Item 1.02 Termination of a Material Definitive Agreement.

On December 19, 2006, Altus Pharmaceuticals Inc. ("Altus") entered into a Collaboration and License Agreement (the "Collaboration Agreement") with Genentech, Inc. ("Genentech") relating to the development, manufacture and commercialization of pharmaceutical products containing crystallized human growth hormone using Altus' ALTU-238 proprietary technology. The Collaboration Agreement covered the sale of ALTU-238 Product in the United States, Canada and Mexico, and Genentech had an option to extend the collaboration globally.

On December 19, 2007, Genentech and Altus entered into an agreement terminating the collaboration effective December 31, 2007 (the "Termination Agreement"). Under the Termination Agreement, Altus regains control of its ALTU-238 assets and Genentech has agreed to provide, for a limited term, supplies of human growth hormone for future clinical development. In addition, Genentech will provide Altus certain funding to support transition of the program. Upon commercialization, Genentech will be entitled to a nominal royalty on sales of ALTU-238.

Genentech and we concluded that continuation of the collaboration was not in the strategic interest of both companies following a series of discussions regarding future development of ALTU-238. Genentech and we ultimately concluded that return of these development and commercialization rights to Altus would be in the best interest of both parties.

Item 7.01 Regulation FD Disclosure.

A copy of the press release issued by Altus Pharmaceuticals relating to the termination of the Collaboration Agreement described in Item 1.02 is furnished, not filed, as Exhibit 99.1
