If "Yes" is marked, indicated below the file number assigned to the
registrant in connection with Rule 12g3-2(b):

GOL Breaks Traffic Record for March

Record demand on GOL's route network for March, 36.8% up year-on-year, and yield reaches approximately 20 cents (R\$)

São Paulo, April 8, 2010 – GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and BM&FBOVESPA: GOLL4), the largest low-cost and low-fare airline in Latin America, recorded the **highest demand for March in the domestic market and in the total system since going operational in 2001.**

The Company registers record demand for March in the domestic market and in the total system since going operational in 2001.

The Company registered 36.8% growth in demand in its route network compared to March 2009, with 38.5% growth in the domestic market. This growth was driven by the combined effect of a better economic scenario in Brazil and Latin America and the increase in the Company's competitive advantages in the markets it operates: (i) higher frequency and regularity in Brazil's main airports; (ii) **increase in productivity, with aircraft utilization of more than 12.5 block hours/day**, compared to approximately 11.3 block hours/day in March 2009; (iii) revitalization of SMILES, Latin America's largest mileage program with over 6.7 million participants; and (iv) dynamic fare management, including the new structure of Fare Categories, which benefit both clients looking for promotions with reduced fares and business travelers, for example, who seek flexibility as well as other benefits such as mileage bonuses.

Demand on the total system and in the international market fell by 3.4% and 21.2% in comparison with February 2010, due to the seasonal effect and the fewer days in that month, comparing to March.

Operating Data	March 2010*	March 2009*	Chg. % (YoY)	February 2010*	Chg. % (MoM)
Total System					
ASK (mm) (1)	3,767.7	3,246.2	16.1%	3,467.6	8.7%
RPK (mm) (2)	2,437.6	1,782.2	36.8%	2,523.1	-3.4%
Load Factor (3)	64.7%	54.9%	+9.8pp	72.8%	-8.1pp
Domestic Market					
ASK (mm) (1)	3,347.0	2,762.2	21.2%	3,026.4	10.6%
RPK (mm) (2)	2,177.0	1,571.5	38.5%	2,192.4	-0.7%
Load Factor (3)	65.0%	56.9%	+8.2pp	72.4%	-7.4pp
International Market					
ASK (mm) (1)	420.7	484.0	-13.1%	441.2	-4.6%
RPK (mm) (2)	260.6	210.8	23.6%	330.6	-21.2%
Load Factor (3)	61.9%	43.5%	+18.4pp	74.9%	-13.0pp

(*) March 2010 – preliminary figures; March 2009 and February 2010 - figures from the National Civil Aviation Agency (Anac).

Demand on GOL's international route increased by 23.6% in March 2010, over the same period in 2009, thanks to a few additional factors: (i) adjustments to the international route network, including frequencies; (ii) appreciation of

Real against the Dollar; (iii) the launch of new routes between Brazil and the Caribbean, such as those to Aruba and Curaçao; and (iv) more favorable macroeconomic scenario.

The international load factor of 61.9% was 18.4 p.p. more than the 43.5% recorded in March 2009.

*Comparing the same period in 2009, **the total load factor increased to 64.7% in March 2010** (65.0% in the domestic market and 61.9% in the international market), with the international market 18.4 p.p. higher than the 43.5% registered in March 2009, and the domestic market increasing by 8.2 p.p. over the 56.9% in the same period last year.*

The Company's capacity grew at less than half the demand growth in the route network.

In accordance with the Company's disciplined strategy of capacity growth, demand grew by 36.8% over March 2009, whereas **capacity increased by 16.1%, substantially below the record demand growth in the route network.** This strategy was equally apparent in the international market, where the Company reduced its capacity by 13.1%, versus a 23.6% upturn in demand, improving the quality of the consolidated load factor.

Operating Data	1Q10	1Q09	Chg. %	4Q09	Chg.%
Total System- Quarter					
ASK (mm) (1)	11,172.0	9,548.1	17.0%	10,592.0	5.5%
RPK (mm) (2)	8,026.6	5,820.5	37.9%	7,771.8	3.3%
Load Factor (3)	71.8%	61.0%	+10.9pp	73.4%	-1.5pp

(*) March 2010 – preliminary figures; March 2009 and February 2010 - figures from the National Civil Aviation Agency (Anac).

Yields averaged above 20 cents (R\$), gradually increasing since the extremely competitive scenario in the middle of October 2009. Consequently, current yield levels are in line with its financial outlook.

(1) Available seat kilometers (ASK) is the sum of the products obtained by multiplying the number of seats available on each flight stage by the distance of the average flight stage.

(2) Revenue passenger kilometers (RPK) is the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the average stage distance.

(3) Load factor is the percentage of aircraft seating capacity effectively used, which is calculated by dividing the number of passenger-kilometers flown by the number of seat-kilometers available.
