## WisdomTree Dynamic Currency Hedged Europe Equity Fund

## Investment Objective

The WisdomTree Dynamic Currency Hedged Europe Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged Europe Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.43% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 12% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

## Edgar Filing: WisdomTree Trust - Form 485BPOS

The Index is a dividend weighted index designed to provide exposure to European equity securities while at the same time dynamically hedging currency exposure to fluctuations between the value of the euro and the U.S. dollar. The Index consists of the equity securities of the dividend-paying companies within the WisdomTree International Equity Index, which defines the dividend-paying universe of companies in the industrialized world, excluding Canada and the United States, that are organized under the laws of a European country, traded in euros,

2 WisdomTree Trust Prospectus

---

**Table of Contents****Table of Contents**

and have at least \$1 billion in market capitalization. Countries represented in the Index include Germany, France, the Netherlands, Spain, Belgium, Finland, Italy, Portugal, Austria and Ireland, although this may change from time to time. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) listed for trading on a major stock exchange in one of the aforementioned European countries; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iv) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector and any one country in the Index, is capped at 25%; however, sector, country and security weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

The Index dynamically hedges currency fluctuations in the relative value of the euro against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratio on the euro on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between the euro and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to currency as the euro depreciates against the U.S. dollar while participating in gains related to currency when the euro appreciates against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to the euro to hedge against fluctuations in the relative value of the euro against the U.S. dollar pursuant to the applicable hedge ratio. The Fund uses forward currency contracts or futures contracts to the extent the euro is hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or

ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

WisdomTree Trust Prospectus 3

---

**Table of Contents**

**Table of Contents**

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Currency Exchange Rate Risk.** The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and

---

**Table of Contents****Table of Contents**

other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Concentration in Europe.** Because the Fund invests primarily in the securities of companies in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in governmental or EU trade regulations could each have a significant impact on the economies of some or all European countries. Further, in June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, Standard & Poor's ("S&P") downgraded the United Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. It is also unclear how withdrawal negotiations will be conducted and what the potential consequences may be. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets that could potentially have an adverse effect on the value of the Fund's investments. The Fund currently invests a significant portion of its assets in companies organized in France and Germany, although this may change from time to time.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Table of Contents**

Table of Contents

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other

initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

## WisdomTree Dynamic Currency Hedged International Equity Fund

## Investment Objective

The WisdomTree Dynamic Currency Hedged International Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.40%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.40%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.35% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.35% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 36	\$ 123	\$ 219	\$ 500

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 27% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

## Edgar Filing: WisdomTree Trust - Form 485BPOS

The Index is a dividend weighted index designed to provide exposure to equity securities in the industrialized world, excluding Canada and the United States, that pay regular cash dividends on shares of common stock, while at the same time dynamically hedging currency exposure to fluctuations between the value of the applicable foreign currencies and the U.S. dollar. The Index consists of equity securities of dividend-paying companies. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) incorporation and have their shares

**Table of Contents****Table of Contents**

listed for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong or Singapore; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) market capitalization of at least \$100 million as of the Index screening date; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any one sector and any one country is capped at 25%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil, and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies when such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged. To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

8 WisdomTree Trust Prospectus

---

---

**Table of Contents**

**Table of Contents**

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Currency Exchange Rate Risk.** The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and

**Table of Contents**

**Table of Contents**

other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries. Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund’s hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

10 WisdomTree Trust Prospectus

---

**Table of Contents**

**Table of Contents**

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Fund Performance**

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

**Management**

**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents**Table of Contents

## WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Fund

## Investment Objective

The WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International Quality Dividend Growth Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.38%
Total Annual Fund Operating Expenses	0.96% <sup>1</sup>
Fee Waivers	(0.48)% <sup>2</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.48% <sup>2</sup>

The Total Annual Fund Operating Expenses in this fee table may not correlate to the expense ratios in the Fund’s financial highlights and financial statements because the financial highlights and financial statements reflect only the operating expenses of the Fund and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund’s investments in the Underlying Fund, as defined below, as well as an additional 0.10%, through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 258	\$ 484	\$ 1,134

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal period, the Fund’s portfolio turnover rate was 4% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index (including indirect investments through the WisdomTree International Quality Dividend Growth Fund (the “Underlying Fund”)) whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending)

12 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

will be invested in component securities of the Index (including indirect investments in the Underlying Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities. The Underlying Fund tracks the price and yield performance, before fees and expenses, of the WisdomTree International Quality Dividend Growth Index (the “Underlying Fund Index”). The Index and the Underlying Fund Index have identical component securities and employ identical methodologies except that the Underlying Fund Index does not hedge against currency fluctuations. The Underlying Fund, which is also advised by WisdomTree Asset Management, may constitute a substantial portion of the Fund’s assets.

The Index consists of dividend-paying common stocks with growth characteristics of companies in the industrialized world, excluding Canada and the United States, while at the same time dynamically hedging currency exposure to fluctuations between the value of the applicable foreign currencies and the U.S. dollar. The Index is generally comprised of the 300 companies in the WisdomTree International Equity Index with the best combined rank of certain growth and quality factors, specifically long-term earnings growth expectations, return on equity and return on assets. The WisdomTree International Equity Index is a fundamentally weighted index that is comprised of dividend-paying companies that pay regular cash dividends. To be eligible for inclusion in the WisdomTree International Equity Index, a company must be incorporated in and lists its shares for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong, or Singapore. Currently a significant portion of the Index is comprised of companies organized in the United Kingdom, although this may change from time to time.

To be eligible for inclusion in the Index, a company must meet the following criteria: (i) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (ii) market capitalization of at least \$1 billion as of the annual Index screening date; (iii) an earnings yield that is greater than its dividend yield; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the annual Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. Eligible companies are ranked according to a rules-based calculation based on the following three factors, weighted as follows: long-term earnings growth expectations (50%), the historical three-year average return on equity (25%), and the historical three-year average return on assets (25%). The top 300 ranked companies are selected for inclusion in the Index.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company’s initial Index weight, (i) multiply the U.S. dollar value of the company’s annual gross dividend per share by the number of common shares outstanding for that company (the “Cash Dividend Factor”); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies’ Cash Dividend Factors; and (iv) divide the company’s Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any security in the Index is capped at 5% and the maximum weight of any one sector or country in the Index is capped at 20%; however, security, sector and/or country weights may fluctuate above their specified caps in response to market conditions and/or the application of the volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, consumer staples, health care and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate

WisdomTree Trust Prospectus 13

**Table of Contents**

over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies when such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged. To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities,

rising energy prices and global and economic conditions.

**Currency Exchange Rate Risk.** The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information.

**Table of Contents**

Table of Contents

Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union ("EU"). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental

disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Growth Investing Risk.** Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock's issuing company.

**Health Care Sector Risk.** The Fund currently invests a significant portion of its assets in the health care sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

**Table of Contents**

Table of Contents

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment in the Underlying Fund Risk.** The Fund's investment performance and risks may be directly related to the investment performance and risks of the Underlying Fund.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market

as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

#### Fund Performance

The Fund commenced operations on November 3, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the

**Table of Contents**

Table of Contents

Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.  
Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

WisdomTree Trust Prospectus 17

**Table of Contents**Table of Contents

## WisdomTree Dynamic Currency Hedged International SmallCap Equity Fund

## Investment Objective

The WisdomTree Dynamic Currency Hedged International SmallCap Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged International SmallCap Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.43% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 75% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index designed to provide exposure to small-capitalization equity securities in the industrialized world, excluding Canada and the United States, that pay regular cash dividends on shares of common stock, while at the same time dynamically hedging currency exposure to fluctuations between the value of

18 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

foreign currencies and the U.S. dollar. The Index consists of the equity securities of companies that comprise the bottom 25% of the market capitalization of the WisdomTree International Equity Index, as of the annual Index screening date, after the 300 largest companies have been removed. As of September 30, 2017, the Index had a market capitalization range from \$103.7 million to \$4.6 billion, with an average market capitalization of \$1.1 billion. To be eligible for inclusion in the Index, a company must meet the following criteria: (i) incorporation and have their shares listed for trading on one of the major stock exchanges in one of 15 developed European countries (Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, or the United Kingdom), Israel, Japan, Australia, New Zealand, Hong Kong or Singapore; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iii) market capitalization of at least \$100 million as of the Index screening date; (iv) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any one sector and any one country is capped at 25%; however, sector and country weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratios on such foreign currencies on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between each currency and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to foreign currencies as such currencies depreciate against the U.S. dollar while participating in gains related to foreign currencies as such currencies appreciate against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns.

The Index applies an applicable published currency forward rate to such foreign currencies to hedge against fluctuations in the relative value of the foreign currencies against the U.S. dollar pursuant to the applicable hedge ratios. The Fund uses forward currency contracts or futures contracts to the extent foreign currencies are hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections

WisdomTree Trust Prospectus 19

---

**Table of Contents**

**Table of Contents**

in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward

currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

20 WisdomTree Trust Prospectus

---

**Table of Contents**

Table of Contents

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund’s hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial

sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of

WisdomTree Trust Prospectus 21

---

---

**Table of Contents**

**Table of Contents**

mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

**Fund Performance**

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

**Management**

**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio

of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

## WisdomTree Dynamic Currency Hedged Japan Equity Fund

## Investment Objective

The WisdomTree Dynamic Currency Hedged Japan Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Currency Hedged Japan Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.43% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.43% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 149	\$ 264	\$ 599

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 15% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index designed to provide exposure to Japanese equity securities while at the same time dynamically hedging currency exposure to fluctuations between the value of the Japanese yen and the U.S. dollar. The Index consists of the equity securities of dividend-paying companies within the WisdomTree International Equity Index, which defines the dividend paying universe of companies in the industrialized world, excluding Canada and the United States, that are incorporated in Japan and traded on the Tokyo Stock Exchange.

24 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

To be eligible for inclusion in the Index, a company must meet the following criteria: (i) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (ii) market capitalization of at least \$100 million as of the Index screening date; (iii) average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iv) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. The maximum weight of any single security in the Index is capped at 5% and the maximum weight of any one sector in the Index is capped at 25%; however, security and sector weights may fluctuate above their specified caps in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, financial and industrial sectors.

The Index dynamically hedges currency fluctuations in the relative value of the Japanese yen against the U.S. dollar, ranging from a 0% to 100% hedge. The Index determines and adjusts the hedge ratio on the Japanese yen on a monthly basis using three equally-weighted, quantitative signals: interest rate differentials, momentum, and value. Interest rate differentials are determined by measuring the difference in interest rates, as implied in one month foreign exchange (FX) forwards, between the Japanese yen and the U.S. dollar. Momentum is the relative price momentum of the foreign currency as determined by comparing two moving average signals on the historically observed U.S. dollar spot rates over 10 and 240 business day periods. Value is the relative purchasing power of the foreign currency as determined with reference to the foreign currency spot rate over 20 business days as compared to the latest purchasing power parity (PPP) numbers as published by the Office of Economic Cooperation and Development (OECD). This approach is designed to limit losses related to currency as the Japanese yen depreciates against the U.S. dollar while participating in gains related to currency when the Japanese yen appreciates against the U.S. dollar, thereby seeking to have the Fund benefit from such currency movements while reducing the volatility associated with currency returns. The Index applies an applicable published currency forward rate to the Japanese yen to hedge against fluctuations in the relative value of the Japanese yen against the U.S. dollar pursuant to the applicable hedge ratio. The Fund uses forward currency contracts or futures contracts to the extent the Japanese yen is hedged.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk

Information.”

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

WisdomTree Trust Prospectus 25

---

---

**Table of Contents**

**Table of Contents**

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** The Fund's strategies associated with currency hedging may not be successful. Further, in order to minimize transaction costs, or for other reasons, the Fund's exposure to the non-U.S. currencies may not be hedged to the extent indicated by any or all of the quantitative signals. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an

active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

26 WisdomTree Trust Prospectus

---

**Table of Contents**

Table of Contents

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Concentration in Japan.** Because the Fund invests primarily in the securities of companies in Japan, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Japan and to be more volatile than the performance of more geographically diversified funds. The Japanese economy has only recently emerged from a prolonged economic downturn. Since the year 2000, Japan's economic growth rate has remained relatively low. Economic growth is heavily dependent on international trade, government support of the financial services sector and other troubled sectors, and consistent government policy supporting its export market. Slowdowns in the economies of key trading partners such as the United States, China and/or countries in Southeast Asia, including economic, political or social instability in such countries, could also have a negative impact on the Japanese economy as a whole. Currency fluctuations may also adversely impact the Japanese economy and its export market. In the past, the Japanese government has intervened in its currency market to maintain or reduce the value of the yen. Any such intervention could cause the yen's value to fluctuate sharply and unpredictably and could cause losses to investors. In addition, Japan's labor market is adapting to an aging workforce, declining population, and demand for increased labor mobility. These demographic shifts and fundamental structural changes to the labor market may negatively impact Japan's economic competitiveness. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified

and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

WisdomTree Trust Prospectus 27

---

## Table of Contents

### Table of Contents

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

The Fund commenced operations on January 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

### Management

#### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

#### Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in January 2016.

#### Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy

and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Table of Contents

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

**Table of Contents**Table of Contents

## WisdomTree Emerging Markets Dividend Fund

## Investment Objective

The WisdomTree Emerging Markets Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Emerging Markets Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.32%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.32%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 33	\$ 103	\$ 180	\$ 406

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 15% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a dividend weighted index that consists of emerging market dividend-paying common stocks. The starting universe of the Index consists of equity securities of companies that meet the following eligibility requirements: (i) incorporated (and/or domiciled with respect to China) within one of 17 emerging market nations (Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Korea, Malaysia, Mexico, the Philippines, Poland, Russia, South Africa, Taiwan, Thailand, and Turkey); (ii) listed for trading on a major stock exchange in one of the aforementioned emerging market countries (except Chinese companies must have shares listed in Hong Kong); (iii)

payment of at least \$5 million in gross cash dividends on shares of common stock in the annual cycle prior to the annual Index screening date; (iv) market capitalization of at least \$200 million as of the Index screening date; (v) average daily dollar volume of at least \$200,000 for each of the six months preceding the Index

30 WisdomTree Trust Prospectus

---

---

**Table of Contents**
Table of Contents

screening date; and (vi) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date.

Securities are weighted in the Index based on dividends paid over the prior annual cycle. Companies that pay a greater total dollar amount of dividends are more heavily weighted. To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. At the time of the Index's annual screening date, the maximum weight of any one sector and any one country in the Index is capped at 25%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial sector.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer,

**Table of Contents**

**Table of Contents**

receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

**Cash Redemption Risk.** The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other

factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund expects to invest a significant portion of its assets in companies incorporated and/or domiciled in Taiwan and China, although this may change from time to time.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

---

**Table of Contents**

**Table of Contents**

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Fund Performance**

The Fund commenced operations on April 7, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund’s return based on net assets and comparing the Fund’s performance to a broad measure of market performance.

**Management**

**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation (“Mellon Capital”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in April 2016.

WisdomTree Trust Prospectus 33

---

**Table of Contents**

Table of Contents

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in April 2016.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

**Table of Contents**Table of Contents

## WisdomTree Europe Domestic Economy Fund

## Investment Objective

The WisdomTree Europe Domestic Economy Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Europe Domestic Economy Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.58%
Fee Waivers	(0.10)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.48% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 176	\$ 314	\$ 716

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 12% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

## Edgar Filing: WisdomTree Trust - Form 485BPOS

The Index consists of common stocks of European companies that derive more than 50% of their revenue from Europe. The Index is designed with a goal of maximizing exposure to European companies with significant European revenue that may benefit from an economic recovery in Europe and increased buying power by Europeans.

Companies in the Index must be traded in euros and be incorporated and list their shares on the stock exchange in one of the following European countries: Germany, France, the Netherlands, Spain, Belgium, Finland, Italy, Portugal, Austria, and Ireland. To be eligible for inclusion in the Index, a company must meet the following

WisdomTree Trust Prospectus 35

---

**Table of Contents****Table of Contents**

criteria: (i) market capitalization of at least \$1 billion as of the Index screening date; (ii) average daily dollar volume of at least \$200,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. Companies from the following sectors are not eligible for inclusion in the Index: consumer staples, health care, telecommunications, and utilities.

The Index is a modified market capitalization weighted index designed to increase weight to companies that have the highest positive correlation in equity performance to the European Commission Economic Sentiment Indicator—an indicator of Europe’s economic strength. Securities are weighted in the Index based on a composite weighting of two individual weighting factors: (i) float-adjusted market capitalization (25% of weight); and (ii) a correlation rank factor (75% of weight). To derive the first factor, divide a company’s float-adjusted market capitalization by the total float-adjusted market capitalization of all Index components. “Float-adjusted” means that the share amounts used in calculating the first factor reflect only shares available to investors. Shares held by control groups, public companies and government agencies are excluded. To derive the second factor, each company is ranked, relative to the other Index components, based on its monthly correlation to the European Commission Economic Sentiment Indicator over the last five years. Each company’s correlation rank factor is determined by dividing its rank by the total number of Index components. For ranking purposes, the rank of the company with the highest correlation is equal to the total number of Index components, and the rank of the company with the lowest correlation is 1. Each security’s initial weight is the sum of the float adjusted market capitalization factor multiplied by 0.25 and the correlation rank factor multiplied by 0.75. The maximum weight of any one sector or country in the Index, at the time of the Index’s annual screening date, is capped at 33%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, energy, financials, industrials, information technology, materials and real estate. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, financial and industrial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

Shares of the Fund May Trade at Prices Other Than NAV. As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

36 WisdomTree Trust Prospectus

---

**Table of Contents**

**Table of Contents**

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Concentration in Europe.** Because the Fund invests primarily in the securities of companies in Europe, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Europe and to be more volatile than the performance of more geographically diversified funds. Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any such restrictions or controls, the default of an EU member country on its sovereign debt, significant fluctuations in the euro's exchange rate, or a change in governmental or EU trade regulations could each have a significant impact on the economies of some or all European countries. Further, in June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, Standard & Poor's ("S&P") downgraded the United

Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. It is also unclear how withdrawal negotiations will be conducted and what the potential consequences may be. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets that could potentially have an adverse effect on the value of the Fund's investments. The Fund currently invests a significant portion of its assets in companies organized in France, Germany and Italy, although this may change from time to time.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

WisdomTree Trust Prospectus 37

---

**Table of Contents**

**Table of Contents**

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater

fluctuations in the value of Fund shares than would occur in a diversified fund.

**Small-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

#### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All

38 WisdomTree Trust Prospectus

---

**Table of Contents****Table of Contents**

returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 32.57%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	9.30%	3Q/2016
Lowest Return	(10.47)%	2Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	1 Year	Since Inception October 29, 2015
WisdomTree Europe Domestic Economy Fund		
Return Before Taxes Based on NAV	(2.40)%	(2.39)%
Return After Taxes on Distributions	(2.59)%	(2.55)%
Return After Taxes on Distributions and Sale of Fund Shares	(0.57)%	(1.51)%
WisdomTree Europe Domestic Economy Index (Reflects no deduction for fees, expenses or taxes)	(2.21)%	(2.32)%
MSCI EMU Index (Reflects no deduction for fees, expenses or taxes)	1.34%	(2.03)%

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

## WisdomTree Global ex-Mexico Equity Fund

## Investment Objective

The WisdomTree Global ex-Mexico Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global ex-Mexico Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.35%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00% <sup>1</sup>
Total Annual Fund Operating Expenses	0.35%
Fee Waivers	(0.05)% <sup>2</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.30% <sup>2</sup>

<sup>1</sup> Other Expenses are based on estimated amounts for the current fiscal year.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.30% through February 2, 2020, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year 3 Years  
\$ 31 \$ 102

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal period, the Fund’s portfolio turnover rate was 2% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a float-adjusted market capitalization weighted index that is comprised of the equity securities of companies in developed countries and emerging markets throughout the world, excluding Mexico, that meet certain size and volume requirements. The starting universe of the Index consists of the largest 2,000 equity securities based on float-adjusted market capitalization that meet the following eligibility requirements:

WisdomTree Trust Prospectus 41

---

---

**Table of Contents****Table of Contents**

To be eligible for inclusion in the Index as a U.S. constituent, a company must meet the following criteria: (i) incorporated and domiciled in the U.S., (ii) listed on the New York Stock Exchange (NYSE), the NASDAQ Global Select Market, or the NASDAQ Global Market (together, the “three major exchanges”), (iii) float-adjusted market capitalization of at least \$100 million as of the annual Index screening date, and (iv) average daily dollar trading volume of at least \$100,000 for three months preceding the annual Index screening date.

To be eligible for inclusion in the Index as a constituent from the remainder of the developed world, a company must meet the following criteria: (i) incorporated and/or domiciled in one of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, or the United Kingdom, (ii) listed on an exchange in one of the aforementioned countries, (iii) float-adjusted market capitalization of at least \$100 million as of the annual Index screening date, (iv) average daily dollar trading volume of at least \$100,000 for three months preceding the annual Index screening date, and (v) trading of at least 250,000 shares per month for each of the six months preceding the annual Index screening date.

To be eligible for inclusion in the Index as an emerging market constituent, a company must meet the following criteria: (i) incorporated and/or domiciled in one of the following countries: Brazil, Bulgaria, Chile, China, Colombia, Cyprus, Czech Republic, Estonia, Greece, Hungary, Iceland, India, Korea, Latvia, Lithuania, Malta, Peru, Poland, Romania, Slovakia, or Slovenia, (ii) listed on an exchange in one of the aforementioned countries, (iii) float-adjusted market capitalization of at least \$200 million as of the annual Index screening date, (iv) average daily dollar trading volume of at least \$200,000 for each of the six months preceding the annual Index screening date, and (v) trading of at least 250,000 shares per month for each of the six months preceding the annual Index screening date.

These securities are weighted in the Index based on their float-adjusted market capitalization. “Float-adjusted” market capitalization means that the share amounts used in calculating a company’s market capitalization reflect only shares available to investors. The maximum weight of any one sector in the Index, at the time of the Index’s annual screening date, is capped at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments, as described below. As of the date of this Prospectus, non-U.S. equity securities comprise at least 40% of the Index, and the Adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund.

In addition, the Index methodology includes volume factor adjustments such that if a component security does not meet certain trading volume thresholds, either (i) the security will be eliminated from inclusion in the Index or (ii) its weight in the Index will be reduced and reallocated pro rata among the other securities, in accordance with the rules-based Index methodology.

WisdomTree Investments currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial and information technology sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

42 WisdomTree Trust Prospectus

---

**Table of Contents**

Table of Contents

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Capital Controls and Sanctions Risk.** Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Table of Contents**

Table of Contents

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Japan and Europe, particularly the United Kingdom, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund invests a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Table of Contents**

Table of Contents

Fund Performance

The Fund commenced operations on February 10, 2017, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in February 2017.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents**Table of Contents

## WisdomTree Global Hedged SmallCap Dividend Fund

## Investment Objective

The WisdomTree Global Hedged SmallCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global Hedged SmallCap Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.43%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Acquired Fund Fees and Expenses	0.43%
Total Annual Fund Operating Expenses	0.86% <sup>1</sup>
Fee Waivers	(0.43)% <sup>2</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.43% <sup>2</sup>

The Total Annual Fund Operating Expenses in this fee table may not correlate to the expense ratios in the Fund’s financial highlights and financial statements because the financial highlights and financial statements reflect only the operating expenses of the Fund and do not include Acquired Fund Fees and Expenses, which are fees and expenses incurred indirectly by the Fund through its investments in certain underlying investment companies.

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to waive a portion of its Management Fee in an amount equal to the Acquired Fund Fees and Expenses attributable to the Fund’s investments in the Underlying Fund, as defined below, through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 231	\$ 435	\$ 1,021

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 3% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it

generally will invest in a sample of securities in the Index (including indirect investments through the WisdomTree Global SmallCap Dividend Fund (the “Underlying Fund”)) whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index (including indirect investments in the Underlying Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of

46 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

such component securities. The Underlying Fund tracks the price and yield performance, before fees and expenses, of the WisdomTree Global SmallCap Dividend Index (the “Underlying Fund Index”). The Index and the Underlying Fund Index have identical component securities and employ identical methodologies except that the Underlying Fund Index does not hedge against currency fluctuations; whereas, the Index hedges against currency fluctuations by applying an applicable published one-month currency forward rate to the total equity exposure of each country in the Index. The Underlying Fund, which is also advised by WisdomTree Asset Management, may constitute a substantial portion of the Fund’s assets.

The Index is a fundamentally weighted index designed to provide exposure to small-capitalization companies selected from the WisdomTree Global Dividend Index (“Parent Index”), which defines the dividend-paying universe of companies in the United States, developed countries, and emerging markets throughout the world, while at the same time neutralizing exposure to fluctuations between the value of foreign currencies and the U.S. dollar. The starting universe of the Index consists of the bottom 5% of the total market capitalization of the Parent Index that have (i) a market capitalization of at least \$200 million as of the Index screening date; (ii) an average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the six months preceding the Index screening date. The Index then selects the largest 1,000 companies after the initial market cap and liquidity screens are applied. Securities are then weighted based on dividends paid. Companies that pay a greater total dollar amount of dividends are more heavily weighted. As of September 30, 2017, the Index had a market capitalization range from \$296 million to \$12.4 billion, with an average market capitalization of \$1.6 billion. As noted above, the Underlying Fund Index applies the same eligibility criteria and weighting scheme with respect to its component stocks.

To derive a company’s initial Index weight, (i) multiply the U.S. dollar value of the company’s annual gross dividend per share by the number of common shares outstanding for that company (the “Cash Dividend Factor”); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies’ Cash Dividend Factors; and (iv) divide the company’s Cash Dividend Factor by the sum of all Cash Dividend Factors. After a company’s initial weight is determined by cash dividends, the Index will apply a regional adjustment factor. This factor adjusts the weight allocated to each region (i.e., three regions—U.S., developed and emerging market countries) of the Index so the regional weights match those of the float-adjusted market cap weighted universe of dividend and non-dividend paying companies that meet the liquidity and market capitalization criteria for the Parent Index. “Float-adjusted” market cap means that the share amounts used in calculating the market cap reflect only shares available to investors. To the extent a region’s weight in the Index needs to be increased or decreased, the weight of each component security in that region will be increased or decreased, respectively, on a pro rata basis. After the regional adjustment factor is applied, the Index will cap any one sector at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities. The Fund’s investment adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund (either directly or via investments in the Underlying Fund).

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the industrial and consumer discretionary sectors.

The Index “hedges” against fluctuations in the relative value of foreign currencies against the U.S. dollar. This Index is designed to have higher returns than an equivalent unhedged investment when foreign currencies are falling relative to the dollar. Conversely, the Index is designed to have lower returns than an equivalent unhedged investment when foreign currencies are rising relative to the U.S. dollar. The Index applies an applicable published one-month currency forward rate to the total equity exposure of each country in the Index to hedge against fluctuations in the relative value of each such foreign currency against the U.S. dollar.

Forward currency contracts or futures contracts are used to offset the Fund’s exposure to the foreign currencies represented in the Index. The amount of forward contracts and futures contracts in the Fund is based on the aggregate exposure of the Fund and Index to these foreign currencies. While this approach is designed to minimize the impact of currency fluctuations on Fund returns, it does not necessarily eliminate the Fund’s exposure to all

WisdomTree Trust Prospectus 47

---

---

**Table of Contents**

**Table of Contents**

currency fluctuations. The return of the forward currency contracts and currency futures contracts may not perfectly offset the actual fluctuations of these foreign currencies relative to the U.S. dollar.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

**Capital Controls and Sanctions Risk.** Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** The Fund uses various strategies to attempt to minimize the impact of changes in the value of the non-U.S. currencies against the U.S. dollar. These strategies may not be successful. In order to minimize transaction costs, or for other reasons, the Fund's exposure to such currencies may not be fully hedged at all times.

Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.

Cyber Security Risk. The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information.

48 WisdomTree Trust Prospectus

---

**Table of Contents**

Table of Contents

Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund invests in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and/or futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the futures contracts at any particular time.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in the United States and Europe, although this may change from time to time. In June 2016, the United Kingdom voted in a referendum to leave the European Union ("EU"). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for "Brexit" is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**Table of Contents**

**Table of Contents**

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment in the Underlying Fund Risk.** The Fund’s investment performance and risks may be directly related to the investment performance and risks of the Underlying Fund.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

**Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

50 WisdomTree Trust Prospectus

---

**Table of Contents****Table of Contents**

The Fund's year-to-date total return as of September 30, 2017 was 8.46%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 10.49% 4Q/2016

Lowest Return 2.46% 1Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	1 Year	Since Inception November 19, 2015
WisdomTree Global Hedged SmallCap Dividend Fund		
Return Before Taxes Based on NAV	24.26%	20.26%
Return After Taxes on Distributions	23.14%	19.16%
Return After Taxes on Distributions and Sale of Fund Shares	14.20%	15.19%
WisdomTree Global Hedged SmallCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	24.53%	20.63%
MSCI AC World Small Cap Local Currency Index (Reflects no deduction for fees, expenses or taxes)	12.76%	10.16%

#### Management

##### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

##### Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in November 2015.

WisdomTree Trust Prospectus 51

**Table of Contents**

**Table of Contents**

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

52 WisdomTree Trust Prospectus

**Table of Contents**Table of Contents

## WisdomTree Global SmallCap Dividend Fund

## Investment Objective

The WisdomTree Global SmallCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Global SmallCap Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.43%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.43%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 44	\$ 138	\$ 241	\$ 542

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 33% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of securities in the Index whose risk, return and other characteristics resemble the risk, return, and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that consists of small-capitalization companies selected from the WisdomTree Global Dividend Index (“Parent Index”), which defines the dividend-paying universe of companies in the United States, developed countries, and emerging markets throughout the world. The starting universe of the Index consists of the bottom 5% of the total market capitalization of the Parent Index that have (i) a market capitalization of at least \$200 million as of the Index screening date; (ii) an average daily dollar volume of at least \$100,000 for the three months preceding the Index screening date; and (iii) trading of at least 250,000 shares per month for each of the

six months preceding the Index screening date. The Index then selects the largest 1,000 companies after the initial market cap and liquidity screens are applied. Securities are then weighted based on dividends paid. Companies that pay a greater total dollar amount of dividends are more heavily weighted. As of

WisdomTree Trust Prospectus 53

---

**Table of Contents****Table of Contents**

September 30, 2017, the Index had a market capitalization range from \$296 million to \$12.4 billion, with an average market capitalization of \$1.6 billion.

To derive a company's initial Index weight, (i) multiply the U.S. dollar value of the company's annual gross dividend per share by the number of common shares outstanding for that company (the "Cash Dividend Factor"); (ii) calculate the Cash Dividend Factor for each company; (iii) add together all of the companies' Cash Dividend Factors; and (iv) divide the company's Cash Dividend Factor by the sum of all Cash Dividend Factors. After a company's initial weight is determined by cash dividends, the Index will apply a regional adjustment factor. This factor adjusts the weight allocated to each region (i.e., three regions – U.S., developed and emerging market countries) of the Index so the regional weights match those of the float-adjusted market cap weighted universe of dividend and non-dividend paying companies that meet the liquidity and market capitalization criteria for the Parent Index. "Float-adjusted" market cap means that the share amounts used in calculating the market cap reflect only shares available to investors. To the extent a region's weight in the Index needs to be increased or decreased, the weight of each component security in that region will be increased or decreased, respectively, on a pro rata basis. After the regional adjustment factor is applied, the Index will cap any one sector at 25%; however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities. The Fund's investment adviser expects that, under normal circumstances, non-U.S. equity securities will comprise at least 40% of the Fund.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As September 30, 2017, a significant portion of the Index is comprised of companies in the industrial and consumer discretionary sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market

price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign government intervention (including intervention by the U.S. government with respect to foreign governments,

---

**Table of Contents**

**Table of Contents**

economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in the United States and Europe, although this may change from time to time. In June 2016, the United Kingdom voted

in a referendum to leave the European Union (“EU”). It is currently expected that the United Kingdom will withdraw from the EU by March 2019, but the precise timeframe for “Brexit” is uncertain. Brexit may have a significant impact on the economies of the United Kingdom and Europe as well as the broader global economy, which may result in increased volatility and illiquidity, and potentially lower economic growth in these markets.

Geopolitical Risk. Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental

WisdomTree Trust Prospectus 55

---

**Table of Contents**

**Table of Contents**

disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities

of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

#### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

**Table of Contents**

Table of Contents

WisdomTree Strong Dollar Emerging Markets Equity Fund

Investment Objective

The WisdomTree Strong Dollar Emerging Markets Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Strong Dollar Emerging Markets Equity Index (the “Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.58%
Fee Waivers	(0.26)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.32% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.32% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 33	\$ 160	\$ 298	\$ 701

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index consists of equity securities of emerging markets companies that derive more than 15% of their revenue from the United States. The Index is designed with a goal of maximizing exposure to emerging markets companies with significant revenue from exports to the United States that may benefit from a strengthening U.S. dollar. A strengthening U.S. dollar generally causes emerging markets companies' exports to the United States to be relatively less expensive in the U.S. market and, therefore, may result in greater demand for such exports in the

**Table of Contents****Table of Contents**

United States. Furthermore, when the U.S. dollar is strengthening, an emerging market company's revenue and profits earned in the U.S. market may appreciate when being converted back into local currencies. Companies in the Index are incorporated or domiciled and list their shares on the stock exchange in one of the following emerging market countries: Brazil, Chile, China, Czech Republic, Hungary, India, Indonesia, Korea, Malaysia, Mexico, the Philippines, Poland, Russia, South Africa, Taiwan, Thailand, or Turkey. To be eligible for inclusion in the Index a company must meet the following criteria: (i) market capitalization of at least \$200 million as of the Index screening date; and (ii) average daily dollar volume of at least \$250,000 for six months preceding the Index screening date. The following sectors are not eligible for inclusion in the Index: energy, materials, financials, real estate, telecommunication services, and utilities.

The Index is a modified market capitalization weighted index designed to increase weight to companies that have the highest positive correlation in equity performance to a strong U.S. dollar. Each stock's correlation with the U.S. dollar is measured and correlations can range from -1.0 to 1.0. Those stocks with the highest (or most positive) correlations to the U.S. dollar receive higher weights in the Index. The stock's weight is composed of two factors: 25% is determined by its market capitalization relative to other Index constituents and the other 75% is based on the rank of each stock's correlation to the U.S. dollar as described above. The maximum weight of any one sector and any one country in the Index, at the time of the Index's annual screening date, is capped at 33%; however, sector and country weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, health care, industrials, and information technology. A sector is comprised of multiple industries. For example, the consumer discretionary sector is comprised of companies in, among others, the automobiles and components, consumer durables and apparel, consumer services, media, and retailing industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the consumer discretionary, industrial and information technology sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares

in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of domestic ETFs.

Capital Controls and Sanctions Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions may, without prior warning, lead to foreign

**Table of Contents**

Table of Contents

government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Capital controls and/or sanctions may also impact the ability of the Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

**Cash Redemption Risk.** The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Currency Exchange Rate Risk.** Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Emerging Markets Risk.** Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

**Foreign Securities Risk.** Investments in non-U.S. securities involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. Investments in non-U.S. securities also may be subject to withholding or

other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging markets countries.

**Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund invests a significant portion of its assets in companies incorporated and/or domiciled in Taiwan, Korea, and India, although this may change from time to time.

**Geopolitical Risk.** Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental

WisdomTree Trust Prospectus 61

---

**Table of Contents**

**Table of Contents**

disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Industrial Sector Risk.** The Fund currently invests a significant portion of its assets in the industrial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

**Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market

volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Small-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower

**Table of Contents****Table of Contents**

volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.

**Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 21.17%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 9.08% 3Q/2016

Lowest Return (8.06)% 4Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	Since Inception
WisdomTree Strong Dollar Emerging Markets Equity Fund	1 Year October 29, 2015
Return Before Taxes Based on NAV	1.23% (2.22)%
Return After Taxes on Distributions	0.88% (2.51)%
Return After Taxes on Distributions and Sale of Fund Shares	0.97% (1.68)%
WisdomTree Strong Dollar Emerging Markets Equity Index (Reflects no deduction for fees, expenses or taxes)	1.60% (2.15)%
MSCI Emerging Markets Index (Reflects no deduction for fees, expenses or taxes)	11.19% 3.98%

**Management**

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

WisdomTree Trust Prospectus 63

**Table of Contents**

Table of Contents

**Portfolio Managers**

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in October 2015.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents**Table of Contents

## WisdomTree U.S. Domestic Economy Fund

## Investment Objective

The WisdomTree U.S. Domestic Economy Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Domestic Economy Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.33%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.33%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 34	\$ 106	\$ 185	\$ 418

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 40% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index consists of equity securities of U.S. companies that derive more than 80% of their revenue from the United States. Companies in the Index are incorporated and headquartered in the United States, and have positive cumulative earnings over the four fiscal quarters preceding the annual reconstitution date. To be eligible for inclusion in the Index a company must meet the following criteria: (i) market capitalization of at least \$5 billion as of the Index screening date; (ii) average daily dollar volume of at least \$200,000 for the six months preceding the Index screening date; and (iii) a calculated volume factor (the average daily dollar volume for the three months preceding the Index screening

date divided by the preliminary weight of the security in the Index) greater than \$200 million. For these purposes, a company's "preliminary weight" is determined by applying the weighting scheme described below to all of the companies eligible for inclusion in the Index before taking into account their calculated volume factors.

WisdomTree Trust Prospectus 65

---

---

**Table of Contents****Table of Contents**

The Index is a modified earnings stream weighted index. The earnings for each company are adjusted based on the percent of revenue from within the United States. The maximum weight of any individual security is capped at 5%. In addition, the maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25%; however, the real estate and utilities sectors are each capped at 5%. These sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, financials, health care, industrials, information technology, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the consumer discretionary sector is comprised of companies in, among others, the automobiles and components, consumer durables and apparel, consumer services, media, and retailing industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the financial and consumer discretionary sectors. To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to,

disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Financial Sector Risk. The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial

**Table of Contents****Table of Contents**

sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before

and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 25,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

WisdomTree Trust Prospectus 69

---

**Table of Contents**Table of Contents

## WisdomTree U.S. Export and Multinational Fund

## Investment Objective

The WisdomTree U.S. Export and Multinational Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Export and Multinational Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.33%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.33%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 34	\$ 106	\$ 185	\$ 418

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 57% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index consists of equity securities of U.S. companies that derive less than 60% of their revenue from the United States. Companies in the Index are incorporated and headquartered in the United States, and have positive cumulative earnings over the four fiscal quarters preceding the annual reconstitution date. To be eligible for inclusion in the Index a company must meet the following criteria: (i) market capitalization of at least \$5 billion as of the Index screening date; (ii) average daily dollar volume of at least \$200,000 for the six months preceding the Index screening date; and (iii) a calculated volume factor (the average daily dollar volume for the three months preceding the Index screening

date divided by the preliminary weight of the security in the Index) greater than \$200 million. For these purposes, a company's "preliminary weight" is determined by applying the weighting scheme described below to all of the companies eligible for inclusion in the Index before taking into account their calculated volume factors.

70 WisdomTree Trust Prospectus

---

**Table of Contents****Table of Contents**

The Index is a modified earnings stream weighted index. The earnings for each company are adjusted based on the percent of revenue from outside the United States. The maximum weight of any individual security is capped at 5%. In addition, the maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25%; however, the real estate and utilities sectors are each capped at 5%. These sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. If a component security no longer meets applicable trading volume thresholds as of the annual Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security's weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: energy, consumer discretionary, consumer staples, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Index is comprised of companies in the information technology and health care sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term

market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Health Care Sector Risk. The Fund currently invests a significant portion of its assets in the health care sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care

WisdomTree Trust Prospectus 71

---

**Table of Contents**

Table of Contents

equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

Index and Data Risk. The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

Information Technology Sector Risk. The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

Investment Style Risk. The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

Issuer-Specific Risk. Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

Large-Capitalization Investing Risk. The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

Non-Correlation Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

72 WisdomTree Trust Prospectus

---

**Table of Contents****Table of Contents**

The Fund's year-to-date total return as of September 30, 2017 was 16.81%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 7.31% 3Q/2016

Lowest Return 0.89% 1Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	Since 1 Year Inception July 21, 2015
WisdomTree U.S. Export and Multinational Fund	
Return Before Taxes Based on NAV	12.90% 5.62%
Return After Taxes on Distributions	12.48% 5.18%
Return After Taxes on Distributions and Sale of Fund Shares	7.62% 4.26%
WisdomTree U.S. Export and Multinational Index (Reflects no deduction for fees, expenses or taxes)	12.65% 5.31%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	11.96% 6.19%

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in July 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in July 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in July 2015.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund

WisdomTree Trust Prospectus 73

**Table of Contents**

**Table of Contents**

shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 25,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## WisdomTree Fundamental U.S. Corporate Bond Fund

## Investment Objective

The WisdomTree Fundamental U.S. Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Corporate Bond Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.28%
Fee Waivers	(0.10)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.18% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 18	\$ 80	\$ 147	\$ 346

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 45% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

## Edgar Filing: WisdomTree Trust - Form 485BPOS

The Index is designed to capture the performance of selected issuers in the U.S. investment grade corporate bond market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization-weighted approaches of corporate bond indices.

WisdomTree Trust Prospectus 75

---

**Table of Contents****Table of Contents**

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year; and (iv) rated investment grade (at least BBB- or Baa3) by Standard & Poor's or Moody's. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials and utilities) based on rules-based fundamental metrics distinguishing cash flow, profitability and leverage. Bonds are ranked within each sector based on factor score and then screened so that the lowest 20% factor scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default and duration. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 5%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced quarterly.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the

76 WisdomTree Trust Prospectus

---

**Table of Contents**

**Table of Contents**

other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a seven-year duration would be expected to drop by approximately 7% in response to a 1% increase in interest rates.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

#### Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

WisdomTree Trust Prospectus 77

Table of Contents

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC (“Voya IM”) serves as sub-adviser to the Fund.

Portfolio Managers

The Fund is managed by Voya IM’s Investment Grade Credit Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Travis King, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Anil Katarya, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Kurt Kringelis, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## WisdomTree Fundamental U.S. High Yield Corporate Bond Fund

## Investment Objective

The WisdomTree Fundamental U.S. High Yield Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. High Yield Corporate Bond Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.10)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.38% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 39	\$ 144	\$ 259	\$ 594

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the U.S. non-investment-grade corporate bond (“junk bonds”) market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those individual securities which offer favorable income characteristics. The goal is to improve the

WisdomTree Trust Prospectus 79

---

---

**Table of Contents****Table of Contents**

risk-adjusted performance of traditional market capitalization-weighted approaches of high-yield corporate bond indices.

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$500 million in par amount outstanding; (iii) have a remaining maturity of at least one year; (iv) rated non-investment grade by Moody's or Standard & Poor's. In addition, the issuer cannot have defaulted or be in distress. For the purposes of the Index, bonds issued under Regulation S are excluded from eligibility. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials, utilities, consumer and energy) based on rules-based fundamental metrics distinguishing cash flow characteristics and discards the securities with poor cash flow performance. Remaining bonds are ranked within each sector based on liquidity scores and then screened so that the lowest 5% liquidity scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 2%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced semi-annually.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's

third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

80 WisdomTree Trust Prospectus

---

---

**Table of Contents**

**Table of Contents**

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund’s use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser’s and sub-adviser’s ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

**High Yield Securities Risk.** Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer’s creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a five-year duration would be expected to drop by approximately 5% in response to a 1% increase in interest rates.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the

market segments relating to the Index.

**Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to

**Table of Contents**

**Table of Contents**

the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Fund Performance**

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

**Management**

**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC ("Voya IM") serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below. Randall Parrish, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Rick Cumberledge, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

## WisdomTree Fundamental U.S. Short-Term Corporate Bond Fund

## Investment Objective

The WisdomTree Fundamental U.S. Short-Term Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Short-term Corporate Bond Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.28%
Fee Waivers	(0.10)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.18% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.18% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 18	\$ 80	\$ 147	\$ 346

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 38% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

## Edgar Filing: WisdomTree Trust - Form 485BPOS

The Index is designed to capture the performance of selected issuers in the short-term U.S. investment grade corporate bond market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable characteristics and then tilts to those which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization- weighted approaches of corporate bond indices.

WisdomTree Trust Prospectus 83

---

---

**Table of Contents****Table of Contents**

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year and at most five years; and (iv) rated investment grade (at least BBB- or Baa3) by Standard & Poor's or Moody's. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials and utilities) based on rules-based fundamental metrics distinguishing cash flow, profitability and leverage. Bonds are ranked within each sector based on factor score and then screened so that the lowest 20% factor scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default and duration. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 5%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced quarterly.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

Derivatives Risk. The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an

84 WisdomTree Trust Prospectus

**Table of Contents**

investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer's creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Non-Diversification Risk. The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

#### Fund Performance

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

## WisdomTree Fundamental U.S. Short-Term High Yield Corporate Bond Fund

## Investment Objective

The WisdomTree Fundamental U.S. Short-Term High Yield Corporate Bond Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Fundamental U.S. Short-term High Yield Corporate Bond Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.10)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.38% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 39	\$ 144	\$ 259	\$ 594

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 69% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to capture the performance of selected issuers in the short-term U.S. non-investment-grade corporate bond (“junk bonds”) market that are deemed to have favorable fundamental and income characteristics. The Index employs a multi-step process, which screens based on fundamentals to identify bonds with favorable

WisdomTree Trust Prospectus 87

---

---

**Table of Contents****Table of Contents**

characteristics and then tilts to those individual securities which offer favorable income characteristics. The goal is to improve the risk-adjusted performance of traditional market capitalization-weighted approaches of high-yield corporate bond indices.

The Index is comprised of corporate bonds of public issuers domiciled in the United States. To be eligible for inclusion in the Index, bonds must meet the following criteria: (i) pay fixed-rate coupons; (ii) have at least \$350 million in par amount outstanding; (iii) have a remaining maturity of at least one year and at most five years; (iv) rated non-investment grade by Moody's or Standard & Poor's. In addition, the issuer cannot have defaulted or be in distress. For the purposes of the Index, bonds issued under Regulation S are excluded from eligibility. All bonds are denominated in U.S. dollars.

The Index utilizes a "screen and tilt" rules-based approach to isolate bonds that have favorable fundamentals and tilts to those bonds with favorable income and valuation characteristics. Once the Index universe is defined from the eligibility criteria, individual bonds are assigned a factor score against their industry sector peers (industrials, financials, utilities, consumer and energy) based on rules-based fundamental metrics distinguishing cash flow characteristics and discards the securities with poor cash flow performance. Remaining bonds are ranked within each sector based on liquidity scores and then screened so that the lowest 5% liquidity scores in each sector are removed from the Index. The remaining bonds are then assigned an income tilt score based on the probability of default. The income tilt score is then applied within each sector to determine a bond's weight in the Index, with bonds receiving higher income tilt scores within each sector more heavily weighted. Issuer exposure is capped at 3%, with excess exposure distributed to the remaining bonds on a pro-rata basis. The Index is rebalanced semi-annually.

The Fund may invest up to 20% of its assets in other securities and/or derivatives. Derivative investments may include interest rate futures, swaps, forward contracts and repurchase agreements. The Fund's use of derivatives will be underpinned by investments in cash or other liquid assets.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's

operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

88 WisdomTree Trust Prospectus

---

**Table of Contents**

**Table of Contents**

**Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund’s use of forward currency contracts, futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts and/or swaps, these risks include but are not limited to: (1) the success of the adviser’s and sub-adviser’s ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts and/or swaps; and (3) no guarantee that an active market will exist for the futures contracts and/or swaps at any particular time.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.

**High Yield Securities Risk.** Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of an increase in interest rates and changes to other factors, such as perception of an issuer’s creditworthiness. Funds with higher durations generally are subject to greater interest rate risk. For example, the price of a security with a three-year duration would be expected to drop by approximately 3% in response to a 1% increase in interest rates.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the

market segments relating to the Index.

**Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to

**Table of Contents**

**Table of Contents**

the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Fund Performance**

The Fund commenced operations on April 27, 2016, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the Fund's performance to a broad measure of market performance.

**Management**

**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Voya Investment Management Co., LLC ("Voya IM") serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by Voya IM's High Yield Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below. Randall Parrish, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016. Rick Cumberledge, CFA, Portfolio Manager, has been a portfolio manager of the Fund since its inception in April 2016.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents**Table of Contents

## WisdomTree Dynamic Bearish U.S. Equity Fund

## Investment Objective

The WisdomTree Dynamic Bearish U.S. Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Bearish U.S. Equity Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.53%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.53%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.48% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 165	\$ 291	\$ 660

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 153% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index includes: (i) long U.S. equity positions (the “Long Equity Basket”) or long U.S. Treasury positions (the “Long Treasury Basket”); and (ii) short U.S. equity positions (the “Short Equity Basket”). The Long Equity Basket consists of approximately 100 U.S. large-capitalization stocks that meet Index eligibility requirements and have the best combined score based on fundamental growth and value signals. The starting universe of companies eligible for inclusion in the Long Equity Basket includes companies that meet the following criteria: (i) incorporated and headquartered in the United States; (ii) listed on the New York Stock Exchange, NASDAQ Global or NASDAQ

WisdomTree Trust Prospectus 91

---

---

**Table of Contents****Table of Contents**

Global Select Market; (iii) market capitalization of at least \$2 billion by the Index screening date; and (iv) average daily dollar volume of at least \$100,000 for three months preceding the Index screening date. Eligible securities for the Long Equity Basket are organized by sector such that the sectors within the Long Equity Basket are weighted the same (i.e., sector neutral) as the eleven (11) sectors in a market capitalization weighted portfolio of the largest 500 U.S. companies. Within the sector designations, stocks are selected based on a sector-specific indicator which scores companies based on fundamental growth and value signals, as described below, and the stocks with the highest scores within each sector are selected for a total of approximately 100 stocks in the Long Equity Basket. Stocks are then weighted within each sector of the Long Equity Basket according to their volatility characteristics with greater weight given to stocks with lower volatility. Weighting is determined by using the standard deviation (a measure of volatility) and beta (a measure of correlation) of such stocks. The Long Treasury Basket consists of U.S. Treasury bills with maturities of up to one (1) year.

The Short Equity Basket consists of short positions in the largest 500 U.S. companies, weighted by float-adjusted market capitalization, designed to act as a market risk hedge. Short selling involves selling a security that is not owned but has been borrowed from a third party with the intention of buying an identical security at the market price at a later date to return to that third party. Unlike long positions which profit from increases in the price of a security, short positions profit from the falling price of a security.

The Index provides a dynamic allocation of either (i) 100% exposure to the Long Equity Basket and 0% exposure to the Long Treasury Basket, or (ii) 0% exposure to the Long Equity Basket and 100% exposure to the Long Treasury Basket, while employing a variable hedge of either 75% or 100% exposure to the Short Equity Basket, based on a quantitative rules-based market indicator that scores growth and value market signals. Accordingly, the Index is designed to have favorable returns during a declining U.S. equity market (a “bear” market”). The growth and value signals are determined by the following criteria: (i) the growth indicator is predicated on the change of the profit margin (e.g., operating income to sales) and profit quality (e.g., operating cash flow over operating income) of the securities in the starting universe of companies; and (ii) the value indicator is predicated on the value of the price multiples (e.g., market capitalization to equity) of the securities in the starting universe of companies. The resulting value and growth scores are equally weighted and calculated using rolling three- month averages. During times when the market indicator model shows attractive readings (high score) on valuation and growth characteristics, which are designed to indicate more favorable conditions for the U.S. equity market environment, the Index provides 100% exposure to the Long Equity Basket (and, accordingly, 0% exposure to the Long Treasury Basket) and a hedge with 75% exposure to the Short Equity Basket. During times when the market indicator model shows unattractive readings (low score) on valuation and growth characteristics, which are designed to indicate less favorable conditions for the U.S. equity market environment, the Index provides 0% exposure to the Long Equity Basket (and, accordingly, 100% exposure to the Long Treasury Basket) and a hedge with 100% exposure to the Short Equity Basket.

The stocks within the Index’s Long Equity Basket are reconstituted and rebalanced on a quarterly basis. The amount of exposure to the Index’s Short Equity Basket is reset on a monthly basis; however, the stocks within the Index’s Short Equity Basket are reconstituted and rebalanced annually.

The Fund will generally hold long positions (and may hold short positions) in a manner similar to the Index, although the Fund’s exposure to short positions is expected to be obtained through derivatives, such as futures contracts and swaps.

WisdomTree Investments, Inc. (“WisdomTree Investments”), as index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Long Equity Basket is comprised of companies in the information technology and financial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections

92 WisdomTree Trust Prospectus

---

---

**Table of Contents**

**Table of Contents**

in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Counterparty and Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults, changes in the credit ratings of the Fund’s portfolio investments and/or perceptions related thereto.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund invests in derivatives, including as a substitute to gain short exposure to equity securities and equity indexes. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund’s Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund’s use of futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to swaps and futures contracts, these risks include but are not limited to: (1) the success of the adviser’s and sub-adviser’s ability to predict movements in the prices of individual indexes or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the indexes or securities and the prices of swaps and futures contracts; and (3) no guarantee that an active market will exist for swaps and

futures contracts at any particular time.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

**Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market

WisdomTree Trust Prospectus 93

---

**Table of Contents**

**Table of Contents**

dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

**Hedging Risk.** Derivatives used by the Fund to offset its exposure to market volatility may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if securities shorted by the Fund appreciate at the same time the Fund's long positions decrease in value.

**Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if

securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

---

**Table of Contents****Table of Contents**

**Portfolio Turnover Risk.** The Fund's investment strategy may result in a high portfolio turnover rate. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect the Fund's performance.

**Short Sales Risk.** The Fund will engage in "short sale" transactions. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. The Fund also may enter into short positions in equities as well as a short derivative position through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

**Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 2.53%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 2.02% 3Q/2016

Lowest Return (0.98)% 1Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

WisdomTree Dynamic Bearish U.S. Equity Fund	1 Year	Since Inception December 23, 2015
---	--------	--------------------------------------

Return Before Taxes Based on NAV	1.53%	2.47%

**Management****Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation (“Mellon Capital”) serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents**Table of Contents

## WisdomTree Dynamic Long/Short U.S. Equity Fund

**Investment Objective**

The WisdomTree Dynamic Long/Short U.S. Equity Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dynamic Long/Short U.S. Equity Index (the “Index”).

**Fees and Expenses of the Fund**

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund’s average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.53%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.53%
Fee Waivers	(0.05)% <sup>1</sup>
Total Annual Fund Operating Expenses After Fee Waivers	0.48% <sup>1</sup>

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) has contractually agreed to limit the Management Fee to 0.48% through October 31, 2018, unless earlier terminated by the Board of Trustees of WisdomTree Trust (the “Trust”) for any reason at any time.

**Example**

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$ 49	\$ 165	\$ 291	\$ 660

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 126% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

**Principal Investment Strategies of the Fund**

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index includes long U.S. equity positions (the “Long Equity Basket”) and, at times, short U.S. equity positions (the “Short Equity Basket”). The Long Equity Basket consists of approximately 100 U.S. large-capitalization stocks that meet Index eligibility requirements and have the best combined score based on fundamental growth and value signals. The starting universe of companies eligible for inclusion in the Long Equity Basket includes companies that meet the following criteria: (i) incorporated and headquartered in the United States; (ii) listed on the New York Stock Exchange, NASDAQ Global or NASDAQ Global Select Market; (iii) market capitalization of at least \$2 billion

WisdomTree Trust Prospectus 97

---

---

**Table of Contents****Table of Contents**

by the Index screening date; and (iv) average daily dollar volume of at least \$100,000 for three months preceding the Index screening date. Eligible securities for the Long Equity Basket are organized by sector such that the sectors within the Long Equity Basket are weighted the same (i.e., sector neutral) as the eleven (11) sectors in a market capitalization weighted portfolio of the largest 500 U.S. companies. Within the sector designations, stocks are selected based on a sector-specific indicator which scores companies based on fundamental growth and value signals, as described below, and the stocks with the highest scores within each sector are selected for a total of approximately 100 stocks in the Long Equity Basket. Stocks are then weighted within each sector of the Long Equity Basket according to their volatility characteristics with greater weight given to stocks with lower volatility. Weighting is determined by using the standard deviation (a measure of volatility) and beta (a measure of correlation) of such stocks. The Short Equity Basket consists of short positions in the largest 500 U.S. companies, weighted by float-adjusted market capitalization, designed to act as a market risk hedge. Short selling involves selling a security that is not owned but has been borrowed from a third party with the intention of buying an identical security at the market price at a later date to return to that third party. Unlike long positions which profit from increases in the price of a security, short positions profit from the falling price of a security.

The Index maintains 100% exposure to the Long Equity Basket while employing a variable hedge ranging from 0% to 100% exposure to the Short Equity Basket based on a quantitative rules-based market indicator that scores growth and value market signals. The growth and value signals are determined by the following criteria: (i) the growth indicator is predicated on the change of the profit margin (e.g., operating income to sales) and profit quality (e.g., operating cash flow over operating income) of the securities in the starting universe of companies; and (ii) the value indicator is predicated on the value of the price multiples (e.g., market capitalization to equity) of the securities in the starting universe of companies. The resulting value and growth scores are equally weighted and calculated using rolling three-month averages. During times when the market indicator model shows attractive readings (high score) on valuation and growth characteristics, which are designed to indicate more favorable conditions for the broader U.S. equity market, the Index is unhedged with 0% exposure to the Short Equity Basket. During times when the market indicator model shows unattractive readings (low score) on valuation and growth characteristics, which are designed to indicate less favorable conditions for the broader U.S. equity market, the Index seeks to hedge broader U.S. equity market risk by increasing exposure to the Short Equity Basket.

The stocks within the Index's Long Equity Basket are reconstituted and rebalanced on a quarterly basis. The amount of exposure to the Index's Short Equity Basket is reset on a monthly basis; however, the stocks within the Index's Short Equity Basket are reconstituted and rebalanced annually.

The Fund will generally hold long positions (and may hold short positions) in a manner similar to the Index, although the Fund's exposure to short positions is expected to be obtained through derivatives, such as futures contracts and swaps.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of September 30, 2017, a significant portion of the Long Equity Basket is comprised of companies in the information technology and financial sectors.

To the extent the Index concentrates (i.e., holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or

ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

**Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

98 WisdomTree Trust Prospectus

---

---

**Table of Contents**

**Table of Contents**

**Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.

**Counterparty and Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults, changes in the credit ratings of the Fund's portfolio investments and/or perceptions related thereto.

**Cyber Security Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, Authorized Participants, or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cyber security breaches.

**Derivatives Risk.** The Fund invests in derivatives, including as a substitute to gain short exposure to equity securities and equity indexes. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of futures contracts and/or swaps. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to swaps and futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual indexes or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the indexes or securities and the prices of swaps and futures contracts; and (3) no guarantee that an active market will exist for swaps and futures contracts at any particular time.

**Financial Sector Risk.** The Fund currently invests a significant portion of its assets in the financial sector, and therefore the Fund's performance could be negatively impacted by events affecting this sector. The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services.

This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

Geopolitical Risk. The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Hedging Risk. Derivatives used by the Fund to offset its exposure to market volatility may not perform as intended. There can be no assurance that the Fund's hedging transactions will be effective. The value of an investment in the Fund could be significantly and negatively impacted if securities shorted by the Fund appreciate at the same time the Fund's long positions decrease in value.

**Table of Contents**

**Table of Contents**

**Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. The Index is heavily dependent on quantitative models and data from one or more third parties and the Index may not perform as intended. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.

**Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

**Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

**Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

**Large-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

**Mid-Capitalization Investing Risk.** The Fund may invest a relatively large percentage of its assets in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies.

**Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

**Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To

the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

**Portfolio Turnover Risk.** The Fund's investment strategy may result in a high portfolio turnover rate. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect the Fund's performance.

**Short Sales Risk.** The Fund will engage in "short sale" transactions. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. The Fund also may enter into short positions in equities as well as a short derivative position through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is

**Table of Contents****Table of Contents**

limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

**Fund Performance**

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. If WisdomTree Asset Management had not waived certain fees during certain periods, the Fund's returns would have been lower. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund's year-to-date total return as of September 30, 2017 was 12.70%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

Return Quarter/Year

Highest Return 6.67% 1Q/2016

Lowest Return (0.41)% 4Q/2016

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Average Annual Total Returns for the periods ending December 31, 2016

	1 Year	Since Inception December 23, 2015
WisdomTree Dynamic Long/Short U.S. Equity Fund		
Return Before Taxes Based on NAV	11.72%	11.29%
Return After Taxes on Distributions	10.82%	10.41%
Return After Taxes on Distributions and Sale of Fund Shares	6.96%	8.39%
WisdomTree Dynamic Long/Short U.S. Equity Index (Reflects no deduction for fees, expenses or taxes)	12.39%	11.99%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	11.96%	10.64%

**Management**

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation ("Mellon Capital") serves as sub-adviser to the Fund.

WisdomTree Trust Prospectus 101

Table of Contents

Portfolio Managers

The Fund is managed by Mellon Capital's Equity Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Richard A. Brown, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Thomas J. Durante, CFA, a Managing Director and Senior Portfolio Manager, Equity Portfolio Management, has been a portfolio manager of the Fund since its inception in December 2015.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc. (formerly known as BATS Exchange, Inc.), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

**Table of Contents****Table of Contents****Additional Information About the Funds****Additional Information About the Funds' Investment Objectives**

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (“Index”) developed by WisdomTree Investments. Each Index consists of securities in the market suggested by its name that meet specific criteria developed by WisdomTree Investments. Since each Fund’s investment objective has been adopted as a non-fundamental investment policy, each Fund’s investment objective may be changed without a vote of shareholders upon 60 days’ written notice to shareholders.

**Additional Information About the Funds’ Investment Strategies**

Each Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of securities suggested by its name (i.e., investments connoted by its Index), as applicable. Each applicable Fund anticipates meeting this policy because, under normal circumstances, at least 80% of each Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of its underlying Index (including indirect investments through the Underlying Fund for each of the Global Hedged SmallCap Dividend Fund and the Dynamic Currency Hedged International Quality Dividend Growth Fund) and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities, such as TBA Transactions and depositary receipts based on component securities. WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) expects that, over time, the correlation between a Fund’s performance and that of its Index, before fees and expenses, will be 95% or better. A number of factors may affect a Fund’s ability to achieve a high degree of correlation with its Index, and there can be no guarantee that a Fund will achieve a high degree of correlation.

Funds designated as “International” generally invest in developed markets outside the United States. Funds designated as “Global” generally invest in developed and emerging markets throughout the world, including the United States and other regions.

The quantity of holdings in a Fund, by using a representative sampling strategy, will be based on a number of factors, including asset size of the Fund. In addition, from time to time, securities are added to or removed from an Index and consequently the attributes of an Index, such as sectors, industries or countries represented in an Index and weightings, may change. The Fund may sell securities that are represented in an Index, or purchase securities that are not yet represented in an Index, in anticipation of their removal from or addition to an Index or to reflect various corporate actions or other changes to an Index. Further, the Fund may overweight or underweight securities in an Index, purchase or sell securities not in the Index, or utilize various combinations of other available techniques, in seeking to track an Index.

Indices. Each Index is either (i) “fundamentally weighted” and differs from most traditional indexes in that the proportion, or “weighting,” of the securities in each Index is based on a measure of fundamental value, such as dividends or volatility, or (ii) modified market capitalization weighted based on a combination of market cap and a correlation rank factor based on equity performance. Most traditional indexes and index funds weight their securities by looking simply at the market capitalization of such securities.

For each “Dividend Index” only regular dividends (i.e., established or quarterly dividends as opposed to non-recurring or special dividends) are included in the determination of cash dividends or dividend yield.

International Equity ETFs. For U.S. investors, international equity investments include two components of return. The first is the return attributable to stock prices in the non-U.S. market or markets in which an investment is made. The second is the return attributable to the value of non-U.S. currencies in these markets relative to the U.S. dollar.

Hedged Equity Funds. Each Hedged Equity Fund employs strategies to “hedge” against fluctuations in the relative value of non-U.S. currencies included in its underlying Index against the U.S. dollar. The Global Hedged SmallCap Dividend Fund seeks to track the performance of equity securities in a foreign market that is attributable solely to stock prices. The Dynamic Currency Hedged Europe Equity Fund, Dynamic Currency Hedged International Equity Fund, Dynamic Currency Hedged International Quality Dividend Growth Fund, Dynamic Currency Hedged

International SmallCap Equity Fund and Dynamic Currency Hedged Japan Equity Fund (collectively, the “Dynamic Hedged Equity Funds”) seek to track the performance of equity securities in foreign markets while dynamically hedging currency fluctuations in the relative value of applicable foreign currencies against the U.S. dollar using quantitative signals to determine hedge ratios on the foreign currencies. While currency hedging seeks to reduce or eliminate losses from currency, it can also reduce or eliminate gains from currency to the extent a currency hedge is applied at an inopportune time.

WisdomTree Trust Prospectus 103

---

---

**Table of Contents****Table of Contents**

Global ex-Mexico Equity Fund. The Fund's Index only includes components from countries defined to be eligible for investments (outside Mexico) by The National Commission for the Pension System (CONSAR). Currently allowable countries are set forth in the Fund's principal investment strategies, but the country list is subject to change and WisdomTree Investments reserves the right to adjust the Index's allowable country list based on CONSAR eligibility.

**Non-Principal Information About the Funds' Investment Strategies**

Each Fund may invest in other investments that the Fund believes will help it track its Index, including cash and cash equivalents, as well as in shares of other investment companies (including affiliated investment companies, such as ETFs), forward contracts, futures contracts, options on futures contracts, options and swaps.

Each Fund may lend its portfolio securities in an amount not to exceed one third (33 1/3%) of the value of its total assets via a securities lending program through its securities lending agent, State Street Bank and Trust Company, to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. A securities lending program allows a Fund to receive a portion of the income generated by lending its securities and investing the respective collateral. A Fund will receive collateral for each loaned security which is at least equal to the market value of that security, marked to market each trading day. In the securities lending program, the borrower generally has the right to vote the loaned securities; however, a Fund may call loans to vote proxies if a material issue affecting the Fund's economic interest in the investment is to be voted upon. Security loans may be terminated at any time by a Fund.

**Additional Principal Risk Information About the Funds**

This section provides additional information regarding the principal risks described under "Principal Risks of Investing in the Fund" in the Fund Summaries. Risk information may not be applicable to each Fund. Please consult each Fund's Summary sections to determine which risks are applicable to a particular Fund. Each of the factors below could have a negative impact on Fund performance and trading prices.

**Capital Controls and Sanctions Risk**

Economic conditions, such as volatile currency exchange rates and interest rates, political events, military action and other conditions, may, without prior warning, lead to government intervention (including intervention by the U.S. government with respect to foreign governments, economic sectors, foreign companies and related securities and interests) and the imposition of capital controls and/or sanctions, which may also include retaliatory actions of one government against another government, such as seizure of assets. Capital controls and/or sanctions include the prohibition of, or restrictions on, the ability to own or transfer currency, securities or other assets, which may potentially include derivative instruments related thereto. Levies may be placed on profits repatriated by foreign entities (such as the Funds). Capital controls and/or sanctions may also impact the ability of a Fund to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, foreign securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of a Fund, and cause a Fund to decline in value.

**Cash Redemption Risk**

Each of the Emerging Market Dividend Fund's and the Strong Dollar Emerging Markets Equity Fund's investment strategy requires it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds, it may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause a Fund to recognize capital gains that it might not have recognized if it had made a redemption in-kind (i.e., distribute securities as payment of redemption proceeds). As a result, the Funds may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

**Counterparty and Issuer Credit Risk**

The Funds intend to engage in investment transactions or enter into derivative or other contracts with third parties (i.e., "counterparties"). The Funds bear the risk that the counterparty to such contracts may default on its obligations or otherwise fail to honor its obligations or cause such issuer or counterparty to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. If a counterparty defaults on its

payment obligations a Fund will lose money and the value of an investment in Fund shares may decrease. In addition, the Funds may engage in such investment transactions with a limited number of counterparties, which may increase a Fund's exposure to counterparty credit risk. Listed futures contracts can be traded on futures exchanges without material counterparty credit. After a trade is cleared, the exchange is the ultimate counterparty for all contracts, so the counterparty risk on a listed futures contract ultimately is the creditworthiness of the exchange's clearing corporation.

104 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents****Currency Exchange Rate Risk**

Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investments and the value of a Fund's shares. Because each Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in a Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include interest rates, national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning, and you may lose money.

**Hedged Equity Funds Only:** Each of the Hedged Equity Funds employs various strategies to minimize the impact of changes in the value of applicable currencies, such as the euro, the British pound, the Korean won and the Japanese yen, against the U.S. dollar. However, these strategies may not be successful. In addition, a Fund may not be fully hedged at all times in order to minimize transaction costs or for other reasons.

**Cyber Security Risk**

The Funds and their service providers may be susceptible to operational and information security risks resulting from a breach in cyber security, including cyber-attacks. A breach in cyber security, intentional or unintentional, may adversely impact the Funds in many ways, including, but not limited to, disruption of a Fund's operational capacity, loss of proprietary information, theft or corruption of data maintained online or digitally, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting a Fund's third-party service providers, including the investment adviser, sub-adviser, administrator, custodian, and transfer agent, may subject a Fund to many of the same risks associated with direct cyber security breaches and adversely impact the Fund. For instance, cyber-attacks may impact a Fund's ability to calculate its NAV, cause the release of confidential business information, impede trading, cause a Fund to incur additional compliance costs associated with corrective measures, subject a Fund to regulatory fines or other financial losses, and/or cause reputational damage to a Fund. Cyber security breaches of market makers, Authorized Participants, or the issuers of securities in which a Fund invests could also have material adverse consequences on a Fund's business operations and cause financial losses for a Fund and its shareholders. While the Funds and their service providers have established business continuity plans and risk management systems designed to address cyber security risks, prevent cyber-attacks and mitigate the impact of cyber security breaches, there are inherent limitations on such plans and systems. In addition, the Funds have no control over the cyber security protections put in place by their service providers or any other third parties whose operations may affect the Funds or their shareholders.

**Derivatives Risk**

Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as market risk and issuer-specific risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in a Fund may change quickly and without warning, and you may lose money. Derivatives include forward currency contracts, futures contracts, currency swaps, interest rate swaps,

total return swaps and credit linked notes.

**Forward Currency Contracts**

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract .A non-deliverable forward currency contract is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the movement of the currencies, a net cash settlement will be made by one party to the other. The risks of forward currency contracts include but are not limited to the risk that the counterparty will default on its obligations.

WisdomTree Trust Prospectus 105

---

---

**Table of Contents****Table of Contents****Futures Contracts**

A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. The risks of futures contracts include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time.

**Swaps**

A currency swap is an agreement between two parties to exchange one currency for another at a future rate. An interest rate swap typically involves the exchange of a floating interest rate payment for a fixed interest payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. The risks of swaps include but are not limited to the potential to increase or decrease the overall volatility of the Fund's investments and its share price.

**Credit Linked Notes**

A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The risks of credit linked notes include but are not limited to default by the issuer and the underlying reference asset or entity.

**Foreign Securities Risk**

Investments in non-U.S. securities and instruments involve political, regulatory, and economic risks that may not be present in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations, political or economic instability, or geographic events that adversely impact issuers of foreign securities. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in a Fund more volatile and potentially less liquid than other types of investments and may be heightened in connection with investments in developing or emerging market countries. Foreign securities also include American Depositary Receipts ("ADRs") which are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Global Depositary Receipts ("GDRs"), which are similar to ADRs, represent shares of foreign-based corporations and are generally issued by international banks in one or more markets around the world. Investments in ADRs and GDRs may be less liquid and more volatile than underlying shares in their primary trading markets.

**Geographic Investment Risk**

To the extent that a Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. For example, political and economic conditions and changes in regulatory, tax, or economic policy in a country could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Currency developments or restrictions, political and social instability, and changing economic conditions have

resulted in significant market volatility.

#### Emerging Markets Risk

Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty,

106 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

(iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency or payment of dividends and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact a Fund's ability to buy, sell, transfer, receive, deliver or otherwise obtain exposure to, emerging market securities or currency, negatively impact the value and/or liquidity of such instruments, adversely affect the trading market and price for shares of the Fund and cause a Fund to decline in value. The volatility of emerging markets may be heightened by the actions (such as significant buying and selling) of a few major investors. For example, substantial increases or decreases in cash flows of funds investing in these markets could significantly affect local securities' prices and cause Fund share prices to decline. For these and other reasons, investments in emerging markets are often considered speculative.

**Investments in China**

Although the Chinese economy has grown rapidly during recent years and the Chinese government has implemented significant economic reforms to liberalize trade policy, promote foreign investment, and reduce government control of the economy, there can be no guarantee that economic growth or these reforms will continue. Economic liberalization in China may also result in disparities of wealth that lead to social disorder, including violence and labor unrest. The Chinese economy may also experience slower growth if global or domestic demand for Chinese goods decreases significantly and/or key trading partners apply trade tariffs or implement other protectionist measures. The Chinese economy is also susceptible to rising rates of inflation, economic recession, market inefficiency, volatility, and pricing anomalies that may be connected to governmental influence, a lack of publicly-available information and/or political and social instability. Strained relationships with neighboring countries, including any military conflicts in response to such confrontations, may negatively impact China's economic development and destabilize the region. The government of China maintains strict currency controls in order to achieve economic, trade and political objectives and regularly intervenes in the currency market. The Chinese government places strict regulation on the yuan and Hong Kong dollar and manages the yuan and Hong Kong dollar so that they have historically traded in a tight range relative to the U.S. dollar. The Chinese government has been under pressure to manage the currency in a less restrictive fashion so that it is less correlated to the U.S. dollar. It is expected that such action would increase the value of the yuan and the Hong Kong dollar relative to the U.S. dollar. Of course, there can be no guarantee that this will occur, or that the yuan or the Hong Kong dollar will move in relation to the U.S. dollar as expected. The Chinese government also plays a major role in the country's economic policies regarding foreign investments. Foreign investors are subject to the risk of loss from expropriation or nationalization of their investment assets and property, governmental restrictions on foreign investments and the repatriation of capital invested. China's authoritarian government has also used force in the past to suppress civil dissent, and China's foreign and domestic policies remain in conflict with those of Hong Kong as well as nationalist and religious groups in Xinjiang and Tibet. These and other factors could have a negative impact on the Chinese economy as a whole.

**Investments in Europe**

Most developed countries in Western Europe are members of the European Union ("EU"), many are also members of the European Economic and Monetary Union ("EMU"), and most EMU members are part of the euro zone, a group of EMU countries that share the euro as their common currency. Members of the EMU must comply with restrictions on inflation rates, deficits, debt levels, and fiscal and monetary controls. The implementation of any of these EMU restrictions or controls, as well as any of the following events in Europe, may have a significant impact on the economies of some or all European countries: (i) the default or threat of default by an EU member country on its sovereign debt, (ii) economic recession in an EU member country, (iii) changes in EU or governmental regulations on trade, (iv) substantial changes in currency exchange rates of the euro, the British pound, and other European currencies, (v) significant changes in the supply and demand for European imports or exports, and (vi) high unemployment rates.

In June 2016, the United Kingdom voted in a referendum to leave the EU. As a result of the referendum, S&P downgraded the United Kingdom's credit rating from "AAA" to "AA" and the EU's credit rating from "AA+" to "AA" in the days that followed the vote. Other credit ratings agencies have taken similar actions. Although the precise timeframe for "Brexit" is uncertain, it is currently expected that the United Kingdom will withdraw from the EU by March 2019. It is unclear how withdrawal negotiations will be conducted and what the potential consequences may be. In addition, it is possible that measures could be taken to revote on the issue of Brexit, or that portions of the United Kingdom could seek to separate and remain a part of the EU. As a result of the political divisions within the United Kingdom and between the United Kingdom and the EU that the referendum vote has highlighted and the uncertain consequences of a Brexit, the economies of the United

WisdomTree Trust Prospectus 107

---

**Table of Contents**

**Table of Contents**

Kingdom and Europe as well as the broader global economy could be significantly impacted, which may result in increased volatility and illiquidity, and potentially lower economic growth on markets in the United Kingdom, Europe and globally that could potentially have an adverse effect on the value of a Fund's investments.

**Investments in India**

Political and economic conditions and changes in regulatory, tax, or economic policy in India could significantly affect the market in India and in surrounding or related countries and could have a negative impact on Funds that invest in India. The Indian economy may differ favorably or unfavorably from the U.S. economy in such respects as the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. The Indian government has exercised and continues to exercise significant influence over many aspects of the economy, and the number of public sector enterprises in India is substantial. Accordingly, Indian government actions in the future could have a significant effect on the Indian economy.

Despite recent downturns, the Indian economy has experienced generally sustained growth during the last several years. There are no guarantees this will continue. While the Indian government has implemented economic structural reforms with the objective of liberalizing India's exchange and trade policies, reducing the fiscal deficit, controlling inflation, promoting a sound monetary policy, reforming the financial sector, and placing greater reliance on market mechanisms to direct economic activity, there can be no assurance that these policies will continue or that the economic recovery will be sustained. Religious and border disputes persist in India. In addition, India has experienced civil unrest and hostilities with neighboring countries such as Pakistan. The Indian government has confronted separatist movements in several Indian states. Investment and repatriation restrictions and tax laws in India may impact the ability of a Fund to track its index.

**Investments in Japan**

Economic growth in Japan is heavily dependent on international trade, government support, and consistent government policy supporting its export market. Slowdowns in the economies of key trading partners such as the United States, China and countries in Southeast Asia could have a negative impact on the Japanese economy as a whole. Trade tariffs and other protectionist measures could also have an adverse impact on the Japanese export market. The Japanese economy has in the past been negatively affected by, among other factors, government intervention and protectionism and an unstable financial services sector. While the Japanese economy has recently emerged from a prolonged economic downturn, some of these factors, as well as other adverse political developments, increases in government debt, changes to fiscal, monetary or trade policies, escalating political tension in the region, or other events, such as natural disasters, could have a negative impact on Japanese securities.

**Investments in Korea**

The economy of Korea is heavily dependent on exports and the demand for certain finished goods. Korea's main industries include electronics, automobile production, chemicals, shipbuilding, steel, textiles, clothing, footwear, and food processing. Conditions that weaken demand for such products worldwide or in other Asian countries could have a negative impact on the Korean economy as a whole. Relations with North Korea could also have a significant impact on the economy of Korea. These and other factors could have a negative impact on the Fund's performance.

**Investments in Taiwan**

The economy of Taiwan is heavily dependent on exports. Currency fluctuations, increasing competition from Asia's other emerging economies, and conditions that weaken demand for Taiwan's export products worldwide could have a negative impact on the Taiwanese economy as a whole. Concerns over Taiwan's history of political contention and its current relationship with China may also have a significant impact on the economy of Taiwan.

**Geopolitical Risk**

Some countries and regions in which the Fund invests have experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations (including due to events outside of such countries or regions) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world

economies and markets generally. Such geopolitical and other events may also disrupt securities markets and, during such market disruptions, a Fund's exposure to the other risks described herein will likely increase. For example, a market disruption may adversely affect the orderly functioning of the securities markets. Each of the foregoing may negatively impact the Fund's investments.

108 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents****Hedging Risk**

Derivatives used by the Fund to offset its exposure to foreign currencies represented in the Index may not perform as intended. When a derivative is used as a hedge against a position that the Fund holds, any loss generated by the derivative generally should be substantially offset by gains on the hedged investment, and vice versa. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. Since the derivatives used by the Fund to offset foreign currency exposure are generally reset on a monthly basis, currency risk can develop intra-month. There can be no assurance that the Fund's hedging transactions will be effective. The Fund does not attempt to mitigate other factors which may have a greater impact on the Fund's equity holdings and its performance than currency exposure. The value of an investment in the Fund could be significantly and negatively impacted if foreign currencies represented in the Index appreciate at the same time that the value of the Fund's equity holdings fall.

**High Yield Securities Risk**

Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominantly speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case the Funds may lose their entire investment.

**Index and Data Risk**

The Funds are not "actively" managed and seek to track the price and yield performance, before fees and expenses, of the applicable Index. The Index Provider has the right to make adjustments to the Indexes or to cease making the Indexes available without regard to the particular interests of the Funds or the Funds' shareholders. While the Index Provider provides a rules-based methodology that describes what each Index is designed to achieve within a particular set of rules, neither the Index Provider, its agents nor data providers provide any warranty or accept any liability in relation to the quality, accuracy or completeness of the applicable Index, its calculation, valuation or its related data, and they do not guarantee that the applicable Index will be in line with the Index Provider's methodology, regardless of whether or not the Index Provider is affiliated with the Adviser. The composition of the Index is dependent on data from one or more third parties and/or the application of such data within the rules of the Index methodology, which may be based on assumptions or estimates. If the computers or other facilities of the Index Provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index computations and/or the construction of the Indexes may occur from time to time and may not be identified and/or corrected by the Index Provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Funds and their shareholders. The potential risk of continuing error may be particularly heightened in the case of the Indexes, which are generally not used as benchmarks by other funds or managers. Any of the foregoing may lead to the inclusion of securities in an Index, exclusion of securities from an Index or the weighting of securities in an Index that would have been different had data or other information been correct or complete, which may lead to a different investment outcome than would have been the case had such events not occurred. The Adviser, through a Sub-Adviser, seeks to manage each Fund to correspond to the applicable Index provided by the Index Provider. Consequently, losses or costs associated with an Index's errors or other risks described above will generally be borne by the Funds and their shareholders and neither the Adviser nor its affiliates or agents make any representations or warranties regarding the foregoing.

**Interest Rate Risk**

The market value of fixed income securities, and financial instruments related to fixed income securities, will change in response to changes in interest rates and may change in response to other factors, such as perception of an issuer's creditworthiness. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if

interest rates decline, the value of fixed income securities is likely to increase. While securities with longer maturities tend to produce higher yields, the prices of longer maturity securities tend to be more sensitive to changes in interest rates and thus subject to greater volatility than securities with shorter maturities. The “average portfolio maturity” of a Fund is the average of all the current maturities of the individual securities in the Fund’s portfolio. Average portfolio maturity is important to investors as an indication of the Fund’s sensitivity to changes in interest rates. Funds with longer portfolio maturities generally are subject to greater interest rate risk.

WisdomTree Trust Prospectus 109

---

**Table of Contents**

Table of Contents

**Investment Risk**

As with all investments, an investment in a Fund is subject to investment risk. Investors in a Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time. An investment in a Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

**Investment in an Underlying Fund Risk**

Because the Global Hedged SmallCap Dividend Fund and Dynamic Currency Hedged International Quality Dividend Growth Fund may invest a substantial portion of their assets in an Underlying Fund, the Fund's investment performance and risks may be directly related to the investment performance and risks of the applicable Underlying Fund. Fund shareholders indirectly bear a proportionate share of the fees and expenses of an Underlying Fund in addition to the Fund's expenses absent a waiver. These risks include the possibility that an Underlying Fund may experience a lack of liquidity that can result in greater volatility than its underlying securities; an Underlying Fund may trade at a premium or discount to its net asset value; or an Underlying Fund may not replicate exactly the performance of the benchmark index it seeks to track.

**Investment Style Risk**

Each Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Funds do not attempt to outperform their Indexes or take defensive positions in declining markets. As a result, each Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which a Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause a Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.

**Dividend Paying Securities Risk**

Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by a Fund or the capital resources available for such company's dividend payments may adversely affect the Fund. In the event a company reduces or eliminates its dividend, a Fund may not only lose the dividend payout but the stock price of the company may also fall.

**Growth Investing Risk**

Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks generally are priced higher than non-growth stocks, in relation to the issuer's earnings and other measures, because investors believe they have greater growth potential, but there is no guarantee that their growth potential will be realized. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on future expectations. If investors believe an issuing company's future earnings expectations will not be met, growth stock prices can decline rapidly and significantly. An investment in growth stocks may also be susceptible to rapid price swings during periods of economic uncertainty.

**Issuer Credit Risk**

The financial condition of an issuer of a debt security or other instrument may cause such issuer to default, become unable to pay interest or principal due on the security, or otherwise fail to honor its obligations or cause such issuer to be perceived (whether by market participants, rating agencies, pricing services or otherwise) as being in such situations. The Funds cannot collect interest and principal payments on a security if the issuer defaults. Recent events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt. The degree of credit risk for a particular debt security or other issuer may be reflected in its credit rating. A credit rating is a measure of a bond issuer's ability to make timely payments of interest and principal. Rating agencies (such as Moody's Investors

Service, Inc., Standard & Poor's Corporation, or Fitch) assign letter designations typically ranging from AAA to A- (lower default risk) through CCC to C (higher default risk) or D (in default). A credit rating of BBB- or higher generally is considered "investment grade." Credit ratings are subjective, do not remove market risk, and represent the opinions of the rating agencies as to the quality of the securities they rate. Credit ratings can change quickly and may not accurately reflect the risk of an issuer. Generally, investment risk and price volatility increase as the credit rating of a security declines. The value of an investment in the Funds may

110 WisdomTree Trust Prospectus

---

## Table of Contents

### Table of Contents

change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Funds' portfolio investments.

#### Issuer-Specific Risk

Changes in the actual or perceived financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of a Fund.

#### Market Risk

The trading prices of equity securities, fixed income securities, currencies, commodities, and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, including, but not limited to, changes in interest rates, government regulation, and the outlook for economic growth or recession, as well as events that impact specific issuers, such as changes to an issuer's actual or perceived creditworthiness. A Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

#### Market Capitalization Risk

##### Small-Capitalization Investing

The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

##### Mid-Capitalization Investing

The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some medium capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.

##### Large-Capitalization Investing

Securities of large-capitalization companies may underperform securities of smaller companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

#### Non-Correlation Risk

As with all index funds, the performance of a Fund and its Index may vary somewhat for a variety of reasons. For example, each Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by its Index. In addition, a Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in its Index or may be subject to pricing differences, differences in the timing of dividend accruals, tax gains or losses, currency convertibility and repatriation, operational inefficiencies and the need to meet various new or existing regulatory requirements. For example, it may take several business days for additions and deletions to an Index to be reflected in the portfolio composition of a Fund. The use of sampling techniques may affect a Fund's ability to achieve close correlation with its

Index. By using a representative sampling strategy, a Fund generally can be expected to have a greater non-correlation risk and this risk may be heightened during times of market volatility or other unusual market conditions.

WisdomTree Trust Prospectus 111

---

**Table of Contents**

Table of Contents

**Non-Diversification Risk**

Each Fund is considered to be non-diversified. This means that each Fund may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase a Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on a Fund's performance.

**Portfolio Turnover Risk**

The Funds' investment strategies may result in high portfolio turnover rates for the Funds. High portfolio turnover would result in correspondingly greater transaction expenses and may result in the distribution to shareholders of additional capital gains for tax purposes. These factors may negatively affect a Fund's performance.

**Sector Risks**

**Consumer Discretionary Sector Risk**

The consumer discretionary sector includes, for example, automobile, textile, retail, and media companies. This sector can be significantly affected by, among other things, changes in domestic and international economies, exchange and interest rates, worldwide demand, competition, consumers' disposable income levels, propensity to spend and consumer preferences, social trends, and marketing campaigns. Companies in the consumer discretionary sector have historically been characterized as relatively cyclical and therefore more volatile in times of change.

**Consumer Staples Sector Risk**

The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global economic conditions. Unlike the consumer discretionary sector, companies in the consumer staples sector have historically been characterized as non-cyclical in nature and therefore less volatile in times of change.

**Financial Sector Risk**

The financial sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis. These factors and events have had, and may continue to have, a significant negative impact on the valuations and stock prices of companies in this sector and have increased the volatility of investments in this sector.

**Health Care Sector Risk**

The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

**Industrial Sector Risk**

The industrial sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economic growth, government and corporate spending, supply and demand for specific products and manufacturing, rapid technological developments, international political and economic developments, environmental issues, and tax and governmental regulatory policies. As the demand for, or prices of, industrials increase, the value of a Fund's investments generally would be expected to also increase. Conversely, declines in the demand for, or prices of, industrials generally would be expected to contribute to declines in the value of such securities. Such declines may occur quickly and without warning and may negatively impact the value of a Fund and your investment.

**Information Technology Sector Risk**

The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation. Challenges facing companies in the information technology sector include distressed cash flows

112 WisdomTree Trust Prospectus

---

---

**Table of Contents****Table of Contents**

due to the need to commit substantial capital to meet increasing competition, particularly in formulating new products and services using new technology, technological innovations that make existing products and services obsolete, and satisfying consumer demand.

**Shares of the Funds May Trade at Prices Other Than NAV**

As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of a Fund will not materially differ from a Fund's NAV, there may be times when the market price and the NAV vary significantly, including due to timing reasons, perceptions about the NAV, supply and demand of a Fund's shares (including disruptions in the creation/redemption process), during periods of market volatility and/or other factors. Because securities held by the International Equity Funds trade on foreign exchanges that are closed when the Funds' primary listing exchange is open, there are likely to be deviations between the current price of an underlying security and the security's last quoted price from the closed foreign market. This may result in premiums and discounts that are greater than those experienced by domestic ETFs. Thus, you may pay more (or less) than NAV when you buy shares of a Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the Fund's shares or sells at a time when the market price is at a discount to the NAV of the Fund's shares, an investor may sustain losses.

**Short Sales Risk**

The Funds will engage in "short sale" transactions. A short sale involves the sale by a Fund of an instrument or security that it does not own with the hope of purchasing the same security at a later date at a lower price. Short sales are designed to profit from a decline in the price of a security or instrument. A Fund will lose value if the security or instrument that is the subject of a short sale increases in value. This is the opposite of traditional "long" investments where the value of the Fund increases as the value of a portfolio security or instrument increases. A Fund may enter into short positions in equities as well as short derivative positions through swaps and futures contracts on equities. If the price of the security or derivative that is the subject of a short sale increases, then a Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position arises from the increase in value of the security sold short and is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to a Fund. Further, in times of unusual or adverse economic, market or political conditions, the Fund may not be able to fully or partially implement its short selling strategy.

**Additional Non-Principal Risk Information**

**Trading.** Although each Fund's shares are listed for trading on NYSE Arca, Inc. or Cboe BZX Exchange, Inc. (each, a "Listing Exchange") and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Listing Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. The trading market in a Fund's shares may become less liquid in response to deteriorating liquidity in the markets for a Fund's holdings or due to irregular trading activity in the markets. Trading in shares may be halted due to market conditions or for reasons that, in the view of the Listing Exchange, make trading in shares inadvisable. In addition, trading in shares on the Listing Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Listing Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Listing Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged or that Fund shares will trade with any volume, or at all, on any stock exchange.

**Costs of Buying or Selling Shares.** Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts

of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to buy shares (the “bid” price) and the price at which an investor is willing to sell shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for shares based on trading volume and market liquidity (including for the underlying securities held by a Fund), and is generally lower if a Fund’s shares have more trading volume and market liquidity and higher if a Fund’s shares have little trading volume and market liquidity. Further, a relatively small investor base in a Fund, asset swings in a Fund and/or increased market volatility may cause increased bid/ask spreads. Shares of the Funds, similar to shares of other issuers listed on a stock exchange, may be sold short and are therefore subject to the risk of increased volatility associated with short selling. Due to the costs

**Table of Contents**

**Table of Contents**

of buying or selling Fund shares, including bid/ask spreads, frequent trading of Fund shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

**Securities Lending.** Although the Funds are indemnified by the Funds' lending agent for losses incurred in connection with a borrower's default with respect to a loan, the Funds bear the risk of loss of investing cash collateral and may be required to make payments to a borrower upon return of loaned securities if invested collateral has declined in value. Furthermore, because of the risks in delay of recovery, a Fund may lose the opportunity to sell the securities at a desirable price, and the Fund will generally not have the right to vote securities while they are being loaned. These events could also trigger negative tax consequences for a Fund.

**Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.** The Funds have a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a prolonged and material premium or discount to NAV (or not trade at all) and possibly face trading halts and/or delisting: (i) APs exit the business, have a business disruption (including through the types of disruptions described under "Cyber Security Risk" and "Operational Risk") or otherwise become unable or unwilling to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business, have a business disruption (including through the types of disruptions described under "Cyber Security Risk" and "Operational Risk") or significantly reduce their business activities and no other entities step forward to perform their functions.

This risk may be heightened for Funds that invest in markets that require foreign securities settlement and/or because Authorized Participants may be required to post collateral in relation to securities settlement, which only certain Authorized Participants may be able to do.

**Operational Risk.** The Funds and their service providers, including the investment adviser, sub-adviser, administrator, custodian, and transfer agent, may experience disruptions that arise from human error, processing and communications errors, counterparty or third-party errors, technology or systems failures, any of which may have an adverse impact on the Funds. Although the Funds and their service providers seek to mitigate these operational risks through their internal controls and operational risk management processes, these measures may not identify or may be inadequate to address all such risks.

**Portfolio Holdings Information**

Information about each Fund's daily portfolio holdings is available at [www.wisdomtree.com](http://www.wisdomtree.com). In addition, each Fund discloses its complete portfolio holdings as of the end of its fiscal year (June 30) and its second fiscal quarter (December 31) in its reports to shareholders. Each Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (March 31 and September 30, respectively) with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, [www.sec.gov](http://www.sec.gov). A summarized description of each Fund's policies and procedures with respect to the disclosure of each Fund's portfolio holdings is available in the Trust's Statement of Additional Information ("SAI").

**Table of Contents****Table of Contents**

<sup>(9)</sup> The Adviser has contractually agreed to limit the Management Fee to 0.38% through October 31, 2018, unless earlier terminated by the Board for any reason at any time.

Under the Investment Advisory Agreement for each Fund, WisdomTree Asset Management has agreed to pay generally all expenses of each Fund, subject to certain exceptions. For a detailed description of the Investment Advisory Agreement for each Fund, please see the “Management of the Trust” section of the SAI. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of chief compliance officer (“CCO”) services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of each Fund’s average daily net assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

Except as noted below, the basis for the Board of Trustees’ approval of the Funds’ Investment Advisory Agreements will be available in the Trust’s Semi-Annual Report to Shareholders for the period ended December 31, 2017. The basis for the Board of Trustees’ approval of the Investment Advisory Agreements, with respect to the Global ex-Mexico Equity Fund is available in the Trust’s Annual Report to Shareholders dated June 30, 2017.

**Sub-Advisers**

**Mellon Capital Management Corporation:** Mellon Capital is responsible for the day-to-day management of the Dynamic Bearish U.S. Equity Fund and Dynamic Long/Short U.S. Equity Fund (together, the “Alternative Funds”), U.S. Domestic Equity Fund, U.S. Export and Multinational Fund, Emerging Markets Dividend Fund, Europe Domestic Economy Fund, Global ex-Mexico Equity Fund, Global Hedged SmallCap Dividend Fund, Global SmallCap Dividend Fund, Strong Dollar Emerging Markets Equity Fund, and the Dynamic Hedged Equity Funds (collectively, the “Equity Funds”). Mellon Capital, a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 50 Fremont Street, San Francisco, California 94105. As of September 30, 2017, Mellon Capital had assets under management totaling approximately \$363 billion. Mellon Capital is a wholly-owned indirect subsidiary of The Bank of New York Mellon Corporation, a publicly traded financial holding company. Mellon Capital chooses each Fund’s portfolio investments and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays Mellon Capital for providing sub-advisory services to the Funds.

Except as noted below, the basis for the Board of Trustees’ approval of each Equity Fund’s Sub-Advisory Agreement will be available in the Trust’s Semi-Annual Report to Shareholders for the fiscal period ending December 31, 2017. The basis for the Board of Trustees’ approval of the Investment Sub-Advisory Agreements, with respect to the Global ex-Mexico Equity Fund is available in the Trust’s Annual Report to Shareholders dated June 30, 2017.

**Voya Investment Management Co., LLC:** Voya IM is responsible for the day-to-day management of the Fixed Income Funds. Voya IM, a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at 230 Park Avenue, New York, New York 10169. As of June 30, 2017, Voya IM had assets under management totaling approximately \$224 billion. The Sub-Adviser is a wholly-owned indirect subsidiary of Voya Financial, Inc. (formerly, ING U.S., Inc.), a publicly traded financial holding company. Voya IM chooses the portfolio investments of each Fixed Income Fund and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays Voya IM for providing sub-advisory services to the Fixed Income Funds.

The basis for the Board of Trustees’ approval of each Fixed Income Fund’s Sub-Advisory Agreement will be available in the Trust’s Semi-Annual Report to Shareholders for the fiscal period ending December 31, 2017.

WisdomTree Asset Management, as the investment adviser for the Funds, may hire one or more sub-advisers to oversee the day-to-day activities of the Funds. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust have received an exemptive order from the SEC that permits WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for each Fund, without submitting the sub-advisory agreement to a vote of the

Fund's shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee each sub-adviser and recommend their hiring, termination and replacement. WisdomTree Asset Management is not required to disclose fees paid to any sub-adviser retained pursuant to the order.
