## FRIEDMAN INDUSTRIES, INCORPORATED

**CONDENSED NOTES TO QUARTERLY REPORT    UNAUDITED****NOTE A    BASIS OF PRESENTATION**

The accompanying unaudited, condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes of Friedman Industries, Incorporated (the Company ) included in its annual report on Form 10-K for the year ended March 31, 2015.

**NOTE B    INVENTORIES**

Inventories consist of prime coil, non-standard coil and tubular materials. Prime coil inventory consists primarily of raw materials, non-standard coil inventory consists primarily of raw materials, and tubular inventory consists of both raw materials and finished goods. Inventories are valued at the lower of cost or replacement market. Cost for prime coil inventory is determined using the last-in, first-out ( LIFO ) method. Cost for non-standard coil inventory is determined using the specific identification method. Cost for tubular inventory is determined using the weighted average method.

A summary of inventory values by product group follows:

|                             | <b>June 30,<br/>2015</b> | <b>March 31,<br/>2015</b> |
|-----------------------------|--------------------------|---------------------------|
| Prime Coil Inventory        | \$ 9,778,816             | \$ 8,419,340              |
| Non-Standard Coil Inventory | 1,521,315                | 1,804,635                 |
| Tubular Raw Material        | 1,247,618                | 1,888,849                 |
| Tubular Finished Goods      | 27,622,083               | 28,737,842                |
|                             | <b>\$ 40,169,832</b>     | <b>\$ 40,850,666</b>      |

**NOTE C    DEBT**

On May 8, 2015, the Company entered into a credit arrangement for a \$5,000,000 revolving line of credit facility (the Credit Facility ) with JPMorgan Chase Bank N.A. The Credit Facility expires on April 30, 2016. The Credit Facility contains financial covenants that require the Company to not permit: tangible net worth to be less than \$57,000,000, ratio of total liabilities to tangible net worth to be greater than 1.00 to 1.00 and net income for any period of four consecutive fiscal quarters to be less than \$1.00. At June 30, 2015, the Company did not have borrowings outstanding under the Credit Facility.

Corporate expenses reflect general and administrative expenses not directly associated with segment operations and consist primarily of corporate executive and accounting salaries, professional fees and services, bad debts, profit sharing expense, corporate insurance expenses and office supplies. Corporate assets consist primarily of cash and the cash value of officers' life insurance.

**NOTE E SUPPLEMENTAL CASH FLOW INFORMATION**

The Company paid income taxes of approximately \$29,500 and \$93,000 in the quarters ended June 30, 2015 and 2014, respectively. No interest was paid in the quarters ended June 30, 2015 and 2014, respectively. Noncash financing activities consisted of accrued dividends of \$67,994 and \$135,989 in the quarters ended June 30, 2015 and 2014, respectively.

**NOTE F INCOME TAXES**

The Company's effective tax rate for the quarter ended June 30, 2015 approximated the statutory rate. The Company's effective tax rate for the quarter ended June 30, 2014 differed from the statutory rate due primarily to a change in estimate related to state income taxes payable as of March 31, 2014.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****Results of Operations***Three Months Ended June 30, 2015 Compared to Three Months Ended June 30, 2014*

During the three months ended June 30, 2015, sales and costs of goods sold decreased \$3,935,952 and \$5,035,784, respectively, and gross profit increased \$1,099,832 from the comparable amounts recorded during the three months ended June 30, 2014. The decrease in sales resulted from both a decline in tons sold and a decrease in the average selling price. Tons sold declined from approximately 39,000 tons in the 2014 quarter to approximately 38,000 tons in the 2015 quarter. The average per ton selling price decreased from approximately \$710 per ton in the 2014 quarter to approximately \$627 per ton in the 2015 quarter. The decrease in costs of goods sold was related primarily to a decline in the average per ton cost from approximately \$684 per ton in the 2014 quarter to approximately \$571 per ton in the 2015 quarter. The increase in gross profit was related primarily to improved margins earned on sales. Gross profit as a percentage of sales increased from approximately 3.7% in the 2014 quarter to approximately 8.9% in the 2015 quarter due primarily to improved market conditions for coil segment products.

Coil product segment sales increased approximately \$1,442,000 during the 2015 quarter. This increase was related to an increase in coil tons sold partially offset by a decline in the average per ton selling price. Tons sold increased from

approximately 24,000 tons in the 2014 quarter to approximately 30,500 tons in the 2015 quarter. The improvement in coil segment sales volume was primarily attributable to sales to customers manufacturing products used in the commercial freight industry. The average per ton selling price decreased from approximately \$745 per ton in the 2014 quarter to approximately \$633 per ton in the 2015 quarter. The average per ton cost of coil products sold decreased from approximately \$746 per ton in the 2014 quarter to approximately \$551 per ton in the 2015 quarter. Coil segment operations recorded an operating profit of approximately \$2,155,000 in the 2015 quarter and an operating loss of approximately \$404,000 in the 2014 quarter. In the 2015 quarter, the coil segment results benefitted from a decline in the cost of hot-rolled steel coils and an increase in tons sold. In addition, the average selling price per ton of coil products declined 15% while the average cost per ton declined 26%, resulting in improved margins earned on sales during the 2015 quarter. The Company continues to experience intense competition for sales due to the general availability of both domestic and foreign hot-rolled sheet and plate.

The Company is primarily dependent on Nucor Steel Company ( NSC ) for its supply of coil inventory. In the 2015 quarter, NSC continued to supply the Company with steel coils in amounts that were adequate for the Company's purposes. The Company does not currently anticipate any significant change in such supply from NSC. Loss of NSC as a supplier could have a material adverse effect on the Company's business.

Tubular product segment sales decreased approximately \$5,378,000 during the 2015 quarter. This decrease resulted from both a decrease in the average per ton selling price and a decline in tons sold. The average per ton selling price of tubular products decreased from approximately \$656 per ton in the 2014 quarter to approximately \$601 per ton in the 2015 quarter. Tons sold declined from approximately 15,000 tons in the 2014 quarter to approximately 8,000 tons in the 2015 quarter. Tubular segment operations recorded

## **Table of Contents**

an operating loss of approximately \$637,000 in the 2015 quarter and an operating profit of approximately \$772,000 in the 2014 quarter. Tubular segment results for the 2015 quarter were negatively impacted by low market prices and reduced demand for the Company's products used in the oil and gas industry. In the 2015 quarter, the Company experienced a reduction in tons produced, which had the effect of increasing the per ton cost of production and decreasing margins earned. Management believes the lower demand for its tubular products is related to soft market conditions created by oversupply, foreign competition and a decline in the U.S. energy business.

U. S. Steel Tubular Products, Inc. ( USS ) is the Company's primary supplier of tubular products and coil material used in pipe manufacturing and is a major customer of finished tubular products. Certain finished tubular products used in the energy business are manufactured by the Company and sold to USS. Loss of USS as a supplier or customer could have a material adverse effect on the Company's business. The Company can make no assurances as to orders from USS or the amounts of pipe and coil material that will be available from USS in the future.

During the 2015 quarter, general, selling and administrative costs increased \$218,880 from the amount recorded during the 2014 quarter. This increase was related primarily to an increase in bonuses associated with the increased earnings.

Income taxes in the 2015 quarter increased \$238,751 from the amount recorded in the 2014 quarter. This increase was related primarily to the increase in earnings before taxes in the 2015 quarter.

## **FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES**

The Company remained in a strong, liquid position at June 30, 2015. The current ratios were 23.6 at June 30, 2015 and 18.9 at March 31, 2015. Working capital was \$47,558,418 at June 30, 2015, and \$47,466,244 at March 31, 2015.

During the quarter ended June 30, 2015, the Company maintained assets and liabilities at levels it believed were commensurate with operations. Changes in balance sheet amounts occurred in the ordinary course of business. Cash increased primarily as a result of reductions in accounts receivable and inventories partially offset by expenditures related to the construction of the Company's pipe-finishing facility and a decrease in accounts payable. The Company expects to continue to monitor, evaluate and manage balance sheet components depending on changes in market conditions and the Company's operations.

The Company is continuing construction of its pipe-finishing facility in Lone Star, Texas. The Company currently estimates the total construction costs for the facility will be approximately \$9,200,000. As of June 30, 2015, capitalized expenditures related to the construction of the facility totaled approximately \$7,752,000. The Company expects the facility to be completed and operational in the third quarter of fiscal 2016.

The Company entered into a Credit Agreement on May 8, 2015 with JPMorgan Chase Bank N.A. to provide a \$5,000,000 revolving line of credit facility (the Credit Facility ). The Credit Facility expires on April 30, 2016. The Company has not borrowed any amounts under the Credit Facility as of August 13, 2015.

The Company believes that its current cash position along with cash flows from operations and borrowing capability due to its strong balance sheet are adequate to fund its expected cash requirements for the next 24 months.

## **CRITICAL ACCOUNTING POLICIES**

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. One such accounting policy that requires

significant estimates and judgments is the valuation of LIFO inventories in the Company's quarterly reporting. The quarterly valuation of inventory requires estimates of the year end quantities, which is inherently difficult. Historically, these estimates have been materially correct.

#### **FORWARD-LOOKING STATEMENTS**

From time to time, the Company may make certain statements that contain forward-looking information (as defined in the Private Securities Litigation Reform Act of 1996, as amended) and that involve risk and uncertainty. These forward-looking statements may include, but are not limited to, future results of operations, future production capacity, product quality and proposed expansion plans. Forward-looking statements may be made by management orally or in writing including, but not limited to, this Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Company's filings with the U.S. Securities and Exchange Commission (the SEC) under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended (the Exchange Act). Actual results and trends in the future may differ materially depending on a variety of factors including, but not limited to, changes in the demand for and prices of the Company's products, changes in the demand for steel and steel products in general and the Company's success in executing its internal operating plans, including any proposed expansion plans.

**Table of Contents****Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Not Required

**Item 4. Controls and Procedures**

The Company's management, with the participation of the Company's principal executive officer ( CEO ) and principal financial officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act), as of the end of the fiscal quarter ended June 30, 2015. Based on this evaluation, the Company's CEO and principal financial officer have concluded that the Company's disclosure controls and procedures were effective as of the end of the fiscal quarter ended June 30, 2015 to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
