Table of Contents**KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****1. Basis of Presentation**

Kona Grill, Inc. (referred to herein as the Company or we, us, and our) owns and operates upscale casual dining restaurants under the name Kona Grill. Our restaurants feature a diverse selection of mainstream American dishes and award-winning sushi that are prepared fresh daily. We currently own and operate 22 restaurants in 14 states throughout the United States.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three month period ended March 31, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

The consolidated balance sheet at December 31, 2008 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. Accordingly, these financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2008.

Recent Accounting Pronouncements

Effective January 1, 2008, we adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157) for financial assets and liabilities. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. See Note 4 for further discussion of fair value measurements. We adopted SFAS 157 for non-financial assets and liabilities effective January 1, 2009.

Effective January 1, 2008, we adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). Under this Statement, we may elect to report financial instruments and certain other items at fair value on a contract-by-contract basis with changes in value reported in earnings. We elected the fair value option for rights given by our broker related to our investments in auction rate securities. See Note 3 for further discussion of these rights.

In April 2009, the FASB issued three FASB Staff Positions (FSPs) in order to provide additional application guidance and enhance disclosures regarding fair value measurements and impairment of securities.

FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, provides guidance on how to determine the fair value of assets and liabilities when the volume and level of activity for the asset or liability has significantly decreased. This FSP reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. In addition, this FSP requires disclosure in interim and annual periods of the inputs and valuation techniques used to measure fair value and a discussion of changes in valuation techniques.

FSP FAS 115-2 and FAS 124-2 *Recognition and Presentation of Other-Than-Temporary Impairments*, amends the requirements for the recognition and measurement of other-than-temporary impairments for debt securities by modifying the pre-existing intent and ability indicator. Under FSP FAS 115-2 and FAS 124-2, an other-than-temporary impairment is triggered when there is an intent to sell the security, it is more likely than not that the security will be required to be sold before recovery, or the security is not expected to recover the entire amortized cost basis of the security. Additionally, this FSP changes the presentation of an other-than-temporary impairment in the income statement for those impairments involving credit losses. The credit loss component will be recognized in earnings and the remainder of the impairment will be recorded in other comprehensive income.

Table of Contents

FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, requires interim disclosures regarding the fair values of financial instruments that are not currently reflected on the balance sheet at fair value. Additionally, this FSP requires disclosure on the methods and significant assumptions used to estimate the fair value of financial instruments on an interim basis as well as changes of the methods and significant assumptions from prior periods.

These FSPs are effective for our second quarter ended June 30, 2009. These FSPs are not expected to have a material effect on our financial condition or results of operations.

2. Discontinued Operations

On September 13, 2008, we closed our Naples, Florida restaurant to focus our attention on our profitable locations and to position our concept to generate profit from operations. As a result of the closure, we recorded non-cash asset impairment charges of \$2,158,000 as well as ongoing contractual lease obligations, restaurant-level closing costs, and employee termination benefits, net of deferred costs, of approximately \$800,000 during the third quarter of 2008.

Contractual lease obligations associated with the Naples closure are included in deferred rent on our accompanying consolidated balance sheet as of March 31, 2009 and December 31, 2008.

We determined that the closure met the criteria for classification as a discontinued operation during 2008. During the first quarter of 2009, we recorded \$13,000 in loss from discontinued operations, net of tax for accretion of contractual lease obligations. Loss from discontinued operations, net of tax for the three months ended March 31, 2008, is comprised of the following (in thousands):

Restaurant sales	\$	693
Loss from discontinued operations before income tax benefit	\$	(136)
Income tax benefit		25
Loss from discontinued operations, net of tax	\$	(111)

3. Investments

The following is a summary of our investments (in thousands):

	Adjusted Cost	Gross Unrealized Losses	Estimated Fair Value
March 31, 2009			
Short-term investments	Available-for-sale securities:		
Certificates of deposit	\$ 372	\$	\$ 372
Money market securities	314		314
Long-term investments	Trading securities:		
Auction rate securities	6,513		6,513
Total investments	\$ 7,199	\$	\$ 7,199
December 31, 2008			
Short-term investments	Available-for-sale securities:		
Certificates of deposit	\$ 370	\$	\$ 370
Long-term investments	Trading securities:		
Auction rate securities	6,491		6,491
Total investments	\$ 6,861	\$	\$ 6,861

Table of Contents

As of March 31, 2009, our investment portfolio included auction rate securities with a par value of \$6.6 million. These securities are primarily AAA rated long term debt obligations secured by student loans, of which approximately \$6.0 million or 90% of the par value is guaranteed by the federal government under the Federal Family Education Loan Program. In addition, one of the securities not fully comprised of federal government guaranteed loans is A rated, but has an insurance policy guaranteeing both the principal and accrued interest. While the maturity dates of our auction rate securities range from 2029 to 2046, liquidity for these securities has historically been provided by an auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. Since February 2008, events in the credit markets have adversely affected the auction market for these types of securities and auctions for these securities have failed to settle on their respective settlement dates. As a result of the liquidity issues experienced in the credit markets, all of our auction rate securities have experienced failed auctions since February 13, 2008 and therefore do not currently have a readily determinable market value. We estimated the fair value of our auction rate securities using valuation models provided by third parties and internal analyses. The valuation models require numerous assumptions and assessments, including the following: (i) collateralization underlying each security; (ii) the present value of future principal and interest payments discounted at rates considered to reflect current market conditions; (iii) the creditworthiness of the counterparty; and (iv) the current illiquidity of the investments.

Our auction rate securities are classified as non-current, trading securities as they are subject to an agreement we entered into with UBS during October 2008 pursuant to which UBS issued to us Series C-2 Auction Rate Securities Rights. The agreement allows us the right to put the securities back to UBS at full par value between June 30, 2010 and July 2, 2012. In conjunction with this agreement, we elected to apply the provisions of SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, to this put option. Also as part of this agreement, UBS agreed to provide a line of credit through June 30, 2010 that is secured by the auction rate securities held with UBS. Both the put option and the auction rate securities are being marked to market value through the consolidated statements of operations each period. At March 31, 2009, the fair value of the put option and the auction rate securities was estimated at \$549,000 and \$5,964,000, respectively, and is included in long-term investments in our consolidated balance sheets. As a result, we recorded a gain of \$22,000 that is included in interest income and other, net for the three months ended March 31, 2009. As of March 31, 2009, we continued to classify our auction rate securities as long-term investments on our consolidated balance sheet due to the expected timing of when these securities will be redeemed at par value by our broker. We continue to earn interest on our auction rate securities at the maximum contractual rate which approximated 1.5% as of March 31, 2009.

4. Fair Value Measurements

Effective January 1, 2008, we adopted SFAS 157 for our financial instruments. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, SFAS 157 establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value.

- Level 1: Fair values determined by quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.
- Level 2: Fair values utilize inputs other than quoted prices that are observable for the asset or liability, and may include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Fair values determined by unobservable inputs that are not corroborated by market data and may reflect the reporting entity's own assumptions market participants would use in pricing the asset or liability.
- Our short-term investments represent fixed income and money market securities that are valued primarily using quoted market prices or alternative pricing sources and models utilizing market observable inputs. Money market

securities represent collateral for a letter of credit required under certain lease obligations.

Table of Contents

Our investments in auction rate securities are classified within level 3 because they are valued using a discounted cash flow model (see Note 3). The fair value of the put option is determined by comparing the fair value of the related auction rate securities to their par values and also considers the credit risk associated with UBS. This put option will be adjusted on each balance sheet date based on its then fair value. The fair value of the put option is based on unobservable inputs and is therefore classified within level 3 in the hierarchy. The following table presents information about our assets measured at fair value on a recurring basis at March 31, 2009, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value (in thousands):

Description	Fair Value Measurements at Reporting Date Using			March 31, 2009
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Certificates of deposit	\$ 372	\$	\$	\$ 372
Money market securities	314			314
Auction rate securities (including put option)			6,513	6,513
	\$ 686	\$	\$ 6,513	\$ 7,199

The following table summarizes the changes in fair value of our Level 3 auction rate securities as follows (in thousands):

	Three Months Ended March 31, 2009
Balance at December 31, 2008	\$ 6,491
Transfer to Level 3	
Total gains or losses (realized and unrealized)	
Included in earnings	22
Included in other comprehensive loss	
Net settlements	
Balance at March 31, 2009	\$ 6,513

5. Net Loss Per Share

Basic net loss is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted net loss per share excludes the dilutive effect of potential stock option and warrant exercises, which are calculated using the treasury stock method.

The following table sets forth the computation of basic and diluted net loss per share:

	Three Months Ended March 31, 2009	2008
	(in thousands, except per share data)	

Edgar Filing: KONA GRILL INC - Form 10-Q

Numerator:

Loss from continuing operations	\$	(1,083)	\$	(562)
Loss from discontinued operations		(13)		(111)

Net loss	\$	(1,096)	\$	(673)
----------	----	---------	----	-------

Denominator:

Weighted average shares basic		6,512		6,609
Effect of dilutive stock options and warrants				

Weighted average shares diluted		6,512		6,609
---------------------------------	--	-------	--	-------

Net loss per share Basic and Diluted:

Continuing operations	\$	(0.17)	\$	(0.08)
Discontinued operations				(0.02)

Net loss	\$	(0.17)	\$	(0.10)
----------	----	--------	----	--------

Table of Contents

For the three months ended March 31, 2009 and 2008, there were approximately 1,176,000, and 1,024,000 stock options and warrants outstanding, respectively, that were not included in the dilutive earnings per share calculation because the effect would have been anti-dilutive.

6. Accrued Expenses

Accrued expenses consisted of the following (in thousands):

	March 31, 2009	December 31, 2008
Accrued payroll	\$ 2,015	\$ 1,846
Business and income taxes	632	663
Sales taxes	618	643
Gift cards	539	654
Accrued occupancy	212	255
Other	933	817
	\$ 4,949	\$ 4,878

7. Debt and Credit Agreements***Credit Facility***

During October 2008, as part of the settlement agreement with UBS, our broker in which we have invested in auction rate security instruments, we entered into a line of credit that is secured by the auction rate security instruments held with the broker. Available borrowings under the line of credit are based upon terms specified in the agreement and are subject to adjustment by UBS after consideration of various factors. At March 31, 2009, \$4,574,000 was outstanding under the line of credit. See Note 3 for further information on the auction rate securities and the settlement agreement. Borrowings under the line of credit are callable by the broker at any time. The line of credit is structured at a cost that effectively offsets the interest earned on the auction rate securities. As a result of this callable feature, the line of credit is classified as short-term in the accompanying consolidated balance sheets, even though the loan does not expire until June 30, 2010.

Bridge Loan

On March 6, 2009, and as amended on April 7, 2009, we entered into a Note and Warrant Purchase Agreement (the Agreement) with certain accredited investors whereby we sold \$1,200,000 aggregate principal amount of 10% unsecured subordinated notes (Notes) and warrants to purchase shares of our common stock. The principal and accrued interest outstanding under the Notes are due and payable upon the closing of any offering of equity securities by us generating gross proceeds to us of at least \$2,500,000. Interest on the Notes is payable on the last day of each month, commencing on April 30, 2009. We may prepay the principal and accrued interest outstanding under the Notes at anytime without penalty. The interest rate on the Notes will increase to 16% per annum if the Notes are outstanding after September 2, 2009 or upon any event of default as specified in the Agreement.

For each \$100,000 issued in Notes, we issued to the noteholder three-year warrants to purchase 10,000 shares of our common stock at an aggregate exercise price per share of \$2.29, which was equal to 120% of the five-day average of the closing price of our common stock during the five trading days prior to the date of issuance. In connection with the issuance of the warrants, we recorded a discount to the bridge loan and a corresponding increase in stockholders equity of \$70,000 due to the warrants. The value of the warrants was derived through application of the Black-Scholes option pricing model. We amortized the debt discount to interest expense in the amount of \$10,000 for the three months ended March 31, 2009.

Table of Contents**8. Stock-Based Compensation**

We maintain stock award plans which provide for discretionary grants of incentive and nonstatutory stock options, restricted stock, and other types of awards to our employees and non-employee directors. Stock options issued under these plans are granted with an exercise price at or above the fair market value of the underlying common stock on the date of grant and generally expire five or ten years from the date of grant. Employee stock options generally vest 25 percent each year over a four-year period, while annual recurring awards for non-employee director options vest 25 percent each quarter over a one-year period.

The fair value of stock options granted during the three months ended March 31, 2009 and 2008 was estimated at the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	Three Months Ended March 31,	
	2009	2008
Expected volatility	50.2%	35.7%
Risk-free interest rate	1.7%	2.5%
Expected option life (in years)	4.0	3.7
Dividend yield	0.0%	0.0%
Weighted average fair value per option granted	\$ 0.78	\$ 3.53

We recognized stock-based compensation expense of \$127,000 and \$128,000 during the three months ended March 31, 2009 and 2008, respectively. As of March 31, 2009, there was approximately \$744,000 of unrecognized stock-based compensation expense related to unvested stock-based compensation arrangements, which is expected to be recognized over a weighted average period of 2.2 years.

9. Comprehensive Loss

Comprehensive loss is defined as the aggregate change in stockholders' equity, excluding changes in ownership interests. It is the sum of net loss and changes in unrealized gains or losses on available-for-sale securities. The components of comprehensive loss for the three months ended March 31, 2009 and 2008 were as follows (in thousands):

	Three Months Ended	
	March 31,	
	2009	2008
Net loss	\$ (1,096)	\$ (673)
Net unrealized losses on available-for-sale securities		(353)
Total comprehensive loss	\$ (1,096)	\$ (1,026)

10. Commitments and Contingencies

We are engaged in various legal actions, which arise in the ordinary course of our business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of our management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on our results of operations or financial condition.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This information should be read in conjunction with the unaudited consolidated financial statements and notes thereto included in Item 1 of Part I of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2008 contained in our 2008 Annual Report on Form 10-K. The following discussion contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements relating to our future economic performance, plans and objectives for future operations, and projections of restaurant sales and other financial items that are based on our beliefs as well as assumptions made by and information currently available to us. Factors that might cause actual events or results to differ materially from those indicated by these forward-looking statements may include the matters under Item 1A, Risk Factors in this report, our Annual Report on Form 10-K for the year ended December 31, 2008 and other reports filed from time to time with the SEC.

Overview

We currently own and operate 22 restaurants located in 14 states. We offer freshly prepared food, personalized service, and a contemporary ambiance that create a satisfying yet affordable dining experience that we believe exceeds many traditional casual dining restaurants with whom we compete. Our high-volume upscale casual restaurants feature a diverse selection of mainstream American dishes as well as a variety of appetizers and entrees with an international influence, including an extensive selection of sushi items. Our menu items are freshly prepared and incorporate over 40 signature sauces and dressings that we make from scratch, creating broad-based appeal for the lifestyle and taste trends of a diverse group of guests. Our menu is mostly standardized for all of our restaurants allowing us to deliver consistent quality meals. We believe that our vast menu and generous portions, combined with an average check of approximately \$24.00 per guest, offers our guests an attractive price-value proposition.

We continue to follow a disciplined growth plan focused largely on expanding our presence in new markets. Over the last four years, we have funded development of new restaurants primarily from the proceeds of our initial public offering, our private offering of common stock completed during November 2007, our bridge financing completed in March 2009, and cash flows from operations. We plan to open four restaurants during 2009, including our Richmond, Virginia restaurant which opened on January 22, 2009 and our Woodbridge, New Jersey restaurant which opened on April 28, 2009. We target our restaurants to achieve an average annual unit volume of \$4.5 million following 24 months of operations. We believe that in a stable economic environment our typical new restaurants experience gradually increasing unit volumes as guests begin to discover our concept and we begin to generate market awareness. Our restaurants are also subject to seasonal fluctuations. Sales in most of our restaurants typically are higher during the spring and summer months and winter holiday season.

As of September 13, 2008, we closed our restaurant in Naples, Florida to focus more on our profitable locations. As a result, we classified the Naples restaurant operations and related closure costs as discontinued operations in our consolidated financial statements.

We experience various trends in our operating cost structure. Cost of sales, labor, occupancy, and other operating expenses for our restaurants open at least 12 months generally trend consistent with restaurant sales, and we analyze those costs as a percentage of restaurant sales. We anticipate that our new restaurants will take approximately six months to achieve operating efficiencies as a result of challenges typically associated with opening new restaurants, including lack of market recognition and the need to hire and sufficiently train employees, as well as other factors. We expect cost of sales and labor expenses as a percentage of restaurant sales to be higher when we open a new restaurant, but decrease as a percentage of restaurant sales as the restaurant matures and as the restaurant management and employees become more efficient operating that unit. As a result, the volume and timing of newly opened restaurants has had, and is expected to continue to have, an impact on costs of sales, labor, occupancy, restaurant operating expenses, and preopening expenses. The majority of our general and administrative costs are fixed costs. We expect our general and administrative spending to decrease as a percentage of restaurant sales as we leverage these investments and realize the benefits of higher sales volumes.

Table of Contents

Key Measures We Use to Evaluate Our Company

Key measures we use to evaluate and assess our business include the following:

Number of Restaurant Openings. Number of restaurant openings reflects the number of restaurants opened during a particular reporting period.

Same-Store Sales Percentage Change. Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change in same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months. Same-store sales growth can be generated by an increase in guest traffic counts or by increases in the per person average check amount. Menu price changes and the mix of menu items sold can affect the per person average check amount.

Average Weekly Sales. Average weekly sales represents the average of restaurant sales measured over consecutive Monday through Sunday time periods.

Average Unit Volume. Average unit volume represents the average restaurant sales for all of our restaurants open for at least 12 months before the beginning of the period measured.

Sales Per Square Foot. Sales per square foot represents the restaurant sales for our restaurants open for at least 12 months, divided by the total leasable square feet for such restaurants.

Restaurant Operating Profit. Restaurant operating profit is defined as restaurant sales minus cost of sales, labor, occupancy, and restaurant operating expenses. Restaurant operating profit does not include general and administrative expenses, depreciation and amortization, or preopening expenses. We believe restaurant operating profit is an important component of financial results because it is a widely used metric within the restaurant industry to evaluate restaurant-level productivity, efficiency, and performance. We use restaurant operating profit as a percentage of restaurant sales as a key metric to evaluate our restaurants' financial performance compared with our competitors.

Key Financial Definitions

Restaurant Sales. Restaurant sales include gross food and beverage sales, net of promotions and discounts.

Cost of Sales. Cost of sales consists of food and beverage costs.

Labor. Labor includes all direct and indirect labor costs incurred in operations.

Occupancy. Occupancy includes all rent payments associated with the leasing of real estate, including base, percentage and straight-line rent, property taxes, and common area maintenance expense. We record tenant improvement allowances as a reduction of occupancy expense over the initial term of the lease.

Restaurant Operating Expenses. Restaurant operating expenses consist of all other restaurant-level operating costs, the major components of which are utilities, credit card fees, advertising, supplies, marketing, repair and maintenance, and other expenses. Other operating expenses contain both variable and fixed components.

General and Administrative. General and administrative includes all corporate and administrative functions that support operations and provide infrastructure to facilitate our future growth. Components of this category include management and staff salaries, bonuses, stock-based compensation and related employee benefits, travel, information systems, human resources, training, corporate rent, professional and consulting fees, and corporate insurance costs.

Table of Contents

Preopening Expense. Preopening expense consists of costs incurred prior to opening a new restaurant and is comprised principally of manager salaries and relocation, payroll and related training costs for new employees, including practice and rehearsal of service activities, and rent expense incurred from the date we obtain possession of the property until opening. We expense restaurant preopening expenses as incurred, and we expect preopening expenses to be similar for each new restaurant opening, which typically commence six to eight months prior to a restaurant opening.

Depreciation and Amortization. Depreciation and amortization expense consists of the depreciation of property and equipment and gains and losses on disposal of assets.

Interest Income and Other, Net. Interest income and other, net consists of interest earned on our cash and investments and any gains or losses on our investments.

Interest Expense. Interest expense includes the cost of servicing our debt obligations, net of capitalized interest.

Financial Performance Overview

The following table sets forth certain information regarding our financial performance for the three months ended March 31, 2009 and 2008.

	Three Months Ended March 31,	
	2009	2008
Restaurant sales growth	7.5%	22.3%
Same-store sales percentage change (1)	(9.6)%	(2.4)%
Average weekly sales comparable restaurant base (2)	\$ 73,347	\$ 81,122
Average weekly sales non-comparable restaurant base (3)	\$ 66,331	\$ 80,106
Average unit volume (in thousands) (4)	\$ 936	\$ 1,060
Sales per square foot (4)	\$ 132	\$ 150
Restaurant operating profit (in thousands) (5)	\$ 3,059	\$ 2,939
Restaurant operating profit as a percentage of sales (5)	15.7%	16.3%

(1) Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change for same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months.

- (2) Includes only those restaurants in the comparable restaurant base.
- (3) Includes only those restaurants that are not in the comparable restaurant base that were open for the entire period.
- (4) Includes only those restaurants open for at least 12 months before the beginning of the period measured.
- (5) Restaurant operating profit is not a financial measurement determined in accordance with generally accepted accounting principles and should not be considered in isolation or as an alternative to income (loss) from operations. Restaurant operating profit may not be comparable to the same or similarly titled measures computed by other companies.

Table of Contents

The table below sets forth our calculation of restaurant operating profit and reconciliation to loss from operations, the most comparable GAAP measure.

	Three Months Ended March 31,	
	2009	2008
	(in thousands)	
Restaurant sales	\$ 19,455	\$ 18,103

Loss from discontinued operations, net of tax		(0.6)
Net loss	(5.6)%	(3.7)%

Three Months Ended March 31, 2009 Compared with Three Months Ended March 31, 2008

Restaurant Sales. Restaurant sales increased by \$1.4 million, or 7.5% to \$19.5 million during the first quarter of 2009 from \$18.1 million during the prior year period. The sales increase was primarily the result of restaurant sales associated with the opening of four new restaurants since June 2008, partially offset by an overall reduction in guest traffic at our existing restaurants resulting from the slowdown in the U.S. economy which has negatively impacted overall consumer traffic in the restaurant industry. Reduced guest traffic resulted in a comparable restaurant sales decline of 9.6% during the first quarter of 2009. In particular, lower levels of guest traffic were experienced by our restaurants located in areas greatly affected by the housing and economic crisis, including Arizona, Nevada, and Michigan.

Cost of Sales. Cost of sales decreased \$0.1 million, or 1.8% to \$5.1 million during the first quarter of 2009 from \$5.2 million during the prior year period. Cost of sales as a percentage of restaurant sales decreased 2.5% to 26.2% during the first quarter of 2009 from 28.7% during the prior year period. Cost of sales during the first quarter of 2009 benefited from increased purchasing efficiency and reduced waste resulting from the rollout of an automated food cost and inventory management system that was completed during July 2008. Cost of sales during the first quarter of 2009 was also positively affected by lower costs for certain commodities.

Labor. Labor costs for our restaurants increased \$0.6 million, or 10.2% to \$6.7 million during the first quarter of 2009 from \$6.1 million during the prior year period. This increase was primarily due to the opening of four new restaurants since June 2008. Labor expenses as a percentage of restaurant sales increased 0.9% to 34.7% during the first quarter of

2009 from 33.8% during the first quarter of 2008. This increase was primarily the result of reduced leverage of fixed labor costs resulting from lower average sales volumes. In addition, higher average salaries to attract and retain qualified restaurant managers and federal and state minimum wage increases implemented during the second half of 2008 and the beginning of 2009 contributed to increased labor costs as a percentage of sales.

Table of Contents

Occupancy. Occupancy expense increased by \$0.3 million, or 21.0% to \$1.5 million during the first quarter of 2009 from \$1.2 million during the prior year period. Occupancy expenses as a percentage of restaurant sales increased 0.9% to 7.8% during the first quarter of 2009 from 6.9% during the first quarter of 2008. The increase reflects decreased leverage of the fixed portion of these costs from lower average weekly sales, partially offset by reduced percentage rent.

Restaurant Operating Expenses. Restaurant operating expenses increased by \$0.4 million, or 17.1% to \$3.0 million during the first quarter of 2009 from \$2.6 million during the first quarter of 2008. Restaurant operating expenses as a percentage of restaurant sales increased 1.3% to 15.6% during the first quarter of 2009 from 14.3% during the prior year period. During the first quarter of 2009, higher utilities costs and increased repair and maintenance costs as well as reduced leverage from lower average weekly sales contributed to the increase in restaurant operating expenses as a percentage of sales.

General and Administrative. General and administrative expenses were flat at \$1.9 million during both the first quarter of 2009 and 2008. During the first quarter of 2009, lower salary costs resulting from the downsizing and realignment of certain corporate office staff combined with reduced travel expenses were offset by approximately \$0.1 million in legal fees associated with stockholder activities. General and administrative expenses as a percentage of restaurant sales decreased 0.5% to 9.7% of restaurant sales during the first quarter of 2009 compared to 10.2% of restaurant sales during the prior year period as we leverage these costs over a larger revenue base.

Preopening Expense. Preopening expense increased \$0.3 million to \$0.5 million during the first quarter of 2009 compared to \$0.2 million during the first quarter of 2008. The increase in preopening expense is attributable to the timing of new restaurant openings. Preopening expense for the first quarter of 2009 is primarily attributable to costs associated with the opening of one restaurant during the first quarter of 2009 and the planned opening of a restaurant during the second quarter of 2009 compared to no restaurant openings during the first quarter of 2008.

Depreciation and Amortization. Depreciation and amortization expense increased \$0.2 million, or 11.1% to \$1.7 million during the first quarter of 2009 from \$1.5 million during the prior year period. The increase was primarily the result of additional depreciation and amortization from four restaurants opened since June 2008. Depreciation expense for the first quarter of 2009 reflects a reduction of approximately \$0.1 million due to the fourth quarter of 2008 impairment of long-lived assets at our Lincolnshire, Illinois restaurant. Depreciation and amortization expense as a percentage of restaurant sales increased 0.2% to 8.9% during the first quarter of 2009 from 8.7% during the first quarter of 2008 reflecting reduced leverage of these fixed costs from lower average weekly sales.

Interest Income and Other, Net. Interest income and other, net decreased during the first quarter of 2009 due to lower average interest rates coupled with lower average investment balances, as compared to the prior year. Please refer to Note 3 to the unaudited consolidated financial statements for discussion of our investment in auction rate securities.

Interest Expense. Interest expense was essentially flat when comparing the first quarter of 2009 to the first quarter of 2008.

Provision for Income Taxes. During the first quarter of 2009, we recorded income taxes of \$30,000 compared to \$75,000 during the first quarter of 2008. The provision for income taxes for both periods reflects taxes for states in which taxes are not calculated based upon net income.

Table of Contents

Potential Fluctuations in Quarterly Results and Seasonality

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the following:

- timing of new restaurant openings and related expenses;
- restaurant operating costs and preopening costs for our newly-opened restaurants, which are often materially greater during the first several months of operation than thereafter;
- labor availability and costs for hourly and management personnel;
- profitability of our restaurants, especially in new markets;
- increases and decreases in comparable restaurant sales;
- impairment of long-lived assets and any loss on restaurant closures;
- changes in borrowings and interest rates;
- general economic conditions;
- weather conditions or natural disasters;
- timing of certain holidays;
- new or revised regulatory requirements and accounting pronouncements;
- changes in consumer preferences and competitive conditions; and
- fluctuations in commodity prices.

Our business is also subject to seasonal fluctuations. Historically, sales in most of our restaurants have been higher during the spring and summer months and winter holiday season. Consequently, our quarterly and annual operating results and comparable restaurant sales may fluctuate significantly as a result of seasonality and the factors discussed above. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year and comparable restaurant sales for any particular future period may decrease. In the future, operating results may fall below the expectations of our investors. In that event, the price of our common stock would likely decrease.

Liquidity and Capital Resources

Our primary capital requirements are for new restaurant development. During the last four years, we have funded our development of new restaurants primarily from the proceeds of our initial public offering, cash flows from operations, and the sale of debt and equity securities in private placement transactions. Subject to availability of capital on terms acceptable to us, we intend to continue developing new restaurants in markets where we believe our concept will have broad appeal and attractive restaurant-level economics. Similar to many restaurant chains, we utilize operating lease arrangements for all of our restaurant locations. We believe that our operating lease arrangements provide appropriate leverage for our capital structure in a financially efficient manner. We are typically required to expend cash to perform site-related work and to construct and equip our restaurants. The average investment cost for our restaurants depends upon the type of lease entered into, the amount of tenant improvement allowance we receive from landlords, and whether we assume responsibility for the construction of the building. We expect the cash investment cost of our prototype restaurant to be approximately \$2.5 million, net of landlord tenant improvement allowances between \$0.7 million and \$1.2 million, and excluding cash preopening expenses of approximately \$0.4 million. We expect these costs will vary from one market to another based on real estate values, zoning regulations, labor markets and other variables. Restaurants that are subject to ground leases and do not receive landlord tenant improvement allowances typically require a significantly higher cash investment. We also require capital resources to maintain our existing base of restaurants and to further expand and strengthen the capabilities of our corporate and information technology infrastructures.

Table of Contents***Future Capital Requirements***

Our capital requirements, including development costs related to the opening of new restaurants, have historically been significant. Our future cash requirements and the adequacy of available funds will depend on many factors, including the operating performance of our restaurants, the pace of expansion, real estate markets, site locations, the nature of the arrangements negotiated with landlords and the credit market environment.

Based upon anticipated cash flow generated from operations and availability under our line of credit, we have insufficient cash to fund all planned restaurant openings during 2009. As a result of our need for capital to fund new restaurant construction, our Board of Directors has formed a special committee to work closely with management and the Company's outside professional advisors to identify, review and oversee the structuring, negotiation and execution of reasonable financing alternatives in the best interests of the Company and its stockholders. The special committee recommended, and the Board of Directors approved, the bridge loan financing and rights offering transactions described below.

Our current operations generate sufficient cash flow to fund current operations and general and administrative costs. Due to a shortfall of available capital, we have suspended construction of one restaurant and delayed the start of construction on another restaurant planned to open in 2009 pending the receipt of additional debt or equity funding. We are seeking to raise capital through public or private equity or debt financing, including the rights offering described below. Financing to construct new restaurants may not be available on acceptable terms, or at all, and our failure to raise capital when needed could impact our growth plans, financial condition, and results of operations. Additional equity financing may result in dilution to current shareholders and debt financing, if available, may involve significant cash payment obligations or financial covenants and ratios that may restrict our ability to operate our business.

Bridge Loan

On March 6, 2009, and as amended on April 7, 2009, we entered into a Note and Warrant Purchase Agreement (the Agreement) with certain accredited investors whereby we sold \$1.2 million aggregate principal amount of 10% unsecured subordinated notes (Notes) and warrants to purchase shares of our common stock. The principal and accrued interest outstanding under the Notes are due and payable upon the closing of any offering of equity securities by the Company generating gross proceeds to the Company of at least \$2.5 million. Interest on the Notes is payable on the last day of each month, commencing on April 30, 2009. We may prepay the principal and accrued interest outstanding under the Notes at anytime without penalty. The interest rate on the Notes will increase to 16% per annum if the Notes are outstanding after September 2, 2009 or upon any event of default as specified in the Agreement. For each \$100,000 issued in Notes, we issued to the noteholder three-year warrants to purchase 10,000 shares of our common stock at an aggregate exercise price per share of \$2.29, which was equal to 120% of the five-day average of the closing price of the Company's common stock during the five trading days prior to the date of issuance.

Rights Offering

As part of the Agreement, we filed with the SEC a registration statement on Form S-3 to reflect a rights offering with targeted gross proceeds to the Company of \$3.5 million (the Rights Offering) pursuant to which each stockholder of the Company received one non-transferrable subscription right for every 2.5 shares of common stock owned on April 17, 2009. Each subscription right entitles the holder to purchase one share of common stock at a price of \$1.35 per share. The terms of the Agreement provide that any shares of common stock that are not subscribed for in the Rights Offering will be offered to the investors of the Notes on a pro rata basis based on the aggregate principal amount of Notes outstanding and at the same subscription price as offered to the existing stockholders in the Rights Offering. The subscription rights expire on May 22, 2009.

Table of Contents***Equipment Loans***

As of March 31, 2009, we had five equipment term loans with lenders, each collateralized by restaurant equipment. The outstanding principal balance under these loans aggregated \$1.9 million. The loans bear interest at rates ranging from 7.0% to 8.5% and require monthly principal and interest payments aggregating approximately \$71,000. The loans mature between June 2010 and June 2012. The loans also require us to maintain certain financial covenants calculated at the end of each calendar year, and we were in compliance with all such financial covenants as of December 31, 2008.

Credit Facility

During October 2008, as part of the settlement agreement with UBS, our broker in which we have invested in auction rate security instruments, we entered into a line of credit that is secured by the auction rate security instruments held with the broker. Available borrowings under the line of credit are based upon terms specified in the agreement and subject to adjustment by UBS after consideration of various factors. At March 31, 2009, \$4,574,000 was outstanding under the line of credit. Borrowings under the line of credit are callable by the broker at any time. The line of credit is structured at a cost that effectively offsets the interest earned on the auction rate securities. As a result of this callable feature, the line of credit is classified as short-term in the accompanying consolidated balance sheets, even though the loan does not expire until June 30, 2010. See Note 3 to the unaudited consolidated financial statements for further information on the auction rate securities and the settlement agreement.

Cash Flows

The following table summarizes our primary sources and uses of cash during the periods presented (in thousands).

	Three Months Ended March 31,	
	2009	2008
Net cash provided by (used in):		
Operating activities	\$ 1,506	\$ 1,718
Investing activities	(4,615)	(3,424)
Financing activities	3,125	(133)
Net increase (decrease) in cash and cash equivalents	\$ 16	\$ (1,839)

Operating Activities. During the first three months of 2009, net cash provided by operating activities was \$1.5 million and exceeded our net loss by \$2.6 million due principally to the effect of depreciation and amortization and the receipt of landlord tenant improvement allowances. During the first quarter of 2008, net cash provided by operating activities was \$1.7 million and exceeded our net loss by \$2.4 million due principally to the effect of depreciation and amortization and the timing of payment of accounts payable.

Investing Activities. We fund the development and construction of our new restaurants primarily with cash and short-term investments and borrowings under our line of credit and bridge loan. Net cash used in investing activities was \$4.6 million during the first quarter of 2009 reflecting \$4.3 million primarily to fund construction at our Richmond, Virginia and Woodbridge, New Jersey restaurants. Net cash used for investing activities was \$3.4 million during the first quarter of 2008, primarily reflecting the funding of construction at our Gilbert, Arizona and West Palm Beach, Florida restaurants.

Table of Contents

Financing Activities. Net cash provided by financing activities was \$3.1 million during the first quarter of 2009 reflecting \$2.1 million in net borrowings under our line of credit and \$1.2 million in proceeds from a bridge loan financing transaction completed during March 2009, partially offset by \$0.2 million in principal payments on equipment loans. Net cash used in financing activities was \$0.1 million for the first quarter of 2008 principally consisting of principal payments on equipment loans, partially offset by proceeds from the issuance of common stock from the exercise of stock options and employee stock plan purchases.

Critical Accounting Policies

Critical accounting policies are those that we believe are most important to the portrayal of our financial condition and results of operations and also require our most difficult, subjective, or complex judgments. Judgments or uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting policies previously reported in our Annual Report on Form 10-K for the year ended December 31, 2008.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

Interest Rates

We are exposed to market risk primarily from fluctuations in interest rates on our investments. We held approximately \$7.2 million in investments as of March 31, 2009. Changes in interest rates affect the investment income we earn on our investments and, therefore, impact our cash flows and results of operations. For the three months ended March 31, 2009, the average interest rate earned on our investments was approximately 1.5%. A hypothetical 100 basis point decline in the interest rate earned on our investments would not materially impact our results of operations or financial condition.

Primary Market Risk Exposures

Our primary market risk exposures are in the areas of commodity costs, labor costs, and construction costs. Many of the food products purchased by us are affected by changes in weather, production, availability, seasonality, and other factors outside our control. In addition, we believe that almost all of our food and supplies are available from several sources, which helps to control food commodity risks. We also believe that we have the ability to increase certain menu prices in response to food commodity price increases. Our labor costs are impacted by increases in the minimum wage rate as many of our employees are paid labor rates related to federal and state minimum wage laws. We have exposure to rising construction costs, which may impact our actual cost to develop new restaurants. Although the cost of restaurant construction will not impact significantly the operating results of the restaurant, it would impact the return on investment for such restaurant. In addition, many of our leases require us to pay taxes, maintenance, repairs, insurance, and utilities, all of which are generally subject to inflationary increases.

Item 4. Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

We have evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have each concluded that our disclosure controls and procedures are effective to ensure that we record, process, summarize, and report information required to be disclosed by us in our quarterly reports filed under the Securities Exchange Act within the time periods specified by the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Changes in Internal Control over Financial Reporting

During the quarterly period covered by this report, there have not been any changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

On April 1, 2009, Samuel Beren, as trustee for the Samuel Beren Trust, filed a stockholder derivative suit in the Court of Chancery of the State of Delaware. The suit was brought on behalf of us against our directors and the purchasers of our subordinated promissory notes and warrants issued pursuant to a Note and Warrant Purchase Agreement dated March 6, 2009, and names us as a nominal defendant. The complaint alleges that our directors breached their fiduciary duties of loyalty, good faith, and due care to us, and that the noteholders aided and abetted such breach, in connection with certain of our fundraising efforts. The suit seeks unspecified damages, interest, reasonable attorneys' fees, expert witness fees and other costs, and any further relief the court deems just and proper. We believe that the allegations in the complaint are without merit and we intend to defend vigorously this action.

Item 1A. Risk Factors

A description of the risk factors associated with our business is contained in Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, 2008 and the Registration Statement on Form S-3 filed on April 10, 2009 (SEC file no. 333-158278). These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

Not applicable.

Item 5. Other Information

Not applicable.
