HUANENG POWER INTERNATIONAL, INC.
Power Generation Increases 2.79% in the First Quarter of 2006

(Beijing, China, April 10, 2006) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] today announced its power generation in the first quarter of 2006.

Based on preliminary statistics, for the first quarter ended March 31, 2006, the Company's total power generation based on a consolidated basis was 37.096 billion kWh, an increase of 2.79% over the same period last year. The power

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

generation of Shantou Power Plant, Taicang Power Plant, Yueyang Power Plant, Qinbei Power Plant and Shanghai Shidongkou First Power Plant increased significantly as compared with the same period last year.

The increase in power generation of the Company's power plants was mainly attributable to the following reasons:

1. Stable generation capacity contributed by four newly operated generating units at Shantou Power Plant, Taicang Power Plant and Yueyang Power Plant since the same period last year;
2. A larger increase in power generation by Qinbei Power Plant and Shanghai Shidongkou First Power Plant due to the significantly shortened maintenance period of respective power plants in the first quarter this year when compared to the same period last year;
3. As a result of continuing economic growth, power demand in the regions where the Company's power plants operated underwent steady growth, thereby providing favorable market conditions for more power generation by the Company's power plants.

Huaneng Power Int'l, Inc.

Power Generation Increases 2.79% in the First Quarter of 2006 ... P.2
