For each Interest Period, the Calculation Agent will calculate the amount of accrued interest by multiplying the principal amount of the Floating Rate Note by an accrued interest factor for the Interest Period. This factor will equal the sum of the interest factors calculated for each day during the Interest Period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360.

Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the Exchange Act), trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade their Fixed Rate Notes or Floating Rate Notes (collectively, the Notes) more than two business days prior to the settlement date will be required, by virtue of the fact that the Notes initially will settle in three business days (T+3), to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement.

Because Desjardins Securities Inc. is not registered with the U.S. Securities and Exchange Commission (the SEC) as a U.S. registered broker-dealer, it will effect offers and sales of the Notes solely outside of the United States or within the United States to the extent permitted by Rules 15a-6 under the Exchange Act through one or more U.S. registered broker-dealers and as permitted by the rules and regulations of the Financial Industry Regulatory Authority, Inc.
