NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1 Basis of Presentation

Management prepared these unaudited interim consolidated financial statements for Zebra Technologies Corporation and subsidiaries (the Company) according to the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial information. These financial statements do not include all of the information and notes required by United States generally accepted accounting principles (GAAP) for complete financial statements, although management believes that the disclosures are adequate to make the information presented not misleading. Therefore, these consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in the Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

In the opinion of the Company, these interim financial statements include all adjustments (of a normal, recurring nature) necessary to present fairly its consolidated balance sheet as of October 3, 2015, the consolidated statements of operations and consolidated statements of comprehensive (loss) income for the three and nine months ended October 3, 2015 and September 27, 2014, and the consolidated statements of cash flows for the nine months ended October 3, 2015 and September 27, 2014. These results, however, are not necessarily indicative of the results expected for the full year.

Reclassifications: Prior-period amounts differ from amounts previously reported because certain immaterial amounts in the prior year's financial statements have been reclassified to conform to the current year's presentation.

Note 2 Recently Issued Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2015-03 *Interest Imputation of Interest* (Subtopic 835-30): *Simplifying the Presentation of Debt Issuance Costs*. This guidance requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by this ASU. This standard is effective for annual periods beginning after December 15, 2015 and interim periods within those annual periods. As permitted, the Company early adopted this ASU beginning in the second quarter of calendar year 2015. The impact of this ASU reduced both long-term assets and long-term debt by \$27.2 million at October 3, 2015. It also reduced long-term assets, short-term debt and long-term debt by \$29.8 million, \$3.3 million, and \$26.5 million, respectively, at December 31, 2014. This ASU has no impact on the consolidated statements of operations or cash flows.

In August 2015, the FASB issued ASU 2015-15 *Interest Imputation of Interest* (Subtopic 835-30): *Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line of Credit Arrangements- Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting (SEC Update)*. This ASU indicates that the guidance in ASU 2015-03, discussed above, does not address presentation or subsequent measurement of debt issuance costs related to line-of-credit arrangements. Given the absence of authoritative guidance within ASU 2015-03, the SEC staff has indicated that they would not object to an entity deferring and presenting debt issuance costs as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit

arrangement. However, in conjunction with ASU 2015-03, the Company has elected to present debt issuance costs associated with its line-of-credit arrangement as a direct deduction from the carrying amount of its total debt liability regardless of whether there are any outstanding borrowings on the line-of-credit arrangement and amortizing these costs using the straight line method over its term. This ASU has no impact on the consolidated statements of operations or cash flows.

In September 2015, the FASB issued ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*, which requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. This update is to be applied prospectively and is effective for interim and annual periods beginning after December 15, 2015 with earlier adoption permitted. The Company elected to early adopt this ASU during the third quarter of 2015. See Note 3 to the Consolidated Financial Statements for additional information.

Table of Contents

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. The core principle is that a company should recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration which the entity expects to receive in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers: Deferral of the Effective Date* which deferred the effective date for all entities by one year so it is now effective for annual periods beginning after December 15, 2017 and interim periods within those annual periods. Management is still assessing the impact of adoption on its consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, *Intangibles Goodwill and Other Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement*. This update provides guidance to customers about whether a cloud computing arrangement includes a software license or should be accounted for differently. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance will not change generally accepted accounting principles for a customer's accounting for service contracts. This update is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Management is still assessing the impact of adoption on its consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory*, which changes the measurement principle for inventory from the lower of cost or market to the lower of cost or net realizable value for entities that measure inventory using first-in, first-out (FIFO) or average cost. Net realizable value is defined as the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This ASU is effective for fiscal years beginning after December 15, 2016 and for interim periods therein. Management is still assessing the impact of adoption on its consolidated financial statements.

Note 3 Business Combinations

On October 27, 2014, the Company completed its acquisition of the Enterprise Business (Enterprise) from Motorola Solutions Inc. (MSI) for a purchase price of \$3.45 billion (the Acquisition). This transaction positions the Company as a leading technology innovator, with the accelerating convergence of mobility, data analytics and cloud computing. It will enable the Company to further sharpen its strategic focus on providing mission-critical solutions for its customers. Certain assets and liabilities historically associated with the Enterprise business were retained by MSI, including MSI's iDEN infrastructure business. The Acquisition was pursuant to the Master Acquisition Agreement dated April 14, 2014, as amended (the Master Acquisition Agreement) and was structured as a combination of stock and asset acquisitions and a merger of certain US entities, resulting in 100% ownership of Enterprise.

The Company financed the Acquisition through a combination of cash on hand and borrowings of \$3.25 billion (the Indebtedness), including the sale of 7.25% senior notes due 2022 with an aggregate principal amount of \$1.05 billion (the Senior Notes) and a credit agreement with various lenders that provided a term loan of \$2.2 billion (the Term Loan) due 2021. See Note 13 Long-Term Debt. Consideration was paid in the form of cash to MSI in the amount of \$3.45 billion.

During the nine months ended October 3, 2015, the Company paid additional consideration of \$50.9 million to MSI in relation to the opening cash balance and settlement of working capital.

Acquired goodwill represents the consideration paid in excess of the fair value of the net tangible and intangible assets acquired. The Company paid this premium for a number of reasons, including acquiring an experienced workforce and enhanced technology capabilities as further described above. Currently, goodwill is assigned to the Enterprise segment. The final valuation of deferred income taxes as well as the assignment of goodwill to reporting units has not been completed as of the date these financial statements are issued.

The purchase price was allocated to identifiable tangible and intangible assets acquired and liabilities assumed based on their estimated fair values resulting in goodwill of \$2.335 billion. See Note 7 Goodwill and Other Intangibles. During 2015, the Company adjusted certain preliminary values. The fair value adjustments resulted in a decrease of \$14.0 million in assets, a decrease of \$6.4 million in liabilities and a corresponding increase to goodwill of \$7.6 million. Certain intangible assets including goodwill are denominated in foreign currency and, as such, include the effects of foreign currency translation.

Table of Contents

The following table summarizes the preliminary estimated fair values of the assets acquired and the liabilities assumed at the date of acquisition (in thousands):

- (1) Based on the purchase price allocations, accounts receivable estimated fair value is \$439.8 million and gross contractual value is \$460.6 million. The difference represents the Company's best estimate of the contractual cash flows that will not be collected.
- (2) Other current liabilities include accounts payable, customer reserves, and employee compensation and related benefits.

ASU 2015-16 Business Combinations (Topic 805):Simplifying the Accounting for Measurement-Period Adjustments

During September 2015, the Company received a revised valuation report from a third party valuation firm. After reviewing the results of the valuation reports, the Company reduced the value of intangible assets \$20.0 million, property and equipment \$2.8 million and deferred revenue \$0.4 million and increased inventory \$1.5 million with a corresponding \$21.7 million increase to goodwill. As discussed in Note 2 Recently Issued Accounting Pronouncements, the Company has adopted ASU 2015-16 *Business Combinations (Topic 805):Simplifying the Accounting for Measurement-Period Adjustments*, which requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined.

The following table summarizes the fair value balance sheet adjustments recorded during the third quarter of 2015 as well as the amount of adjustments to the current period income statement line items relating to the income effects that would have been recognized in previous periods if the adjustments to provisional amounts were recognized as of the acquisition date (in thousands):

Table of Contents**Note 4 Fair Value Measurements**

Financial assets and liabilities are to be measured using inputs from three levels of the fair value hierarchy in accordance with ASC Topic 820, *Fair Value Measurements*. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into the following three broad levels:

Level 1: Quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.

Level 2: Observable prices that are based on inputs not quoted on active markets but corroborated by market data.

Level 3: Unobservable inputs are used when little or no market data is available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. In addition, the Company considers counterparty credit risk in the assessment of fair value.

Financial assets and liabilities carried at fair value as of October 3, 2015, are classified below (in thousands):

Table of Contents

- (1) The fair value of forward contracts is calculated as follows:
- Fair value of a collar or put option contract associated with forecasted sales hedges is calculated using bid and ask rates for similar contracts.
 - Fair value of regular forward contracts associated with forecasted sales hedges is calculated using the period-end exchange rate adjusted for current forward points.
 - Fair value of hedges against net assets is calculated at the period end exchange rate adjusted for current forward points unless the hedge has been traded but not settled at period end. If this is the case, the fair value is calculated at the rate at which the hedge is being settled.
- (2) The fair value of forward interest rate swap is based upon a valuation model that uses relevant observable market inputs at the quoted intervals, such as forward yield curves, and is adjusted for the Company's own credit risk and the interest rate swap terms.
- (3) Includes investments in notes issued by the Federal Home Loan Mortgage Corporation and the Federal Home Loan Bank.

Certain intangible assets including goodwill are denominated in foreign currency and, as such, include the effects of foreign currency translation.

In 2014, the Company acquired goodwill in the amount of \$2.335 billion. See Note 3 Business Combinations for specific information regarding the Acquisition.

In the fourth quarter of 2013, the Company acquired all of the outstanding membership interests in Hart Systems, LLC (Hart). Hart which is a component within our Retail Solutions Group reporting unit, with total goodwill of \$58.6 million as of October 3, 2015, performs its annual impairment test as of the first day of our fourth quarter. During the third quarter of 2015, management identified an indicator of impairment within the Retail Solutions Group reporting unit based on a change in forecasted revenue and earnings results. Based on this event, management performed step one of the goodwill impairment test in accordance with ASC 350, Intangibles Goodwill and Other, on the Retail Solutions Group as of October 3, 2015. Based on this analysis, management determined that the fair value was less than the carrying value of the net assets for this reporting unit. The Company has not yet completed step two of the impairment test, and, as of the filing date of this Form 10-Q, impairment is possible but is not reasonably estimable.

Liabilities related to exit and restructuring activities are included in accrued liabilities and other long-term liabilities. Payments of the related, long-term liabilities will be completed by October 2024.

Table of Contents**Note 11 Derivative Instruments**

The Company conducts business on a multinational basis in a wide variety of foreign currencies; as such, the Company manages these risks using derivative financial instruments. The exposure to market risk for changes in foreign currency exchange rates arises from cross-border financing activities between subsidiaries and foreign currency denominated monetary assets and liabilities. The objective is to preserve the economic value of non-functional currency denominated cash flows. Therefore, the goal is to hedge transaction exposures with natural offsets to the fullest extent possible and, once these opportunities have been exhausted, through foreign exchange forward and option contracts with third parties.

The Company entered into a credit agreement which provides for a term loan of \$2.2 billion (Term Loan) and a revolving credit facility of \$250.0 million (Revolving Credit Facility). See Note 13 Long-Term Debt. As such, the Company has exposure to market risk for changes in interest expense calculated off of variable interest rates on the term facility that was used to fund the Acquisition. The Company entered into forward interest rate swaps to hedge a portion of the interest rate risk associated with the Term Loan.

The fair value of the forward starting interest rate swap contracts is estimated using market quoted forward interest rates for the London Interbank Offered Rate (LIBOR) at the balance sheet date and the application of such rates subject to the interest rate swap terms. In accordance with ASC 815, *Derivative and Hedging*, the Company recognizes derivative instruments as either assets or liabilities on the balance sheet and measures them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated as and qualifies for hedge accounting. The Company's master netting and other similar arrangements with the respective counterparties allow for net settlement under certain conditions, which are designed to reduce credit risk by permitting net settlement with the same counterparty.

Credit and Market Risk

Financial instruments, including derivatives, expose the Company to counterparty credit risk for nonperformance and to market risk related to interest and currency exchange rates. The Company manages its exposure to counterparty credit risk through specific minimum credit standards, diversification of counterparties, and procedures to monitor concentrations of credit risk. Its counterparties in derivative transactions are commercial banks with significant experience using derivative instruments. The Company monitors the impact of market risk on the fair value and cash flows of its derivative and other financial instruments considering reasonably possible changes in interest rates and currency exchange rates and restricts the use of derivative financial instruments to hedging activities. The Company continually monitors the creditworthiness of its customers to which it grants credit terms in the normal course of business. The terms and conditions of the Company's credit sales are designed to mitigate or eliminate concentrations of credit risk with any single customer.

Fair Value of Derivative Instruments

The Company has determined that derivative instruments for hedges that have traded but have not settled are considered Level 1 in the fair value hierarchy, and hedges that have not traded are considered Level 2 in the fair value hierarchy. Derivative instruments are used to manage risk and are not used for trading or other speculative purposes, nor does the Company use leveraged derivative financial instruments. The foreign currency exchange contracts are valued using broker quotations or market transactions, in either the listed or over-the-counter markets.

Hedging of Net Assets

The Company uses forward contracts to manage exposure related to its British Pound, Canadian Dollar, Czech Koruna, Brazilian Real, Malaysian Ringgit and Euro denominated net assets. Forward contracts typically mature within three months after execution of the contracts. The Company records monetary gains and losses on these contracts and options in income each quarter along with the transaction gains and losses related to its net asset positions, which would ordinarily offset each other.

Summary financial information related to these activities included in the Company's consolidated statements of operations as other (expense) income is as follows (in thousands):

Hedging of Anticipated Sales

The Company manages the exchange rate risk of anticipated Euro denominated sales using put options, forward contracts, and participating forwards. The Company designates these contracts as cash flow hedges which mature within twelve months after the execution of the contracts. Gains and losses on these contracts are deferred in other comprehensive income until the contracts are settled and the hedged sales are realized. The deferred gain or loss will then be reported as an increase or decrease to sales.

Forward Interest Rate Swaps

The forward interest rate swaps hedge the interest rate risk associated with the variable interest payments on the Company's Term Loan that was used to fund the Acquisition.

In June 2014, the Company entered into a commitment letter for a new variable rate credit facility to fund the Acquisition and also entered into two tranches of floating-to-fixed forward interest rate swaps (Original Swaps). These Original Swaps were used to economically hedge interest rate risk associated with the variable rate commitment until July 30, 2014, and as such, changes in their fair value were recognized in earnings in other (expense) income. Effective July 30, 2014, the Original Swaps were designated as cash flow hedges of interest rate exposure associated with variability in future cash flows on the variable rate commitment. On October 27, 2014, the variable rate commitment was funded and the Company entered into a Term Loan that accrues interest at a variable rate of LIBOR (subject to a floor of 0.75% per annum) plus a margin of 4.0%. On October 30, 2014, the Company discontinued hedge accounting for the Original Swaps due to the syndication of the Original Swaps to a group of commercial banks (Syndicated Swaps), which resulted in their termination. The changes in fair value of the Original Swaps between July 30, 2014 and their termination were included in other comprehensive (loss) income and any ineffectiveness was insignificant. The amounts included in other comprehensive (loss) income will be amortized to earnings in other (expense) income as the interest payments under the Term Loan affect earnings. The Syndicated Swaps were not designated as hedges and the changes in fair value are recognized in earnings in other (expense) income.

On November 20, 2014, the Company entered into additional floating-to-fixed forward starting interest rate swaps (New Swaps) and designated these as cash flow hedges of interest rate exposure associated with variability in future cash flows on its Term Loan. To offset the impact to earnings of the changes in fair value of the Syndicated Swaps, the Company also entered into fixed-to-floating forward starting interest rate swaps (Offsetting Swaps), which were not designated in a hedging relationship and the changes in the fair value are recognized in earnings in other income (expense). Changes in fair value of the New Swaps that are designated as cash flow hedges and are effective at offsetting variability in the future cash flows on the Company's Term Loan are recognized in other comprehensive (loss) income. Ineffectiveness is immediately recognized in earnings.

The balance sheet position of the forward interest rate swaps designated in a hedge relationship is as follows (in thousands):

		As of
	October 3, 2015	December 31, 2014
Accrued liabilities	\$ 633	\$ 0
Other long-term liabilities	20,098	2,170
Hedge effectiveness	100%	100%

The forward interest rate swaps not designated in a hedging relationship are recorded in a net liability position of \$11.2 million as of October 3, 2015 and \$14.5 million December 31, 2014 in the Consolidated Balance Sheets.

Table of Contents

The gross and net amounts offset at October 3, 2015 were as follows (in thousands):

No significant (loss) gain was reclassified from accumulated other comprehensive (loss) income into interest expense on the forward interest rate swaps designated in a hedging relationship during the three and nine month periods ended October 3, 2015 and September 27, 2014.

Table of Contents

At October 3, 2015, the Company expects that approximately \$10.5 million in losses on the forward interest rate swaps designated in a hedging relationship will be reclassified from accumulated other comprehensive loss into earnings during the next four quarters.

Note 12 Warranty

In general, the Company provides warranty coverage of one year on Enterprise's mobile computers and WLAN products. Advanced data capture products are warranted from one to five years, depending on the product. Printers are warranted for one year against defects in material and workmanship. Thermal printheads are warranted for six months and batteries are warranted for one year. Battery-based products, such as location tags, are covered by a ninety-day warranty. A provision for warranty expense is recorded at the time of sale and is adjusted quarterly based on historical warranty experience.

The following table is a summary of the Company's accrued warranty obligation (in thousands):

	Nine Months Ended

Balance at the end of period	\$ 23,991	\$ 4,425

Note 13 Long-Term Debt*Private Offering*

On October 15, 2014, the Company completed a private offering of \$1.05 billion aggregate principal of 7.25% Senior Notes due October 15, 2022. The Senior Notes yielded an effective interest rate of 7.61% at issuance. The Senior Notes are governed by the terms of an indenture, dated as of October 15, 2014, by and among the Company and U.S. Bank National Association, as Trustee. Interest on the Senior Notes is payable in cash on April 15 and October 15 of each year.

The Indenture covering the Senior Notes contains certain various restrictive and affirmative covenants. In addition, the Senior Notes are guaranteed jointly and severally, on a senior and unsecured basis by the Company's direct and indirect wholly-owned existing and future domestic restricted subsidiaries, subject to certain exceptions.

Credit Facilities

Borrowings under the Term Loan bear interest at a variable rate plus an applicable margin, subject to an all-in floor of 4.75%. As of October 3, 2015, the Term Loan interest rate was 4.75%. Interest payments are payable quarterly. The Company has entered into interest rate swaps to manage interest rate risk on its long-term debt. See Note 11 Derivative Instruments.

The credit agreement requires the Company to prepay the Term Loan and Revolving Credit Facility, under certain circumstances or transactions defined in the credit agreement. Also, the Company may make optional prepayments of

the Term Loans, in whole or in part, without premium or penalty. The Company made such optional principal prepayments of \$130.0 million during the nine months ended October 3, 2015. On November 3, 2015, the Company made an additional optional principal prepayment of \$20.0 million. Unless satisfied by further optional prepayments, the Company is required to make a scheduled principal payment of \$2.05 billion due on October 27, 2021.

The Revolving Credit Facility is available for working capital and other general corporate purposes including letters of credit. The amount (including letters of credit) shall not exceed \$250.0 million. As of October 3, 2015, the Company had established letters of credit amounting to \$3.2 million, which reduced funds available for other borrowings under the agreement to \$246.8 million. The Revolving Credit Facility will mature and the commitments thereunder will terminate on October 27, 2019.

Borrowings under the Revolving Credit Facility bear interest at a variable rate plus an applicable margin. As of October 3, 2015, the Revolving Credit Facility interest rate was 3.25%. Interest payments are payable quarterly. As of October 3, 2015 and December 31 2014, the Company did not have any borrowings against the Revolving Credit Facility.

Table of Contents

The Credit Facilities contains various restrictive and affirmative covenants and are collateralized by a security interest in substantially all of the Company's assets as defined in the security agreement and guaranteed by its direct and indirect wholly-owned existing and future domestic restricted subsidiaries, subject to certain exceptions.

The following table summarizes the carrying value of the Company's debt (in thousands):

	As of	
	October 3, 2015	December 31, 2014
Senior Notes	\$ 1,050,000	\$ 1,050,000
Term Loan	2,070,000	2,200,000
Less debt issuance costs	(27,196)	(29,785)

Total outstanding debt	3,043,225	3,160,699
Current maturities of long-term debt	0	16,500
Less: current portion of unamortized discounts	0	(8,978)
Less: current portion of debt issuance costs	0	(3,313)
Total short-term debt	0	4,209
Long-term debt, less current maturities	\$ 3,043,225	\$ 3,156,490

The estimated fair value of the Company's long-term debt approximated \$3.2 billion at October 3, 2015 and \$3.3 billion at December 31, 2014. These fair value amounts represent the estimated value at which the Company's lenders could trade its debt within the financial markets and does not represent the settlement value of these long-term debt liabilities to the Company. The fair value of the long-term debt will continue to vary each period based on fluctuations in market interest rates, as well as changes to the Company's credit ratings. This methodology resulted in a Level 2 classification in the fair value hierarchy.

Note 14 Contingencies

The Company is subject to a variety of investigations, claims, suits and other legal proceedings that arise from time to time in the ordinary course of business, including but not limited to, intellectual property, employment, tort and breach of contract matters. The Company currently believes that the outcomes of such proceedings, individually and in the aggregate, will not have a material adverse impact on its business, cash flows, financial position, or results of operations. Any legal proceedings are subject to inherent uncertainties, and the Company's view of these matters and its potential effects may change in the future.

In re Symbol Technologies, Inc. Securities Litigation

In connection with the Acquisition, the Company acquired Symbol Technologies, Inc., a subsidiary of Motorola Solutions. A putative federal class action lawsuit, Waring v. Symbol Technologies, Inc., et al., was filed on August 16, 2005 against Symbol Technologies, Inc. and two of its former officers in the United States District Court for the Eastern District of New York by Robert Waring. After the filing of the Waring action, several additional purported class actions were filed against Symbol and the same former officers making substantially similar allegations (collectively, the New Class Actions). The Waring action and the New Class Actions were consolidated for all

purposes and on April 26, 2006, the Court appointed the Iron Workers Local # 580 Pension Fund as lead plaintiff and approved its retention of lead counsel on behalf of the putative class. On August 30, 2006, the lead plaintiff filed a Consolidated Amended Class Action Complaint (the Amended Complaint), and named additional former officers and directors of Symbol as defendants. The lead plaintiff alleges that the defendants misrepresented the effectiveness of Symbol s internal controls and forecasting processes, and that, as a result, all of the defendants violated Section 10(b) of the Securities Exchange Act of 1934 (the Exchange Act) and the individual defendants violated Section 20(a) of the Exchange Act. The Amended Complaint alleges that it was damaged by the decline in the price of Symbol s stock following certain purported corrective disclosures and seeks unspecified damages. By orders entered on June 25 and August 3, 2015, the court granted lead plaintiff s motion for class certification, certifying a class of investors that includes those that purchased Symbol common stock between April 29, 2003 and August 1, 2005. The parties have substantially completed fact discovery. Pursuant to the Court s current scheduling order, expert discovery is expected to be completed by January 15, 2016, and dispositive motions are to be filed by February 12, 2016. The Company establishes an accrued liability for loss contingencies related to legal matters when the loss is both probable and estimable. In addition, for some matters for which a loss is probable or reasonably possible, an estimate of the amount of loss or range of loss is not possible, and we may be unable to estimate the possible loss or range of losses that could potentially result from the application of non-monetary remedies. Currently, the Company is unable to reasonably estimate the amount of reasonably possible losses for this matter.

Note 16 Share-Based Compensation

The Company has share-based compensation and employee stock purchase plans under which shares of the Company's common stock are available for future grants and sales. The Company recognizes compensation costs using the straight-line method over the vesting period upon grant of up to five years.

Pre-tax share-based compensation expense recognized in the statements of operations was \$26.4 million and \$10.3 million for the nine-month periods ended October 3, 2015 and September 27, 2014, respectively. Tax related benefits of \$8.9 million and \$3.5 million were also recognized for the nine-month periods ended October 3, 2015 and

September 27, 2014, respectively.

The Company issued 458,823 and 564,815 shares in connection with share-based compensation and employee stock purchase programs during the nine months ended October 3, 2015 and September 27, 2014 respectively.

Table of Contents

The fair value of share-based compensation is estimated on the date of grant using a binomial model. Volatility is based on an average of the implied volatility in the open market and the annualized volatility of the Company's stock prices over its entire stock history. Stock option grants in the table below include both stock options, all of which were non-qualified, and stock appreciation rights (SARs) that will be settled in the Company stock or cash. Restricted stock grants are valued at the market closing price on the grant date. The following table shows the weighted-average assumptions used for grants of SARs as well as the fair value of the grants based on those assumptions:

Note 17 Income Taxes

The Company recognized a tax benefit of \$5.9 million for the nine-months ended October 3, 2015 compared to a tax expense of \$25.2 million for the corresponding period in the prior year. The Company's effective tax rates were 4.3% and 23.1% as of October 3, 2015 and September 27, 2014, respectively. The Company's effective tax rate was lower than the federal statutory rate of 35% primarily due to pre-tax losses in the United States and corporate structure alignment initiatives in various non-US jurisdictions.

Since the date of the Enterprise acquisition, as part of its corporate initiatives of integrating the Enterprise business, the Company has been executing its integration plan for the Enterprise business (the Integration Plan). The Company anticipates completing the Integration Plan as soon as practicable and expects that the Integration Plan will allow the combined businesses to achieve further synergies and cost savings associated with the acquisition. As part of the Integration Plan, the Company began realigning certain acquired assets of the Enterprise business with and into the Company's corporate structure and business model.

Table of Contents**Note 18 Other Comprehensive (Loss) Income**

Stockholders' equity includes certain items classified as accumulated other comprehensive (loss) income (AOCI), including:

Unrealized gain (loss) on anticipated sales hedging transactions relate to derivative instruments used to hedge the currency exchange rates for forecasted Euro sales. These hedges are designated as cash flow hedges, and the Company defers income statement recognition of gains and losses until the hedged transaction occurs. See Note 11 Derivative Instruments for more details.

Unrealized gain (loss) on forward interest rate swaps hedging transactions refer to the hedging of the interest rate risk associated with the variable rate commitment entered into for the Acquisition. See Note 11 Derivative Instruments for more details.

Unrealized gain (loss) on investments are deferred from Statement of Operations recognition until the gain or loss are realized.

Foreign currency translation adjustment relates to the Company's non-U.S. subsidiary companies that have designated a functional currency other than the U.S. dollar. The Company is required to translate the subsidiary functional currency financial statements to dollars using a combination of historical, period-end, and average foreign exchange rates. This combination of rates creates the foreign currency translation adjustment component of other comprehensive income.

The components of accumulated other comprehensive (loss) income (AOCI) for the nine months ended October 3, 2015 and September 27, 2014 are as follows (in thousands):

Note 20 Subsequent Events

On November 3, 2015, the Company made principal payments of \$20.0 million under its Term Loan. See Note 13 Long-Term Debt.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Overview

The Company is a global leader respected for innovation and reliability. The Company's Enterprise Asset Intelligence products and services give organizations real-time visibility, actionable insights to drive better decisions and quicker actions and more effective collaboration anytime. Its products and services allow its customers to manage assets, transactions and people more effectively, resulting in improved operational efficiency, better customer experience, more effective security and achievement of other objectives.

In October 2014, the Company acquired the Enterprise business (Enterprise) from Motorola Solutions Inc., excluding iDEN, for \$3.45 billion in cash. The transaction was funded by \$200 million of cash-on-hand and \$3.25 billion in new debt. Enterprise is an industry leader in mobile computing and data capture products. It also provides wireless LAN products, in addition to repair, maintenance, integration and device management services. As a result of this acquisition, the Company has enhanced its position as a leading global provider of visibility solutions that deliver greater productivity for businesses of all sizes.

The Company provides products and services in approximately 100 countries, with 133 facilities and approximately 7,000 employees worldwide. The consolidated financial statements (and other data) reflect the results of operations and financial position of the Company, including the addition of Enterprise from the date of acquisition.

Segments

Commencing with the acquisition of Enterprise in October 2014, the Company's operations consist of two reportable segments: Legacy Zebra and Enterprise.

Legacy Zebra

The Legacy Zebra segment is an industry leader in barcode printing and asset tracking technologies. Its major product lines include barcode printers, printer supplies and parts, and maintenance and support services. Other product lines include location solutions and software. Industries served include retail, transportation and logistics, manufacturing, healthcare and other end markets within the following regions: North America, Europe, Middle East, Africa, Asia Pacific and Latin America.

Enterprise

The Enterprise segment is an industry leader in mobile computing and advanced data capture technologies and provides services in North America, Europe, Middle East, Africa, Asia Pacific and Latin America. Its major product lines include mobile computing, data capture, services and WLAN, which service retail, transportation and logistics, and manufacturing industries and other end markets.

Geographic Information

Edgar Filing: ZEBRA TECHNOLOGIES CORP - Form 10-Q

For the first nine months of 2015, the Company recorded \$2,699.2 million of net sales in its consolidated statements of operations, of which approximately 48.9% were attributable to North America; approximately 32.2% were attributable to Europe, Middle East, and Africa and other foreign locations accounted for the remaining 18.9%.

Results for the three months ended October 3, 2015 as compared to the prior year's third quarter were primarily impacted by the acquisition of Enterprise in October 2014 and unfavorable foreign currency effects, net of hedges. For the three months ended October 3, 2015, the acquisition increased the Company's net sales by \$602.3 million and gross profit by \$253.2 million, and increased operating expenses by \$290.0 million, including \$56.1 million of amortization expense, and reduced operating income by \$36.8 million. Excluding the effect of the acquisition and on a constant currency basis, consolidated net sales increased \$25.7 million and 8.0%.

For the nine months ended October 3, 2015, the acquisition increased the Company's net sales by \$1,732.8 million, gross profit by \$724.0 million, operating expenses by \$881.8 million and reduced operating income by \$157.8 million. Excluding the effect of the acquisition and on a constant currency basis, consolidated net sales increased by \$126.7 million and 14.0%.

NET SALES

The increase in net sales, excluding the effect of the acquisition for the quarter ended October 3, 2015 reflects higher sales for the North America region of 11.6% and the Asia-Pacific region of 7.4%, partially offset by a decrease in the Latin America region of 11.6%. On a constant currency basis, the Europe, Middle East and Africa region had an increase of 11.0%, due to higher sales of barcode printers and supplies. The increased net sales for the North America region were due to a higher volume of sales related to barcode printers and location solutions. The higher levels of net sales for the Asia-Pacific region was due to increased volume of the barcode printers and aftermarket parts. The decrease in net sales for the Latin America region was primarily driven by the weak macro-economic environment.

The increase in net sales, excluding the effect of the acquisition, for the nine months ended October 3, 2015 reflects higher sales for the North America region of 18.5% and Asia-Pacific of 4.1%, offset by lower sales for the Latin America region of 3.2%. On a constant currency basis, the Europe, Middle East and Africa region had an increase of 18.0% due to higher sales of barcode printers and supplies. The increased net sales for the North America region was due to higher volume of sales related to printers, location solutions and supplies. The higher level of net sales for the Asia-Pacific region reflected higher overall volumes of barcode printers. The decrease in net sales for the Latin America region was primarily driven by the weak macro-economic environment.

Table of Contents**GROSS MARGIN**

Gross margin as a percentage of sales was 51.2%, excluding the effect of the acquisition, for the quarter ended October 3, 2015 compared to 50.0% in the comparable prior year quarter. The drivers of this increase in gross margin were as a result of higher units of volume within the North America, Europe, Middle East, Africa and Asia Pacific regions, change in mix and reduced product costs, partially offset by lower volumes in Latin America region.

Gross margin as a percent of sales, excluding the effect of the acquisition, was 51.0% compared to 50.2% in the comparable nine months ended September 27, 2014. The driver of this increase in gross margin were as a result of higher sales within the North America, Europe and Asia Pacific region, change in mix and reduced product costs, partially offset by lower volumes in the Latin America region.

OPERATING EXPENSES

Operating expenses for the three months and nine months ended October 3, 2015, excluding the effect of the acquisition, integration and exit and restructuring costs, were \$97.0 million and \$294.7 million, respectively, compared to \$89.3 million and \$267.1 million in the prior year. As a percentage of sales, operating expenses excluding the impact of the acquisition were 30.9% as of the three month ended October 3, 2015 versus 29.5% in the prior year comparable quarter; the increase is primarily due to additional investments made to support business growth. As a percentage of sales, operating expenses of 30.5% as of the nine months ended October 3, 2015 were up from 29.5% as of the nine months ended October 3, 2014 primarily due to additional investments made to support business growth.

OPERATING INCOME

Operating income for the three and nine months ended October 3, 2015, excluding the effect of the acquisition, integration and exit and restructuring costs, increased \$1.8 million and 2.8% and \$23.3 million and 13.4%, respectively, compared to the prior period quarter and year. The increases are primarily due to higher sales and gross profit, partially offset by higher operating expenses. Amortization expense decreased by \$0.2 million for the quarter and \$0.5 million for the year, excluding the effect of the acquisition.

Results of Operations by Segment

The following commentary should be read in conjunction with the financial results of each operating business segment as detailed in Note 19 Segment Information in the Notes to the Consolidated Financial Statements. The segment results exclude purchase accounting adjustments, amortization, acquisition, integration, and exit and restructuring costs (in thousands except percentages).

Net sales for the three and nine months ended October 3, 2015 on a constant currency basis increased 8.0% and 14.0%, respectively, in comparison to last year primarily due to an increased demand for barcode printers, supplies and location solutions products. Regionally, sales were up in North America, Asia-Pacific and compared to the prior period quarter, offset by lower sales in Latin America. On a constant currency basis, sales increased for Europe, Middle East and Africa due to higher sales of barcode printers and supplies. Regionally, sales for the nine months compared to the same period a year ago increased in the North America and Asia-Pacific regions due to an increased demand in barcode printers, location solutions and supplies, offset by lower sales in Latin America. On a constant currency basis, sales increased for Europe, Middle East and Africa due to higher sales of barcode printers and supplies.

Gross margin as a percentage of sales was 51.2% for the three months ended October 3, 2015 compared to the comparable prior period of 50.0%. This increase in margins reflects the favorable impact of higher unit sales, favorable product mix, and lower product costs.

Table of Contents

Gross margin was 51.0% for the nine months ended October 3, 2015, compared to 50.2% in the comparable period in 2014. The increase in gross profit margin was principally due to lower product costs in hardware and supplies.

Operating income for the third quarter and first nine months increased 2.2% and 12.7%, respectively, as a result of higher sales and gross profit partially offset by increases in operating expenses. Operating expenses increased in the third quarter and first nine months compared to the prior year primarily to support business growth.

On October 27, 2014, the Company acquired Enterprise, a provider of industry-leading data capture, mobile computing and wireless LAN solutions.

For the three and nine months ended October 3, 2015, net sales for Enterprise were \$605.1 million and \$1,745.7 million, respectively. Overall sales in the third quarter were up 5.5% compared to the second quarter of 2015. Data capture, mobile computing and repair services in the North America and Europe, Middle East and Africa regions generated the majority of the sales for the quarter as well as the first nine months of the year. Compared to the second quarter, sales in North America and Latin America regions were sequentially higher. Sales were sequentially lower in Europe, Middle East, and Africa region due largely to the typically slow summer selling period in Europe.

Gross profit margin improved sequentially from the second quarter of 2015 by 1.0%. The increase in gross margin reflected lower product cost and warranty expenses, increased prices on certain Euro-priced products offset partially by increased excess & obsolescence reserves on various product and service-parts inventory.

Enterprise's operating income for the third quarter and first nine months of 2015 was \$64.2 million and \$160.9 million, respectively. This reflects operating expenses of \$193.2 million and \$579.1 million for the third quarter and first nine months of 2015, respectively. Operating expenses in the third quarter declined to 31.9% of sales compared to 34.0% in the second quarter of 2015 due to the improved operating leverage.

Consolidated other income (expense)

The Company's non-operating income and expense items are summarized in the following table (in thousands except percentages):

Foreign Exchange Loss

The Company recognized a foreign exchange loss of \$5.3 million for the quarter as a result of foreign currency movements on net monetary assets. The Company also recognized a \$21.2 million loss for the nine months ended October 3, 2015 as a result of changes in value of non-US dollar assets and liabilities that were not hedged during the period.

Table of Contents**Interest Expense**

Interest expense was \$45.0 million for the quarter and \$145.3 million for the nine months ended October 3, 2015 mainly reflecting the indebtedness incurred related to the Acquisition.

In the third quarter of 2015, the Company recognized tax expense of \$3.4 million versus a tax expense of \$9.9 million for the corresponding period in the prior year. In the first nine months of 2015, the Company recognized a tax benefit of \$5.9 million compared to a tax expense of \$25.2 million for the corresponding period in the prior year. The Company's effective tax rates were 4.3% and 23.1% as of October 3, 2015 and September 27, 2014, respectively. The Company's effective tax rate was lower than the federal statutory rate of 35% primarily due to pre-tax losses in the United States and corporate structure realignment initiatives in various non-US jurisdictions.

Since the date of the Enterprise acquisition, as part of its corporate initiatives of integrating the Enterprise business, the Company has been executing its integration plan for the Enterprise business (the Integration Plan). The Company anticipates completing the Integration Plan as soon as practicable and expects that the Integration Plan will allow the combined businesses to achieve further synergies and cost savings associated with the acquisition. As part of the Integration Plan, the Company began realigning certain acquired assets of the Enterprise business with and into the Company's corporate structure and business model.

Retail Solutions Group Goodwill

In the fourth quarter of 2013, the Company acquired all of the outstanding membership interests in Hart Systems, LLC (Hart). Hart which is included within our Retail Solutions Group reporting unit, with total goodwill of \$58.6 million as of October 3, 2015, performs its annual impairment test as of the first day of our fourth quarter. During the third quarter of 2015, management identified an indicator of impairment within the Retail Solutions Group reporting unit based on a change in forecasted revenue and earnings results. Based on this event, management performed step one of the goodwill impairment test in accordance with ASC 350, Intangibles—Goodwill and Other, on the Retail Solutions Group as of October 3, 2015. Based on this analysis, management determined that the fair value was less than the carrying value of the net assets for this reporting unit. The Company has not yet completed step two of the impairment test, and, as of the filing date of this Form 10-Q, impairment is possible but is not reasonably estimable.

Table of Contents**Liquidity and Capital Resources**

In connection with the Acquisition in October 2014, the Company incurred indebtedness totaling \$3.25 billion. As of October 3, 2015, the Company had cash of \$258.0 million and long-term debt totaling \$3.0 billion and did not have any borrowings against its revolving credit facility with \$246.8 million available (\$250.0 million less \$3.2 million of letters of credit). See Note 13 Long-Term Debt in the Notes to the Consolidated Financial Statements for further details. The primary factors that influence liquidity include, but are not limited to, the amount and timing of revenues, cash collections from customers, capital expenditures and acquisitions of third parties. The Company believes that existing capital resources and funds generated from operations are sufficient to meet anticipated capital requirements and service its indebtedness. The following table summarizes the Company's cash flow activities for the periods indicated (in thousands except for percentages):

Cash Flow	Nine Months Ended		\$	%
	October 3, 2015	September 27, 2015	Change	Change

Net Decrease in Cash	\$ (135,928)	\$ (2,613)	\$ (133,315)	NM

The change in the Company's cash and cash equivalents balance as of October 3, 2015 is reflective of the following:

Operating activities

During the first nine months of 2015, the Company had cash provided by operating cash flows of \$115.9 million compared to \$129.7 million in the prior year. The decrease in net cash provided by operating activities is primarily a result of decreased net income, increased working capital requirements and increased inventory provisions primarily related to the services business. The increase in working capital requirements is due to higher inventory requirements and increased other assets partially offset by higher accounts receivable collections and decreased cash payments for accrued liabilities.

Investing Activities

Net cash used in investing activities during the first nine months of 2015 includes additional consideration of \$50.9 million paid to MSI in relation to the opening cash balance and working capital adjustments and capital expenditures of \$87.4 million which consist primarily of investments in the Company's corporate office and IT infrastructure. Reflecting the Company's changing capital structure, net cash used for investing activities reflects \$24.9 million and \$212.0 million of proceeds from the sale of investments in marketable securities during the first nine months of 2015 and 2014, respectively and purchases of marketable securities of \$384.1 million during the first nine months of 2014.

Financing Activities

In 2015, the Company made principal prepayments of \$130.0 million under its term loan. Proceeds received from the exercise of stock options and stock purchase plan purchases were \$14.4 million this year compared to \$13.0 million

last year reflecting increased option exercises and ESPP purchases. The taxes paid related to net share settlement of equity awards were \$13.0 million this year compared to \$1.1 million last year reflecting more restricted stock traded. The excess tax benefit from equity-based compensation was \$11.5 million this year compared to \$5.8 million last year.

The following table shows the Company's level of indebtedness and other information as of October 3, 2015 (in thousands):

Senior Notes	\$ 1,050,000
Term Loan	2,070,000
Less Debt Issuance Costs	(27,196)
Less Unamortized Discounts	(49,579)
Total Indebtedness	\$ 3,043,225

Private Offering

On October 15, 2014, the Company completed a private offering of \$1.05 billion aggregate principal of 7.25% Senior Notes due October 15, 2022 (the "Senior Notes"). The Senior Notes yielded an effective interest rate of 7.61% at issuance. The Senior Notes are governed by the terms of an indenture, dated as of October 15, 2014, by and among the Company and U.S. Bank National Association, as Trustee. Interest on the Senior Notes is payable in cash on April 15 and October 15 of each year.

The Indenture covering the Senior Notes contains certain restrictive and affirmative covenants. In addition, the Senior Notes are guaranteed jointly and severally, on a senior and unsecured basis, by the Company's direct and indirect wholly-owned existing and future domestic restricted subsidiaries, subject to certain exceptions.

Table of Contents*Credit Facilities*

On October 27, 2014, the Company entered into a new credit agreement which provides for a term loan of \$2.2 billion (Term Loan) and a revolving credit facility of \$250.0 million (Revolving Credit Facility). Borrowings under the Term Loan bear interest at a variable rate plus an applicable margin, subject to an all-in floor of 4.75%. As of October 3, 2015, the Term Loan interest rate was 4.75%. Interest payments are payable quarterly. The Company has entered into interest rate swaps to manage interest rate risk on its long-term debt. See Note 11 Derivative Instruments.

The credit agreement requires the Company to prepay the Term Loan and Revolving Credit Facility, under certain circumstances or transactions defined in the credit agreement. Also, the Company may make optional prepayments of the Term Loan, in whole or in part, without premium or penalty. The Company made such optional principal prepayments of \$130.0 million in 2015. On November 3, 2015 the Company made an additional optional principal prepayment of \$20.0 million. Unless satisfied by further optional prepayments, the Company is required to make a final scheduled principal payment of \$2.05 billion due on October 27, 2021.

Borrowings under the Revolving Credit Facility bear interest at a variable rate plus an applicable margin. As of October 3, 2015, the Revolving Credit Facility interest rate was 3.25%. Interest payments are payable quarterly. As of October 3, 2015 and December 31, 2014, the Company did not have any borrowings against the Revolving Credit Facility.

The Revolving Credit Facility contains various restrictive and affirmative covenants and is collateralized by a security interest in substantially all of the Company's assets as defined in the security agreement and guaranteed by its direct and indirect wholly-owned existing and future domestic restricted subsidiaries, subject to certain exceptions. The Company is in compliance with the covenants as of October 3, 2015.

Certain domestic subsidiaries of the Company (the Guarantor Subsidiaries) guarantee the Senior Notes, the Term Loan and the Revolving Credit Facility on a senior basis. For the nine months ended October 3, 2015, the non-Guarantor Subsidiaries would have (a) accounted for approximately 43.4% of the Company's total revenue and (b) held approximately 20.4% or \$1,091.4 million of its total assets and approximately 11.1%, or \$495.4 million of its total liabilities including trade payables but excluding intercompany liabilities.

The Company had \$181.3 million as of October 3, 2015, and \$330.9 million as of September 27, 2014 of foreign cash and investments.

Management believes that existing capital resources and funds generated from operations are sufficient to finance anticipated capital requirements.

Significant Customer

The net sales to significant customers as a percentage of total net sales were as follows:

	Nine Months Ended	
	October 3, 2015	September 27, 2014
Customer A	17.1%	16.0%
Customer B	10.1%	12.6%
Customer C	9.1%	11.8%

No other customer accounted for 10% or more of total net sales during these periods. The customers disclosed above are distributors (i.e. not end users) of the Company's products.

Safe Harbor

Forward-looking statements contained in this filing are subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995 and are highly dependent upon a variety of important factors which could cause actual results to differ materially from those expressed or implied in such forward looking statements. These forward-looking statements are based on current expectations, forecasts and assumptions and are subject to the risks and uncertainties inherent in the Company's industry, market conditions, general domestic and international economic conditions, and other factors. These factors include:

Market acceptance of the Company's products and solutions and competitors' product and solution offerings and the potential effects of technological changes,

The effect of global market conditions, including North America, Latin America, Asia Pacific, Europe, Middle East and Africa and other regions in which the Company does business,

The Company's ability to control manufacturing and operating costs,

Risks related to the manufacturing of the Company's products in countries outside the United States as well as business operations in countries outside the United States, including the risk of depending on key suppliers who are also in countries outside the United States,

The Company's ability to purchase sufficient materials, parts and components to meet customer demand, particularly in light of global economic conditions,

The availability of credit and the volatility of capital markets, which may also affect the Company's suppliers and customers,

Success of integrating acquisitions, including the Enterprise business the Company acquired in October 2014 from Motorola Solutions, Inc.,

Interest rate and financial market conditions,

The impact of the percentage of cash and cash equivalents held outside the United States,

The effect of natural disasters on the Company's business,

The impact of changes in governmental policies, laws or regulations in the United States and outside the United States,

Foreign exchange rates due to the large percentage of the Company's international sales and operations,

The outcome of litigation in which the Company is involved, particularly litigation or claims related to infringement of third-party intellectual property rights,

The outcome of any future tax matters, and

Success by the Company of remediating the material weakness identified in the first quarter of 2015 related to the process of reviewing and preparing its quarterly income tax provision.

When used in this document and documents referenced, the words anticipate, believe, estimate, will and expect similar expressions as they relate to the Company or its management are intended to identify such forward-looking statements. Readers of this report are encouraged to review Item 1A, Risk Factors in the Annual Report on Form 10-K for the year ended December 31, 2014, for a further discussion of issues that could affect the Company's future results. The Company undertakes no obligation, other than as may be required by law, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason after the date of this report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes in the Company's market risk during the quarter ended October 3, 2015. For additional information on market risk, refer to the Quantitative and Qualitative Disclosures About Market Risk section of the Form 10-K for the year ended December 31, 2014.

In the normal course of business, portions of the Company's operations are subject to fluctuations in currency values. The Company manages these risks using derivative financial instruments. See Note 11 Derivative Instruments to the Consolidated Financial Statements included in this report for further discussion of derivative instruments.

Item 4. Controls and Procedures Evaluation of Disclosure Controls and Procedures

The Company has conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this Form 10-Q. The evaluation was conducted under the supervision of its Disclosure Committee, and with the participation of management, including the Chief Executive Officer and Chief Financial Officer. Based on that evaluation, the Company has concluded that its disclosure controls and procedures were not effective as of October 3, 2015, as a result of a material weakness identified in the first quarter of 2015 related to the process to review and prepare its quarterly income tax provision.

Changes in Internal Control over Financial Reporting

As noted in the 2014 Form 10-K, in connection with the Company's initial reviews of internal controls for Enterprise, the Company had identified certain internal control deficiencies related to Enterprise. The Company continues to identify and review the internal controls of the Enterprise business and is executing a plan of remediation that is consistent with its obligation to assess the effectiveness of Enterprise's internal controls over financial reporting as of December 31, 2015.

Management and the Board of Directors are committed to the continued improvement of the Company's overall system of internal controls over financial reporting and began efforts last quarter and continued during this quarter to implement additional controls and procedures to remediate the review and preparation process relating to its quarterly income tax provision. While the Company began efforts to implement additional controls in its tax provision process, the Company needs to prove sustained effectiveness of these controls to fully remediate the weakness. The Company is working towards fully remediating the aforementioned material weakness before year-end.

The identification, review, assessment and remediation of internal control deficiencies is overseen by senior management and the Audit Committee of the Board of Directors, and is undertaken primarily through the integration of processes and procedures with existing Company processes and procedures, development and implementation of formal policies, improved processes and documented procedures, as well as the hiring of additional finance and tax personnel.

During the quarter covered by this report, there have been no other changes in the internal controls that have materially affected, or are reasonably likely to materially affect, the internal controls over financial reporting.

Inherent Limitations on the Effectiveness of Controls

The Company's management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the disclosure controls and procedures or the internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in

achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

See Note 14 Contingencies to the Consolidated Financial Statements included in this report.

Item 1A. Risk Factors

There have been no material changes to the risk factors included in the Company's Annual Report for the year ended December 31, 2014, other than the risk identified below entitled "The Company has identified a material weakness in its internal control over financial reporting which could, if not remediated, result in material misstatements in its financial statements." In addition to the additional risk factor below and the other information included in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in the Annual Report on Form 10-K for the year ended December 31, 2014. The risks described in the Annual Report on Form 10-K could materially adversely affect the Company's business, financial condition or future results. The risks described in the Annual Report are not the only risks facing the company. Additional risks and uncertainties not currently known to the Company or that the Company currently considers immaterial also may materially adversely affect its business, financial condition, and/or operating results.

The Company has identified a material weakness in its internal control over financial reporting which could, if not remediated, result in material misstatements in its financial statements.

The Company's management is responsible for establishing and maintaining adequate internal controls over its financial reporting, as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act. As disclosed in Item 4 of Part I of this report, the Company identified in the first quarter of 2015 a material weakness in its internal control over financial reporting related to the process to review and prepare its quarterly income tax provision. A material weakness is defined as a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. As a result of this material weakness, the Company's management concluded that its internal control over financial reporting was not effective as of the last day of the period covered by this report. The Company is actively engaged in implementing a remediation plan designed to address this material weakness. If the remedial measures are insufficient to address the material weakness or if additional material weaknesses or significant deficiencies in the internal control are discovered or occur in the future, the consolidated financial statements may contain material misstatements and the Company could be required to restate its financial results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
Treasury Shares

The Company did not purchase shares of its Class A Common Stock during the third quarter of 2015.

On November 2011, the Company's Board authorized the purchase of up to an additional 3,000,000 shares under the purchase plan program and the maximum number of shares that may yet be purchased under the program is 665,475. The November 2011 authorization does not have an expiration date.

During the third quarter of 2015, the Company acquired 632 shares of its Class A Common Stock through the withholding of shares necessary to satisfy tax withholding obligations upon the vesting of restricted stock awards. These shares were acquired at an average price of \$102.93 per share.
