Table of Contents**Item 1. Financial Statements (Continued).****Skyline Corporation and Subsidiary Companies****Notes to the Consolidated Financial Statements (Unaudited)****NOTE 1 Nature of Operations, Accounting Policies of Consolidated Financial Statements**

The accompanying unaudited interim consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the consolidated financial position as of February 29, 2008, in addition to the consolidated results of operations and consolidated cash flows for the three-month and nine-month periods ended February 29, 2008 and February 28, 2007. Due to the seasonal nature of the Corporation's business, interim results are not necessarily indicative of results for the entire year.

The unaudited interim consolidated financial statements included herein have been prepared pursuant to the rules and regulations for reporting on Form 10-Q. Accordingly, certain information and footnote disclosures normally accompanying the annual consolidated financial statements have been omitted. The audited consolidated balance sheet as of May 31, 2007 and the unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Corporation's latest annual report on Form 10-K. Inventories are stated at cost, determined under the first-in, first-out method, which is not in excess of market.

Physical inventory counts are taken at the end of each reporting quarter.

Total inventories consist of the following:

	February 29, 2008	May 31, 2007
	(Dollars in thousands)	
Raw Materials	\$ 5,118	\$ 5,098
Work In Process	4,895	5,463
Finished Goods	629	
	\$ 10,642	\$ 10,561

At February 29, 2008, Finished Goods inventory consists of manufactured homes built for display purposes, in addition to manufactured homes and recreational vehicles that are awaiting shipment at the end of the fiscal quarter. The Corporation provides the retail purchaser of its manufactured homes with a full fifteen-month warranty against defects in design, materials and workmanship. Recreational vehicles are covered by a one-year warranty. The warranties are backed by service departments located at the Corporation's manufacturing facilities and an extensive field service system.

Table of Contents**Item 1. Financial Statements (Continued).****Skyline Corporation and Subsidiary Companies****Notes to the Consolidated Financial Statements (Unaudited) (Continued)****NOTE 1 Nature of Operations, Accounting Policies of Consolidated Financial Statements (Continued)**

Estimated warranty costs are accrued at the time of sale based upon current sales, historical experience and management's judgment regarding anticipated rates of warranty claims. The adequacy of the recorded warranty liability is periodically assessed and the amount is adjusted as necessary.

A reconciliation of accrued warranty and related expenses is as follows:

	Nine-Months Ended	
	February 29, 2008	February 28, 2007
	(Dollars in thousands)	
Balance at the beginning of the period	\$ 10,600	\$ 12,111
Accruals for warranties	6,040	8,746
Settlements made during the period	(6,188)	(8,524)
Balance at the end of the period	10,452	12,333
Non-current balance included in other deferred liabilities	3,300	4,000
Accrued warranty and related expenses	\$ 7,152	\$ 8,333

The Corporation was contingently liable at February 29, 2008 under repurchase agreements with certain financial institutions providing inventory financing for retailers of its products.

Under these arrangements, which are customary in the manufactured housing and recreational vehicle industries, the Corporation agrees to repurchase units in the event of default by the retailer at declining prices over the term of the agreement, generally 12 months.

The maximum repurchase liability is the total amount that would be paid upon the default of all the Corporation's independent dealers. The maximum potential repurchase liability, without reduction for the resale value of the repurchased units, was approximately \$74 million at February 29, 2008 and \$89 million at May 31, 2007.

The risk of loss under these agreements is spread over many retailers and financial institutions. The loss, if any, under these agreements is the difference between the repurchase cost and the resale value of the units.

Table of Contents**Item 1. Financial Statements (Continued).****Skyline Corporation and Subsidiary Companies****Notes to the Consolidated Financial Statements (Unaudited) (Continued)****NOTE 1 Nature of Operations, Accounting Policies of Consolidated Financial Statements (Continued)**

The Corporation believes that any likely loss under the agreements in effect at February 29, 2008 will not be material to the Corporation's financial position or results of operations.

The amounts of obligations from repurchased units and incurred net losses for the periods presented are as follows:

	Three-Months Ended		Nine-Months Ended	
	February	February	February	February
	29,	28,	29,	28,
	2008	2007	2008	2007
	(Dollars in thousands)			
Number of units repurchased	19	20	62	78
Obligations from units repurchased	\$ 544	\$ 303	\$ 1,280	\$ 1,244
Net losses on repurchased units	\$ 6	\$	\$ 6	\$

The Corporation is a party to various pending legal proceedings in the normal course of business. Management believes that any losses resulting from such proceedings would not have a material adverse effect on the Corporation's results of operations or financial position.

In the first quarter of fiscal 2008, the Corporation adopted Financial Accounting Standards Board, (FASB), Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (FIN No. 48). This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*. The Corporation adopted FIN No. 48 with no material impact on its consolidated financial statements.

The amount of unrecognized tax benefits at June 1, 2007 totaled approximately \$100,000. This amount would increase operating income thus impacting the Corporation's effective tax rate, if ultimately recognized in income.

For the majority of taxing jurisdictions the Corporation is no longer subject to examination by taxing authorities for years before 2004. State income tax expense reflects minimum amounts required by certain taxing jurisdictions in which the Corporation operates.

The Corporation does not expect the amount of unrecognized tax benefits to significantly increase in the next twelve months. Interest and penalties related to income tax matters are recognized in income tax expense. Accruals for interest and penalties at February 29, 2008 were insignificant.

The Corporation has also determined that the adoption of any other recently issued accounting standard is not expected to have a material impact on its future financial condition or results of operation.

Table of Contents**Item 1. Financial Statements (Continued).****Skyline Corporation and Subsidiary Companies****Notes to the Consolidated Financial Statements (Unaudited) (Continued)****NOTE 2 Industry Segment Information**

The Corporation designs, produces and distributes manufactured housing (single-section, multi-section and modular homes) and towable recreational vehicles (travel trailers, fifth wheels and park models). In the first nine months of fiscal year 2008, manufactured housing represented approximately 73 percent of total sales, while recreational vehicles accounted for approximately 27 percent. In the comparable period of fiscal year 2007, manufactured housing represented approximately 75 percent of total sales, while recreational vehicles accounted for approximately 25 percent.

Total operating loss represents loss before interest income, gain on sale of idle property, plant and equipment and (benefit) provision for income taxes with non-traceable operating expenses being allocated to industry segments based on percentages of sales. General corporate expenses are not allocated to the industry segments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

The Corporation designs, produces and distributes manufactured housing (single-section, multi-section and modular homes) and towable recreational vehicles (travel trailers, fifth wheels and park models) to independent dealers and manufactured housing communities located throughout the United States (U.S.). To better serve the needs of its dealers and communities, the Corporation has twenty manufactured facilities in eleven states. Manufactured housing and recreational vehicles are sold to dealers and communities either through floor plan financing with various financial institutions or on a cash basis. While the Corporation maintains production of manufactured homes and recreational vehicles throughout the year, seasonal fluctuations in sales do occur. Sales and production of manufactured homes are affected by winter weather conditions at the Corporation's northern plants. Recreational vehicle sales are generally higher in the spring and summer months than in the fall and winter months.

Sales in both business segments are affected by the strength of the U.S. economy, interest rate levels, consumer confidence and the availability of wholesale and retail financing. The manufactured housing segment is currently affected by a protracted downturn. This downturn, caused primarily by restrictive retail financing and economic uncertainty, resulted in 2007 industry sales of approximately 96,000 units, the lowest since 1961. Manufactured housing sales are also negatively impacted by a recession in the site-built housing industry. Throughout 2007, the site-built industry experienced declines in existing home sales, housing starts and home prices, and was negatively impacted by dislocations in the subprime mortgage market. In addition, the number of homes in foreclosure increased. Manufactured housing sales are negatively impacted by events in the site-built market in different ways. A potential buyer of a manufactured home may be prevented from purchasing due to an inability to sell his or her existing home. Likewise, a potential buyer of a manufactured home may be attracted to declining prices of both new and existing site-built homes.

In the first nine months of fiscal year 2008, the Corporation's manufactured housing sales declined consistent with the experience of the industry as a whole. Within this segment's sales, demand remains stronger for multi-section versus single-section homes. Multi-section homes are often sold as part of a land-home package and are financed with a conventional mortgage. These homes have an appearance similar to site-built homes and are notably less expensive. The Corporation has ten manufactured housing facilities that have obtained approval from applicable state and local governmental entities to produce modular homes, which will help meet the demand for multi-section homes.

In the recreational vehicle segment, the Corporation sells travel trailers, fifth wheels and park models. Sales of recreational vehicles are influenced by changes in consumer confidence and gasoline prices. Industry sales of travel trailers and fifth wheels declined from approximately 283,000 units in 2006 to approximately 261,000 units in 2007. During this same period, the price of gasoline rose and consumer confidence fell. For the first nine months of fiscal year 2008, the recreational vehicle segment also experienced declining sales.

In light of declining market conditions, a manufactured housing facility in Ocala, Florida was consolidated into two existing manufactured housing facilities located in the same city. The consolidation occurred in the third quarter of fiscal 2008.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Continued).**

In addition, the Corporation is working to reduce expenses, communicating with dealers and communities to take advantage of sales opportunities, and positioning its products to be competitive in the marketplace. With a healthy position in cash and U.S. Treasury Bills, no long-term debt and experienced employees, the Corporation is prepared to meet the challenges ahead.

Results of Operations Three-Month Period Ended February 29, 2008 Compared to the Three-Month Period Ended February 28, 2007 (Unaudited)**Sales and Unit Shipments**

	February 29, 2008	Percent	February 28, 2007	Percent	Increase (Decrease)

Total Unit Shipments	2,070	100.0	2,084	100.0	(14)

Manufactured housing sales decreased due to continued softening of demand, which is consistent with the experience of the manufactured housing industry as a whole.

Recreational vehicle sales increased due to greater demand for park model, travel trailer and fifth wheel models.

Included in this increase are models with fiberglass bonded wall construction, and metal-sided models that are both competitively priced and designed to meet consumer tastes.

Results of Operations Three-Month Period Ended February 29, 2008 Compared to the Three-Month Period
Ended February 28, 2007 (Unaudited) (Continued)****Cost of Sales (Continued)**

Manufactured housing cost of sales decreased due to less sales volume and the variable nature of many of the direct manufacturing costs. As a percentage of sales, cost of sales increased as a result of certain manufacturing overhead costs remaining relatively constant despite lower sales.

Recreational vehicle cost of sales increased due to greater sales volume and the variable nature of many direct manufacturing costs. As a percentage of sales, cost of sales decreased due to certain manufacturing overhead costs remaining relatively constant despite increasing sales. In addition, this segment experienced a decrease in warranty expenses.

Results of Operations Three-Month Period Ended February 29, 2008 Compared to the Three-Month Period
Ended February 28, 2007 (Unaudited) (Continued)****Operating Loss (Continued)**

The operating loss for manufactured housing increased primarily due to the impact of decreased sales on the components of operating loss as noted above.

The operating loss for recreational vehicles was negatively impacted by this segment receiving a larger proportion of certain operating expenses allocated to industry segments based on a percentage of sales. Recreational vehicle sales were approximately 33 percent in the third quarter of fiscal 2008 as compared to 23 percent in the third quarter of fiscal 2007. As a percentage of sales, the operating loss decreased primarily due to the impact of increased sales on the components of operating loss as noted above.

The decrease in general corporate expenses occurred primarily in costs associated with various administrative expenses.

State	(201)	(269)	(68)
Total	\$ (2,576)	\$ (1,344)	\$ 1,232

The benefit for federal income taxes approximates the statutory rate and for state income taxes reflects current state rates effective for the period based upon activities within the taxable entities. The benefit for federal income taxes increased due to the increase in loss before income taxes. The benefit for state income taxes decreased because certain jurisdictions in which the Corporation operates assessed taxes based on criteria other than income.

Total Unit Shipments	7,705	100.0	8,837	100.0	1,132

Manufactured housing sales decreased due to an overall softening of demand, which is consistent with the experience of the manufactured housing industry as a whole.

Recreational vehicle sales for the first two fiscal quarters decreased due to an overall softening of demand. Sales, however, did increase in the third fiscal quarter.

Sales were negatively impacted in the first six months of fiscal 2008 by an increase in consumer demand for fiberglass bonded wall construction. The Corporation addressed this shift in demand by opening a previously idled facility which is dedicated to producing travel trailers with fiberglass bonded wall construction. This facility commenced operations in the third quarter of fiscal year 2007.

Sales were also negatively impacted by metal-sided models being priced higher relative to products of other recreational vehicle manufacturers. The Corporation has worked throughout fiscal 2008 to have its recreational vehicle products priced comparably to its competitors in this segment.

Manufactured housing cost of sales decreased due to less sales volume and the variable nature of many of the direct manufacturing costs. As a percentage of sales, cost of sales increased as a result of certain manufacturing overhead costs remaining relatively constant despite lower sales.

Recreational vehicle cost of sales decreased due to less sales volume and the variable nature of many of direct manufacturing costs. As a percentage of sales, cost of sales increased due to the introduction of various option packages. These packages, designed to meet competition in the marketplace, are aggressively priced relative to option packages sold in the previous year. The cost of sales percentage also increased as a result of certain manufacturing overhead costs remaining relatively constant despite lower sales.

Results of Operations - Nine-Month Period Ended February 29, 2008 Compared to the Nine-Month Period
ended February 28, 2007 (Unaudited) (Continued)****Operating (Loss) Earnings (Continued)**

Operating earnings for manufactured housing decreased primarily due to the impact of decreased sales on the components of earnings as noted above.

The operating loss for recreational vehicles increased primarily due to the impact of decreased sales on the components of earnings as noted above.

The decrease in general corporate expenses occurred primarily due to a change in valuation of the Corporation's liability for retirement and death benefits offered to certain employees. This liability is referenced in Note 4 of the Corporation's Form 10-K for the fiscal year ending May 31, 2007.

The (benefit) provision for federal income taxes approximates the statutory rate and for state income taxes reflects current state rates effective for the period based upon activities within the taxable entities. The provision for federal income taxes decreased due to the decrease in earnings before income taxes. The benefit for state income decreased slightly because certain jurisdictions in which the Corporation operates assessed taxes based on criteria other than income.

Liquidity and Capital Resources

	February 29, 2008	May 31, 2007	Decrease
	(Dollars in thousands)		
Cash and U.S. Treasury Bills	\$ 116,227	\$ 124,240	\$ 8,013
Current Assets, Exclusive of Cash and U.S. Treasury Bills	\$ 41,541	\$ 44,702	\$ 3,161
Current Liabilities	\$ 23,868	\$ 27,114	\$ 3,246
Working Capital	\$ 133,900	\$ 141,828	\$ 7,928

The Corporation's policy is to invest its excess cash, which exceeds its operating needs, in U.S. Government Securities. Cash and U.S. Treasury Bills decreased due to a net loss of \$5,747,000 partially offset by a slight decline in other working capital items, and payment of approximately \$4,531,000 in dividends. Current assets, exclusive of cash and U.S. Treasury Bills, declined primarily due to a decrease in accounts receivable of \$5,831,000. This decrease is attributed to lower sales in February 2008 as compared to May 2007.

Current liabilities decreased due to a decline in accrued salaries and wages of \$1,820,000, and accounts payable of \$2,213,000. Accrued salaries and wages decreased due to the timing of payroll payments at February 29, 2008 as compared to May 31, 2007. In addition, the Corporation's employee headcount was lower at February 29, 2008 as compared to May 31, 2007. Accounts payable, trade declined due to decreased sales activity.

Capital expenditures totaled \$1,601,000 for the nine months ended February 29, 2008 as compared to \$3,965,000 in the comparable period of the previous year. Capital expenditures were made primarily to replace or refurbish machinery and equipment in addition to improving manufacturing efficiencies.

The cash provided by operating activities, along with current cash and other short-term investments, is expected to be adequate to fund any capital expenditures and treasury stock purchases during the year. Historically, the Corporation's financing needs have been met through funds generated internally.

Other Matters

The consolidated financial statements included in this report reflect transactions in the dollar values in which they were incurred and, therefore, do not attempt to measure the impact of inflation. On a long-term basis, the Corporation has demonstrated an ability to adjust selling prices in reaction to changing costs due to inflation. The Corporation believes that inflation has not had a material effect on its operations during the first nine months of fiscal 2008.

Forward Looking Information

Certain statements in this report are considered forward looking as indicated by the Private Securities Litigation Reform Act of 1995. These statements involve uncertainties that may cause actual results to materially differ from expectations as of the report date. These uncertainties include but are not limited to:

Cyclical nature of the manufactured housing and recreational vehicle industries

General or seasonal weather conditions affecting sales

Potential impact of hurricanes and other natural disasters on sales and raw material costs

Potential periodic inventory adjustments by independent retailers

Availability of wholesale and retail financing

Interest rate levels

Impact of inflation

Impact of rising fuel costs

Cost of labor and raw materials

Competitive pressures on pricing and promotional costs

Catastrophic events impacting insurance costs

The availability of insurance coverage for various risks to the Corporation

Consumer confidence and economic uncertainty

The health of the U.S. housing market as a whole

Market demographics

Management's ability to attract and retain executive officers and key personnel

Increased global tensions, market disruption resulting from a terrorist or other attack and any armed conflict involving the United States.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk.*

The Corporation invests in United States Government Securities. These securities are intended to be held until maturity and are therefore classified as held-to-maturity and carried at amortized cost. Changes in interest rates do not

have a significant effect on the fair value of these investments.

Item 4. Controls and Procedures.

Management's Conclusions Regarding Effectiveness of Disclosure Controls and Procedures

As of February 29, 2008, the Corporation conducted an evaluation, under the supervision and participation of management including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934).

Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures are effective as of February 29, 2008.

Changes in Internal Control over Financial Reporting

No change in the Corporation's internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) occurred during the third quarter ended February 29, 2008 that materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.
