Section 8 Other Events

Item 8.01 Other Events.

World Energy Solutions, Inc. (the Company) has signed a Research Agreement with the University of Florida for the design of the Company's Pure Air filtration system. Early prototypes of the Pure Air technology have shown to remove 99% of all targeted compounds.

The Research Agreement is being sponsored by the University's Environmental Systems Commercial Space Technology Center (ES-CSTC) at Gainesville, Florida, under the initiative of its Director, Mr. William Sheehan. Mr. Sheehan and his team have agreed to assist the Company in identifying and pursuing the commercialization of the Pure Air technology. ES-CSTC member, Ms. Kristen Riley, formerly of NASA, will be in charge of identifying industrial and commercial applications for the technology and leading its marketing efforts. The Pure Air technology is a derivative of NASA-sponsored research at the University.

The NASA Johnson Space Center funded the original study by the University for the Pure Air technology through its Advanced Life Support program which focuses on the need to revitalize air for long-duration space flights.

Dr. David Mazyck of the University of Florida and Technical Lead for the ES-CSTC will provide the design details based on pre-production units and previous experimental models. After production, the University will evaluate the commercial readiness of the Pure Air technology.

The Pure Air prototype is expected to be completed within 3 weeks and be ready for trials by September 25, 2007. Assembly will be carried out at World Energy Solutions' Research & Development laboratory, adjacent to the Company's corporate headquarters in St. Petersburg, Florida. Testing is estimated to take an additional 1-2 months at which time the prototype will be exhibited to manufacturers of pure air equipment.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

WORLD ENERGY SOLUTIONS, INC.
