CARDTRONICS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

(1) General and Basis of Presentation

General

Cardtronics, Inc., along with its wholly- and majority-owned subsidiaries (collectively, the "Company") provides convenient consumer financial services through its network of automated teller machines ("ATMs") and multi-function financial services kiosks. As of June 30, 2013, the Company provided services to approximately 72,200 devices across its portfolio, which included approximately 63,200 devices located in all 50 states of the United States ("U.S.") as well as in the U.S. territories of Puerto Rico and the U.S. Virgin Islands, approximately 4,300 devices throughout the United Kingdom ("U.K."), approximately 2,700 devices throughout Mexico, and approximately 2,000 devices throughout Canada. Included in the number of devices in the U.S. are approximately 2,200 multi-function financial services kiosks that, in addition to traditional ATM functions such as cash dispensing and bank account balance inquiries, perform other consumer financial services, including bill payments, check cashing, remote deposit capture (which is deposit taking at ATMs using electronic imaging), and money transfers. Also included in the total count of 72,200 devices are approximately 13,600 devices for which the Company provides various forms of managed services solutions, which may include services such as transaction processing, monitoring, maintenance, cash management, and customer service.

Through its network, the Company provides ATM management and equipment-related services (typically under multi-year contracts) to large, nationally and regionally-known retail merchants as well as smaller retailers and operators of facilities such as shopping malls and airports. In doing so, the Company provides its retail partners with a compelling automated financial services solution that helps attract and retain customers, and in turn, increases the likelihood that the devices placed at their facilities will be utilized.

In addition to its retail merchant relationships, the Company also partners with leading national financial institutions to brand selected ATMs and financial services kiosks within its network, including Citibank, N.A., JPMorgan Chase Bank, N.A., Sovereign Bank, N.A., SunTrust Banks, Inc., PNC Bank, N.A., Frost Bank, The Bank of Nova Scotia ("Scotiabank") in Canada, Mexico, and Puerto Rico, and Grupo Financiero Banorte, S.A. de C.V. in Mexico. As of June 30, 2013, approximately 18,500 of the Company's domestic devices and approximately 500 of the Company's ATMs in Canada were under contract with financial institutions to place their logos on those machines, and to provide convenient surcharge-free access for their banking customers.

The Company also owns and operates the Allpoint network, the largest surcharge-free ATM network within the U.S. (based on the number of participating ATMs). The Allpoint network, which has more than 55,000 participating ATMs globally, provides surcharge-free ATM access to customers of participating financial institutions that lack a significant ATM network in exchange for either a fixed monthly fee per cardholder or a set fee per transaction that is paid by the financial institutions who are members of the network. The Allpoint network includes a majority of the Company's ATMs in the U.S., U.K., Puerto Rico and Mexico, approximately a quarter of the Company's ATMs in Canada, and over 5,000 locations in Australia through a partnership with a local ATM owner and operator in that market. Allpoint also works with financial institutions that manage stored-value debit card programs on behalf of corporate entities and governmental agencies, including general purpose, payroll and electronic benefits transfer ("EBT") cards. Under these programs, the issuing financial institutions pay Allpoint a fee per issued stored-value card or per transaction in return for allowing the users of those cards surcharge-free access to Allpoint's participating ATM network.

Finally, the Company owns and operates an electronic funds transfer ("EFT") transaction processing platform that provides transaction processing services to its network of ATMs and financial services kiosks as well as other ATMs under managed services arrangements.

#### Basis of Presentation

This Quarterly Report on Form 10-Q (this "Form 10-Q") has been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") applicable to interim financial information. Because this is an interim period filing presented using a condensed format, it does not include all of the disclosures required by accounting principles generally accepted in the United States ("U.S. GAAP"), although the Company believes that the disclosures are adequate to make the information not misleading. You should read this Form 10-Q along with the Company's Annual Report on Form 10-K for the year ended December 31, 2012 (the "2012 Form 10-K"), which includes a summary of the Company's significant accounting policies and other disclosures.

The financial statements as of June 30, 2013 and for the three and six months ended June 30, 2013 and 2012 are unaudited. The Consolidated Balance Sheet as of December 31, 2012 was derived from the audited balance sheet filed in the 2012 Form 10-K. In management's opinion, all normal recurring adjustments necessary for a fair presentation of the Company's interim and prior period results have been made. The results of operations for the three and six months ended June 30, 2013 and 2012 are not necessarily indicative of results that may be expected for any other interim period or for the full fiscal year.

The unaudited interim consolidated financial statements include the accounts of Cardtronics, Inc. and its wholly and majority-owned subsidiaries. All material intercompany accounts and transactions have been eliminated in consolidation. Because the Company owns a majority (51.0%) interest in, and realizes a majority of the earnings and/or losses of, Cardtronics Mexico, S.A. de C.V. (“Cardtronics Mexico”), this entity is reflected as a consolidated subsidiary in the accompanying consolidated financial statements, with the remaining ownership interests not held by the Company being reflected as noncontrolling interests.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates, and these differences could be material to the financial statements.

### Cost of ATM Operating Revenues and Gross Profit Presentation

The Company presents Cost of ATM operating revenues and Gross profit within its Consolidated Statements of Operations exclusive of depreciation, accretion, and amortization expense related to ATMs and ATM-related assets. The following table sets forth the amounts excluded from Cost of ATM operating revenues and Gross profit for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Depreciation and accretion expenses related to ATMs and ATM-related assets	\$ 13,858	\$ 13,268	\$ 28,136	\$ 25,597
Amortization expense	6,081	5,412	11,829	10,887
Total depreciation, accretion, and amortization expenses excluded from Cost of ATM operating revenues and Gross profit	\$ 19,939	\$ 18,680	\$ 39,965	\$ 36,484

### (2) Acquisitions

On March 7, 2013, the Company completed the acquisition of i-design group plc (“i-design”), a Scotland-based provider and developer of marketing and advertising software and services for ATM owners. Additionally, on May 1, 2013 and June 3, 2013, the Company acquired the majority of the assets of Aptus Group, LLC (“Aptus”) and Merrimak ATM Group, LLC (“Merrimak”), respectively. Both Aptus and Merrimak were providers of ATM services to fleets of approximately 3,300 ATMs and 4,800 ATMs, respectively, consisting primarily of merchant-owned machines.

The i-design, Aptus, and Merrimak acquisitions, both on an individual basis and on a combined basis, did not have a material effect on the Company's consolidated results of operations during the three and six months ended June 30, 2013. As of June 30, 2013, the Company had not yet completed its analysis to assign the purchase consideration for these acquisitions as a result of not yet completing its assessments of the intangible asset valuations for the acquisitions. The Company expects to complete this work during the quarter ending September 30, 2013, and as a result of the completion of the work, the Company's preliminary allocation of the purchase consideration to the net assets acquired may change.

### (3) Stock-Based Compensation

The Company calculates the fair value of stock-based awards granted to employees and directors on the date of grant and recognizes the calculated fair value, net of estimated forfeitures, as compensation expense over the requisite service periods of the related awards. The following table reflects the total stock-based compensation expense amounts included in the Company's Consolidated Statements of Operations for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
Cost of ATM operating revenues	\$ 207	\$ 320	\$ 412	\$ 523
Selling, general, and administrative expenses	2,372	3,128	5,332	5,485
Total stock-based compensation expense	\$ 2,579	\$ 3,448	\$ 5,744	\$ 6,008

The decrease in stock-based compensation expense during the three and six months ended June 30, 2013 compared to the prior year was due to the full vesting of certain restricted stock awards ("RSAs") during 2012, as well as a reversal of expenses that were previously taken related to certain performance-based awards that were no longer probable of vesting. These expense reductions were partially offset by

additional expense recognition from the additional grants made during the periods. All grants during the periods above were made under the Company's Amended and Restated 2007 Stock Incentive Plan (the "2007 Stock Incentive Plan").

Restricted Stock Awards. The number of the Company's outstanding RSAs as of June 30, 2013, and changes during the six months ended June 30, 2013, are presented below:

	Number of Shares	Weighted Average Grant Date Fair Value
RSAs outstanding as of January 1, 2013	632,107	\$ 16.36
Granted	95,401	\$ 26.81
Vested	(216,954)	\$ 13.87
Forfeited	(12,500)	\$ 25.87
RSAs outstanding as of June 30, 2013	498,054	\$ 19.19

As of June 30, 2013, the unrecognized compensation expense associated with all outstanding restricted share grants was approximately \$5.6 million, which will be recognized on a straight-line basis over a remaining weighted-average vesting period of approximately 2.2 years.

Restricted Stock Units. In the first quarter of each year since 2011, the Company granted restricted stock units ("RSUs") under its Long Term Incentive Plan ("LTIP"), which is an annual equity award program under the 2007 Plan. The ultimate number of RSUs to be earned and outstanding are approved by the Compensation Committee of the Company's Board of Directors (the "Committee") on an annual basis, and are based on the Company's achievement of certain performance levels during the calendar year of its grant. The majority of these grants have both a performance-based and a service-based vesting schedule ("Performance-RSUs"), and the Company recognizes the related compensation expense based on the estimated performance levels that management believes will ultimately be met. Starting with the grants made in 2013, a portion of the awards have only a service-based vesting schedule ("Time-RSUs"), for which the associated expense is recognized ratably over four years. Performance-RSUs and Time-RSUs are convertible into the Company's common stock after the passage of the vesting periods, which are 24, 36, and 48 months from January 31 of the grant year, at the rate of 50%, 25%, and 25%, respectively. Performance-RSUs will be earned only if the Company achieves certain performance levels. Although the RSUs are not considered to be earned and outstanding until at least the minimum performance metrics are met, the Company recognizes the related compensation expense over the requisite service period (or to an employee's qualified retirement date, if earlier) using a graded vesting methodology.

Edgar Filing: CARDTRONICS INC - Form 10-Q

The number of the Company's non-vested RSUs as of June 30, 2013, and changes during the six months ended June 30, 2013, are presented below:

	Number of Units	Weighted Average Grant Date Fair Value
Non-vested RSUs as of January 1, 2013	749,948	\$ 20.01
Granted	119,744	\$ 27.10
Vested	(261,503)	\$ 17.00
Forfeited	(10,567)	\$ 22.67
Non-vested RSUs as of June 30, 2013	597,622	\$ 22.70

The above table only includes earned RSUs; therefore, the Performance-RSUs granted in 2013 but not yet earned are not included, but the Time-RSUs are included as granted.

As of June 30, 2013, the unrecognized compensation expense associated with earned RSUs was approximately \$6.6 million, which will be recognized using a graded vesting schedule for Performance-RSUs and a straight-line vesting schedule for Time-RSUs, over a remaining weighted-average vesting period of approximately 2.2 years.

Options. The number of the Company's outstanding stock options as of June 30, 2013, and changes during the six months ended June 30, 2013, are presented below:

	Number of Shares	Weighted Average Exercise Price
Options outstanding as of January 1, 2013	552,799	\$ 9.68
Exercised	(70,117)	\$ 6.55
Forfeited	(1,875)	\$ 11.05
Options outstanding as of June 30, 2013	480,807	\$ 10.13
Options vested and exercisable as of June 30, 2013	456,307	\$ 10.26

As of June 30, 2013, the unrecognized compensation expense associated with outstanding options was approximately \$26,000, which will be recognized on a straight-line basis over a remaining weighted-average vesting period of approximately 0.5 years.

#### (4) Earnings per Share

The Company reports its earnings per share under the two-class method. Under this method, potentially dilutive securities are excluded from the calculation of diluted earnings per share (as well as their related impact on the statements of operations) when their impact on net income available to common stockholders is anti-dilutive. Potentially dilutive securities for the three and six months ended June 30, 2013 and 2012 included all outstanding stock options and shares of restricted stock, which were included in the calculation of diluted earnings per share for these periods.

Additionally, the shares of restricted stock issued by the Company have a non-forfeitable right to cash dividends, if and when declared by the Company. Accordingly, restricted shares are considered to be participating securities and, as such, the Company has allocated the undistributed earnings for the three and six months ended June 30, 2013 and 2012 among the Company's outstanding shares of common stock and issued but unvested restricted shares, as follows:

Earnings per Share (in thousands, excluding share and per share amounts):

	Three Months Ended June 30, 2013			Six Months Ended June 30, 2013		
	Weighted Average Shares Outstanding	Earnings Per Share		Weighted Average Shares Outstanding	Earnings Per Share	
Income			Income			

Edgar Filing: CARDTRONICS INC - Form 10-Q

Basic:

Net income attributable to controlling interests and available to common stockholders	\$ 15,327			\$ 24,757			
Less: Undistributed earnings allocated to unvested restricted shares	(448)			(666)			
Net income available to common stockholders	\$ 14,879	44,394,230	\$ 0.34	\$ 24,091	44,321,069	\$ 0.54	

Diluted:

Effect of dilutive securities:

Add: Undistributed earnings allocated to restricted shares	\$ 448			\$ 666			
Stock options added to the denominator under the treasury stock method		220,791			226,782		
Less: Undistributed earnings reallocated to restricted shares	(445)			(662)			
Net income available to common stockholders and assumed conversions	\$ 14,882	44,615,021	\$ 0.33	\$ 24,095	44,547,851	\$ 0.54	

8

	Three Months Ended June 30, 2012			Six Months Ended June 30, 2012		
	Income	Weighted Average Shares Outstanding	Earnings Per Share	Income	Weighted Average Shares Outstanding	Earnings Per Share
<b>Basic:</b>						
Net income attributable to controlling interests and available to common stockholders	\$ 9,664			\$ 19,493		
Less: Undistributed earnings allocated to unvested restricted shares	(359)			(696)		
Net income available to common stockholders	\$ 9,305	43,268,541	\$ 0.22	\$ 18,797	43,163,377	\$ 0.44
<b>Diluted:</b>						
Effect of dilutive securities:						
Add: Undistributed earnings allocated to restricted shares	\$ 359			\$ 696		
Stock options added to the denominator under the treasury stock method		461,659			485,577	
Less: Undistributed earnings reallocated to restricted shares	(356)			(689)		
Net income available to common stockholders and assumed conversions	\$ 9,308	43,730,200	\$ 0.21	\$ 18,804	43,648,954	\$ 0.43

The computation of diluted earnings per share excluded potentially dilutive common shares related to restricted stock (including both RSAs and RSUs) of 454,918 and 466,152 shares for the three and six months ended June 30, 2013, respectively, and 688,414 and 683,639 shares for the three and six months ended June 30, 2012, respectively, because the effect of including these shares in the computation would have been anti-dilutive.

(5) Accumulated Other Comprehensive Loss, Net

Accumulated other comprehensive loss, net is displayed as a separate component of Stockholders' equity in the accompanying Consolidated Balance Sheets. The following tables present the changes in the balances of each component of accumulated other comprehensive loss, net for the three and six months ended June 30, 2013:

	Foreign currency translation adjustments (In thousands)	Unrealized (losses) gains on interest rate swap contracts	Total
Total accumulated other comprehensive loss, net as of April 1, 2013	\$ (28,674)	\$ (74,748) <sup>(1)</sup>	\$ (103,422)
Other comprehensive (loss) income before reclassification	(497)	11,119 <sup>(2)</sup>	10,622
Amounts reclassified from accumulated other comprehensive loss, net	—	6,429 <sup>(2)</sup>	6,429
Net current period other comprehensive (loss) income	(497)	17,548	17,051
Total accumulated other comprehensive loss, net as of June 30, 2013	\$ (29,171)	\$ (57,200) <sup>(1)</sup>	\$ (86,371)

<sup>(1)</sup> Net of deferred income tax benefit of \$13,431 and \$23,977 as of June 30, 2013 and April 1, 2013, respectively.

<sup>(2)</sup> Net of deferred income tax expense of \$6,682 and \$3,863 for Other comprehensive (loss) income before reclassification and Amounts reclassified from accumulated other comprehensive loss, net, respectively. See Note 12.

	Foreign currency translation adjustments (In thousands)	Unrealized (losses) gains on interest rate swap contracts	Total
Total accumulated other comprehensive loss, net as of January 1, 2013	\$ (24,634)	\$ (80,451) <sup>(1)</sup>	\$ (105,085)
Other comprehensive (loss) income before reclassification	(4,537)	10,492 <sup>(2)</sup>	5,955
Amounts reclassified from accumulated other comprehensive loss, net	—	12,759 <sup>(2)</sup>	12,759
Net current period other comprehensive (loss) income	(4,537)	23,251	18,714
Total accumulated other comprehensive loss, net as of June 30, 2013	\$ (29,171)	\$ (57,200) <sup>(1)</sup>	\$ (86,371)

<sup>(1)</sup> Net of deferred income tax benefit of \$13,431 and \$27,412 as of June 30, 2013 and December 31, 2012, respectively.

<sup>(2)</sup> Net of deferred income tax expense of \$6,309 and \$7,672 for Other comprehensive (loss) income before reclassification and Amounts reclassified from accumulated other comprehensive loss, net, respectively. See Note 12.

The Company records unrealized gains and losses related to its interest rate swaps net of estimated taxes in the Accumulated other comprehensive loss, net line item within Stockholders' equity in the accompanying Consolidated Balance Sheets since it is more likely than not that the Company will be able to realize the benefits associated with its net deferred tax asset positions in the future.

The Company currently believes that the unremitted earnings of its foreign subsidiaries will be reinvested for an indefinite period of time. Accordingly, no deferred taxes have been provided for the differences between the Company's book basis and underlying tax basis in these subsidiaries or on the foreign currency translation adjustment amounts.

#### (6) Prepaid Expenses and Other Assets

As of December 31, 2012, the Company had \$13.4 million recorded for an insurance recovery receivable related to a loss sustained as a result of the misappropriation of cash in February 2010 by the president and principal owner of Mount Vernon Money Center ("MVMC"), one of the Company's former third-party armored service providers in the Northeast U.S. The Company collected this entire amount from its insurer in January 2013.

#### (7) Intangible Assets

## Intangible Assets with Indefinite Lives

The following table presents the net carrying amount of the Company's intangible assets with indefinite lives as of June 30, 2013, as well as the changes in the net carrying amounts for the six months ended June 30, 2013, by segment:

	Goodwill		Other International	Total
	U.S.	U.K.		
	(In thousands)			
Balance as of January 1, 2013:				
Gross balance	\$ 268,454	\$ 64,142	\$ 3,103	\$ 335,699

Total	\$ 258,086	\$ (155,946)	\$ 243,224	\$ (144,087)

(8) Accrued Liabilities

Accrued liabilities consisted of the following:

June 30, 2013	December 31, 2012
(In thousands)	

Edgar Filing: CARDTRONICS INC - Form 10-Q

Accrued merchant fees	\$ 25,885	\$ 23,510
Accrued merchant settlement amounts	6,806	9,255
Accrued compensation	6,563	9,524
Accrued interest expense	5,798	5,753
Accrued armored fees	4,691	4,628
Accrued cash rental and management fees	3,684	4,067
Accrued maintenance fees	3,621	4,865
Accrued interest rate swap payments	2,121	2,299
Accrued purchases	1,987	2,084
Accrued ATM telecommunications costs	1,099	1,254
Accrued processing costs	936	1,510
Other accrued expenses	12,671	11,363
Total	\$ 75,862	\$ 80,112

## (9) Long-Term Debt

The Company's long-term debt consisted of the following:

	June 30, 2013	December 31, 2012
	(In thousands)	
8.25% Senior subordinated notes due September 2018	\$ 200,000	\$ 200,000
Revolving credit facility, including swing-line credit facility (weighted-average combined interest rate of 2.2% as of June 30, 2013 and December 31, 2012)	133,500	152,000
Equipment financing notes	2,093	2,819
Total	335,593	354,819
Less: current portion	1,469	1,467
Total long-term debt, excluding current portion	\$ 334,124	\$ 353,352

## Revolving Credit Facility

As of June 30, 2013, the Company's revolving credit facility provided for \$250.0 million in borrowings and letters of credit (subject to the covenants contained within the facility), had a termination date of July 2016, and contained a feature that allows the Company to expand the facility up to \$325.0 million, subject to the availability of additional bank commitments by existing or new syndicate participants.

This revolving credit facility includes a \$15.0 million swing-line facility, a \$60.0 million foreign currency sub-limit, and a \$20.0 million letter of credit sub-limit. Borrowings under the facility bear interest at a variable rate, based upon the Company's total leverage ratio and the London Interbank Offered Rate ("LIBOR") or Alternative Base Rate (as defined in the agreement) at the Company's option. Additionally, the Company is required to pay a commitment fee on the unused portion of the revolving credit facility. Substantially all of the Company's assets, including the stock of its wholly-owned domestic subsidiaries and 66% of the stock of its foreign subsidiaries, are pledged to secure borrowings made under the revolving credit facility. Furthermore, each of the Company's domestic subsidiaries has guaranteed the Company's obligations under the revolving credit facility. There are currently no restrictions on the ability of the Company's wholly-owned subsidiaries to declare and pay dividends directly to us.

As of June 30, 2013, the Company was in compliance with all applicable covenants and ratios under the facility, which were described in the 2012 Form 10-K.

As of June 30, 2013, \$133.5 million was outstanding under the Company's revolving credit facility. Additionally, the Company has posted a \$2.0 million letter of credit serving to secure the overdraft facility of its U.K. subsidiary (further discussed below) and a \$0.1 million letter of credit serving to secure a third-party processing contract in Canada. These letters of credit, which the applicable third-parties may draw upon in the event the Company defaults on the related obligations, reduce the Company's borrowing capacity under the facility. As of June 30, 2013, the Company's available borrowing capacity under the revolving credit facility totaled approximately \$114.4 million.

#### \$200.0 Million 8.25% Senior Subordinated Notes Due 2018

The \$200.0 million 8.25% senior subordinated notes due September 2018 (the "2018 Notes"), which are guaranteed by all of the Company's domestic subsidiaries, contain no maintenance covenants and only limited incurrence covenants, under which the Company has considerable flexibility. Interest under the 2018 Notes is paid semi-annually in arrears on March 1st and September 1st of each year. As of June 30, 2013, the Company was in compliance with all applicable covenants required under the 2018 Notes.

#### Other Borrowing Facilities

Cardtronics Mexico equipment financing agreements. Between 2007 and 2010, Cardtronics Mexico entered into several separate five-year equipment financing agreements with a single lender, of which four agreements have outstanding balances as of June 30, 2013. These agreements, which are denominated in pesos and bear interest at an average fixed rate of 10.02%, were utilized for the purchase of ATMs to support the growth of the Company's Mexico operations. As of June 30, 2013, approximately \$27.1 million pesos (\$2.1 million U.S.) were outstanding under the agreements. Pursuant to the terms of the loan agreements, the Company has issued guarantees for 51.0% of the obligations under these agreements (consistent with its ownership percentage in Cardtronics Mexico). As of June 30, 2013, the total amount of these guarantees was \$13.8 million pesos (\$1.1 million U.S.).

Bank Machine overdraft facility. Bank Machine, Ltd. ("Bank Machine") has a £1.0 million overdraft facility. This overdraft facility, which bears interest at 1.0% over the bank's base rate (0.5% as of June 30, 2013) and is secured by a letter of credit posted under the Company's revolving credit facility as discussed above in the Revolving Credit Facility section, is utilized for general corporate purposes for the Company's U.K. operations. As of June 30, 2013, there were no amounts outstanding under the overdraft facility.

## (10) Asset Retirement Obligations

Asset retirement obligations consist primarily of costs to deinstall the Company's ATMs and costs to restore the ATM sites to their original condition, which are estimated based on current market rates. In most cases, the Company is contractually required to perform this deinstallation and restoration work. For each group of ATMs, the Company has recognized the fair value of the asset retirement obligation as a liability on its balance sheet and capitalized that cost as part of the cost basis of the related asset. The related assets are depreciated on a straight-line basis over five years, which is the estimated average time period that an ATM is installed in a location before being deinstalled, and the related liabilities are accreted to their full value over the same period of time. As reflected in the table below, during the six months ended June 30, 2013, the Company revised its estimated future liabilities based on recent actual experience, changes in certain customer-specific estimates and other cost estimate changes. The changes in estimated future costs were recorded as a reduction in the carrying amount of the remaining unamortized asset and will reduce the Company's depreciation and accretion expense amounts in future periods.

The following table is a summary of the changes in the Company's asset retirement obligation liability for the six months ended June 30, 2013 (in thousands):

Asset retirement obligation as of January 1, 2013	\$ 44,696
Additional obligations	1,666
Accretion expense	1,270
Change in estimates	(5,677)
Payments	(1,233)
Foreign currency translation adjustments	(1,256)
Asset retirement obligation as of June 30, 2013	\$ 39,466

See Note 13, Fair Value Measurements for additional disclosures on the Company's asset retirement obligations with respect to its fair value measurements.

## (11) Other Liabilities

Other liabilities consisted of the following:

June 30,	December
2013	31, 2012

Edgar Filing: CARDTRONICS INC - Form 10-Q

	(In thousands)	
Current Portion of Other Long-Term Liabilities:		
Interest rate swaps	\$ 25,929	\$ 23,117
Deferred revenue	1,564	835
Other	51	434
Total	\$ 27,544	\$ 24,386
Other Long-Term Liabilities:		
Interest rate swaps	\$ 44,915	\$ 84,973
Obligations associated with acquired unfavorable contracts	—	964
Deferred revenue	1,077	1,353
Other	3,320	5,831
Total	\$ 49,312	\$ 93,121

Other long-term liabilities related to interest rate swaps decreased significantly from \$85.0 million at December 31, 2012 to \$44.9 million at June 30, 2013 mostly as a result of changes (increases) in forward interest rate curves since December 31, 2012.

(12) Derivative Financial Instruments

Cash Flow Hedging Strategy

The Company is exposed to certain risks relating to its ongoing business operations, including interest rate risk associated with its vault cash rental obligations and, to a lesser extent, borrowings under its revolving credit facility. The Company is also exposed to foreign currency exchange rate risk with respect to its investments in its foreign subsidiaries, most notably its investment in Bank Machine in the U.K. While the Company does not currently utilize derivative instruments to hedge its foreign currency exchange rate risk, it does utilize interest rate swap contracts to manage the interest rate risk associated with its vault cash rental obligations in the U.S. and the U.K. The Company does not currently utilize any derivative instruments to manage the interest rate risk associated with its vault cash rental obligations in Mexico or Canada, nor does it utilize derivative instruments to manage the interest rate risk associated with borrowings outstanding under its revolving credit facility.

The interest rate swap contracts entered into with respect to the Company's vault cash rental obligations serve to mitigate the Company's exposure to interest rate risk by converting a portion of the Company's monthly floating rate vault cash rental obligations to a fixed rate. The Company has contracts in varying notional amounts through December 31, 2018 for the Company's U.S. vault cash rental obligations. By converting such amounts to a fixed rate, the impact of future interest rate changes (both favorable and unfavorable) on the Company's monthly vault cash rental expense amounts has been reduced. The interest rate swap contracts typically involve the receipt of floating rate amounts from the Company's counterparties that match, in all material respects, the floating rate amounts required to be paid by the Company to its vault cash providers for the portions of the Company's outstanding vault cash obligations that have been hedged. In return, the Company typically pays the interest rate swap counterparties a fixed rate amount per month based on the same notional amounts outstanding. At no point is there an exchange of the underlying principal or notional amounts associated with the interest rate swaps. Additionally, none of the Company's existing interest rate swap contracts contain credit-risk-related contingent features.

For each derivative instrument that is designated and qualifies as a cash flow hedge (i.e., hedging the exposure to variability in expected future cash flows attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) ("OCI") and reclassified into earnings in the same line item associated with the forecasted transaction and in the same period or periods during which the hedge transaction affects earnings. Gains and losses on the derivative instrument representing either hedge ineffectiveness or hedge components that are excluded from the assessment of effectiveness are recognized in earnings. However, because the Company currently only utilizes fixed-for-floating interest rate swaps in which the underlying pricing terms agree, in all material respects, with the pricing terms of the Company's vault cash rental obligations, the amount of ineffectiveness associated with such interest rate swap contracts has historically been immaterial. Accordingly, no ineffectiveness amounts associated with the Company's effective cash flow hedges have been recorded in the Company's consolidated financial statements. For derivative instruments not designated as hedging instruments, the gain or loss is recognized in the Consolidated Statements of Operations during the current period.

The notional amounts, weighted average fixed rates, and terms associated with the Company's interest rate swap contracts accounted for as cash flow hedges that are currently in place (as of the date of the issuance of these financial statements) are as follows:

Notional Amounts U.S.	Notional Amounts U.K.	Notional Amounts Consolidated (1)	Weighted Average Fixed Rate	Term
(In thousands)				
\$ 1,000,000	£ 25,000	\$ 1,038,020	2.69 %	July 1, 2013 – December 31, 2013
\$ 1,250,000	£ —	\$ 1,250,000	2.98 %	January 1, 2014 – December 31, 2014
\$ 1,300,000	£ —	\$ 1,300,000	2.84 %	January 1, 2015 – December 31, 2015
\$ 1,300,000	£ —	\$ 1,300,000	2.74 %	January 1, 2016 – December 31, 2016
\$ 1,000,000	£ —	\$ 1,000,000	2.53 %	January 1, 2017 – December 31, 2017
\$ 750,000	£ —	\$ 750,000	2.54 %	January 1, 2018 – December 31, 2018

<sup>(1)</sup> U.K. pound sterling amounts have been converted into U.S. dollars at approximately \$1.52 to £1.00, which was the exchange rate in effect as of June 30, 2013.

#### Accounting Policy

The Company recognizes all of its derivative instruments as either assets or liabilities in the accompanying Consolidated Balance Sheets at fair value. The accounting for changes in the fair value (e.g., gains or losses) of those derivative instruments depends on (1) whether these instruments have been designated (and qualify) as part of a hedging relationship and (2) the type of hedging relationship actually designated. For derivative instruments that are designated and qualify as hedging instruments, the Company designates the hedging instrument, based upon the exposure being hedged, as a cash flow hedge, a fair value hedge, or a hedge of a net investment in a foreign operation.

The Company has designated all of its interest rate swap contracts as cash flow hedges of the Company's forecasted vault cash rental obligations. Accordingly, changes in the fair values of the related interest rate swap contracts have been reported in the Accumulated other comprehensive loss, net line item within stockholders' equity in the accompanying Consolidated Balance Sheets.

The Company believes that it is more likely than not that it will be able to realize the benefits associated with its domestic net deferred tax asset positions in the future. Therefore, the Company records the unrealized losses related to its domestic interest rate swaps net of estimated tax benefits in the Accumulated other comprehensive loss, net line item within Stockholders' equity in the accompanying Consolidated Balance Sheets.

#### Tabular Disclosures

The following tables depict the effects of the use of the Company's derivative contracts on its Consolidated Balance Sheets and Consolidated Statements of Operations.

Balance Sheet Data

Liability Derivative Instruments:	June 30, 2013		December 31, 2012

	(In thousands)		(In thousands)
Interest rate swap contracts	\$ 10,492	\$ (35,965) Cost of ATM operating revenues	\$ (12,759) \$ (12,842)

The Company does not currently have any derivative instruments that have been designated as fair value or net investment hedges. The Company has not historically, and does not currently anticipate terminating its existing derivative instruments prior to their expiration dates. If the Company concludes that it is no longer probable that the anticipated future vault cash rental obligations that have been hedged will occur, or if changes are made to the underlying terms and conditions of the Company's vault cash rental agreements, thus creating some amount of ineffectiveness associated with the Company's current interest rate swap contracts, any resulting gains or losses will be recognized within the Other expense (income) line item of the Company's Consolidated Statements of Operations.

As of June 30, 2013, the Company expected to reclassify \$25.7 million of net derivative-related losses contained within accumulated OCI into earnings during the next twelve months concurrent with the recording of the related vault cash rental expense amounts.

See Note 13, Fair Value Measurements for additional disclosures on the Company's interest rate swap contracts in respect to its fair value measurements.

(13) Fair Value Measurements

The following table provides the assets and liabilities carried at fair value measured on a recurring basis as of June 30, 2013 using the fair value hierarchy prescribed by U.S. GAAP. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 refers to fair values determined based on quoted prices in active markets for identical assets. Level 2 refers to fair values estimated using significant other observable inputs, and Level 3 includes fair values estimated using significant non-observable inputs. An asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

Fair Value Measurements at June 30, 2013				
	Total	Level 1	Level 2	Level 3
(In thousands)				
<b>Liabilities</b>				
Liabilities associated with interest rate swaps	\$ 70,844	\$ —	\$ 70,844	\$ —
Acquisition-related contingent consideration	570	—	—	570

Fair Value Measurements at December 31, 2012				
	Total	Level 1	Level 2	Level 3
(In thousands)				
<b>Liabilities</b>				
Liabilities associated with interest rate swaps	\$ 108,090	\$ —	\$ 108,090	\$ —
Acquisition-related contingent consideration	3,455	—	—	3,455

Additions to asset retirement obligation liability. The Company estimates the fair value of additions to its asset retirement obligation liability using expected future cash outflows discounted at the Company's credit-adjusted risk-free interest rate. Liabilities added to the asset retirement obligations line item in the accompanying Consolidated Balance Sheets are measured at fair value at the time of the asset installations on a non-recurring basis using Level 3 inputs, and are only reevaluated periodically based on current fair value. Amounts added to the asset retirement obligation liability during the six months ended June 30, 2013 and 2012 totaled \$1.7 million and \$6.4 million, respectively.

Below are descriptions of the Company's valuation methodologies for assets and liabilities measured at fair value. The methods described below may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Cash and cash equivalents, accounts and notes receivable, net of the allowance for doubtful accounts, other current assets, accounts payable, accrued expenses, and other current liabilities. These financial instruments are not carried at fair value, but are carried at amounts that approximate fair value due to their short-term nature and generally negligible credit risk.

Interest rate swaps. The fair value of the Company's interest rate swaps was a net liability of \$70.8 million as of June 30, 2013. These financial instruments are carried at fair value, calculated as the present value of amounts estimated to be received or paid to a marketplace participant in a selling transaction. These derivatives are valued using pricing models based on significant other observable inputs (Level 2 inputs), while taking into account the creditworthiness of the party that is in the liability position with respect to each trade. See Note 12, Derivative Financial Instruments for additional disclosures on the valuation process of this liability.

Acquisition-related contingent consideration. Liabilities from acquisition-related contingent consideration are estimated by the Company using a discounted cash flow model. Acquisition-related contingent consideration liabilities are classified as Level 3 liabilities, because the Company uses unobservable inputs to value them, based on its best estimate of operational results upon which the payment of these obligations are contingent. Gains and losses related to the contingent consideration associated with acquisitions are included in other (income) expenses in the Company's consolidated statements of operations.

Long-term debt. The carrying amount of the long-term debt balance related to borrowings under the Company's revolving credit facility approximates fair value due to the fact that any borrowings are subject to short-term floating interest rates. As of June 30, 2013, the fair value of the Company's 2018 Notes (see Note 9, Long-Term Debt) totaled \$214.5 million, based on the quoted market price (Level 1 input) for the 2018 Notes as of that date.

#### (14) Commitments and Contingencies

##### Legal Matters

Automated Transactions. On August 16, 2010, a lawsuit was filed in the United States District Court for the District of Delaware (the "District Court") entitled Automated Transactions LLC ("ATL") v. IYG Holding Co., et al. 10 Civ. 0691 (D. Del.) (the "2010 Lawsuit"). The 2010 Lawsuit names the Company's wholly-owned subsidiary, Cardtronics USA, Inc. ("Cardtronics USA"), as one of the defendants. The 2010 Lawsuit alleges that Cardtronics USA and the other defendants infringed upon seven of the plaintiff's patents by providing retail transactions to consumers through their ATMs. The plaintiff, ATL, is seeking a permanent injunction, damages, treble damages and costs, including attorney's fees and expenses. The allegations raised by the plaintiff in this suit are similar to the allegations made by the same plaintiff in a suit filed in 2006 (the "2006 Lawsuit") against 7-Eleven, Inc. ("7-Eleven") concerning six of the same seven patents. In July

2007, when the Company acquired the 7-Eleven portfolio, the Company became subject to the 2006 Lawsuit. The ATM supplier in that case agreed to indemnify 7-Eleven against the plaintiff's claims. That indemnity was assigned by 7-Eleven to the Company, and the supplier acknowledged that assignment.

The 2010 Lawsuit was initially stayed by order of the District Court pending the outcome of the 2006 Lawsuit. In the 2006 Lawsuit, following the Company's submission for summary judgment the District Court found that the defendants did not infringe the claims asserted in any of the plaintiff's five patents (the allegations as to the sixth patent having been dismissed earlier). In addition, the District Court granted the defendants partial summary judgment, concluding that the plaintiff's patent claims were, in part, invalid and rendered other findings so as to materially weaken the plaintiff's case. In addition, on January 28, 2011, the United States Patent and Trademark Office Board of Patent Appeals and Interferences ("BPAI") issued a decision affirming the rejection on the grounds of obviousness of all the claims of one of the patents asserted by the plaintiff in both the 2006 Lawsuit and the 2010 Lawsuit. The plaintiff appealed both of these rulings to the U.S. Court of Appeals for the Federal Circuit (the "Court of Appeals"). On April 23, 2012, the Court of Appeals rendered a decision that affirmed both the District Court's rulings and the BPAI decision (the "Appeals Decision"). ATL's request for rehearing of the Appeals Decision was denied. As a consequence, the 2006 Lawsuit has been effectively resolved in the Company's favor pending entry of a formal final judgment. Furthermore, though the Appeals Decision in the 2006 Lawsuit does not formally terminate the 2010 Lawsuit, the findings set forth in the Appeals Decision should also resolve in favor of the Company all of the claims made involving the same patents as had been asserted in the 2006 Lawsuit. The Appeals Decision should also materially weaken the plaintiff's claims in the two remaining patents in the 2010 Lawsuit, which has been consolidated with the 2006 Lawsuit and resumed.

Notwithstanding the outcome of the 2006 Lawsuit, ATL initiated several new patent infringement lawsuits against other companies, based on "child" patents of the parent patent in the 2006 Lawsuit and the 2010 Lawsuit. The asserted claims of the parent patent were already held invalid in the Appeals Decision. Two of those new cases were brought in New York federal courts and named as defendants the customers of the Company under ATM placement agreements pursuant to which the Company operates ATMs alleged to infringe ATL's child patents. Until resolved, these cases implicate the Company in defending its customers where these ATMs are placed and could involve ATL alleging new claims against the Company. The Company has joined as a defendant in one of those cases and asserted counterclaims against ATL for invalidity, non-infringement and requesting costs and attorneys' fees for improperly bringing such a suit. On January 17, 2013, the Court in that case agreed with the Company's request to transfer the case to the U.S. District Court in Delaware because of that Court's familiarity with the patents in suit.

On April 1, 2013, a panel for the United States Judicial Panel on Multidistrict Litigation, over ATL's objection, transferred eight other suits involving ATL's parent patent and 12 child patents and several different types of ATMs to the U.S. District Court in Delaware to be consolidated or coordinated before the Judge who had previously decided the 2006 lawsuit against ATL. In addition, the other action still pending in New York federal court against the Company's customer, noted above, was also transferred to that Judge, along with other ATL cases deemed to be "tag along" actions to the cases already transferred. The Delaware District Court had scheduled a status and scheduling conference for early June 2013 to assess how best to proceed on all of these cases, but rescheduled that conference for early August 2013 at the request of one of the parties.

The Company believes that these ATL lawsuits have no merit, primarily because the asserted child patents have patent claims or limitations previously held invalid or not infringed by the Appeals Decision. Accordingly, the Company does not expect that the remaining lawsuits will have a material impact on its financial condition or results of operation, and the Company will continue to vigorously defend its position.

National Federation of the Blind. Through its acquisition of the E\*Trade ATM portfolio, the Company became the sole defendant in the 2003 lawsuit filed by the National Federation of the Blind, the Commonwealth of Massachusetts, et. al. and certain individuals representing a class of similarly situated persons (the "Plaintiffs") against E\*Trade Access, Inc., et al. in the United States District Court for the District of Massachusetts: Civil Action No. 03-11206-NMG (the "Lawsuit"). The Plaintiffs sought to require, among other things, that ATMs deployed by E\*Trade be voice-guided. In December 2007, the Company and Plaintiffs entered into a settlement agreement (as modified in November 2010, the "Settlement Agreement"). In 2011, the Plaintiffs filed a motion of contempt with the District Court alleging that the Company had failed to fully comply with the requirements of the Settlement Agreement. On December 15, 2011, the District Court issued an order that required the Company to bring all of its ATMs in compliance with the terms of the Settlement Agreement by March 15, 2012. In August 2012, the Plaintiffs filed their second motion of contempt, which alleged, among other things, that the Company had failed to meet the District Court's deadline and sought a fine of \$50 per ATM for each month that the District Court determined the Company was not in compliance. The Company filed its response on September 28, 2012, in which it asserted that while the Company's ATMs are in substantial compliance with the accessibility rules issued under the American with Disabilities Act, as amended (the "ADA"), compliance with certain terms of the Settlement Agreement would conflict with the requirements of the ADA. The Company also asked the District Court to appoint a special master to assist the Company and the Plaintiffs in resolving these conflicting requirements. In April 2013, the District Court held a hearing in which it indicated that it would appoint a special master to assist the District Court in determining what sanctions should be imposed upon the Company, but also to assist the parties in resolving the remaining issues in the Settlement Agreement. On May 22, 2013, the District Court issued an order appointing a special master. Among other matters, the order requires the special master within 120 days of his appointment to issue a report and recommendation to the District Court concerning the amount of the contempt sanction to be assessed against the Company, which recommendation may allocate some or all of such sanctions toward further compliance efforts. The Company is

uncertain of the ultimate outcome of this matter, but does not believe it will have a material adverse effect upon the Company's financial statements.

In addition to the above items, the Company is subject to various legal proceedings and claims arising in the ordinary course of its business. The Company has provided reserves where necessary for all claims and the Company's management does not expect the outcome in any of these legal proceedings, individually or collectively, to have a material adverse impact on the Company's financial condition or results of operations. Additionally, the Company currently expenses all legal costs as they are incurred.

#### Other Commitments

Asset Retirement Obligations. The Company's asset retirement obligations consist primarily of deinstallation costs of the ATM and costs to restore the ATM site to its original condition. In most cases, the Company is legally required to perform this deinstallation and restoration work. The Company had \$39.5 million accrued for these liabilities as of June 30, 2013. For additional information, see Note 10, Asset Retirement Obligations.

#### (15) Income Taxes

Income tax expense based on the Company's income before income taxes was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands)		(In thousands)	
Income tax expense	\$ 10,034	\$ 6,369	\$ 16,014	\$ 12,515
Effective tax rate	40.5 %	39.9 %	40.1 %	38.9 %

The Company's effective tax rate during the three and six months ended June 30, 2013 and 2012 was higher than the combined total of the U.S. federal statutory rate of 35% and the Company's estimated effective state tax rate of 2.5%, primarily due to operating losses in certain of the Company's foreign operations for which it does not record a tax benefit, as a result of carrying a valuation allowance on those deferred tax assets. The slight rate increase from the three and six months ended June 30, 2012 to the three and six months ended June 30, 2013 is mostly attributable to an increase in operating losses in foreign operations for which the Company does not record a tax benefit, as a result of carrying a valuation allowance on its deferred tax assets. The Company continues to maintain valuation allowances for its local net deferred tax asset positions in the U.K. and Mexico, as the Company currently believes that it is more likely than not that these benefits will not be realized.

The deferred taxes associated with the Company's unrealized gains and losses on derivative instruments have been reflected within the accumulated other comprehensive loss balance in the accompanying Consolidated Balance Sheets.

(16) Segment Information

As of June 30, 2013, the Company's operations consisted of its U.S., U.K., and Other International segments. The Company's operations in Puerto Rico and the U.S. Virgin Islands are included in its U.S. segment. The Other International segment currently is comprised of the Company's operations in Mexico and Canada. While each of these reporting segments provides similar kiosk-based and/or ATM-related services, each segment is currently managed separately as they require different marketing and business strategies.

Management uses Adjusted EBITDA, along with other U.S. GAAP-based measures, to assess the operating results and effectiveness of its segments. Management believes Adjusted EBITDA is a useful measure because it allows management to more effectively evaluate operating performance and compare its results of operations from period to period without regard to financing method or capital structure. The Company excludes depreciation, accretion, and amortization expense as these amounts can vary substantially depending upon book values of assets, capital structures and the method by which the assets were acquired. Additionally, Adjusted EBITDA does not reflect acquisition-related costs and the Company's obligations for the payment of income taxes, loss on disposal of assets, interest expense, certain other non-operating items or other obligations such as capital expenditures.

Adjusted EBITDA, as defined by the Company, may not be comparable to similarly titled measures employed by other companies and is not a measure of performance calculated in accordance with U.S. GAAP. In evaluating the Company's performance as measured by Adjusted EBITDA, management recognizes and considers the limitations of this measurement. Accordingly, Adjusted EBITDA is only one of the measurements that management utilizes. Therefore, Adjusted EBITDA should not be considered in isolation or as a substitute for operating income, net income, cash flows from operating, investing, and financing activities or other income or cash flow statement data prepared in accordance with U.S. GAAP.

Edgar Filing: CARDTRONICS INC - Form 10-Q

Below is a reconciliation of Adjusted EBITDA to net income attributable to controlling interests:

	Three Months Ended		Six Months Ended

(17) New Accounting Pronouncements

Adopted

Reclassifications out of Accumulated Other Comprehensive Income. In February 2013, the FASB issued ASU 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This update requires entities to disclose items reclassified out of accumulated other comprehensive income and into net income in a single location within the financial statements. The Company adopted ASU 2013-02 as of January 1, 2013, and now reports this information in Note 5, Accumulated Other Comprehensive Loss, Net.

(18) Supplemental Guarantor Financial Information

The Company's 2018 Notes are fully and unconditionally guaranteed on a joint and several basis by all of the Company's 100% owned domestic subsidiaries. The following information sets forth the condensed consolidating statements of operations and cash flows for the three and six months ended June 30, 2013 and 2012 and the condensed consolidating balance sheets as of June 30, 2013 and December 31, 2012 of (1) Cardtronics, Inc., the parent company and issuer of the 2018 Notes ("Parent"); (2) all of the Company's 100% owned domestic subsidiaries on a combined basis (collectively, the "Guarantors"); and (3) the Company's international subsidiaries on a combined basis (collectively, the "Non-Guarantors"):

CAUTIONARY STATEMENT REGARDING FORWARD—LOOKING STATEMENTS

Certain statements and information in this Form 10-Q may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believe,” “expect,” “anticipate,” “plan,” “intend,” “foresee,” “should,” “would,” “could” or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we currently anticipate. All comments concerning our expectations for future revenues and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Important factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to, those summarized below:

- our financial outlook and the financial outlook of the ATM industry;
- our ability to respond to recent and future network and regulatory changes, including potential requirements surrounding Europay, MasterCard and Visa (“EMV”) security standards;
- our ability to respond to potential reductions in the amount of net interchange fees that we receive from global and regional debit networks for transactions conducted on our ATMs due to pricing changes implemented by those networks as well as changes in how issuers route their ATM transactions over those networks;
- our ability to renew and strengthen our existing customer relationships and add new customers;
- our ability to provide new ATM solutions to retailers and financial institutions;
- our ATM vault cash rental needs, including potential liquidity issues with our vault cash providers;
- our ability to successfully manage our existing international operations and to continue to expand internationally;
- our ability to prevent security breaches;
- our ability to manage the risks associated with our third-party service providers failing to perform their contractual obligations;
- our ability to manage concentration risks with key customers, vendors, and service providers;
- changes in interest rates and foreign currency rates;
- our ability to successfully implement our corporate strategy;
- our ability to compete successfully with new and existing competitors;
- our ability to meet the service levels required by our service level agreements with our customers;
- the additional risks we are exposed to in our U.K. armored transport business; and
- our ability to retain our key employees.

For additional information regarding known material factors that could cause our actual results to differ from our projected results, please see (1) Part II, “Item 1A. Risk Factors” in this Form 10-Q and (2) Part I, “Item 1A. Risk Factors” in the 2012 Form 10 K.

Readers are cautioned not to place undue reliance on forward-looking statements contained in this document, which speak only as of the date of this Form 10-Q. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events

or otherwise.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Cardtronics, Inc. provides convenient automated consumer financial services through its network of automated teller machines ("ATMs") and multi-function financial services kiosks. As of June 30, 2013, we were the world's largest retail ATM owner, providing services to approximately 72,200 devices throughout the United States ("U.S.") (including the U.S. territories of Puerto Rico and the U.S. Virgin Islands), the United Kingdom ("U.K."), Mexico and Canada. Included within the number of devices in the U.S. are approximately 2,200 multi-function financial services kiosks that, in addition to traditional ATM functions such as cash dispensing and bank account balance inquiries, perform other consumer financial services, including bill payments, check cashing, remote deposit capture (which represents deposits taken using electronic imaging at ATMs not physically located at a bank), and money transfers. Also included in the number of devices in our network as of June 30, 2013 were approximately 13,600 ATMs to which we provided various forms of managed services. Under a managed services arrangement, retailers and financial institutions rely on us to handle some or all of the operational aspects associated with operating and maintaining the ATMs, typically in exchange for a monthly service fee or fee per service provided. We typically do not receive surcharge and interchange fees in these arrangements, but rather those fees are earned by our customers.

We often partner with large, nationally and regionally-known retail merchants under multi-year contracts to place our ATMs and kiosks within their store locations. In doing so, we provide our retail partners with a compelling automated financial services solution that helps attract and retain customers, and in turn increases the likelihood that our devices will be utilized. We also partner with leading national and regional financial institutions to brand selected ATMs and financial services kiosks within our network. As of June 30, 2013, approximately 18,500 of our domestic devices and approximately 500 of our ATMs in Canada were under contract with financial institutions to place their logos on those machines and to provide convenient surcharge-free access for their banking customers. In return for the branding that we provide, we receive monthly fees on a per ATM basis from the branding institution, while retaining our standard fee schedule for non-customers of the financial institutions who use the branded ATMs. In Mexico, we are also under contract with a couple of financial institutions to place their brands on our ATMs in exchange for certain services provided by them.

Additionally, we own and operate the Allpoint network, the largest surcharge-free ATM network within the U.S. (based on the number of participating ATMs). The Allpoint network, which has more than 55,000 participating ATMs globally, provides surcharge-free ATM access to customers of participating financial institutions that lack a significant ATM network in exchange for either a fixed monthly fee per cardholder or a set fee per transaction that is paid by the financial institutions who are members of the network. The Allpoint network includes a majority of our ATMs in the U.S., U.K., Puerto Rico and Mexico, approximately a quarter of our ATMs in Canada, and over 5,000 locations in Australia through a partnership with a local ATM owner and operator in that market. Allpoint also works with financial institutions that manage stored-value debit card programs on behalf of corporate entities and governmental agencies, including general purpose, payroll, and electronic benefits transfer ("EBT") cards. Under these programs, the issuing financial institutions pay Allpoint a fee per issued stored-value card or per transaction in return for allowing the users of those cards surcharge-free access to Allpoint's participating ATM network.

Finally, we own and operate an electronic funds transfer (“EFT”) transaction processing platform that provides transaction processing services to our network of ATMs and financial services kiosks as well as ATMs owned and operated by third parties. For additional discussion of our operations and the manner in which we derive revenues, please refer to the 2012 Form 10-K.

## Strategic Outlook

Over the past several years, we have expanded our operations both domestically and internationally through acquisitions, built an EFT transaction processing platform, launched our armored courier operation in the U.K., continued to deploy ATMs in high-traffic locations under contracts with well-known retailers, expanded our relationships with leading financial institutions, grown our Allpoint surcharge-free ATM network, and developed new product offerings such as managed ATM services.

During 2011, we completed four acquisitions: (1) in July, we acquired all of the outstanding securities of EDC ATM Subsidiary, LLC and Efmak Deployment I, Inc. (collectively referred to as “EDC”) from EDC Holding Company, LLC, which provided us with over 3,600 ATMs that are primarily located in well-known convenience store locations throughout the U.S.; (2) in August, we completed the acquisition of LocatorSearch, a domestic leading provider of location search technology deployed by financial institutions to help customers and members find the nearest, most appropriate and convenient ATM location based on the service they seek; (3) in October, we acquired Mr. Cash ATM Network, Inc. (“Mr. Cash”), a privately-held company with approximately 600 ATMs across Canada, which allowed us to expand our international presence into Canada; and (4) in November, we completed the acquisition of Access to Money, Inc. (“Access to Money”), a leading operator of ATMs, with approximately 10,000 mostly merchant-owned ATMs across the U.S., including both multi-unit regional retail chains and individual merchant ATM locations.

During 2012, we completed three additional acquisitions: (1) in January, we acquired certain assets from CTS, an ATM installation company in the U.K.; (2) in August, we acquired certain assets from ATM Network, Inc. (“ATM Network”), a Minnesota-based ATM operator of approximately 6,200 mostly merchant-owned ATMs; and (3) in December, we acquired Can-Do-Cash, Ltd. (“Can-Do-Cash”), a Canadian ATM operator of approximately 800 ATMs.

During the first six months of 2013, we completed three acquisitions: (1) in March, we acquired i-design group plc (“i-design”), which is a Scotland-based provider and developer of marketing and advertising software and services for ATM owners; (2) in May, we acquired certain assets of Aptus Group, LLC (“Aptus”), a provider of ATM services to a nationwide fleet of approximately 3,300 ATMs; and (3) in June, we acquired certain assets of Merrimak ATM Group, LLC (“Merrimak”), also a provider of ATM services to a nationwide fleet of approximately 4,800 ATMs .

While we will continue to explore potential acquisition opportunities in the future as a way to grow our business, we expect to continue launching new products and services that will allow us to further leverage our existing ATM and financial services kiosk network. In particular, we see opportunities to expand our operations through the following:

- Increase our Number of Deployed Devices with Existing as well as New Merchant Relationships. We believe that there are significant opportunities to deploy additional ATMs with our existing retail customers in locations that currently do not have ATMs. Furthermore, many of our retail customers continue to expand their number of active store locations, either through acquisitions or through new store openings, thus providing us with additional ATM deployment opportunities. Additionally, we are actively pursuing opportunities to deploy ATMs with new retailers, including retailers that currently do not have ATMs, as well as those that have existing ATM programs but that are looking for a new ATM provider. We believe our expertise, national footprint, strong record of customer service, and significant scale position us to successfully market to, and enter into long-term contracts with, additional leading national and regional merchants. In addition, we believe our existing relationships with leading U.S.- and U.K.-based retailers position us to expand in international locations where these existing partners have operations.
- Expand our Relationships with Leading Financial Institutions. Through our merchant relationships as well as our diverse product and service offerings, we believe we can provide our existing financial institution customers with convenient solutions to fulfill their growing ATM and automated consumer financial services requirements. Further, we believe we can leverage these offerings to attract additional financial institutions as customers. Our services currently offered to financial institutions include branding our ATMs with their logos, providing remote deposit capture, providing surcharge-free access to their customers through our Allpoint network, and offering managed services for their ATM portfolios. Our EFT transaction processing capabilities provide us with the ability to provide customized control over the content of the information appearing on the screens of our ATMs and ATMs we process for financial institutions, which increases the types of products and services that we are able to offer to financial institutions. The number of machines and financial institutions participating in our Allpoint network are also increasing, enabling us to increase transaction counts and profitability on our existing machines.
- Work with Non-Traditional Financial Institutions and Card Issuers to Further Leverage our Extensive ATM and Financial Services Kiosk Network. We believe that there are opportunities to develop or expand relationships with non-traditional financial institutions and card issuers, such as reloadable prepaid card issuers and alternative payment networks, which are seeking an extensive and convenient ATM network to complement their new card offerings. Additionally, we believe that many of the prepaid debit card issuers that exist today in the U.S. can benefit by providing their cardholders with access to our ATM network on a discounted or fee-free basis. For example, through our Allpoint network, we have sold access to our ATM network to issuers of stored value prepaid debit cards to provide the customers of these issuers with convenient and surcharge-free access to cash.

- Increase Transaction Levels at our Existing Locations. We believe that there are opportunities to increase the number of transactions that are occurring today at our existing ATM locations. On average, only a small fraction of the customers that enter our retail customers' locations utilize our ATMs and financial services kiosks. In addition to our existing initiatives that tend to drive additional transaction volumes to our ATMs, such as bank branding and network branding, we are working on developing new initiatives to potentially drive incremental transactions over our existing ATM locations. Examples of this effort are our 2011 acquisition of LocatorSearch, which helps consumers find our ATMs, and the launch of FeeAlert in the third quarter of 2012, which enables financial institutions to help their customers save money by steering them toward nearby in-network ATMs and away from ATM fees. Additionally, we have existing programs and are working to develop additional and broader programs to steer the cardholders of our existing financial institution partners and members of our Allpoint network to visit our ATMs in convenient retail locations. These programs may include incentives to cardholders such as coupons, rewards, and other offers that tend to provide motivation for customers to visit our ATMs within our existing retail footprint. While we are in the early stages of fully developing and implementing many of these programs, we believe that these programs, when properly structured, can serve to benefit each party (i.e. the retailer, the financial institution, and the cardholder.) As a result, we expect to gain additional transaction volumes through these efforts.
- Develop and Provide Additional Services at our Existing ATMs. Service offerings by ATMs continue to evolve over time. Certain ATM models are capable of providing numerous automated consumer financial services, including bill payments, check cashing, remote deposit capture, money transfer, bill payment services, and stored-value card reload services. Certain of our devices are capable of, and currently provide, these types of services. We believe these non-traditional consumer financial services offered by our devices, and other machines that we or others may develop, could provide a compelling and

cost-effective solution for financial institutions and stored-value prepaid debit card issuers looking to provide the convenience of branch banking in an off-premise retail setting. We also allow advertisers to place their messages on our ATMs equipped with advertising software in both the U.S. and the U.K. Offering additional services at our devices, such as advertising, allows us to create new revenue streams from assets that have already been deployed, in addition to providing value to our customers through beneficial offers and convenient services. We plan to develop additional products and services that can be delivered through our existing ATM network.

- Pursue Additional Managed Services Opportunities. Over the last several years, we significantly expanded the number of ATMs that are operated under our managed services arrangement type. Under this arrangement, retailers and financial institutions generally pay us a fixed management fee per cardholder or a set fee per transaction in exchange for handling some or all of the operational aspects associated with operating and maintaining their ATM fleets. Surcharge and interchange fees are earned by the retailer or the financial institution. As a result, in this arrangement type, our revenues are partly protected from fluctuations in transaction levels of these machines and changes in network interchange rates. Additionally, in the U.K. where we own our own engineering, cash-in-transit, and installation organizations, we believe that opportunities exist to offer some (or all) of these services on a managed services basis to both retailers and financial institutions. We plan to pursue additional managed services opportunities with leading merchants and financial institutions in the United States, as well as international opportunities as they arise, working with our customers to provide them with a customized solution that fits their needs.
- Pursue International Growth Opportunities. We have invested significant amounts of capital in the infrastructure of our United Kingdom, Canada, and Mexico operations, and we plan to continue selectively increasing the number of our ATMs in these markets applying many of the aforementioned strategies. In 2011, we entered into the Canadian market with our acquisition of Mr. Cash, subsequently renamed Cardtronics Canada. We plan to expand our operations in Canada, primarily by expanding our ATM footprint in that market and establishing relationships with leading financial institutions. Additionally, we may expand our operations into selected other international markets where we believe we can leverage our operational expertise, EFT transaction processing platform, and scale advantages. Our future international expansion, if any, will depend on a number of factors, including the estimated economic opportunity to us, the business and regulatory environment in the international market, our ability to identify suitable business partners in the market, and other risks associated with international expansion.

Longer term, we believe there are opportunities to not only expand our ATM and financial services kiosk network, but to also expand the types of services that we offer through that network. We believe that recent industry regulatory changes coupled with the proliferation of stored-value prepaid debit cards provide us with a unique opportunity to leverage our extensive retail ATM and financial services kiosk network to provide a broader array of automated financial services to financial institutions and card issuers. For example, with recently enacted and pending regulatory changes with respect to credit cards, debit cards, and traditional demand deposit accounts, there is a considerable amount of uncertainty surrounding many of the revenue streams traditionally earned by financial institutions. As a result, we believe that our network of ATMs located in prime retail locations represents an attractive and affordable option for financial institutions looking to continue to expand their ATM network in a cost-effective manner. Additionally, we believe that the deployment of devices that perform other financial services, including check cashing, remote deposit capture, money transfer, bill payment services, and stored-value card reload services, could provide a compelling and cost-effective solution for financial institutions and stored-value prepaid debit card issuers looking to provide the convenience of branch banking in an off-premise retail setting.

Withdrawal Transaction and Revenue Trends – United States. For the three and six months ended June 30, 2013, total same-store cash withdrawal transactions conducted on our domestic ATMs increased by 2.7% and 0.8%, respectively, over the comparable periods in the prior year. We define same-store ATMs as all ATMs that were continuously transacting for both the current period and the comparable period in the prior year to ensure the exclusion of any new growth or mid-month installations. We believe that the second quarter increase in transactions was attributable to several factors, including: (1) a continued shift in the mix of withdrawal transactions being conducted on our domestic network of ATMs (i.e., more surcharge-free and less surcharge-based withdrawal transactions) resulting from the continued evolution and growth of our surcharge-free product offerings; and (2) the proliferation in the use of network-branded stored-value cards by employers and governmental agencies for payroll and benefit-related payments. These increases were partially offset in the six months period ended June 30, 2013 due to the negative effects in the first quarter of 2013 from the extra day in 2012 due to leap year, decreased consumer spending, surcharge rate increases, and unfavorable weather in the first quarter of 2013. We expect that our domestic same-store transaction growth rate to remain relatively consistent with our second quarter rate throughout the remainder of 2013.

Over the last several years, some of the large U.S. banks serving the market for consumer banking services have begun to aggressively compete for market share, and part of their competitive strategy is to increase their number of customer touch points, including the establishment of an ATM network to provide convenient, surcharge-free access to cash for their customers. As a result, in certain situations, we have faced direct competition from large U.S. banks for large ATM placement opportunities. While a large owned-ATM network would be a key strategic asset for a bank, we believe it would be uneconomical for all but the largest banks to build and operate an extensive ATM network. Bank branding of ATMs and participation in surcharge-free networks allow financial

institutions to rapidly increase surcharge-free ATM access for their customers at substantially lower cost than building their own ATM networks. We also believe there is an opportunity for a large non-bank ATM and financial services kiosk operator such as ourselves, with lower costs and an established operating history, to contract with financial institutions and retailers to manage their ATM networks. Such an outsourcing arrangement could reduce a financial institution's operational costs while extending its customer service. Furthermore, we believe there are opportunities to provide selected services on an outsourced basis, such as transaction processing services, to other independent owners and operators of ATMs and financial services kiosks. These factors have led to an increase in bank branding, participation in surcharge-free networks, and managed services arrangements, and we believe that there will be continued growth in such arrangements.

Financial Regulatory Reform in the United States. The Dodd-Frank Act, which contains broad measures aimed at overhauling financial regulations within the U.S., was signed into law on July 21, 2010. Among many other things, the Dodd-Frank Act includes provisions that (1) have resulted in the creation of a new Bureau of Consumer Financial Protection, (2) limit the activities that banking entities may engage in, and (3) give the Federal Reserve the authority to regulate interchange transaction fees charged by EFT networks for electronic point-of-sale ("POS") debit transactions. ATM debit transactions were determined not to be subject to regulation under the Dodd-Frank Act. As a result of the Dodd-Frank Act, we have seen networks and banks take different actions to attempt to mitigate reductions to fees that they previously earned on certain transaction types, such as POS debit interchange. As potentially an indirect consequence, certain networks over which our ATM transactions are routed have reduced the net interchange paid to us. Other possible impacts of this broad legislation are unknown to us at this time, but we have seen certain actions taken by banks that indicate debit cards are no longer an attractive form of payment as they previously had been. Decreased profitability on POS debit transactions could cause banks to provide incentives to their customers to use other payment types, such as credit cards. We also believe that merchant retailers may continue to have a preference to receive cash as a form of payment. In addition, there are other components to the Dodd-Frank Act that may ultimately impact us, but at this time, we are uncertain as to what impact the existing and future laws, and the resulting behavior by consumers and financial institutions, will ultimately have on our business.

Europay, MasterCard, Visa ("EMV"). The EMV standard provides for the security and processing of information contained on microchips embedded in certain debit and credit cards, known as "smart cards." In the last year, MasterCard announced plans for a liability shift from the issuers of these cards to the party that has not made the investment in EMV equipment (either cards or ATMs) for fraudulent cross-border transactions. MasterCard's liability shift on International Maestro (MasterCard) transactions occurred in April 2013, and while the majority of our U.S. ATMs are not currently EMV-compliant, we do not expect this liability shift will have a significant impact on our business or results as International Maestro transactions currently comprise less than 0.5% of our U.S. transaction volume. In February 2013, Visa announced plans for a liability shift to occur in October 2017 for all transactions types on domestic or international EMV-issued cards. MasterCard has also announced that liability shift for its domestic ATM transactions on EMV-issued cards will occur in October 2016. At this time, neither MasterCard nor Visa are requiring mandatory upgrades to ATM equipment; however, increased fraudulent activity on ATMs in the future or the shifting of liability for fraudulent activity on all ATM transactions without EMV readers, or other business or regulatory factors could require us to upgrade or replace a significant portion of our existing U.S. ATM fleet. We are closely monitoring the migration toward the EMV standard, and all of our recent ATM deployments have been with ATMs that are EMV-ready. At this time, through a combination of ordinary replacement of equipment, routine scheduled maintenance visits to our ATMs, and evolving technology to meet compliance, we do not expect the EMV migration to have a significant impact on our future capital investments and results from operations. However, we currently estimate that the total potential cost to make our entire current Company-owned U.S. ATM fleet fully compliant with the EMV standard is approximately \$30 million to \$35 million, a portion of which was planned for within our budget for 2013. With the increased capital investments required as a direct result of

EMV, our depreciation expense may increase in the future. There is also a possibility that we could incur asset write-offs or accelerated depreciation expense on certain ATM units. Additionally, we could experience a higher rate of unit count attrition for our merchant-owned ATMs in the future as a result of this standard.

Withdrawal Transaction and Revenue Trends – United Kingdom. In recent periods, we have installed more free-to-use ATMs as opposed to surcharging pay-to-use ATMs in the U.K., and as a result of this mix shift, our overall withdrawal transactions in the U.K. increased by 15% and 19% for the three and six months ended June 30, 2013, respectively, over the same periods in the prior year. Although we earn less revenue per cash withdrawal transaction on a free-to-use machine, the increase in the number of transactions conducted on free-to-use machines has generally translated into higher overall revenues.

Financial Regulatory Reform in the United Kingdom. In March 2013, the U.K. Treasury department (the “Treasury”) issued a formal recommendation to further regulate the U.K. payments industry, including LINK, the nation’s formal ATM scheme. While the ultimate impact of the Treasury proposal will not be known for some time, management believes that the recommendations, as currently outlined in the draft proposal, could help stabilize LINK ATM interchange rates, which are a significant source of our revenues in that market. Public comments on the proposal were recently provided to the Treasury by all interested parties. The Treasury is expected to issue its final proposal later in the year, once it has had an opportunity to review all submitted comments.

Expansion in Canada. We entered the Canadian market in October 2011 through our acquisition of Mr. Cash. Part of our initial strategy to grow in that market was to leverage existing relationships with merchant retailers with whom we have significant existing relationships in the U.S. During 2012, we executed a multi-year agreement with 7-Eleven, our largest merchant retail partner in the U.S., to be the exclusive ATM service provider for all of their stores in Canada. We also executed a contract with Scotiabank to place its bank brand on all of the 7-Eleven ATMs in Canada and included all of the 7-Eleven ATMs in Canada in our Allpoint network.

Finally, in December 2012, we further expanded in Canada through our acquisition of Can-Do-Cash. We are actively seeking other similar expansion opportunities with existing and new merchant partners in this market.

## Results of Operations

The following table sets forth line items from our Consolidated Statements of Operations as a percentage of total revenues for the periods indicated. Percentages may not add due to rounding.

	Three Months		Six Months Ended	
	Ended June 30,		June 30,	
	2013	2012	2013	2012
Revenues:				
ATM operating revenues	97.9 %	94.6 %	97.8 %	93.8 %
ATM product sales and other revenues	2.1	5.4	2.2	6.2
Total revenues	100.0	100.0	100.0	100.0
Cost of revenues:				
Cost of ATM operating revenues (excludes depreciation, accretion, and amortization shown separately below) <sup>(1)</sup>	64.2	64.4	64.8	63.8
Cost of ATM product sales and other revenues	2.0	4.9	2.1	5.6
Total cost of revenues	66.2	69.3	66.9	69.3
Gross profit	33.8	30.7	33.1	30.7
Operating expenses:				
Selling, general, and administrative expenses	9.1	8.6	9.3	8.5
Acquisition-related expenses	0.6	0.2	1.0	0.4
Depreciation and accretion expense	7.6	7.7	7.9	7.4
Amortization expense	2.9	2.8	2.9	2.8
Loss on disposal of assets	0.1	0.1	0.1	0.2
Total operating expenses	20.3	19.5	21.3	19.4
Income from operations	13.5	11.2	11.8	11.3
Other expense (income):				
Interest expense, net	2.4	2.8	2.5	2.8
Amortization of deferred financing costs	0.1	0.1	0.1	0.1
Other income	(1.0)	—	(0.6)	—
Total other expense	1.6	2.9	2.0	2.9
Income before income taxes	11.9	8.3	9.8	8.4
Income tax expense	4.8	3.3	3.9	3.3
Net income	7.1	5.0	5.9	5.1
Net loss attributable to noncontrolling interests	(0.3)	—	(0.2)	—
Net income attributable to controlling interests and available to common stockholders	7.4 %	5.0 %	6.1 %	5.1 %

(1) Excludes effects of depreciation, accretion, and amortization expense of \$19.9 million and \$18.7 million for the three months ended June 30, 2013 and 2012, respectively, and \$40.0 million and \$36.5 million for the six months ended June 30, 2013 and 2012, respectively. The inclusion of this depreciation, accretion, and amortization expense in Cost of ATM operating revenues would have increased our Cost of ATM operating revenues as a percentage of total revenues by 9.6% and 9.7% for the three months ended June 30, 2013 and 2012, respectively, and by 9.9% and 9.5% for the six months ended June 30, 2013 and 2012, respectively.

## Key Operating Metrics

We rely on certain key measures to gauge our operating performance, including total transactions, total cash withdrawal transactions, ATM operating revenues per ATM per month, and ATM operating gross profit margin. The following table sets forth information regarding certain of these key measures for the periods indicated, excluding the effect of the acquisitions during the periods presented for comparative purposes.

EXCLUDING ACQUISITIONS:	Three Months Ended June		Six Months Ended June	
	30, 2013	2012	30, 2013	2012
Average number of transacting ATMs:				
United States: Company-owned	27,709	25,671	27,631	25,283
United Kingdom	4,311	3,927	4,314	3,780
Mexico	2,694	2,834	2,701	2,836
Canada	1,095	631	1,069	580
Subtotal	35,809	33,063	35,715	32,479
United States: Merchant-owned	13,642	15,325	13,814	15,544
Average number of transacting ATMs – ATM operations	49,451	48,388	49,529	48,023
United States: Managed services <sup>(1)</sup>	6,874	5,959	6,542	5,869
United Kingdom: Managed services	21	21	21	21
Canada: Managed services	—	—	—	—
Average number of transacting ATMs – Managed services	6,895	5,980	6,563	5,890
Total average number of transacting ATMs	56,346	54,368	56,092	53,913
Total transactions (in thousands):				
ATM operations	196,187	170,706	382,735	329,591
Managed services	11,424	10,118	21,419	19,568
Total transactions	207,611	180,824	404,154	349,159
Total cash withdrawal transactions (in thousands):				
ATM operations	120,762	108,388	235,064	209,273
Managed services	7,347	6,263	13,689	12,345
Total cash withdrawal transactions	128,109	114,651	248,753	221,618
Per ATM per month amounts (excludes managed services):				
Cash withdrawal transactions	814	747	791	726
ATM operating revenues	\$ 1,307	\$ 1,223	\$ 1,279	\$ 1,220

Edgar Filing: CARDTRONICS INC - Form 10-Q

Cost of ATM operating revenues <sup>(2)</sup>	858		829		850		825	
ATM operating gross profit <sup>(2)(3)</sup>	\$ 449		\$ 394		\$ 429		\$ 395	
ATM operating gross profit margin <sup>(2)(3)</sup>	34.4	%	32.2	%	33.5	%	32.4	%

<sup>(1)</sup> Includes 4,415 and 3,431 ATMs for the three months ended June 30, 2013 and 2012, respectively, and 4,074 and 3,423 ATMs for the six months ended June 30, 2013 and 2012, respectively, for which the primary service provided by us was EFT transaction processing services.

<sup>(2)</sup> Amounts presented exclude the effect of depreciation, accretion, and amortization expense, which is presented separately in our consolidated statements of operations.

<sup>(3)</sup> ATM operating gross profit and ATM operating gross profit margin are measures of profitability that are calculated based on only the revenues and expenses that relate to operating ATMs in our portfolio. Revenues and expenses relating to managed services and ATM equipment sales and other ATM-related services are not included.

ATM product sales and other revenues	4,385	10,453	(58.1)%	8,763	23,680	(63.0)%
Total revenues	\$ 207,984	\$ 192,020	8.3 %	\$ 405,722	\$ 383,060	5.9 %

## Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2012

ATM operating revenues. ATM operating revenues generated during the three months ended June 30, 2013 increased \$22.0 million from the three months ended June 30, 2012. Below is the detail, by segment, of the changes in the various components of ATM operating revenues:

	Variance: Three Months Ended June 30, 2012 to Three Months Ended June 30, 2013				
	U.S.	U.K.	Other International	Eliminations	Total
	Increase (decrease)				
	(In thousands)				
Surcharge revenue	\$ 3,900	\$ 38	\$ 1,261	\$ —	\$ 5,199
Interchange revenue	3,174	3,042	1,182	—	7,398
Bank branding and surcharge-free network revenues	6,069	—	1,054	(15)	7,108
Managed services revenues	837	(2)	—	—	835
Other revenues	2,099	1,138	(33)	(1,712)	1,492
Total increase in ATM operating revenues	\$ 16,079	\$ 4,216	\$ 3,464	\$ (1,727)	\$ 22,032

United States. During the three months ended June 30, 2013, our U.S. operations experienced a \$16.1 million increase in ATM operating revenues when compared to the same period in 2012. Of this increase, \$3.3 million was attributable to the contribution of the ATM Network, Aptus, and Merrimak acquisitions completed in the last year. The results of these acquired businesses were included in the consolidated financial results for the three months ended June 30, 2013 but not in the comparable period in 2012. The remaining \$12.8 million increase was due to growth achieved from a combination of revenue sources, including: (1) increased surcharge and interchange revenues primarily as a result of a higher machine count; (2) an increase in bank branding and surcharge-free network revenues that resulted from the continued growth of participating banks and other financial institutions in our bank branding program and our Allpoint network; and to a lesser degree, (3) an increase in managed services revenue as a result of the expansion of these services in the past year. The increase in other revenues in the U.S. is primarily from intercompany transaction processing, which is eliminated in consolidation.

For additional information on recent trends that have impacted, and may continue to impact, the revenues generated by our U.S. operations, see Recent Events and Trends - Withdrawal Transaction and Revenue Trends – United States above.

United Kingdom. Our U.K. operations experienced a \$4.2 million, or 16%, increase in ATM operating revenues during the three months ended June 30, 2013 when compared to the same period in 2012. This increase was primarily driven by higher interchange revenues as a result of a 10% increase in the number of transacting ATMs and an increase in the number of balance inquiry transactions conducted on our ATMs in that market, which was partially offset by slightly lower interchange rates. Foreign currency exchange rate movements did not have a material effect on the results.

For additional information on recent trends that have impacted, and may continue to impact, the revenues generated by our U.K. operations, see Recent Events and Trends - Withdrawal Transaction and Revenue Trends – United Kingdom above.

Other International. Revenues in this segment, which include the results of our Mexico operation and our Canadian subsidiary, contributed an additional \$3.5 million in revenue growth to the quarter ended June 30, 2013. This increase was attributable to our Canadian operations, primarily related to the addition of a significant new merchant contract in early 2012 and the acquisition of Can-Do-Cash, which was completed in December of 2012. Lower ATM operating revenues from our Mexico operations partially offset the increases from our Canadian operations.

ATM product sales and other revenues. ATM product sales and other revenues for the three months ended June 30, 2013 totaled \$4.4 million and were \$6.1 million lower than the same period in 2012. During the second quarter of 2012, we experienced increased ATM product sales fueled by the replacement of certain ATMs that were not compliant with the new regulations under the Americans

with Disabilities Act (“ADA”) that became effective in early 2012. We expect that our ATM product sales throughout the remainder of 2013 will be fairly consistent with the results of the first two quarters of 2013.

Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012

ATM operating revenues. ATM operating revenues generated during the six months ended June 30, 2013 increased \$37.6 million from the six months ended June 30, 2012. Below is the detail, by segment, of changes in the various components of ATM operating revenues:

	Variance: Six Months Ended June 30, 2012 to Six Months Ended June 30, 2013				Total
	U.S.	U.K.	Other International	Eliminations	
	Increase (decrease)				
	(In thousands)				
Surcharge revenue	\$ 7,901	\$ (178)	\$ 2,319	\$ —	\$ 10,042
Interchange revenue	1,291	7,541	2,509	—	11,341
Bank branding and surcharge-free network revenues	11,217	—	1,773	(32)	12,958
Managed services revenues	1,487	(3)	—	—	1,484
Other revenues	3,698	1,444	(59)	(3,329)	1,754
Total increase in ATM operating revenues	\$ 25,594	\$ 8,804	\$ 6,542	\$ (3,361)	\$ 37,579

United States. During the six months ended June 30, 2013, our U. S. operations experienced a \$25.6 million, or 9%, increase in ATM operating revenues compared to the same period in 2012. The acquisitions made in the last year contributed \$5.0 million to this increase. The remaining \$20.6 million increase was primarily due to the same reasons mentioned above in the quarterly results, including: (1) increased surcharge and interchange revenues primarily as a result of a higher machine count; (2) an increase in bank branding and surcharge-free network revenues that resulted from the continued growth of participating banks and other financial institutions in our bank branding program and our Allpoint network; and (3) an increase in managed services revenue as a result of an increase in new contracts entered into under this arrangement type. These increases were partially offset by a decline in interchange rates, including a reduction by a major network, that became effective during the second quarter of 2012 and a shift of volume to lower interchange rate networks.

United Kingdom. Our U.K. operations also contributed to the higher ATM operating revenues for the six months ended June 30, 2013, which increased by \$8.8 million, or 17%, from the first six months of 2012. As was the case with the three month period, this increase was primarily driven by higher interchange revenues as a result of a 14% increase in the number of total ATMs (20% increase in free-to-use machines) and an increase in balance inquiry transactions in that market, which was partially offset by slightly lower interchange rates. Excluding the unfavorable

impact of foreign currency exchange rate movements between the two periods, the total increase in ATM operating revenues for the period would have been \$10.3 million, or 20%, when compared to the same period in 2012.

Other International. Our Other International operations experienced a \$6.5 million, or 43%, increase in revenues during the six months ended June 30, 2013 over the same period in 2012. As was the case with the three month period, Canadian operations contributed to this increase due to the addition of a significant new merchant contract in early 2012 and the acquisition of Can-Do-Cash. Lower ATM operating revenues from our Mexico operations partially offset this increase. Foreign currency exchange rate movements did not have a material effect on the reported ATM operating revenues in Canada, but a constant U.S. dollar to Mexican peso would have been \$0.6 million lower than the reported ATM operating revenues in Mexico.

ATM product sales and other revenues. ATM product sales and other revenues for the six months ended June 30, 2013 was \$14.9 million lower than those generated during the same period in 2012 and was primarily due to the same reasons mentioned above in the quarterly results, including decreased equipment and value-added reseller (“VAR”) program sales during the period.

## Cost of Revenues

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013 (In thousands)	2012	% Change	2013 (In thousands)	2012	% Change
Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization)	\$ 133,482	\$ 123,621	8.0 %	\$ 263,042	\$ 244,248	7.7 %
Cost of ATM product sales and other revenues	4,228	9,479	(55.4)%	8,357	21,260	(60.7)%
Total cost of revenues (exclusive of depreciation, accretion, and amortization)	\$ 137,710	\$ 133,100	3.5 %	\$ 271,399	\$ 265,508	2.2 %

## Three Months Ended June 30, 2013 Compared to Three Months Ended June 30, 2013

Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization). The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) for the three months ended June 30, 2013 increased \$9.9 million when compared to the same period in 2012. Below is a detail, by segment, of changes in the various components of the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization):

	Variance: Three Months Ended June 30, 2012 to Three Months Ended June 30, 2013				
	U.S.	U.K.	Other International	Eliminations	Total
	Increase (decrease)				
	(In thousands)				
Merchant commissions	\$ 2,919	\$ 740	\$ 1,622	\$ —	\$ 5,281
Vault cash rental expense	(273)	(317)	273	—	(317)
Other costs of cash	1,407	158	714	—	2,279
Repairs and maintenance	92	(46)	269	—	315
Communications	(510)	92	157	(60)	(321)
Transaction processing	1,304	430	247	(1,652)	329
Stock-based compensation	(115)	—	—	—	(115)
Other expenses	1,236	1,145	214	(185)	2,410
Total increase in cost of ATM operating revenues	\$ 6,060	\$ 2,202	\$ 3,496	\$ (1,897)	\$ 9,861

United States. During the six months ended June 30, 2013, our U.S. operations experienced a \$6.1 million increase in cost of ATM operating revenues when compared to the same period in 2012. The acquisitions completed since June 2012 added \$1.1 million to the increase, and the remaining increase primarily resulted from higher transaction volumes and ATM unit growth driven by organic revenue growth, and other expenses from higher employee costs. Vault cash rental expense decreased during the three months ended June 30, 2013 compared to the same period in 2012 due to more efficient cash forecasting, which translated to generally lower daily vault cash balances outstanding. Communications expense decreased as a result of more favorable pricing compared to the prior year.

United Kingdom. In the quarter ended June 30, 2013, our U.K. operations experienced a \$2.2 million, or 10%, increase in the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) when compared to the same period in 2012. This overall increase was due primarily to a 14% year-over-year increase in the number of average transacting ATMs in that market. The other expenses category shown above was higher primarily due to higher business rates (similar to property taxes) assessed on certain ATMs in the U.K. Management currently expects that this trend of higher business rates will continue in the foreseeable future as local authorities look for additional sources of tax revenue within their jurisdictions. Excluding the impact of foreign currency exchange rate movements between the two periods, the total increase in the cost of ATM operating revenues for the period would have been \$3.0 million, or 13%, when compared to the same period in 2012.

Other International. The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) from our Other International operations increased by \$3.5 million during the six months ended June 30, 2013 when compared to the same period in 2012 primarily due to the growth of our Canadian operations, as described above.

Edgar Filing: CARDTRONICS INC - Form 10-Q

Cost of ATM product sales and other revenues. The \$5.3 million decrease in the cost of ATM product sales and other revenues during the three months ended June 30, 2013 when compared to the same period in 2012. This 55% decrease is consistent with the 58% decrease in related revenues, as discussed above.

Six Months Ended June 30, 2013 Compared to Six Months Ended June 30, 2012

Cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization). The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) for the six months ended June 30, 2013 increased \$18.8 million when compared to the same period in 2012. Below is a detail, by segment, of changes in the various components of the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization):

	Variance: Six Months Ended June 30, 2012 to Six Months Ended June 30, 2013				
	U.S.	U.K.	Other International	Eliminations	Total
	Increase (decrease)				
	(In thousands)				
Merchant commissions	\$ 5,411	\$ 1,835	\$ 3,076	\$ —	\$ 10,322
Vault cash rental expense	(774)	(620)	590	—	(804)
Other costs of cash	2,883	752	1,146	—	4,781
Repairs and maintenance	(1,690)	106	490	—	(1,094)
Communications	(354)	492	346	(128)	356
Transaction processing	2,203	1,278	283	(3,200)	564
Stock-based compensation	(111)	—	—	—	(111)
Other expenses	2,472	1,798	711	(201)	4,780
Total increase in cost of ATM operating revenues	\$ 10,040	\$ 5,641	\$ 6,642	\$ (3,529)	\$ 18,794

United States. During the six months ended June 30, 2013, the cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) incurred by our U.S. operations increased \$10.0 million, or 5%, when compared to the cost incurred during the same period in 2012. The acquisitions made in the last year contributed \$1.2 million to this increase with the remainder of the increase resulting from higher transaction volumes and ATM unit growth driven by organic revenue growth, and other expenses from higher employee costs. Partially offsetting these increases was a decrease of \$1.7 million in repairs and maintenance, as expenses during the six months ended June 30, 2012 were higher in this period as a result of compliance activities. Also partially offsetting the cost increases was a decrease in vault cash rental expense, which was due to lower daily vault cash balances outstanding, as explained above in the quarterly analysis.

United Kingdom. The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) of our U.K. operations increased during the six months ended June 30, 2013 by \$5.6 million when compared to the same period in 2012. This overall increase was primarily due to the increased number of transacting ATMs, the increase in

total number of transactions conducted on our machines, an increase in employee-related costs, and higher business rates discussed above. Excluding the impact of foreign currency exchange rate movements between the two periods, the total increase in the cost of ATM operating revenues for the period would have been \$6.7 million, or 16%, when compared to the same period in 2012.

Other International. The cost of ATM operating revenues (exclusive of depreciation, accretion, and amortization) from our Other International operations increased by \$6.6 million during the six months ended June 30, 2013 when compared to the same period in 2012 primarily due to the growth of our Canadian operations, as described above.

Cost of ATM product sales and other revenues. The \$12.9 million decrease in the cost of ATM product sales and other revenues during the six months ended June 30, 2013 when compared to the same period in 2012. This 61% decrease is consistent with the 63% decrease in related revenues, as discussed above.

## Gross Profit Margin

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2013	2012	2013	2012
ATM operating gross profit margin:				
Exclusive of depreciation, accretion, and amortization	34.4 %	31.9 %	33.7 %	32.0 %
Inclusive of depreciation, accretion, and amortization	24.6 %	21.6 %	23.7 %	21.9 %
ATM product sales and other revenues gross profit margin	3.6 %	9.3 %	4.6 %	10.2 %
Total gross profit margin:				
Exclusive of depreciation, accretion, and amortization	33.8 %	30.7 %	33.1 %	30.7 %
Inclusive of depreciation, accretion, and amortization	24.2 %	21.0 %	23.3 %	21.2 %

ATM operating gross profit margin. For the three and six months ended June 30, 2013, our ATM operating gross profit margin exclusive of depreciation, accretion, and amortization increased by 2.5 and 1.7 percentage points, respectively, when compared to the same periods in 2012. Additionally, our ATM operating gross profit margin inclusive of depreciation, accretion, and amortization increased by 3.0 and 1.8 percentage points, respectively during the three and six months ended June 30, 2013 when compared to the same periods in 2012. These increases are attributable to our revenue growth, a reduction in our operating costs on a per transaction basis, and improved margins on the businesses acquired during the past two years.

We expect that our gross profit margin in the remainder of 2013 will be relatively consistent with that of the most recent quarter.

ATM product sales and other revenues gross profit margin. For the three and six months ended June 30, 2013, our gross profit margin on ATM product sales and other revenues declined by 5.7 and 5.6 percentage points, respectively, primarily as a result of a decline in VAR equipment sales compared to the comparable periods in 2012, which are slightly higher margin than our other ATM product sales.

## Selling, General, and Administrative Expenses

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013	2012	% Change	2013	2012	% Change
	(In thousands)			(In thousands)		
Selling, general, and administrative expenses	\$ 16,560	\$ 13,461	23.0 %	\$ 32,589	\$ 27,179	19.9 %

Edgar Filing: CARDTRONICS INC - Form 10-Q

Stock-based compensation	2,372	3,128	(24.2) %	5,332	5,485	(2.8) %
Acquisition-related expenses	1,184	390	203.6 %	4,006	1,477	171.2 %
Total selling, general, and administrative expenses	\$ 20,116	\$ 16,979	18.5 %	\$ 41,927	\$ 34,141	22.8 %

Percentage of total revenues:

Selling, general, and administrative expenses	8.0 %	7.0 %	8.0 %	7.1 %
Stock-based compensation	1.1 %	1.6 %	1.3 %	1.4 %
Acquisition-related expenses	0.6 %	0.2 %	1.0 %	0.4 %
Total selling, general, and administrative expenses	9.7 %	8.8 %	10.3 %	8.9 %

Selling, general, and administrative expenses (“SG&A expenses”), excluding stock-based compensation. SG&A expenses, excluding stock-based compensation and acquisition-related expenses, increased \$3.1 million and \$5.4 million for the three and six months ended June 30, 2013, respectively, when compared to the same periods in 2012. These increases were due to: (1) higher payroll-related costs compared to the same period in 2012 due to increased headcount, including employees added from the acquisitions completed during 2012 and the first half of 2013; (2) increased incentive-based compensation; (3) severance costs associated with our U.K. operations; and (4) higher marketing and professional expenses.

Stock-based compensation. The \$0.8 million and \$0.2 million decrease in stock-based compensation during the three and six months ended June 30, 2013, respectively, was due to the full vesting of certain restricted stock awards (“RSAs”) during 2012, as well as a reversal of expenses that were previously taken related to certain performance-based awards that became no longer probable of vesting. These expense reductions were partially offset by additional expense recognition associated with grants of certain awards to employees who have met the qualified retirement provisions as defined in our Long Term Incentive Plan (“LTIP”) at some point prior to the awards’ final vesting dates. This qualified retirement feature in our LTIP resulted in the acceleration of expense recognition for

certain awards. For additional details on equity awards, see Item 1. Financial Information, Note 3, Stock-Based Compensation.

#### Depreciation and Accretion Expense

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013	2012	% Change	2013	2012	% Change
	(In thousands)			(In thousands)		
Depreciation expense	\$ 15,271	\$ 14,100	8.3 %	\$ 30,896	\$ 27,235	13.4 %
Accretion expense	610	635	(3.9) %	1,270	1,250	1.6 %
Depreciation and accretion expense	\$ 15,881	\$ 14,735	7.8 %	\$ 32,166	\$ 28,485	12.9 %

#### Percentage of total revenues:

Depreciation expense	7.3	%	7.3	%	7.6	%	7.1	%
Accretion expense	0.3	%	0.3	%	0.3	%	0.3	%
Depreciation and accretion expense	7.6	%	7.7	%	7.9	%	7.4	%

For the three and six months ended June 30, 2013, depreciation expense increased when compared to the same periods in 2012 primarily as a result of the deployment of additional Company-owned ATMs over the past year as a result of our organic ATM unit growth and as a result of new ATMs purchased to replace older non-ADA-compliant ATMs. For the three months ended June 30, 2013, accretion expense decreased slightly reflecting the impact of the reduction of our asset retirement obligations in our U.K. segment taken in the first quarter of 2013. For the six months ended June 30, 2013, accretion expense slightly increased as additional asset retirement obligations were established in connection with newly deployed ATMs, offset partially by the impact of the reduced asset retirement obligation in the U.K. When we install our ATMs, we estimate the fair value of future retirement obligations associated with those ATMs, including the anticipated costs to deinstall, and in some cases refurbish, the ATMs at certain merchant locations. Accretion expense represents the increase of this liability from the original discounted net present value to the amount we ultimately expect to incur.

#### Amortization Expense

	Three Months Ended June 30,			Six Months Ended June 30,				
	2013	2012	% Change	2013	2012	% Change		
	(In thousands)			(In thousands)				
Amortization expense	\$ 6,081	\$ 5,412	12.4 %	\$ 11,829	\$ 10,887	8.7 %		
Percentage of total revenues	2.9	%	2.8	%	2.9	%	2.8	%

Amortization expense is primarily comprised of the amortization of intangible assets related to merchant contracts and relationships associated with our acquisitions. The increase in amortization during the three and six months ended June 30, 2013 when compared to the same periods in 2012 was primarily due to the addition of intangible assets from the acquisitions completed during the last twelve months.

Loss on Disposal of Assets

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013 (In thousands)	2012 (In thousands)	% Change	2013 (In thousands)	2012 (In thousands)	% Change
Loss on disposal of assets	\$ 157	\$ 264	(40.5)%	\$ 360	\$ 812	(55.7)%
Percentage of total revenues	0.1 %	0.1 %		0.1 %	0.2 %	

We recognized lower losses on disposal of assets during the three and six months ended June 30, 2013 compared to the same periods in 2012, primarily as a result of a decrease in the number of assets that we removed during the first half of 2013 when compared to the same period in 2012 when there were a higher number of assets that were removed due to obsolescence, including replacing non-ADA-compliant ATMs in the U.S.

## Interest Expense, Net

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013	2012	% Change	2013	2012	% Change
	(In thousands)			(In thousands)		
Interest expense, net	\$ 5,059	\$ 5,332	(5.1) %	\$ 10,125	\$ 10,697	(5.3) %
Amortization of deferred financing costs	231	224	3.1 %	460	444	3.6 %
Total interest expense, net	\$ 5,290	\$ 5,556	(4.8) %	\$ 10,585	\$ 11,141	(5.0) %
Percentage of total revenues	2.5 %	2.9 %		2.6 %	2.9 %	

Interest expense, net. Interest expense, net, decreased during the three and six months ended June 30, 2013 when compared to the same periods in 2012 due to lower debt outstanding. For additional details, see Item 1. Financial Information, Note 9, Long-Term Debt.

Amortization of deferred financing costs. Amortization of deferred financing costs during the three and six months ended June 30, 2013 was comparable to the same periods in 2012, as no significant financing was obtained or modifications made over the past year.

## Income Tax Expense

	Three Months Ended June 30,			Six Months Ended June 30,		
	2013	2012	% Change	2013	2012	% Change
	(In thousands)			(In thousands)		
Income tax expense	\$ 10,034	\$ 6,369	57.5 %	\$ 16,014	\$ 12,515	28.0 %
Effective tax rate	40.5 %	39.9 %		40.1 %	38.9 %	

Our income tax expense during the three and six months ended June 30, 2013 increased over the same periods in 2012, primarily due to an increase in consolidated income before income taxes. The slight rate increase from the three and six months ended June 30, 2012 to the three and six months ended June 30, 2013 is primarily attributable to an increase in operating losses in foreign operations for which we do not record a tax benefit, as a result of carrying a valuation allowance on our deferred tax assets. We continue to maintain valuation allowances for our local net deferred tax asset positions in the U.K. and Mexico, as we currently believe that it is more likely than not that these benefits will not be realized.

## Non-GAAP Financial Measures

Included below are certain non-GAAP financial measures that we use to evaluate the performance of our business. We believe that the presentation of these measures and the identification of unusual or certain non-recurring adjustments and non-cash items enhance an investor's understanding of the underlying trends in our business and provide for better comparability between periods in different years. EBITDA, Adjusted EBITDA, Adjusted Net Income, and Free Cash Flow are non-GAAP financial measures provided as a complement to results prepared in accordance with U.S. GAAP and may not be comparable to similarly-titled measures reported by other companies.

Adjusted EBITDA excludes depreciation, accretion, and amortization expense as these amounts can vary substantially from company to company within our industry depending upon accounting methods and book values of assets, capital structures, and the method by which the assets were acquired. Adjusted EBITDA also excludes acquisition-related costs, certain other non-operating costs, loss on asset disposal, our obligations for the payment of income taxes, interest expense or other obligations such as capital expenditures, and an adjustment for noncontrolling interest. Adjusted Net Income represents net income computed in accordance with GAAP, before amortization expense, loss on disposal of assets, stock-based compensation expense and certain other expense (income) and acquisition-related costs, and using an assumed 35% tax rate, with certain adjustments for noncontrolling interests. Adjusted Net Income per diluted share is calculated by dividing Adjusted Net Income by average weighted diluted shares outstanding calculated in accordance with GAAP. Free Cash Flow is defined as cash provided by operating activities less payments for capital expenditures, including those financed through direct debt but excluding acquisitions. The measure of Free Cash Flow does not take into consideration certain other non-discretionary cash requirements such as, for example, mandatory principal payments on portions of our long-term debt. The non-GAAP financial measures presented herein should not be considered in isolation or as a substitute for operating income, net income, cash flows from operating, investing, or financing activities, or other income or cash flow statement data prepared in accordance with U.S. GAAP.

A reconciliation of EBITDA, Adjusted EBITDA and Adjusted Net Income to Net Income Attributable to Controlling Interests, their most comparable U.S. GAAP financial measure, and a reconciliation of Free Cash Flow to cash provided by operating activities, the most comparable U.S. GAAP financial measure, are presented as follows:

## Reconciliation of Net Income Attributable to Controlling Interests to EBITDA, Adjusted EBITDA and Adjusted Net Income

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
	(In thousands, except share and per share amounts)

	June 30,		June 30,	
	2013	2012	2013	2012
	(In thousands)			
Cash provided by operating activities	\$ 38,974	\$ 37,180	\$ 80,354	\$ 55,921
Payments for capital expenditures:				
Cash used in investing activities, excluding acquisitions	(13,918)	(33,530)	(29,855)	(55,216)
Free cash flow	\$ 25,056	\$ 3,650	\$ 50,499	\$ 705

## Liquidity and Capital Resources

## Overview

As of June 30, 2013, we had \$22.3 million in cash and cash equivalents on hand and \$335.6 million in outstanding long-term debt.

We have historically funded our operations primarily through cash flows from operations, borrowings under our revolving credit facilities, and the issuance of debt and equity securities. Furthermore, we have historically used cash to invest in additional ATMs, either through the acquisition of ATM networks or through organically-generated growth. We have also used cash to fund increases in working capital and to pay interest and principal amounts outstanding under our borrowings. Because we collect a sizable portion of our cash from sales on a daily basis but generally pay our vendors on 30-day terms and are not required to pay certain of our merchants until 20 days after the end of each calendar month, we are able to utilize the excess available cash flow to reduce borrowings made under our revolving credit facility and to fund our ongoing capital expenditure program. Accordingly, we typically reflect a working capital deficit position and carry a relatively small cash balance.

We believe that our cash on hand and our current bank credit facilities will be sufficient to meet our working capital requirements and contractual commitments for the next 12 months. We expect to fund our working capital needs from cash flows generated from our operations and borrowings under our revolving credit facility, to the extent needed. As we expect to continue to generate positive free cash flow in 2013 and beyond, we expect to continue repaying the amounts outstanding under our revolving credit facility absent any acquisitions. See additional discussion under Financing Facilities below.

## Operating Activities

Net cash provided by operating activities totaled \$80.4 million for the six months ended June 30, 2013 compared to net cash provided by operating activities of \$55.9 million during the same period in 2012. The year-over-year increase was primarily attributable to the generation of higher operating profits and smaller net increases in certain working capital balances relative to the prior year period. Additionally, in January 2013, we collected \$13.4 million from an outstanding insurance receivable.

## Investing Activities

Net cash used in investing activities totaled \$59.5 million for the six months ended June 30, 2013, compared to \$55.5 million during the same period in 2012. The year-over-year increase was primarily the result of the cash paid, net of cash acquired, for the acquisitions completed during the six months, partially offset by lower capital expenditures.

**Anticipated Future Capital Expenditures.** We currently anticipate that the majority of our capital expenditures for the foreseeable future will be driven by organic growth projects, including the purchase of ATMs for existing as well as new ATM management agreements. We expect that our capital expenditures for the remainder of 2013 will total approximately \$40 million, the majority of which will be utilized to purchase additional ATMs for our Company-owned accounts and to enhance our existing devices with additional functionalities. We expect such expenditures to be funded with cash generated from our operations. In addition, we will continue to evaluate selected acquisition opportunities that complement our existing ATM network. We believe that significant expansion opportunities continue to exist in all of our current markets, as well as in other international markets, and we will continue to pursue those opportunities as they arise. Such acquisition opportunities, either individually or in the aggregate, could be material and may be funded by additional borrowings under our revolving credit facility or other financing sources that may be available to us.

## Financing Activities

Net cash (used in) provided by financing activities totaled \$ (12.5) million and \$1.1 million for the six months ended June 30, 2013 and 2012, respectively. During the six months ended June 30, 2013, we used the surplus of our operating cash flows above our investing outflows to repay a portion of our revolving credit facility.

## Financing Facilities

As of June 30, 2013, we had approximately \$335.6 million in outstanding long-term debt, which was primarily comprised of: (1) \$200.0 million of 2018 Notes, (2) \$133.5 million in borrowings under our revolving credit facility, and (3) \$2.1 million in notes payable outstanding under equipment financing lines of Cardtronics Mexico.

**Revolving Credit Facility.** As of June 30, 2013, we had a \$250.0 million revolving credit facility that was led by a syndicate of banks including JPMorgan Chase, N.A. and Bank of America, N.A. This facility provides us with \$250.0 million in available borrowings and letters of credit (subject to the covenants contained within the facility) and has an expiration date of July 2016. The facility contains the ability to further increase the borrowing capacity to \$325.0 million, subject to the availability of additional bank commitments by existing or new syndicate participants and other conditions.

Borrowings under our revolving credit facility bear interest at a variable rate based upon our total leverage ratio and the London Interbank Offered Rate (“LIBOR”) or Alternative Base Rate (as defined in the agreement) at our option. Additionally, we are required to pay a commitment fee on the unused portion of the revolving credit facility. Substantially all of our assets, including the stock of all of our wholly-owned domestic subsidiaries and 66% of the stock of our foreign subsidiaries, are pledged to secure borrowings made under the revolving credit facility. Furthermore, each of our domestic subsidiaries has guaranteed our obligations under such facility. There are currently no restrictions on the ability of our wholly-owned subsidiaries to declare and pay dividends directly to us. The primary restrictive covenants within the facility include (1) limitations on the amount of senior debt and total debt that we can have outstanding at any given point in time and (2) the maintenance of a set ratio of earnings to fixed charges, as computed quarterly on a trailing 12-month basis. Additionally, we are limited on the amount of restricted payments, including dividends, which we can make pursuant to the terms of the facility. These limitations are generally governed by a senior leverage ratio test and a fixed charge ratio covenant.

As of June 30, 2013, the weighted average interest rate on our outstanding revolving credit facility borrowings was approximately 2.2%. Additionally, as of June 30, 2013, we were in compliance with all the covenants contained within the facility and would continue to be in compliance even in the event of substantially higher borrowings or substantially lower earnings. As of June 30, 2013, we had \$114.4 million in available borrowing capacity under the \$250.0 million revolving credit facility.

**Senior Subordinated Notes.** In August 2010, we issued \$200.0 million in 2018 Notes. The 2018 Notes are subordinate to borrowings made under the revolving credit facility and carry an 8.25% coupon. Interest is paid semi-annually in arrears on March 1st and September 1st of each year. The 2018 Notes, which are guaranteed by all of our 100% owned domestic subsidiaries, contain no maintenance covenants and only limited incurrence covenants, under which we have considerable flexibility. Pursuant to the terms of the indenture, we are limited on the amount of restricted payments including dividends that we can make. These limitations are generally governed by a fixed charge ratio incurrence test and an overall restricted payments basket.

As of June 30, 2013, we were in compliance with all applicable covenants required under the 2018 Notes.

#### Other Borrowing Facilities

- Cardtronics Mexico equipment financing agreements. Between 2007 and 2010, Cardtronics Mexico entered into several separate five-year equipment financing agreements with a single lender, of which four agreements have remaining balances as of June 30, 2013. These agreements, which are denominated in pesos and bear interest at an average fixed rate of 10.02%, were utilized for the purchase of ATMs to support the growth in our Mexico operations. As of June 30, 2013, approximately \$27.1 million pesos (\$2.1 million U.S.) were outstanding under the agreements, with any future borrowings to be individually negotiated between the lender and Cardtronics Mexico. Pursuant to the terms of the loan agreements, we have issued guarantees for 51.0% of the obligations under these agreements (consistent with our ownership percentage in Cardtronics Mexico). As of June 30, 2013, the total amount of these guarantees was \$13.8 million pesos (\$1.1 million U.S.).
- Bank Machine overdraft facility. Bank Machine has a £1.0 million overdraft facility. This overdraft facility, which bears interest at 1.0% over the Bank of England's base rate (0.5% as of June 30, 2013) and is secured by a letter of credit posted under our revolving credit facility, is utilized for general corporate purposes for our U.K. operations. As of June 30, 2013, there were no amounts outstanding under this overdraft facility. The letter of credit we have posted that is associated with this overdraft facility reduces the available borrowing capacity under our corporate revolving credit facility discussed above.

#### New Accounting Standards

For a description of the accounting standard that we adopted during the six months ended June 30, 2013, see Part I. Financial Information, Item 1. Notes to Consolidated Financial Statements, Note 17, New Accounting Pronouncements.

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The following market risk disclosures should be read in conjunction with the quantitative and qualitative disclosures about market risk contained in the 2012 Form 10-K.

We are exposed to a variety of market risks, including interest rate risk and foreign currency exchange rate risk. The following quantitative and qualitative information is provided about financial instruments to which we were a party at June 30, 2013, and from which we may incur future gains or losses from changes in market interest rates or foreign currency exchange prices. We do not enter into derivative or other financial instruments for speculative or trading purposes.

Hypothetical changes in interest rates and foreign currencies chosen for the following estimated sensitivity analysis are considered to be reasonably possible near-term changes generally based on consideration of past fluctuations for each risk category. However, since it is not possible to accurately predict future changes in interest rates and foreign currencies, these hypothetical changes may not necessarily be an indicator of probable future fluctuations.

#### Interest Rate Risk

Vault cash rental expense. Because our ATM vault cash rental expense is based on market rates of interest, it is sensitive to changes in the general level of interest rates in the U.S., the U.K., Mexico, and Canada. In the U.S. and the U.K., we pay a monthly fee to our vault cash providers on the average amount of vault cash outstanding under a formula based on the U.S. and U.K. LIBOR rates, respectively. In Mexico, we pay a monthly fee to our vault cash provider under a formula based on the Interbank Equilibrium Interest Rate (commonly referred to as the "TIIE"). In Canada, we pay interest to our vault cash providers based on the average amount of vault cash outstanding under a formula based on the Bank of Canada's bankers' acceptance rate.

As a result of the significant sensitivity surrounding the vault cash rental expense for our U.S. and U.K. operations, we have entered into a number of interest rate swaps to effectively fix the rate we pay on the amounts of our current and anticipated outstanding vault cash balances. The following swaps currently in place serve to fix the rate utilized for our vault cash rental agreements in the U.S. and the U.K. for the following notional amounts and periods:

Notional Amounts U.S.	Notional Amounts U.K.	Notional Amounts Consolidated (1)	Weighted Average Fixed Rate	Term
(In thousands)				
\$ 1,000,000	£ 25,000	\$ 1,038,020	2.69 %	July 1, 2013 – December 31, 2013
\$ 1,250,000	£ —	\$ 1,250,000	2.98 %	January 1, 2014 – December 31, 2014
\$ 1,300,000	£ —	\$ 1,300,000	2.84 %	January 1, 2015 – December 31, 2015
\$ 1,300,000	£ —	\$ 1,300,000	2.74 %	January 1, 2016 – December 31, 2016
\$ 1,000,000	£ —	\$ 1,000,000	2.53 %	January 1, 2017 – December 31, 2017
\$ 750,000	£ —	\$ 750,000	2.54 %	January 1, 2018 – December 31, 2018

<sup>(1)</sup> U.K. pound sterling amounts have been converted into U.S. dollars at approximately \$1.52 to £1.00, which was the exchange rate in effect as of June 30, 2013.

The following table presents a hypothetical sensitivity analysis of our annual vault cash rental expense based on our average outstanding vault cash balances for the quarter ended June 30, 2013 (as we are invoiced monthly by the vault cash provider based on average balance outstanding) and assuming a 100 basis point increase in interest rates:

	Average Vault Cash Balance for the Quarter Ended June 30, 2013 (Functional		Additional Interest Incurred on 100 Basis Point Increase (Excluding Impact of Interest Rate Swaps) (Functional		Additional Interest Incurred on 100 Basis Point Increase (Including Impact of All Interest Rate Swaps Currently under Contract) (Functional	
	(U.S. currency)	(U.S. dollars)	(U.S. currency)	(U.S. dollars)	(U.S. currency)	(U.S. dollars)
	(In millions)		(In millions)		(In millions)	
United States	\$ 1,665.0	\$ 1,665.0	\$ 16.7	\$ 16.7	\$ 6.7	\$ 6.7
United Kingdom	£ 215.9	331.5	£ 2.2	3.3	£ 1.9	2.9
Mexico	p\$ 148.4	11.9	p\$ 1.5	0.1	p\$ 1.5	0.1
Canada	c\$ 62.0	60.6	c\$ 0.6	0.6	c\$ 0.6	0.6
Total		\$ 2,069.0		\$ 20.7		\$ 10.3

Starting this year and continuing for several years thereafter, our expected exposure to changes in interest rates on our outstanding vault cash balances is expected to be somewhat lower than is presented in the table above. This expected reduction in exposure to floating interest rates is primarily the result of forward-starting swaps entered in prior years, which increase our overall hedged position by \$250.0 million in 2014 and an additional \$50.0 million in 2015 on our vault cash balances outstanding in the U.S. These incremental swaps are partially offset by a reduction in outstanding interest rate swap agreements related to the vault cash in our U.K. operations during the same time period. Our sensitivity to changes in interest rates in the U.K. is somewhat mitigated by the interchange rate setting methodology that impacts the majority of our U.K. interchange revenue. Effectively, the interest rates and cash costs from two years back are considered for determining the interchange rate (i.e., interest rates and other costs from 2011 are

considered for determining the 2013 interchange rate). As a result of this structure, should interest rates rise in the U.K., causing our operating expenses to rise, we would expect to see a rise in interchange rates (and our revenues), albeit with a lag. We expect some growth in outstanding vault cash balances as a result of expected future business growth, and we may continue to seek ways to mitigate our exposure to floating interest rates by engaging in additional interest rate swaps in the future.

As of June 30, 2013, we had a net liability of \$70.8 million recorded on our Consolidated Balance Sheet related to our interest rate swaps, which represented the fair value liability of the agreements, as derivative instruments are required to be carried at fair value. Fair value was calculated as the present value of amounts estimated to be received or paid to a marketplace participant in a selling transaction. These swaps are valued using pricing models based on significant other observable inputs (Level 2 inputs under the fair value hierarchy established by U.S. GAAP), while taking into account the nonperformance risk of the party that is in the liability position with respect to each trade. These swaps are accounted for as cash flow hedges; accordingly, changes in the fair values of the swaps have been reported in accumulated other comprehensive loss, net line item in the accompanying Consolidated Balance Sheets. Due to our determination that net deferred tax assets are realizable in the future, we record the unrealized loss amounts related to our interest rate swaps net of estimated taxes in the Accumulated other comprehensive loss, net line item within Stockholders' equity in the accompanying Consolidated Balance Sheets.

As of June 30, 2013, we had not entered into any derivative financial instruments to hedge our variable interest rate exposure in Mexico or Canada, as we do not deem it to be cost effective to engage in such a hedging program. However, we may enter into derivative financial instruments in the future to hedge our interest rate exposure in those markets.

Interest expense. Our interest expense is also sensitive to changes in interest rates in the U.S., as borrowings under our revolving credit facility accrue interest at floating rates. Based on the \$133.5 million outstanding under our revolving credit facility as of June 30, 2013, an increase of 100 basis points in the underlying interest rate would have had a \$0.7 million impact on our interest expense in the six months then ended. However, there is no guarantee that we will not borrow additional amounts under our revolving credit facility in the future, and, in the event we borrow amounts and interest rates significantly increase, the interest that we would be required to pay would be more significant. We have not entered into interest rate hedging arrangements in the past to hedge our interest rate risk for our borrowings, and have no plans to do so. Due to fluctuating balances in the amount outstanding under our revolving credit facility, we do not believe such arrangements to be cost effective.

Outlook. If we continue to experience low short-term interest rates in the U.S. and the U.K., it will be beneficial to the amount of interest expense we incur under our bank credit facilities and our vault cash rental expense. Although we currently hedge a substantial portion of our vault cash interest rate risk, as noted above, we may not be able to enter into similar arrangements for similar amounts in the future, and any significant increase in interest rates in the future could have an adverse impact on our business, financial condition and results of operations by increasing our operating costs and expenses. However, the impact on our financial statements from a significant increase in interest rates would be partially mitigated by the interest rate swaps that we currently have in place associated with our vault cash balances in the U.S. and the U.K.

## Foreign Currency Exchange Rate Risk

As a result of our operations in the U.K., Mexico, and Canada, we are exposed to market risk from changes in foreign currency exchange rates, specifically with respect to changes in the U.S. dollar relative to the British pound, Mexican peso, and the Canadian dollar. All of our international subsidiaries are consolidated into our financial results and are subject to risks typical of international businesses including, but not limited to, differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Furthermore, we are required to translate the financial condition and results of our international operations into U.S. dollars, with any corresponding translation gains or losses being recorded in other comprehensive income in our consolidated financial statements. As of June 30, 2013, this accumulated translation loss totaled approximately \$29.2 million compared to approximately \$24.6 million as of December 31, 2012.

Our consolidated financial results were not materially impacted by the change in value of the British pound, Mexican peso, or Canadian dollar relative to the U.S. dollar during the three months ended June 30, 2013 compared to the prior year period, but were negatively affected for the six months ended June 30, 2013 compared to the prior year period. A sensitivity analysis indicates that, if the U.S. dollar uniformly strengthened or weakened 10% against the British pound, the effect upon our U.K. operations' operating income for the six months ended June 30, 2013 would have been approximately \$0.1 million. Similarly, a sensitivity analysis indicates that if the U.S. dollar uniformly strengthened or weakened 10% against the Mexican peso for the six months ended June 30, 2013, the effect upon the respective subsidiary's operating income would have been approximately \$0.2 million. Finally, a sensitivity analysis indicates that if the U.S. dollar uniformly strengthened or weakened 10% against the Canadian dollar for the six months ended June 30, 2013, the effect upon the respective subsidiary's operating income would have been immaterial. At this time, we have not deemed it to be cost effective to engage in a program of hedging the effect of foreign currency fluctuations on our operating results using derivative financial instruments.

Certain intercompany balances between our U.S. parent company and our U.K. operations are designated as short-term in nature, and the changes in these balances are translated in our Consolidated Statements of Operations. As a result, we are exposed to foreign currency exchange risk as it relates to these intercompany balances. As of June 30, 2013, the intercompany payable balance from our U.K. operations to our U.S. parent company totaled \$48.1 million, of which \$7.4 million was deemed to be short-term in nature. A

sensitivity analysis indicates that, if the U.S. dollar uniformly strengthened or weakened 10% against the British pound, based on the intercompany payable balance as of June 30, 2013, the effect upon our Consolidated Statements of Operations would be approximately \$0.7 million.

We do not hold derivative commodity instruments, and all of our cash and cash equivalents are held in money market and checking funds.

#### Item 4. Controls and Procedures

##### Management's Quarterly Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (the "Exchange Act"), we have evaluated, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Form 10-Q. Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us in reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2013 at the reasonable assurance level.

##### Changes in Internal Control over Financial Reporting

There have been no changes in our system of internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended June 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

## Item 1. Legal Proceedings

For a description of our material pending legal and regulatory proceedings and settlements, see Part I. Financial Information, Item 1. Notes to Consolidated Financial Statements, Note 14, Commitments and Contingencies.

## Item 1A. Risk Factors

The known material risks we face are described in our 2012 Form 10-K under Part I, Item 1A, Risk Factors. There have been no material changes in our risk factors since that report.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities by the Issuer and Affiliated Purchasers. The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the three months ended June 30, 2013:

Period	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid Per Share <sup>(2)</sup>	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Approximate Dollar Value that may Yet be Purchased Under the Plan or Program <sup>(3)</sup>
April 1 – 30, 2013	164	\$ 27.40	—	\$ —
May 1 – 31, 2013	235	\$ 28.97	—	\$ —
June 1 – 30, 2013	197	\$ 28.45	—	\$ —

---

(1)

Represents shares surrendered to us by participants in our 2007 Stock Incentive Plan to settle the participants' personal tax liabilities that resulted from the lapsing of restrictions on shares awarded to the participants under the 2007 Stock Incentive Plan.

- (2) The price paid per share was based on the average high and low trading prices of our common stock on the dates on which we repurchased shares from the participants under our 2007 Stock Incentive Plan.
- (3) In connection with the lapsing of the forfeiture restrictions on restricted shares granted by us under our 2007 Stock Incentive Plan, which was adopted in December 2007 and expires in December 2017, we permitted employees and directors to sell a portion of their shares to us in order to satisfy their tax liabilities that arose as a consequence of the lapsing of the forfeiture restrictions. In future periods, we may not permit individuals to sell their shares to us in order to satisfy such tax liabilities. Since the number of restricted shares that will become unrestricted each year is dependent upon the continued employment of the award recipients, we cannot forecast either the total amount of such securities or the approximate dollar value of those securities that we might purchase in future years as the forfeiture restrictions on such shares lapse.

#### Item 6. Exhibits

The exhibits required to be filed or furnished pursuant to the requirements of Item 601 of Regulation S-K are set forth in the Index to Exhibits accompanying this Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
