### FLAHERTY & CRUMRINE PREFERRED SECURITIES INCOME FUND

To the Shareholders of Flaherty & Crumrine Preferred Securities Income Fund (FFC):

Increased volatility was a common theme in most markets during the first fiscal quarter<sup>1</sup>, and the preferred securities market was no exception. Total return<sup>2</sup> on net asset value ( NAV ) was -2.5% for the quarter, while total return on market price was 0.3%.

As we mentioned in our last letter, markets entered a new phase with liftoff in December. The Federal Reserve s 0.25% hike in short-term interest rates was its first step in slowly removing unprecedented levels of monetary accommodation. However, other parts of the world, notably Europe and Japan, are still easing monetary policy by increasing quantitative easing (QE) programs and pushing short-term interest rates into negative territory. With concerns over economic growth in China adding to the equation, investors are struggling to figure out how all the pieces fit together going forward. Understandably, markets are factoring in a possibility of policy mistakes along the way, as these are uncharted territories for everyone. The result has been increased volatility in most markets, including commodities (oil, natural gas, and metals), stocks, U.S. Treasuries, corporate bonds, and preferred securities.

Reduced probabilities for future rate increases in the U.S., and negative rates in some regions, triggered an absolute rout in bank common stocks with the average U.S. bank stock returning -20% during the fiscal period. Preferred securities fared much better but cheapened in sympathy (as did more-senior bank securities). Bank earnings should benefit from higher interest rates, but any upside to future earnings that investors had been hoping for (and pricing into stock prices) has been scaled back from earlier projections.

European bank common stocks were among the worst performers, and this had a related impact on the contingent capital securities market (these CoCos are the non-U.S. version of preferreds). Deutsche Bank was in the headlines yet again this time with concerns about its ability to pay coupons on CoCos and preferred securities. The market reacted very negatively, and CoCo prices were dragged down substantially across the board. Once again, U.S. preferreds fared better but still cheapened in sympathy.

There is a lot for investors in all markets to consider, but as it relates to preferreds, we suggest taking a step back to reflect on a longer-term view of favorable fundamentals.

Bank earnings are certainly important to investors, since dividends are paid out of earnings and profits. However, *growth* in earnings, while critical to common stock valuation, is *not* a critical determinant of creditworthiness and preferred-stock valuation. We focus much more on a bank s capital on its ability to absorb losses while still being able to pay preferred dividends than on earnings growth. On this front, the news is positive as the common equity capital at banks in which we invest continues to build, which supports debt and preferred stock that are senior to common equity.

<sup>&</sup>lt;sup>1</sup> December 1, 2015 February 29, 2016

<sup>&</sup>lt;sup>2</sup> Following the methodology required by the Securities and Exchange Commission, total return assumes dividend reinvestment.

Low interest rates will have mixed implications for both issuers of and investors in preferred securities, but overall they should benefit prices of preferred securities as a global search for yield continues. We also believe recent concerns around CoCos (which represented 1.2% of the Fund as of period end) will turn out to be noise, as issuers and regulators consider CoCos a necessary market that they are loath to damage by not paying coupons.

Global economic recovery will be slow, and policy mistakes are likely to be made. As we have said before, income (coupons) can make up for quite a bit of principal change over time and preferreds continue to offer higher yields than many other fixed-income securities. While volatility may be with us for some time, and the ride may be bumpy, we believe total returns will be competitive over time for preferred investors.

As always, we encourage you to visit the Fund s websitewww.preferredincome.com for timely and important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team

## **NOTES TO FINANCIAL STATEMENTS (Unaudited)**

### 1. Aggregate Information for Federal Income Tax Purposes

At February 29, 2016, the aggregate cost of securities for federal income tax purposes was \$1,281,674,221, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$68,146,620 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$135,610,989.

### 2. Additional Accounting Standards

Fair Value Measurements: The Fund has analyzed all existing investments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund s investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment s valuation. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Funds own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period.

During the reporting period, there were no transfers into Level 1 from Level 2 or into Level 2 from Level 1.

The fair values of the Funds investments are generally based on market information and quotes received from brokers or independent pricing services that are approved by the Board of Directors and are unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Funds portfolio, and market information obtained by the Adviser as a function of being an active market participant.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades or the same information for securities that are similar in many respects to those being valued are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

### NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

			Preferred	Corp	orate Debt
			Securities	S	ecurities
	Total	Investments	Banking	Finan	cial Services
Balance as of 11/30/15	\$	201,992	\$ 52,650	\$	149,342

Realized gain/(loss)					
Change in unrealized appreciation/(depreciation)		9,925			9,925
Purchases					
Sales					
Transfers in					
Transfers out					
Balance as of 02/29/16	\$	211,917	\$ 52,650	\$	159,267

For the three months ended February 29, 2016, total change in unrealized gain/(loss) on Level 3 securities still held at period-end and included in the change in net assets was \$9,925.

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

### Fair Value

Category Preferred Securities	at	02/29/16	Valuation Technique	Unobservable Input	Input Range (Wgt Avg)
(Banking)	\$	52,650	Bankruptcy recovery	Credit/Structure-specific recovery	0.00% - 0.50% (0.15%)
Corporate Debt Securities		159,267	Bankruptcy recovery	Credit/Structure-specific recovery	2% - 5% (3.3%)

#### (Financial Services)

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.
