Forward-Looking Information

The information included in this Form 10-Q contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to Popular, Inc. s (the Corporation , Popular , we , us , our) financial condition, results of operations, plans, objectives, future performanc business, including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes, capital markets conditions, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Corporation s financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words anticipate, believe, continues, expect, estimate, intend, project and similar and future or conditional verbs such as will, would, should, could, might, can, may, or similar expressions generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict.

Various factors, some of which are beyond Popular s control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

- the rate of growth in the economy and employment levels, as well as general business and economic conditions;
- changes in interest rates, as well as the magnitude of such changes;
- the fiscal and monetary policies of the federal government and its agencies;
- changes in federal bank regulatory and supervisory policies, including required levels of capital and the impact of proposed capital standards on our capital ratios;
- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) on our businesses, business practices and cost of operations;
- regulatory approvals that may be necessary to undertake certain actions or consummate strategic transactions such as acquisitions and dispositions;
- the relative strength or weakness of the consumer and commercial credit sectors and of the real estate markets in Puerto Rico and the other markets in which borrowers are located;

- the performance of the stock and bond markets;
- competition in the financial services industry;
- additional Federal Deposit Insurance Corporation (FDIC) assessments; and
- possible legislative, tax or regulatory changes.

Other possible events or factors that could cause results or performance to differ materially from those expressed in these forward-looking statements include the following: negative economic conditions that adversely affect housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of non-performing assets, charge-offs and provision expense; changes in interest rates and market liquidity which may reduce interest margins, impact funding sources and affect our ability to originate and distribute financial products in the primary and secondary markets; changes in market rates and prices which may adversely impact the value of financial assets and liabilities; liabilities resulting from litigation and regulatory investigations; changes in accounting standards, rules and interpretations; our ability to grow our core businesses; decisions to downsize, sell or close units or otherwise change our business mix; and management s ability to identify and manage these and other risks. Moreover, the outcome of legal proceedings, as discussed in Part II, Item I. Legal Proceedings, is inherently uncertain and depends on judicial interpretations of law and the findings of regulators, judges and juries. Investors should refer to the Corporation s Annual Report on Form 10-K for the year ended December 31, 2013 as well as Part II, Item 1A of this Form 10-Q for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

All forward-looking statements included in this document are based upon information available to the Corporation as of the date of this document, and other than as required by law, including the requirements of applicable securities laws, we assume no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

Note 1 Organization, consolidation and basis of presentation

Nature of Operations

Popular, Inc. (the Corporation) is a diversified, publicly-owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation has operations in Puerto Rico, the United States and the Caribbean. In Puerto Rico, the Corporation provides retail, including mortgage loan originations, and commercial banking services through its principal banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as investment banking, broker-dealer, auto and equipment leasing and financing, and insurance services through specialized subsidiaries. The Corporation s mortgage origination business is conducted under the brand name Popular Mortgage, a division of BPPR. In the U.S. mainland, the Corporation operates Banco Popular North America (BPNA), including its wholly-owned subsidiary E-LOAN. BPNA focuses efforts and resources on the core community banking business. BPNA operates branches in New York, California, New Jersey and South Florida. E-LOAN markets deposit accounts under its name for the benefit of BPNA. Refer to Note 3, for discussion of the sales of the Illinois and Central Florida regional operations during the third quarter of 2014. The BPNA branches operate under the name of Popular Community Bank. Note 36 to the consolidated financial statements presents information about the Corporation s business segments. Refer to Note 37 for a discussion of the sale by BPNA of its regional operations in California, which closed on November 8, 2014.

Principles of Consolidation and Basis of Presentation

The consolidated interim financial statements have been prepared without audit. The consolidated statement of financial condition data at December 31, 2013 was derived from audited financial statements. The unaudited interim financial statements are, in the opinion of management, a fair statement of the results for the periods reported and include all necessary adjustments, all of a normal recurring nature, for a fair statement of such results.

Certain reclassifications have been made to the 2013 consolidated financial statements and notes to the financial statements to conform with the 2014 presentation. As discussed in Note 3, current and prior periods presented in the consolidated statement of operations as well as the related note disclosures covering income and expense amounts have been retrospectively adjusted for the impact of the discontinued operations for comparative purposes. The consolidated statement of financial condition and related note disclosure for prior periods do not reflect the reclassification of BPNA s assets and liabilities to discontinued operations.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted from the unaudited financial statements pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, these financial statements should be read in conjunction with the audited consolidated financial statements of the Corporation for the year ended December 31, 2013, included in the Corporation s 2013 Annual Report (the 2013 Annual Report). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

During the third quarter of 2014, the Corporation recorded an out-of-period adjustment to correct an error in the amortization expense of the FDIC indemnification asset recorded during the years 2012, 2013 and the six months period ended June 30, 2014. The FDIC indemnity asset amortization for the third quarter of 2014 included a benefit of approximately $15.0 million to reverse the impact of accelerated amortization expense recorded during prior periods. This amount will be recognized as expense over the remaining portion of the Loss Sharing Agreement that expires in the quarter ending June 30, 2015. After evaluating the quantitative and qualitative aspects of the error and the out-of-period adjustment to the Corporation s financial results, management has determined that the misstatement and

the out-of-period adjustment are not material to the 2012, 2013 and 2014 financial statements, respectively.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2 New accounting pronouncements

FASB Accounting Standards Update 2014-14, Receivables Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure (ASU 2014-14)

The FASB issued ASU 2014-14 in August 2014, which intends to resolve the diversity in practice related to how creditors classify government-guaranteed mortgage loans, including FHA or VA guaranteed loans, upon foreclosure. Some creditors reclassify those loans to real estate consistent with other foreclosed loans that do not have guarantees; others reclassify the loans to receivables. This ASU address the classification of certain foreclosed mortgage loans held by creditors that are either fully or partially guaranteed under government programs.

The amendments of the ASU require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met:

1- The loan has a government guarantee that is not separable from the loan before foreclosure.

2- At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim.

3- At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed.

Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance expected to be recovered from the guarantor.

The amendments in the ASU are effective for annual periods, and interim periods within those annual periods, beginning in the first quarter of 2015. The amendments of this ASU can be applied using either a prospective transition method or a modified retrospective transition method. For prospective transition, an entity should apply the amendments in this Update to foreclosures that occur after the date of adoption. For modified retrospective transition, an entity should apply the amendments in this Update by means of a cumulative-effect adjustment as of the beginning of the annual period of adoption. Prior periods should not be adjusted. However, a reporting entity must apply the same method of transition as elected under ASU 2014-04.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2014-13, Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financial Entity (ASU 2014-13)

The FASB issued ASU 2014-13 in August 2014, which intends to clarify that when a reporting entity that consolidates a collateralized financing entity may elect to measure the financial assets and the financial liabilities of that collateralized financing entity using either the measurement alternative included in this Update or Topic 820 on fair value measurement. When the measurement alternative is not elected, the amendments of this Update clarify that the fair value of the financial assets and the fair value of the financial liabilities of the consolidated collateralized financing entity should be measured using the requirements of Topic 820 and any differences in the fair value of the

financial assets and the fair value of the financial liabilities of that entity should be reflected in earnings and attributed to the reporting entity in the consolidated statement of income.

When a reporting entity elects the measurement alternative included in this Update for a collateralized financing entity, the reporting entity should measure both the financial assets and the financial liabilities of that entity in its consolidated financial statements using the more observable of the fair value of the financial assets and the fair value of the financial liabilities.

The amendments in the ASU are effective in the first quarter of 2016. Early adoption is permitted as of the beginning of an annual period. The amendments of this ASU can be applied using a modified retrospective approach by recording a cumulative-effect adjustment to equity as of the beginning of the annual period of adoption. A reporting entity also may apply the amendments retrospectively to all relevant prior periods beginning with the annual period in which the amendments of ASU 2009-17 were initially adopted.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2014-12, Compensation Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period (ASU 2014-12)

Table of Contents

The FASB issued ASU 2014-12 in June 2014, which intends to resolve the diverse accounting treatment of awards with a performance target that could be achieved after an employee completes the requisite service period. That is, the employee would be eligible to vest in the award regardless of whether the employee is rendering service on the date the performance target is achieved.

The amendments of the ASU require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award.

Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the periods for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period.

The amendments in the ASU are effective in the first quarter of 2016. Early adoption is permitted. The amendments of this ASU can be applied (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets outstanding at the beginning of the period of adoption and to all new or modified awards thereafter.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2014-11, Transfers and Servicing (Topic 860) Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures (ASU 2014-11)

The FASB issued ASU 2014-11 in June 2014, which requires two accounting changes. First, the amendments in this Update change the accounting for repurchase-to-maturity transactions to secured borrowing accounting. Second, for repurchase financing arrangements, the amendments require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement.

The amendments in this Update require disclosures for certain transactions comprising (1) a transfer of a financial asset accounted for as a sale and (2) an agreement with the same transferee entered into in contemplation of the initial transfer that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction.

The accounting changes in this ASU are effective in the first quarter of 2015. Early application is prohibited. An entity is required to present changes in accounting for transactions outstanding on the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2014-09, Revenue from Contracts with Customers (Topic 606); (ASU 2014-09)

The FASB issued ASU 2014-09 in May 2014, which clarifies the principles for recognizing revenue and develop a common revenue standard that would (1) remove inconsistencies and weaknesses in revenue requirements, (2) provide a more robust framework for addressing revenue issues, (3) improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets, (4) provide more useful information to users of financial statement through improved disclosure requirements and (5) simplify the preparation of financial statements by reducing the number of requirements to which an entity must refer. ASU 2014-09 amends the ASC Codification and creates a new Topic 606, Revenue from Contracts with Customers.

The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

In addition, the new guidance requires disclosures to enable users of financial statements to understand the nature, timing, and uncertainty of revenue and cash flows arising from contracts with customers. Qualitative and quantitative information is required about contract with customers, significant judgments and changes in judgments, and assets recognized from the cost to obtain or fulfill a contract.

The amendments in this ASU are effective in the first quarter of 2017. Early adoption is not permitted.

The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its consolidated financial statements.

FASB Accounting Standards Update 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposal of Components of an Entity (ASU 2014-08)

The FASB issued ASU 2014-08 in April 2014, which changes the criteria for reporting discontinued operations while enhancing disclosures in this area. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization s operations and financial results. Examples include a disposal of a major geographic area, a major line of business, or a major equity investment.

In addition, the new guidance requires expanded disclosures about discontinued operations that will include more information about the assets, liabilities, income, and expenses of discontinued operations.

The new guidance also requires disclosure of the pre-tax income attributable to a disposal of a significant part of an organization that does not qualify for discontinued operations reporting. This disclosure will provide information about the ongoing trends in the reporting organization s results from continuing operations.

The amendments in the ASU are effective in the first quarter of 2015. Early adoption is permitted.

The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its consolidated financial statements.

FASB Accounting Standards Update 2014-04, Receivables-Troubled Debt Restructuring by Creditors (SubTopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (ASU 2014-04)

The FASB issued ASU 2014-04 in January 2014 which clarifies when a creditor should be considered to have received physical possession of a residential real estate property collateralizing a consumer mortgage loan such that the loan should be derecognized and the real estate property recognized.

The amendments of this ASU clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: a) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure; or b) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement.

The amendment of this guidance requires interim and annual disclosures of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction.

ASU 2014-04 is effective for annual periods, and interim periods within those years, beginning after December 15, 2014. The amendments in this ASU can be elected using either a modified retrospective transition method or a prospective transition method. Early adoption is permitted.

The Corporation does not anticipate that the adoption of this guidance will have a material effect on its consolidated statements of financial condition or results of operations.

FASB Accounting Standards Update 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11)

The FASB issued ASU 2013-11 in July 2013 which requires that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. When a net operating loss, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purposes, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. Currently, there is no explicit guidance under U.S. GAAP on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendment of this guidance does not require new recurring disclosures.

ASU 2013-11 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013.

The Corporation adopted this guidance in the first quarter of 2014 and it did not have a material effect on the Corporation s consolidated financial statements.

FASB Accounting Standards Update 2013-05, Foreign Currency Matters (Topic 830): Parent s Accounting for the Cumulative Translation Adjustment Upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity (ASU 2013-05)

The FASB issued ASU 2013-05 in March 2013 which clarifies the applicable guidance for the release of the cumulative translation adjustment. When a reporting entity ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in ASC subtopic 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets has resided.

For an equity method investment that is a foreign entity, the partial sale guidance in ASC Section 830-30-40 still applies. As such, a pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of such equity method investment. However, this treatment does not apply to an equity method investment that is not a foreign entity. In those instances, the cumulative translation adjustment is released into net income only if the partial sale represents a complete or substantially complete liquidation of the foreign entity that contains the equity method investment.

Additionally, the amendments in this ASU clarify that the sale of an investment in a foreign entity includes both: (1) events that result in the loss of a controlling financial interest in a foreign entity and (2) events that result in an acquirer obtaining control of an acquiree in which it held an equity interest immediately before the acquisition date. Accordingly, the cumulative translation adjustment should be released into net income upon the occurrence of those events.

ASU 2013-05 is effective for fiscal years and interim periods within those years, beginning on or after December 15, 2013. The amendments should be applied prospectively to derecognition events occurring after the effective date. Prior periods should not be adjusted.

The Corporation adopted this guidance on the first quarter of 2014 and recognized a loss of approximately $7.7 million resulting from the reclassification from other comprehensive loss into earnings of the cumulative foreign translation adjustment related to the dilution on its equity investment in BHD. Refer to note 15 for additional information.

Table of Contents

Note 3 Discontinued operations

On April 22, 2014, BPNA, the Corporation s U.S. mainland banking subsidiary, entered into definitive agreements to sell its California, Illinois and Central Florida regional operations to three different buyers.

On August 8, 2014, BPNA completed the sale of its Illinois regional operations. As part of the transaction, BPNA sold its 12 branches in the Chicago metropolitan area, including $562 million in loans, and $726 million in deposits, each as of July 31, 2014. The transaction resulted in a net gain of $24.6 million.

On September 15, 2014, BPNA completed the sale of its Central Florida regional operations. As part of the transaction, BPNA sold its 9 branches in the Central Florida area, including $104 million in loans and $217 million in deposits, each as of August 31, 2014. The transaction resulted in a net gain of $1.2 million.

On November 8, 2014, the Corporation completed the sale of the California regional operations. The Corporation sold 20 branches and transferred $1.1 billion in loans and $1.1 billion in deposits to Banc of California National Association, a wholly owned subsidiary of Banc of California, Inc. The transaction is expected to result in a net premium estimated at approximately $4 million, before customary transaction costs. The Corporation agreed to provide, subject to certain limitations, customary indemnification to the purchaser, including with respect to certain pre-closing liabilities and violations of representations and warranties. The Corporation also agreed to indemnify the purchaser for up to 1.5% of credit losses on transferred loans for a period of two years after the closing. Pursuant to this indemnification provision, the Corporation s maximum exposure is approximately $16 million.

The regional operations sold constituted a business, as defined in ASC 805-10-55. Accordingly, the decision to sell these businesses resulted in the discontinuance of each of these respective operations and classification as held-for-sale. For financial reporting purposes, the results of the discontinued operations are presented as Assets / Liabilities from discontinued operations in the consolidated statement of condition and (Loss) income from discontinued operations, net of tax in the consolidated statement of operations. As required by ASC 205-20, current and prior periods presented in the consolidated statement of operations as well as the related note disclosures covering income and expense amounts have been retrospectively adjusted for the impact of the discontinued operations for comparative purposes. The consolidated statement of financial condition and related note disclosure for prior periods do not reflect the reclassification of these assets and liabilities to discontinued operations.

During the quarter ended June 30, 2014, the Corporation recorded non-cash goodwill impairment charge of $186.5 million, related to the goodwill allocated, on a relative fair value basis, to these operations. However, this non-cash charge had no impact on the Corporation s tangible capital or regulatory capital ratios. Refer to Note 16, for additional information on the goodwill impairment charge.

In connection with these transactions, the Corporation is centralizing certain back office operations in Puerto Rico and New York. The Corporation incurred $8.3 million in restructuring charges during the third quarter of 2014. Over the course of the fourth quarter of 2014 and early 2015, an additional $41 million in restructuring charges are expected to be incurred, comprised of $22 million in severance and retention payments and $19 million in operational set-up costs and lease cancelations. Refer to Note 4, for restructuring charges incurred during the second and third quarter of 2014.

Assets and liabilities of discontinued operations are detailed below:

(In thousands)

	September 30, 2014
Cash	$ 9,500
Loans held-for-sale	1,099,673
Premises and equipment, net	8,596
Other assets	11,284
Total assets	$ 1,129,053
Deposits	$ 1,089,046
Other liabilities	17,716
Total liabilities	$ 1,106,762
Net assets	$ 22,291

Table of Contents

The following table provides the components of net income (loss) from the discontinued operations for the quarters and nine months ended September 30, 2014 and 2013.

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Net interest income	$ 16,022	$ 23,195	$ 56,911	$ 66,172
Provision (reversal) for loan losses		6,515	(6,764)	(1,345)
Net gain on sale of regions	25,775		25,775	
Other non-interest income	6,567	5,250	26,488	13,642
Total non-interest income	32,342	5,250	52,263	13,642
Operating expenses:				
Personnel costs	11,941	8,487	32,910	25,215
Net occupancy expenses	(1,305)	3,325	5,871	9,355
Professional fees	4,916	2,802	13,612	8,511
Goodwill impairment charge			186,511	
Other operating expenses	3,054	3,694	9,100	9,422
Total operating expenses	18,606	18,308	248,004	52,503
Net income (loss) from discontinued operations	$ 29,758	$ 3,622	$ (132,066)	$ 28,656

Table of Contents

Note 4 Restructuring plan

As discussed in Note 3, in connection with the sale of the operations of the California, Illinois and Central Florida regions, the Corporation is centralizing certain back office operations, previously conducted in these regions, to Puerto Rico and New York. The Corporation has undertaken a restructuring plan (the PCB Restructuring Plan) to eliminate and re-locate employment positions, terminate contracts and incur other costs associated with moving the operations to Puerto Rico and New York. The Corporation estimates that it will incur restructuring charges of approximately $54 million, comprised of $32 million in severance and retention payments and $22 million in operational set-up costs and lease cancelations, of which approximately $13 million were incurred during the second and third quarters of 2014. The remaining costs will be recognized during the fourth quarter of 2014 and early 2015.

Full-time equivalent employees at the California, Illinois and Central Florida regions were 218 as of September 30, 2014, compared with 365 as of December 31, 2013. Some of the employees at these regions will be transferred to the acquiring entities. The remaining employees at these regions are expected to be transferred to other of the Corporation s U.S. mainland or Puerto Rico operations or depart by mid-2015.

The following table details the expenses recorded by the Corporation that were associated with the PCB Restructuring Plan:

(In thousands)	Quarter ended 30-Sep-14	Nine months ended 30-Sep-14
Personnel costs	$ 6,194	$ 9,824
Net occupancy expenses	152	423
Equipment expenses	141	331
Professional fees	1,431	1,879
Other operating expenses	372	407
Total restructuring costs	$ 8,290	$ 12,864

The following table presents the activity in the reserve for the restructuring costs associated with the PCB Restructuring Plan:

(In thousands)	
Balance at July 1, 2014	$ 3,481
Charges expensed during the period	5,964
Payments made during the period	(20)
Balance as of September 30, 2014	$ 9,425

Table of Contents

Note 5 - Restrictions on cash and due from banks and certain securities

The Corporation s banking subsidiaries, BPPR and BPNA, are required by federal and state regulatory agencies to maintain average reserve balances with the Federal Reserve Bank of New York (the Fed) or other banks. Those required average reserve balances amounted to $ 970 million at September 30, 2014 (December 31, 2013 - $992 million). Cash and due from banks, as well as other short-term, highly liquid securities, are used to cover the required average reserve balances.

At September 30, 2014, the Corporation held $43 million in restricted assets in the form of funds deposited in money market accounts, trading account securities and investment securities available for sale (December 31, 2013 - $44 million). The amounts held in trading account securities and investment securities available for sale consist primarily of restricted assets held for the Corporation s non-qualified retirement plans and fund deposits guaranteeing possible liens or encumbrances over the title of insured properties.

Table of Contents

Note 6 Pledged assets

Certain securities and loans were pledged to secure public and trust deposits, assets sold under agreements to repurchase, other borrowings and credit facilities available, derivative positions, and loan servicing agreements. The classification and carrying amount of the Corporation s pledged assets, in which the secured parties are not permitted to sell or repledge the collateral, were as follows:

(In thousands)	September 30, 2014	December 31, 2013
Investment securities available-for-sale, at fair value	$ 1,985,427	$ 1,638,558
Investment securities held-to-maturity, at amortized cost	10,000	35,000
Loans held-for-sale measured at lower of cost or fair value	884	363
Loans held-in-portfolio covered under loss sharing agreements with the FDIC	514,578	407,257
Loans held-in-portfolio not covered under loss sharing agreements with the FDIC	8,516,488	9,108,984
Total pledged assets	$ 11,027,377	$ 11,190,162

Pledged assets from discontinued operations are presented as part of Assets from Discontinued Operations in the Consolidated Statement of Condition. Refer to Note 3 to the consolidated financial statements for further information on the discontinued operations.

Pledged securities that the creditor has the right by custom or contract to repledge are presented separately on the consolidated statements of financial condition.

At September 30, 2014, the Corporation had $ 1.1 billion in investment securities available-for-sale and $ 0.6 billion in loans that served as collateral to secure public funds (December 31, 2013 - $ 1.0 billion and $ 0.5 billion, respectively).

At September 30, 2014, the Corporation s banking subsidiaries had short-term and long-term credit facilities authorized with the Federal Home Loan Bank system (the FHLB) aggregating to $3.3 billion (December 31, 2013 - $3.0 billion). Refer to Note 18 to the consolidated financial statements for borrowings outstanding under these credit facilities. At September 30, 2014, the credit facilities authorized with the FHLB were collateralized by $ 4.0 billion in loans held-in-portfolio (December 31, 2013 - $ 4.5 billion). Also, at September 30, 2014, the Corporation s banking subsidiaries had a borrowing capacity at the Federal Reserve (Fed) discount window of $2.1 billion, which remained unused as of such date (December 31, 2013 - $3.4 billion). The amount available under these credit facilities with the Fed is dependent upon the balance of loans and securities pledged as collateral. At September 30, 2014, the credit facilities with the Fed discount window were collateralized by $ 4.4 billion in loans held-in-portfolio (December 31, 2013 - $ 4.5 billion). These pledged assets are included in the above table and were not reclassified and separately reported in the consolidated statements of financial condition.

In addition, at September 30, 2014, trade receivables from brokers and counterparties amounting to $19 million were pledged to secure repurchase agreements (December 31, 2013 - $69 million).

Table of Contents

Note 7 Investment securities available-for-sale

The following tables present the amortized cost, gross unrealized gains and losses, approximate fair value, weighted average yield and contractual maturities of investment securities available-for-sale at September 30, 2014 and December 31, 2013.

After 10 years	1,007,733	50,807	4,313	1,054,227	3.93

Total mortgage-backed securities	1,086,446	54,722	5,527	1,135,641	3.95
Equity securities (without contractual maturity)	3,178	1,109	171	4,116	4.06
Other					
After 1 to 5 years	9,638		141	9,497	1.68
After 10 years	2,604	69		2,673	3.61
Total other	12,242	69	141	12,170	2.09
Total investment securities available-for-sale	$ 5,345,877	$ 79,357	$ 130,434	$ 5,294,800	2.30 %

The weighted average yield on investment securities available-for-sale is based on amortized cost; therefore, it does not give effect to changes in fair value.

Securities not due on a single contractual maturity date, such as mortgage-backed securities and collateralized mortgage obligations, are classified in the period of final contractual maturity. The expected maturities of collateralized mortgage obligations, mortgage-backed securities and certain other securities may differ from their contractual maturities because they may be subject to prepayments or may be called by the issuer.

During the quarter ended September 30, 2014, the Corporation sold approximately $94.2 million in mortgage backed securities and collateralized mortgage obligations investment securities available-for-sale at the BPNA segment. The proceeds from this sale were $ 91.3 million. The Corporation realized a loss of $1.8 million on this transaction. There were no sales of investment securities available-for-sale during the nine months ended September 30, 2013.

The following tables present the Corporation s fair value and gross unrealized losses of investment securities available-for-sale, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2014 and December 31, 2013.

As of September 30, 2014, the available-for-sale investment portfolio reflects gross unrealized losses of approximately $93 million, driven by U.S. Agency Collateralized Mortgage Obligations, obligations from the U.S. Government sponsored entities, and obligations of the Puerto Rico Government and its political subdivisions. As part of its analysis for all US Agencies securities, management considers the U.S. Agency guarantee.

In February 2014, the three principal nationally recognized rating agencies (Moody s Investor Services, Standard and Poor s and Fitch Ratings) downgraded the general-obligation bonds of the Commonwealth and other obligations of

Puerto Rico instrumentalities to non-investment grade categories, citing concerns about financial flexibility and a reduced capacity to borrow in the financial markets. In July 2014, the Puerto Rico general obligations were further downgraded by the rating agencies, after the Commonwealth enacted a law that allowed certain Puerto Rico public corporations to restructure their debt. The portfolio of obligations of the Puerto Rico Government is comprised of securities with specific sources of income or revenues identified for repayments. The Corporation performs periodic credit quality reviews on these issuers.

Management evaluates investment securities for other-than-temporary (OTTI) declines in fair value on a quarterly basis. Once a decline in value is determined to be other-than-temporary, the value of a debt security is reduced and a corresponding charge to earnings is recognized for anticipated credit losses. Also, for equity securities that are considered other-than-temporarily impaired,

the excess of the security s carrying value over its fair value at the evaluation date is accounted for as a loss in the results of operations. The OTTI analysis requires management to consider various factors, which include, but are not limited to: (1) the length of time and the extent to which fair value has been less than the amortized cost basis, (2) the financial condition of the issuer or issuers, (3) actual collateral attributes, (4) the payment structure of the debt security and the likelihood of the issuer being able to make payments, (5) any rating changes by a rating agency, (6) adverse conditions specifically related to the security, industry, or a geographic area, and (7) management s intent to sell the debt security or whether it is more likely than not that the Corporation would be required to sell the debt security before a forecasted recovery occurs.

At September 30, 2014, management performed its quarterly analysis of all debt securities in an unrealized loss position. Based on the analyses performed, management concluded that no individual debt security was other-than-temporarily impaired as of such date. At September 30, 2014, the Corporation did not have the intent to sell debt securities in an unrealized loss position and it is not more likely than not that the Corporation will have to sell the investment securities prior to recovery of their amortized cost basis.

The following table states the name of issuers, and the aggregate amortized cost and fair value of the securities of such issuer (includes available-for-sale and held-to-maturity securities), in which the aggregate amortized cost of such securities exceeds 10% of stockholders equity. This information excludes securities backed by the full faith and credit of the U.S. Government. Investments in obligations issued by a state of the U.S. and its political subdivisions and agencies, which are payable and secured by the same source of revenue or taxing authority, other than the U.S. Government, are considered securities of a single issuer.

	September 30, 2014		December 31, 2013

	Less than 12 months		12 months or more		Total	
(In thousands)	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
Obligations of Puerto Rico, States and political subdivisions	$ 60,028	$ 12,180	$ 13,044	$ 7,246	$ 73,072	$ 19,426
Other	24,604	646			24,604	646
Total investment securities held-to-maturity in an unrealized loss position	$ 84,632	$ 12,826	$ 13,044	$ 7,246	$ 97,676	$ 20,072

As indicated in Note 7 to these consolidated financial statements, management evaluates investment securities for OTTI declines in fair value on a quarterly basis.

The Obligations of Puerto Rico, States and political subdivisions classified as held-to-maturity at September 30, 2014 are primarily associated with securities issued by municipalities of Puerto Rico and are generally not rated by a credit rating agency. This includes $61 million of securities issued by three municipalities of Puerto Rico that are payable from the real and personal property taxes collected within such municipalities. These bonds have seniority to the payment of operating cost and expenses of the municipality. The portfolio also includes approximately $41 million in securities for which the underlying source of payment is not the central government, but in which it provides a guarantee in the event of default. In February 2014, the three principal nationally recognized rating agencies (Moody s Investor Services, Standard and Poor s and Fitch Ratings) downgraded the general-obligation bonds of the Commonwealth and other obligations of Puerto Rico instrumentalities to non-investment grade categories, citing concerns about financial flexibility and a reduced capacity to borrow in the financial markets. In July 2014, the Puerto Rico general obligations were further downgraded by the rating agencies, after the Commonwealth enacted a law that allowed certain Puerto Rico public corporations to restructure their debt. The Corporation performs periodic credit quality reviews on these issuers. The Corporation does not have the intent to sell securities held-to-maturity and it is not more likely than not that the Corporation will have to sell these investment securities prior to recovery of their amortized cost basis.

Table of Contents

Note 9 Loans

Covered loans acquired in the Westernbank FDIC-assisted transaction, except for lines of credit with revolving privileges, are accounted for by the Corporation in accordance with ASC Subtopic 310-30. Under ASC Subtopic 310-30, the acquired loans were aggregated into pools based on similar characteristics. Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. The covered loans which are accounted for under ASC Subtopic 310-30 by the Corporation are not considered non-performing and will continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The Corporation measures additional losses for this portfolio when it is probable the Corporation will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition. Lines of credit with revolving privileges that were acquired as part of the Westernbank FDIC-assisted transaction are accounted for under the guidance of ASC Subtopic 310-20, which requires that any differences between the contractually required loan payment receivable in excess of the Corporation s initial investment in the loans be accreted into interest income. Loans accounted for under ASC Subtopic 310-20 are placed in non-accrual status when past due in accordance with the Corporation s non-accruing policy and any accretion of discount is discontinued.

The risks on loans acquired in the FDIC-assisted transaction are significantly different from the risks on loans not covered under the FDIC loss sharing agreements because of the loss protection provided by the FDIC. Accordingly, the Corporation presents loans subject to the loss sharing agreements as covered loans in the information below and loans that are not subject to the FDIC loss sharing agreements as non-covered loans . The FDIC loss sharing agreements expires at the end of the quarter ending June 30, 2015 for commercial (including construction) and consumer loans, and at the end of the quarter ending June 30, 2020 for single-family residential mortgage loans, as explained in Note 11.

For a summary of the accounting policy related to loans, interest recognition and allowance for loan losses refer to the summary of significant accounting policies included in Note 2 to the consolidated financial statements included in 2013 Annual Report.

The following table presents the composition of non-covered loans held-in-portfolio (HIP), net of unearned income, at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013

Other	209,502	219,644
Total loans held-in-portfolio[1]	$ 19,359,216	$ 21,611,866

[1] Non-covered loans held-in-portfolio at September 30, 2014 are net of $91 million in unearned income and exclude $178 million in loans held-for-sale (December 31, 2013 - $92 million in unearned income and $110 million in loans held-for-sale).

[2] The legacy portfolio is comprised of commercial loans, construction loans and lease financings related to certain lending products exited by the Corporation as part of restructuring efforts carried out in prior years at the BPNA segment.

Table of Contents

The following table presents the composition of covered loans at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Commercial real estate	$ 1,591,718	$ 1,710,229
Commercial and industrial	104,933	102,575
Construction	74,468	190,127
Mortgage	846,472	934,373
Consumer	36,672	47,123
Total loans held-in-portfolio	$ 2,654,263	$ 2,984,427

The following table provides a breakdown of loans held-for-sale (LHFS) at September 30, 2014 and December 31, 2013 by main categories.

(In thousands)	September 30, 2014 [1]	December 31, 2013
Commercial	$ 38,072	$ 603
Legacy	27,409	
Mortgage	106,832	109,823
Consumer	5,695	
Total loans held-for-sale	$ 178,008	$ 110,426

[1] Loans held-for-sale from discontinued operations are presented as part of Assets from Discontinued Operations in the Consolidated Statement of Condition. Refer to Note 3 to the consolidated financial statements for further information on the discontinued operations.

During the quarter and nine months ended September 30, 2014, the Corporation recorded purchases (including repurchases) of mortgage loans amounting to $139 million and $470 million, respectively (September 30, 2013 - $199 million and $1.7 billion, respectively). Also, the Corporation recorded purchases of $92 million in consumer loans during the nine months ended September 30, 2014 (September 30, 2013 - $42 million). In addition, during the nine months ended September 30, 2014, the Corporation recorded purchases of commercial loans amounting $21 million (during the quarter and nine months ended September 30, 2013 - $5 million and $8 million, respectively).

The Corporation sold approximately $56 million and $126 million of residential mortgage loans (on a whole loan basis) during the quarter and nine months ended September 30, 2014, respectively (September 30, 2013 - $60 million and $614 million, respectively). During the third quarter of 2014, BPNA sold approximately $115.7 million and reclassified to held-for-sale approximately $105.0 million in classified and legacy residential mortgage and commercial loans. These sales included $435 million from the bulk sale of non-performing mortgage loans, completed during the quarter ended June 30, 2013. Also, the Corporation securitized approximately $172 million and $522 million of mortgage loans into Government National Mortgage Association (GNMA) mortgage-backed securities during the quarter and nine months ended September 30, 2014, respectively (September 30, 2013 -

$200 million and $767 million, respectively). Furthermore, the Corporation securitized approximately $51 million and $174 million of mortgage loans into Federal National Mortgage Association (FNMA) mortgage-backed securities during the quarter and nine months ended September 30, 2014, respectively (September 30, 2013 - $102 million and $354 million, respectively). The Corporation did not securitize mortgage loans into Federal Home Loan Mortgage Corporation (FHLMC) mortgage-backed securities during the quarter and nine months ended September 30, 2014 (September 30, 2013 - $1 million and $28 million, respectively). The Corporation sold commercial and construction loans with a book value of approximately $96 million and $157 million during the quarter and nine months ended September 30, 2014, respectively (September 30, 2013 - $6 million and $413 million, respectively). These sales for 2013 included $401 million from the bulk sale of non-performing commercial and construction loans during the quarter ended March 31, 2013.

Non-covered loans

The following tables present non-covered loans held-in-portfolio by loan class that are in non-performing status or are accruing interest but are past due 90 days or more at September 30, 2014 and December 31, 2013. Accruing loans past due 90 days or more consist primarily of credit cards, FHA / VA and other insured mortgage loans, and delinquent mortgage loans which are included in the Corporation s financial statements pursuant to GNMA s buy-back option program. Servicers of loans underlying

Table of Contents

GNMA mortgage-backed securities must report as their own assets the defaulted loans that they have the option (but not the obligation) to repurchase, even when they elect not to exercise that option. Also, accruing loans past due 90 days or more include residential conventional loans purchased from another financial institution that, although delinquent, the Corporation has received timely payment from the seller / servicer, and, in some instances, have partial guarantees under recourse agreements. However, residential conventional loans purchased from another financial institution, which are in the process of foreclosure, are classified as non-performing mortgage loans.

[1] For purposes of this table non-performing loans exclude $ 20 million in non-performing loans held-for-sale.

[2] Non-covered loans of $57 million accounted for under ASC Subtopic 310-30 are excluded from the above table as they are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analysis.

[3] It is the Corporation s policy to report delinquent residential mortgage loans insured by FHA or guaranteed by the VA as accruing loans past due 90 days or more as opposed to non-performing since the principal repayment is insured. These balances include $125 million of residential mortgage loans in Puerto Rico insured by FHA or guaranteed by the VA that are no longer accruing interest as of September 30, 2014. Furthermore, the Corporation has approximately $64 million in reverse mortgage loans in Puerto Rico which are guaranteed by FHA, but which are currently not accruing interest. Due to the guaranteed nature of the loans, it is the Corporation s policy to exclude these balances from non-performing assets.

Table of Contents

The outstanding principal balance of non-covered loans accounted pursuant to ASC Subtopic 310-30, net of amounts charged off by the Corporation, amounted to $236 million at September 30, 2014 (December 31, 2013 - $197 million). At September 30, 2014, none of the acquired non-covered loans accounted under ASC Subtopic 310-30 were considered non-performing loans. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans.

Changes in the carrying amount and the accretable yield for the non-covered loans accounted pursuant to the ASC Subtopic 310-30, for the quarters and nine months ended September 30, 2014 and 2013 were as follows:

Activity in the accretable discount - Non-covered loans ASC 310-30

(In thousands)	For the quarter ended September 30, 2014	For the quarter ended September 30, 2013
Beginning balance	$ 76,827	$ 49,213
Additions	3,761	6,732
Accretion	(2,594)	(2,417)
Change in expected cash flows	23,191	(6,247)
Ending balance	$ 101,185	$ 47,281

Activity in the accretable discount - Non-covered loans ASC 310-30

(In thousands)	For the nine months ended September 30, 2014	For the nine months ended September 30, 2013
Beginning balance	$ 49,398	$
Additions	14,904	54,074
Accretion	(7,520)	(5,029)
Change in expected cash flows	44,403	(1,764)
Ending balance	$ 101,185	$ 47,281

[1] Covered loans accounted for under ASC Subtopic 310-30 are excluded from the above table as they are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analyses.

The following tables present loans by past due status at September 30, 2014 and December 31, 2013 for covered loans held-in-portfolio. The information considers covered loans accounted for under ASC Subtopic 310-20 and ASC Subtopic 310-30.

The outstanding principal balance of covered loans accounted pursuant to ASC Subtopic 310-30, net of amounts charged off by the Corporation, amounted to $3.2 billion at September 30, 2014 (December 31, 2013 - $3.8 billion). At September 30, 2014, none of the acquired loans from the Westernbank FDIC-assisted transaction accounted for under ASC Subtopic 310-30 were considered non-performing loans. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans.

Changes in the carrying amount and the accretable yield for the covered loans accounted pursuant to the ASC Subtopic 310-30, for the quarters ended September 30, 2014 and 2013, were as follows:

The Corporation accounts for lines of credit with revolving privileges under the accounting guidance of ASC Subtopic 310-20, which requires that any differences between the contractually required loans payment receivable in excess of the initial investment in the loans be accreted into interest income over the life of the loans, if the loan is accruing interest. Covered loans accounted for under ASC Subtopic 310-20 amounted to $0.1 billion at September 30, 2014 (December 31, 2013 - $0.2 billion).

Table of Contents

Note 10 Allowance for loan losses

The Corporation follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan losses to provide for inherent losses in the loan portfolio. This methodology includes the consideration of factors such as current economic conditions, portfolio risk characteristics, prior loss experience and results of periodic credit reviews of individual loans. The provision for loan losses charged to current operations is based on this methodology. Loan losses are charged and recoveries are credited to the allowance for loan losses.

The Corporation s assessment of the allowance for loan losses is determined in accordance with the guidance of loss contingencies in ASC Subtopic 450-20 and loan impairment guidance in ASC Section 310-10-35. Also, the Corporation determines the allowance for loan losses on purchased impaired loans and purchased loans accounted for under ASC Subtopic 310-30 by analogy, by evaluating decreases in expected cash flows after the acquisition date.

The accounting guidance provides for the recognition of a loss allowance for groups of homogeneous loans. The determination for general reserves of the allowance for loan losses includes the following principal factors:

- Base net loss rates, which are based on the moving average of annualized net loss rates computed over a 3-year historical loss period for the commercial and construction loan portfolios, and an 18-month period for the consumer and mortgage loan portfolios. The base net loss rates are applied by loan type and by legal entity.

- Recent loss trend adjustment, which replaces the base loss rate with a 12-month average loss rate, when these trends are higher than the respective base loss rates. The objective of this adjustment is to allow for a more recent loss trend to be captured and reflected in the ALLL estimation process. As part of the annual review of the components of the ALLL models, as discussed in the following paragraphs and implemented as of June 30, 2014, the Corporation eliminated the use of caps in the recent loss trend adjustment for the consumer and mortgage portfolios, among other enhancements. For the period ended December 31, 2013, the recent loss trend adjustment caps for the consumer and mortgage portfolios were triggered in only one portfolio segment within the Puerto Rico consumer portfolio. Management assessed the impact of the applicable cap through a review of qualitative factors that specifically considered the drivers of recent loss trends and changes to the portfolio composition. The related effect of the aforementioned cap was immaterial for the overall level of the Allowance for Loan and Lease Losses for the Puerto Rico Consumer portfolio.

For the period ended September 30, 2014, 33% (September 30, 2013 - 12%) of the ALLL for BPPR non-covered loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, commercial and industrial, personal and auto loan portfolios for 2014, and in the commercial multi-family, mortgage, and leasing portfolios for 2013.

For the period ended September 30, 2014, 12% (September 30, 2013 - 23%) of the ALLL for BPNA loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, commercial and industrial and legacy loan portfolios for 2014 and in the commercial multi-family, commercial real estate non-owner occupied and commercial and industrial portfolios for 2013.

For the period ended December 31, 2013, 27% (December 31, 2012 - 32%) of the ALLL for BPPR non-covered loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with

the recent loss trend adjustment was mainly concentrated in the commercial multi-family, leasing, and auto loan portfolios for 2013.

For the period ended December 31, 2013, 29% (December 31, 2012 8%) of the ALLL for BPNA loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, commercial real estate non-owner occupied, commercial and industrial and legacy loan portfolios for 2013.

Environmental factors, which include credit and macroeconomic indicators such as unemployment rate, economic activity index and delinquency rates, adopted to account for current market conditions that are likely to cause estimated credit losses to differ from historical losses. The Corporation reflects the effect of these environmental factors on each loan group as an adjustment that, as appropriate, increases the historical loss rate applied to each group. Environmental factors provide updated perspective on credit and economic conditions. Regression analysis is used to select these indicators and quantify the effect on the general reserve of the allowance for loan losses.

Table of Contents

During the second quarter of 2014, management completed the annual review of the components of the ALLL models. As part of this review management updated core metrics and revised certain components related to the estimation process for evaluating the adequacy of the general reserve of the allowance for loan losses. These enhancements to the ALLL methodology, which are described in the paragraphs below, were implemented as of June 30, 2014 and resulted in a net decrease to the allowance for loan losses of $18.7 million for the non-covered portfolio and a net increase to the allowance for loan losses of $0.8 million for the covered portfolio.

Management made the following principal enhancements to the methodology during the second quarter of 2014:

Annual review and recalibration of the environmental factors adjustment. The environmental factor adjustments are developed by performing regression analyses on selected credit and economic indicators for each applicable loan segment. During the second quarter of 2014, the environmental factor models used to account for changes in current credit and macroeconomic conditions were reviewed and recalibrated based on the latest applicable trends. Management also revised the application of environmental factors to the historical loss rates to consider last 12 month trends of the applicable credit and macroeconomic indicators applied as an incremental adjustment to account for emerging risks not necessarily considered in the historical loss rates.

The combined effect of the aforementioned recalibration and enhancements to the environmental factors adjustment resulted in a decrease to the allowance for loan losses of $17 million at June 30, 2014, of which $14.1 million related to the non-covered BPPR segment and $3.7 million related to the BPNA segment, offset in part by a $0.8 million increase in the BPPR covered segment.

Increased the historical look-back period for determining the recent loss trend adjustment for consumer and mortgage loans. The Corporation increased the look-back period for assessing recent trends applicable to the determination of consumer and mortgage loan net charge-offs from 6 months to 12 months and eliminated the use of caps. Previously, the Corporation used a recent loss trend adjustment based on 6 months of net charge-offs up to a determined cap. Given the current overall consumer and mortgage credit quality improvements, management concluded that a 12-month look-back period for the recent loss trend adjustment aligns the Corporation s allowance for loan losses methodology to current credit quality trends while limiting excessive pro-cyclicality given the longer look-back period analysis, thus, eliminating the aforementioned caps.

The combined effect of the aforementioned enhancements to the recent loss trend adjustment resulted in a decrease to the allowance for loan losses of $1 million at June 30, 2014, of which $0.9 million related to the non-covered BPPR segment and $0.1 million related to the BPNA segment.

The following tables present the changes in the allowance for loan losses for the quarters ended September 30, 2014 and 2013.

Modifications

Troubled debt restructurings related to non-covered loan portfolios amounted to $ 1.1 billion at September 30, 2014 (December 31, 2013 - $ 1.0 billion). The amount of outstanding commitments to lend additional funds to debtors owing receivables whose terms have been modified in troubled debt restructurings amounted $8 million related to the commercial loan portfolio and $697 thousand related to the construction loan portfolio at September 30, 2014 (December 31, 2013 - $3 million and $0, respectively).

A modification of a loan constitutes a troubled debt restructuring (TDR) when a borrower is experiencing financial difficulty and the modification constitutes a concession.

Commercial and industrial loans modified in a TDR often involve temporary interest-only payments, term extensions, and converting evergreen revolving credit lines to long-term loans. Commercial real estate (CRE), which includes multifamily, owner-occupied and non-owner occupied CRE, and construction loans modified in a TDR often involve reducing the interest rate for a limited period of time or the remaining term of the loan, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, or reductions in the payment plan. Construction loans modified in a TDR may also involve extending the interest-only payment period.

Residential mortgage loans modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers financial needs for a period of time, normally five years to ten years. After the lowered monthly payment period ends, the borrower reverts back to paying principal and interest per the original terms with the maturity date adjusted accordingly.

Home equity loans modifications are made infrequently and are not offered if the Corporation also holds the first mortgage. Home equity loans modifications are uniquely designed to meet the specific needs of each borrower. Automobile loans modified in a TDR are primarily comprised of loans where the Corporation has lowered monthly payments by extending the term. Credit cards modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers financial needs for a period of time, normally up to 24 months.

As part of its NPL reduction strategy and in order to expedite the resolution of delinquent construction and commercial loans, commencing in 2012, the Corporation routinely enters into liquidation agreements with borrowers and guarantors through the regular legal process, bankruptcy procedures and in certain occasions, out of court transactions. These liquidation agreements, in general, contemplate the following conditions: (1) consent to judgment by the borrowers and guarantors; (2) acknowledgement by the borrower of the debt, its liquidity and maturity; and (3) acknowledgment of the default in payments. The contractual interest rate is not reduced and continues to accrue during the term of the agreement. At the end of the period, the borrower is obligated to remit all amounts due or be subject to the Corporation s exercise of its foreclosure rights and further collection efforts. Likewise, the borrower s failure to make stipulated payments will grant the Corporation the ability to exercise its foreclosure rights. This strategy tends to expedite the foreclosure process, resulting in a more effective and efficient collection process. Although in general, these liquidation agreements do not contemplate the forgiveness of principal or interest as debtor is required to cover all outstanding amounts when the agreement becomes due, it could be construed that the Corporation has granted a concession by temporarily accepting a payment schedule that is different from the contractual payment schedule. Accordingly, loans under these program agreements are considered TDRs.

Loans modified in a TDR that are not accounted pursuant to ASC Subtopic 310-30 are typically already in non-accrual status at the time of the modification and partial charge-offs have in some cases already been taken against the outstanding loan balance. The TDR loan continues in non-accrual status until the borrower has demonstrated a willingness and ability to make the restructured loan payments (generally at least six months of sustained performance after the modification (or one year for loans providing for quarterly or semi-annual payments)) and management has concluded that it is probable that the borrower would not be in payment default in the foreseeable future.

Loans modified in a TDR may have the financial effect to the Corporation of increasing the specific allowance for loan losses associated with the loan. Consumer and residential mortgage loans modified under the Corporation s loss mitigation programs that are determined to be TDRs are individually evaluated for impairment based on an analysis of discounted cash flows.

For consumer and mortgage loans that are modified with regard to payment terms and which constitute TDRs, the discounted cash flow value method is used as the impairment valuation is more appropriately calculated based on the ongoing cash flow from the individuals rather than the liquidation of the asset. The computations give consideration to probability of defaults and loss-given-foreclosure on the related estimated cash flows.

Commercial and construction loans that have been modified as part of loss mitigation efforts are evaluated individually for impairment. The vast majority of the Corporation s modified commercial loans are measured for impairment using the estimated fair value of the collateral, as these are normally considered as collateral dependent loans. The Corporation may also measure commercial loans at their estimated realizable values determined by discounting the expected future cash flows. Construction loans that have been modified are also accounted for as collateral dependent loans. The Corporation determines the fair value measurement dependent upon its exit strategy for the particular asset(s) acquired in foreclosure.

During the quarters ended September 30, 2014 and 2013, three loans with an aggregate unpaid principal balance of $2.1 million and five loan of $14.3 million, respectively, were restructured into multiple notes (Note A / B split). The Corporation recorded $14 thousand charge-offs as part of those loan restructurings during the quarter ended September 30, 2014 (September 30, 2013 - $3.5 million). The restructuring of those loans was made after analyzing the borrowers capacity to repay the debt, collateral and ability to perform under the modified terms. The recorded investment on those commercial TDRs amounted to approximately $2.3 million at September 30, 2014 (September 30, 2013 - $1.9 million) with $111 thousand of allowance for loan losses (September 30, 2013 - $401 thousand).

Table of Contents

The following tables present by class, TDRs that were subject to payment default and that had been modified as a TDR during the twelve months preceding the default date. Payment default is defined as a restructured loan becoming 90 days past due after being modified, foreclosed or charged-off, whichever occurs first. The recorded investment at September 30, 2014 is inclusive of all partial paydowns and charge-offs since the modification date. Loans modified as a TDR that were fully paid down, charged-off or foreclosed upon by period end are not reported.

Commercial, consumer and mortgage loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, the Corporation evaluates the loan for possible further impairment. The allowance for loan losses may be increased or partial charge-offs may be taken to further write-down the carrying value of the loan.

Table of Contents

Credit Quality

The following table presents the outstanding balance, net of unearned income, of non-covered loans held-in-portfolio based on the Corporation s assignment of obligor risk ratings as defined at September 30, 2014 and December 31, 2013.

[1] Excludes covered loans acquired in the Westernbank FDIC-assisted transaction.

Table of Contents

Note 11 FDIC loss share asset and true-up payment obligation

In connection with the Westernbank FDIC-assisted transaction, BPPR entered into loss share agreements with the FDIC with respect to the covered loans and other real estate owned. Pursuant to the terms of the loss share agreements, the FDIC s obligation to reimburse BPPR for losses with respect to covered assets begins with the first dollar of loss incurred. The FDIC reimburses BPPR for 80% of losses with respect to covered assets, and BPPR reimburses the FDIC for 80% of recoveries with respect to losses for which the FDIC paid 80% reimbursement under loss share agreements. The loss share agreement applicable to single-family residential mortgage loans provides for FDIC loss and recoveries sharing for ten years expiring at the end of the quarter ending June 30, 2020. The loss share agreement applicable to commercial (including construction) and consumer loans provides for FDIC loss sharing for five years expiring at the end of the quarter ending June 30, 2015 and BPPR reimbursement to the FDIC for eight years expiring at the end of the quarter ending June 30, 2018, in each case, on the same terms and conditions as described above.

The following table sets forth the activity in the FDIC loss share asset for the periods presented.

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Balance at beginning of period	$ 751,553	$ 1,379,342	$ 948,608	$ 1,399,098
Amortization of loss share indemnification asset	(42,524)	(37,681)	(163,565)	(116,442)
Reversal of accelerated amortization in prior periods	15,046		15,046	
Credit impairment losses to be covered under loss sharing agreements	9,863	13,946	35,325	53,329
Decrease due to reciprocal accounting on amortization of contingent liability on unfunded commitments		(87)		(473)
Reimbursable expenses	15,545	25,641	39,375	45,555
Payments from FDIC under loss sharing agreements	(73,106)	(52,865)	(185,963)	(52,758)
Other adjustments attributable to FDIC loss sharing agreements	4,729	(3,585)	(7,720)	(3,598)
Balance at end of period	$ 681,106	$ 1,324,711	$ 681,106	$ 1,324,711

As discussed in Note 1, the FDIC indemnity asset amortization for the third quarter of 2014 included a benefit of approximately $15.0 million to reverse the impact of accelerated amortization expense recorded in prior periods. This amount will be recognized as expense over the remaining portion of the Loss Sharing Agreement that expires in the quarter ending June 30, 2015.

During the second quarter, the Corporation revised its analysis of expected cash flows which resulted in a net decrease of approximately $102.9 million in estimated credit losses, which was driven mainly by certain commercial loan pools. Though this will have a positive impact on the Corporation s interest accretion in future periods, the carrying value of the indemnification asset was amortized to reflect lower levels of expected losses. This amortization is

recognized over the shorter of the remaining life of the loan pools, which had an average life of approximately six years, or the indemnification asset, which expires at June 30, 2015, for commercial, construction and consumer loans and June 30, 2020 for single-family residential mortgage loans.

The following table presents the weighted average life of the loan portfolios subject to the FDIC loss sharing agreement for the at September 30, 2014 and December 31, 2013.

	Weighted Average Life	
	September 30, 2014	December 31, 2013
Commercial	6.02 years	6.43 years
Consumer	5.70	3.13
Construction	1.11	1.30
Mortgage	7.33	6.91

As part of the loss share agreements, BPPR has agreed to make a true-up payment to the FDIC on the date that is 45 days following the last day (such day, the true-up measurement date) of the final shared-loss month, or upon the final disposition of all covered assets under the loss share agreements, in the event losses on the loss share agreements fail to reach expected levels. The estimated fair value of such true-up payment obligation is recorded as contingent consideration, which is included in the caption of other liabilities in the consolidated statements of financial condition. Under the loss sharing agreements, BPPR will pay to the FDIC 50% of the excess, if any, of: (i) 20% of the intrinsic loss estimate of $4.6 billion (or $925 million) (as determined by the FDIC) less (ii) the sum of: (A) 25% of the asset discount (per bid) (or ($1.1 billion)); plus (B) 25% of the cumulative shared-loss payments (defined as the aggregate of all of the payments made or payable to BPPR minus the aggregate of all of the payments made or payable to the FDIC); plus (C) the sum of the period servicing amounts for every consecutive twelve-month period prior to and ending on the true-up measurement date in respect of each of the loss sharing agreements during which the loss sharing provisions of the applicable loss sharing agreement is in effect (defined as the product of the simple average of the principal amount of shared loss loans and shared loss assets at the beginning and end of such period times 1%).

The following table provides the fair value and the undiscounted amount of the true-up payment obligation at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Carrying amount (fair value)	$ 126,473	$ 127,513
Undiscounted amount	$ 187,636	$ 185,372

The loss share agreements contain specific terms and conditions regarding the management of the covered assets that BPPR must follow in order to receive reimbursement on losses from the FDIC. Under the loss share agreements, BPPR must:

manage and administer the covered assets and collect and effect charge-offs and recoveries with respect to such covered assets in a manner consistent with its usual and prudent business and banking practices and, with respect to single family shared-loss loans, the procedures (including collection procedures) customarily employed by BPPR in servicing and administering mortgage loans for its own account and the servicing procedures established by FNMA or the Federal Home Loan Mortgage Corporation (FHLMC), as in effect from time to time, and in accordance with accepted mortgage servicing practices of prudent lending institutions;

exercise its best judgment in managing, administering and collecting amounts on covered assets and effecting charge-offs with respect to the covered assets;

use commercially reasonable efforts to maximize recoveries with respect to losses on single family shared-loss assets and best efforts to maximize collections with respect to commercial shared-loss assets;

retain sufficient staff to perform the duties under the loss share agreements;

- adopt and implement accounting, reporting, record-keeping and similar systems with respect to the commercial shared-loss assets;

- comply with the terms of the modification guidelines approved by the FDIC or another federal agency for any single-family shared-loss loan;

- provide notice with respect to proposed transactions pursuant to which a third party or affiliate will manage, administer or collect any commercial shared-loss assets;

- file monthly and quarterly certificates with the FDIC specifying the amount of losses, charge-offs and recoveries; and

- maintain books and records sufficient to ensure and document compliance with the terms of the loss share agreements.

Refer to Note 24, Commitment and Contingencies, for additional information on the settlement of the arbitration proceedings with the FDIC regarding the commercial loss share agreement.

Note 12 Mortgage banking activities

Income from mortgage banking activities includes mortgage servicing fees earned in connection with administering residential mortgage loans and valuation adjustments on mortgage servicing rights. It also includes gain on sales and securitizations of residential mortgage loans and trading gains and losses on derivative contracts used to hedge the Corporation s securitization activities. In addition, lower-of-cost-or-market valuation adjustments to residential mortgage loans held for sale, if any, are recorded as part of the mortgage banking activities.

The following table presents the components of mortgage banking activities:

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Mortgage servicing fees, net of fair value adjustments:				
Mortgage servicing fees	$ 11,091	$ 11,543	$ 32,397	$ 34,099
Mortgage servicing rights fair value adjustments	(2,588)	3,879	(18,424)	(6,862)
Total mortgage servicing fees, net of fair value adjustments	8,503	15,422	13,973	27,237
Net gain on sale of loans, including valuation on loans held-for-sale	7,466	3,559	22,831	16,968
Trading account (loss) profit:				
Unrealized gains (losses) on outstanding derivative positions	13	(865)	(725)	(265)
Realized (losses) gains on closed derivative positions	(1,580)	776	(14,211)	13,330

Total mortgage banking activities	$ 14,402	$ 18,892	$ 21,868	$ 57,270

Table of Contents

Note 13 Transfers of financial assets and mortgage servicing assets

The Corporation typically transfers conforming residential mortgage loans in conjunction with GNMA, FNMA and FHLMC securitization transactions whereby the loans are exchanged for cash or securities and servicing rights. The securities issued through these transactions are guaranteed by the corresponding agency and, as such, under seller/service agreements the Corporation is required to service the loans in accordance with the agencies servicing guidelines and standards. Substantially all mortgage loans securitized by the Corporation in GNMA, FNMA and FHLMC securities have fixed rates and represent conforming loans. As seller, the Corporation has made certain representations and warranties with respect to the originally transferred loans and, in the past, has sold certain loans with credit recourse to a government-sponsored entity, namely FNMA. Refer to Note 23 to the consolidated financial statements for a description of such arrangements.

No liabilities were incurred as a result of these securitizations during the quarters and nine months ended September 30, 2014 and 2013 because they did not contain any credit recourse arrangements. During the quarter ended September 30, 2014, the Corporation recorded a net gain $7.4 million (September 30, 2013 - $6.5 million) related to the residential mortgage loans securitized. During the nine months ended September 30, 2014, the Corporation recorded a net gain $24.4 million (September 30, 2013 - $33.0 million) related to the residential mortgage loans securitized.

The following tables present the initial fair value of the assets obtained as proceeds from residential mortgage loans securitized during the quarters and nine months ended September 30, 2014 and 2013:

Total trading account securities	$	$ 1,149,199	$	$ 1,149,199
Mortgage servicing rights			13,846	13,846
Total	$	$ 1,149,199	$ 13,846	$ 1,163,045

During the nine months ended September 30, 2014, the Corporation retained servicing rights on whole loan sales involving approximately $71 million in principal balance outstanding (September 30, 2013 - $116 million), with realized gains of approximately $2.8 million (September 30, 2013 - gains of $4.0 million). All loan sales performed during the nine months ended September 30, 2014 and 2013 were without credit recourse agreements.

The Corporation recognizes as assets the rights to service loans for others, whether these rights are purchased or result from asset transfers such as sales and securitizations. These mortgage servicing rights (MSRs) are measured at fair value.

The Corporation uses a discounted cash flow model to estimate the fair value of MSRs. The discounted cash flow model incorporates assumptions that market participants would use in estimating future net servicing income, including estimates of prepayment speeds, discount rate, cost to service, escrow account earnings, contractual servicing fee income, prepayment and late fees, among other considerations. Prepayment speeds are adjusted for the Corporation s loan characteristics and portfolio behavior.

The following table presents the changes in MSRs measured using the fair value method for the nine months ended September 30, 2014 and 2013.

Residential MSRs

(In thousands)	September 30, 2014	September 30, 2013
Fair value at beginning of period	$ 161,099	$ 154,430
Purchases		45
Servicing from securitizations or asset transfers	9,611	15,062
Changes due to payments on loans[1]	(12,670)	(17,351)
Reduction due to loan repurchases	(2,440)	(2,866)
Changes in fair value due to changes in valuation model inputs or assumptions	(3,314)	13,355
Other disposals	(4)	(1,230)

Fair value at end of period	$	152,282	$	161,445

[1] Represents the change due to collection / realization of expected cash flow over time.
Residential mortgage loans serviced for others were $15.8 billion at September 30, 2014 (December 31, 2013 - $16.3 billion).

Net mortgage servicing fees, a component of mortgage banking activities in the consolidated statements of operations, include the changes from period to period in the fair value of the MSRs, including changes due to collection / realization of expected cash flows. Mortgage servicing fees, excluding fair value adjustments, for the quarter and nine months ended September 30, 2014 amounted to $11.1 million and $32.4 million, respectively (September 30, 2013 - $11.5 million and $34.1 million, respectively). The banking subsidiaries receive servicing fees based on a percentage of the outstanding loan balance. At September 30, 2014, those weighted

average mortgage servicing fees were 0.27% (September 30, 2013 0.27%). Under these servicing agreements, the banking subsidiaries do not generally earn significant prepayment penalty fees on the underlying loans serviced.

The section below includes information on assumptions used in the valuation model of the MSRs, originated and purchased.

Key economic assumptions used in measuring the servicing rights derived from loans securitized or sold by the Corporation during the quarters and nine months ended September 30, 2014 and 2013 were as follows:

	Quarter ended		Nine months ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Prepayment speed	6.1 %	5.6 %	6.2 %	7.0 %
Weighted average life	16.4 years	17.7 years	16.1 years	14.2 years
Discount rate (annual rate)	10.9 %	11.2 %	10.8 %	11.1 %

Key economic assumptions used to estimate the fair value of MSRs derived from sales and securitizations of mortgage loans performed by the banking subsidiaries and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

Originated MSRs		
(In thousands)	September 30, 2014	December 31, 2013
Fair value of servicing rights	$ 112,564	$ 115,753
Weighted average life	13.1 years	12.5 years
Weighted average prepayment speed (annual rate)	7.7 %	8.0 %
Impact on fair value of 10% adverse change	$ (1,458)	$ (3,763)
Impact on fair value of 20% adverse change	$ (5,098)	$ (7,459)
Weighted average discount rate (annual rate)	11.5 %	11.6 %
Impact on fair value of 10% adverse change	$ (2,587)	$ (4,930)
Impact on fair value of 20% adverse change	$ (7,167)	$ (9,595)

The banking subsidiaries also own servicing rights purchased from other financial institutions. The fair value of purchased MSRs, their related valuation assumptions and the sensitivity to immediate changes in those assumptions were as follows as of the end of the periods reported:

Purchased MSRs		
(In thousands)	September 30, 2014	December 31, 2013
Fair value of servicing rights	$ 39,718	$ 45,346
Weighted average life	11.9 years	10.9 years
Weighted average prepayment speed (annual rate)	8.4 %	9.2 %
Impact on fair value of 10% adverse change	$ (882)	$ (1,969)
Impact on fair value of 20% adverse change	$ (2,174)	$ (3,478)

Weighted average discount rate (annual rate)		10.7 %		10.8 %
Impact on fair value of 10% adverse change	$	(1,019)	$	(2,073)
Impact on fair value of 20% adverse change	$	(2,417)	$	(3,655)

The sensitivity analyses presented in the tables above for servicing rights are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10 and 20 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in the sensitivity tables included herein, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Table of Contents

At September 30, 2014, the Corporation serviced $2.2 billion (December 31, 2013 - $2.5 billion) in residential mortgage loans with credit recourse to the Corporation.

Under the GNMA securitizations, the Corporation, as servicer, has the right to repurchase (but not the obligation), at its option and without GNMA s prior authorization, any loan that is collateral for a GNMA guaranteed mortgage-backed security when certain delinquency criteria are met. At the time that individual loans meet GNMA s specified delinquency criteria and are eligible for repurchase, the Corporation is deemed to have regained effective control over these loans if the Corporation was the pool issuer. At September 30, 2014, the Corporation had recorded $48 million in mortgage loans on its consolidated statements of financial condition related to this buy-back option program (December 31, 2013 - $48 million). As long as the Corporation continues to service the loans that continue to be collateral in a GNMA guaranteed mortgage-backed security, the MSR is recognized by the Corporation. During the nine months ended September 30, 2014, the Corporation repurchased approximately $ 141 million (year ended December 31, 2013 - $209 million) of mortgage loans under the GNMA buy-back option program. The determination to repurchase these loans was based on the economic benefits of the transaction, which results in a reduction of the servicing costs for these severely delinquent loans, mostly related to principal and interest advances. Furthermore, due to their guaranteed nature, the risk associated with the loans is minimal. The Corporation places these loans under its loss mitigation programs and once brought back to current status, these may be either retained in portfolio or re-sold in the secondary market.

Note 15 - Other assets

The caption of other assets in the consolidated statements of financial condition consists of the following major categories:

(In thousands)	September 30, 2014	December 31, 2013
Net deferred tax assets (net of valuation allowance)	$ 758,347	$ 761,768
Investments under the equity method	221,130	197,006
Bank-owned life insurance program		228,805
Prepaid FDIC insurance assessment		383
Prepaid taxes	207,999	91,504
Other prepaid expenses	97,122	67,108
Derivative assets	25,850	34,710
Trades receivable from brokers and counterparties	77,618	71,680
Others	246,753	234,594
Total other assets	$ 1,634,819	$ 1,687,558

Other assets from discontinued operations are presented as part of Assets from Discontinued Operations in the Consolidated Statement of Condition. Refer to Note 3 to the consolidated financial statements for further information on the discontinued operations.

On February 1, 2014, Centro Financiero BHD (BHD), the Corporation s equity method investee based in the Dominican Republic, completed a merger transaction in which it acquired the net assets of Centro Financiero León. Centro Financiero León was the holding company of Banco León, the fourth largest bank in terms of assets in the Dominican Republic. In connection with the transaction, BHD issued additional shares which diluted the Corporation s equity participation from 19.99% to 15.79%. As a result of this transaction, the Corporation recognized a net gain of $14.2 million during the first quarter of 2014, due to BHD s increase in net assets. The gain was partially offset by approximately $7.7 million resulting from the reclassification from other comprehensive income into earnings of the cumulative foreign currency translation adjustment due to the reduction in the Corporation s ownership percentage. As of September 30, 2014, the Corporation had a 15.82% equity participation and continues to have significant influence over BHD. Accordingly, the investment in BHD is accounted for under the equity method and is evaluated for impairment if events or circumstances indicate that a decrease in value of the investment has occurred that is other than temporary.

During the quarter ended on September 30, 2014 BPNA surrendered its bank owned life insurance contracts, which had a balance of $231.2 million. BPNA received approximately $231.4 million in satisfaction of its surrender request. The transaction resulted in a gain of $0.1 million.

Prepaid taxes at September 30, 2014 include payments of $45 million in income taxes in connection with the Closing Agreement signed with the Puerto Rico Department of Treasury on June 30, 2014, and $ 31.8 million of unamortized corporate personal property tax and municipal tax paid during the second quarter of 2014.

Note 16 Goodwill and other intangible assets

Goodwill

The changes in the carrying amount of goodwill for the nine months ended September 30, 2014 and 2013, allocated by reportable segments, were as follows (refer to Note 36 for the definition of the Corporation s reportable segments):

2014						
(In thousands)	Balance at January 1, 2014	Goodwill on acquisition	Purchase accounting adjustments	Goodwill written off related to discontinued operations	Other	Balance at September 30, 2014
Banco Popular de Puerto Rico	$ 245,679	$	$	$	$	$ 245,679
Banco Popular North America	402,078			(186,511)		215,567
Total Popular, Inc.	$ 647,757	$	$	$ (186,511)	$	$ 461,246

2013					
(In thousands)	Balance at January 1, 2013	Goodwill on acquisition	Purchase accounting adjustments	Other	Balance at September 30, 2013
Banco Popular de Puerto Rico	$ 245,679	$	$	$	$ 245,679
Banco Popular North America	402,078				402,078
Total Popular, Inc.	$ 647,757	$	$	$	$ 647,757

Goodwill Impairment Test

As discussed in Note 3, Discontinued Operations, on April 22, 2014, BPNA entered into definitive agreements to sell its regional operations in California, Illinois and Central Florida to three different buyers. In connection with the transactions, the Corporation is centralizing certain back office operations in Puerto Rico and New York. During the second quarter of 2014, the assets and liabilities for those regions were reclassified as held-for-sale in accordance with ASC 360-10-45. As a result of the reclassification, and in accordance with ASC 350-20-40, BPNA allocated a proportionate share of the goodwill balance to the discontinued businesses on a relative fair value basis and performed an impairment test for the goodwill allocated to each of the discontinued operations as well as for retained business, each as a separate reporting unit. This allocation of goodwill and related impairment analysis resulted in an impairment charge of $186.5 million during the second quarter of 2014. The goodwill impairment charge is a non-cash charge that did not have an impact on the Corporation s tangible capital or regulatory capital ratios. The goodwill impairment analysis of the retained portion of the BPNA operations resulted in no impairment as of June 30, 2014.

The methodology used to determine the relative value of the regions sold and the retained portion of the BPNA reporting unit for purpose of the goodwill allocation among these reporting units takes into consideration the fair value estimates resulting from a combination of: (1) the average price to tangible book multiple based on a regression analysis of the projected return on equity for comparable companies, (2) the average price to revenue multiple based on a regression analysis of the projected revenue margin for comparable companies, and (3) the average price to earnings multiple based on comparable companies. After allocating the carrying amount of goodwill to the regions sold and the retained portion, the Corporation performed the goodwill impairment test of ASC 350-20 to each region sold and to the retained business reporting unit. The fair value of each region was based on the transaction price agreed with the buyers as part of the step 2 of the goodwill impairment analysis. This fair value was compared to the fair value of the assets and liabilities sold including any unrecognized intangible asset. The goodwill impairment analysis of the regions sold indicated that all the goodwill allocated to each region sold was impaired, and accordingly, the Corporation recorded an impairment charge of $186.5 million during the second quarter of 2014.

The following table presents the gross amount of goodwill and accumulated impairment losses by reportable segments.

	September 30, 2014					
(In thousands)	Balance at January 1, 2014 (gross amounts)	Accumulated impairment losses	Balance at January 1, 2014 (net amounts)	Balance at September 30, 2014 (gross amounts)	Accumulated impairment losses	Balance at September 30, 2014 (net amounts)
Banco Popular de Puerto Rico	$ 245,679	$	$ 245,679	$ 245,679	$	$ 245,679
Banco Popular North America	566,489	164,411	402,078	379,978	164,411	215,567
Total Popular, Inc.	$ 812,168	$ 164,411	$ 647,757	$ 625,657	$ 164,411	$ 461,246

	December 31, 2013

Banco Popular de Puerto Rico	$ 245,679	$	$ 245,679	$ 245,679	$	$ 245,679
Banco Popular North America	566,489	164,411	402,078	566,489	164,411	402,078
Total Popular, Inc.	$ 812,168	$ 164,411	$ 647,757	$ 812,168	$ 164,411	$ 647,757

Other Intangible Assets

At September 30, 2014 and December 31, 2013, the Corporation had $ 6 million of identifiable intangible assets, with indefinite useful lives, mostly associated with E-LOAN s trademark.

The following table reflects the components of other intangible assets subject to amortization:

(In thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
September 30, 2014			
Core deposits	$ 77,885	$ 57,662	$ 20,223
Other customer relationships	17,552	6,114	11,438
Other intangibles	135	132	3
Total other intangible assets	$ 95,572	$ 63,908	$ 31,664

December 31, 2013			
Core deposits	$ 77,885	$ 51,737	$ 26,148
Other customer relationships	17,555	4,712	12,843
Other intangibles	135	107	28
Total other intangible assets	$ 95,575	$ 56,556	$ 39,019

During the quarter ended September 30, 2014, the Corporation recognized $ 2.0 million in amortization expense related to other intangible assets with definite useful lives (September 30, 2013 - $ 2.0 million). During the nine months ended September 30, 2014, the Corporation recognized $ 6.1 million in amortization related to other intangible assets with definite useful lives (September 30, 2013 - $ 6.0 million).

Table of Contents

The following table presents the estimated amortization of the intangible assets with definite useful lives for each of the following periods:

(In thousands)	
Remaining 2014	$ 2,019
Year 2015	7,227
Year 2016	6,942
Year 2017	4,194
Year 2018	4,101
Year 2019	3,969

Results of the Annual Goodwill Impairment Test

The Corporation s goodwill and other identifiable intangible assets having an indefinite useful life are tested for impairment. Intangibles with indefinite lives are evaluated for impairment at least annually and on a more frequent basis if events or circumstances indicate impairment could have taken place. Such events could include, among others, a significant adverse change in the business climate, an adverse action by a regulator, an unanticipated change in the competitive environment and a decision to change the operations or dispose of a reporting unit.

Under applicable accounting standards, goodwill impairment analysis is a two-step test. The first step of the goodwill impairment test involves comparing the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step must be performed. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated possible impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles (including any unrecognized intangible assets, such as unrecognized core deposits and trademark) as if the reporting unit was being acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The Corporation estimates the fair values of the assets and liabilities of a reporting unit, consistent with the requirements of the fair value measurements accounting standard, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of the assets and liabilities reflects market conditions, thus volatility in prices could have a material impact on the determination of the implied fair value of the reporting unit goodwill at the impairment test date. The adjustments to measure the assets, liabilities and intangibles at fair value are for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the consolidated statement of condition. If the implied fair value of goodwill exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted under applicable accounting standards.

The Corporation performed the annual goodwill impairment evaluation for the entire organization during the third quarter of 2014 using July 31, 2014 as the annual evaluation date. The reporting units utilized for this evaluation were those that are one level below the business segments, which are the legal entities within the reportable segment. The Corporation follows push-down accounting, as such all goodwill is assigned to the reporting units when carrying out a business combination.

In determining the fair value of a reporting unit, the Corporation generally uses a combination of methods, including market price multiples of comparable companies and transactions, as well as discounted cash flow analysis. Management evaluates the particular circumstances of each reporting unit in order to determine the most appropriate valuation methodology. The Corporation evaluates the results obtained under each valuation methodology to identify and understand the key value drivers in order to ascertain that the results obtained are reasonable and appropriate under the circumstances. Elements considered include current market and economic conditions, developments in specific lines of business, and any particular features in the individual reporting units.

The computations require management to make estimates and assumptions. Critical assumptions that are used as part of these evaluations include:

- a selection of comparable publicly traded companies, based on nature of business, location and size;
- a selection of comparable acquisition and capital raising transactions;
- the discount rate applied to future earnings, based on an estimate of the cost of equity;
- the potential future earnings of the reporting unit; and
- the market growth and new business assumptions.

For purposes of the market comparable approach, valuations were determined by calculating average price multiples of relevant value drivers from a group of companies that are comparable to the reporting unit being analyzed and applying those price multiples to the value drivers of the reporting unit. Multiples used are minority based multiples and thus, no control premium adjustment is made to the comparable companies market multiples. While the market price multiple is not an assumption, a presumption that it provides an indicator of the value of the reporting unit is inherent in the valuation. The determination of the market comparables also involves a degree of judgment.

For purposes of the discounted cash flows (DCF) approach, the valuation is based on estimated future cash flows. The financial projections used in the DCF valuation analysis for each reporting unit are based on the most recent (as of the valuation date) financial projections presented to the Corporation s Asset / Liability Management Committee (ALCO). The growth assumptions included in these projections are based on management s expectations for each reporting unit s financial prospects considering economic and industry conditions as well as particular plans of each entity (i.e. restructuring plans, de-leveraging, etc.). The cost of equity used to discount the cash flows was calculated using the Ibbotson Build-Up Method and ranged from 12.15% to 16.83% for the 2014 analysis. The Ibbotson Build-Up Method builds up a cost of equity starting with the rate of return of a risk-free asset (20-year U.S. Treasury note) and adds to it additional risk elements such as equity risk premium, size premium and industry risk premium. The resulting discount rates were analyzed in terms of reasonability given the current market conditions and adjustments were made when necessary.

For BPNA reporting unit, the average estimated fair value calculated in Step 1 using all valuation methodologies exceeded BPNA s equity value by approximately $205 million in the July 31, 2014 annual test while it failed Step 1 in the annual test as of July 31, 2013. Accordingly, there is no indication of impairment on the goodwill recorded in BPNA at July 31, 2014 and there is no need for a Step 2 analysis.

For the BPPR reporting unit, the average estimated fair value calculated in Step 1 using all valuation methodologies exceeded BPPR s equity value by approximately $337 million in the July 31, 2014 annual test as compared with approximately $387 million at July 31, 2013. This result indicates there is no indication of impairment on the goodwill recorded in BPPR at July 31, 2014. The goodwill balance of BPPR and BPNA, as legal entities, represented approximately 96% of the Corporation s total goodwill balance as of the July 31, 2014 valuation date.

Furthermore, as part of the analyses, management performed a reconciliation of the aggregate fair values determined for the reporting units to the market capitalization of Popular, Inc. concluding that the fair value results determined for the reporting units in the July 31, 2014 annual assessment were reasonable.

The goodwill impairment evaluation process requires the Corporation to make estimates and assumptions with regard to the fair value of the reporting units. Actual values may differ significantly from these estimates. Such differences could result in future impairment of goodwill that would, in turn, negatively impact the Corporation s results of operations and the reporting units where the goodwill is recorded. Declines in the Corporation s market capitalization could increase the risk of goodwill impairment in the future.

Management monitors events or changes in circumstances between annual tests to determine if these events or changes in circumstances would more likely than not reduce the fair value of a reporting unit below its carrying amount.

Table of Contents

Note 17 Deposits

Total interest bearing deposits as of the end of the periods presented consisted of:

(In thousands)	September 30, 2014	December 31, 2013
Savings accounts	$ 7,581,128	$ 6,839,126
NOW, money market and other interest bearing demand deposits	3,861,851	5,637,985
Total savings, NOW, money market and other interest bearing demand deposits	11,442,979	12,477,111
Certificates of deposit:		
Under $100,000	4,554,497	5,101,711
$100,000 and over	2,947,214	3,209,641
Total certificates of deposit	7,501,711	8,311,352
Total interest bearing deposits	$ 18,944,690	$ 20,788,463

Deposits from discontinued operations are presented as part of Liabilities from Discontinued Operations in the Consolidated Statement of Condition. Refer to Note 3 to the consolidated financial statements for further information on the discontinued operations.

A summary of certificates of deposit by maturity at September 30, 2014 follows:

(In thousands)	
2014	$ 2,368,970
2015	2,828,915
2016	885,563
2017	566,100
2018	379,855
2019 and thereafter	472,308
Total certificates of deposit	$ 7,501,711

At September 30, 2014, the Corporation had brokered deposits amounting to $ 2.3 billion (December 31, 2013 - $ 2.4 billion).

The aggregate amount of overdrafts in demand deposit accounts that were reclassified to loans was $11 million at September 30, 2014 (December 31, 2013 - $10 million).

Table of Contents

Note 18 Borrowings

The following table presents the composition of assets sold under agreements to repurchase at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Assets sold under agreements to repurchase	$ 1,650,712	$ 1,659,292

The repurchase agreements outstanding at September 30, 2014 were collateralized by $ 1.5 billion (December 31, 2013 - $ 1.3 billion) in investment securities available-for-sale, $ 122 million (December 31, 2013 - $ 309 million) in trading securities and $ 18 million (December 31, 2013 - $ 70 million) in securities sold not yet delivered in other assets. It is the Corporation s policy to maintain effective control over assets sold under agreements to repurchase; accordingly, such securities continue to be carried on the consolidated statements of financial condition.

In addition, there were repurchase agreements outstanding collateralized by $ 142 million in securities purchased under agreements to resell to which the Corporation has the right to repledge the securities (December 31, 2013 - $ 189 million). It is the Corporation s policy to take possession of securities purchased under agreements to resell. However, the counterparties to such agreements maintain effective control over such securities; accordingly, these securities are not reflected in the Corporation s consolidated statements of financial condition.

During the third quarter of 2014, the Corporation refinanced approximately $638 million in long term structured repos in the U.S. with a yield of 4.41% and replaced them with lower cost short term repos of a similar amount. The fees associated with the refinancing of these repos were $39.7 million, of which $20.7 million were recorded as interest expense during the third quarter of 2014, with remainder to be recorded during the fourth quarter of 2014.

The following table presents the composition of other short-term borrowings at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Advances with the FHLB paying interest at maturity	$	$ 400,000
Others	1,200	1,200
Total other short-term borrowings	$ 1,200	$ 401,200

Note: Refer to the Corporation s 2013 Annual Report for rates information at December 31, 2013.

Table of Contents

The following table presents the composition of notes payable at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Advances with the FHLB with maturities ranging from 2014 through 2021 paying interest at monthly fixed rates ranging from 0.27% to 4.19 %	$ 810,202	$ 589,229
Unsecured senior debt securities maturing on 2019 paying interest semiannually at a fixed rate of 7.00%	450,000	
Term notes maturing on 2014 paying interest semiannually at a fixed rate of 7.47%	675	675
Term notes maturing on 2014 paying interest monthly at a floating rate of 3.00% over the 10-year U.S. Treasury note rate	4	14
Junior subordinated deferrable interest debentures (related to trust preferred securities) with maturities ranging from 2027 to 2034 with fixed interest rates ranging from 6.125% to 8.327% (Refer to Note 20)	439,800	439,800
Junior subordinated deferrable interest debentures (related to trust preferred securities) ($936,000 less discount of $404,460 at December 31, 2013), with no stated maturity and a fixed interest rate of 5.00% until, but excluding December 5, 2013 and 9.00% thereafter (Refer to Note 20)[2]		531,540
Others	22,892	23,496
Total notes payable	$ 1,723,573	$ 1,584,754

Note: Refer to the Corporation s 2013 Annual Report for rates information at December 31, 2013.

[1] The 10-year U.S. Treasury note key index rate at September 30, 2014 and December 31, 2013 was 2.49% and 3.03%, respectively.

[2] The debentures are perpetual and may be redeemed by the Corporation at any time, subject to the consent of the Board of Governors of the Federal Reserve System. The discount on the debentures was being amortized over an estimated 30-year term that started in August 2009. During the quarter ended June 30, 2014, in connection with the repayment of these Notes completed on July 2, 2014, the Corporation accelerated the related amortization of the discount and deferred costs amounting to $414.1 million, which is reflected as interest expense in the consolidated statement of operations. The effective interest rate, including the discount accretion, was approximately 16% at December 31, 2013.

During the quarter ended June 30, 2014, the Corporation received approval from the Federal Reserve System to repay the $935 million in TARP Capital Purchase Program funds. On July 2, 2014, the Corporation completed the repayment of these funds, which were partially funded with $400 million from the proceeds of the issuance of its $450 million aggregate principal amount of 7% Senior Notes due on 2019, which settled on July 1, 2014. Accordingly,

during the quarter ended June 30, 2014, the Corporation accelerated the related amortization of $414.1 million of discount and deferred costs, which is reflected as interest expense in the consolidated statement of operations. Refer to additional information on Note 20, Trust Preferred Securities.

A breakdown of borrowings by contractual maturities at September 30, 2014 is included in the table below.

(In thousands)	Assets sold under agreements to repurchase	Short-term borrowings	Notes payable	Total
Year				
2014	$ 1,085,807	$ 1,200	$ 16,701	$ 1,103,708
2015	460,898		329,040	789,938
2016	104,007		247,105	351,112
2017			79,033	79,033
2018			107,203	107,203
Later years			944,491	944,491
Total borrowings	$ 1,650,712	$ 1,200	$ 1,723,573	$ 3,375,485

The Corporation s derivatives are subject to agreements which allow a right of set-off with each respective counterparty. In addition, the Corporation s Repurchase Agreements and Reverse Repurchase Agreements have a right of set-off with the respective counterparty under the supplemental terms of the Master Repurchase Agreements. In an event of default each party has a right of set-off against the other party for amounts owed in the related agreement and any other amount or obligation owed in respect of any other agreement or transaction between them.

Table of Contents

Note 20 Trust preferred securities

At September 30, 2014 and December 31, 2013, statutory trusts established by the Corporation (BanPonce Trust I, Popular Capital Trust I, Popular North America Capital Trust I and Popular Capital Trust II) had issued trust preferred securities (also referred to as capital securities) to the public. The proceeds from such issuances, together with the proceeds of the related issuances of common securities of the trusts (the common securities), were used by the trusts to purchase junior subordinated deferrable interest debentures (the junior subordinated debentures) issued by the Corporation. In August 2009, the Corporation established the Popular Capital Trust III for the purpose of exchanging the shares of Series C preferred stock held by the U.S. Treasury at the time for trust preferred securities issued by this trust. In connection with this exchange, the trust used the Series C preferred stock, together with the proceeds of issuance and sale of common securities of the trust, to purchase junior subordinated debentures issued by the Corporation. As further explained below, the Popular Capital Trust III was dissolved following the repurchase of their capital securities on July 2, 2014.

The sole assets of the trusts consisted of the junior subordinated debentures of the Corporation and the related accrued interest receivable. These trusts are not consolidated by the Corporation pursuant to accounting principles generally accepted in the United States of America.

The junior subordinated debentures are included by the Corporation as notes payable in the consolidated statements of financial condition, while the common securities issued by the issuer trusts are included as other investment securities. The common securities of each trust are wholly-owned, or indirectly wholly-owned, by the Corporation.

The following table presents financial data pertaining to the different trusts at September 30, 2014 and December 31, 2013.

(Dollars in thousands)	As of September 30, 2014

[3] The obligations of PNA under the junior subordinated debentures and its guarantees of the capital securities under the trust are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.
[4] These capital securities are fully and unconditionally guaranteed on a subordinated basis by the Corporation to the extent set forth in the applicable guarantee agreement.
[5] The Corporation has the right, subject to any required prior approval from the Federal Reserve, to redeem after certain dates or upon the occurrence of certain events mentioned below, the junior subordinated debentures at a redemption price equal to 100% of the principal amount, plus accrued and unpaid interest to the date of redemption. The maturity of the junior subordinated debentures may be shortened at the option of the Corporation prior to their stated maturity dates (i) on or after the stated optional redemption dates stipulated in the agreements, in whole at any time or in part from time to time, or (ii) in whole, but not in part, at any time within 90 days following the occurrence and during the continuation of a tax event, an investment company event or a capital treatment event as set forth in the indentures relating to the capital securities, in each case subject to regulatory approval.
[6] Same as [5] above, except that the investment company event does not apply for early redemption.
[7] The debentures are perpetual and may be redeemed by Popular at any time, subject to the consent of the Board of Governors of the Federal Reserve System.
[8] Carrying value of junior subordinated debentures of $ 532 million at December 31, 2013 ($ 936 million aggregate liquidation amount, net of $ 404 million discount).

During the quarter ended June 30, 2014, the Corporation received approval from the Federal Reserve System to repay the $935 million in TARP Capital Purchase Program funds. On July 2, 2014, the Corporation completed the repurchase of $935 million of Fixed Rate Popular Capital Trust III Capital Securities, $1,000 liquidation amount per security (the trust capital securities), of Popular Capital Trust III, held by the U.S. Treasury. On July 23, 2014, the Corporation exchanged $936 million of Fixed Rate Perpetual Junior Subordinated Debentures Series A (the trust debentures) held by Popular Capital Trust III for the trust capital securities and the common securities of Popular Capital Trust III, in the amount of $1 million, held by the Corporation. The trust debentures were then cancelled and the obligations of the Corporation under the related indenture were satisfied and discharged. On the same date, Popular Capital Trust III was dissolved. In connection with the repayment of TARP, the Corporation accelerated the related amortization of the discount and deferred costs amounting to $414.1 million during the second quarter of 2014, which was reflected as part of interest expense in the consolidated statement of operations.

In accordance with the Federal Reserve Board guidance under Basel I, the trust preferred securities represent restricted core capital elements and currently qualify as Tier 1 capital, subject to certain quantitative limits. The aggregate amount of restricted core capital elements that may be included in the Tier 1 capital of a banking organization must not exceed 25% of the sum of all core capital elements (including cumulative perpetual preferred stock and trust preferred securities). Amounts of restricted core capital elements in excess of this limit generally may be included in Tier 2 capital, subject to further limitations. At September 30, 2014, the Corporation s restricted core capital elements did not exceed the 25% limitation. Thus, all trust preferred securities were allowed as Tier I capital. At December 31, 2013, the Corporation s restricted core capital elements also did not exceed the 25% limitation.

In July 2013, the Board of Governors of the Federal Reserve System approved final rules (New Capital Rules) to establish a new comprehensive regulatory capital framework for all U.S. banking organizations. The New Capital Rules generally implement the Basel Committee on Banking Supervision s (the Basel Committee) December 2010 final capital framework referred to as Basel III for strengthening international capital standards and several changes to the U.S. regulatory capital regime required by the Dodd-Frank Wall Street Reform and Consumer Protection on Act (Dodd-Frank). The New Capital Rules require that capital instruments such as trust preferred securities be phased-out of Tier 1 capital. The Corporation s Tier I capital level at September 30, 2014 included $ 427 million of trust preferred securities that are subject to the phase-out provisions of the New Capital Rules. The Corporation would be allowed to

include only 25% of such trust preferred securities in Tier I capital as of January 1, 2015 and 0% as of January 1, 2016 and thereafter. The New Capital Rules also permanently grandfathers as Tier 2 capital such trust preferred securities.

Note 21 Stockholders equity

On July 2, 2014, the Corporation completed the repayment of the TARP funds to the U.S. Treasury. Also, on July 23, 2014, the Corporation completed the repurchase of the outstanding warrant initially issued to the U.S. Treasury under the TARP Capital Purchase Program in 2008 for a repurchase price of $3 million. The warrant represented the right to purchase 2,093,284 shares of the Corporation s common stock at an exercise price of $67 per share with an original term of 10 years. The purchase price of $3.0 million was reduced from surplus in stockholders equity on July 2014.

BPPR statutory reserve

The Banking Act of the Commonwealth of Puerto Rico requires that a minimum of 10% of BPPR s net income for the year be transferred to a statutory reserve account until such statutory reserve equals the total of paid-in capital on common and preferred stock. Any losses incurred by a bank must first be charged to retained earnings and then to the reserve fund. Amounts credited to the reserve fund may not be used to pay dividends without the prior consent of the Puerto Rico Commissioner of Financial Institutions. The failure to maintain sufficient statutory reserves would preclude BPPR from paying dividends. BPPR s statutory reserve fund amounted to $445 million at September 30, 2014 (December 31, 2013 - $445 million). There were no transfers between the statutory reserve account and the retained earnings account during the quarters and nine months ended September 30, 2014 and September 30, 2013.

Table of Contents

Note 23 Guarantees

At September 30, 2014 the Corporation recorded a liability of $0.4 million (December 31, 2013 - $0.4 million), which represents the unamortized balance of the obligations undertaken in issuing the guarantees under the standby letters of credit. Management does not anticipate any material losses related to these instruments.

From time to time, the Corporation securitized mortgage loans into guaranteed mortgage-backed securities subject to limited, and in certain instances, lifetime credit recourse on the loans that serve as collateral for the mortgage-backed securities. The Corporation has not sold any mortgage loans subject to credit recourse since 2009. At September 30, 2014 the Corporation serviced $ 2.2 billion (December 31, 2013 - $ 2.5 billion) in residential mortgage loans subject to credit recourse provisions, principally loans associated with FNMA and FHLMC residential mortgage loan securitization programs. In the event of any customer default, pursuant to the credit recourse provided, the Corporation is required to repurchase the loan or reimburse the third party investor for the incurred loss. The maximum potential amount of future payments that the Corporation would be required to make under the recourse arrangements in the event of nonperformance by the borrowers is equivalent to the total outstanding balance of the residential mortgage loans serviced with recourse and interest, if applicable. During the quarter and nine months ended September 30, 2014, the Corporation repurchased approximately $ 21 million and $ 69 million, respectively, of unpaid principal balance in mortgage loans subject to the credit recourse provisions (September 30, 2013 **-** $ 29 million and $ 95 million, respectively). In the event of nonperformance by the borrower, the Corporation has rights to the underlying collateral securing the mortgage loan. The Corporation suffers ultimate losses on these loans when the proceeds from a foreclosure sale of the property underlying a defaulted mortgage loan are less than the outstanding principal balance of the loan plus any uncollected interest advanced and the costs of holding and disposing the related property. At September 30, 2014 the Corporation s liability established to cover the estimated credit loss exposure related to loans sold or serviced with credit recourse amounted to $ 51 million (December 31, 2013 - $ 41 million).

The following table shows the changes in the Corporation s liability of estimated losses related to loans serviced with credit recourse provisions during the quarters and nine month periods ended September 30, 2014 and 2013.

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Balance as of beginning of period	$ 47,892	$ 45,892	$ 41,463	$ 51,673
Provision for recourse liability	9,189	5,180	28,215	15,965
Net charge-offs / terminations	(5,885)	(7,243)	(18,482)	(23,809)
Balance as of end of period	$ 51,196	$ 43,829	$ 51,196	$ 43,829

The estimated losses to be absorbed under the credit recourse arrangements are recorded as a liability when the loans are sold or credit recourse is assumed as part of acquired servicing rights, and are updated by accruing or reversing expense (categorized in the line item adjustments (expense) to indemnity reserves on loans sold in the consolidated statements of operations) throughout the life of the loan, as necessary, when additional relevant information becomes available. The methodology used to estimate the recourse liability is a function of the recourse arrangements given and considers a variety of factors, which include actual defaults and historical loss experience, foreclosure rate, estimated future defaults and the probability that a loan would be delinquent. Statistical methods are used to estimate the recourse liability. Expected loss rates are applied to different loan segmentations. The expected loss, which represents the amount expected to be lost on a given loan, considers the probability of default and loss severity. The

probability of default represents the probability that a loan in good standing would become 90 days delinquent within the following twelve-month period. Regression analysis quantifies the relationship between the default event and loan-specific characteristics, including credit scores, loan-to-value ratios, and loan aging, among others.

When the Corporation sells or securitizes mortgage loans, it generally makes customary representations and warranties regarding the characteristics of the loans sold. The Corporation s mortgage operations in Puerto Rico group conforming mortgage loans into pools which are exchanged for FNMA and GNMA mortgage-backed securities, which are generally sold to private investors, or are sold directly to FNMA or other private investors for cash. As required under the government agency programs, quality review procedures are performed by the Corporation to ensure that asset guideline qualifications are met. To the extent the loans do not meet specified characteristics, the Corporation may be required to repurchase such loans or indemnify for losses and bear any subsequent loss related to the loans. Repurchases under BPPR s representation and warranty arrangements for the nine months

Table of Contents

ended September 30, 2014 approximated $ 2.2 million, in unpaid principal balance, with losses amounting to $ 1.6 million, and $ 4.0 million and $ 0.8 million, respectively, for the same period of 2013. A substantial amount of these loans reinstate to performing status or have mortgage insurance, and thus the ultimate losses on the loans are not deemed significant.

During the quarter ended June 30, 2013, the Corporation established a reserve for certain specific representation and warranties made in connection with BPPR s sale of non-performing mortgage loans. The purchaser s sole remedy under the indemnity clause is to seek monetary damages from BPPR, for a maximum of $16.3 million. BPPR recognized a reserve of approximately $3.0 million, representing its best estimate of the loss that would be incurred in connection with this indemnification. BPPR s obligations under this clause end one year after the closing except to any claim asserted prior to such termination date. The reserve balance has been maintained to cover claims received from the purchaser, which are currently being evaluated.

During the quarter ended March 31, 2013, the Corporation established a reserve for certain specific representations and warranties made in connection with BPPR s sale of commercial and construction loans, and commercial and single family real estate owned. The purchaser s sole remedy under the indemnity clause is to seek monetary damages from BPPR, for a maximum of $18.0 million. BPPR is not required to repurchase any of the assets. BPPR recognized a reserve of approximately $10.7 million, representing its best estimate of the loss that would be incurred in connection with this indemnification. During the quarter ended March 31, 2014, the Corporation released $2.0 million based on an evaluation of claims received under this clause.

The following table presents the changes in the Corporation s liability for estimated losses associated with indemnifications and representations and warranties related to loans sold by BPPR for the quarters and nine months ended September 30, 2014 and 2013.

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Balance as of beginning of period	$ 15,919	$ 20,959	$ 19,277	$ 7,587
Additions for new sales				13,747
Provision (reversal) for representation and warranties	230	(1,100)	(1,235)	(975)
Net charge-offs / terminations	(7)	(945)	(1,900)	(1,445)
Balance as of end of period	$ 16,142	$ 18,914	$ 16,142	$ 18,914

In addition, at September 30, 2014, the Corporation has reserves for customary representations and warranties related to loans sold by its U.S. subsidiary E-LOAN prior to 2009. These loans were sold to investors on a servicing released basis subject to certain representation and warranties. Although the risk of loss or default was generally assumed by the investors, the Corporation made certain representations relating to borrower creditworthiness, loan documentation and collateral, which if not correct, may result in requiring the Corporation to repurchase the loans or indemnify investors for any related losses associated with these loans. At September 30, 2014, the Corporation s reserve for estimated losses from such representation and warranty arrangements amounted to $ 5 million, which was included as part of other liabilities in the consolidated statement of financial condition (December 31, 2013 - $ 7 million). E-LOAN is no longer originating and selling loans since the subsidiary ceased these activities in 2008 and most of the outstanding agreements with major counterparties were settled during 2010 and 2011.

Servicing agreements relating to the mortgage-backed securities programs of FNMA and GNMA, and to mortgage loans sold or serviced to certain other investors, including FHLMC, require the Corporation to advance funds to make scheduled payments of principal, interest, taxes and insurance, if such payments have not been received from the borrowers. At September 30, 2014, the Corporation serviced $ 15.8 billion in mortgage loans for third-parties, including the loans serviced with credit recourse (December 31, 2013 - $ 16.3 billion). The Corporation generally recovers funds advanced pursuant to these arrangements from the mortgage owner, from liquidation proceeds when the mortgage loan is foreclosed or, in the case of FHA/VA loans, under the applicable FHA and VA insurance and guarantees programs. However, in the meantime, the Corporation must absorb the cost of the funds it advances during the time the advance is outstanding. The Corporation must also bear the costs of attempting to collect on delinquent and defaulted mortgage loans. In addition, if a defaulted loan is not cured, the mortgage loan would be canceled as part of the foreclosure proceedings and the Corporation would not receive any future servicing income with respect to that loan. At September 30, 2014, the outstanding balance of funds advanced by the Corporation under such mortgage loan servicing

agreements was approximately $33 million (December 31, 2013 - $29 million). To the extent the mortgage loans underlying the Corporation s servicing portfolio experience increased delinquencies, the Corporation would be required to dedicate additional cash resources to comply with its obligation to advance funds as well as incur additional administrative costs related to increases in collection efforts.

Popular, Inc. Holding Company (PIHC) fully and unconditionally guarantees certain borrowing obligations issued by certain of its wholly-owned consolidated subsidiaries amounting to $ 0.2 billion at September 30, 2014 (December 31, 2013 - $ 0.2 billion). In addition, at September 30, 2014 and December 31, 2013, PIHC fully and unconditionally guaranteed on a subordinated basis $ 0.4 billion and $ 1.4 billion , respectively, of capital securities (trust preferred securities) issued by wholly-owned issuing trust entities to the extent set forth in the applicable guarantee agreement. Refer to Note 20 to the consolidated financial statements for further information on the trust preferred securities.

Table of Contents

Note 24 Commitments and contingencies

Off-balance sheet risk

The Corporation is a party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financial needs of its customers. These financial instruments include loan commitments, letters of credit, and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

The Corporation s exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, standby letters of credit and financial guarantees written is represented by the contractual notional amounts of those instruments. The Corporation uses the same credit policies in making these commitments and conditional obligations as it does for those reflected on the consolidated statements of financial condition.

Financial instruments with off-balance sheet credit risk, whose contract amounts represent potential credit risk as of the end of the periods presented were as follows:

(In thousands)	September 30, 2014	December 31, 2013
Commitments to extend credit:		
Credit card lines	$ 4,562,258	$ 4,594,676
Commercial lines of credit	2,166,706	2,569,377
Other unused credit commitments	304,394	326,874
Commercial letters of credit	2,351	3,059
Standby letters of credit	44,945	78,948
Commitments to originate or fund mortgage loans	37,418	47,722

Balances for the financial instruments presented in the above table as of September 30, 2014 are presented excluding discontinued operations.

At September 30, 2014, the Corporation maintained a reserve of approximately $13 million for potential losses associated with unfunded loan commitments related to commercial and consumer lines of credit (December 31, 2013 - $7 million).

Other commitments

At September 30, 2014, the Corporation also maintained other non-credit commitments for $10 million, primarily for the acquisition of other investments (December 31, 2013 - $10 million).

Business concentration

Since the Corporation s business activities are currently concentrated primarily in Puerto Rico, its results of operations and financial condition are dependent upon the general trends of the Puerto Rico economy and, in particular, the residential and commercial real estate markets. The concentration of the Corporation s operations in Puerto Rico exposes it to greater risk than other banking companies with a wider geographic base. Its asset and revenue composition by geographical area is presented in Note 36 to the consolidated financial statements.

At September 30, 2014, the Corporation s direct exposure to the Puerto Rico government and its instrumentalities and municipalities amounted to $823 million, of which approximately $727 million is outstanding ($1.2 billion and $950 million at December 31, 2013). Of the amount outstanding, $592 million consists of loans and $135 million are securities ($789 million and $161 million at December 31, 2013). Of this amount, $257 million represents obligations from the Government of Puerto Rico and public corporations that are either collateralized loans or obligations that have a specific source of income or revenues identified for their repayment ($527 million at December 31, 2013). Some of these obligations consist of senior and subordinated loans to public corporations that obtain revenues from rates charged for services or products, such as public utilities. Public corporations have varying degrees of independence from the central Government and many receive appropriations or other payments from it. The remaining $470 million represents obligations from various municipalities in Puerto Rico for which, in most cases, the good faith, credit and unlimited taxing power of the applicable municipality has been pledged to their repayment ($423 million at December 31, 2013). These municipalities are required by law to levy special property taxes in such amounts as shall be required for the payment

of all of its general obligation bonds and loans. These loans have seniority to the payment of operating cost and expenses of the municipality.

In addition, at September 30, 2014, the Corporation had $362 million in indirect exposure to loans or securities that are payable by non-governmental entities, but which carry a government guarantee to cover any shortfall in collateral in the event of borrower default ($360 million at December 31, 2013). These included $281 million in residential mortgage loans that are guaranteed by the Puerto Rico Housing Finance Authority (December 31, 2013 - $274 million). These mortgage loans are secured by the underlying properties and the guarantees serve to cover shortfalls in collateral in the event of a borrower default. Also, the Corporation had $49 million in Puerto Rico pass-through housing bonds backed by FNMA, GNMA or residential loans CMO s, and $32 million of industrial development notes ($52 million and $34 million at December 31, 2013).

Other contingencies

As indicated in Note 11 to the consolidated financial statements, as part of the loss sharing agreements related to the Westernbank FDIC-assisted transaction, the Corporation agreed to make a true-up payment to the FDIC on the date that is 45 days following the last day of the final shared loss month, or upon the final disposition of all covered assets under the loss sharing agreements in the event losses on the loss sharing agreements fail to reach expected levels. The fair value of the true-up payment obligation was estimated at $126 million at September 30, 2014 (December 31, 2013 - $128 million).

Legal Proceedings

The nature of Popular s business ordinarily results in a certain number of claims, litigation, investigations, and legal and administrative cases and proceedings. When the Corporation determines it has meritorious defenses to the claims asserted, it vigorously defends itself. The Corporation will consider the settlement of cases (including cases where it has meritorious defenses) when, in management s judgment, it is in the best interest of both the Corporation and its shareholders to do so.

On at least a quarterly basis, Popular assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. For matters where it is probable that the Corporation will incur a material loss and the amount can be reasonably estimated, the Corporation establishes an accrual for the loss. Once established, the accrual is adjusted on at least a quarterly basis as appropriate to reflect any relevant developments. For matters where a material loss is not probable or the amount of the loss cannot be estimated, no accrual is established.

In certain cases, exposure to loss exists in excess of the accrual to the extent such loss is reasonably possible, but not probable. Management believes and estimates that the aggregate range of reasonably possible losses (with respect to those matters where such limits may be determined, in excess of amounts accrued), for current legal proceedings ranges from $0 to approximately $56.5 million as of September 30, 2014. For certain other cases, management cannot reasonably estimate the possible loss at this time. Any estimate involves significant judgment, given the varying stages of the proceedings (including the fact that many of them are currently in preliminary stages), the existence of multiple defendants in several of the current proceedings whose share of liability has yet to be determined, the numerous unresolved issues in many of the proceedings, and the inherent uncertainty of the various potential outcomes of such proceedings. Accordingly, management s estimate will change from time-to-time, and actual losses may be more or less than the current estimate.

While the final outcome of legal proceedings is inherently uncertain, based on information currently available, advice of counsel, and available insurance coverage, management believes that the amount it has already accrued is adequate

and any incremental liability arising from the Corporation s legal proceedings will not have a material adverse effect on the Corporation s consolidated financial position as a whole. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Corporation s consolidated financial position in a particular period.

Ongoing Class Action Litigation

Banco Popular de Puerto Rico (BPPR) and Banco Popular North America (BPNA) are currently defendants in various class action lawsuits:

On November 21, 2012, BPNA was served with a putative class action complaint captioned *Josefina Valle, et al. v. Popular Community Bank,* filed in the New York State Supreme Court (New York County). Plaintiffs, existing BPNA customers, allege among other things that BPNA has engaged in unfair and deceptive acts and trade practices in connection with the assessment of overdraft fees and payment processing on consumer deposit accounts. The complaint further alleges that BPNA improperly disclosed its consumer overdraft policies and, additionally, that the overdraft rates and fees assessed by BPNA violate New York s

usury laws. The complaint seeks unspecified damages, including punitive damages, interest, disbursements, and attorneys fees and costs.

BPNA removed the case to federal court (S.D.N.Y.) and plaintiffs subsequently filed a motion to remand the action to state court, which the Court granted on August 6, 2013. A motion to dismiss was filed on September 9, 2013. On October 25, 2013, plaintiffs filed an amended complaint seeking to limit the putative class to New York account holders. A motion to dismiss the amended complaint was filed in February 2014. In August 2014, the Court entered an order granting in part BPNA s motion to dismiss. The sole surviving claim relates to BPNA s item processing policy. On September 10, 2014, plaintiffs filed a motion for leave to file a second amended complaint to correct certain deficiencies noted in the court s decision and order. On October 21, 2014, BPNA filed a motion in opposition to plaintiffs motion for leave to amend the complaint.

Between December 2013 and January 2014, BPPR, BPNA and Popular, Inc., along with two executive officers, were served with a putative class action complaint captioned *Neysha Quiles et al. v. Banco Popular de Puerto Rico et al.* Plaintiffs essentially alleged that they and others, who have been employed by the Defendants as bank tellers and other similarly titled positions, were generally paid only for scheduled work time, rather than time actually worked. The Complaint sought to maintain a collective action under the Fair Labor Standards Act (FLSA) on behalf of all individuals who were employed or were currently employed by the Defendants in Puerto Rico, the Virgin Islands, New York, New Jersey, Florida, California, and Illinois as hourly paid, non-exempt, bank tellers or other similarly titled positions at any time during the past three years and alleged the following claims under the FLSA against all Defendants: (i) failure to pay overtime premiums; and (ii) that the failure to pay was willful. Similar claims were brought under Puerto Rico law on behalf of all individuals who were employed or are currently employed by BPPR in Puerto Rico as hourly paid, non-exempt, bank tellers or other similarly titled positions at any time during the past three years. On January 31, 2014, the Popular defendants filed an answer to the complaint. On February 24, 2014, the parties reached an agreement to dismiss the complaint against BPNA and the named BPNA executive officer without prejudice. The parties recently submitted briefs for and against class certification, which are currently pending resolution. Discovery is ongoing.

On May 5, 2014, a putative class action captioned *Nora Fernandez, et al. v. UBS, et al.* was filed in the United States District Court for the Southern District of New York on behalf of investors in 23 Puerto Rico closed-end investment companies against various UBS entities, BPPR and Popular Securities. UBS Financial Services Incorporated of Puerto Rico is the sponsor and co-sponsor of all 23 funds, while BPPR was co-sponsor, together with UBS, of nine (9) of those funds. The plaintiffs allege breach of fiduciary duties, aiding and abetting breach of fiduciary duty and breach of contract against all defendants. The complaint seeks unspecified damages, including disgorgement of fees and attorneys fees. On May 30, 2014, plaintiffs requested the voluntary dismissal of their class action in the SDNY and on that same date, they filed a virtually identical complaint in the US District Court for the District of Puerto Rico (USDC-PR) and requested that the case be consolidated with the matter of *In re: UBS Financial Services Securities Litigation*, a class action currently pending before the USDC-PR in which neither BPPR nor Popular Securities are parties. Recently, the UBS defendants filed an opposition to the consolidation request and demanded that the case be transferred back to the SDNY on the ground that the relevant agreements between the parties contain a clear and unambiguous choice of forum clause, with New York as the selected forum. The Popular defendants joined this motion. The motion remains pending to date.

On May 6, 2014, a putative class action captioned *David Alvarez, et al. v. Banco Popular North America* was filed in the Superior Court of the State of California for the County of Los Angeles. Plaintiffs generally assert that BPNA has engaged in purported violations of §2954.8(a) of the California Civil Code and §17200 et seq. of the California Business Professions Code, which allegedly require financial institutions that make loans secured by certain types of real property located within the state of California to pay interest to borrowers on impound account deposits at a

statutory rate of not less than two percent (2%). Plaintiffs maintain that BPNA has not paid interest on such deposits and demand that BPNA be enjoined from engaging in further violations of these provisions and pay an unspecified amount of damages sufficient to repay the unpaid interest on these deposits. PHH Corporation, which acquired the loans at issue in this complaint, has tentatively agreed to indemnify and tender a defense on behalf of BPNA. The court recently entered an order staying all substantive activity, including any responsive pleading, until the initial conference scheduled for August 22, 2014. The parties have subsequently reached an agreement in principle. The settlement terms which do not contemplate a payment by BPNA are currently being discussed.

On October 7, 2014, BPNA was served with a putative class action complaint captioned *Josefina Valle, et al. v. BPNA,* filed in the United States District Court for the Southern District of New York. The complaint names the same plaintiffs who filed the above-described overdraft fee class action suit. Plaintiffs allege, among other things, that BPNA engages in unfair and deceptive acts and trade practices relative to the assessment of ATM fees on ATM transactions initialed at Allpoint branded ATMs. The complaint further alleges that BPNA is in violation of the Electronic Fund Transfer Act and Regulation E with respect to ATM fees. BPNA is investigating the allegations and will respond to the complaint as appropriate.

Other Matters

The volatility in prices and declines in value that Puerto Rico municipal bonds and closed-end investment companies that invest primarily in Puerto Rico municipal bonds have experienced since August 2013 have led to regulatory inquiries, customer complaints and arbitrations for most broker-dealers in Puerto Rico, including Popular Securities LLC, a wholly owned subsidiary of the Corporation (Popular Securities). Popular Securities has received customer complaints and is named as a respondent (among other broker-dealers) in 28 arbitration proceedings with aggregate claimed damages of approximately $98 million, including one arbitration with claimed damages of $60 million in which two other Puerto Rico broker-dealers are co-defendants. The proceedings are in their early stages and it is the view of the Corporation that Popular Securities has meritorious defenses to the claims asserted. An adverse result in the matters described above could materially and adversely affect Popular Securities.

In addition, the Financial Industry Regulatory Authority (FINRA) notified Popular Securities that it is conducting an examination of broker-dealers in Puerto Rico, including Popular Securities, with respect to the sale of Puerto Rico municipal bonds and closed-end investment companies that invest primarily in Puerto Rico municipal bonds. FINRA has completed its examination with respect to Popular Securities and the resolution of this matter is not expected to have a material effect on Popular Securities.

Other Significant Proceedings

As described under Note 11 FDIC loss share asset and true-up payment obligation , in connection with the Westernbank FDIC-assisted transaction, on April 30, 2010, BPPR entered into loss share agreements with the FDIC with respect to the covered loans and other real estate owned that it acquired in the transaction. Pursuant to the terms of the loss share agreements, the FDIC s obligation to reimburse BPPR for losses with respect to covered assets begins with the first dollar of loss incurred. The FDIC reimburses BPPR for 80% of losses with respect to covered assets, and BPPR reimburses the FDIC for 80% of recoveries with respect to losses for which the FDIC paid 80% reimbursement under those loss share agreements. The loss share agreements contain specific terms and conditions regarding the management of the covered assets that BPPR must follow in order to receive reimbursement for losses from the FDIC. BPPR believes that it has complied with such terms and conditions. The loss share agreement applicable to the commercial late stage real-estate-collateral-dependent loans described below provides for loss sharing by the FDIC through the quarter ending June 30, 2015 and for reimbursement to the FDIC through the quarter ending June 30, 2018.

For the quarters ended June 30, 2010 through March 31, 2012, BPPR received reimbursement for loss-share claims submitted to the FDIC, including charge-offs for certain commercial late stage real-estate-collateral-dependent loans and OREO calculated in accordance with BPPR s charge-off policy for non-covered assets. When BPPR submitted its shared-loss claim in connection with the June 30, 2012 quarter, however, the FDIC refused to reimburse BPPR for a portion of the claim because of a difference related to the methodology for the computation of charge-offs for certain commercial late stage real-estate-collateral-dependent loans and OREO. In accordance with the terms of the commercial loss share agreement, BPPR applied a methodology for charge-offs for late stage real-estate-collateral-dependent loans that conforms to its regulatory supervisory criteria and is calculated in accordance with BPPR s charge-off policy for non-covered assets. The FDIC stated that it believed that BPPR should use a different methodology for those charge-offs. Notwithstanding the FDIC s refusal to reimburse BPPR for certain shared-loss claims, BPPR had continued to calculate shared-loss claims for quarters subsequent to June 30, 2012 in accordance with its charge-off policy for non-covered assets.

BPPR s loss share agreements with the FDIC specify that disputes can be submitted to arbitration before a review board under the commercial arbitration rules of the American Arbitration Association. On July 31, 2013, BPPR filed a

statement of claims with the American Arbitration Association requesting that the review board determine certain matters relating to the loss-share claims under its commercial loss share agreement with the FDIC, including that the review board award BPPR the amounts owed under its unpaid quarterly certificates. The statement of claim also included requests for reimbursement of certain valuation adjustments for discounts to appraised values, costs to sell troubled assets and other items. The review board was comprised of one arbitrator appointed by BPPR, one arbitrator appointed by the FDIC and a third arbitrator selected by agreement of those arbitrators.

On October 17, 2014, BPPR and the FDIC settled the claims that had been submitted to the review board. The settlement provides for an agreed methodology for submitting claims for reimbursement of charge-offs for late stage real-estate-collateral-dependent loans and resulting OREO. While the terms of the settlement could delay the timing of reimbursement of certain claims from the FDIC, the settlement is not expected to have a material adverse impact on BPPR s current estimate of expected reimbursable losses for the covered portfolio through the end of the commercial loss share agreement in the quarter ending June 30, 2015.

As of September 30, 2014, BPPR had unreimbursed losses and expenses of $348.0 million under the commercial loss share agreement with the FDIC. On October 31, 2014, the Corporation received reimbursement of $74.1 million from the FDIC covering claims filed prior to September 30, 2014. Taking into consideration this payment and claims submitted through that date, the total unreimbursed losses totaled $273.9 million, of which $184.0 million was submitted to the FDIC on October 30, 2014 incorporating, for the first time, the charge-off methodology agreed upon in the settlement related to losses on loans for which the FDIC had previously refused to reimburse the Corporation. BPPR continues to work on processing claims, including those which had previously not been reimbursed by the FDIC and expects to complete this process before the expiration of the commercial loss share agreement in the quarter ending June 30, 2015. After giving effect to the claim submitted on October 30, 2014, the amount of claims pending to be submitted for reimbursement to the FDIC amounted to $89.9 million.

Note 25 Non-consolidated variable interest entities

The Corporation is involved with four statutory trusts which it established to issue trust preferred securities to the public. Also, it established Popular Capital Trust III for the purpose of exchanging Series C preferred stock shares held by the U.S. Treasury for trust preferred securities issued by this trust. These trusts are deemed to be variable interest entities (VIEs) since the equity investors at risk have no substantial decision-making rights. The Corporation does not hold any variable interest in the trusts, and therefore, cannot be the trusts primary beneficiary. Furthermore, the Corporation concluded that it did not hold a controlling financial interest in these trusts since the decisions of the trusts are predetermined through the trust documents and the guarantee of the trust preferred securities is irrelevant since in substance the sponsor is guaranteeing its own debt.

Also, the Corporation is involved with various special purpose entities mainly in guaranteed mortgage securitization transactions, including GNMA, FNMA and FHLMC. These special purpose entities are deemed to be VIEs since they lack equity investments at risk. The Corporation s continuing involvement in these guaranteed loan securitizations includes owning certain beneficial interests in the form of securities as well as the servicing rights retained. The Corporation is not required to provide additional financial support to any of the variable interest entities to which it has transferred the financial assets. The mortgage-backed securities, to the extent retained, are classified in the Corporation s consolidated statements of financial condition as available-for-sale or trading securities. The Corporation concluded that, essentially, these entities (FNMA, GNMA, and FHLMC) control the design of their respective VIEs, dictate the quality and nature of the collateral, require the underlying insurance, set the servicing standards via the servicing guides and can change them at will, and can remove a primary servicer with cause, and without cause in the case of FNMA and FHLMC. Moreover, through their guarantee obligations, agencies (FNMA, GNMA, and FHLMC) have the obligation to absorb losses that could be potentially significant to the VIE.

ASU 2009-17 requires that an ongoing primary beneficiary assessment should be made to determine whether the Corporation is the primary beneficiary of any of the VIEs it is involved with. The conclusion on the assessment of these trusts and guaranteed mortgage securitization transactions has not changed since their initial evaluation. The Corporation concluded that it is still not the primary beneficiary of these VIEs, and therefore, these VIEs are not required to be consolidated in the Corporation s financial statements at September 30, 2014.

The Corporation holds variable interests in these VIEs in the form of agency mortgage-backed securities and collateralized mortgage obligations, including those securities originated by the Corporation and those acquired from third parties. Additionally, the Corporation holds agency mortgage-backed securities, agency collateralized mortgage obligations and private label collateralized mortgage obligations issued by third party VIEs in which it has no other form of continuing involvement. Refer to Note 27 to the consolidated financial statements for additional information on the debt securities outstanding at September 30, 2014 and December 31, 2013, which are classified as available-for-sale and trading securities in the Corporation s consolidated statements of financial condition. In addition, the Corporation may retain the right to service the transferred loans in those government-sponsored special purpose entities (SPEs) and may also purchase the right to service loans in other government-sponsored SPEs that were transferred to those SPEs by a third-party. Pursuant to ASC Subtopic 810-10, the servicing fees that the Corporation receives for its servicing role are considered variable interests in the VIEs since the servicing fees are subordinated to the principal and interest that first needs to be paid to the mortgage-backed securities investors and to the guaranty fees that need to be paid to the federal agencies.

Table of Contents

The following table presents the carrying amount and classification of the assets related to the Corporation s variable interests in non-consolidated VIEs and the maximum exposure to loss as a result of the Corporation s involvement as servicer with non-consolidated VIEs at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Assets		
Servicing assets:		
Mortgage servicing rights	$ 109,402	$ 113,437
Total servicing assets	$ 109,402	$ 113,437
Other assets:		
Servicing advances	$ 6,339	$ 1,416
Total other assets	$ 6,339	$ 1,416
Total assets	$ 115,741	$ 114,853
Maximum exposure to loss	$ 115,741	$ 114,853

The size of the non-consolidated VIEs, in which the Corporation has a variable interest in the form of servicing fees, measured as the total unpaid principal balance of the loans, amounted to $9 billion at September 30, 2014 (December 31, 2013 - $9.2 billion).

Maximum exposure to loss represents the maximum loss, under a worst case scenario, that would be incurred by the Corporation, as servicer for the VIEs, assuming all loans serviced are delinquent and that the value of the Corporation s interests and any associated collateral declines to zero, without any consideration of recovery. The Corporation determined that the maximum exposure to loss includes the fair value of the MSRs and the assumption that the servicing advances at September 30, 2014 and December 31, 2013, will not be recovered. The agency debt securities are not included as part of the maximum exposure to loss since they are guaranteed by the related agencies.

In September of 2011, BPPR sold construction and commercial real estate loans with a fair value of $148 million, and most of which were non-performing, to a newly created joint venture, PRLP 2011 Holdings, LLC. The joint venture is majority owned by Caribbean Property Group (CPG), Goldman Sachs & Co. and East Rock Capital LLC. The joint venture was created for the limited purpose of acquiring the loans from BPPR; servicing the loans through a third-party servicer; ultimately working out, resolving and/or foreclosing the loans; and indirectly owning, operating, constructing, developing, leasing and selling any real properties acquired by the joint venture through deed in lieu of foreclosure, foreclosure, or by resolution of any loan.

BPPR provided financing to the joint venture for the acquisition of the loans in an amount equal to the sum of 57% of the purchase price of the loans, or $84 million, and $2 million of closing costs, for a total acquisition loan of $86 million (the acquisition loan). The acquisition loan has a 5-year maturity and bears a variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity s assets. In addition, BPPR provided the joint venture with a non-revolving advance facility (the advance facility) of $68.5 million to cover unfunded commitments and costs-to-complete related to certain construction projects, and a revolving working capital

line (the working capital line) of $20 million to fund certain operating expenses of the joint venture. Cash proceeds received by the joint venture are first used to cover debt service payments for the acquisition loan, advance facility, and the working capital line described above which must be paid in full before proceeds can be used for other purposes. The distributable cash proceeds are determined based on a pro-rata basis in accordance with the respective equity ownership percentages. BPPR s equity interest in the joint venture ranks pari-passu with those of other parties involved. As part of the transaction executed in September 2011, BPPR received $ 48 million in cash and a 24.9% equity interest in the joint venture. The Corporation is not required to provide any other financial support to the joint venture.

BPPR accounted for this transaction as a true sale pursuant to ASC Subtopic 860-10 and thus recognized the cash received, its equity investment in the joint venture, and the acquisition loan provided to the joint venture and derecognized the loans sold.

The Corporation has determined that PRLP 2011 Holdings, LLC is a VIE but the Corporation is not the primary beneficiary. All decisions are made by CPG (or an affiliate thereof) (the Manager), except for certain limited material decisions which would require the unanimous consent of all members. The Manager is authorized to execute and deliver on behalf of the joint venture any and all documents, contracts, certificates, agreements and instruments, and to take any action deemed necessary in the benefit of the joint venture. Also, the Manager delegates the day-to-day management and servicing of the loans to CPG Island Servicing, LLC, an affiliate of CPG, which contracted Archon, an affiliate of Goldman Sachs, to act as sub-servicer, but it has the responsibility to oversee such servicing responsibilities.

Table of Contents

The Corporation holds variable interests in this VIE in the form of the 24.9% equity interest (the Investment in PRLP 2011 Holdings, LLC) and the financing provided to the joint venture. The equity interest is accounted for under the equity method of accounting pursuant to ASC Subtopic 323-10.

The initial fair value of the Corporation s equity interest in the joint venture was determined based on the fair value of the loans and real estate owned transferred to the joint venture of $148 million which represented the purchase price of the loans agreed by the parties and was an arm s-length transaction between market participants in accordance with ASC Topic 820, reduced by the acquisition loan provided by BPPR to the joint venture, for a total net equity of $63 million. Accordingly, the 24.9% equity interest held by the Corporation was valued at $16 million. Thus, the fair value of the equity interest is considered a Level 2 fair value measurement since the inputs were based on observable market inputs.

The following table presents the carrying amount and classification of the assets and liabilities related to the Corporation s variable interests in the non-consolidated VIE, PRLP 2011 Holdings, LLC, and its maximum exposure to loss at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Assets		
Loans held-in-portfolio:		
Acquisition loan	$	$ 3,233
Advances under the working capital line	397	390
Advances under the advance facility	6,922	16,024
Total loans held-in-portfolio	$ 7,319	$ 19,647
Accrued interest receivable	$ 27	$ 65
Other assets:		
Investment in PRLP 2011 Holdings LLC	$ 24,112	$ 26,596
Total assets	$ 31,458	$ 46,308
Deposits	$ (2,627)	$ (3,621)
Total liabilities	$ (2,627)	$ (3,621)
Total net assets	$ 28,831	$ 42,687
Maximum exposure to loss	$ 28,831	$ 42,687

The Corporation determined that the maximum exposure to loss under a worst case scenario at September 30, 2014 would be not recovering the carrying amount of the acquisition loan, the advances on the advance facility and working capital line, if any, and the equity interest held by the Corporation, net of the deposits.

On March 25, 2013, BPPR completed a sale of assets with a book value of $509.0 million, of which $500.6 million were in non-performing status, comprised of commercial and construction loans, and commercial and single family

real estate owned, with a combined unpaid principal balance on loans and appraised value of other real estate owned of approximately $987.0 million to a newly created joint venture, PR Asset Portfolio 2013-1 International, LLC. The joint venture is majority owned by Caribbean Property Group LLC (CPG) and certain affiliates of Perella Weinberg Partners Asset Based Value Strategy. The joint venture was created for the limited purpose of acquiring the loans from BPPR; servicing the loans through a third-party servicer; ultimately working out, resolving and/or foreclosing the loans; and indirectly owning, operating, constructing, developing, leasing and selling any real properties acquired by the joint venture through deed in lieu of foreclosure, foreclosure, or by resolution of any loan.

BPPR provided financing to the joint venture for the acquisition of the assets in an amount equal to the sum of 57% of the purchase price of the assets, and closing costs, for a total acquisition loan of $182.4 million (the acquisition loan). The acquisition loan has a 5-year maturity and bears a variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity s assets. In addition, BPPR provided the joint venture with a non-revolving advance facility (the advance facility) of $35.0 million to cover unfunded commitments and costs-to-complete related to certain construction projects, and a revolving working capital line (the working capital line) of $30.0 million to fund certain operating expenses of the joint venture. Cash proceeds received by the joint venture are first used to cover debt service payments for the acquisition loan, advance facility, and the working capital line described above which must be paid in full before proceeds can be used for other purposes. The distributable cash

Table of Contents

proceeds are determined based on a pro-rata basis in accordance with the respective equity ownership percentages. BPPR s equity interest in the joint venture ranks pari-passu with those of other parties involved. As part of the transaction executed in March 2013, BPPR received $92.3 million in cash and a 24.9% equity interest in the joint venture. The Corporation is not required to provide any other financial support to the joint venture.

BPPR accounted for this transaction as a true sale pursuant to ASC Subtopic 860-10 and thus recognized the cash received, its equity investment in the joint venture, and the acquisition loan provided to the joint venture and derecognized the loans and real estate owned sold.

The Corporation has determined that PR Asset Portfolio 2013-1 International, LLC is a VIE but the Corporation is not the primary beneficiary. All decisions are made by CPG (or an affiliate thereof) (the Manager), except for certain limited material decisions which would require the unanimous consent of all members. The Manager is authorized to execute and deliver on behalf of the joint venture any and all documents, contracts, certificates, agreements and instruments, and to take any action deemed necessary in the benefit of the joint venture. Also, the Manager delegates the day-to-day management and servicing of the loans to PR Asset Portfolio Servicing International, LLC, an affiliate of CPG.

The initial fair value of the Corporation s equity interest in the joint venture was determined based on the fair value of the loans and real estate owned transferred to the joint venture of $306 million which represented the purchase price of the loans agreed by the parties and was an arm s-length transaction between market participants in accordance with ASC Topic 820, reduced by the acquisition loan provided by BPPR to the joint venture, for a total net equity of $124 million. Accordingly, the 24.9% equity interest held by the Corporation was valued at $31 million. Thus, the fair value of the equity interest is considered a Level 2 fair value measurement since the inputs were based on observable market inputs.

The Corporation holds variable interests in this VIE in the form of the 24.9% equity interest (the Investment in PR Asset Portfolio 2013-1 International, LLC) and the financing provided to the joint venture. The equity interest is accounted for under the equity method of accounting pursuant to ASC Subtopic 323-10.

The following table presents the carrying amount and classification of the assets and liabilities related to the Corporation s variable interests in the non-consolidated VIE, PR Asset Portfolio 2013-1 International, LLC, and its maximum exposure to loss at September 30, 2014 and December 31, 2013.

(In thousands)	September 30, 2014	December 31, 2013
Assets		
Loans held-in-portfolio:		
Acquisition loan	$ 107,757	$ 157,660
Advances under the working capital line	1,024	1,196
Advances under the advance facility	9,915	1,427
Total loans held-in-portfolio	$ 118,696	$ 160,283
Accrued interest receivable	$ 340	$ 436
Other assets:		
Investment in PR Asset Portfolio 2013-1 International, LLC	$ 30,950	$ 30,478

Total assets	$	149,986	$	191,197
Deposits	$	(8,747)	$	(20,808)
Total liabilities	$	(8,747)	$	(20,808)
Total net assets	$	141,239	$	170,389
Maximum exposure to loss	$	141,239	$	170,389

The Corporation determined that the maximum exposure to loss under a worst case scenario at September 30, 2014 would be not recovering the carrying amount of the acquisition loan, the advances on the advance facility and working capital line, if any, and the equity interest held by the Corporation, net of the deposits.

Note 26 Related party transactions with affiliated company / joint venture

EVERTEC

The Corporation has an investment in EVERTEC, Inc. (EVERTEC), which provides various processing and information technology services to the Corporation and its subsidiaries and gives BPPR access to the ATH network owned and operated by EVERTEC. As of September 30, 2014, the Corporation s stake in EVERTEC was 14.8%. The investment in EVERTEC is accounted for under the equity method and is evaluated for impairment if events or circumstances indicate that a decrease in value of the investment has occurred that is other than temporary. Refer to Note 31 Related party transactions to the consolidated financial statements included in the Corporation s 2013 Annual Report for details.

The Corporation received $ 3.5 million in dividend distributions during the nine months ended September 30, 2014 from its investments in EVERTEC s holding company (September 30, 2013 - $ 2.7 million). The Corporation s equity in EVERTEC is presented in the table which follows and is included as part of other assets in the consolidated statements of financial condition.

(In thousands)	September 30, 2014	December 31, 2013
Equity investment in EVERTEC	$ 23,934	$ 19,931

The Corporation had the following financial condition balances outstanding with EVERTEC at September 30, 2014 and December 31, 2013. Items that represent liabilities to the Corporation are presented with parenthesis.

(In thousands)	September 30, 2014	December 31, 2013
Accounts receivable (Other assets)	$ 5,200	$ 8,634
Deposits	(18,923)	(14,289)
Accounts payable (Other liabilities)	(16,356)	(15,862)
Net total	$ (30,079)	$ (21,517)

The Corporation s proportionate share of income or loss from EVERTEC is included in other operating income in the consolidated statements of operations. The following table presents the Corporation s proportionate share of EVERTEC s income (loss) and changes in stockholders equity for the quarters and nine months ended September 30, 2014 and 2013.

(In thousands)	Quarter ended September 30, 2014	Nine months ended September 30, 2014

Total	$ (29,885)	$ (70,564)	

EVERTEC has a letter of credit issued by BPPR, for an amount of $ 3.6 million at September 30, 2014 (December 31, 2013 - $ 3.6 million). The Corporation also agreed to maintain outstanding this letter of credit for a 5-year period which expires on September 30, 2015. EVERTEC and the Corporation entered into a Reimbursement Agreement, in which EVERTEC will reimburse the Corporation for any losses incurred by the Corporation in connection with the performance bonds and the letter of credit. Possible losses resulting from these agreements are considered insignificant.

PRLP 2011 Holdings LLC

As indicated in Note 25 to the consolidated financial statements, the Corporation holds a 24.9% equity interest in PRLP 2011 Holdings LLC and currently provides certain financing to the joint venture as well as holds certain deposits from the entity.

The Corporation s equity in PRLP 2011 Holdings, LLC is presented in the table which follows and is included as part of other assets in the consolidated statements of financial condition.

(In thousands)	September 30, 2014	December 31, 2013
Equity investment in PRLP 2011 Holdings, LLC	$ 24,112	$ 26,596

Note 27 Fair value measurement

ASC Subtopic 820-10 Fair Value Measurements and Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels in order to increase consistency and comparability in fair value measurements and disclosures. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date. Valuation on these instruments does not necessitate a significant degree of judgment since valuations are based on quoted prices that are readily available in an active market.

Level 2 - Quoted prices other than those included in Level 1 that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or that can be corroborated by observable market data for substantially the full term of the financial instrument.

Level 3 - Inputs are unobservable and significant to the fair value measurement. Unobservable inputs reflect the Corporation s own assumptions about assumptions that market participants would use in pricing the asset or liability.

The Corporation maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Fair value is based upon quoted market prices when available. If listed prices or quotes are not available, the Corporation employs internally-developed models that primarily use market-based inputs including yield curves, interest rates, volatilities, and credit curves, among others. Valuation adjustments are limited to those necessary to ensure that the financial instrument s fair value is adequately representative of the price that would be received or paid in the marketplace. These adjustments include amounts that reflect counterparty credit quality, the Corporation s credit standing, constraints on liquidity and unobservable parameters that are applied consistently. There have been no changes in the Corporation s methodologies used to estimate the fair value of assets and liabilities since December 31, 2013. Refer to the Critical Accounting Policies / Estimates in the 2012 Annual Report for additional information on the accounting guidance and the Corporation s policies or procedures related to fair value measurements.

The estimated fair value may be subjective in nature and may involve uncertainties and matters of significant judgment for certain financial instruments. Changes in the underlying assumptions used in calculating fair value could significantly affect the results.

Table of Contents

Fair Value on a Recurring and Nonrecurring Basis

The following fair value hierarchy tables present information about the Corporation s assets and liabilities measured at fair value on a recurring basis at September 30, 2014 and December 31, 2013 and on a nonrecurring basis in periods subsequent to initial recognition for the nine months ended September 30, 2014 and 2013:

Total assets measured at fair value on a nonrecurring basis	$	$ 4,605	$ 217,466	$ 222,071	$ (59,239)

[1] Relates mostly to certain impaired collateral dependent loans. The impairment was measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC Section 310-10-35. Costs to sell are excluded from the reported fair value amount.

[2] Relates to lower of cost or fair value adjustments on loans held-for-sale and loans transferred from loans held-in-portfolio to loans held-for-sale. Costs to sell are excluded from the reported fair value amount.

[3] Represents the fair value of foreclosed real estate and other collateral owned that were written down to their fair value. Costs to sell are excluded from the reported fair value amount.

Table of Contents

The following table includes quantitative information about significant unobservable inputs used to derive the fair value of Level 3 instruments, excluding those instruments for which the unobservable inputs were not developed by the Corporation such as prices of prior transactions and/or unadjusted third-party pricing sources.

(In thousands)	Fair value at September 30, 2014		Valuation technique	Unobservable inputs	Weighted average (range)
CMO s - trading	$ 1,449		Discounted cash flow model	Weighted average life	2.2 years (0.6 - 5.0 years)
				Yield	3.9%(1.4% - 4.7%)
				Constant prepayment rate	23.9%(19.5% - 27.1%)
Other - trading	$ 816		Discounted cash flow model	Weighted average life	5.5 years
				Yield	12.0%
				Constant prepayment rate	10.8%
Mortgage servicing rights	$ 152,282		Discounted cash flow model	Prepayment speed	7.8%(5.6% - 23.1%)
				Weighted average life	12.8 years (4.3- 18.0 years)
				Discount rate	11.3%(9.5% - 15.0%)
Contingent consideration	$ (126,473)		Discounted cash flow model	Credit loss rate on covered loans	8.1%(0.0% - 100.0%)
				Risk premium component of discount rate	5.0%
Loans held-in-portfolio	$ 53,136	[1]	External appraisal	Haircut applied on external appraisals	16.5%(15.0% - 25.0%)
Other real estate owned	$ 79,236	[2]	External appraisal	Haircut applied on external appraisals	15.5%(5.0% -35.0%)
Other foreclosed assets	$ 1,465	[3]	External appraisal	Haircut applied on external appraisals	3.0%(1.0% -6.0%)

[1] Loans held-in-portfolio in which haircuts were not applied to external appraisals were excluded from this table.
[2] Other real estate owned in which haircuts were not applied to external appraisals were excluded from this table.
[3] Other foreclosed assets in which haircuts were not applied to external appraisals were excluded from this table.

The significant unobservable inputs used in the fair value measurement of the Corporation s collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as other), which are classified in the trading category, are yield, constant prepayment rate, and weighted average life. Significant increases (decreases) in any of those inputs in isolation would result in significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the constant prepayment rate will generate a directionally opposite change in the weighted average life. For example, as the average life is reduced by a higher constant prepayment rate, a lower yield will be realized, and when there is a reduction in the constant prepayment rate, the average life of these collateralized mortgage obligations will extend, thus resulting in a higher yield. These particular financial instruments are valued internally by the Corporation s investment banking and broker-dealer unit utilizing internal valuation techniques. The unobservable inputs incorporated into the internal discounted cash flow models used to derive the fair value of collateralized mortgage obligations and interest-only collateralized mortgage obligation (reported as other), which are classified in the trading category, are reviewed by the Corporation s Corporate Treasury unit on a quarterly basis. In the case of Level 3 financial instruments which fair value is based on broker quotes, the Corporation s Corporate Treasury unit reviews the inputs used by the broker-dealers for reasonableness utilizing information available from other published sources and validates that the fair value measurements were developed in accordance with ASC Topic 820. The Corporate Treasury unit also substantiates the inputs used by validating the prices with other broker-dealers, whenever possible.

The significant unobservable inputs used in the fair value measurement of the Corporation s mortgage servicing rights are constant prepayment rates and discount rates. Increases in interest rates may result in lower prepayments. Discount rates vary according to products and / or portfolios depending on the perceived risk. Increases in discount rates result in a lower fair value measurement. The Corporation s Corporate Comptroller s unit is responsible for determining the fair value of MSRs, which is based on discounted cash flow methods based on assumptions developed by an external service provider, except for prepayment speeds, which are adjusted internally for the local market based on historical experience. The Corporation s Corporate Treasury unit validates the economic assumptions developed by the external service provider on a quarterly basis. In addition, an analytical review of prepayment speeds is performed quarterly by the Corporate Comptroller s unit. Significant variances in prepayment speeds are investigated by the Corporate Treasury unit. The Corporation s MSR Committee analyzes changes in fair value measurements of MSRs and approves the valuation assumptions at each reporting period. Changes in valuation assumptions must also be approved by the MSR Committee. The fair value of MSRs are compared with those of the external service provider on a quarterly basis in order to validate if the fair values are within the materiality thresholds established by management to monitor and investigate material deviations. Back-testing is performed to compare projected cash flows with actual historical data to ascertain the reasonability of the projected net cash flow results.

Table of Contents

Note 28 Fair value of financial instruments

The fair value of financial instruments is the amount at which an asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on the type of financial instrument and relevant market information. Many of these estimates involve various assumptions and may vary significantly from amounts that could be realized in actual transactions.

The information about the estimated fair values of financial instruments presented hereunder excludes all nonfinancial instruments and certain other specific items.

For those financial instruments with no quoted market prices available, fair values have been estimated using present value calculations or other valuation techniques, as well as management s best judgment with respect to current economic conditions, including discount rates, estimates of future cash flows, and prepayment assumptions.

The fair values reflected herein have been determined based on the prevailing interest rate environment at September 30, 2014 and December 31, 2013, as applicable. In different interest rate environments, fair value estimates can differ significantly, especially for certain fixed rate financial instruments. In addition, the fair values presented do not attempt to estimate the value of the Corporation s fee generating businesses and anticipated future business activities, that is, they do not represent the Corporation s value as a going concern. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Corporation.

Following is a description of the Corporation s valuation methodologies and inputs used to estimate the fair values for each class of financial assets and liabilities not measured at fair value, but for which the fair value is disclosed. The disclosure requirements exclude certain financial instruments and all non-financial instruments. Accordingly, the aggregate fair value amounts of the financial instruments disclosed do not represent management s estimate of the underlying value of the Corporation. For a description of the valuation methodologies and inputs used to estimate the fair value for each class of financial assets and liabilities measured at fair value, refer to Note 27.

Cash and due from banks

Cash and due from banks include cash on hand, cash items in process of collection, and non-interest bearing deposits due from other financial institutions. The carrying amount of cash and due from banks is a reasonable estimate of its fair value. Cash and due from banks are classified as Level 1.

Money market investments

Investments in money market instruments include highly liquid instruments with an average maturity of three months or less. For this reason, they carry a low risk of changes in value as a result of changes in interest rates, and the carrying amount approximates their fair value. Money market investments include federal funds sold, securities purchased under agreements to resell, time deposits with other banks, and cash balances, including those held at the Federal Reserve. These money market investments are classified as Level 2, except for cash balances which generate interest, including those held at the Federal Reserve, which are classified as Level 1.

Investment securities held-to-maturity

Obligations of Puerto Rico, States and political subdivisions: Municipal bonds include Puerto Rico public municipalities debt and bonds collateralized by second mortgages under the Home Purchase Stimulus Program. Puerto Rico public municipalities debt was valued internally based on benchmark treasury notes and a credit spread derived from comparable Puerto Rico government trades and recent issuances. Puerto Rico public municipalities debt is classified as Level 3. Given that the fair value of municipal bonds collateralized by second mortgages was based on internal yield and prepayment speed assumptions, these municipal bonds are classified as Level 3.

Agency collateralized mortgage obligation: The fair value of the agency collateralized mortgage obligation (CMO), which is guaranteed by GNMA, was based on internal yield and prepayment speed assumptions. This agency CMO is classified as Level 3.

Other: Other securities include foreign and corporate debt. Given that the fair value was based on quoted prices for similar instruments, foreign debt is classified as Level 2. The fair value of corporate debt, which is collateralized by municipal

bonds of Puerto Rico, was internally derived from benchmark treasury notes and a credit spread based on comparable Puerto Rico government trades, similar securities, and/or recent issuances. Corporate debt is classified as Level 3.

Other investment securities

Federal Home Loan Bank capital stock: Federal Home Loan Bank (FHLB) capital stock represents an equity interest in the FHLB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the excess stock is repurchased by the FHLB at its par value, the carrying amount of FHLB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Federal Reserve Bank capital stock: Federal Reserve Bank (FRB) capital stock represents an equity interest in the FRB of New York. It does not have a readily determinable fair value because its ownership is restricted and it lacks a market. Since the canceled stock is repurchased by the FRB for the amount of the cash subscription paid, the carrying amount of FRB capital stock approximates fair value. Thus, these stocks are classified as Level 2.

Trust preferred securities: These securities represent the equity-method investment in the common stock of these trusts. Book value is the same as fair value for these securities since the fair value of the junior subordinated debentures is the same amount as the fair value of the trust preferred securities issued to the public. The equity-method investment in the common stock of these trusts is classified as Level 2, except for that of Popular Capital Trust III (Troubled Asset Relief Program) which is classified as Level 3. Refer to Note 20 for additional information on these trust preferred securities.

Other investments: Other investments include private equity method investments and Visa Class B common stock held by the Corporation. Since there are no observable market values, private equity method investments are classified as Level 3. The Visa Class B common stock was priced by applying the quoted price of Visa Class A common stock, net of a liquidity adjustment, to the as converted number of Class A common shares since these Class B common shares are restricted and not convertible to Class A common shares until pending litigation is resolved. Thus, these stocks are classified as Level 3.

Loans held-for-sale

The fair value of certain impaired loans held-for-sale was based on a discounted cash flow model that assumes that no principal payments are received prior to the effective average maturity date, that the outstanding unpaid principal balance is reduced by a monthly net loss rate, and that the remaining unpaid principal balance is received as a lump sum principal payment at the effective average maturity date. The remaining unpaid principal balance expected to be received, which is based on the prior 12-month cash payment experience of these loans and their expected collateral recovery, was discounted using the interest rate currently offered to clients for the origination of comparable loans. These loans were classified as Level 3. As of September 30, 2014, no loans were valued under this methodology. For loans held-for-sale originated with the intent to sell in the secondary market, its fair value was determined using similar characteristics of loans and secondary market prices assuming the conversion to mortgage-backed securities. Given that the valuation methodology uses internal assumptions based on loan level data, these loans are classified as Level 3. The fair value of certain other loans held-for-sale is based on bids received from potential buyers; binding offers; or external appraisals, net of internal adjustments and estimated costs to sell. Loans held-for-sale based on

binding offers are classified as Level 2. Loans held-for-sale based on indicative offers and/or external appraisals are classified as Level 3.

Loans held-in-portfolio

The fair values of the loans held-in-portfolio have been determined for groups of loans with similar characteristics. Loans were segregated by type such as commercial, construction, residential mortgage, consumer, and credit cards. Each loan category was further segmented based on loan characteristics, including interest rate terms, credit quality and vintage. Generally, fair values were estimated based on an exit price by discounting expected cash flows for the segmented groups of loans using a discount rate that considers interest, credit and expected return by market participant under current market conditions. Additionally, prepayment, default and recovery assumptions have been applied in the mortgage loan portfolio valuations. Generally accepted accounting principles do not require a fair valuation of the lease financing portfolio, therefore it is included in the loans total at its carrying amount. Loans held-in-portfolio are classified as Level 3.

Table of Contents

FDIC loss share asset

Fair value of the FDIC loss share asset was estimated using projected net losses related to the loss sharing agreements, which are expected to be reimbursed by the FDIC. The projected net losses were discounted using the U.S. Government agency curve. The loss share asset is classified as Level 3.

Deposits

Demand deposits: The fair value of demand deposits, which have no stated maturity, was calculated based on the amount payable on demand as of the respective dates. These demand deposits include non-interest bearing demand deposits, savings, NOW, and money market accounts. Thus, these deposits are classified as Level 2.

Time deposits: The fair value of time deposits was calculated based on the discounted value of contractual cash flows using interest rates being offered on time deposits with similar maturities. The non-performance risk was determined using internally-developed models that consider, where applicable, the collateral held, amounts insured, the remaining term, and the credit premium of the institution. For certain 5-year certificates of deposit in which customers may withdraw their money anytime with no penalties or charges, the fair value of these certificates of deposit incorporate an early cancellation estimate based on historical experience. Time deposits are classified as Level 2.

Assets sold under agreements to repurchase

Securities sold under agreements to repurchase (structured and non-structured): Securities sold under agreements to repurchase with short-term maturities approximate fair value because of the short-term nature of those instruments. Resell and repurchase agreements with long-term maturities were valued using discounted cash flows based on the three-month LIBOR. In determining the non-performance credit risk valuation adjustment, the collateralization levels of these long-term securities sold under agreements to repurchase were considered. In the case of callable structured repurchase agreements, the callable feature is not considered when determining the fair value of those repurchase agreements, since there is a remote possibility, based on forward rates, that the investor will call back these agreements before maturity since it is not expected that the interest rates would rise more than the specified interest rate of these agreements. Securities sold under agreements to repurchase (structured and non-structured) are classified as Level 2.

Other short-term borrowings

The carrying amount of other short-term borrowings approximate fair value because of the short-term maturity of those instruments or because they carry interest rates which approximate market. Thus, these other short-term borrowings are classified as Level 2.

Notes payable

FHLB advances: The fair value of FHLB advances was based on the discounted value of contractual cash flows over their contractual term. In determining the non-performance credit risk valuation adjustment, the

collateralization levels of these advances were considered. These advances are classified as Level 2.

Medium-term notes: The fair value of publicly-traded medium-term notes was determined using recent trades of similar transactions. Publicly-traded medium-term notes are classified as Level 2. The fair value of non-publicly traded debt was based on remaining contractual cash outflows, discounted at a rate commensurate with the non-performance credit risk of the Corporation, which is subjective in nature. Non-publicly traded debt is classified as Level 3.

Junior subordinated deferrable interest debentures (related to trust preferred securities): The fair value of junior subordinated interest debentures was determined using recent trades of similar transactions. Thus, these junior subordinated deferrable interest debentures are classified as Level 2.

Junior subordinated deferrable interest debentures (Troubled Asset Relief Program): The fair value of junior subordinated deferrable interest debentures was based on the discounted value of contractual cash flows over their contractual term.

Table of Contents

The discount rate was based on the rate at which a similar security was priced in the open market. Thus, these junior subordinated deferrable interest debentures are classified as Level 3.

Others: The other category includes capital lease obligations. Generally accepted accounting principles do not require a fair valuation of capital lease obligations, therefore; it is included at its carrying amount. Capital lease obligations are classified as Level 3.

Commitments to extend credit and letters of credit

Commitments to extend credit were valued using the fees currently charged to enter into similar agreements. For those commitments where a future stream of fees is charged, the fair value was estimated by discounting the projected cash flows of fees on commitments. Since the fair value of commitments to extend credit varies depending on the undrawn amount of the credit facility, fees are subject to constant change, and cash flows are dependent on the creditworthiness of borrowers, commitments to extend credit are classified as Level 3. The fair value of letters of credit was based on fees currently charged on similar agreements. Given that the fair value of letters of credit constantly vary due to fees being subject to constant change and whether the fees are received depends on the creditworthiness of the account parties, letters of credit are classified as Level 3.

The following tables present the carrying or notional amounts, as applicable, and estimated fair values for financial instruments with their corresponding level in the fair value hierarchy.

	September 30, 2014				
(In thousands)	Carrying amount	Level 1	Level 2	Level 3	Fair value
Financial Assets:

Note 29 Net income (loss) per common share

The following table sets forth the computation of net (loss) income per common share (EPS), basic and diluted, for the quarters and nine months ended September 30, 2014 and 2013:

	Quarters ended September 30,		Nine months ended September 30,	
(In thousands, except per share information)	2014	2013	2014	2013
Net income (loss) from continuing operations	$ 32,815	$ 225,513	$ (230,266)	$ 407,640
Net income (loss) from discontinued operations	29,758	3,622	(132,066)	28,656
Preferred stock dividends	(930)	(931)	(2,792)	(2,792)
Deemed dividend on preferred stock				
Net income (loss) applicable to common stock	$ 61,643	$ 228,204	$ (365,124)	$ 433,504
Average common shares outstanding	102,953,328	102,714,262	102,845,402	102,666,570
Average potential dilutive common shares	199,588	303,181		348,104
Average common shares outstanding - assuming dilution	103,152,916	103,017,443	102,845,402	103,014,674
Basic EPS from continuing operations	$ 0.31	$ 2.18	$ (2.27)	$ 3.94
Basic EPS from discontinued operations	$ 0.29	$ 0.04	$ (1.28)	$ 0.28
Total Basic EPS	$ 0.60	$ 2.22	$ (3.55)	$ 4.22
Diluted EPS from continuing operations	$ 0.31	$ 2.18	$ (2.27)	$ 3.93
Diluted EPS from discontinued operations	$ 0.29	$ 0.04	$ (1.28)	$ 0.28
Total Diluted EPS	$ 0.60	$ 2.22	$ (3.55)	$ 4.21

Potential common shares consist of common stock issuable under the assumed exercise of stock options and restricted stock awards using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from exercise, in addition to the amount of compensation cost attributed to future services, are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Warrants, stock options, and restricted stock awards that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect in earnings per common share.

For the quarter and nine months ended September 30, 2014, there were 44,797 and 45,343 weighted average antidilutive stock options outstanding, respectively (September 30, 2013 101,755 and 103,047). For the nine months

ended September 30, 2014, the Corporation has 510,449 unvested restricted stocks outstanding that were antidilutive.

Note 31 FDIC loss share (expense) income

The caption of FDIC loss share (expense) income in the consolidated statements of operations consists of the following major categories:

(In thousands)	Quarters ended September 30, 2014	Quarters ended September 30, 2013	Nine months ended September 30, 2014	Nine months ended September 30, 2013
Amortization of loss share indemnification asset	$ (42,524)	$ (37,681)	$ (163,565)	$ (116,442)
Reversal of accelerated amortization in prior periods	15,046		15,046	
80% mirror accounting on credit impairment losses[1]	9,863	13,946	35,325	53,329
80% mirror accounting on reimbursable expenses	15,545	25,641	39,375	45,555
80% mirror accounting on recoveries on covered assets, including rental income on OREOs, subject to reimbursement to the FDIC	(2,633)	(11,533)	(10,582)	(14,802)
80% mirror accounting on amortization of contingent liability on unfunded commitments		(87)		(473)
Change in true-up payment obligation	1,078	(5,322)	1,040	(12,573)
Other	(1,239)	170	(970)	519
Total FDIC loss share (expense) income	$ (4,864)	$ (14,866)	$ (84,331)	$ (44,887)

[1] Reductions in expected cash flows for ASC 310-30 loans, which may impact the provision for loan losses, may consider reductions in both principal and interest cash flow expectations. The amount covered under the FDIC loss sharing agreements for interest not collected from borrowers is limited under the agreements (approximately 90 days); accordingly, these amounts are not subject fully to the 80% mirror accounting.

As discussed in Note 1, the FDIC indemnity asset amortization for the third quarter of 2014 included a benefit of approximately $15.0 million to reverse the impact of accelerated amortization expense recorded in prior periods. This amount will be recognized as expense over the remaining portion of the Loss Sharing Agreement that expires in the quarter ending June 30, 2015.

During the second quarter of 2014, the Corporation revised its analysis of expected cash flows which resulted in a net decrease of approximately $102.9 million in estimated credit losses, which was driven mainly by commercial loan pools. Though this will have a positive impact on the Corporation s interest accretion in future periods, the carrying value of the indemnification asset was amortized to reflect lower levels of expected losses. This amortization is recognized over the shorter of the remaining life of the loan pools, which had an average life of approximately six years, or the indemnification asset, which expires at June 30, 2015, for commercial, construction and consumer loans and June 30, 2020 for single-family residential mortgage loans.

Table of Contents

Note 32 Pension and postretirement benefits

The Corporation has a non-contributory defined benefit pension plan and supplementary pension benefit restoration plans for regular employees of certain of its subsidiaries. The accrual of benefits under the plans is frozen to all participants.

The components of net periodic pension cost for the periods presented were as follows:

	Pension Plan Quarters ended September 30,		Benefit Restoration Plans Quarters ended September 30,	
(In thousands)	2014	2013	2014	2013
Interest Cost	$ 7,461	$ 6,966	$ 415	$ 373
Expected return on plan assets	(11,630)	(10,804)	(606)	(542)
Amortization of net loss	2,019	5,363	108	332
Total net periodic pension cost (benefit)	$ (2,150)	$ 1,525	$ (83)	$ 163

	Pension Plans Nine months ended September 30,		Benefit Restoration Plans Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Interest Cost	$ 22,383	$ 20,897	$ 1,244	$ 1,120
Expected return on plan assets	(34,891)	(32,412)	(1,816)	(1,625)
Amortization of net loss	6,056	16,089	323	998
Total net periodic pension cost (benefit)	$ (6,452)	$ 4,574	$ (249)	$ 493

During the quarter ended September 30, 2014 the Corporation made a contribution to the benefit restoration plans of $13 thousand. The total contributions expected to be paid during the year 2014 for the pension and benefit restoration plans amount to approximately $51 thousand.

The Corporation also provides certain postretirement health care benefits for retired employees of certain subsidiaries. The table that follows presents the components of net periodic postretirement benefit cost.

	Postretirement Benefit Plan			
	Quarters ended September 30,		Nine months ended September 30,	
(In thousands)	2014	2013	2014	2013
Service cost	$ 364	$ 564	$ 1,093	$ 1,693

Interest cost	1,712	1,712	5,135	5,136
Amortization of prior service cost	(950)		(2,850)	
Amortization of net loss		473		1,419
Total net periodic postretirement benefit cost	$ 1,126	$ 2,749	$ 3,378	$ 8,248

Contributions made to the postretirement benefit plan for the quarter ended September 30, 2014 amounted to approximately $1.5 million. The total contributions expected to be paid during the year 2014 for the postretirement benefit plan amount to approximately $6.2 million.

Note 33 - Stock-based compensation

The Corporation maintained a Stock Option Plan (the Stock Option Plan), which permitted the granting of incentive awards in the form of qualified stock options, incentive stock options, or non-statutory stock options of the Corporation. In April 2004, the Corporation s shareholders adopted the Popular, Inc. 2004 Omnibus Incentive Plan (the Incentive Plan), which replaced and superseded the Stock Option Plan. The adoption of the Incentive Plan did not alter the original terms of the grants made under the Stock Option Plan prior to the adoption of the Incentive Plan.

Stock Option Plan

Employees and directors of the Corporation or any of its subsidiaries were eligible to participate in the Stock Option Plan. The Board of Directors or the Compensation Committee of the Board had the absolute discretion to determine the individuals that were eligible to participate in the Stock Option Plan. This plan provided for the issuance of Popular, Inc. s common stock at a price equal to its fair market value at the grant date, subject to certain plan provisions. The shares are to be made available from authorized but unissued shares of common stock or treasury stock. The Corporation s policy has been to use authorized but unissued shares of common stock to cover each grant. The maximum option term is ten years from the date of grant. Unless an option agreement provides otherwise, all options granted are 20% exercisable after the first year and an additional 20% is exercisable after each subsequent year, subject to an acceleration clause at termination of employment due to retirement.

(Not in thousands)

Exercise price per share	Options outstanding	Weighted-average exercise price of options outstanding	Weighted-average remaining life of options outstanding in years	Options exercisable (fully vested)	Weighted-average exercise price of options exercisable
$272.00	44,797	$ 272.00	0.38	44,797	$ 272.00

There was no intrinsic value of options outstanding and exercisable at September 30, 2014 and 2013.

The following table summarizes the stock option activity and related information:

(Not in thousands)	Options Outstanding	Weighted-Average Exercise Price
Outstanding at December 31, 2012	160,986	$ 222.71
Granted		
Exercised		
Forfeited		
Expired	(60,549)	171.42
Outstanding at December 31, 2013	100,437	$ 253.64
Granted		
Exercised		
Forfeited		
Expired	(55,640)	238.85

Outstanding at September 30, 2014	44,797	$	272.00

There was no stock option expense recognized for the quarters and nine months ended September 30, 2014 and 2013.

Incentive Plan

The Incentive Plan permits the granting of incentive awards in the form of Annual Incentive Awards, Long-term Performance Unit Awards, Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Units or Performance Shares. Participants in the Incentive Plan are designated by the Compensation Committee of the Board of Directors (or its delegate as determined by the Board). Employees and directors of the Corporation and/or any of its subsidiaries are eligible to participate in the Incentive Plan.

Under the Incentive Plan, the Corporation has issued restricted shares, which become vested based on the employees continued service with Popular. Unless otherwise stated in an agreement, the compensation cost associated with the shares of restricted stock

is determined based on a two-prong vesting schedule. The first part is vested ratably over five years commencing at the date of grant and the second part is vested at termination of employment after attainment of 55 years of age and 10 years of service. The five-year vesting part is accelerated at termination of employment after attaining 55 years of age and 10 years of service. The vesting schedule for restricted shares granted on 2014 was modified as follows, the first part ratably over four years commencing at the date of the grant and the second part is vested at termination of employment after attainment of 55 years of age and 10 years of service or 60 years of age and 5 years of service. The four year vesting part is accelerated at termination of employment after attaining 55 years of age and 10 years of service or 60 years of age and 5 years of service. The restricted shares granted consistent with the requirements of the TARP Interim Final Rule vest in two years from grant date.

The following table summarizes the restricted stock activity under the Incentive Plan for members of management.

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2012	491,223	$ 20.59
Granted	229,131	28.20
Vested	(131,324)	31.23
Forfeited	(3,783)	24.63
Non-vested at December 31, 2013	585,247	$ 21.16
Granted	235,112	29.56
Vested	(302,517)	18.78
Forfeited	(7,393)	29.49
Non-vested at September 30, 2014	510,449	$ 26.32

During the quarter ended September 30, 2014 and 2013, no shares of restricted stock were awarded to management under the Incentive Plan. For the nine-month period ended September 30, 2014, 235,112 shares of restricted stock (September 30, 2013 229,131) were awarded to management under the Incentive Plan, from which 162,332 shares (September 30, 2013 165,304) were awarded to management consistent with the requirements of the TARP Interim Final Rule.

During the quarter ended September 30, 2014, the Corporation recognized $ 1.6 million of restricted stock expense related to management incentive awards, with a tax benefit of $ 0.2 million (September 30, 2013 - $ 1.4 million, with a tax benefit of $ 0.4 million). For the nine-month period ended September 30, 2014, the Corporation recognized $ 4.7 million of restricted stock expense related to management incentive awards, with a tax benefit of $ 0.7 million (September 30, 2013 - $ 3.9 million, with a tax benefit of $ 1.2 million). For the nine-month period ended September 30, 2014, the fair market value of the restricted stock vested was $5.6 million at grant date and $8.8 million at vesting date. This triggers a windfall, net of shortfalls, of $1.2 million of which $0.4 million was recorded as a windfall pool in additional paid in capital. No windfall pool was recorded for the remaining $0.8 million due to the valuation allowance of the deferred tax asset. The total unrecognized compensation cost related to non-vested restricted stock awards and performance shares to members of management at September 30, 2014 was $ 8.6 million and is expected to be recognized over a weighted-average period of 2 years.

The following table summarizes the restricted stock activity under the Incentive Plan for members of the Board of Directors:

(Not in thousands)	Restricted Stock	Weighted-Average Grant Date Fair Value
Non-vested at December 31, 2012		$
Granted	20,930	29.43
Vested	(20,930)	29.43
Forfeited		
Non-vested at December 31, 2013		$
Granted	21,051	30.26
Vested	(21,051)	30.26
Forfeited		
Non-vested at September 30, 2014		$

Table of Contents

During the quarter ended September 30, 2014, the Corporation granted 2,318 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (September 30, 2013 1,669). During this period, the Corporation recognized $0.1 million of restricted stock expense related to these restricted stock grants, with a tax benefit of $14 thousand (September 30, 2013 - $0.1 million, with a tax benefit of $46 thousand). For the nine-month period ended September 30, 2014, the Corporation granted 21,051 shares of restricted stock to members of the Board of Directors of Popular, Inc., which became vested at grant date (September 30, 2013 18,885). During this period, the Corporation recognized $0.4 million of restricted stock expense related to these restricted stock grants, with a tax benefit of $43 thousand (September 30, 2013 - $0.4 million, with a tax benefit of $0.1 million). The fair value at vesting date of the restricted stock vested during the nine months ended September 30, 2014 for directors was $ 0.6 million.

[1] For 2014, includes the impact of the Closing Agreement with the P.R. Treasury signed in June 2014.
Income tax expense amounted to $26.7 million for the quarter ended September 30, 2014, compared with $17.8 million for the same quarter of 2013. On July 1, 2014, the Government of Puerto Rico approved an amendment to the Internal Revenue Code, which, among other things, changed the income tax rate for capital gains from 15% to 20%. As a result, the Corporation recognized an income tax expense of $20.0 million during the third quarter of 2014, mainly related to the deferred tax liability associated with the portfolio acquired from Westernbank. Also, during the third quarter of 2014, $3.6 million of reserves for uncertain tax positions were reversed due to the expiration of the statute of limitation in the Puerto Rico operations compared with $7.7 million during the same quarter of 2013.

Income tax expense amounted to $45.8 million for the nine months ended September 30, 2014, compared with an income tax benefit of $276.5 million for the same period of 2013. The increase in income tax expense was primarily due to the recognition during the year 2013 of a tax benefit and a corresponding increase in the net deferred tax asset of the Puerto Rico operations as result of the increase in the marginal tax rate from 30% to 39% per Act Number 40 of the Puerto Rico Internal Revenue Code applicable to taxable years beginning after December 31, 2012. In addition, during 2013 the income tax benefit increased due to the loss generated on the Puerto Rico operations by the sale of non-performing assets net of the gain realized on the sale of EVERTEC s common stock.

Table of Contents

For the nine months ended September 30, 2014, the non deductible expenses increased due to the interest expense on the early extinguishment of the note issued to the U.S. Treasury under TARP which is non-tax deductible.

The following table presents a breakdown of the significant components of the Corporation s deferred tax assets and liabilities.

(In thousands)	September 30, 2014	December 31, 2013
Deferred tax assets:		
Tax credits available for carryforward	$ 12,023	$ 8,195
Net operating loss and other carryforward available	1,245,909	1,269,523
Postretirement and pension benefits	46,305	51,742
Deferred loan origination fees	6,835	7,164
Allowance for loan losses	728,334	760,956
Deferred gains	8,333	9,313
Accelerated depreciation	7,833	7,577
Intercompany deferred gains	2,767	3,235
Other temporary differences	26,989	34,443
Total gross deferred tax assets	2,085,328	2,152,148
Deferred tax liabilities:		
Differences between the assigned values and the tax basis of assets and liabilities		
recognized in purchase business combinations	34,764	37,938
FDIC-assisted transaction	83,770	79,381
Unrealized net gain on trading and available-for-sale securities	16,290	3,822
Other temporary differences	17,465	13,387
Total gross deferred tax liabilities	152,289	134,528
Valuation allowance	1,210,780	1,257,977
Net deferred tax asset	$ 722,259	$ 759,643

The net deferred tax asset shown in the table above at September 30, 2014 is reflected in the consolidated statements of financial condition as $758 million in net deferred tax assets in the Other assets caption (December 31, 2013 - $762 million) and $36 million in deferred tax liabilities in the Other liabilities caption (December 31, 2013 - $2 million), reflecting the aggregate deferred tax assets or liabilities of individual tax-paying subsidiaries of the Corporation.

A deferred tax asset should be reduced by a valuation allowance if based on the weight of all available evidence, it is more likely than not (a likelihood of more than 50%) that some portion or the entire deferred tax asset will not be realized. The valuation allowance should be sufficient to reduce the deferred tax asset to the amount that is more likely than not to be realized. The determination of whether a deferred tax asset is realizable is based on weighting all available evidence, including both positive and negative evidence. The realization of deferred tax assets, including

carryforwards and deductible temporary differences, depends upon the existence of sufficient taxable income of the same character during the carryback or carryforward period. The analysis considers all sources of taxable income available to realize the deferred tax asset, including the future reversal of existing taxable temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years and tax-planning strategies.

The Corporation recorded a valuation allowance in the year 2008 since in consideration of the requirement of ASC 740 management considered that it is more likely than not that all of the U.S. operation deferred tax asset will not be realized. For purposes of assessing the realization of the deferred tax assets in the U.S. mainland management evaluates and weights all available positive and negative evidence. The Corporation s U.S. mainland operations is not in a cumulative loss position for the three-year period ended September 30, 2014 taking into account taxable income exclusive of reversing temporary differences

(adjusted book income). This represents positive evidence within management s evaluation. However, the book income for 2013 and the first nine months of 2014 was significantly impacted by a reversal of the loan loss provision due to the improved credit quality of the loan portfolios. In addition, the U.S. mainland operations did not report taxable income for the years 2011, 2012 and 2013, although it currently reflects taxable income for the nine months ended September 30, 2014. Future realization of the deferred tax assets ultimately depends on the existence of sufficient taxable income of the appropriate character within the carryforward period available under the tax law. The lack of taxable income together with the fact that historic book income has been positively impacted by a reversal of loan loss provision that is not expected to be a continuing condition and the uncertainties regarding future performance represents strong negative evidence within management s evaluation. After weighting of all positive and negative evidence management concluded, as of the reporting date, that it is more likely than not that the Corporation will not be able to realize any portion of the deferred tax assets related to the U.S. mainland operations, considering the criteria of ASC Topic 740. This determination is updated each quarter and adjusted as any changes arise.

At September 30, 2014, the Corporation s net deferred tax asset related to its Puerto Rico operations amounted to $755 million net of the valuation allowance of $14.1 million recorded in the Holding Company.

The Corporation s Puerto Rico Banking operation is not in a cumulative loss position and has sustained profitability for the three year period ended September 30, 2014, exclusive of the loss generated on the sales of non-performing assets that took place in 2013 which is not a continuing condition of the operations. This is considered a strong piece of objectively verifiable positive evidence that out weights any negative evidence considered by management in the evaluation of the realization of the deferred tax asset. Based on this evidence and management s estimate of future taxable income, the Corporation has concluded that it is more likely than not that such net deferred tax asset of the Puerto Rico Banking operations will be realized.

The Holding Company operation is not in a cumulative loss position for the three year period ended September 30, 2014. However, after the payment of TARP, the interest expense that will be paid on the newly issued $450 million subordinated notes, bearing interest at 7%, will be tax deductible, contrary to the interest expense payable on the note issued to the U.S. Treasury under TARP. Based on this new fact pattern the Holding Company is expecting to have losses for income tax purposes exclusive of reversing temporary differences. Since as required by ASC 740 the historical information should be supplemented by all currently available information about future years, the expected losses in future years is considered by management a strong negative evidence that will suggest that income in future years will be insufficient to support the realization of all deferred tax asset. After weighting of all positive and negative evidence management concluded, as of the reporting date, that it is more likely than not that the Holding Company will not be able to realize any portion of the deferred tax assets, considering the criteria of ASC Topic 740. Accordingly, a valuation allowance on the deferred tax asset of $14.1 million was recorded during the year 2014.

The reconciliation of unrecognized tax benefits was as follows:

(In millions)	2014	2013
Balance at January 1	$ 9.8	$ 13.4
Additions for tax positions - January through March	0.3	0.2
Balance at March 31	$ 10.1	$ 13.6
Additions for tax positions - April through June	0.2	0.3
Balance at June 30	$ 10.3	$ 13.9

Additions for tax positions - July through September	0.3	0.3
Reduction as a result of lapse of statute of limitations - July through September	(2.5)	(5.7)
Balance at September 30	$ 8.1	$ 8.5

At September 30, 2014, the total amount of interest recognized in the statement of financial condition approximated $3.0 million (December 31, 2013 - $3.6 million). The total interest expense recognized at September 2014 was $452 thousand (December 31, 2013 - $1.4 million). Management determined that at September 30, 2014 and December 31, 2013 there was no need to accrue for the payment of penalties. The Corporation s policy is to report interest related to unrecognized tax benefits in income tax expense, while the penalties, if any, are reported in other operating expenses in the consolidated statements of operations.

Table of Contents

After consideration of the effect on U.S. federal tax of unrecognized U.S. state tax benefits, the total amount of unrecognized tax benefits, including U.S. and Puerto Rico, that if recognized, would affect the Corporation s effective tax rate, was approximately $9.7 million at September 30, 2014 (December 31, 2013 - $11.9 million).

The amount of unrecognized tax benefits may increase or decrease in the future for various reasons including adding amounts for current tax year positions, expiration of open income tax returns due to the statutes of limitation, changes in management s judgment about the level of uncertainty, status of examinations, litigation and legislative activity and the addition or elimination of uncertain tax positions.

The Corporation and its subsidiaries file income tax returns in Puerto Rico, the U.S. federal jurisdiction, various U.S. states and political subdivisions, and foreign jurisdictions. At September 30, 2014, the following years remain subject to examination in the U.S. Federal jurisdiction: 2011 and thereafter; and in the Puerto Rico jurisdiction, 2010 and thereafter. The Corporation anticipates a reduction in the total amount of unrecognized tax benefits within the next 12 months, which could amount to approximately $7.1 million.

Table of Contents

Note 35 Supplemental disclosure on the consolidated statements of cash flows

Additional disclosures on cash flow information and non-cash activities for the nine months ended September 30, 2014 and September 30, 2013 are listed in the following table:

(In thousands)	September 30, 2014	September 30, 2013
Non-cash activities:		
Loans transferred to other real estate	$ 118,098	$ 188,275
Loans transferred to other property	30,062	24,974
Total loans transferred to foreclosed assets	148,160	213,249
Transfers from loans held-in-portfolio to loans held-for-sale	2,114,589	442,003
Transfers from loans held-for-sale to loans held-in-portfolio	3,913	25,245
Loans securitized into investment securities[1]	695,416	1,149,199
Trades receivables from brokers and counterparties	77,618	85,746
Trades payables to brokers and counterparties	654	161,452
Recognition of mortgage servicing rights on securitizations or asset transfers	9,611	15,062
Loans sold to a joint venture in exchange for an acquisition loan and an equity interest in the joint venture		194,514

[1] Includes loans securitized into trading securities and subsequently sold before quarter end.

During the quarter ended September 30, 2014 BPNA completed the sale of its Illinois and Central Florida regional operations. As part of these transactions, BPNA made a net cash disbursement of $234.0 million for consideration of the assets and liabilities sold, as follows:

(In thousands)	September 30, 2014
Loans held-for-sale	$ 660,891
Premises and equipment, net	8,440
Other assets	9,021
Deposits	(938,758)
Other liabilities	(1,586)
Net liabilities sold	$ (261,992)

Table of Contents

Note 36 Segment reporting

The Corporation s corporate structure consists of two reportable segments Banco Popular de Puerto Rico and Banco Popular North America. These reportable segments pertain only to the continuing operations of Popular, Inc. As previously indicated in Note 3 to the consolidated financial statements, the regional operations in California, Illinois and Central Florida were classified as discontinued operations in the second quarter of 2014.

Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. The segments were determined based on the organizational structure, which focuses primarily on the markets the segments serve, as well as on the products and services offered by the segments.

Banco Popular de Puerto Rico:

Given that Banco Popular de Puerto Rico constitutes a significant portion of the Corporation s results of operations and total assets at September 30, 2014, additional disclosures are provided for the business areas included in this reportable segment, as described below:

Commercial banking represents the Corporation s banking operations conducted at BPPR, which are targeted mainly to corporate, small and middle size businesses. It includes aspects of the lending and depository businesses, as well as other finance and advisory services. BPPR allocates funds across business areas based on duration matched transfer pricing at market rates. This area also incorporates income related with the investment of excess funds, as well as a proportionate share of the investment function of BPPR.

Consumer and retail banking represents the branch banking operations of BPPR which focus on retail clients. It includes the consumer lending business operations of BPPR, as well as the lending operations of Popular Auto and Popular Mortgage. Popular Auto focuses on auto and lease financing, while Popular Mortgage focuses principally on residential mortgage loan originations. The consumer and retail banking area also incorporates income related with the investment of excess funds from the branch network, as well as a proportionate share of the investment function of BPPR.

Other financial services include the trust and asset management service units of BPPR, the brokerage and investment banking operations of Popular Securities, and the insurance agency and reinsurance businesses of Popular Insurance, Popular Insurance V.I., Popular Risk Services, and Popular Life Re. Most of the services that are provided by these subsidiaries generate profits based on fee income.

Banco Popular North America:

Banco Popular North America s reportable segment consists of the banking operations of BPNA, E-LOAN, Popular Equipment Finance, Inc. and Popular Insurance Agency, U.S.A. BPNA operates through a retail branch network in the U.S. mainland under the name of Popular Community Bank, while E-LOAN supports BPNA s deposit gathering through its online platform. All direct lending activities at E-LOAN were ceased during the fourth quarter of 2008. Popular Equipment Finance, Inc. also holds a running-off loan portfolio as this subsidiary ceased originating loans during 2009. Popular Insurance Agency, U.S.A. offers investment and insurance services across the BPNA branch network.

The Corporate group consists primarily of the holding companies: Popular, Inc., Popular North America, Popular International Bank and certain of the Corporation s investments accounted for under the equity method, including EVERTEC and Centro Financiero BHD, S.A. The Corporate group also includes the expenses of certain corporate areas that are identified as critical to the organization: Finance, Risk Management and Legal.

The accounting policies of the individual operating segments are the same as those of the Corporation. Transactions between reportable segments are primarily conducted at market rates, resulting in profits that are eliminated for reporting consolidated results of operations.

Note 37 Subsequent events

Subsequent events are events and transactions that occur after the balance sheet date but before the financial statements are issued. The effects of subsequent events and transactions are recognized in the financial statements when they provide additional evidence about conditions that existed at the balance sheet date. The Corporation has evaluated events and transactions occurring subsequent to September 30, 2014.

On November 8, 2014, the Corporation completed the sale of the California regional operations. The Corporation sold 20 branches and transferred $1.1 billion in loans and $1.1 billion in deposits to Banc of California National Association, a wholly owned subsidiary of Banc of California, Inc. The transaction is expected to result in a net premium estimated at approximately $4 million, before customary transaction costs. The Corporation agreed to provide, subject to certain limitations, customary indemnification to the purchaser, including with respect to certain pre-closing liabilities and violations of representations and warranties. The Corporation also agreed to indemnify the purchaser for up to 1.5% of credit losses on transferred loans for a period of two years after the closing. Pursuant to this indemnification provision, the Corporation s maximum exposure is approximately $16 million.

Table of Contents

Note 38 Condensed consolidating financial information of guarantor and issuers of registered guaranteed securities

The following condensed consolidating financial information presents the financial position of Popular, Inc. Holding Company (PIHC) (parent only), Popular North America, Inc. (PNA) and all other subsidiaries of the Corporation at September 30, 2014 and December 31, 2013, and the results of their operations and cash flows for periods ended September 30, 2014 and 2013.

PNA is an operating, wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries: Equity One, Inc. and Banco Popular North America (BPNA), including BPNA s wholly-owned subsidiaries Popular Equipment Finance, Inc., Popular Insurance Agency, U.S.A., and E-LOAN, Inc.

PIHC fully and unconditionally guarantees all registered debt securities issued by PNA.

Popular International Bank, Inc. (PIBI) is a wholly-owned subsidiary of PIHC and is the holding company of its wholly-owned subsidiaries Popular Insurance V.I., Inc. In July 2013, the Corporation completed the sale of Tarjetas y Transacciones en Red Tranred, C.A., which was a wholly owned subsidiary of PIBI.

A potential source of income for PIHC consists of dividends from BPPR and BPNA. Under existing federal banking regulations any dividend from BPPR or BPNA to the PIHC could be made if the total of all dividends declared by each entity during the calendar year would not exceed the total of its net income for that year, as defined by the Federal Reserve Board, combined with its retained net income for the preceding two years, less any required transfers to surplus or to a fund for the retirement of any preferred stock. At September 30, 2014, BPPR could have declared a dividend of approximately $503 million (December 31, 2013 - $504 million). On October 20, 2014, the Memorandum of Understanding (the MOU) entered into on July 20, 2011 between Popular, Inc., BPPR, the Federal Reserve Bank of New York (the FRB-NY) and the Office of the Commissioner of Financial Institutions of Puerto Rico was lifted. The MOU provided, among other things, for the Corporation to take steps to improve its credit risk management practices and asset quality, and for the Corporation to develop strategic plans to improve earnings and to develop capital plans. The MOU also required the Corporation to obtain approval from the applicable MOU counterparties prior to, among other things, declaring or paying dividends, purchasing or redeeming any shares of its stock, consummating acquisitions or mergers, or making any distributions on its trust preferred securities or subordinated debentures. The MOU entered into between BPNA, the FRB-NY and the New York State Department of Financial Services (the NYSDFS) on July 25, 2011 remains outstanding. BPNA could not declare any dividends without the approval of the Federal Reserve Board and the NYSDFS.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report includes management s discussion and analysis (MD&A) of the consolidated financial position and financial performance of Popular, Inc. (the Corporation or Popular). All accompanying tables, financial statements and notes included elsewhere in this report should be considered an integral part of this analysis.

The Corporation is a diversified, publicly-owned financial holding company subject to the supervision and regulation of the Board of Governors of the Federal Reserve System. The Corporation has operations in Puerto Rico, the United States (U.S.) mainland, and the U.S. and British Virgin Islands. In Puerto Rico, the Corporation provides retail, including residential mortgage loan originations, and commercial banking services through its principal banking subsidiary, Banco Popular de Puerto Rico (BPPR), as well as investment banking, broker-dealer, auto and equipment leasing and financing, and insurance services through specialized subsidiaries. In the U.S. mainland, the Corporation operates Banco Popular North America (BPNA), including its wholly-owned subsidiary E-LOAN. BPNA focuses efforts and resources on the core community banking business. BPNA, under the name Popular Community Bank (PCB), operates branches in New York, California, New Jersey and Florida. E-LOAN markets deposit accounts under its name for the benefit of BPNA. Note 36 to the consolidated financial statements presents information about the Corporation s business segments. As of September 30, 2014, the Corporation had a 14.8% interest in the holding company of EVERTEC, which provides transaction processing services throughout the Caribbean and Latin America, including servicing many of the Corporation s system infrastructures and transaction processing businesses. During the quarter ended September 30, 2014, the Corporation recorded $2.9 million in earnings from its investment in EVERTEC, which had a carrying amount of $23.9 million as of the end of the quarter. Also, the Corporation had a 15.8% stake in BHD Financial Group (BHD), one of the largest banking and financial services groups in the Dominican Republic. During the quarter ended September 30, 2014, the Corporation recorded $5.6 million in earnings from its investment in BHD, which had a carrying amount of $104.8 million, as of the end of the quarter.

OVERVIEW

For the quarter ended September 30, 2014, the Corporation recorded net income of $62.6 million compared to net income of $229.1 million for the same quarter of the previous year. Net income for the quarter ended September 30, 2013 reflected an after-tax gain of $167.8 million from the sale of EVERTEC s shares on their secondary public offering. Net income from continuing operations was $32.8 million for the third quarter of 2014, compared to a net income of $225.5 million for the same quarter of the previous year. The results for the quarter ended September 30, 2014 were impacted by the BPNA reorganization, which included a $20.7 million interest expense related to the

144

refinancing of structured repos, a $12.0 million loss on loans either sold or transferred to held-for-sale, restructuring costs of $8.3 million, a net $25.8 million gain on the sales of the Illinois and Central Florida regions (included within discontinued operations), which was offset in part by costs directly associated with the unwinding of the regions subject to the sales of $4.8 million. The FDIC indemnity amortization for the third quarter of 2014 included a positive adjustment of $15.0 million to reverse the impact of accelerated amortization expense recorded in prior periods.

As previously disclosed, on July 1, 2014, the Government of Puerto Rico approved an amendment to the Internal Revenue Code, which, among other things, changed the income tax rate for capital gains from 15% to 20%. As a result, the Corporation recognized an additional income tax expense of $20.0 million, mainly related to the deferred tax liability associated with the portfolio acquired from Westernbank. Excluding the impact of these events, the adjusted net income for the quarter ended September 30, 2014 was $90.5 million.

Recent significant events

On July 2, 2014, the Corporation completed the repayment of TARP funds to the U.S. Treasury through the repurchase of $935 million of trust capital securities issued to the U.S. Treasury under the TARP Capital Purchase Program. The Corporation funded the repurchase through a combination of available cash and approximately $400 million from the proceeds of the issuance of its $450 million aggregate principal amount of 7% Senior Notes due on 2019 issued on July 1, 2014.

On July 23, 2014, the Corporation also completed the repurchase of the outstanding warrant initially issued to the U.S. Treasury under the TARP Capital Purchase Program in 2008. The warrant represented the right to purchase 2,093,284 shares of the Corporation s common stock at an exercise price of $67 per share with an original term of 10 years. The Corporation and the U.S. Treasury agreed upon a repurchase price of $3.0 million for the warrant. With the completion of this transaction, the Corporation completed its exit from the TARP Capital Purchase Program.

In connection with the repayment of TARP on July 2, 2014, the Corporation accelerated the related amortization of the discount and deferred costs amounting to $414.1 million, which is reflected as part of interest expense in the consolidated statement of operations, during the second quarter of 2014.

During the third quarter of 2014, the Corporation completed two of the previously announced sales of its regional operations in the U.S. The sales of its Central Florida and Illinois operations resulted in a net gain of $1.2 million and $24.6 million, respectively.

On November 8, 2014, the Corporation completed the sale of the California regional operations. The Corporation sold 20 branches and transferred $1.1 billion in loans and $1.1 billion in deposits to Banc of California National Association, a wholly owned subsidiary of Banc of California, Inc. The transaction is expected to result in a net premium estimated at approximately $4 million, before customary transaction costs. The Corporation agreed to provide, subject to certain limitations, customary indemnification to the purchaser, including with respect to certain pre-closing liabilities and violations of representations and warranties. The Corporation also agreed to indemnify the purchaser for up to 1.5% of credit losses on transferred loans for a period of two years after the closing. Pursuant to this indemnification provision, the Corporation s maximum exposure is approximately $16 million.

The Corporation continues its strategy of centralizing certain back office operations in Puerto Rico and New York. The Corporation incurred $8.3 million in restructuring charges during the third quarter of 2014. Over the course of the fourth quarter of 2014 and early in 2015, an additional $41 million in restructuring charges are expected to be

incurred, comprised of $22 million in severance and retention payments and $19 million in operational set-up costs and lease cancelations. Upon the completion of the regional sales and the centralization of operations in the first half of 2015, annual operating expenses are expected to decrease by approximately $40 million, after the reorganization is complete. This decrease in expenses is expected to offset the reduction in revenues that will result from the sale of the regional operations.

In connection with the restructuring of its U.S. mainland operations, the Corporation is also taking steps to restructure its balance sheet and funding strategies. As part of the strategy, during the third quarter of 2014, the Corporation sold approximately $94.2 million in securities available for sale and refinanced approximately $638 million in long term structured repos in the U.S. with a yield of 4.41% and replaced them with lower cost short term repos of a similar amount. The fees associated with the refinancing of these repos were $39.7 million, of which $20.7 million were recorded as interest expense during the third quarter of 2014, with remainder to be recorded during the fourth quarter of 2014.

The Corporation also sold or entered into agreements to sell certain of its legacy and classified loans in the U.S. for an aggregate of approximately $220.7 million which resulted in a net loss of approximately $12.0 million in the quarter, which is reflected in the provision for loan losses.

Table of Contents

As previously disclosed, on July 31, 2013, BPPR filed a statement of claims with the American Arbitration Association requesting that the review board determine certain matters relating to the loss-share claims under its commercial loss share agreement with the FDIC. The statement of claim also included requests for reimbursement of certain valuation adjustments for discounts to appraised values, costs to sell troubled assets and other items. On October 17, 2014, BPPR and the FDIC settled the claims that had been submitted to the review board. The settlement provides for an agreed methodology for submitting claims for reimbursement of charge-offs for late stage real-estate-collateral-dependent loans and resulting OREO. While the terms of the settlement could delay the timing of reimbursement of certain claims from the FDIC, the settlement is not expected to have a material adverse impact on BPPR s current estimate of expected reimbursable losses for the covered portfolio through the end of the commercial loss share agreement in the quarter ending June 30, 2015.

On October 20, 2014, the Memorandum of Understanding (the MOU) entered into on July 20, 2011 between Popular, Inc., BPPR, the Federal Reserve Bank of New York (the FRB-NY) and the Office of the Commissioner of Financial Institutions of Puerto Rico was lifted. The MOU provided, among other things, for the Corporation to take steps to improve its credit risk management practices and asset quality, and for the Corporation to develop strategic plans to improve earnings and to develop capital plans. The MOU also required the Corporation to obtain approval from the applicable MOU counterparties prior to, among other things, declaring or paying dividends, purchasing or redeeming any shares of its stock, consummating acquisitions or mergers, or making any distributions on its trust preferred securities or subordinated debentures. The MOU entered into between BPNA, the FRB-NY and the New York State Department of Financial Services (the NYSDFS) on July 25, 2011 remains outstanding. BPNA could not declare any dividends without the approval of the Federal Reserve Board and the NYSDFS.

Current and prior periods financial information covering income and expense amounts presented in this MD&A has been retrospectively adjusted for the impact of the discontinued operations for comparative purposes. The financial information for prior periods included in this MD&A does not reflect the reclassification of certain of PCB s assets and liabilities to discontinued operations.

Financial highlights for the quarter ended September 30, 2014

Taxable equivalent net interest income was $345.7 million for the third quarter of 2014. Excluding the impact of the $20.7 million in fees related to the refinancing of certain structured repo at BPNA, the net interest income on a taxable equivalent basis was $366.4 million for the third quarter of 2014, an increase of $22.5 million compared to the same quarter of 2013. Net interest margin for the third quarter of 2014 was 4.62%. Adjusted net interest margin for the third quarter of 2014 was 4.90% compared to 4.63% for the same quarter of 2013, an increase of 27 basis points. The increase in net interest income was mainly related to lower cost of borrowings after the repayment of TARP funds on July 2, 2014. Refer to the Net Interest Income section of this MD&A for a discussion of the major variances in net interest income, including yields and costs.

Total non-performing non-covered assets were $777 million at September 30, 2014, increasing by $42 million, or 6%, compared with December 31, 2013. Non-covered non-performing loans held-in-portfolio were $622 million at September 30, 2014, increasing by $24 million, or 4%, from December 31, 2013. This increase was driven by an increase of $145 million in the BPPR segment, offset in part by an improvement of $121 million in the BPNA segment. The ratio of non-performing loans to loans held-in-portfolio, excluding covered loans,

increased to 3.21% at September 30, 2014 from 2.77% at December 31, 2013. Credit metrics reflect continued credit quality improvements in the U.S. and the impact of challenging macroeconomic conditions in Puerto Rico. The increase in the ratio also reflects the reduction in loan balances as a result of the sale of the regional operations in the US.

The provision for loan losses totaled $80.6 million for the quarter ended September 30, 2014, compared to $66.1 million for the quarter ended September 30, 2013, an increase of $14.5 million.

The provision for the third quarter of 2014 includes a $12.0 million impact related to certain classified and legacy loans sold or transferred to loan held-for-sale as part of the U.S. reorganization, as these loans required a $32.3 million write-down and carried $20.3 million in reserves. Excluding this effect, the provision for the third quarter amounted to $68.6 million, an increase of $2.5 million relatively unchanged from the same quarter in the prior year. Excluding the $32.3 million

write-down, net charge-offs decreased by $17.4 million from the same quarter in the prior year, primarily driven by a reduction of $20.6 million in commercial net charge-offs. Refer to the Credit Risk Management and Loan Quality section of this MD&A for an explanation of the main factors impacting the provision for loan losses and a detailed analysis of net charge-offs, non-performing assets, the allowance for loan losses and selected loan losses statistics.

Non-interest income decreased by $162.4 million during the quarter ended September 30, 2014, compared to the same quarter of the previous year. The FDIC indemnity asset amortization for the third quarter of 2014 included a benefit of approximately $15.0 million to reverse the impact of accelerated amortization expense recorded in prior periods. This amount will be recognized as expense over the remaining portion of the commercial loss sharing agreement that expires in the quarter ending June 30, 2015. Excluding the impact of the $15.0 million FDIC indemnity asset amortization adjustment during the third quarter of 2014 and the impact of the $175.9 million impact of EVERTEC s SPO during the third quarter of 2013, non-interest income decreased $1.6 million.

Refer to the Non-Interest Income section of this MD&A for additional information on the main variances that affected the non-interest income categories.

Operating expenses increased by $2.3 million during the quarter ended September 30, 2014, compared to the same quarter of the previous year. Excluding the impact of the restructuring charges related to the BPNA reorganization, operating expenses decreased $5.7 million due mainly to the following:

- Lower FDIC deposit insurance expense by $5.6 million due to improvements in asset quality and earnings trends;
- Favorable variance in loss on early extinguishment of debt by $3.4 million related to the early cancellation of senior notes during the third quarter of 2013; and
- Lower personnel costs by $3.8 million, mainly at BPPR.

The above positive variances were offset by higher OREO expenses by $3.1 million, mainly at BPPR and higher other operating expenses by $7.6 million due mainly to provision for unused commitments at BPPR. Refer to the Operating Expenses section of this MD&A for additional information

Income tax expense amounted to $26.7 million for the quarter ended September 30, 2014, compared with $17.8 million for the same quarter of 2013. On July 1, 2014, the Government of Puerto Rico approved certain amendments to the Internal Revenue Code, which, among other things, changed the income tax rate for capital gains from 15% to 20%. As a result, the Corporation recognized an income tax expense of $20.0 million during the third quarter of 2014, mainly related to the deferred tax liability associated with the portfolio acquired from Westernbank.

Total assets were $34.1 billion at September 30, 2014 and $35.7 billion at December 31, 2013. The decrease in total assets was attributable to:

- A decrease in the FDIC loss share asset of $267.5 million due to amortization and collections;

- A decrease in trading securities of $194.4 million mainly due to sales of mortgage backed securities at BPPR during the third quarter of 2014;

- A decrease in non-covered loans held-in-portfolio of $0.5 billion, excluding the reclassification of $1.8 billion in loans to discontinued operations, due to a reduction in public sector loans at BPPR and the sales or reclassification to loans held for sale at the BPNA segment;

- A decrease in the covered loans portfolio of $330.2 million due to the continuation of loan resolutions and the normal portfolio run-off; and

- A decrease in goodwill of $186.5 million due to the impairment charge recognized in connection with the sale of the BPNA regions.

The above decreases were offset by:

An increase in money market investments of $194.7 million, mainly due balances held at the Federal Reserve Bank of New York;

An increase in the loans held-for-sale portfolio of $67.6 million mostly at the BPNA segment driven by the reclassification of certain classified commercial and residential mortgage loans in connection with sale of the BPNA regions, amounting to $105.0 million; and

An increase in investment securities available-for-sale and held-to-maturity of $405.4 million due mainly to purchases of U.S. Treasury securities and Obligations from the U.S. Government sponsored entities at the BPPR segment.

The Corporation s total deposits decreased by $0.2 billion, excluding the reclassification of $2.0 billion to discontinued operations, mainly due to a reduction in higher cost and brokered deposits at the BPNA segment.

A decrease in borrowings of $269.8 million, mainly due to lower Federal Home Loan Bank of NY advances at the BPPR segment.

Stockholders equity totalled $4.3 billion at September 30, 2014, compared with $4.6 billion at December 31, 2013. The decrease resulted from the Corporation s net loss of $362.3 million for the nine months ended September 30, 2014, principally triggered by the acceleration of the amortization of the TARP Notes discount and the goodwill impairment charge of $186.5 million, partially offset by a decrease of $38.7 million in accumulated other comprehensive loss due to net unrealized gain (losses) in the portfolio of investments securities available-for-sale. Capital ratios continued to be strong. The Corporation s Tier 1 risk-based capital ratio stood at 16.86% at September 30, 2014, while the tangible common equity ratio at September 30, 2014 was 11.16%. Refer to Table 20 for capital ratios and Tables 21 and 22 for Non-GAAP reconciliations.

Table 1 provides selected financial data and performance indicators for the quarter and nine months ended September 30, 2014 and 2013.

As a financial services company, the Corporation s earnings are significantly affected by general business and economic conditions. Lending and deposit activities and fee income generation are influenced by the level of business spending and investment, consumer income, spending and savings, capital market activities, competition, customer preferences, interest rate conditions and prevailing market rates on competing products.

The Corporation continuously monitors general business and economic conditions, industry-related indicators and trends, competition, interest rate volatility, credit quality indicators, loan and deposit demand, operational and systems efficiencies, revenue enhancements and changes in the regulation of financial services companies.

The Corporation operates in a highly regulated environment and may be adversely affected by changes in federal and local laws and regulations. Also, competition with other financial institutions could adversely affect its profitability.

The description of the Corporation s business contained in Item 1 of the Corporation s 2013 Annual Report, while not all inclusive, discusses additional information about the business of the Corporation and risk factors, many beyond the Corporation s control that, in addition to the other information in this Form 10-Q, readers should consider.

The Corporation s common stock is traded on the NASDAQ Global Select Market under the symbol BPOP.

CRITICAL ACCOUNTING POLICIES / ESTIMATES

The accounting and reporting policies followed by the Corporation and its subsidiaries conform to generally accepted accounting principles in the United States of America and general practices within the financial services industry. Various elements of the Corporation s accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. These estimates are made under facts and circumstances at a point in time and changes in those facts and circumstances could produce actual results that differ from those estimates.

Management has discussed the development and selection of the critical accounting policies and estimates with the Corporation s Audit Committee. The Corporation has identified as critical accounting policies those related to: (i) Fair Value Measurement of Financial Instruments; (ii) Loans and Allowance for Loan Losses; (iii) Acquisition Accounting for Loans and Related Indemnification Asset; (iv) Income Taxes; (v) Goodwill, and (vi) Pension and Postretirement Benefit Obligations. For a summary of these critical accounting policies and estimates, refer to that particular section in the MD&A included in Popular, Inc. s 2013 Financial Review and Supplementary Information to Stockholders, incorporated by reference in Popular, Inc. s Annual Report on Form 10-K for the year ended December 31, 2013 (the 2013 Annual Report). Also, refer to Note 2 to the consolidated financial statements included in the 2013 Annual Report for a summary of the Corporation s significant accounting policies.

Allowance for loan losses

The Corporation follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan losses to provide for inherent losses in the loan portfolio. This methodology includes the consideration of factors such as current economic conditions, portfolio risk characteristics, prior loss experience and results of periodic credit reviews of individual loans. The provision for loan losses charged to current operations is based on this methodology. Loan losses are charged and recoveries are credited to the allowance for loan losses.

The Corporation s assessment of the allowance for loan losses is determined in accordance with the guidance of loss contingencies in ASC Subtopic 450-20 and loan impairment guidance in ASC Section 310-10-35. Also, the Corporation determines the allowance for loan losses on purchased impaired loans and purchased loans accounted for under ASC Subtopic 310-30 by analogy, by evaluating decreases in expected cash flows after the acquisition date.

The accounting guidance provides for the recognition of a loss allowance for groups of homogeneous loans. The determination for general reserves of the allowance for loan losses includes the following principal factors:

Base net loss rates, which are based on the moving average of annualized net loss rates computed over a 3-year historical loss period for the commercial and construction loan portfolios, and an 18-month period for the consumer and mortgage loan portfolios. The base net loss rates are applied by loan type and by legal entity.

Recent loss trend adjustment, which replaces the base loss rate with a 12-month average loss rate, when these trends are higher than the respective base loss rates. The objective of this adjustment is to allow for a more recent loss trend to be captured and reflected in the ALLL estimation process. As part of the annual review of the components of the ALLL models, as discussed in the following paragraphs and implemented as of June 30, 2014, the Corporation eliminated the use of caps in the recent loss trend adjustment for the consumer and mortgage portfolios, among other enhancements. For the period ended December 31, 2013, the recent loss trend adjustment caps for the consumer and mortgage portfolios were triggered in only one portfolio segment within the Puerto Rico consumer portfolio. Management assessed the impact of the applicable cap through a review of qualitative factors that specifically considered the drivers of recent loss trends and changes to the portfolio composition. The related effect of the aforementioned cap was immaterial for the overall level of the Allowance for Loan and Lease Losses for the Puerto Rico Consumer portfolio.

For the period ended September 30, 2014, 33% (September 30, 2013 - 12%) of the ALLL for BPPR non-covered loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, revolving lines, personal and auto loan portfolios for 2014 and in the commercial multi-family, leasing, and auto loan portfolios for 2013.

For the period ended September 30, 2014, 12% (September 30, 2013 - 23%) of the ALLL for BPNA loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial and industrial loan portfolio for 2014 and in the commercial multi-family, commercial real estate non-owner occupied, commercial and industrial and legacy loan portfolios for 2013.

For the period ended December 31, 2013, 27% (December 31, 2012 - 32%) of the ALLL for BPPR non-covered loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, leasing, and auto loan portfolios for 2013.

For the period ended December 31, 2013, 29% (December 31, 2012 - 8%) of the ALLL for BPNA loan portfolios utilized the recent loss trend adjustment instead of the base loss. The effect of replacing the base loss with the recent loss trend adjustment was mainly concentrated in the commercial multi-family, commercial real estate non-owner occupied, commercial and industrial and legacy loan portfolios for 2013.

Environmental factors, which include credit and macroeconomic indicators such as unemployment rate, economic activity index and delinquency rates, adopted to account for current market conditions that are likely to cause estimated credit losses to differ from historical losses. The Corporation reflects the effect of these environmental factors on each loan group as an adjustment that, as appropriate, increases the historical loss rate

applied to each group. Environmental factors provide updated perspective on credit and economic conditions. Regression analysis is used to select these indicators and quantify the effect on the general reserve of the allowance for loan losses.

During the second quarter of 2014, management completed the annual review of the components of the ALLL models. As part of this review management updated core metrics and revised certain components related to the estimation process for evaluating the adequacy of the general reserve of the allowance for loan losses. These enhancements to the ALLL methodology, which are described in the paragraphs below, were implemented as of June 30, 2014 and resulted in a net decrease to the allowance for loan losses of $18.7 million for the non-covered portfolio and a net increase to the allowance for loan losses of $0.8 million for the covered portfolio.

Management made the following principal enhancements to the methodology during the second quarter of 2014:

Annual review and recalibration of the environmental factors adjustment. The environmental factor adjustments are developed by performing regression analyses on selected credit and economic indicators for each applicable loan segment. During the second quarter of 2014, the environmental factor models used to account for changes in current credit and macroeconomic conditions were reviewed and recalibrated based on the latest applicable trends. Management also revised the application of environmental factors to the historical loss rates to consider last 12 month trends of the

applicable credit and macroeconomic indicators applied as an incremental adjustment to account for emerging risks not necessarily considered in the historical loss rates.

The combined effect of the aforementioned recalibration and enhancements to the environmental factors adjustment resulted in a decrease to the allowance for loan losses of $17 million at June 30, 2014, of which $14.1 million related to the non-covered BPPR portfolio and $3.7 million related to the BPNA segment, offset in part by a $0.8 million increase in the BPPR covered portfolio.

Increased the historical look-back period for determining the recent loss trend adjustment for consumer and mortgage loans. The Corporation increased the look-back period for assessing recent trends applicable to the determination of consumer and mortgage loan net charge-offs from 6 months to 12 months and eliminated the use of caps. Previously, the Corporation used a recent loss trend adjustment based on 6 months of net charge-offs up to a determined cap. Given the current overall consumer and mortgage credit quality improvements, management concluded that a 12-month look-back period for the recent loss trend adjustment aligns the Corporation s allowance for loan losses methodology to current credit quality trends while limiting excessive pro-cyclicality given the longer look-back period analysis, thus, eliminating the aforementioned caps.

The combined effect of the aforementioned enhancements to the recent loss trend adjustment resulted in a decrease to the allowance for loan losses of $1 million at June 30, 2014, of which $0.9 million related to the non-covered BPPR segment and $0.1 million related to the BPNA segment.

Discontinued Operations

Components of the Corporation that will be disposed of by sale, where the Corporation does not have a significant continuing involvement in the operations after the disposal, are accounted for as discontinued operations. The results of operations of the discontinued operations exclude allocations of corporate overhead. Refer to Note 3, Discontinued Operations, for additional information on the discontinued operations.

NET INTEREST INCOME

Net interest income, on a taxable equivalent basis, for the quarter and nine months ended September 30, 2014 as compared to the same periods in 2013, segregated by major categories of interest earning assets and interest bearing liabilities, is presented on Tables 2 and 3 with its different components.

Interest earning assets include investment securities and loans that are exempt from income tax, principally in Puerto Rico. The main sources of tax-exempt interest income are certain investments in obligations of the U.S. Government, its agencies and sponsored entities, and certain obligations of the Commonwealth of Puerto Rico and its agencies. To facilitate the comparison of all interest related to these assets, the interest income has been converted to a taxable equivalent basis, using the applicable statutory income tax rates for each quarter. The taxable equivalent computation considers the interest expense disallowance required by the Puerto Rico tax law.

Average outstanding securities balances are based upon amortized cost excluding any unrealized gains or losses on securities available-for-sale. Non-accrual loans have been included in the respective average loans and leases categories. Loan fees collected and costs incurred in the origination of loans are deferred and amortized over the term of the loan as an adjustment to interest yield. Prepayment penalties, late fees collected and the amortization of premiums / discounts on purchased loans are also included as part of the loan yield.

In connection with the restructuring of its U.S. mainland operations, during the third quarter of 2014 the Corporation refinanced approximately $638 million in long-term structured repos in the U.S. with a yield of 4.41% and replaced them with lower cost short-term repos of a similar amount. The fees associated with the refinancing of these repos were $39.7 million, of which $20.7 million were recorded as interest expense during the third quarter of 2014, with remainder to be recorded during the fourth quarter of 2014.

Taxable equivalent net interest income was $345.7 million for the third quarter of 2014. Excluding the impact of the $20.7 million in fees related to the structured repo refinancing at BPNA, net interest income on a taxable equivalent basis was $366.4 million for the third quarter of 2014, an increase of $22.5 million compared to the same quarter of 2013. Net interest margin for the third quarter of

2014 was 4.62%. The adjusted net interest margin for the third quarter of 2014 was 4.90% compared to 4.63% for the same quarter of 2013, an increase of 27 basis points. The main reasons for the increase are described below.

A decrease in interest expense of $20.5 million, or 676 basis points related to TARP funds which were repaid in full on July 2, 2014, partially offset by a higher cost of medium- and long-term debt of $3.6 million, or 40 basis points, driven by the $450 million in Senior Notes issued during the third quarter of 2014 to partially fund the repayment of TARP funds.

Higher interest income from mortgage loans by $5.2 million, or 31 basis points, mainly due to the reversal of $5.9 million of interest from the reverse mortgage portfolio at BPPR, which had been accrued in excess of the amount insured by FHA, during the third quarter of 2013.

Higher interest income from consumer loans by $2.9 million, related to loans purchased at the end of the first quarter 2014 and higher volume of auto loans due to higher lending activity at Popular Auto.

A lower average cost of interest bearing deposits by 6 basis points, mainly due to lower cost certificates of deposits and Individual Retirement Accounts as these come due and replaced by lower rate deposits; also lower volume of broker CDs due to lower funding needs.

These favorable variances were partially offset by:

Lower average volume of covered loans by $392 million, partially offset by a higher yield by 82 basis points mainly due to a reduction in expected losses resulting from the recasting process. The interest income from covered loans also decreased due to the impact of the change in the estimated life of certain commercial loans that resulted in the extension of the period in which the accretion of income will be recorded, which had a negative impact of approximately $7.6 million during the third quarter of 2014. Although the total estimated cash flows for the life of these loans increased, the nominal interest income was reduced for each reporting period, thus lowering the yield.

Note: The changes that are not due solely to volume or rate are allocated to volume and rate based on the proportion of the change in each category.

[1] Includes interest bearing demand deposits corresponding to certain government entities in Puerto Rico.
[2] Cost of short-term borrowings excludes the impact of the fees related to PCB repo restructuring. Cost of short-term borrowings for the third quarter of 2014 including such fees would have been 6.10%.
[3] Junior subordinated deferrable interest debentures.

Taxable equivalent net interest income was $675.9 million, for the nine-month period ended September 30, 2014. Excluding the impact of the $20.7 million in fees related to the refinancing of structured repos at BPNA and the $414.1 million of accelerated amortization of the discount and deferred costs related to the TARP repayment in the second quarter of 2014, the net interest income on a taxable equivalent basis was $1.1 billion for the nine-month period ended September 30, 2014, an increase of $74.8 million compared to the same period of 2013. Net interest margin for the nine-month period ended September 30, 2014 was 3.00%. The adjusted net interest margin for the nine-month period ended September 30, 2014 was 4.92% compared to 4.64% for the same period of 2013, an increase of 28 basis points. The main reasons for the increase are described below.

Higher yield from covered loans by 233 basis points, partially offset by lower average volume by $476 million. This increase in yield is related to a reduction in expected losses resulting from the recasting process, and the impact of the change in estimated life of certain commercial loans, during the third quarter of 2014, that resulted in a negative impact of approximately $7.6 million, as mentioned above.

Higher interest income from commercial loans by $8.8 million mainly due to higher average volume by $130 million and higher yield by 7 basis points.

Higher interest income from mortgage loans by $3.2 million, or 7 basis points, mainly due to the reversal of $5.9 million of interest from the reverse mortgage portfolio at BPPR, which had been accrued in excess of the amount insured by FHA, during the third quarter of 2013.

Higher interest income from consumer loans by $5.7 million, or 11 basis points, related to loans purchased at the end of the first quarter 2014 and higher volume of auto loans due to higher lending activity at Popular Auto.

Table of Contents

Lower average cost of interest bearing deposits by $16.6 million, or 11 basis points, mainly due to lower cost certificates of deposits.

Lower interest expense upon TARP repayment by $18.2 million.

Lower cost of medium and long-term debt by $7.0 million, or 66 basis points, due to the early repayment of $233.2 million in senior notes during the third quarter of 2013 with an average cost of approximately 7.77%, partially offset by the issuance, on July 1, 2014 of $450 million of Senior Notes bearing interest at 7% to partially fund the TARP repayment as mentioned above.
