## Edgar Filing: EATON VANCE MUNICIPAL INCOME TRUST - Form N-Q

The percentage shown for each investment category in the Portfolio of Investments is based on net assets applicable to common shares.

At August 31, 2018, the concentration of the Trust's investments in the various states and territories, determined as a percentage of total investments, is as follows:

|   |       |
|---|-------|
| New York  | 21.6% |
| California                                      | 11.6% |
| Texas   | 11.0% |
| Georgia   | 10.5% |
| Others, representing less than 10% individually | 45.3% |

The Trust invests primarily in debt securities issued by municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at August 31, 2018, 21.1% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution or financial guaranty assurance agency ranged from 0.2% to 11.2% of total investments.

These securities may be sold in certain transactions in reliance on an exemption from registration (normally to qualified institutional buyers). At August 31, 2018, the aggregate value of these securities is \$17,258,123 or 5.6% of the Trust's net assets applicable to common shares.
- (4) When-issued security.
- (5) Issuer is in default with respect to interest and/or principal payments.
- (6) Security is in default and making only partial interest payments.
- (7) Floating rate security. The stated interest rate represents the rate in effect at August 31, 2018.
- (8) Amount is less than 0.05%.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Edgar Filing: EATON VANCE MUNICIPAL INCOME TRUST - Form N-Q

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At August 31, 2018, the hierarchy of inputs used in valuing the Trust's investments, which are carried at value, were as follows:

| <b>Asset Description</b>        | <b>Level 1</b> | <b>Level 2</b>        | <b>Level 3</b> | <b>Total</b>          |
|---------------------------------|----------------|-----------------------|----------------|-----------------------|
| Tax-Exempt Municipal Securities | \$             | \$ 504,853,348        | \$             | \$ 504,853,348        |
| Taxable Municipal Securities    |                | 17,905,834            |                | 17,905,834            |
| <b>Total Investments</b>        | <b>\$</b>      | <b>\$ 522,759,182</b> | <b>\$</b>      | <b>\$ 522,759,182</b> |
