would equate to a master netting arrangement. These changes were effective for the Company in the first quarter of 2013 with retrospective application. Adoption of this ASU did not have any impact on the financial statements of the Company.

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

ASU 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*, seeks to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments in this Update require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP

Table of Contents

that provide additional detail about those amounts. These changes were effective for the Company in the first quarter of 2013 with retrospective application. This Update did not affect our consolidated financial results as it amends only the presentation of comprehensive income. See Consolidated Statements of Comprehensive Income.

ASU 2013-10, *Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes*, permits the Fed Funds Effective Swap Rate (Overnight Index Swap Rate) to be used as a U.S. benchmark interest rate for hedge accounting purposes, in addition to LIBOR and U.S. Treasury. The ASU also removes the restriction on using different benchmark rates for similar hedges. These changes are effective for the Company in the third quarter of 2013 with prospective application for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. Adoption of this ASU did not have a significant impact on the financial statements of the Company.

Cash Equivalents

Cash equivalents include cash on hand, cash items in process of collection, amounts due from banks, including interest bearing deposits with other banks, and federal funds sold.

Securities

Securities are classified based on management's intention at the date of purchase. At December 31, 2013, all of the Company's securities were classified as available-for-sale. Securities available-for-sale are used as part of the Company's interest rate risk management strategy, and they may be sold in response to changes in interest rates, changes in prepayment risks or other factors. All securities classified as available-for-sale are recorded at fair value with any unrealized gains and losses reported in accumulated other comprehensive loss, net of the deferred income tax effects. Interest and dividends on securities, including the amortization of premiums and accretion of discounts are recognized in interest income over the anticipated life of the security using the effective interest method, taking into consideration prepayment assumptions. Realized gains and losses from the sale of securities are determined using the specific identification method.

On a quarterly basis, management makes an assessment to determine whether there have been events or economic circumstances to indicate that a security on which there is an unrealized loss is other-than-temporarily impaired. For equity securities with an unrealized loss, the Company considers many factors including the severity and duration of the impairment; the intent and ability of the Company to hold the security for a period of time sufficient for a recovery in value; and recent events specific to the issuer or industry. Equity securities on which there is an unrealized loss that is deemed to be other-than-temporary are written down to fair value with the write-down recorded as a realized loss in securities gains (losses), net.

For debt securities with an unrealized loss, an other-than-temporary impairment write-down is triggered when (1) the Company has the intent to sell a debt security, (2) it is more likely than not that the Company will be required to sell the debt security before recovery of its amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the debt security. If the Company has the intent to sell a debt security or if it is more likely than not that it will be required to sell the debt security before recovery, the other-than-temporary write-down is equal to the entire difference between the debt security's amortized cost and its fair value. If the Company does not intend to sell the security or it is not more likely than not that it will be required to sell the security before recovery, the other-than-temporary impairment write-down is separated into the amount that is credit related (credit loss component) and the amount due to all other factors. The credit loss component is recognized in earnings, as a realized loss in securities gains (losses), and is the difference between the security's amortized cost basis and the present value of its expected future cash flows. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and is recognized in other comprehensive income, net of applicable taxes.

Loans held for sale

Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Loan sales are recognized when the transaction closes, the proceeds are collected, and ownership is transferred. Continuing involvement, through the sales agreement, consists of the right to service the loan for a fee for the life of the loan, if applicable. Gains on the sale of loans held for sale are recorded net of related costs, such as commissions, and reflected as a component of mortgage lending income in the consolidated statements of earnings.

Table of Contents

In the course of conducting the Bank's mortgage lending activities of originating mortgage loans and selling those loans in the secondary market, the Bank makes various representations and warranties to the purchaser of the mortgage loans. Every loan closed by the Bank's mortgage center is run through a government agency automated underwriting system. Any exceptions noted during this process are remedied prior to sale. These representations and warranties also apply to underwriting the real estate appraisal opinion of value for the collateral securing these loans. Failure by the Company to comply with the underwriting and/or appraisal standards could result in the Company being required to repurchase the mortgage loan or to reimburse the investor for losses incurred (make whole requests) if such failure cannot be cured by the Company within the specified period following discovery. In 2012, we repurchased one residential mortgage loan with an unpaid principal balance of \$0.3 million. This loan was current as to principal and interest at the time of repurchase, and we incurred no losses upon repurchase. Except for this loan, during 2013, 2012, and 2011, no loans were repurchased and no reimbursements for investor losses were made by the Company.

Loans

Loans are reported at their outstanding principal balances, net of any unearned income, charge-offs, and any deferred fees or costs on originated loans. Interest income is accrued based on the principal balance outstanding. Loan origination fees, net of certain loan origination costs, are deferred and recognized in interest income over the contractual life of the loan using the effective interest method. Loan commitment fees are generally deferred and amortized on a straight-line basis over the commitment period, which results in a recorded amount that approximates fair value.

The accrual of interest on loans is discontinued when there is a significant deterioration in the financial condition of the borrower and full repayment of principal and interest is not expected or the principal or interest is more than 90 days past due, unless the loan is both well-collateralized and in the process of collection. Generally, all interest accrued but not collected for loans that are placed on nonaccrual status is reversed against current interest income. Interest collections on nonaccrual loans are generally applied as principal reductions. The Company determines past due or delinquency status of a loan based on contractual payment terms.

A loan is considered impaired when it is probable the Company will be unable to collect all principal and interest payments due according to the contractual terms of the loan agreement. Individually identified impaired loans are measured based on the present value of expected payments using the loan's original effective rate as the discount rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the recorded investment in the impaired loan exceeds the measure of fair value, a valuation allowance may be established as part of the allowance for loan losses. Changes to the valuation allowance are recorded as a component of the provision for loan losses.

Impaired loans also included troubled debt restructurings (TDRs). In the normal course of business, management may grant concessions to borrowers who are experiencing financial difficulty. The concessions granted most frequently for TDRs involve reductions or delays in required payments of principal and interest for a specified time, the rescheduling of payments in accordance with a bankruptcy plan or the charge-off of a portion of the loan. In most cases, the conditions of the credit also warrant nonaccrual status, even after the restructuring occurs. As part of the credit approval process, the restructured loans are evaluated for adequate collateral protection in determining the appropriate accrual status at the time of restructuring. TDR loans may be returned to accrual status if there has been at least a six-month sustained period of repayment performance by the borrower.

Allowance for Loan Losses

The allowance for loan losses is maintained at a level that management believes is adequate to absorb probable losses inherent in the loan portfolio. Loan losses are charged against the allowance when they are known. Subsequent recoveries are credited to the allowance. Management's determination of the adequacy of the allowance is based on an evaluation of the portfolio, current economic conditions, growth, composition of the loan portfolio, homogeneous pools of loans, risk ratings of specific loans, historical loan loss factors, identified impaired loans and other factors related to the portfolio. This evaluation is performed quarterly and is inherently subjective, as it requires various material estimates that are susceptible to significant change, including the amounts and timing of future cash flows expected to be received on any impaired loans. In addition, regulatory agencies, as an integral part of their examination process, will periodically review the Company's allowance for loan losses, and may require the Company to record additions to the allowance based on their judgment about information available to them at the time of their examinations.

Premises and Equipment

Land is carried at cost. Buildings and equipment are carried at cost, less accumulated depreciation computed on a straight-line method over the useful lives of the assets or the expected terms of the leases, if shorter. Expected terms include lease option periods to the extent that the exercise of such options is reasonably assured.

Table of Contents

Other Real Estate Owned

Other real estate owned (OREO) includes properties acquired through, or in lieu of, loan foreclosure that are held for sale and are initially recorded at the lower of the loan's carrying amount or fair value less cost to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying value amount or fair value less cost to sell. Gains or losses realized upon sale of OREO and additional losses related to subsequent valuation adjustments are determined on a specific property basis and are included as a component of noninterest expense along with holding costs.

Nonmarketable equity investments

Nonmarketable equity investments include equity securities that are not publicly traded and securities acquired for various purposes. The Bank is required to maintain certain minimum levels of equity investments with certain regulatory and other entities in which the Bank has an ongoing business relationship based on the Bank's common stock and surplus (with regard to the relationship with the Federal Reserve Bank) or outstanding borrowings (with regard to the relationship with the Federal Home Loan Bank of Atlanta). These securities are accounted for under the cost method and are included in other assets. For cost-method investments, on a quarterly basis, the Company evaluates whether an event or change in circumstances has occurred during the reporting period that may have a significant adverse effect on the fair value of the investment. If the Company determines that a decline in value is other-than-temporary, the Company will recognize the estimated loss in securities gains (losses), net.

Transfers of Financial Assets

Transfers of an entire financial asset (i.e. loan sales), a group of entire financial assets, or a participating interest in an entire financial asset (i.e. loan participations sold) are accounted for as sales when control over the assets have been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Mortgage Servicing Rights

The Company recognizes as assets the rights to service mortgage loans for others, known as MSR. The Company determines the fair value of MSR at the date the loan is transferred. To determine the fair value of MSR, the Company engages an independent third party. The independent third party's valuation model calculates the present value of estimated future net servicing income using assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, default rates, cost to service, escrow account earnings, contractual servicing fee income, ancillary income, and late fees.

Subsequent to the date of transfer, the Company has elected to measure its MSR under the amortization method. Under the amortization method, MSR are amortized in proportion to, and over the period of, estimated net servicing income. The amortization of MSR is analyzed monthly and is adjusted to reflect changes in prepayment speeds, as well as other factors. MSR are evaluated for impairment based on the fair value of those assets. Impairment is determined by stratifying MSR into groupings based on predominant risk characteristics, such as interest rate and loan type. If, by individual stratum, the carrying amount of the MSR exceeds fair value, a valuation allowance is established through a charge to earnings. The valuation allowance is adjusted as the fair value changes. MSR are included in the other assets category in the accompanying consolidated balance sheets.

Derivative Instruments

In accordance with ASC Topic 815, *Derivatives and Hedging*, all derivative instruments are recorded on the consolidated balance sheet at their respective fair values.

The accounting for changes in fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, if so, on the reason for holding it. If the derivative instrument is not designated as part of a hedging relationship, the gain or loss on the derivative instrument is recognized in earnings in the period of change. None of the derivatives utilized by the Company have been designated as a hedge.

Securities sold under agreements to repurchase

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

Securities sold under agreements to repurchase generally mature less than one year from the transaction date. Securities sold under agreements to repurchase are reflected as a secured borrowing in the accompanying consolidated balance sheets at the amount of cash received in connection with each transaction.

Table of Contents

Income Taxes

Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized. The net deferred tax asset is reflected as a component of other assets in the accompanying consolidated balance sheets.

Income tax expense or benefit for the year is allocated among continuing operations and other comprehensive income (loss), as applicable. The amount allocated to continuing operations is the income tax effect of the pretax income or loss from continuing operations that occurred during the year, plus or minus income tax effects of (1) changes in certain circumstances that cause a change in judgment about the realization of deferred tax assets in future years, (2) changes in income tax laws or rates, and (3) changes in income tax status, subject to certain exceptions. The amount allocated to other comprehensive income (loss) is related solely to changes in the valuation allowance on items that are normally accounted for in other comprehensive income (loss) such as unrealized gains or losses on available-for-sale securities.

In accordance with ASC 740, a tax position is recognized as a benefit only if it is more likely than not that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the more likely than not test, no tax benefit is recorded. It is the Company's policy to recognize interest and penalties related to income tax matters in income tax expense. The Company and its wholly-owned subsidiaries file a consolidated income tax return.

Fair Value Measurements

ASC 820, which defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles and expands disclosures about fair value measurements. ASC 820 applies only to fair-value measurements that are already required or permitted by other accounting standards. The definition of fair value focuses on the exit price, i.e., the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, not the entry price, i.e., the price that would be paid to acquire the asset or received to assume the liability at the measurement date. The statement emphasizes that fair value is a market-based measurement; not an entity-specific measurement. Therefore, the fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. For more information related to fair value measurements, please refer to Note 17, Fair Value.

Subsequent Events

The Company has evaluated the effects of events or transactions through the date of this filing that have occurred subsequent to December 31, 2013. The Company does not believe there are any material subsequent events that would require further recognition or disclosure.

Table of Contents**NOTE 2: BASIC AND DILUTED EARNINGS PER SHARE**

Basic net earnings per share is computed by dividing net earnings by the weighted average common shares outstanding for the year. Diluted net earnings per share reflect the potential dilution that could occur upon exercise of securities or other rights for, or convertible into, shares of the Company's common stock. As of December 31, 2013, 2012, and 2011, respectively, the Company had no such securities or rights issued or outstanding, and therefore, no dilutive effect to consider for the diluted earnings per share calculation.

The basic and diluted earnings per share computations for the respective years are presented below.

	Year ended December 31		
<i>(Dollars in thousands, except share and per share data)</i>	2013	2012	2011
Basic and diluted:			
Net earnings	\$ 7,118	\$ 6,763	\$ 5,538
Weighted average common shares outstanding	3,643,003	3,642,831	3,642,735
Earnings per share	\$ 1.95	\$ 1.86	\$ 1.52

NOTE 3: VARIABLE INTEREST ENTITIES

Generally, a variable interest entity (VIE) is a corporation, partnership, trust or other legal structure that does not have equity investors with substantive or proportional voting rights or has equity investors that do not provide sufficient financial resources for the entity to support its activities.

At December 31, 2013, the Company did not have any consolidated VIEs to disclose but did have one nonconsolidated VIE, discussed below.

Trust Preferred Securities

The Company owns the common stock of a subsidiary business trust, Auburn National Bancorporation Capital Trust I, which issued mandatorily redeemable preferred capital securities (trust preferred securities) in the aggregate of approximately \$7.0 million at the time of issuance. This trust meets the definition of a VIE of which the Company is not the primary beneficiary; the trust's only assets are junior subordinated debentures issued by the Company, which were acquired by the trust using the proceeds from the issuance of the trust preferred securities and common stock. The junior subordinated debentures of approximately \$7.2 million are included in long-term debt and the Company's equity interest of \$0.2 million in the business trust is included in other assets. Interest expense on the junior subordinated debentures is included in interest expense on long-term debt.

The following table summarizes VIEs that are not consolidated by the Company as of December 31, 2013.

	Maximum		
	Loss	Liability	
<i>(Dollars in thousands)</i>	Exposure	Recognized	Classification

Type:

Trust preferred issuances	N/A	\$	7,217	Long-term debt
---------------------------	-----	----	-------	----------------

NOTE 4: RESTRICTED CASH BALANCES

Regulation D of the Federal Reserve Act requires that banks maintain reserve balances with the Federal Reserve Bank based principally on the type and amount of their deposits. As of December 31, 2013 and 2012, the Bank did not have a required reserve balance at the Federal Reserve Bank.

Table of Contents**NOTE 5: SECURITIES**

At December 31, 2013 and 2012, respectively, all securities within the scope of ASC 320, *Investments – Debt and Equity Securities* were classified as available-for-sale. The fair value and amortized cost for securities available-for-sale by contractual maturity December 31, 2013 and 2012, respectively, are presented below.

	1 year	1 to 5	5 to 10	After 10	Fair	Gross Unrealized		Amortized
(Dollars in thousands)	or less	years	years	years	Value	Gains	Losses	Cost
December 31, 2013								
Agency obligations (a)	\$		23,247	21,275	44,522		4,557	\$ 49,079
Agency RMBS (a)			8,306	154,052	162,358	976	4,733	166,115
State and political subdivisions		1,735	21,366	41,238	64,339	1,560	459	63,238
Total available-for-sale	\$	1,735	52,919	216,565	271,219	2,536	9,749	\$ 278,432
December 31, 2012								
Agency obligations (a)	\$		20,065	19,460	39,525	187	19	\$ 39,357
Agency RMBS (a)			4,700	136,760	141,460	3,012	162	138,610
State and political subdivisions	111	1,830	21,006	54,891	77,838	5,222		72,616
Trust preferred securities				652	652	113	154	693
Total available-for-sale	\$	111	45,771	211,763	259,475	8,534	335	\$ 251,276

(a) Includes securities issued by U.S. government agencies or government sponsored entities.

Securities with aggregate fair values of \$120.5 million and \$134.0 million at December 31, 2013 and 2012, respectively, were pledged to secure public deposits, securities sold under agreements to repurchase, Federal Home Loan Bank (FHLB) advances, and for other purposes required or permitted by law.

Included in other assets on the accompanying consolidated balance sheets are cost-method investments. The carrying amounts of cost-method investments were \$1.8 and \$3.0 million at December 31, 2013 and 2012, respectively. Cost-method investments primarily include non-marketable equity investments, such as FHLB of Atlanta stock and Federal Reserve Bank (FRB) stock.

Gross Unrealized Losses and Fair Value

The fair values and gross unrealized losses on securities at December 31, 2013 and 2012, respectively, segregated by those securities that have been in an unrealized loss position for less than 12 months and 12 months or more are presented below.

	Less than 12 Months		12 Months or Longer		Total	
(Dollars in thousands)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

Edgar Filing: AUBURN NATIONAL BANCORPORATION, INC - Form 10-K

December 31, 2013:

Agency obligations	\$ 35,933	3,182	8,590	1,376	44,523	\$ 4,558
Agency RMBS	109,774	4,393	7,683	339	117,457	4,732
State and political subdivisions	9,575	459			9,575	459
Total	\$ 155,282	8,034	16,273	1,715	171,555	\$ 9,749

December 31, 2012:
