Delaware Enhanced Global Dividend and Income Fund @ market price	1-year return	+31.30%
Delaware Enhanced Global Dividend and Income Fund @ NAV	1-year return	+21.03%
Lipper Closed-end Global Funds Average @ market price	1-year return	+28.85%
Lipper Closed-end Global Funds Average @ NAV	1-year return	+21.49%

Past performance does not guarantee future results.

For complete, annualized performance for Delaware Enhanced Global Dividend and Income Fund, please see the table on page 3.

Index performance returns do not reflect any management fees, transaction costs, or expenses. Indices are unmanaged and one cannot invest directly in an index.

For the fiscal year ended Nov. 30, 2017, Delaware Enhanced Global Dividend and Income Fund returned +21.03% at net asset value (NAV) and +31.30% at market price (both figures reflect all distributions reinvested). Complete annualized performance for the Fund is shown in the table on page 3.

A strong economic environment

As the Fund s fiscal year began, investors in equities found themselves in an increasingly optimistic mood. A strengthening global economy, coupled with the market s expectation for growth-oriented policies coming out of Washington, D.C., after Republicans electoral victories in November 2016, led to an especially favorable environment for US cyclical growth stocks.

A series of interest rate increases from the US Federal Reserve, which sought to limit potential inflation amid steadily improving economic and employment data, provided a further headwind for the yield segments of the financial markets. Against a strong economic backdrop, the Fed opted to raise its benchmark short-term interest rate by a quarter percentage point on three separate occasions during the fiscal year. As of period end, the federal funds rate stood at 1.25%, up from 0.50% at the start of December 2016. US gross domestic product (GDP) a measure of the country s economic output grew by an annualized 3.1% in the second quarter of 2017 and an estimated 3.3% in the year s third quarter, according to the US Commerce Department. It was the first time since mid-2014 that US GDP expanded by 3% or better in consecutive quarters. Meanwhile, the US unemployment rate stood at 4.1% in November 2017, according to the US Labor Department, a 17-year low.

Even as the Fed was gradually engaged in monetary tightening, other central banks and countries around the world were pursuing the opposite path. We believe China s efforts to accelerate growth were a big factor behind the global economic recovery, especially in emerging markets, while the European Central Bank s aggressive stimulus program provided a boost to the region.

Gains across asset classes

For the Fund s fiscal year, both US and international equities enjoyed strong results. US large-cap value stocks, as measured by the Russell 1000[®] Value Index, returned +14.8%. International developed

market stocks, as measured by the MSCI EAFE (Europe, Australasia, Far East) Index (net), fared even better, returning +27.3% for the same time frame. International stocks came into the fiscal year more attractively valued than US stocks which were earlier to benefit as we continued to emerge from the global financial crisis from a decade ago and therefore had more room for appreciation over the 12-month period.

High yield bonds, as measured by the Bloomberg Barclays US Corporate High-Yield Index, returned +9.2%, as the asset class continued to benefit from a healthy US economy, a small number of issuer defaults, and narrowing credit spreads meaning investors were willing to accept less yield in exchange for taking on credit risk.

Convertible securities, as measured by the BofA Merrill Lynch All US Convertibles Index, returned +15.6%. This asset class benefited from the combination of low marketplace yields and continued historically low interest rates, which contributed to bond performance while providing a tailwind for stocks and these equity-sensitive securities.

Meanwhile, global real estate securities, as measured by the FTSE EPRA/NAREIT Developed Index, returned +13.2%, outpacing the +10.4% return of their US counterparts, as measured by the FTSE NAREIT Equity REITs Index. In this asset class, investors encountered a significant performance dichotomy. Retail real estate investment trusts (REITs), for example, tended to perform relatively poorly, reflecting growth in ecommerce and a corresponding decline in sales at physical stores. By contrast, industrial REITs benefited from increased demand for warehouse space necessary to accommodate a growing economy and an increased emphasis on ecommerce.

Individual contributors and detractors

Among international equities, the Fund saw strong results from positions in Korean electronics giant **Samsung Electronics; Deutsche Post,** a German delivery company; **Bank Rakyat Indonesia Persero,** an Indonesian banking firm; and **Canon, a** Japanese manufacturer of optical and imaging products.

Meanwhile, within the Fund s large-cap value equity subportfolio, several holdings stood out as notable performance contributors, including **AbbVie**, a drug manufacturer that benefited from a favorable patent ruling and a potentially stronger new-drug pipeline;

(continues)

Portfolio management review

Delaware Enhanced Global Dividend and Income Fund

Abbott Laboratories, a pharmaceutical and medical device company that was helped by investors expectations for higher earnings growth; and **Lockheed Martin**, a US defense contractor that benefited from anticipated increases in military spending.

Individual equity detractors during the fiscal year included pharmaceutical distributor **Cardinal Health**; telecommunication services provider **AT&T**; and **CVS Health**, which operates retail drug stores along with a pharmacy benefits management business.

Sticking to our strategy

Throughout the fiscal year, we continued to pursue the same management approach we apply in all market conditions: We continued to look across multiple asset classes for securities that we believed had competitive yield and the potential for dividend growth. In addition, we maintained our emphasis on managing downside risk in the portfolio and seeking to limit potential capital losses.

During the fiscal year, changes to the Fund s portfolio were relatively modest. Our biggest shift was to add exposure to international equities, which increased from 29% of the portfolio at the start of the fiscal year to 35% of the portfolio at fiscal year end. This shift reflected our view that international equities were more attractively valued than their US counterparts, as the latter had rallied strongly in recent years. As of Nov. 30, 2017, the Fund s allocation to US large-cap value stocks stood at 11%, unchanged from a year earlier.

In light of the Fund s mandate to maintain healthy exposure to international markets, 40% of the portfolio was invested in non-US equity and debt securities as of fiscal year end. In addition to the 35% allocated to international stocks, the Fund had a 5% stake in emerging market bonds (unchanged from a year earlier). The Fund also had a 1% position in global real estate securities as of fiscal year end (representing a modest decline over the prior 12 months).

Other notable allocations in the Fund included high yield bonds and convertible securities, which made up 33% and 14% of the Fund s portfolio, respectively, as of Nov. 30, 2017.

In addition, the Fund used foreign currency exchange contracts to facilitate the purchase and sale of securities in the Fund. The Fund also entered into options contracts to facilitate investments in portfolio securities. These derivative securities did not have a material effect on performance during the fiscal year.

Of final note, the Fund s use of leverage a portfolio management tool designed to obtain a higher return on the Fund s investments added to performance in light of the stock market s increase. Leverage has the effect of magnifying the impact of gains and losses. As a result, it added to the Fund s results in a strong market environment.

Positioning the portfolio defensively

As of fiscal year end, we recognized that valuations were at or near all-time highs across multiple asset classes. Even as we believe that equities could continue to do well in the short term, we do see high valuations as a longer-term challenge in the asset class. Another likely headwind is the expectation that China could start slowing its economy, after having engaged in substantial stimulus efforts since early 2016.

Therefore, we think it is prudent to avoid excess risk and continue to manage the Fund defensively. We will continue to seek to provide competitive income with a focus on securities that we believe have the potential to provide upside in the event of a rising market, and the prospect of declining less than the market if conditions deteriorate. Moreover, we see a strong argument for seeking companies that, in our view, appear undervalued, have strong cash flows, maintain manageable debt levels, operate diversified businesses, and have a history of delivering consistent dividends.

Unless otherwise noted, views expressed herein are current as of Nov. 30, 2017, and subject to change for events occurring after such date.

Performance summary

Delaware Enhanced Global Dividend and Income Fund

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Please obtain the most recent performance data by calling 866 437-0252 or visiting our website at delawarefunds.com/closed-end.

Fund performance

Average annual total returns through November 30, 2017	1 year	5 years	10 years	Lifetime
At market price (inception date June 29, 2007)	+31.30%	+9.45%	+7.51%	+5.27%
At net asset value (inception date June 29, 2007)	+21.03%	+9.63%	+6.97%	+6.16%
Diversification may not protect against market risk				

Diversification may not protect against market risk.

Fixed income securities and bond funds can lose value, and investors can lose principal, as interest rates rise. They also may be affected by economic conditions that hinder an issuer s ability to make interest and principal payments on its debt.

The Fund may also be subject to prepayment risk, the risk that the principal of a bond that is held by a portfolio may be prepaid prior to maturity, at the time when interest rates are lower than what the bond was paying. A portfolio may then have to reinvest the money at a lower interest rate.

High yielding, non-investment-grade bonds (junk bonds) involve higher risk than investment grade bonds.

Narrowly focused investments may exhibit higher volatility than investments in multiple industry sectors.

REIT investments are subject to many of the risks associated with direct real estate ownership, including changes in economic conditions, credit risk, and interest rate fluctuations.

The Fund may invest in derivatives, which may involve additional expenses and are subject to risk, including the risk that an underlying security or securities index moves in the opposite direction from what the portfolio manager anticipated. A derivatives transaction depends upon the counterparties ability to fulfill their contractual obligations.

International investments entail risks not ordinarily associated with US investments including fluctuation in currency values, differences in accounting principles, or economic or political instability in other nations.

Investing in emerging markets can be riskier than investing in established foreign markets due to increased volatility and lower trading volume.

If and when the Fund invests in forward foreign currency contracts or uses other investments to hedge against currency risks, the Fund will be subject to special risks, including counterparty risk.

The Fund may experience portfolio turnover in excess of 100%, which could result in higher transaction costs and tax liability.

The Fund borrows through a line of credit for purposes of leveraging. Leveraging is the risk associated with securities or practices (for example, borrowing and the use of certain derivatives) and investment in certain types of derivatives that multiply small index or market movements into larger changes in value. Use of derivative instruments may involve leverage. Leverage magnifies the potential for gain and the risk of loss. As a result, a relatively small decline in the value of the underlying investments could result in a relatively large loss. Although the Fund will seek to manage the Fund s risk from the leverage associated with derivative investments by closely monitoring the volatility of such investments, the Fund may not be successful in this respect.

To the extent the Fund engages in option overwriting, it may receive less total return in certain periods and in other periods greater total return from its option overwriting strategy.

The use of dividend capture strategies will expose the Fund to increased trading costs and potential for capital loss or gain, particularly in the event of significant short-term price movements of stocks subject to dividend capture trading, and resultant dividends may not be qualified dividends eligible to individuals for reduced federal income tax rates.

Closed-end funds, unlike open-end funds, are not continuously offered. After being issued during a one-time-only public offering, shares of closed-end funds are sold in the open market through a securities exchange. Net asset value (NAV) is calculated by subtracting total liabilities by total assets, then dividing by the number of shares outstanding. At the time of sale, your shares may have a market price that is above or below NAV, and may be worth more or less than your original investment.

(continues)

Performance summary

Delaware Enhanced Global Dividend and Income Fund

The Fund may make extraordinary distributions of ordinary income and capital gains at calendar year end for tax and regulatory purposes. Those distributions may temporarily cause higher yields. There is no assurance that a Fund will repeat that higher yield in the future. Subsequent monthly distributions will likely be lower than these extraordinary, calendar year end distributions.

The Fund performance table and the Performance of a \$10,000 investment graph do not reflect the deduction of taxes the shareholder would pay on Fund distributions or redemptions of Fund shares.

Returns reflect the reinvestment of all distributions. Dividends and distributions, if any, are assumed, for the purpose of this calculation to be reinvested at prices obtained under the Fund s dividend reinvestment policy. Shares of the Fund were initially offered with a sales charge of 4.50%. Performance since inception does not include the sales charge or any other brokerage commission for purchases made since inception.

Past performance is not a guarantee of future results.

initially offered with a sales charge of 4.50%. Performance shown in both graphs above does not include fees, the initial sales charge, or any brokerage commissions for purchases. Investments in the Fund are not available at NAV.

The Lipper Closed-end Global Funds Average represents the average return of closed-end funds that invest at least 25% of their portfolio in securities traded outside of the United States and that may own US securities as well (source: Lipper).

The Russell 1000 Value Index, mentioned on page 1, measures the performance of the large-cap value segment of the US equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values.

Russell Investment Group is the source and owner of the trademarks, service marks, and copyrights related to the Russell Indexes. Russell[®] is a trademark of Russell Investment Group.

The MSCI EAFE (Europe, Australasia, Far East) Index, mentioned on page 1, is a free float-adjusted market capitalization weighted index designed to measure equity market performance of developed markets, excluding the United States and Canada. Index net return approximates the minimum possible dividend reinvestment, after deduction of withholding tax at the highest possible rate.

The Bloomberg Barclays US Corporate High-Yield Index, mentioned on page 1, is composed of US dollar denominated, non-investment-grade corporate bonds for which the middle rating among Moody s Investors Service, Inc., Fitch, Inc., and Standard & Poor s is Ba1/BB+/BB+ or below.

The BofA Merrill Lynch All US Convertibles Index, mentioned on page 1, tracks the performance of domestic corporate convertible bonds and convertible preferred stock issues of all qualities that have a market value of \$50 million or more at issuance.

The FTSE NAREIT Equity REITs Index, mentioned on page 1, measures the performance of all publicly traded equity real estate investment trusts (REITs) traded on US exchanges, excluding timber and infrastructure REITs.

The FTSE EPRA/NAREIT Developed Index, mentioned on page 1, tracks the performance of listed real estate companies and real estate investment trusts (REITs) worldwide, based in US dollars.

Market price is the price an investor would pay for shares of the Fund on the secondary market. NAV is the total value of one fund share, generally equal to a fund s net assets divided by the number of shares outstanding.

Past performance is not a guarantee of future results.

Total

* Allocation includes all investments except for short-term investments.

The percentage of net assets exceeds 100.00% because the Fund utilizes a line of credit with The Bank of New York Mellon, as described in Note 7 in Notes to financial statements. The Fund utilizes leveraging techniques in an attempt to obtain a higher return for the Fund. There is no assurance that the Fund will achieve its investment objectives through the use of such techniques.
