Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors Gold Miners ETF (GDX) was 5/16/06.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, for the period from commencement (5/16/06) to the first day of secondary market trading in shares of the Fund (5/22/06), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.53% / Net Expense Ratio 0.53%

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.53% of the Fund’s average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

² NYSE Arca Gold Miners Index (GDMNTR) is a modified capitalization-weighted index comprised of publicly traded companies involved primarily in the mining for gold.

NYSE Arca Gold Miners Index (GDMNTR), a trademark of NYSE Euronext or its affiliates (NYSE Euronext), is licensed for use by Van Eck Associates Corporation in connection with Market Vectors Gold Miners ETF (GDX). Market Vectors Gold Miners ETF (the “Fund”) is not sponsored, endorsed, sold or promoted by NYSE Euronext and NYSE Euronext makes no representation as to the accuracy and/or completeness of GDMNTR or results to be obtained by any person from using GDMNTR in connection with trading the Fund.

Hypothetical Growth of \$10,000 (Since Inception)

Commencement date for the Market Vectors RVE Hard Assets Producers ETF (HAP) was 8/29/08.

The price used to calculate market return (Share Price) is determined by using the closing price listed on NYSE Arca. Since the shares of the Fund did not trade in the secondary market until several days after the Fund's commencement, ¹ for the period from commencement (8/29/08) to the first day of secondary market trading in shares of the Fund (9/3/08), the NAV of the Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 1.888.MKT.VCTR or by visiting marketvectorsetfs.com.

Gross Expense Ratio 0.74% / Net Expense Ratio 0.50%

Explanation of Responses:

Van Eck Associates Corporation (the “Adviser”) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund’s average daily net assets per year until at least May 1, 2014. During such time, the expense limitation is expected to continue until the Fund’s Board of Trustees acts to discontinue all or a portion of such expense limitation.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in cash. Shares may trade at a premium or discount to their NAV in the secondary market.

The “Net Asset Value” (NAV) of a Market Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Market Vectors ETF investors should not expect to buy or sell shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

MARKET VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2013 to December 31, 2013.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Explanation of Responses:

Edgar Filing: Roesch Martin F - Form 4

Expenses are equal to the Fund's annualized expense ratio (for the six months ended December 31, 2013) multiplied
* by the average account value over the period, multiplied by the number of days in the most recent fiscal half year
divided by the number of days in the fiscal year (to reflect the one-half year period).

** Assumes annual return of 5% before expenses

During the year ended December 31, 2013, transfers of securities from Level 1 to Level 2 were \$2,063,999. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2013, transfers of securities from Level 2 to Level 1 were \$97,684,243. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2013, transfers of securities from Level 1 to Level 2 were \$148,171 and transfers from Level 2 to Level 1 were \$95,864. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2013:

	Common Stocks Spain

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds’ pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities’ primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR’s and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with

80

NOTES TO FINANCIAL STATEMENTS

(continued)

more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Forward foreign currency contracts are valued at the spot currency rate plus an amount (“points”), which reflects the differences in the interest rates between the U.S. and foreign markets and are classified as Level 2 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation (the “Adviser”) appointed by the Board of Trustees. The Pricing Committee provides oversight of the Funds’ valuation policies and procedures, which are approved by the Funds’ Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of its investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds’ investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds’ Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

Explanation of Responses:

Federal Income Taxes—It is each Fund’s policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

81

Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund’s Schedule of Investments.

Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the year ended December 31, 2013.

Forward Foreign Currency Contracts—The Funds are subject to foreign currency risk in the normal course of pursuing its investment objectives. The Funds may buy and sell forward foreign currency contracts to settle purchases and sales of foreign denominated securities or to hedge foreign denominated assets. Realized gains and losses from forward foreign currency contracts, if any, are included in net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations. The Funds may incur additional risk from investments in forward foreign currency contracts if the counterparty is unable to fulfill its obligation or there are unanticipated movements of the foreign currency relative to the U.S. dollar. The Funds held no forward foreign currency contracts during the year ended December 31, 2013.

Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase Agreements held as of December 31, 2013 are included in the Schedules of Investments.

H. Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting agreements or other similar agreements. Generally, the right of setoff in those

agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds do not offset securities lending or repurchase agreement assets and liabilities subject to enforceable master netting agreements or other similar agreements in the Statements of Assets and Liabilities.

The tables below present both gross and net information about the financial instruments eligible for offset in the Statement of Assets and Liabilities, subject to master netting agreement or similar agreement, as well as financial collateral received or pledged (including cash collateral) as of December 31, 2013. Collateral is disclosed up to 100% of the net amount of unrealized gain/loss or market value of the respective financial instruments. In general, collateral received or pledged exceeds the net amount of the unrealized gain/loss or market value of financial instruments. Refer to the Schedules of Investments and Statements of Assets and Liabilities for collateral received or pledged as of December 31, 2013, as well as the related disclosures in Note 9 (Securities Lending) and Note 2G (Repurchase Agreements).

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is 0.35%. The Adviser has agreed, at least until May 1, 2014 to voluntarily waive or limit its fees and to assume as its own expense certain expenses otherwise payable by the Funds so that each Fund's total annual operating expenses does not exceed the expense caps, excluding interest expense, trading expenses, taxes and extraordinary expenses, listed in the table below.

83

The current expense caps and the amounts waived by the Adviser for the year ended December 31, 2013, are as follows:

Fund	Expense Cap	Waiver of Management Fees	Expenses Assumed by the Adviser
Agribusiness ETF	0.56 %	\$ –	\$ –

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the “Act”) was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

At December 31, 2013, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective	Post-Effective	Amount Expiring in the Year Ended December 31,

During the year ended December 31, 2013, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, and tax treatment of in-kind redemptions, the Funds incurred differences that affected undistributed net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

Fund	Increase/Decrease in Accumulated Net Investment Income/Loss	Increase /Decrease in Accumulated Net Realized Gain/Loss	Increase/Decrease in Aggregate Paid in Capital

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for open tax years (tax years ended December 31, 2010-2012), or expected to be taken in the Funds’ current

tax year. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense on the Statements of Operations. During the year ended December 31, 2013, the Funds did not incur any interest or penalties.

Note 6—Capital Share Transactions—As of December 31, 2013, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index plus a small amount of cash. For the year ended December 31, 2013 the Trust had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Agribusiness ETF	\$ 56,591,501	\$ 1,814,875,834
Coal ETF	30,843,050	54,848,856

Uranium+Nuclear Energy ETF	15,878,323	32,334,044

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund's investment objective by investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries.

Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers.

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower or earning interest on the investment of the cash collateral. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities and shares the interest earned on the collateral and borrowing fees received with the securities lending

agent. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds' behalf by the lending agent and is invested in the Bank of New York Overnight Government Fund, the Bank of New York Institutional Cash Reserve, or repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. As of December 31, 2013, the loans outstanding and the collateral received are included in value of securities on loan and collateral for securities loaned, respectively, in the Statements of Assets and Liabilities.

Note 10—Share Split—On January 27, 2012, the Board of Trustees of the Trust approved a 3 for 1 share split for the Oil Services ETF. The split took place for shareholders of record as of the close of business on February 10, 2012, and were paid on February 13, 2012. Fund shares began trading on a split-adjusted basis on February 14, 2012. The Statement of Changes in Net Assets and Financial Highlights for the Oil Services ETF prior to February 14, 2012 have been adjusted to reflect the 3 for 1 share split.

On July 2, 2012, the Board of Trustees of the Trust approved a 1 for 15 reverse share split for Solar Energy ETF. Fund shares began trading on a split-adjusted basis on July 2, 2012. The Statement of Changes in Net Assets and Financial Highlights for Solar Energy ETF prior to July 2, 2012 have been adjusted to reflect the 1 for 15 reverse share split.

On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Global Alternative Energy ETF and Uranium+Nuclear Energy ETF, and 1 for 4 reverse share split for Junior Gold Miners ETF and Rare Earth/Strategic Metals ETF. Fund shares began trading on a split-adjusted basis on July 1, 2013. The Statements of Changes in Net Assets and Financial Highlights prior to July 1, 2013 for the respective Funds have been adjusted to reflect the reverse share splits.

Note 11—Bank Line of Credit—Certain Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2013, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Outstanding Loan Balance as of December 31, 2013
Agribusiness ETF	223	\$ 12,216,816	1.63 %	\$ 5,541,877

Note 12–Custodian Fees–The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2013, there were no offsets to custodian fees.

Note 13–Recent Accounting Pronouncements–The Funds have adopted Accounting Standards Update (“ASU”) No. 2011-11, Balance Sheet (Topic 210) Disclosures about Offsetting Assets and Liabilities, as clarified by ASU No. 2013-01 “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” which requires entities to disclose gross and net information about derivative instruments, repurchase and reverse-repurchase agreements, and securities borrowing and

lending transactions that are either: (1) offset in accordance with GAAP, or (2) subject to enforceable master netting arrangement or similar agreements, irrespective of whether they are offset in accordance with GAAP. In addition, ASU No. 2011-11 requires disclosure of collateral received and posted in connection with master netting agreements or similar arrangements. Additional disclosure requirements of ASU No. 2011-11 and ASU No. 2013-01, if any, are reflected in Note 2 to the Funds' financial statements.

Note 14—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders of Market Vectors ETF Trust

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Assets Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (twelve of the series constituting Market Vectors ETF Trust) (the "Funds") as of December 31, 2013, and the related statements of operations, the statements of changes in net assets and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2013, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Gold Miners ETF, Junior Gold Miners ETF, Oil Services ETF, Rare Earth/Strategic Metals ETF, RVE Hard Assets Producers ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Uranium+Nuclear Energy ETF (twelve of the series constituting Market Vectors ETF Trust) at December 31, 2013, the results of their operations, the changes in their net assets and the financial highlights for the periods indicated therein, in conformity with U.S. generally accepted accounting principles.
